

Christchurch City Council

Electing the Mayor

Hugo KRISTINSSON

My principal place of residence is in the Christchurch City Council area.

My focus as mayor would be on our community, housing, employment, the environment and council facilities.

What is of paramount importance is the residential and business earthquake recovery.

The heritage that gives Christchurch its unique identity should be treasured. A further essential is integrating our rivers and green spaces. Sound finance is fundamental to a successful mayoralty.

I aim to work with central government and create an empowered Christchurch. I passionately believe Christchurch has a wonderful opportunity to become a model for education, community, business and tourism for generations to come, not just in New Zealand but internationally.

I would like to provide an alternative innovative vision to unite Christchurch. The younger generation represents the key to our future and we need to ensure they find Christchurch an exciting and desirable place to live.

If elected, I am determined to follow the guiding principles of democracy transparency and accountability.
