During these floods, although we have been fortunate in not having water enter the house; in the event of any emergency we could not leave the property, neither could anyone (such as doctor) enter the property.

Dredge and deepen the river and make room for the water - at least it would help lower the levels at high water and provide some quick term relief. Talk of cuts etc. have been going on for years with no apparent results.

NB as our house is approx 20ft higher than the road, it is very unlikely that any floodwaters would have entered it in earlier years, however the garage is much closer to road level and may have flooded.

- High section on Terrace.
- The effects of all major floods was reduced after the last dredging of river some years ago. Especially the dredging from Tunnell Round-a-bout to Ferry mead.
- Since the heavy clay deposit from the Gashness housing project was Hospital, the river has silted & no soundings have been taken. Although tidal the river has a mud bar at Ferry mead for low-water tide outflow.
