

Christchurch City Council

Electing the Mayor

Peter WAKEMAN

STOP Trashing Our Planet

My principal place of residence is in the Christchurch City Council area. I am also standing for Fendalton Ward Councillor and the Canterbury District Health Board.

Climate change has overshoot, triggering the temperature-increasing self-feedback loops. This implies a current worsening food-production crisis. Recent governments have prioritized dairy and other exports over domestic food and water security. Wakeman's first objective, as mayor, will be to ensure domestic water, food and health security stay untainted in an increasingly hostile ecological environment. Elevate natural health to a complementary and equal footing with the current approach which has only very limited options.

<https://stop366.wordpress.com/>

For the sake of our children and all life on Earth, stop trashing our Planet. Wakeman believes that the Government must bail out Christchurch as regards nature's destruction to help reduce costs to the local community. Governments have prioritized dairy and other exports over domestic food and water security. It is time to support local leadership, so please vote.
