Subject: Addendum - Transport Assessment
Attachments: RE: RMA/2021/589 - 33 & 69 School Road - Request for further information

Hi Rachel,

I had a read through attached and I missed below:

It is not clear from the application plans how heavy machinery travels between the proposed buildings and the training/demo field. Concerned that heavy machinery may use School Rd for access and track debris down the road. Effects of Heavy traffic on school road noted in Transport Assessment.

Two existing vehicle crossings are located on School Rd frontage of proposed Training and Demo field, these crossings need to be removed and reinstated with berm. Other conditions to mitigate effects of Heavy farm Machinery tracking up and down school road is requirement to regularly sweep debris from the road.

I have read all submissions and no further transport comments to add.

Regards
John
