Subject: RE: submission re Edgeware Pool

Submission to the CCC Annual Plan 2022/23

Name: __Te Koha Soryl_____

Would you like to speak to the Council about your submission? No

I/we support the Council contributing \$3m to Edgeware Pool Group to rebuild the Edgeware Pool, because:-

Edgeware Pool was always such an asset to the community and I missed out on using it because the council pulled it down when I was little. My older siblings got to have fun there and I wish I had. I would like to go to it if it is rebuilt and hang out with my friends in the summer and have fun in the water. I am 17 and there is nowhere else around in our community where older kids like me can do that. Please give the money so it can be brought back to our community. Thanks.

Yes

I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

Feedback

1.5 Capital Programme

1344 Milns, Sparks & Sutherlands Intersection Improvement (\$630k in 2024/25 or later)

The traffic along Sparks Road is steadily increasing, contributed by Halswell folk and by people living in Selwyn District. It is very difficult if not dangerous to walk from Halswell road towards Hendersons road around the intersections of Milns road and Sutherland Road on foot. It's not much better by car turning out of Milns Road and Sutherlands Road difficult. Milns Road is especially problematic because it is on the inside of a blind corner. For people on bikes or walking the situation is virtually impossible.

Once on Sparks Road, cyclists have only a narrow shoulder to travel along yet it is a key route for accessing Quarryman's Trail. City Council and Waka Kotahi put a lot of money into constructing Quarryman's Trail surely it should be easier to access via foot paths and wider roads?

Action requested bring Project 1344 forward to 2022/23 to reflect current realities of a busy and difficult intersection.

1.6 Further Comments

With covid still affecting businesses and especially the events industry I would strongly encourage funding to support events happening in Christchurch. Events have a huge role to play in connecting communities and have a huge economic impact for the city which in turn helps the hospitality and tourism industries.

Feedback

1.5 Capital Programme

Please give the 3 million to get Edgware Pool open again. It has been such a loss to our community, especially since Centennial was also shut. St Albans needs to get our pool back - it should never have been pulled down in the first place and was done in opposition to what the community wanted. I support Edgware Pool and the CCC backing it.

Kelly, Samantha

From: gerry tyler-smith 
Sent: Thursday, 14 April 2022 3:57 pm
To: CCC Plan
Subject: Submission to the CC Annual Plan 2022/23

I support the Council contributing \$3 million to rebuild the Edgeware Pool to address a number of social needs:

- 1) The district sorely lacks exercise facilities which cater for the many elderly and disabled people who live in the area. A heated, year-round pool could provide gentle, therapeutic exercise for those otherwise neglected by community facilities.
- 2) For child residents, there are no swimming pools within walking distance. The many drownings which have occurred this past summer, eloquently speaks for the need for experience in aquatic activities.
- 3) The area's primary and pre-schools could benefit greatly by using the pool for water safety education and swimming lessons.
- 4) Providing easily-accessible venues for the youth of the neighbourhood decreases crime, vandalism and graffiti. (There was a noticeable increase in these anti-social behaviours immediately following the Council's destruction of the pool, the smashing of the Abberley Park sundial being a case in point.)
- 5) Providing a recreation facility within the neighbourhood reduces the need for automotive transport in order to access it, and consequently reduces carbon emissions, which I understand, is a goal of the Christchurch City Council.

I have lived in Edgeware since 1998, and was a frequent user of the now-demolished pool. As a dog-walker for many years, I have observed the many changes, both positive and negative, which have taken place in this lovely neighbourhood.

Sincerely

256

Submission to the CCC Annual Plan 2022/23

Name: TIKA ORMOND

Would you like to speak to the Council about your submission? Yes No

I/we support the Council contributing \$3m to Edgware Pool Group to rebuild the Edgware Pool, because:- this will be a real - an important & vital part of the community. Water safety

has become a major issue in our country, as has domestic violence. Access to a swimming pool, within walking/bus distance - brings whānau & friends together to support, encourage each other & those of the community. It was a major loss to our community when it closed. It is these activities of fitness, community & fun that help our city grow again.

Feedback

1.1 Rates
I dont agree with any rates increases until the oxidation pond stench that is affecting our health has been dealt with, and Christchurch has been tidied up in general

1.2 Revenue, spending and borrowing
Unnecessary spending needs to be stopped. Case in point: those ugly statues in Woolston, amongst others

1.4 Fees and Charges
I dont agree with the 3 waters at all. Most people didnt agree, yet we were all ignored

1.5 Capital Programme
Christchurch needs to be returned to the garden city that it once was. Its overgrown, dirty and unkempt. Look at Dunedin, Nelson, Timaru, Blenheim etc, and then take a look at Christchurch

I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

Feedback

1.1 Rates

Whilst few people welcome rate rises, our city has a number of projects that need to be advanced now rather than further down the track, particularly those that are providing resilience in terms of infrastructure or improving the quality of our green spaces for the well-being of our natural and human communities.

1.2 Revenue, spending and borrowing

Further to my initial comment, there are a number of projects which need to move forward toward completion in order to future proof our city, hence I think borrowing to meet these increased costs is necessary at this stage. In short, borrow now to meet the needs of today while also thinking about & planning for a future that will be impacted by climate change.

1.3 Revenue and Financing and Rates Remission Policies

No

1.4 Fees and Charges

It seems eminently sensible that fees & charges are standardised across the recreation centres and that language used when outlining fees is clear and easy for all people to understand. It is really encouraging to see the Council trying to be more inclusive in the way they operate the community /recreational centres. The new pool facility in Linwood – Te Pou Toetoe has been a huge success from my perspective, particularly the Wednesday Women Only session; there really is a lovely ambience during those sessions.

Fully supportive of the dropping of fines for overdue books at the libraries.

1.5 Capital Programme

I agree with the priorities of the capital programme with particular support for the completion of the major cycleways network, the continued enhancement of our parks and riverbanks and progressing our adaptation to climate change. If we truly want to foster an accessible, sustainable city, spending on facilities and infrastructure that makes it easier for people to choose non-car modes of transport is vital hence I also support improving

T24Consult Page 1 of 2

260

footpaths in our communities as well as connections between them.

Also, I am really looking forward to when we can get back to chlorine free drinking water so am fully supportive of spending on water infrastructure.

Feedback

1.1 Rates

I support this rates increase.

1.2 Revenue, spending and borrowing

As a Linwood/Bromley resident CCC need to raise funds to fix the damage to the sewerage / wastewater plant (after the fire) and stop the appalling smells urgently. It's unacceptable that the residents and workers this side of town are still having to live with the smell.

1.3 Revenue and Financing and Rates Remission Policies

No comment.

1.4 Fees and Charges

No comments.

1.5 Capital Programme

It's important to me that CCC complete the capital works that was committed to in the long term plan, and that CCC continue to mitigate for climate change. I'm especially keen for the cycleways to be completed, and the water infrastructure be upgraded.

See also my comment about fixing the damage to the sewerage / wastewater plant - this should be a priority above all else.

1.6 Further Comments

None.

1.5 Do you have any comments about our capital programme (for example, our roads and footpaths, our water, wastewater, surface water and waterways, our facilities and our parks)?

I live at [REDACTED] (for 25yrs+) , i am writing regarding the Milns/Sutherland/ Sparks intersection which i understand is not up for improvement until 2027/ 2028 .

This would be a serious mistake in judgement on the councils behalf . As the volume of traffic has increased multiple times in the last 2 years , and will increase many times over again in the next year as all the homes in the subdivisions in Sutherlands Rd and the feeder roads are completed - this intersection which is already diabolical to get out of safely (especially from Milns Rd side which has restricted vision)will become down right dangerous.

I always assumed the council would have it on its common sense radar , to upgrade the intersection as part of opening up all the land .

I look forward to hearing a change of direction and that this be put into the 2022/2023 budget

I have lived in  for 25+ years.

I am writing regarding the Milns/Sparks/Sutherlands Rd intersection. I understand this is budgeted for upgrade until 2027/2028.

This upgrade needs to happen now . The volume of traffic is increasing everyday , and i understand the council in their wisdom have also granted (non-notifably) a large daycare facility on the corner of sparks and Sutherlands Rd with approved vehicle flow of 400 cars per day (an extra 100,000 per year). The majority of these vehicles will probably arrive/leave within 2 short time windows. What lucky neighbours eh !!

I think this upgrade needs to happen immediately before there is a major accident

Thank you

Helen

Feedback

1.1 Rates

I think that the net difference between LTP of 0.01% is not worth the paper it is written on. Also, I find it unfair that rate payers in the city are forking out for works happening in banks peninsula. Banks peninsula should be having a larger rates increase than central due to their small population and large capital spending (i.e. roading maintenance and flood/slip responses)

1.2 Revenue, spending and borrowing

CAR request price increases are unwelcome. The cost from these will just be passed on to the public. The CAR services, in my opinion, do not provide value to the city and should be reviewed.

1.4 Fees and Charges

CAR request price increases are unwelcome. The cost from these will just be passed on to the public. The CAR services, in my opinion, do not provide value to the city and should be reviewed.

1.5 Capital Programme

\$10m for Koukourata water supply should be reconsidered. Such a small population does not warrant such a large investment for a location which council should deter people from settling. i.e. goes against the long term plan.

Your role in the organisation and the number of people your organisation represents:

Lead Advocate - Approx 8000 people, about 1000 of whom are in the Christchurch area

Would you like to speak to the Council about your submission?

Yes

I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

Feedback

1.1 Rates

We agree with this increase, provided the increase contributes to increased public transport availability, affordability and usage and increased active transport networks and safety.

1.2 Revenue, spending and borrowing

No

1.3 Revenue and Financing and Rates Remission Policies

No

1.4 Fees and Charges

No

1.5 Capital Programme

Footpath renewals have had a \$940,000 reduction. If footpaths are not built or maintained there are fewer people walking, skating, biking or using their wheelchairs on them. We would like to see more footpaths in order to encourage more safe, active transport.

The Wheels to Wings and South Express had had reduced spending allocated. We need as many safe cycleways as possible, and we suggest these remain prioritised.

We support the new 'Greening the East st trees' project and the Belfast Park Cycle and pedestrian crossing.

A lot of the budget spend for parks has been pushed to 2023/2024. This shouldn't be pushed any further away.

The organics processing plant funding has been reduced in 2022/2023. This shouldn't be pushed any further away.

T24Consult Page 1 of 2

273

Waste minimisation is receiving only \$38,78, whereas public waste drop off services are receiving \$76,000 and much more until 2031. There needs to be more put towards waste minimisation.

We support increased spending on Land Use planning & strategic transport.

1.6 Further Comments

Overall climate change doesn't appear to be a priority with no mention of goals to reduce overall emissions from the city.

We're happy to see the promotion of active transport and improved reliance on, and access to public transport. It is vital to reduce our reliance on fossil fuels with transport contributing so highly to NZ's emissions.

Adaptation to climate change is mentioned but we are advocating for a greater focusing on reducing emissions and Christchurch's impact on the climate.

There is a reduced goal from 54% to 48% of residential land holdings with a 15-minute walking access. This should be increased not decreased.

As an organisation that represents the outdoor community and advocates for climate action, we would like to see outdoor and green spaces, including wetlands protected, preserved and restored. We'd also like to see increased housing density, more, and safer and accessible active transport options, and more and more accessible public transport options.

Feedback

1.5 Capital Programme

I would like to see the expenditure to upgrade the Templeton Domain playground brought forward to this financial year.

Parts of the playground broke recently and those parts of the playground have been boarded up rather than fixed, leaving it no longer for for purpose and dangerous (the tunnel that connects one part of the climbing frame to the section with a slide has now been removed. When [REDACTED] climbed up to the part without the slide, there was no safe or appropriate way for him to get back down, as he could not access the slide).

Further, with the cemetery pushed out, any recreation facilities that our area would have enjoyed from that will no longer be available.

As we are a physically isolated suburb, it's important that we have access to good facilities for our tamariki to enjoy, that's within walking distance from their homes.

277

Templeton Domain Playground Upgrade

The TRA is aware that the Templeton Domain Playground is up for a renewal in 2026/2027 – the TRA would really like to see this prioritised due to its current state of disrepair (see pictures below). The Templeton Community is somewhat geographically isolated from the rest of Christchurch and the Templeton Domain gets a lot of use from the families in the community. The Skate Bowl is a highlight, and it would be great to have a playground alongside this. Templeton has a number of families in the area and it would be appreciated by the community. The possibility of the sports fields/cemetery providing some recreational activities was seen as a benefit to the community, but with this being delayed this means that those possible recreational facilities are unavailable.

The TRA is willing to work alongside the council with this and would like to see the Council and TRA work together for this to happen.

1.1 Rates

Rate increases are expected it's about what the money is being spent on that matters.

1.5 Capital Programme

Please could you consider bringing forward the upgrade of the play ground at the Templeton Domain. We are a local family and would frequent the park, however it's play equipment is not adequate. The most recent blow was after a stint of vandalism the tunnel connecting two play areas was not replaced. Please could you look at installing equipment that is suitable for all age groups .

Please also consider updating the art work on the domain buildings, it was completed in 2004 by my school group. It's been tagged on and looks out dated. The building was recently painted but they painted around the artworks which makes it look even worse.

Feedback

1.5 Capital Programme

Templeton is on the outskirts of Christchurch. Weve lived here for 16 years and absolutely love our community and the area. Our two girls grew up in Templeton, they went to Templeton Primary School and spent very many happy times over the years playing with their friends on the playground at Templeton Domain. Our children dont have many options for play that is close to home which makes the playgrounds we do have really important to local families.

I appreciate that an upgrade for the playground is in the long term plan. Unfortunately our community cant wait years for repairs and a upgrade. We really need something to be done as soon as possible please.

So much had to be removed to make it a safe play area.

We have a lot of young families who need and rely on the equipment provided and they are missing out at the moment.

Feedback

1.5 Capital Programme

The proposed timeframe of the upgrade of the Sutherlands/Milns/Sparks Road intersection of 2027/28 is too far away. This intersection is becoming more dangerous by the day. There is no safe way for pedestrians to cross and for cars turning out of Sutherlands Rd and Milns road. Turning right from Milns is difficult as it is near a hidden bend with cars often travelling at speeds greater than 60kph.

We have been in our house now [REDACTED] and the increase in traffic numbers has been significant. The new subdivisions on Sparks Road and Milns Rd (including the new Resthome), as well as the number of new ones on Sutherlands Rd will only make this much worse in the next year. Sutherlands Road has also become the main route for the new houses off Muirhill Rd and the subdivisions on Cashmere Rd.

The lack of footpaths between all the new subdivisions makes it unsafe, especially with the speed limits being 60kph, which few cars adhere to.

I believe that this work should be bought forward to the 2022/23 year. In the next 12 months, I'd expect at least another 120 homes being built off Sutherlands Rd alone, not including the Sparks Rd and Milns Road subdivision, with many more to come in the coming years, with the huge new subdivision starting off Kennedys Bush road, which will feed traffic onto Sparks Rd and Halswell Road in the next 2 years.

This area is growing very fast and the roading around it needs to be improved to limit the chances of accidents which will happen if this intersection isn't upgraded.

1.5 Capital Programme

[Disposal of 151 Gilberthorpes Road building.](#)

The Hornby Community Menz Shed request that council reconsider the proposal to dispose of the site at 151 Gilberthorpes Road. The Hornby shed has been established for just under a year and is currently looking for a site to use as a base/workshop/shed. The existing buildings on site would be very suitable for our purposes. Like all true sheds we could expand to fill whatever space was available but realistically would expect to share the site with other community groups. We would expect to have exclusive use of part of the site as a workshop, but the likes of meeting rooms, kitchen, tea room, ablutions etc could easily be shared with other groups. We expect to be meeting 2 to 5 days a week depending on member demand. We expect that other groups on site would also have areas for their exclusive use.

The Hornby Shed currently only has 15 members, as we are still in the setup phase and without a base do not have a lot to offer prospective members. Once we have a base we anticipate that we would soon have between 50 and 100 members (based on the experience of other Menz Sheds in the city).

The Hornby Community Menz Shed is affiliated to Menz Shed New Zealand Inc. The Shed caters primarily (but not exclusively) to older, retired men by providing a venue for socialising and to carry out meaningful constructive work. As part of this the Shed would engage in community projects.

Although we do not have a large membership or a base and have only been going for a short time we have undertaken two community projects: working with a local primary school to tutor 90 pupils in some basic wood work skills; repairing equipment for a local kindergarten. We are currently looking at two further projects: assisting with upgrades to Wycola hall; refurbishing the outdoor area at Hornby Community Care Centre.

Once we have a base, and with increased membership, we would anticipate an increase in community related projects. In particular if we were to lease part of 151 Gilberthorpes Rd we hope to establish an ongoing relationship with Gilberthorpe School and with other community groups which may also use the site. For example we could work with other groups to set up a community garden on the site.

T24Consult Page 1 of 2

283

We would expect that if we leased part of the site we would assist with the maintenance of the site, depending on the expertise of our members at the time.

We have been in discussions with council about the possibility of placing a relocatable building on Wycola park. While not discounting this option, the use of Gilberthorpes Road would offer some advantages. We require a resource consent to use Wycola park. There is some cost, a considerable time delay and no guarantee of the outcome to obtain this consent. There is also significant cost to provide foundations and services for a relocated building. Furthermore, by the time we obtain the resource consent we may have lost the window of opportunity to obtain the relocatable building. We are therefore interested in the possibility of using 151 Gilberthorpes Rd site.

Hello,

I feel as though it is a wasted opportunity that the council has not supported or launched bike sharing schemes for public use in the city. Surely this is an easy way to encourage less motor use especially in the inner city as well as a way to grt more people using and appreciating the very expensive and hated cycle ways?

Turn a negative into a semi positive?

Feedback

1.1 Rates
OK with the increases as advised. Support the rates relief programme for those in need.

1.2 Revenue, spending and borrowing
Difficult times. Provided Christchurch City follows current fiscal policies adopted by Local Government Act I see no need for changes provided a conservative (sharp the pencil) approach is maintained for non-core activities and close attention is paid to prudent replacement of aging infrastructure, particulaly horizontal infrastructure.

1.3 Revenue and Financing and Rates Remission Policies
No

1.4 Fees and Charges
No

1.5 Capital Programme
Fully support the continued roll-out of the 13 Major Cycleways. There is steady incremental evidence of more people choosing to travel using active travel modes and the benefits from this are accruing. I fully support any expenditure that contributes to our roads becoming safer and calmer with improved amenity for residential areas. Prioity spending for parks and green spaces in the CBD and inner suburbs is important. Continued footpath repair must continue at pace. I would like to see the Edgeware Open Air Swimming Pool project proceed. Whilst unlikely to be a big user, the St Albans area is experiencing population growth ahead of many other city areas. There are few community facilites in this area when compared to others. A pool will become a great gathering area for familes. Fewer schools in the area now have their own pool. Water skills training for our young people is essential.

1.6 Further Comments
Thank you for the excellent accompanying documents with in depth explanations and the tool which enables yearly and LTP vs AP financial comparisons.

1.5 Capital Programme

I'm so happy to hear about the plan to take the vacant land in the arts precinct (thank you so much for voting no to another bloody carpark by the way) and turn it into a community-led space.

I've heard some of the initial ideas about a multi-disciplinary arts space which will be proposed in detail in May by an artist collective and I want to see them lead the project. We need space for outdoor performances, studios, and an inclusive space that doesn't cost a lot of money to access (for artists or audiences). This would mean the arts precinct is an actual accessible arts precinct and not an elitist only arts precinct (because let's be realistic, the performance venues already confirmed do not have tickets available on a regular basis that most of us regular, five figure household salary people can afford).

THIS is the vibrant city I want to see and one we can be proud of.

Kia ora,

I would like to suggest that the Council backs up their commitment to the Performing Arts precinct by allocating money to an outdoor performance area on Gloucester Street.

To truly live up to its name, an arts 'precinct' should be alive with arts in the daylight hours, and the area of the precinct between the Theatre Royal and Court Theatre site could be developed to provide such a buzz.

An amphitheatre or multi use tiered seating of another kind would be a great start, and be of use to festivals and buskers, not to mention our upcoming performing artists who could jump in to create impromptu performances at lunchtimes and so forth.

I would respectfully suggest the council allocates funding to a vision like this, or at least something artistic in nature, so that the site does not lie idle after the decision to prevent a car park on the site.

Yours sincerely,

Daniel Allan

**North Beach Residents' Association
Submission on Christchurch City Council Annual Plan 2022-2023**

The North Beach Residents Association (NBRA) has been actively involved in the North New Brighton community for 36 years, since it was first established in 1986. It currently has over 30 paying members and public meetings are held every two months with attendance of at least 20+ people (Covid permitting). The AGM and community events often attract more people who are well connected with the Association.

NBRA is made up of numerous volunteers who are invested in their community. In recent years, members have worked hard to:

- ensure the retention and refurbishment of the North New Brighton War Memorial;
- purchase an accessibility mat providing wheelchair access from the North Beach Surf Club to the shore;
- purchase of a shipping container to house the accessibility mat and the two community beach wheelchairs
- landscape the North Beach car park and other local areas;
- organise a mural at Thomson Park;
- action beach maintenance and clean ups;
- support the proposed Waimairi to New Brighton coastal promenade;
- advocate for the community through submissions, letter writing and engaging with Council consultations; and
- host its own, and support others', community events.

Executive Summary:

NBRA is grateful for Christchurch City Council's interest to regenerate the Eastern side of Christchurch and appreciates the progress that has been made to date in New Brighton. We would like to see these efforts continued with momentum. This submission highlights the key local projects and funding in the AP that NBRA supports and would like retained, but also proposes that some projects be brought forward, have more funding allocated to them, or be reinstated from previous LTPs. In particular, we seek the inclusion of:

- Cygnets Street Outfall Remediation (Retained and Increase Budget) It is encouraging to see some budget included in this AP. Thank you. An immediate temporary fix is required. The ocean outfall was shortened some time ago and is buried under sand due to the continuous sand accretion. Each time it rains this causes flooding on Marine Parade and neighbouring properties around the Cygnets St area as the stormwater is unable to be released onto the beach. The rain crosses the white line to the other side of the road causing safety issues with traffic. Therefore, in addition to the existing 2022-2023 budget, we request that the AP budget is increased so a permanent solution can be implemented as soon as possible.
- Marine Parade Road Repairs Bowhill Rd to Beach Rd (Reinstate & prioritise) Both the water mains beneath the road and the road itself require repair between Bowhill Road and Beach Road. A reconstruction was included in the 2010 LTP and deleted after the earthquakes. It has never been reinstated in subsequent LTPs. This is a well-used road by locals, city and local events and visitors and should be improved promptly. For cost effectiveness, the road itself (between Bowhill Road and Beach Road), and water mains (mentioned above) should be repaired together with the Kerb and Channel mentioned below.
- Marine Parade Kerb and Channel (Reinstate & prioritise) In mid 2010 this piece of work got through to the stage of a CCC public notification, consultation and public submissions to be heard. However, due to the Sept 2010 Earthquake the planned Community Board meeting was cancelled. Twelve years on the deep dish gutters have further deteriorated and have

become a safety issue. NBRA request that this project be given urgent prioritisation and budget allocated in 2022-2023. With the new local schools, Rawhiti Primary, Avonside Girls and Shirley Boys high school (approx. 3,000) pupils use this stretch of Marine Pde to access the beach for educational purposes - safety is a priority. The Christchurch Regeneration Acceleration Fund (CRAF) budget could be applied here.

- Bowhill Road Upgrade. (Include & prioritise) This is the main road from QE11 Drive through to Marine Parade. We request the upgrade of this main thoroughfare be given high priority and be included in this year's AP. There are many events held in the immediate area, Thomson Park, North Beach Surfing and Surf Life Saving clubs, local/city wide schools, Coast to Coast, Matariki Fireworks and the North Beach War Memorial Hall and Community Centre. CRAF budget could be applied here.
- New Brighton Road Repair. (Increase and reinstate) The AP and LTP should include the full repair and future proofing of New Brighton Road, from the reinstatement of the two way section from Hawke Street, to Cresswell Ave, including footpaths, gutters, kerbs, cycle lanes and islands to pre-earthquake standard.
- He Puna Taimoana and New Brighton Playground Maintenance. (Increase) This facility is a unique city wide asset which sits in a marine environment, therefore, requiring a higher level of yearly maintenance than most other Council pool facilities. We request that the maintenance budget be increased accordingly to reflect that.
- North Beach Stone Wall. (Include) This approximately 100 year wall should be recognised as a heritage feature and included in Council's heritage budget to ensure it is maintained and protected we request that it is registered as a heritage feature and budget allocated to maintain as such.

Water Networks

NBRA supports the proposed investment in our City's water, wastewater and stormwater infrastructure. In particular, NBRA supports and seeks the **retention** of funding for the following projects:

- Cygnets Street Outfall Remediation: Project ID 65533. 2022/2023 \$260,000 2023/2024 \$30,000.
- Estuary & Coastal Waterways Detention & Treatment Facilities: Project ID:41998. total 10 year spend: \$28,565,372, funding starts: 2024, ends: 2031,
- Ascot, Randwick, Flemington, Beach & Bower Mains Renewal: Project ID: 56177. Spend LTP was \$5,496,808, AP \$4,617,000
- Philomel, Inverell, Pegasus, Endeavour, Royalist, Effingham, Monowai & Nile Mains Renewal: Project ID: 56167. Spend \$283, 000
- Coastal Flood Management Project ID: 60355 10 year spend: \$621,675, funding starts: 2030, ends: 2031, (as mentioned above, it is unclear exactly what this funding is for, but NBRA supports any funding to ensure our coastline is protected).
- Ben Rarere Pump Station Bexley Earthquake Replacement: Project ID: 14866. Spend \$1,552,000

In addition, NBRA seeks that the following projects be included in the AP:

- Repair Marine Parade Water Mains. There are numerous leaks in the water mains along Marine Parade between Bowhill Road and Beach Road. NBRA requests that these be repaired, along with improvements to the road itself at the same time.

Transport

NBRA supports the proposed investment in transport infrastructure, including roads, public transport, walkways, and cycleways. In particular, NBRA supports and seeks the retention of funding for the following projects:

- Pages Road Bridge Renewal: Project ID: 27273. All funds brought forward to commence in 2022/2023. Reinstatement of the \$1,200,000 removed from 2022/2023. This is an earthquake repair that is long overdue and is the main entrance directly into New Brighton. Also, given the significant investment, it is essential that this bridge is oriented to align with Seaview Road in order to regenerate the New Brighton CBD. This orientation would feed locals and visitors directly into the central area of the CBD which would further enhance revitalisation of existing and future businesses. The Hawke St option is the cheapest but not necessarily the most advantageous for regeneration purposes.
- New Brighton Roading & Transport: Project ID: 61030 (CRAF) \$68,000 It is unclear exactly what this funding is for. NBRA supports funding to ensure our roads are of a high standard, this funding needs to be increased and allocated to the right areas along New Brighton Rd.
- New Brighton Public Realm Improvement: Project ID 45165. Retain the \$70,000 in the 2022/23 budget. However, the \$13,217,000 budget was allocated many years ago to assist Development Christchurch Ltd with the revitalisation of the New Brighton CBD. It has been continually pushed out in all AP's and LTP's. However, due to the current interest in the area and developments proposed and underway, NBRA strongly supports the complete budget being brought forward from 2026 to 2029 to start in 2022/2023 so that the public realm improvements can align with these new developments. Now is the time for Council, in good faith, to further honour their commitment to the revitalisation of the New Brighton CBD so the current momentum may continue. This not only brings value to New Brighton but to North Beach, all surrounding communities in the Coastal Ward and the city as a whole.
- A2 Marine Pde & A4 Oram Ave Open Space Link: Project ID: 63360 \$1,145,000 is also sitting at 2026 to 2028. NBRA request it be brought forward to 2022-2023. The Oram Ave extension is a critical part of the New Brighton CBD revitalisation, as per the 2015 New Brighton Master Plan. Urgency is required as per the reasons given for the New Brighton Public Realm works (ID 45165) so that these two project align to continue the momentum.
- Regenerating the Ōtākaro Avon River Corridor.
- Ōtākaro Avon Major Cycleway -Anzac Dr Bridge to New Brighton - Section 3 (OARC): Project ID: 26603. \$11,144,000 As there is a natural starting point at Anza Drive this project could start 2022/2023 rather than 2024-2027. The Coastal Ward lacks any form of direct commuter or recreational Major Cycleway linking it to the city and vice versa. NBRA notes that there is an obvious gap and lack of cycle ways in the Eastern part of the City, and a disproportionate amount of funding for cycle ways elsewhere in the City. NBRA requests that this be addressed.
- Eastern Out Orbital Cycle Way: Project ID: 44700. (will link between Travis Rd cycleway, Bowhill Road to North Beach, a link to New Brighton through Shaw Avenue and Rawhiti Domain, then along Union Street to Bridge Street), total 10 year spend: \$557,000 in 2031, NBRA seeks that this project be brought forward at least 5 years. This route would encourage more local cycle trips, particularly to connect schools (Avonside/Shirley/Rawhiti), and bring people into North Beach and Greater New Brighton.

In addition, NBRA seeks that the following project be included in the AP:

- New Brighton Road Repair. The NBRA seeks that the AP includes the full repair and future proofing of New Brighton Road, from the reinstatement of the two way section from Hawke

Street, to Cresswell Ave, including footpaths, gutters, kerbs, cycle lanes and islands to pre-earthquake standard.

Heritage, foreshore and parks

NBRA supports the protection and promotion of heritage, the foreshore, and parks. In particular, NBRA supports and seeks the retention of funding below and requests that future budgets be brought forward where alignment with other projects is required providing cost effective measures:

- Rawhiti Domain Sports Turf Renewal: Project ID: 2245. Retain the \$365,000 in 2022/23. This budget has been virtually halved from previous budgets and delayed many years.
- Coastal Land Protection Revegetation & Amenity Planting: Project ID: 61724 (as mentioned above, it is unclear exactly which part of the coast this funding is for, but NBRA supports any funding to ensure our local coastline is protected).
- Regional Parks Planned Coastal Assets Renewals: Project ID: 61746 (again, it is unclear exactly what this funding is for, but NBRA supports coastal assets being protected and renewed).
- QEII Park Car Park : Project ID: 56898, total spend: LTP \$620,007, in 2028. AP \$593,000 2027/2028.
- QEII Park Masterplan, Project ID: 61787. Total 10 year spend: \$6,549,037, funding bulk starts not until : 2024/25 ends 2029
- QEII Park Playground Project ID: 56896. LTP \$19,335, in 2022 pushed out to 2024/25
- QEII Park Sports Field Repositioning & Stormwater: Project ID: 56899., total 10 year spend: \$5,776,382, funding starts: 2024
- QEII Park Sports Pavilion: Project ID: 58911. LTP \$924,234. AP \$902,000 in 2025/26
- Queenspark Reserve Play Space Renewal: Project ID: 64750. \$102,000 2022/2023

PLEASE NOTE: With regards to the QEII projects listed above, we understand the balance of the sale of QEII land to the Ministry of Education (approx. \$4million) was tagged to be spent at QEII. The Council has received this money and therefore the QEII project/s listed above should be brought forward to 2022/2023 to complete the next stage.

Landfill:

NBRA supports the proposed funding for the Burwood Closed Landfill Aftercare Programme, Project ID: 37833. The proposed tracks will improve connections to our local area, and the overall environment.

Dog Control:

The NBRA request that an increase in the operational budget be allocated for Dog Control monitoring along the Greater New Brighton beaches. Beach use has increased post Covid and unfortunately so has unleashed dogs within 100m of Surf clubs that are not under effective control. Children have been traumatised by dogs roaming freely on the beach.

NBRA support retention of all projects in the Coastal Ward and specifically:

- SW South New Brighton & Southshore Estuary Edge Flood Mitigation: Project ID: 61615
- Redzone Regeneration -Southshore & South New Brighton Estuary Edge Erosion Management (Earthquake Repairs) Project ID: 62549. Retain 2022-2023 \$1,000,000
- SW Knights Drain Ponds (LDRP 509): Project ID: 44056. Retain 2022-2023 \$1,500,000

- SW Flood Management LDRP 521 Stage 1, Waitaki St, (ORAC): Project ID 62925: Retain 2022-2023 \$868,000
- Ben Rarere Pump Station Bexley Earthquake Replacement: Project ID: 14866. Spend \$1,552,000

General Comment regarding the Annual Plan:

Again we stress, as we did in our LTP submission that the 2022-2023 Annual Plan has been difficult to navigate in some respects. While we acknowledge and appreciate that there have been some improvements of the online search tools, it is still unclear as many of the line items headings are so general that it is difficult to work out what project the funding is actually for and where they fit within each Ward.(for example, Coastal Flood Management, Project ID: 60355; New Brighton Rooding & Transport, Project ID: 61030; Coastal Land Protection Revegetation & Amenity Planting, Project ID: 61724; and Regional Parks Planned Coastal Assets Renewals, Project ID: 61746). A brief summary for each project, and its exact location, would help the public understand exactly what the funding seeks to achieve. It is unreasonable to expect lay people to do the research themselves and be contacting Council staff for more specifics.

Also in the draft document only two years are clearly shown and the third is the remainder of the LTP. This does not provide any context within the bigger LTP budget and we would request that provision is made to show the full 10 years eg a shaded section. Residents should not have to navigate from the AP to the LTP for this information.

All the above is time-consuming and a challenging exercise for most people to undertake, particularly given the size and complexity of the document. This lack of transparency does not encourage public participation. We request the line item details are updated to be more specific. Each ID Number could also link to a bit more detail.

Thank you for the opportunity to submit.
Kind regards

Josiah Thompson

Fine with this as long as council are considering a similar percentage increase in wages for employees and a commitment to living wage to all contractors

1.5 Capital Programme

Now that 129 Gloucester Street is off the table as a carpark and is a blank canvas again for the performing arts precinct, let's make sure that it's actually used for performing arts, and built for the future! Also, with the rest of the performing arts precinct having been allocated to, essentially, older and wealthier audiences, it's imperative that this site gets prioritised to the remaining audiences – who are the majority of the population.

Let's make that block of Gloucester (which hasn't been touched since the earthquake) a pedestrian friendly area so people can transition easily from Tūranga (another excellent facility for young people) to this outdoor space naturally, let's build an amphitheatre for use by festivals, let's put some portacoms there so artists can co-work, bands can rehearse, let's make it friendly for food trucks so people that aren't in the \$20-\$40 restaurant meal market can get cheap eats, let's put some public toilets there for everyone to use any time but also make it easy for festivals to operate, and let's make it all temporary so it's quick, cheap, easy and allows the next generation/s to have a swing at that land in the future, when cultures change and new needs are identified.

This would be built and owned by the council to allow for future options, but you can do this in conjunction with a lot of established arts and placemaking groups in Ōtautahi that will happily help make sure this is set up and used well.

Yes

I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

Feedback

1.1 Rates
Higher than needed. Adds a lot to the financial burden of residents.

1.5 Capital Programme

I think the Council should stick to the basics and complete the infrastructure projects that are needed most. I think the priorities need looking at as there are many basics that need upgrading or completing that are being ignored. Our water, sewer and roading projects should have priority "need to have" over "like to have" projects. Cycleways are not a necessity and the amount of money spent on these is mind blowing. If there is excess funds available then they can be considered in that instance.

More consideration needs to be given to the planning of traffic management as there are so many intersections and traffic light sequences which are not helpful to traffic flow.

1.6 Further Comments

I am living in a subdivision where I pay high rates and we still have not had a signalized entrance completed after approximately 7 years. This should be a priority as it was initially signed off to be completed, the developer and contractor have been ready to complete this for more than a year at least and it is the Council which is holding this up. In terms of health and safety this is disgusting. One entrance for nearly 1200 sections to get in and out of, with shops just being completed right in the middle of this only exit/entrance road. We pay high rates and get none of the services which were supposed to be provided.

I notice that a new development by Bunnings Homebase has had it's traffic light poles already installed in a matter of a few weeks, yet we have been waiting years. Shame on you Council Transport planning.

Feedback

1.1 Rates

I think the last 10 or so years of rate increases has been a joke, our rates have more than tripled over this time already.

1.5 Capital Programme

stop unnecessarily spending money on cycle lanes that are either not utilised as they should be, or prioritised over more important roading upgrades.

I would also like to voice serious concerns regarding the intersection of Sparks/Milns/Sutherlands Roads.

I understand there is no desire to upgrade this vital intersection for at least another 4 to 5 years, this is not good enough. This is one of only 2 ways into the city for an ever growing area, as well as all the extra growth in surrounding areas such as Prebbleton and Lincoln.

As a local rate payer as well as delivery contractor I have watched Halswell grow considerably and expect even more growth over the next 5 to 10 years.

This intersection is not only dangerous to road users but also pedestrians.

The volume of traffic, particularly heavy trucks and other associated building contractors, and the increase in residents has increased the use of this intersection tenfold.

There is a preschool being built on one corner, a new retirement village 400m down the road due to open next year as well as the thousands of new residents in Halswell and beyond that use this road.

This should have been planned for accordingly and completed prior to allowing such large amounts of building and traffic to flow through.

With all the consents and rates combined for the area of Halswell that have been collected over the past few years the least we could have in return is some safety and piece of mind on such a small stretch of road.

Please upgrade this intersection sooner rather than later, I seriously fear without doing so somebody will be severely injured or worse.

1.1 Rates
Fine

1.3 Revenue and Financing and Rates Remission Policies
No

1.4 Fees and Charges
No

1.5 Capital Programme

1. We are pleased to see the considerable amount of investment in cycleways being brought forward to 22/23 from subsequent years.

2. It is also positive to see increased funding for flood prevention and an additional 20.5m going into Otakaro/Avon former red zone developments.

3. While understanding the Council's workloads pressures we are however somewhat concerned about the delay to implement the organic processing plan, and parks and foreshore investment, but pleased to see this will continue in 23/24 and following years. We would request that this funding not be further delayed into subsequent years.

4. We are concerned to note that expenditure on Corporate Capital costs is to increase 54m beyond 23/24. It appears from the information on p90 of the DAP summary that this is largely due to a change in the 'Capital Carry Forward Adjustment'. Further information about this significant change would be appreciated.

5. Relatedly we are concerned to see decreases in funding to stormwater, wastewater, and water supply investment, and would recommend reprioritising funding from Corporate Capital to this.

Thank you for considering this submission

1.5 Capital Programme

As a local to Okains Bay, with friends and family who visit (as well as stay in the campsite), I'm dissatisfied (and embarrassed) that our community does not have access to safe drinking water. We should be able to drink the water that comes out of our taps, use it to brush our teeth and wash our produce, without fear of becoming unwell.

In 2010 (Resolution 64/292), the United Nations General assembly acknowledged that clean drinking water is essential to the realisation of human rights.

The WHO in a comment on the above states that everyone has the right to sufficient, continuous, safe, acceptable water for personal and domestic use.

The Ministry of Health NZ stipulates that safe drinking water is necessary for good health, and engages with authorities to formulate policy for achieving safe drinking-water supplies.

Perhaps the CCC disagrees with the UN, WHO, and MoH?

Safe drinking water is a human right, please provide our community with this basic right.

If you are responding on behalf of a recognised organisation please provide organisation name:

Spreydon Neighbourhood Network

Your role in the organisation and the number of people your organisation represents:

Chairperson

Would you like to speak to the Council about your submission?

Yes

I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

Feedback

1.1 Rates

Spreydon has a high percentage of elderly, many living alone, low income families and solo parents struggling to meet their budgets so efforts to reduce the rates increase percentage is appreciated.

1.2 Revenue, spending and borrowing

Time has not allowed us to have an indepth analysis of these figures.

1.3 Revenue and Financing and Rates Remission Policies

No.

1.4 Fees and Charges

Appreciate that there are few increases in fees for public amenities, swimming pools etc.

1.5 Capital Programme

1 Many parts of Spreydon have issues with surface water during heavy rain, both on some streets and in properties where the land has sunk since the earthquakes.

2 We have increasing worries for pedestrians in our area, especially for the partially sighted having to cope with scooters, electric bicycles on the footpaths and now damaged footpaths outside development sites during construction, which will all need to be repaired when projects are completed.

3 We are concerned about climate change and the loss of so many established trees with developers clearing sections of all trees. With the intensification of residential housing there is going to be a need for increased green areas and amenities for families to exercise.

4 Housing intensification does not appear to allow for clothes lines and vegetable gardens

T24Consult Page 1 of 2

311

1.6 Further Comments

61037 Spreydon, Somerfield, Waltham, Beckenham Roading and transport improvements:

With little or no garages/onsite parking allowed for with housing intensification good public transport is going to be vital.

50465 Delivery package public transport stops, shelters and seating:

Spreydon must have one of the oldest shelters in Athelstan Street, at the back of Barrington Mall. It is dangerous from several aspects and unsafe for passengers waiting. We are concerned the amounts allowed for in 22/23 310, 23/24 432 would cover its replacement.

Many thanks for reading of our concerns.

Feedback

1.1 Rates

I do not agree. Mortgage holders will be exponentially crippled with rising living costs and utility fees. There is not much difference between 4.96% and 4.97% is there? I do not agree that ratepayers should have to live with the toxic fumes from the Bromley sewerage treatment ponds. Urgent attention is required immediately. The health effects are surfacing already.

1.2 Revenue, spending and borrowing

Spend money on fixing our air and water. You are responsible for ensuring a healthy environment.

1.3 Revenue and Financing and Rates Remission Policies

You are responsible for providing a healthy physical environment. You are currently not achieving your primary goal.

1.4 Fees and Charges

Water fees must recognise a healthy sewerage system. Fix our sewerage system. Drinking water across the city varies wildly in clarity/opacity and in taste. Consider equity in all council decision making.

1.5 Capital Programme

East of Christchurch has been neglected in roads and pipe reparations. Consider sewerage management on the fast growing west side of Christchurch rather than continue to overload the Bromley Treatment Plant. Growth out west is phenomenal but the infrastructure out west is not growing to sustain it.

1.6 Further Comments

CEO wages are outrageous. There is absolutely no excuse for a civil servant to receive this exorbitant salary.

I support the increase in the Edgeware Pool Grant to \$3 million. Higher density housing in our neighborhood is likely to result in population growth in St Albans. There is a need for recreational amenities to be developed to meet the needs of this increasing population. An outdoor swimming pool will strengthen connections within the local community by providing space for families to gather. It will also encourage the teaching of water safety to children through learn to swim classes with several primary schools being within walking distance of the pool site.

Feedback

1.1 What do you think of our proposed average residential rates increase of 4.86% and 4.96% across all ratepayers (which is lower than the 4.97% signalled in the Long Term Plan 2021–31)?

Im concened about my own properties in the CBD of which I have three along Manchester St. I dont think it is fair or even legal that you want to charge more rates if we do not landscape them. Why target us? My three sites are kept extremely tidy but you are forcing us to grass and landscape our own private land for your benefit. How can you decide that if you dont like the look of a property then you can charge that person more rates? Surely this is against my rights as the property owner?

Would it not be better to approach us personally and come up with ideas that suit both of us, perhaps you offering assistance? I believe that we have already made a large investment by owning these properties and will be investing even more on them in the future to make some awesome buildings and adding great benefits to the city.

This heavy handed approach does nothing but annoy us as owners, investors and developers of the city. The people you need to keep on side.

Feedback

1.1 Rates

Thank you for the opportunity to make a submission.

Overall, I am in support of your various proposals. It is very difficult to plan given the challenges from Covid, supply chain disruptions, cost increases and now Putin's disastrous actions. The adjustments outlined in the Annual Plan make sense given all that. However, more adjustments will no doubt be needed due to all the uncertainty at present.

1.2 Revenue, spending and borrowing

All Good.

1.3 Revenue and Financing and Rates Remission Policies

Very pleased to see that rates remissions are being considered for Maori whenua.

1.4 Fees and Charges

All Good.

1.5 Capital Programme

First, I really hope that we can get the chlorine out of our beautiful, clean Christchurch water. That is a worthy goal.

My main mode of transport is a push-bike. Every year the Cycle Routes are getting better and better. I can go further around the city and largely link together wonderful cycleways. Please keep up the good work there.

Regarding Parks & Foreshore, it looks like the idea is to partner with and support community groups & NGOs to deliver these projects. I think that's a good idea. Volunteers can only take things so far and the costs for local government or contractors to provide these outcomes is quite expensive. We need Gov't and LG funding of paid staff to support and coordinate volunteers. This will enhance community spirit and deliver more cost-effective results.

T24Consult Page 1 of 2

317

It's smart to defer non-essential capital projects. At the moment, the pressure on the construction sector is severe and costs are therefore unusually high. Do basic, needed infrastructure; delay non-essentials.

Please prioritise '3 waters' and the environment. It seems that Christchurch is in a better position than other NZ cities, but there is still so much to do. I would think the fire at the Bromley facility will add huge costs to future budgets. Our urban rivers need help, especially the Opawaho/Heathcote. I think CCC is onto this, I just want to add a note of encouragement.

Finally, Te Kaha Multi-Use Arena. I am very pleased to see this delayed. Frankly, I am opposed to this ridiculous expense. Dunedin has their albatross, must we repeat their mistake? This was the Key Gov't and Brownlee's idea and that stupid online petition was not limited to Christchurch ratepayers and was likely pumped up with Rugby fans from all over the country (if not other countries). I'm not a sports fan and when sports is on the news I look at the stands, not what's on the field. Most of the time (all around the world) the stands are half empty or even fewer. I feel that there's a group that is Rugby mad and they think everybody else shares their obsession. Well, lots of people don't. Lot's of people would rather do their own sport (or play video games) rather than pay an exorbitant fee to watch others play a game whilst also paying an equally exorbitant amount for awful food and overpriced drinks. Young people are struggling to afford the basics. They won't have the disposable income for such frivolities. Plus we need to check with Ed Sheeran to ensure this design is the 'right shape'. It seems the Dunedin folly isn't satisfactory. In short, I'm tired of subsidising pro-sports. If Rugby can't afford to cover more of their costs, what does that tell you?

I would much prefer to cut back on Te Kaha and use the funds for more social housing. Something truly useful and needed...

1.6 Further Comments

Reducing the number of events to nine is good. Given that Covid may not be done with us, it may be difficult to even hold that many. Who knows?

I'm pleased to see the effort to encourage more non-car trips.

1.5 Capital Programme

[Milns/Sparks/Sutherlands Road Intersection - Halswell](#)

We used to laugh about the fact that the "Quarryman's Trail" bicycle path suddenly stops when it approaches the vicinity of the quarry and veers in completely the opposite direction, where it meanders through suburbia with no instructions for how one might get to the quarry! In addition to that, a special crossing was put in place in order for this to happen, just down the road from a hazardous intersection that actually needs lights! But the sudden disappearance of the bike path on Sutherland's Road, combined with the lack of shoulder on the road, makes it quite frightening to cycle on when you're forced to merge with traffic on your way home to Sutherlands Road. So it's not funny at all.

The lack of paths around the Milns/Sutherlands intersection makes it dangerous for my family and me to walk the dog of an evening due to uneven ground, long grass, open ditches, and insufficient lighting.

When my teenage son and his friends travel across the road to the skate park with their scooters or skateboards after school and on weekends, they have no footpaths and nowhere safe to cross the road unless they walk through long grass or on the side of the road down to McCartney Ave or up to the lights further along Sutherlands Road.

When I wait in traffic to turn right from Sparks Road onto Sutherlands Road, I have had many frightening moments as cars coming toward me on Sparks Road cut the sweeping corner. I have witnessed several close calls as vehicles turn out of Milns Road on the blind corner. And every morning that I travel to work, I feel a bit sick about entering Sparks with heavy traffic moving in both directions.

When we moved to Halswell Downs, we assumed that with all the development occurring, the council would prioritise such an obviously dangerous intersection. As the area is growing and getting busier, please don't wait for a serious accident or a death to occur before you take action.

Please bring improvements to this intersection forward to 2022/2023.

I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

Feedback

1.1 Rates
I'm OK with the increase as long as money is spent wisely and not wasted.

1.4 Fees and Charges

I am very happy that library fines have been removed, well done!

Charges for our pools are already quite high compared to other areas in New Zealand. For comparison there is a wonderful indoor pool at Paraparaumu and they charge \$5.40/adult, \$3.30/child and just \$2.50 for unlimited hydroslide rides for adult or child. In Christchurch, current charges are \$6.60/adult, \$3.80/child and a whopping \$9 (child) or \$11.20 (adult) for the hydroslide at Jellie Park, or \$6.20/\$7.20 at QEII. With our high drowning rate in New Zealand, it is important for children to learn water skills and confidence but the high entry costs to our pools mean that many kids do not regularly visit the pools.

Parking charges are also very high. Parking after 5pm and in the weekends should be free and this would encourage many locals to return to the city centre for dining or visiting in the weekend.

1.5 Capital Programme

Please focus on fixing the badly damaged roads, footpaths and drains in the North East suburbs. Progress is far, far too slow! It has been 11 years now that we've been waiting for our turn after seeing all the progress in the CBD - time to fast track repairs in the suburbs now. The plans to resurface Park Terrace are totally unnecessary - please prioritise road repairs based on the condition of the roads, not where they are. It is unfair that you are prioritising CBD roads in good condition over badly damaged roads in the North East.

We are also still waiting for the rebuild of the Shirley Community Centre that was demolished due to damage from the earthquakes. All the other community centres have been rebuilt, what has happened to the very popular Shirley Community Centre and why has it not been rebuilt yet?

It is sad to see money being wasted due to lack of maintenance. There were a lot of new plantings put in during the Dudley Creek work but they didn't get watered or weeded and many of the new plants died due to neglect.

T24Consult Page 1 of 2

326

Every time you invest in a new project, it is important to also get an appropriate and adequate maintenance plan in place and ensure that it is implemented. It is also very disappointing seeing so many weeds (many higher than me!) around our area, it is as if CCC has just given up doing any maintenance in the North East at least. I have tried using Snap, Send and Solve but nothing happens, the job gets set to done and I have no feedback from CCC - so frustrating!

Please also fast track putting in fluoride in our water. It is astonishing that it is not already in there. Stop arguing about who is going to pay for it and just get onto it asap.

To save money you could remove the roof from the stadium - it is a nice to have and not needed.

Submitter Details

Submission Date: 18/04/2022

First name: Tammy Last name: Ramsey-Evans

Your role in the organisation and the number of people your organisation represents:

Would you like to speak to the Council about your submission?

Yes

I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

Feedback

1.1 Rates

The difference in rates rise is negligible 4.96% vs 4.97%.... whilst rates rise I would suggest that the rate payers themselves get additional benefits as a result e.g: rate payers (as opposed to residents) are able to claim additional discounts at council run facilities- especially in the area of recreation such as camping, swimming pools etc.

If in the future you are planning to prevent any portion of the rate paying population from using your facilities for what ever reason, as you had recently done with libraries, pools etc then perhaps offering rebates to those effected would be fair.

1.2 Revenue, spending and borrowing

I do not support the council borrowing money at all- "you should not be buying things you can not afford to pay cash for"- I will credit that to both my Form 2 home economics teacher and Grandmother.

1.4 Fees and Charges

I wouldn't get rid of library fines- I would make inter-library loans free for everyone. Getting a book back on time is not related to poverty but charging someone to read a book will be prohibitive.

1.5 Capital Programme

Streetscapes are important and all road's that have capital works completed should be returned to their original aesthetic. This would include grass verges repaired with actual grass rather than a sprinkling of grass seed, tar sealing to match what was removed.

Alternatively capital works are actually an opportunity for improvement such as under ground power when the street is already being dug up..

T24Consult Page 1 of 3

327

1.6 Further Comments

To whom it may concern,

I write this letter from my kitchen table looking at my neighbors villa and trying to think of ways I can mitigate the effects of having 3x 3 story houses peering back at me- please feel free to share your thoughts on that one as I am stumped (other than moving)!

As you have previously designated St Albans for medium density housing and now with government regulations making this even easier I implore you to create a plan that ensures (NEW) intermittent green spaces be designated. It's great to provide additional housing to those that need it and of course the increased revenue that all these new rate payers provide but the result is horrible streets to actually live in.

In the last year and half since moving to Christchurch there have been 40 new dwellings built within 30 meters of my house and building is beginning on another 20. This has removed not only the houses but almost all of the mature plantings that surrounded these historic homes. This along with road works has ensured that I have been woken at 6.30 am each morning for the past 12 months (I would prefer to wake on my own at 7!).

What looked like a nice leafy street to begin with is actually a really noisy and increasingly over-crowded area. The housing density contraindicates any council goals about encouraging car free living and greener, connected neighborhood's. As a car free family we must now dodge multitudes of cars now parked up and down the street. These cars can not be accommodated by the owners dwelling- by not ensuring enough car parking spaces for at least 2 cars for each dwelling the developers win as they can cram more houses on- but unfortunately those of us living in the area lose. As the streets become uglier there is less incentive to spend time out the front of the house which decreases community connections and casual encounters.

There does not appear to be urban planning as such which would designate green spaces in amongst the areas of increased housing density. I would be interested for the council to advise- for each new dwelling built how does it propose to keep the streets pleasant to live in for those of us who choose to call Christchurch home. Will this mean more smaller community parks or something similar? What additional planting of the area needs to take place to mitigate the effects of all the land and tree's lost to development?

As far as the new houses that are being built are concerned- should the requirements for solar panels and water tanks not be compulsory- at least if we are going to live in increasingly overcrowded areas- these should at least be sustainable!

Increasingly with the decisions made by council and your urban planners we are losing community- at a time when lots of evidence points to this being the way forward. If you want to encourage greener streets, car free living, decreased emissions then this has to be supported by council and perhaps even incentivised through rates rebates for things like retro-fitting double glazing, being car free, not producing rubbish/recycling.

Greener neighborhood competitions are fun ways to do this and used elsewhere in NZ to encourage community connectedness. Finally if you are to encourage car free living then amenities must be close by, which is why I support the increased funding of Edgware pool. Biking more than 10km return for a swim is not an incentive.

What I would like to see for the Christchurch that I live in is: Beautiful streets- streets can still be well planted, free from lots of traffic and aesthetically pleasing even with lots of housing development-it is actually not the houses that are the problem its the destruction of everything else in their wake that is unpleasant.

Submission to the CCC Annual Plan 2022/23

Name: _Aroha McDonald

Would you like to speak to the Council about your submission? Yes No

I/we support the Council contributing \$3m to Edgeware Pool Group to rebuild the Edgeware Pool, because:-

I grew up swimming at Edgeware pool since I was a baby, it was like my second home, I took lessons there multiple times a week and would spend my spare time swimming with my friends as well. I can't begin to explain how devastated I was when the council decided to tear it down all those years ago. It was such a crucial part of our community, it brought people together, parents/grandparents/aunts and uncles would come along to competitions and lessons, bringing picnic baskets, and everyone would make new friends. Not to mention how important it is for everyone to learn to swim, especially the children who are most at risk. I was fortunate enough to be within a 10 minute walk to the pool, I'd meet up with my friends along the way and we'd stay for hours, practically falling asleep on our way home, those memories hold a very important space in my heart. There is nothing better than an outdoor pool, it is safer than oceans and way more fun than any indoor pool where the chlorine floats around like a mist and burns your eyes before you even get into the water. I think it's important for everyone to create treasured memories like I have from my childhood.

I am in full support of the council donating 3 - even 4 Million dollars to the pool, the sooner we get it up the better! I think it should be obvious by now how much the community of St Albans and beyond want this pool, after all these years of fundraising, the support grows every week.

Thanks for reading,
Nga Mihi,
Aroha

Submission to the CCC Annual Plan 2022/23

Name: Jesse Little

Would you like to speak to the Council about your submission? Yes No

I/we support the Council contributing \$3m to Edgeware Pool Group to rebuild the Edgeware Pool, because:-

I grew up moving a lot as a child, shifting between Strowan, Fendalton, Merivale to Shirley but the one thing that always stayed constant was the Community pool in St Albans. I visited as often as possible and made many friends along the way. I've always loved swimming, it was a great form of exercise or a way to cool off on a hot day or relax your muscles after a game of footy. It was disappointing to say the least when it was torn down, even if I moved all the way across to Papanui road the pool was always my local. I am in full support of the council funding the pool's rebuild. I haven't lived in Christchurch city for a few years now but would sometimes catch the Pool Quiz fundraiser on the odd weekend visit. It was an absolute blast every time, to catch up with old friends and to know I was helping to make a change. I still have family based in Christchurch and I know they would love and benefit from a newly built local pool.

Thank you City Council.
Jesse.

Would you like to speak to the Council about your submission?

Yes

I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

Feedback

1.5 Capital Programme

This submission is to support the proposed supply of fresh CLEAN drinking water to the residents & holidaymakers in Okains Bay, Banks Peninsula. We own the property [REDACTED] For 20 years we have been carrying drinking water from Christchurch to Okains Bay which will be safe to drink. Or else boiling it.

1.6 Further Comments

I have had trouble accessing any information about this scheme. As a ratepayer for this property should I have received information from the CCC about it in order to help make a decision?

It is obviously a basic human need to have clean, safe drinking water.

Where will it be sourced from? What will the flowrate be? And will the supply be consistent? Are there any associated costs to join the scheme?

Are our present rates costs in alignment with not presently being supplied with water as in Christchurch city?

Avon-Heathcote Estuary Ihutai Trust

<http://www.estuary.org.nz/>

CCC Draft Annual Plan 2022-2023

18th April 2022

On behalf of the The Avon Heathcote Estuary Ihutai Trust, we wish to thank the CCC for enabling our view to be included in consideration for the updated annual plan.

We remain vehemently **opposed to the 30588 - Estuary Edge Project**. Funds earmarked for 2023/24 (\$532,000) estuary green edge pathway and cycleway would be in contradiction to the Council's own district plan, and in breach of our recently signed promise to protect habitats in and around the Estuary as part of the East-Asian Australasian Flyway network (2018). These funds would be more usefully directed towards completing more urgent estuary edge work and/or restoration projects, which we can elaborate upon on request. Alternatively, use them for a non-endangered habitat route, avoiding both the wildlife refuge, the Linwood paddocks and sandy point.

We **welcome** sediment control measures being put in place in the annual plan, and recommend a new budget for dedicated inspectors to educate, manage and inspect construction on-site and provide advice and education for sediment control for the city as a whole and especially the port hills areas. McCormacks Bay has been very hard-hit with recent storm events polluting the bay and Estuary.

We **request** mechanisms be established which reduce and eliminate zinc runoff from roofs, with non-complying buildings fined for water pollution and the costs to remediate the waterways. We also strongly advocate for the reduction of copper contamination from car brake pads, and argue that non-copper brake pads be encouraged, possibly applying this to council vehicles from now on.

We **strongly support** the Council's engagement and relationship with Māori and agree that foundation and later legislative documents set the basis of partnership and consultation with Iwi and mana whenua to ensure that the views and values of Māori are considered across Council activities.

We also **request** a change to the **dog bylaws** in 2023. They are out of date and do not align with other cities of Aotearoa. In particular we want to adopt a dog-free estuary, to protect the remaining bird species that are fast diminishing.

We continue to appreciate the work and funding of **CCC Park Rangers**, and have advocated for a single ranger to be associated with all matters relating to the Ihutai/Estuary.

We thank the financial support to our **Community Boards**, who are crucial to the ongoing community engagement activities.

Yours sincerely,

Kit Doudney
Chair, Avon Heathcote Estuary Ihutai Trust Board

Feedback

1.5 Capital Programme

I am fully supportive of the \$3m grant to Edgeware pool. And if it were up to me, I'd give them \$4m! Although I live in Bryndwr these days, I lived in St Albans for 10 years.

During this time my son was primary school age and not only did he learn to swim at the pool (a combination of swimming lessons from the class teacher and the brilliant swimming club coaches) but he also gained independence and a sense of belonging to his community as he was able to wander down on his own - at appropriate ages and stages - to meet and hang out with friends there, in a safe, positive healthy environment.

As a young mum originally from outside the area, I could wander down 'a bit later on', have a swim and/or sit on the grass and chat with other parents/people using the pool and get to know people for no other reason than being at the pool. It organically and gently created an eco-system that Community Development Officers can only dream of. I wish the local community all the very best with their goal of getting it up and running again.

Submission to the CCC Annual Plan 2022/23

Name: __Natalie Hughes_____

Would you like to speak to the Council about your submission? Yes No

I/we support the Council contributing \$3m to Edgeware Pool Group to rebuild the Edgeware Pool, because:-

Given the increasing growth of the residents and housing in the St Albans and surrounding areas there is a far greater need for recreational amenities to be developed to meet the needs of the increasing population in the St Albans and the surrounding areas . The facility will increase the physical well being of the whole community. There are huge benefits of teaching a child to swim. The facility will allow families to support this opportunity in their own area. Allowing families that are struggling to walk or bike to use the facility at a lower cost.

I strongly support the council contributing \$3m to the Edgeware pool Group to rebuild the Edgeware pool.

Feedback

1.1 Rates
Ridiculous.

1.2 Revenue, spending and borrowing
Spend less on cycleways, more on the stench in Bromley

1.4 Fees and Charges
Not prepared to pay fees or charges while I can't breathe fresh air or drink clean water.

1.5 Capital Programme
The uncovered trickle filters at the wastewater plant needs urgent attention.

1.6 Further Comments
So far, the council has been nothing but a disappointment in regards to the remedying of the trickle filters fire at the wastewater plant. The air is unbreathable nearly every day and no matter what we do or what we report on, nothing is being done. Please urgently look at this. Surely we are entitled to fresh air to breathe just like those in Merivale have? We pay rates like everyone else. We do not want more cycleways or roadworks, we just want the stench to be fixed so we can attempt to live a normal life.

**Submission to Annual Plan of Christchurch City Council 2022
For
Keep Our Assets (KOA) Canterbury**

KOA Canterbury wishes to speak to this submission.

Authors

Stephen Howard

Murray Horton

KOA is committed to protecting the commons and public held assets. Among these are our democracy and the air, water and earth upon which we all depend for breath, drink and food. The major question that ECAN must consider in all its planning is how does the policy effect emissions and how does it drive a large reduction in those emission, while maintaining a democratic decision-making approach

Rates

Three Waters Proposal from central government illustrates that both present day local authority funding and future funding for climate response requires a reassessment of how councils are funded. It is the general reluctance of councils to increase rates that has driven much of the deferral or just ignoring of needed work.

At the moment rates are basically a wealth tax (a la Picketty) on real estate. This impost has two forms, one is a flat charge per unit and the other is a charge based on the capital or land value of that unit. A unit whether home, farm or business is charged the same rate whether it is a revenue generating business which will see rates as a business cost or a home and whether the home is very high value or very modest. A multimillion-dollar unit is charged at the same rate per dollar value of the property as a three hundred thousand dollar modest dwelling. This is in contrast with the

tradition of the central government income tax system which is progressive. In fact, it is worse than that if seen as a wealth tax. It also ignores the reasons for taxing (<https://braveneweuropa.com/richard-murphy-the-reasons-to-tax>) except maybe the rationing of resources.

To make it clear I would give an example; A young family has bought a four hundred-thousand-dollar home a couple of years ago, but their actual wealth in that home (equity) is small while their two empty-nest neighbours had bought their homes many years before and have no debt on the home. But when rated (taxed on wealth) all three homes are taxed at the same rate per dollar value of the home. But when looked at as a tax on wealth it is a much greater wealth tax on the young family than it is on their neighbours. If the neighbours were businesses it would be even more inequitable as they would be able to write off at least some of the rates against business income. And it is further exacerbated with the practice of rating flat charges.

CCC and all councils alongside central government needs to reassess how it generates the revenues required, a wealth tax is probably a good way of doing it but it should be on the actual wealth held.

The projected rates increase for 2022-23 of 4.25% to 5.29% seems reasonable in light of the huge challenges in front of local government.

Vancouver Tax/ Differential Rate on Vacant Land

Koa has consistently requested a differential rate on vacant land and buildings. And approves a strong rate on empty homes, buildings and vacant land.

Climate Resilience Strategy and Inner-City and Inner-Suburban Redevelopment

Koa has consistently recognised that viable planet and a strong city are important, in fact vital, public assets, a city functions best when it is understood that a city is more than just a collection of private properties connected by horizontal infrastructure. Public facilities, public transport/non-car modes and a modern climate change-based approach to housing are all important.

- **Public Transport**

KOA appreciates that EKAN has recognised the link between effective public transport and development concerns by having the one Transport and Development Committee cover both issues. The CCC needs to also understand the link between transport and development. One cannot run an effective public transport system while developers drive sprawl around the periphery of the city and the neighbouring District Councils encourage sprawl across the plains. Public transport requires concentrated hubs of development and dense inner cities. Such development would also enable a further growth in the modern idea of a 15-minute community.

- ❖ So we were disappointed in the sale of Redbus while understanding that the sale was driven by the commercial tendering imperatives of the Public Transport Operating Model (PTOM)
- ❖ At the moment the PTOM severely restricts the ability of EKAN and the three councils of Greater Christchurch from developing a reliable and attractive public transport system based on public ownership and coordination between road and rail. We have repeatedly seen problems of loss of service (conditions of buses and inability to make trips) and reduction in wages leading to a shortage of drivers as a result of the commercial imperative in the PTOM. This issue should be a major focus of any CCC led attempt to develop an effective and attractive public transport system.

- **Vancouver Tax/ Differential Rate on Vacant Land**

- ❖ Koa has consistently requested a differential rate on vacant land and buildings. And approves a strong rate on empty homes, building and vacant land.

- **Council housing**

- ❖ Council or central government led redevelopment of our cities with a strong commitment to public rental housing to achieve both climate resilience and just and equitable housing for all is a major strategy for climate resilience.
- ❖ CCC working with central government has the ability to redevelop in ways that are sympathetic to both community needs and climate requirements.
- ❖ The bunging of many units on the traditional 1/4acre blocks in St Albans is a going example of how allowing profit driven developers to redevelop our inner suburbs produces out comes such as the reduction of tree canopy, greater areas of hard service increasing runoff of storm water and further committing the community of Otautahi to car based transport. And that profit driven development is seen in housing tracts on the periphery imposing infrastructure costs on the council while aggravating
- ❖ KOA is pleased that many of the council owned public rental units destroyed by the earthquakes have been replaced and upgraded but the provision of decent public rental housing should be a major aim of the city in concert with central government.
- ❖ Central Government's Resource Management (Enabling Housing Supply and Other Matters) Amendment Bill doesn't really address the problem of homing people. It leaves home building as a profit generating activity rather than a human right, again only council and central government building and management can solve the homing problem.

- **Capital plan**

It is good to see that the stadium is being put off but it could be put off a lot more. These white elephant assets such as the stadium and the conference centre suck finance capital from the council with no return; social or economic. Money should be put into things like housing.

- **Three waters**

Three Waters Reform is a challenge for all councils this year.

KOA rejects any proposal that leads to the privatisation of water or domestic water reticulation and we have these demands about the proposal;

- ❖ Any scheme needs a guarantee of no privatisation.
- ❖ We need to get away from the neo-liberal corporate model.
- ❖ Under the proposed model it appears like a 1990s governance model with too many layers of bureaucracy between the people and the institution. So we would prefer a
 - A flattened regional management and service delivery process
 - Assured channels of input for community comment and accountability.
 - Mandated reviews (eg 3-5 years) from an independent reviewer.
 - A Govt. Department of Water Services with a civil service ethos.
 - Equal numbers of Mana Whenua & Taiwi.
 - Treaty guided ethos
 - Head of Dept to receive no more than 3 times the lowest paid staff person
 - All staff to be at least a minimum of the Living Wage with security of employment.

345

A share holding model doesn't appear to be appropriate in a government body.

Thank you for your work and for considering our submission

Would you like to speak to the Council about your submission? Yes No

I/we support the Council contributing \$3m to Edgware Pool Group to rebuild the Edgware Pool, because:-

New Zealand has one of the highest drowning rates in the OECD and it's getting worse. In order to reduce this, it is vital that young New Zealanders have access to facilities where they can learn to swim in safety. With schools increasingly forced to close their pools for budgetary reasons, it is necessary for the Council to step into the breach and help fund these facilities.

To: Tomlinson, Ann <[REDACTED]>
Subject: Feedback Draft

Hi there,

I am unable to submit my feedback online. So please see feedback below.

Candice Poissonnier

[REDACTED]

Comments on proposed fees and charges:
Parking prices needs to be lowered.

Businesses in the central city have been hit hard. Not only would a reduction benefit the business owners as it would draw more people into the city because it is very hard to compete with shopping malls who give 3 hours free parking! But also workers who need to bring their cars in - not everyone can cycle. I'm a solo mother of 3 working in the city. There is no other way I can get my kids to school and then myself to work without driving, then parking in town. If prices are lower then I will have extra money to spend in the shops or at the local cafes and restaurants.

Comments on water:
Keep fluoride put of our water. Keep the government away from our water, any no to three waters and remove chlorine - this was promised many years ago!

Thanks,

Candice

If you are responding on behalf of a recognised organisation please provide organisation name:

Avondale Neighbours Group

Your role in the organisation and the number of people your organisation represents:

Chair

Would you like to speak to the Council about your submission?

Yes

I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

Feedback

1.1 Rates

It is good to see the council is thinking about long term residents and those who rent, as these rises are being passed down to renters now as well making less affordable to rent

1.2 Revenue, spending and borrowing

No Comments

1.3 Revenue and Financing and Rates Remission Policies

No comments

1.4 Fees and Charges

Please keep fees and charges within affordable rates; for example, for a bigger family to get a replacement rubbish or green bin, this should not cost, as their circumstances might be that they have 3 or 4 times the amount of Rubbish or Green waste than recycling - however if you lost or damage your bin it should be paid for!

1.5 Capital Programme

In Avondale - there is no provision for replacement of roads or footpaths in the next 2-3 years and we are in need for it to be done, it was not completed corrected when it was done last time and has worn faster than normal.

Flooding still occurs in our suburb around the main roads and causes a lot of issues for motorists and the public alike.

There must be ways around making sure this flooding doesn't happen, like a big rain garden or hole in the red zone to capture the water run off better. for example, on Avondale Rd.

More money for roading in Avondale is needed - Even down on Breezes by the Intermediate School - the change in parking there could be an improved way in creating better flow... for example, making the parking on a different angle by the golf course for the school - allowing more to stop - or creating a parking space in the entrance to the old Avondale Primary - meaning the residents in this area can still have visitors park out the front of their own properties

1.6 Further Comments

In regard to our older population, who are increasing being asked to use public transport and we have no bus services within our suburb... our nearest routes are at least a 2 km walk to get to a bus, some will walk further, and in the pouring rain the older person will not or can't do that; to get older people within our suburbs using public transport bus routes will need to be considered with our

T24Consult Page 1 of 2

352

suburb. - I'd like to see a Indepth campaign to see how affordable changing the routes would be!

Hello Ann,

We are day late due to travel, can you please submit our objection on the following.

We are asking it to be brought forward the upgrade of the Milns/Sparks/Sutherlands Rd intersection. We are residents on Sutherlands Road and consider it unsafe with all the new development.

We consider it needs to be brought forward as part of the capital program in 2022/2023.

Draft Annual Plan Submission CCC - April 2002

Pedestrians don't count

There is a need for a complete redesign of paths for pedestrians. Pedestrians interact with a surface by foot-strike whereas vehicles have wheels that roll over the surface. New materials are available that are more pedestrian-friendly that use recycled rubber from old vehicle tyres which also makes them environmentally friendly. But the benefit to pedestrians is major with

- a. less forces of impact,
- b. less injury from falls,
- c. can be made porous, so no need for camber and not as icy in winter
- d. Has some stretch so does not crack with tree roots
- e. Water can get to street trees better

Priority also needs to be given to pedestrians

1. At driveways, where presently footpaths give priority to vehicles crossing the footpath (approx 2 to 4 movements/day) to many pedestrians, the footpath slopes on a greater sideways camber, putting strain on hips and knees

Pedestrians need their own exclusive space. "Shared paths" only benefit those on wheels - cyclists, e-bikes, e-scooters, skateboards, ... and deter many pedestrians. Yet for health and well-being of the population as a whole, pedestrian activities are the most available regardless of age, most disabilities, financial situation, accessibility, time constraints, ...

361

Our parks are being covered in more and more asphalt by increasing the number and width of paths to become transport corridors for increasing e-vehicles and cycles to the detriment of pedestrians. "Shared paths" are not pedestrian-friendly, especially for the elderly and those traveling on foot at slow speeds. As well as a means of getting from one place to another, footpaths are also used for health and well-being. But fear of being hit on a "shared path" by a vehicle traveling many times faster will deter many from using them and leave them with no alternative. Hagley Park now has "shared paths" for use by pedestrians and wheels that are over 4m wide - at that width these are roads and those on some e-vehicles and bikes are traveling about 30 km/hr which is the speed limit on inner city Christchurch roads and elsewhere.

Pedestrians need softer and more pedestrian-friendly paths and not "shared" with vehicles. In a recent Freedom of Information request, I was informed that paths are of concrete, asphalt or grit (although not as hard, is noisy, slips underfoot, and stones get in shoes) - none of which is pedestrian-friendly. Where possible natural surfaces are the most pedestrian-friendly, but when an artificial surface is required it should be designed taking into consideration the needs of pedestrians, as above.

Recently the paths in Somerfield Park were replaced completely. They did not require complete replacement, especially when they are not of pedestrian-friendly material. They encourage faster speeds by wheeled machines, including on the path which bisects the playground, creating a greater safety hazard for children. The FOI stated that it had a 'condition rating' that required complete renewal. The FOI stated that, "works are funded by a capital works budget in the Long Term Plan (2021-2031) signed off by the Council in 2021". So, replaced when it appears no one really checked if works were needed, and councilors and community board had no input. It is items like this that need not have occurred, creating a saving. Contrast this to the toilets in Somerfield Park, that would require much less cost to

361

make them accessible and safer to use by removing internal walls. While CCC has great public toilet provision in many parks, there are some that need desperate improving. Safety, health and well-being priorities well down the list!

Planing of 'hard surface renewals in parks' in the annual plan (parks generally, Botanic Gardens, Hagley Park, Heritage parks, Coastal and Plains Regional Parks, Coastal Pathway, Avon River Corridor), presumably sections of cycleways including cycle connections and local cycle network that will have sections of "shared path" are likely to all be of asphalt, which is not pedestrian-friendly, but costing many millions. So why is CCC spending millions on widening and creating new paths in parks, the "shared paths" for use by pedestrians and the 47 million to be spent long-term on roadside footpaths, with asphalt?

Instead of spending millions on pedestrian surfaces which are not pedestrian-friendly, but likely to cause pain and suffering in knees, hips and other parts of our bodies, please first consider that pedestrians do not have wheels and so plan to replace asphalt with pedestrian-friendly surfaces, especially in our parks. While the cost will not permit all asphalt footpaths to be replaced, consider a pedestrian-friendly network, with softer surfaces and no "shared paths".

CCC has dog parks, but there also needs to be dog-free parks for pedestrian safety. I would like to suggest the area around Nga Puna Wai including the lake and paths to be dog free. It is too late to suggest that they be kept on "effective control" when someone is bitten. There needs to be areas where athletes and the public generally can run, jog and walk without being bitten. A bite on the leg can ruin an athlete's hopes. Very often in parks where it is signposted that dogs must be on a lead they are not.

In the Port Hills, mountain biking has not always been separated from pedestrians. Now there are plans to introduce a new mountain-bike

361

track to exit downhill onto Rapaki Track where it is quite narrow for the volume of users, introducing a conflict that may cause injuries, but will also deter some pedestrians. No safety appraisal was done before consultation and now the Resource Management application. Instead of creating a separate track for the most vulnerable users of Rapaki Track (pedestrians), alternative tracks have, or are going to be built for mountain-bikers to have options, thereby encouraging more mountain-bikers to the area. Track counters only count metal movement so pedestrians are not counted. Yet the counts are presented as numbers using Rapaki Track. Again no consideration of pedestrians. The initial justification for a mountain-bike track on Montgomery Spur was that there were no tracks that were transitional from the plains to the hills for mountain-bikers. But this was before the Adventure Park and the mountain-bike track presently on Montgomery Spur means that pedestrians must have to constantly be aware that they may step into the path of a mountain-bike. The new path will increase the conflict.

The Port Hills tracks are best when as natural as possible. The Crater Rim track changed little in 40 years but lately there has been intervention to urbanise it with grass cover removed and shingle added. Natural stone steps have been replaced with wooden steps that are dangerous to negotiate compared to the natural steps and reduce the natural environment experience. Why can mountain-bike tracks have different grades, but pedestrian paths seem to have to be brought to 'great walks' standard on the Port Hills?

Many of the pedestrian paths or "shared paths" have flax planted close to them, such that the leaves hang over the path. If a pedestrian steps on a leaf with the foot furthest from the plant, the leaf will be tight, when the other leg takes a step and the flax leaf becomes an unexpected trip hazard, likely causing a fall and injury. Pedestrians obviously were not considered in the planting design close to paths.

361

New Zealand has a health and well-being crisis. For many people their health and well-being is improved with exercise, with pedestrian activities being the most available. But CCC has been ignoring the impact inadequate infrastructure has on health and well-being. And as the years pass, it is being made worse. The cycle plan has affected pedestrian provision greatly, with the assumption that if you cater for wheels that will also be ideal for pedestrians. The advent of e-machines has seen the impact on pedestrians being ignored. How is it acceptable for e-scooters to use footpaths just because their wheels are small, with no thought of blind corners, speed, passing very very close (on roads vehicles have to give cyclists 1.5m), so silent to not know they are approaching from behind and being parked anywhere including obstructing the footpath for days?

Elsewhere there is a cycle counter displayed, but again pedestrians don't count. At traffic lights, what other means of transport does not have straight through traffic on both sides of the road without the need for the lights to be activated on both sides? And why do pedestrians, who are the slowest means of transport, be requires to negotiate a zig-zag to cross the road at some intersections. Elsewhere, cyclists can cross diagonally, whereas pedestrians are expected to cross in two places to get to the same place. How about count-down seconds displayed, for those on foot who would manage the diagonal crossing faster than some cyclists? Again, pedestrians don't count.

362

KENNEDYS BUSH ROAD NEIGHBOURHOOD ASSOCIATION INC

Contact Address: -

Acting Chairperson

Kennedys Bush Road Neighbourhood Association has been an incorporated society since 1981. Our central focus has been the Halswell Quarry Park and environs, the local neighbourhood area and the wider area of Halswell.

We as a group are concerned about the rapid growth in Halswell and the effect on the natural and human environment.

As a result of the huge expansion of subdivisions in Halswell we are losing many mature trees. These new subdivisions are designed to pack in as many houses as possible on land that needs to be re-engineered to sustain the foundations for a house. The land is scraped on any vegetation and almost every mature tree is felled. The landscape then becomes a canopy of roofs.

Developers need to be required to plant large trees to balance out the loss of vegetation. Most green space now are water mitigation areas masquerading as parks. There needs to be parks where small children can play under the guidance of their parents and older children and teenagers have the spaces to gather and interact with each other, half basketball courts for shooting goals, skateboarding paths etc. On the hill and the flat surrounding Kennedys Bush Road there is a distinct lack of gathering places 'with a purpose'. We endorse the Community Hub's

Submission to the Draft Annual Plan 2022/23

Dorothy (Dot) Lovell-Smith

My Impressions of the Annual Plan

I found the Annual Plan on the whole an uninspiring document . It seems to be playing safe, worried about upsetting things when what is needed in this time of **Climate Emergency** is great vision and boldness that dares to challenge the status quo that has got us into this mess.

In the sections below I have looked at the small picture of my suburb and asked for some local issues to be fixed but looking at the bigger picture needs us all to change our relationship to the land and water and nature to prioritise climate change and climate safety. We need many more urban trees, we need more wetlands and carbon sinks and places to foster local food self sufficiency.

We need more good housing so that every body has a warm comfortable place to live but we must not allow more houses to be built at the expense of the environment. All new resource consents for building housing and business premises **must** take into account climate change and the need for sustainability.

We need visionary city planners who can see ways to make all these things work.

We need planning first and development next so that valuable growing land is not swallowed up under parking lots and concrete slab retail hubs, and so that communities are linked by publicly owned public transport.

We need a plan for a future.

Answering some of your questions.

Residential Rates increase

I have no objection to the rates increase as long as the money is spent wisely on services for the public.

I do object to obscenely high salaries (eg over three times lowest pay rate) being paid to a few CEO types especially when some people who work for subsidiary companies or for other companies put

364

on to provide services to the CCC, like bus drivers, work long inconvenient hours and get low wages.

Every person working for or on behalf of the CCC should receive the living wage.

I also object to the way the City Council has abandoned the **public service model** of employment in favour of contracting work out to contractors and sub contractors.

It allows the chain of responsibility to be opaque and sometimes small problems take a huge amount of effort to fix.

Proposed Changes to Revenue and Spending

I do approve of the council borrowing money for development.

I do not approve of the council selling land assets. I could not find a list of the proposed land sales but I understand one property in Hei Hei on the corner of Kaniere Av and Gilberthorpe Rd may be sold. I would like the sale to be cancelled and a full community consultation taken with local residents, community groups and cultural institutions like the Christchurch School of Music, and the WEA. It complex of buildings could become a cultural hub like Avic Hill in Memorial Ave if it was preserved and managed by the CCC. The South West of Christchurch is lacking in easy access to places like music and art schools.

Do not introduce rate remissions on vacant land and buildings. That would encourage developers to land bank. Maybe **increase the rates**, especially if the developer has removed tree cover...

I also think there should be **really high** rates on places like McDonalds, Burger King and liquor out-lets to compensate the Council for the money spent on removing broken glass and take away container rubbish littering public spaces.

How about a rates remission for those of us who grow our lawns long, plant shrubs on our berms and preserve trees. Valuable carbon sinks and habitats for diverse fauna.

Revenue and Financing and Rates Remission

I support the rates remission policy for community-not-for-profit groups I would also like to see such groups especially the various community gardens receive a water rates remission on excess water charges.

I support the proposed three criteria for Excess water rates remission, but I would also like an extra one included;- ie remission considered on excess water rates in areas like Brighton and Hei Hei where soils are light and sandy so that gardeners can continue to support themselves and other members of the community with veges and fruit from their gardens. There is a huge difference in the amount of water needed for a suburban garden in Hei Hei and one in Bryndwr purely because of the type of soil and its water retention qualities.

I am lucky enough to own a quarter acre section on which I can almost completely provide year round veges. Despite huge amounts of horse poo and pea straw being added to the soil, and many wind breaks, I still need to use quite a lot of water to keep things growing. Even my trees which are valuable carbon sinks need water during prolonged dry spells.

Proposed changes to fees and charges?

Great that the library has dropped its overdue fines..But I would also like them to stop charging the

364

\$3 fee for book holds. It is an added expense that I just can't afford. A friend in Auckland can order books from all Auckland City libraries to be delivered and held at her local library free of charge. She has a much more interesting reading life than I do.

Capital programme

Great that building work has at last started on the Hornby Pool, Library, Service Centre Complex. I hope I live long enough to get to swim there.

Also great that there are getting to be bike tracks offering safer cycling in the outer suburbs and not just the city centre.

There are some places in new Hei Hei/ Buchanans Rd/ Yaldhurst Rd subdivisions where developers have provided lovely cycling and walking tracks in their subdivisions, but they do not join up to other subdivisions. So cycling sometimes involves exciting exploratory cross country cycling through long grass. Can someone please take responsibility for joining these tracks up to make an intelligent and planned network?

Although I scanned the lists I did not see any money being put towards fixing the narrow and dangerous footpaths around the area of the Hornby Hub. One footpath in particular along the north side of Chalmers St, between the two shopping centres is too narrow, holey and crumbling at the edges. I challenge councillors to walk along it pushing a push chair with a preschool hanging on the side, safely. We often have to take to the road to allow a wheelchair or pushchair to get past.

The foot/bike path through Kyle park that ends at the right angled corner of Chalmers street is also an area where there needs to be a bit of thought put into making it safe. The track ends in a paved parking lot for the Hornby Rugby clubs, Denton park and shoppers to use. It also runs close to an access road used by CCC parks, water and recreation workers, emergency services and Denton Park users. The area for parking is not clearly marked and cars often park on the road access and the walk/bike track forcing wheelchair and pushchairs to take to rough stony holey ground. The constant vehicle traffic damages the walking track and at its end there are big holes. When it rains there are puddles deep enough to drown a toddler. The paving on the track needs to be fixed so it stays fixed and the way the area is used for different purposes clearly defined and communicated to the public.

Any further comments-

Where is the money being budgeted to stop Climate Change?

I was disappointed that there was no budgeting for increased tree planting in areas like Hornby and Hei Hei. With the government's proposal to encourage greater housing density in suburban areas, unless the council takes steps to prevent it, we are sure to see a great loss of tree coverage in the suburbs. We can not afford to let this happen. **Climate Change will not go away if we pretend its not happening . It is happening now** and at the moment planting more trees is one of the only weapons we have to use in the fight to slow it down, I would like to see more community consultation about where we, and you can plant more trees. There are lots of spaces around Hei Hei in parks, on road sides and under the high tension lines which are a feature of our suburb, that could all be filled in with bush or tree planting. The planting begun by subdivision developers could be expanded to increase areas of shade and shelter from the wind.

The big green space on the edges of Wigram along Awatere Rd could be turned into park and planted with native bush trees to become a new attractive feature of the area.

364

The other tool in the fight to stop climate change is to get much more than the proposed 40% of transport out of private cars. We need to get most of the transport in the city to be in publicly funded free, electric public transport.

I do not expect the CCC to fund this alone it needs to lobby Government for the funding to make this possible. I know that the system in Christchurch means that the CCC does not have responsibility for all aspects of bus travel, so I think the first and most important thing that needs to happen in the greater Christchurch area is joint work between the CCC, ECAN, Selwyn, and Waimakariri councils to form a Public Transport Body that can work on all aspects of public transport.

We need to get rid of private public partnerships that run public transport for profit. Public transport needs to be a service. At present the drive for profit means companies cut maintenance and wages for drivers. Drivers often work inconvenient hours with split shifts and no recognition of this in their wages. There is a huge turn over of drivers and difficulty in finding good drivers, especially at times like the present pandemic. And the first thing needing doing is to get rid of the current contracting model forced on councils by the PTOM. Which again requires government support.

We need more flexible and responsive city planning that can get new bus routes up and running at the same time as new suburbs and shopping hubs are built. At present places like Halswell and Yaldhurst have some bike tracks but no handy buses, forcing residents into their cars.

There needs to be a huge publicity campaign offering incentives to travel on public transport, We need money spent on advertising where and how to get places by bus. The London Transport Company had a wonderful poster campaign where well known artists designed posters advertising *Travel by bus to.....* They were art works in their own right and were sold all over London. What about a scheme like that?

Info and encouragement to car pool, park and ride, bus interchange points and bike lock ups, needs to be available not only to those who have the special app but to everybody in plain visible language. I find it most frustrating when in my own city that it is often very hard to find out how to get to various suburbs by public transport. Not all of us have a fully charged phone on us at all times.

Thank you for reading and considering my submission.

Dallington Residents Association

Your role in the organisation and the number of people your organisation represents:

Chairperson (12 people)

Would you like to speak to the Council about your submission?

Yes

I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

Feedback

1.1 Rates

We understand the need for rates increases, but are concerned that there seem to be neverending rates rises without residents getting anything new for it.

House valuations are increasing due to the housing crisis, and this means that rates also go up - but people don't have extra money in their pockets. This can create financial difficulties for some people.

1.2 Revenue, spending and borrowing

We seem to be borrowing a lot and this will be paid back for generations of Christchurch residents.

1.5 Capital Programme

We are spending a lot of money on flashy things - stadium and highly engineered roads that don't need to be so fancy. Get the basics right before we worry about making our streets and roads gold plated.

1.6 Further Comments

It is great to see the budgets for the OARC being consolidated and the focus on setting up the co-governance arrangement. This has been a lot time coming and we are looking forward to significant work getting underway - stopbanks, stormwater etc.

We would really like to see the City to Sea Pathway start to happen as soon as possible.

Feedback

1.1 Rates
Impossible to understand why this is appropriate when CCC is not providing effective, sustainable or equitable outcomes for all areas of Ōtautahi. The suburbs of the poorest areas like Phillipstown and Linwood, are repeatedly failed by the council despite the high proportion of vulnerable whānau in these areas.

1.2 Revenue, spending and borrowing
No

1.3 Revenue and Financing and Rates Remission Policies
No

1.4 Fees and Charges
No

1.5 Capital Programme
CCC has a duty of care to ensure whānau and communities can live and work in healthy, safe and sustainable neighborhoods. There is significant inequity in Christchurch and the council is in denial.
CCC neglects its responsibilities in regards to key issues such as general maintenance. Examples include litter collection in parks and in residential areas (not everything is a 'snap/send/solve' issue). There is no evidence to suggest that vulnerable areas are monitored and problems or issues anticipated. Drains are never cleared, pathways are not free from tripping or hazards, streets are not well lit, fast food rubbish and drug paraphernalia is not dealt with etc. etc. In essence many people in low decile areas do not feel safe to walk freely around and enjoy the areas they live in.
In terms of equity, areas such as Fendalton or Sumner are very, very different to Linwood or Phillipstown. Equitable treatment for all requires CCC to concentrate greater resourcing into vulnerable neighborhoods to address disparity. CCC clearly has no intention of addressing this need or paying attention to those who feel unable to have a voice.

1.4 Fees and Charges

No Comment

1.5 Capital Programme

My submission is based around the performing arts precinct and an opportunity that exists to make the most of the outdoor space that has become available (in the space that was earmarked for a car park building).

The Christchurch Big Band Festival has been operating for 16 years and at its core are the free outdoor performances throughout the CBD over the 5 day festival. The opportunity to have a dedicated outdoor space (to be used in addition the spaces we currently utilise) we could use for these performances is one that should not be passed up. We encourage the council to earmark spending for an outdoor performance space including public toilets, amphitheater, portacoms to be used as green rooms and rehearsal spaces and dedicated spaces for food trucks. With these facilities on tap in this space it would fully activate the performing arts precinct for everyone. The CBBF would guarantee to use this facility over the 5 day festival.

We would also be able to provide a programme of content through the year in this space, not just over Labour weekend. Free outdoor entertainment would encourage more people into the CBD.

I am writing to urge you to strongly reconsider leaving the intersection upgrade for Sparks / Milns Road until 2027/28, and plead that you bring ut forward to the 2022/23 year

We have been lucky enough to secure a property in the new Meadowlands subdivision and are currently building on the corner of Colliers and Sparks.

The Milns road intersection has extremely poor visibility and is an accident waiting to happen. I currently turn left from Milns Road in to Sparks daily and it is a gamble every time.

with a preschool opening on the corner snd hundreds of new homes being built within just a coupke of km of this intersection, an upgrade should beca matter of urgency.

i also ask that you bring forward the timeline for extending the pedestrian / cycle lane along Sparks Road to Halswell Junction Road. There is no safe way of walking / cycling to Halswell that doesnt involve a huge detour.

please upgrade both in the next annual plan.

Submitter Details

Submission Date: 18/04/2022
First name: Allan Last name: Taunt

Your role in the organisation and the number of people your organisation represents:

Would you like to speak to the Council about your submission?

Yes

I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

Feedback

1.1 Rates

I am supportive of the rates increase.

But I want to make this point: Quoting the percentage increase by itself means little. A percentage increase needs context to be meaningful. The minimum context needed is:

- The value of the the rates for the previous year.
(noting that the previous year's amount could differ from a fair value)
- What is being delivered.

Far too often media and other individuals quote the percentage rate increase in isolation in an attempt to undermine the work the Council does or to target specific Councillors. This is cynical in that it is an attempt to mislead the public by choosing to leave out what rates are paying for.

The other variation on this is when media or other individuals quote the percentage rate increase, and use this to attack a specific project even though that project doesn't have a major impact on rates (either as a capital expense or an ongoing operational expense). This is especially relevant when projects span a timeframe of say 10 years or more (i.e. the expense incurred in a given financial year is small compared to the overall project).

This is a request to CCC Staff that if they spot examples where there is misinformation/disinformation or incomplete information, that they use whatever mechanism available to get it corrected, removed or if necessary escalated. I am especially thinking of social media pages linked to Local Government in Ōtautahi Christchurch.

By way of example (actually 3 examples) illustrating the problem, a CCC Councillor ran a post on their Councillor Facebook on March 20 about CCC cycleway funding. Ironically the Councillor was concerned about the public's misunderstanding, but made absolutely no attempt to correct the following comments from the public on that post:

- "So , could this be the reason for our **purported 24 % rates hikes** then?"

T24Consult Page 1 of 3

385

- "Well done guys. Hopefully you can sort out this **24% increase in rates**. Totally wrong. Who can afford that?"
- "Cycle lanes have been very controversial since they first rolled out. St Asaph St is a prime example that they are badly planned and bad value for rate payers money. We'll done **** and *** for standing up and getting ratepayers involved. Time for change , looking forward to this year's election. *** would make an excellent deputy! **25% rates increases are scaring alot of people**. Also time for city bus restructure. 95% have less than 5 passengers apart from peak times. Keep up the great work."

Clearly members of the public have confused CCC's rate increase with ECAN's rate increase (this Councillor had run posts about ECAN's rates increase previously).

Note there were only 18 comments on that post, being unaware of correspondence like this is not an excuse. It would be strange if Councillors didn't read the feedback from their constituents.

It is examples like that that need to be managed much better otherwise the credibility in Local Government will suffer. Note, this is not the only example of the problem.

1.2 Revenue, spending and borrowing

Agree with the changes to revenue, spending and borrowing.

I am especially supportive of the \$3 million grant toward Edgware Pool and \$400,000 grant to the Pukeko Centre. Both facilities help connect people and strengthen communities.

On the earlier revenue from the Crown for Shovel Ready projects, I would like to thank CCC Staff for having these projects ready to apply for funding (and making a good case for funding). It is really appreciated, thanks team!

1.3 Revenue and Financing and Rates Remission Policies

In general, I agree with the area of Revenue and Financing and Rates Remission.

The only concern I have is the future costs for Te Kaha/Canterbury Multi-Use Arena and how much visibility ratepayers have of this on their rates bill. In the current financial environment, we should expect escalating costs.

1.4 Fees and Charges

Agree with the changes to fees and charges.

The removal of overdue fees for library items was an excellent motion to pass. Thanks those that put this forward and the supporters. This was very interesting to read about. Having studied economics previously, I did realise a population may not behave as expected when faced with perceived incentives/disincentives. Nice to see in action how removal of fines can bring benefit.

1.5 Capital Programme

In general, I agree with the capital programme.

However, we do need to make sure we are doing everything we can to reduce carbon emissions and sink carbon emissions. The latest information from the IPCC needs to become a regular input into decision making. The big

T24Consult Page 2 of 3

385

area of concern is of course transport. Improving behaviour is not easy, and in reality this should have started many years ago.

Nevertheless, we are here now. We need to continue growing the public transport network and the active transport network (walking, cycling, other micro-mobility transport devices, etc.). We should also expect in future there will be a desire to move the likes of e-scooters off footpaths and improve how they are parked. Expect cycleways will become micro-mobility lanes in future. The cycleway program goes some way in future-proofing this requirement.

Tying in with this, the transport networks need to be inclusive. This means bus shelters need to be safe and cater for people with varying abilities. Similarly, information about services needs to be easily accessible for people with varying abilities. The same applies to cycleways, with a key point being width to support trikes and recumbent bikes (which incidentally helps support cargo bikes as well).

1.6 Further Comments

Unfortunately, there are many examples where members of the public are confused about how the Council operates (e.g. the misinformation on the Councillor's Facebook page as mentioned in my first point).

Funding should be allocated to identifying and addressing misinformation and disinformation. For areas that repeatedly show up as problematic, solutions need to be investigated. Initially it could be something like education in the form of factual articles that can be readily linked to.

Another method of improving knowledge of Council operation would be to provide schools with information that could be included in the curriculum. This could also help with engagement with the Council.

Happy with proposal

1.5 Capital Programme

Would like to see Templeton domain park upgraded to be more toddler inclusive and repainting of existing equipment to improve the experience. Many items are broken, dirty and chipped at the moment.

A fenced off area with toddler-friendly play areas would be ideal, as Templeton has plenty of very young families and children that need access to a great park. Some examples would be a path going around the park in a circle for trike riding, small trampolines, sandpit, climbing mounds with grips for younger kids and, if the area is fenced off, locals can donate trikes and ride-ons for when kids are at the park. Currently, very young kids are limited to the small slide and don't have much balancing / riding / jumping play equipment at their disposal.

Feedback

1.3 We're proposing some changes to our Revenue and Financing and Rates Remission policies – do you have any comments? Yes, I would like to see priority given to Phillipstown and see urgent and overdue infrastructure work be brought forward.

1.5 Do you have any comments about our capital programme (for example, our roads and footpaths, our water, wastewater, surface water and waterways, our facilities and our parks)?

The addition of the cycleway has unfortunately created a dangerous and ambiguous bi-directional shared stretch of road, footpath and cycleway outside the properties of [REDACTED] Ferry Road and urgently needs attention.

This is the access to the homes on this stretch and when accessing our homes we need to negotiate scooters, bikes and vehicles cutting through this section to avoid the traffic lights - often travelling at speed. You have all manner of people and vehicles cutting through in both directions weaving through pedestrians. It is very difficult on such a busy intersection to stop in a car without being rear-ended by another vehicle as you check and wait for the accessway to clear. This is also a footpath and the whole stretch is stressful and dangerous to use.

There is no adequate signage, median or instruction that it is a shared road. It desperately needs addressing.

Created by Consult24 Online Submissions Page 1 of 2

Our Draft Annual Plan 2022/23 from Young, Paul

390

There are many small accidents and close-calls outside our property every week. One of your own workers accidentally crashed into my wife's vehicle and i have witnessed collisions between pedestrians and cyclists.

The Cross Road Reserve needs regular maintenance to pick up rubbish and address the muddy bogs that take over the entrances every Winter. There is no pathway at all to this playground.

Walking with children is outright dangerous along ferry Road between Wilsons Road and Aldwins. The footpath is narrow AND shared with cars. I would encourage you to take a walk along here with a pram or a small child to get a feel for the adrenaline hit received when a car pulls quickly off the road to within 1m of you and your young pedestrian while you're preoccupied trying not to get your pram wheel stuck in one of the many potholes and uneven surfaces.

1.6 Any further comments

We have lived in and owned our home for 14 years and often feel pretty let down by the lack of prioritization for the needs of this area.

Please, please please! Fix the East side!

- The Bromely stench

- quality of roads New Brighton

- In particular New Brighton Road: the constant flooding, and make it two ways again! Its an extremely important route in and out if New Brighton.

Also I would love to see something really cool happen with the Arts Precinct spot that will (thankfully) no longer be a carpark. Something accessible for young/emerging artists and flexible for different formats.

Feedback

1.1 Rates

No increase for those affected by the wastewater plant stench. Having to live with this stench costs us our health and livelihood. You can not increase our rates when we are sick.

1.2 Revenue, spending and borrowing

Spend it all on the Wastewater plant to get the stench gone. And infrastructure of that plant.

1.3 Revenue and Financing and Rates Remission Policies

Spend what you have to.

1.4 Fees and Charges

Do not increase fees or charges to those affected by the Wastewater stench

1.5 Capital Programme

Wastewater Sewerage system yes. The Wastewater stench needs prioritizing and the people of the areas affected need to take precedence over any other system. This is our health. We are breathing 400,000 human waste rotting. This is not healthy and I want it resolved NOW.

1.6 Further Comments

The poor quality of our air on the East side of ChCh is making us sick. We are losing sleep, have constant headaches, nausea, stinging eyes, we can't use our clothes lines to dry clothes, we can't entertain our families and friends, we cant eat normally. Our whole enjoyment of life has changed for the worse since the fire at the wastewater plant.

We work hard and should be taken care of. Our physical and mental health has been and is being severely eroded. My granddaughter has asthma and is badly affected (hospital visits regularly) because of this stench, my hubby has a lung disease and his health is diminished and he is so tired, because of the lack of sleep.

We pay our rates and taxes and we have witnessed a plethora of health problems stemming from this ongoing problem.

T24Consult Page 1 of 2

396

This affects us economically as we can't function in our work to full potential.

You have a job to look after our health and our air quality. The money to be spent should take priority to sort our wastewater sewerage system stench and the infrastructure. To heck with making our inner city pretty, our lives and livelihood's take priority.

LISTEN PLEASE. Change our plant to fix our problem FIRST

Subject: Feedback on Draft Annual Plan 2022/23 / 494

I tried to submit my feedback but was unable to do so. On the submission page on the council website.

The sewage needs to be sorted out! I live in new Brighton and it's beyond revolting. I can't eat my food neither can my children. My toilet after taking a s***t smells better than the air outside! It's inhumane to live like this!!

It baffles me that the council has spent so much on art around the city but can't fix its sewage!??? Sort it out!

Not a happy resident

1.5 Do you have any comments about our capital programme (for example, our roads and footpaths, our water, wastewater, surface water and waterways, our facilities and our parks)?
The main reason I am writing a submission is in relation to the parks and facilities. We have a young family and have felt that if ever there was a time to put more money into local parks and playgrounds it is now. With the pandemic in the last two years, there were many times when we felt like one of the only 'safe' places to go for our kids to have a good run around was our local playground in Templeton. Unfortunately, given that it is getting quite run down and some of the pieces of the playground are now starting to deteriorate, it is in need of an upgrade as soon as it can be. It is great to see some of the Templeton Domain being added to - the Tennis Court and the new signs are great additions to the park. However, given that the main thing that gets used is the playground

Created by Consult24 Online Submissions Page 1 of 2

Our Draft Annual Plan 2022/23 from Hutcheon, Paula

402

it is really important to our community that the upgrades happen sooner rather than later. There are so many wonderful playgrounds around Christchurch but many do not have toilet facilities which is essential for young families - toilet facilities is one thing Templeton Domain does have which is great! We know for a fact, having talked to many families and young people in our community that a Basketball Court in the Domain would be such a great addition also and with plenty of room or a slight alteration to the Tennis Court, it could be easily transformed into a court area that could be used for a range of sports rather than just one sport that not everyone is into. Why limit such a great facility to only certain groups of people when there are a whole range of possibilities that could be looked at including expanding the playground area to cater for both young and older children with different playground equipment? On a separate note, we would also like to see our local Templeton Community Centre being used much more during the week for a range of purposes including exercise classes / various clubs / activities for kids / young people. It is under utilized and has so much potential for offering our community more experiences. Thank you for your time and consideration and also the opportunity to share our views. We hope that our local playground and domain will be upgraded sooner, our community centre used more and for all ages both young and old to experience the best that the Council can offer them.

Feedback

1.1 What do you think of our proposed average residential rates increase of 4.86% and 4.96% across all ratepayers (which is lower than the 4.97% signalled in the Long Term Plan 2021–31)?

Why should we have any increase when we are not getting fresh air. Bombarded with shit smell.

1.2 Do you have any comments about our proposed changes to revenue, spending and borrowing?

Priority needs to be spent on the sewerage plant. Doesn't matter how much it costs.

1.4 Do you have any comments on our proposed changes to fees and charges?

Should be not changes for those putting up with Stench

1.5 Do you have any comments about our capital programme (for example, our roads and footpaths, our water, wastewater, surface water and waterways, our facilities and our parks)?

Hell yes. Focus firstly on sorting the shit smell from the sewerage plant. Then the roads around our area.

1.6 Any further comments

I have a lung disease. The stench at the moment really affects my breathing, sleeping, energy levels and my state of mind. I have to work in the stench and then come home to it. I can't get away from it. I get the smell from the compost plant too. Hopefully that will be moved away from here. Maybe you could move the wastewater sewerage plant too. Now that's a thought. In the meantime PLEASE MAKE PRIORITY TO GET RID

Created by Consult24 Online Submissions Page 1 of 2

Our Draft Annual Plan 2022/23 from Walker, Andrew organisation: avautotrim@gmail.com

OF THE STENCH FROM THE SEWERAGE. My enjoyment of life is at an all time low. I am so tired of it.

405

5 months is too long to put up with it and dilly dallying around it should have been planned as soon as the fire was out, should have started straight away emptying the media to get rid of it. Rotting human waste is not geothermal, it is human waste and attracts flies and stench. GET IT GONE NOW.

Feedback

1.1 What do you think of our proposed average residential rates increase of 4.86% and 4.96% across all ratepayers (which is lower than the 4.97% signalled in the Long Term Plan 2021–31)?
I support the rates increase even though it is lower than what was signalled in the LTP 2021-31.

1.4 Do you have any comments on our proposed changes to fees and charges?
I support increasing off- and on-street parking fees.

1.5 Do you have any comments about our capital programme (for example, our roads and footpaths, our water, wastewater, surface water and waterways, our facilities and our parks)?
I support extra spending for roading improvements, if those improvements remain aligned with Council's commitments to climate action and the proposed level of service goal for trips taken by non-car modes. To achieve a (minimum) level of service where 36% or more of trips taken by non-car modes and 48% of residential land holdings with a 15-minute walk access this includes but is not limited to additional investment in:

- Improving footpaths and developing more pedestrianised areas
- Traffic calming

Created by Consult24 Online Submissions Page 1 of 2

Our Draft Annual Plan 2022/23 from Conrow, Lindsey

- Improving public transport infrastructure, including developing more bus priority lanes and shelter/stop improvements
- Completing the Major Cycle Routes, and adding more cycling infrastructure throughout the city

406

1.6 Any further comments

The progress on cycling infrastructure has made cycling in Christchurch so cool and fun. I look forward to continued investment in projects that support modal shift away from cars.

Feedback

1.1 Rates

In this currently economic environment whereby there have been several price increases, while many income earners have not been paid more, I am reluctant to agree with an increase, however I understand that the CCC has also incurred price increases which rate payers need to help pay for. Having said that I think an increase of 4.86% is too much. As a central city resident I see a number of contracted council services that do not full fill their duties, such as maintaining green areas such as Victoria Square, including weeding, grass mowing and planting, and the likes of the emptying of rubbish bins in public areas.

Attached Documents

File
Inner city rubbish collection area changes and the ability to opt out

415

Annebel de Kort, [REDACTED]

Inner city rubbish collection area changes and the ability to opt out.

I live in a multi-unit residential apartment, [REDACTED] we do not have a rubbish bin collection, however I know that the likes of Regent Court at 75 Gloucester Street does have a rubbish bin collection, which seems odd that parts of the inner city miss out on this necessary service. The rubbish bags that we have to buy from the CCC are flimsy, and inadequate.

The [REDACTED] residents who do not have a garden are not interested in a green bin, and some have opted to pay for a private rubbish collection service, it would therefore be ideal for those residents on our street who do want bins can choose to do so. I do not mind paying for this service, and would welcome a yellow recycle bin plus a red bin.

Inner city transport.

I would like to see the inner city-shuttle reintroduced to the CBD, and that this be a free service, and that dogs, as long as they are on a lead, and are controlled by their owners, be allowed on public transport.

Many residents have dogs, and want to use public transport but are unable to do so. This is a real disadvantage; it just encourages people to keep using their cars, when we should be supporting the use of public transport.

Vacant land rate increases

I am in favour of vacant land and derelict buildings in the Central Business District incurring a rate increase or a levy for not demolishing or not maintaining the building and/or land, and have no plans to do anything with the land. There has been plenty of time to do so, they are ugly, untidy, and unsafe, an eye sore to the inner city that is finally showing signs of recovery post the earthquakes.

Wilson's Carparking areas

Many of the inner-city Wilson carparks are poorly kept, yet they are quick to fine any overstayers. Most of their carparks do not have adequate shingle cover, that results in large puddles forming when it rains, in winter time the puddles do not dissipate, and the attempted plantings in boxes are not maintained, they are looking very shabby. For all the revenue that they make I believe that they should contribute to a regular maintenance program of their sites, and that this should be mandatory. The carparks should be clearly defined, and any surrounding fencing be maintained, and rubbish be regularly collected from these areas.

Public Rubbish bins

These need to be emptied more frequently on the likes of public holidays and during school holidays, and the overflowing rubbish or rubbish that has blown out of the bins be picked up by the contractors.

415

I have seen them sitting in their trucks for lengths of time doing nothing after emptying a rubbish bin while ignoring the rubbish on the ground surrounding the bins.

Drains and Sumps

Flooding is evident along our section of Cambridge Tce, in fact the cellar of my neighbours flooded during the last heavy downpour, the sump on the road at the bottom of my drive does not cope with the volume of water, it probably needs to be a bigger pipe. The foot path was so badly flooded it came to the top of my gumboots that I had to wear to get my mail and when I wanted to exit my property. It completely covered the footpath that was inaccessible, and also a section of the road. When the river overflowed up to halfway of the road, and met up with the overflow of water from the footpath side flooding the whole area. It was very challenging trying to enter or exit my car that was parked out front in the flooded area, there was no area along that stretch of road that was not flooded where I could park my car, or the likes of visitors or services could park.

It has happened on several occasions, and needs to be included in the draft plan, many people walk, scooter and or bike to work along this section of Cambridge Tce to Manchester Street.

Our Draft Annual Plan 2022/23

Submitter Details

Submission Date: 18/04/2022

First name: Lucy Last name: West

Your role in the organisation and the number of people your organisation represents:

Would you like to speak to the Council about your submission?

Yes

I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

Feedback

1.1 Rates

Its still too high, given you are also startibg to charge water rates.

reduce the increase to 3% as a way of softwnribg the blow of water rates.

Which may i add are so ableist.

many people with disabilities need to bath or have long showers. People with children use a bath nightly. We are really being discrimated against with the water rate charges going ahead in July.

1.2 Revenue, spending and borrowing

please add \$600,000 to spend towards saving the trees and the canopy of Christchurch.

its almost too late with less than 10% of the original canopy left. Its all gone.

The summer is hot and dry, no natural shade.

Super windy, no trees to block wind across wider Canterbury.

Floods - no trees to wick away the water and soak it up.

it seems to make so much sense to protect what trees are left but it seems that every day the last that are standing are quickly getting wiped out.

T24Consult Page 1 of 2

420

1.5 Capital Programme

save the trees

\$600,000 at a minimum to be allocated towards research and replacing;planting of LARGE trees.

please allow the trees to remain, every day more are removed and its becoming very rare to be able to walk under tree shade on footpaths, or sit under a tree for a picnic or to watch sport.

please, shut down the tree tech and other companies that are pillaging our mich needed city trees. Look around, its almost too late.

1.6 Further Comments

please allocate \$600,000 towards SAVING the trees.

not to spend on their destruction and removal.

saving them from developers is crucial to the aesthetic and beauty of the city.

its laughable to call ourselves the garden city when every day more and more trees are disappearing. When will it be too late? It almost already is.

Te Mahere Rautaki ā tau **Our Draft Annual Plan 2022/23**

Submission form

We'd like your feedback on the Draft Annual Plan 2022/23. Written submissions can be made from **Friday 11 March 2022 until 11.59pm on Monday 18 April 2022**. There are a number of ways you can give feedback:

Written feedback

Written submissions can be made from **Friday 11 March 2022 until 11.59pm on Monday 18 April 2022**.

-  Fill out our online submission form at **ccc.govt.nz/haveyoursay**
This is your quickest and easiest option.
-  Fill out this submission form and send to:
Freepost 178 (no stamp required)
Draft Annual Plan submissions
Christchurch City Council
PO Box 73017
Christchurch 8154
-  Or deliver to any of our libraries or service centres, or to the Te Hononga Civic Offices at 53 Hereford Street.
-  Email your feedback to **cccplan@ccc.govt.nz**

You need to include your **full name, postal address, postcode and email address** on your submission. If you wish to speak to your submission at the public hearings, please also provide a daytime phone number.

If you are completing your submission on behalf of a group or organisation, you need to include your organisation's name, your role in the organisation and the number of people your organisation represents.

Social media

Informal feedback, which is not counted as a submission, can be made in the following ways:

-  Go to our Facebook page **facebook.com/ChristchurchCityCouncil** and include **#cccplan** in your post.
-  Tweet us your feedback using **#cccplan**

ccc.govt.nz/haveyoursay

Want to talk to us in person?

Please let us know if you'd like us to attend your community meeting or event. Or call us directly if you have any questions:

Ann Tomlinson, Senior Engagement Advisor
Phone: 03 941 8717
ann.tomlinson@ccc.govt.nz

Be heard in person

Depending on COVID-19 alert levels, your local community board members will do their best to be out and about in your area during the time we're consulting on the Draft Annual Plan. If you'd like to talk directly with a councillor or community board member about the Draft Annual Plan, get in touch: **ccc.govt.nz/community-boards/**

Alternatively, you can give us a call on (03) 941 8999, provide your details and a good time for us to call, and one of our managers will be in touch.

Hearings

Public hearings and oral submissions will be held in May 2022 (specific hearings dates to be confirmed).

Submissions are public information

Subject to the provisions of the Local Government Official Information and Meetings Act 1987, we will make all submissions publicly available, including all contact details you provide on your submission. If you consider there are reasons why your contact details and/or submission should be kept confidential, please contact us by phoning (03) 941 8999 or 0800 800 169.

submission form**

Your details:

A Full name Wayne Keen
Postal address 
Postcode 8

If you are responding on behalf of a recognised organisation please provide:

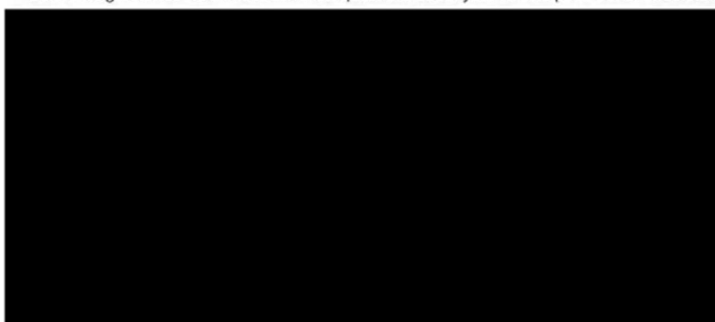

Organisation name _____
Your role _____
Number of people your organisation represents _____

Hearings will be held in May (specific dates are to be confirmed).

Would you like to speak to the Council about your submission? No Yes

If yes, please provide a daytime phone number so we can arrange a speaking time with you: _____

Before we get started we'd like to ask a few questions about you. This helps us better understand who we are hearing from.

422

Questions to think about when making your submission

What do you think of our proposed average residential rates increase of 4.86% and 4.96% across all ratepayers (which is lower than the 4.97% signalled in the Long Term Plan 2021-31)?

Do you have any comments about our proposed changes to revenue, spending and borrowing?

We're proposing some changes to our Revenue and Financing and Rates Remission policies - do you have any comments?

We're also proposing some changes to rates as part of separate consultations:

- Wheelie bin kerbside collection area changes and 'opt out' arrangements
- A new general rate differential for vacant central city land
- A new Policy on Remission and Postponement of Rates on Māori Freehold Land

You can find out more about them here: ccc.govt.nz/haveyoursay

422

Do you have any comments on our proposed changes to fees and charges?

Do you have any comments about our capital programme (for example, our roads and footpaths, our water, wastewater, surface water and waterways, our facilities and our parks)?

* Intersection of Milns Road, Sparks and Sutherland Road.
The operation of this intersection has changed with the addition of numerous subdivisions. This would now be one of the most dangerous corners in Chch. Turning right from Milns Rd into Sparks Rd, you are turning blind. There are trees blocking the line of sight and the bend in the road further up means you can't see oncoming traffic. Sutherland Rd + Milns Rd need to be aligned and consideration needs to be given to the installation of traffic lights at this corner.

Any further comments

Thank you for your submission

Please put this submission form in an envelope and send it to:

Feedback

1.5 Do you have any comments about our capital programme (for example, our roads and footpaths, our water, wastewater, surface water and waterways, our facilities and our parks)?

Hi,

Thank you for the opportunity to make a submission. I make this submission in my personal capacity as a community board member for Linwood Ward and a local Woolston resident.

I submit the following points for your consideration.

1- Please renew Cutler Park in Woolston. This has been a longstanding request from the local community and previous local MP.

2- I support the appropriate budget to relocate the organics plant from Bromley.

3- I support the investment in fixing the Bromley roads, but request that more money is provided given the scale

Created by Consult24 Online Submissions Page 1 of 2

Our Draft Annual Plan 2022/23 from Simons, Jackie
of the problem.

425

4- Please change your spending by reducing spending on central city roads that look in fantastic condition to increase spending to fix the ones that are broken and messed up in the suburbs like Woolston, Bromley, Linwood.

5- I support investment in improving water quality, increased tree protection and canopy cover, especially in the lower socio-economic areas of the city. It is great to see the Avon river get special attention, but please also consider that the Heathcote river needs equal investment in restoring it towards a healthy urban waterway with good amenity and recreation opportunities.

6- I support greater investment in better public transport, cycling and pedestrian safety and improved transport options for Aranui.

7- I support the streets of North Linwood being renewed as a package, noting that the Community Board has agreed Capital Acceleration funding towards some of them but not all.

Name: Cive Cook

Would you like to speak to the Council about your submission? Yes No

The Saga of the pool. . . a work of fiction?

Once upon a time there was a village not far from a little city; it had been carved from a swamp that was full of muddy water. The people of the village decided it would be nice to have cleaner water to swim in when it got hot in summer so the banded together and built a concrete pool full of sparkling clear water from a spring nearby.

The people loved their new pool; mothers took their young children along, got to know other mothers from the neighbourhood and chatted. Older children congregated there and learnt to swim, a valuable lesson for when they went to the beach or the river; it didn't matter if they went to different schools or churches. Generations of local people used and enjoyed their pool under the summer sun; it didn't matter that it didn't seat vast crowds to watch other people from far and wide race one another once every blue moon. It was a valuable community asset used and enjoyed by local people almost every day in season.

Then one dark day someone let too much water out of the pool; the pool acted like a boat lifting up on the rising water table. Then it cracked so badly that it couldn't be repaired the people were told; besides it was very old. A man on a big machine came and broke the concrete into little bits that were all taken away.

Some important people got together to discuss whether the pool should be rebuilt. "Too hard." they agreed. "The site has nasty chemicals in its soil; besides there is not space to park enough cars on the site."

The people were sad and set about raising funds to build a new pool but try as they might the funds seemed barely enough to cover the extra it would cost as years went by. Their memories of the pool faded with those years; a new generation of children grew up not knowing the pleasures of having a pool in their neighbourhood.

PTO

430

A big earthquake occurred; lots of people came to the site to get water from the spring and saw the sad sight of burgeoning weeds where the pool had once been and sighed. A few people planted herbs and vegetables near where the pool had sat until a flash new fence was built to keep them out.

Another pool not too far from the village was badly damaged in the earthquake; it was not rebuilt either but lots and lots of money was spent building a playground that people could drive to with their children. They parked in adjacent streets.

Lots more money was spent building a cycleway through the village; lots of parking spaces were lost on that densely populated piece of road and the street was now so narrow that buses and trucks had barely enough room to pass one another.

Lots more parking spaces were lost when another nearby road was turned into a major access road for other people from far and wide to access the city. It was so busy special traffic lights had to be put in so local children could walk to school safely.

But a glimmer of hope. . . Those important people may yet sit down to discuss if they can find enough money to build a smart new pool; what an asset that will be for a local community! Or will it all be just more talk. . . Watch this space!

Christchurch City Council

G'Day Kia ora,

It's good to know that our CCC are wishing / going to improve our City.

I liked doing your survey in February.

But thought afterwards that I had missed out on some 'important' improvements that we think need to be done.

There are ...

Speed Limit Signs. Or lack of ...

A few years ago we had a standard uniform" speed limit of 50 Km/h Or in higher speed areas 80 & 100 Km/h speed signs displayed. But recently & today we have many different speed limits, ranging from 30 + 40 + 50 + 60 + 70 + 80 & 100 Km/h.

Could we please have you, our CCC, place more speed limit signs being displayed. Especially where it is a lower speed limit area.

I travel to work, 4.1 Km, along

Greens Rd 50 Km/h, Peer St 50, Curletts Rd 50 + 60 + 70, Parkhouse Rd 50,

Lodestar Ave 40, & Skyhawk Rd 40 into The Runway 30 then Corsair Dr 40 Km/h

& find a place a park near the Wigram Park supermarkets car park.

Last Tuesday travelling at approx. 8.35 am along Parkhouse Rd, at 50 Km then after the passing thru the roundabout (at Hayton Rd) into Lodestar Ave

which is now 40 Km/h. I had a dark coloured car tail-gating me, & the young -ish looking male driver using his horn loudly to get me to brake the speed limit & go faster. as I turned left at the roundabout into Skyhawk Rd, & as he passed me going straight ahead still in to Lodestar Ave. I heard him yell " why the f... didn't you go at 50 or 60 ? "

I did not answer because by then we were going in different directions.

Along the Wigram Park roading area. We should see **not** just 2 or 3 of the 40 Km speed limit signs. but many more to 'remind' the drivers of what the legal speed limit is.

We should see speed limit signs & many more to 'remind' the drivers of what the legal speed limit is on that part of the road they are driving / riding on.

As I mentioned earlier today we have many different speed limits, ranging from 30 + 40 + 50 + 60 + 70 + 80 & 100 Km/h.

So unless we all are reminded of what the legal speed limit by speed limit signs. How sure are we, & how sure are all the other drivers, of what speed to travel at ?

Plus could we have these different speed limit signs. Placed say 200 or 300 m from the corner of the intersections. Because in some places we drivers do not see the different speed limit sign as we are more concerned about ' driving thru that "busy" intersection.

Could we have your ideas & comments please about having more "speed limit signs" placed along the roads.

So that local drivers & especially visiting drivers, not from the CCC area or NZ know what the legal speed limit is.

Many thanks

P. Fergusson DBS BMTD

443

Submission to the CCC Annual Plan 2022/23

Name: Brian Gardner

Would you like to speak to the Council about your submission? No

I/we support the Council contributing \$3m to Edgeware Pool Group to rebuild the Edgeware

Pool, because:-

In 1930 it was reported that the then Christchurch City Mayor and Councillors had given the section of land to the community for the purpose of building a public swimming pool. Led by the St.Albans Swimming Club, fund raising events were held and with lots of pro bono work by members and the local community the whole complex was built. A few years later with more fund raising, filtration and heating were installed. For around seventy years the St Albans Swim Club followed by a management committee looked after the running of the pool, employing daytime staff, paying rate, insurance and general upkeep. Swimming Club members provided voluntary lifeguard and kiosk duties for evening and weekend sessions and also taking care of the grounds and repainting of pool and buildings each year.

The main point I wish to make is regarding common law. Common law states that there doesn't necessarily have to be a written contract, but a shake of hands or agreement and the historical outcome of that is in fact a contract. The historical evidence is that the land was given and the pool complex was built by the community for the community and therefore was not the property of the Christchurch City Council to demolish. Therefore, a sum of \$3 million is little recompense for the demolition of our beloved pool for our community and for the St.Albans Swimming Club that put in all those years of hard work helping build and manage the pool, teach, coach swimming and lifesaving and then losing our own home pool and since having to raise tens of thousands of dollars just to get consent to rebuild.

Having addressed the historical facts, I recognise that it was not the fault of the current Council Members, and I would like to commend them for proposing the additional funding to help our community rebuild our much-loved outdoor pool.

With the incredible amount of subdividing and building of new homes and apartments in the area it seems to me to be a no brainer that the Christchurch City Council Support the minimum of \$3 Million for the rebuild of the pool.

Signed 

President

St.Albans Swimming Club

Name: Robyn Drummond on behalf of St Albans Tennis Club

Address: 

Phone nu 

Email: info@stalbanstennis.co.nz

Would you like to speak to the Council about your submission? No

I/we support the Council contributing \$3m to Edgeware Pool Group to rebuild the Edgeware Pool, because:-

St Albans Tennis Club supports the council contributing \$3m to the Edgeware Pool Group to rebuild the pool. The pool was a previous great facility well utilised by families of the St Albans community. Currently the area is experiencing a rapid growth with the build of social housing (Coles Place) and private housing/townhouses. Families have moved to the area and would greatly appreciate the return of the pool in the community again. Several of these families are of lower socio-economic means and with a limited income would accept having a local pool with a reasonable entrance fee less of a strain on resources. The club can attest to increased families of fixed income moved to the area as we offer free coaching to the local schools and this is very well utilised.

I/we support the Council contributing \$3m to Edgeware Pool Group to rebuild the Edgeware Pool, because:-

*It will ^{reinstat} replace a much loved pool.
A wonderful outdoor community space
in the heart of Edgeware.
A pool that has been enjoyed by
many families over many decades.*

Submission to the CCC Annual Plan 2022/23

Name: Pamola Pruden

Would you like to speak to the Council about your submission? Yes No

~~I/we~~ support the Council contributing \$3m to Edgware Pool Group to rebuild the Edgware Pool, because:-

This will be an asset to the St Albans
Community. In this age of pandemics
Open Air Pools will be very beneficial
to the health & well-being to this community.

Submission to the CCC Annual Plan 2022/23

Name: Jonathan Redd,ford

Would you like to speak to the Council about your submission? Yes No

I/we support the Council contributing \$3m to Edgware Pool Group to rebuild the Edgware Pool, because:-

The pool is important as a community hub. In this area which has the 3rd highest building permits of any suburb in the city, it is important to have somewhere for the suburb to teach their children to swim and their residents to relax

I/we support the Council contributing \$3m to Edgware Pool Group to rebuild the Edgware Pool, because:-

Community pools strengthen peoples sense of belonging to their communities. It is very important for people to identify with a community and have fun + exercise + connect.

Submission to the CCC Annual Plan 2022/23

Name: Andrew Drayton

Would you like to speak to the Council about your submission? Yes No

I/we support the Council contributing \$3m to Edgware Pool Group to rebuild the Edgware Pool, because:-

It is so very important for every New Zealander
to learn to swim from a young age.
We are an Island nation surrounded by
water and our drowning statistics are
a disgrace. Learning to swim from a
young age is a Kiwi right of passage.

Submission to the CCC Annual Plan 2022/23

Name: Sarah O'Keefe

Would you like to speak to the Council about your submission? Yes No

I/we support the Council contributing \$3m to Edgware Pool Group to rebuild the Edgware Pool, because:-

The health benefits of an outside pool is much more appealing than an inside pool. Fresh air, sun and less chance of getting sick if Covid is still lingering. Also because trying to get our daughter swimming lessons at a CCC pool is very difficult. Brings communities together, a safe place for families and kids to use

Submission to the CCC Annual Plan 2022/23

Name: Sarah Ferguson

Would you like to speak to the Council about your submission? Yes No

We support the Council contributing \$3m to Edgware Pool Group to rebuild the Edgware Pool, because:-

A community pool is needed to make learning to swim (especially for our migrant residents!) accessible to all and would be an asset to our growing population. Outdoor pool environment appeals during pandemic times. — I have spoken to residents who have come from land-locked countries and cannot swim, but as adults are too embarrassed to attend big pools. They cannot afford lessons either.

457

Draft Annual Plan 2022/2023 Edgware Pool Submission

Submitter: Bishopdale Centre Assoc

Comments: It will be a community place to gather and make friends while enjoying the exercise. Swimming has no "age, ability or gender" and can be enjoyed by all, the health benefits are fantastic.

A community swimming pool also supports new residents to join in and get to know people in their new community.

It is a win, win project, it is all positive and I really cannot find one negative about having a pool in the community.

e
HUA

to
the Edgeware Pool Committee and their plans for a facility that we see as mutually beneficial between the marae whānau and wider community.

The benefits to our tamariki in accessing a safe environment to learn how to swim in their local community will be future reaching for the lifesaving skills needed as active participants in water activities and recreation of the Nation.

Our kaumatua are aware of the need to keep active, and your facility will provide an easily accessible option for them going forward to maintain their health and wellbeing.

As avid advocates of community and whanau relationships, we see this facility as providing clear opportunities for our wider whanau. From becoming active in their local community by volunteering, seeking job opportunities, or residing in a neighbourhood where whanau can thrive in a healthy and supportive environment.

Our unique and flourishing neighbourhood requires accessible, recreational, and learning environments to ensure our future generations foster strong local ties and acknowledge the value that this facility will provide.

Ngā mihi,
