## Electing the Mayor

Best for Christchurch

My principal place of residence is in the Christchurch City Council area.

It has been a privilege to lead the city through the challenging times we've had to face in recent times.

There's a real sense of momentum as Christchurch starts to emerge as one of New Zealand's most liveable and potentially sustainable cities. That's why I'm committed to meeting our net carbon neutral goals, as well as setting risk and resilience measures to guide good decision-making.

I've prioritised the basics - pipes, roads, parks, facilities. However there's more to be done.

My top priority is drinking water, and I promise to fight any further attempts to impose mandatory chlorination on our city.

We can deliver water that's both safe and chlorine-free.

I will also ensure rates increases return to more sustainable levels.

I offer experience, continuity and stable leadership, enabling Christchurch to meet the challenges that lie ahead.
