

What happens next?

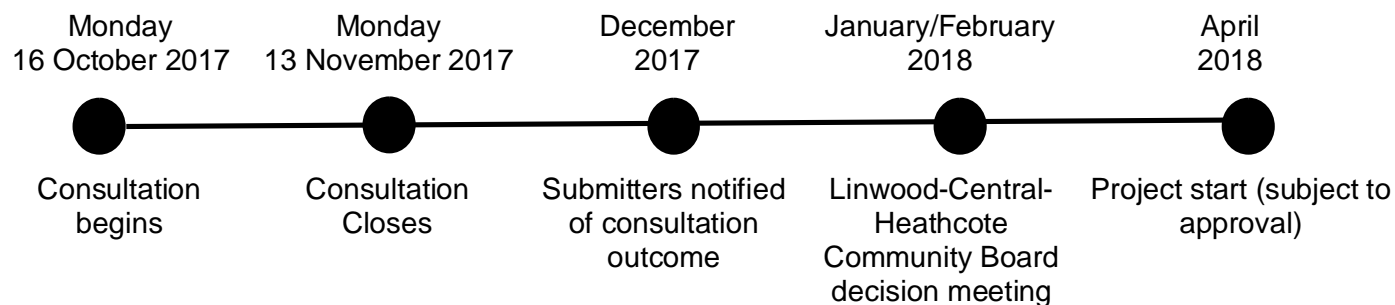

Once the consultation period has closed all feedback will be considered by the project team, and this may result in further changes to the concept plans.

The final plans and consultation feedback will then be presented as a report to the Linwood-Central-Heathcote Community Board for approval. If these plans are approved then the project will move into detailed design (this involves the creation of the technical construction drawings) and then a tender process.

At this stage we are anticipating a decision to be made by the Community Board in early 2018 at their first meeting for the year.

The project team are then aiming for the construction works to commence in April 2018, this work is expected to take 12-14 weeks to complete. However this is subject to a number of factors such as consent approvals (if required), contractor availability, weather and ground conditions on site.

Timeline:

Come and talk to us

If you would like to come and chat with the project team about this project, please drop in and see us.

Date: Saturday 28 October 2017
Time: Drop in at anytime between 10 am and 12 noon
Location: Scarborough Park, Heberden Avenue, Sumner.

Please note: If there is heavy rain the drop in session will take place on Saturday 4 November instead.

Location of Scarborough Park, Sumner.

Scarborough Park, Sumner: Playground renewal

haveyoursay

ccc.govt.nz/haveyoursay

Christchurch City Council 

What is this project and why are we doing it?

The current play equipment at Scarborough Park is due for renewal. Scarborough Park is a heritage park located on Heberden Avenue in Sumner.

In December 2016 the project team asked the community to complete a survey to help us understand the type of play equipment the community would like to have included in this park. From this survey we discovered that the most popular type of play equipment involves swinging, climbing, nature play and sliding.

There were also some specific requests for large games, a scooter track, shade, seating, nature tunnels, monkey bars, an obstacle course, to make it toddler friendly, swings, a climbing net and another rocking horse.

The project team also met with a small group of students from Our Lady Star of the Sea School in Sumner in August 2017 to check that we were on the right track.

Scarborough Playground, Sumner.

This work has now resulted in the enclosed concept plan, which we would like community feedback on. More detail on each item of equipment is included in this leaflet. We are specifically interested to know what colour theme is preferred for the play equipment.

Your ideas

The project team would like to thank everyone who provided us with ideas for the playground. You can view more of these ideas online at the Council "Have your Say" page <https://ccc.govt.nz/the-council/consultations-and-submissions/haveyoursay/show/51>

Have your say

The project team have used community feedback to put together the landscape plans for Scarborough Park. This is now your opportunity to let us know what you think. We are specifically interested to know what colour scheme you would like to see for the play equipment.

| Colour option | Colour description |
|---|--|
| Neutral colours  | Mainly timber with some red and blue. |
| Heritage colours  | Timber with red, blue and white colours. |
| Paddling pool colours (pool located near Scarborough Park).  | Timber with green, blue, yellow and red. |

1. Nature play items

This type of play equipment encourages children to enjoy the natural environment and assists with the development of balance and co-ordination. This equipment is only available in neutral colours.

Example of nature play equipment

2. Climbing tower with slides

There were a number of requests for a wiggly slide both through the survey responses and from speaking with the school students. This 5.8 metre high tower includes three slides. It also includes a telescope, a vertical life buoy net and a talk tube.

Colour themes for the climbing tower:

Neutral colours

Heritage colours

Paddling pool colours

3. Eagles lair climbing net

Colour themes for the Eagles lair:

From left to right example of neutral colours and paddling pool colours

4. Triple swing set

The chain covers for the swing set will be coloured to match each of the colour schemes.

Example of neutral swing set

5. Rocking horse

There is one colour option for this horse, which is cream and red.

Rocking horse to be included

6. Mouse wheel

The mouse wheel could be coloured to match either of the themes.

Mouse wheel

7. Dancing snake rope swing

This piece of play equipment is only available as per the image below, however the caps on the end of the posts will match the colour scheme.

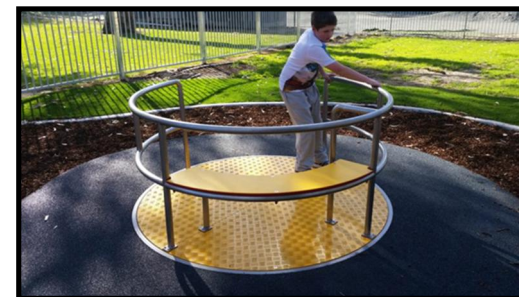

Dancing snake rope swing

8. Spring toys/rockers

A selection of beach themed spring toys will be included that match either the neutral, heritage or paddling pool colour themes.

9. Inclusive Carousel

The carousel installed would match either the of the natural, heritage or paddling pool themes.

Inclusive carousel

10. Scooter path

There were also requests for a scooter track or path. There is a 1.2 metre wide sealed scooter path proposed around the playground as part of the concept plans. This path will be black asphalt.

Playground accessibility

In order to make the playground more accessible to those in wheelchairs or with prams, we are proposing using rubberised safety surfacing.

Other work included as part of this project

Tree removal works

The concept plan includes the removal of one Macrocarpa tree. This tree is in poor condition and if it remained, it would be an ongoing health and safety concern. The removal provides additional space for more play equipment.

We will look at how we can incorporate the tree trunk and branches into the nature play area.

Macrocarpa tree (circled in red) proposed for removal

Drainage, turf improvements and irrigation works

There will be some minor improvements to the drainage, turf and irrigation within the playground area. Existing lawn irrigation will be extended.

Park furniture

There are currently six picnic tables located within the park. We are proposing to add three more accessible picnic tables around the playground.

Rubbish bin provisions will also be considered as part of this project.

Other planting and pruning works

The concept plan includes increasing the low planting in some of the bedding areas and general pruning works to improve visibility into the park.

Pathway renewal works

The current pathway is in fairly good condition, but parts may need a tidy up. This will be assessed during detailed design and will be subject to available funding
