

Christchurch City Council

Electing the Mayor

Aaron WHITE

Independent

My principal place of residence is in the Christchurch City Council area.

I am running for Christchurch mayoralty to give the people of Christchurch their voices back after years of not being listened too. I want more consultation with residents, less closed-door meetings and create a more open council. I also want to see traction gained on rebuild anchor projects instead of the delayed mess of the status quo. I want to see money spent in our struggling communities that feel like they have been forgotten by local government and where it needs to be spent by getting community assets repaired and upgraded, roading infrastructure back to a pre-quake standard, upgrade and build more to social housing stock and rates increases on vacant land to stimulate growth in our communities and CBD. We need to find alternatives to cycle and bus lanes as they do more harm than good and have a negative effect on residents and business owners in the area.
