

Christchurch City Council
Halswell Ward
Electing 1 Councillor

Paul LONSDALE

My principal place of residence is in the Halswell Ward area.

Is Christchurch shaping up as the city you want it to be?

I am running for City Council because I believe we can do better - much better.

We need better control over our water and waterways, better control over our finances to ease the burden of rate increases and better control over our growth so Halswell remains a great place to live now and into the future.

As an independent candidate who has a proven ability for getting things done, I will represent our community's views and not be swayed by Wellington politics. We need to get back to local representation.

With many years of successful governance and management experience I have the knowledge and skills to make our rates money go further.

With your support, I will work hard to ensure our community's voice is heard at the Council table.

We can do better - much better.
