Te Matakī Toi Ora | The Arts Centre is the envy of art centres in Aotearoa. There is no other place I know where a project is so easily incubated: workshop, rehearsal space, performance venue, accommodation, restaurant, cinema, staff, community, vitality – Christchurch has it all in one place at the heart of the city. Our recent PORTALS project was developed for Off Centre and Auckland Arts Festival over a week at The Arts Centre. For a Tāmaki-based practitioner, discovering The Arts Centre was a revelation. The integration of the facility and support of the staff set an environment for us to create and produce without complication. I had the best experience of coordinating a project bringing international and local artists together with the help of Chris Archer and his team. When it comes to developing the next project, The Arts Centre is my first choice.

6738 - Lucy Smith

I think this is a valuable space for the community, providing great events and spaces to be used. Creating a creative hub in gorgeous heritage buildings and home to some of the best retail shops celebrating NZ crafts and NZ made a unique shopping experience for visitors to Chch.

6739 - Ezra Sharp

The Arts Centre forms part of our connection to the past, my grandfather worked as a chemist there while it was a University, and I have visited and taken classes attended concerts there, beyond my original connections it is an important piece of architecture and an integral part of the city's tourism

and cultural scene, dropping it's funding would be deeply shortsighted and a hard also in the face to all who have worked so hard to provide and enjoy it. Please keep the funding, we need the arts, we need the arts Centre, and we need to retain our history.

6740 - Shirley Holt

Because it is an iconic building. Once gone that's it

6741 - Emma Williamson

The Arts Centre is a huge part of our city. There have been so many wonderful experiences and opportunities for community to connect through initiatives run by the Arts Centre. It's a place where everyone is truly welcome and all cultures and identities are celebrated. It's the backbone of diversity in our city and something we clearly still need work on.

6742 - Neal Borrie

The Arts Centre is part of Christchurch's heritage and it makes the City unique. It is being redeveloped as a functional space and it is important that it can continue as such. The Art Centre is a Christchurch Taonga, a tourist attraction, a cultural centre and community facility. For the above reasons I ask that the Christchurch City Council to include funding for the Arts Centre in The Long Term Plan.

6743 - Christian Fisher-Starzynski

It seems ludicrous that this should even be a question, because the Arts Centre is one of Christchurch's (and NZ's) premier cultural venues and should be given sufficient funding to continue its work inspiring current and future generations of locals and tourists alike

6744 - Liv Morgan

The Arts Centre is an icon of Christchurch, not only for locals but for tourists. It should remain funded as such a big part of our City and a way to bring continuity from pre-Earthquake Chch to post-Earthquake Chch. To defund the Arts Centre would be a great loss.

6745 - Tasmin Barnett

the art centre has been integral to my university experience, and has a lot of important history which makes me proud to be a cantabrian. We must protect that.

6746 - Steven Meikle

We loved our visit to the Arts Centre, it is a must see in Christchurch. It must remain funded for future generations to enjoy.

6747 - Mark Paget

What is Christchurch without its Art Centre? It's the heart of the city and a key destination for locals and tourists alike. Save the Arts Centre!

6748 - Gabriela Lacayo

saving the art centre is important

6749 - Marc Ferreiroa

That's amazing, the only good think

6750 - Dan Checketts

The city should do anything possible to hold its finger nail grip on cultural relevance. It seems a short sighted misalignment of priorities when budget can be spent so freely in other areas of recreation. A quake memorial, a stadium and an airport to fly somewhere else. Christchurch deserves better.

6751 - Carolyn Savage

The Arts Centre is unique to Aotearoa New Zealand, the thought it could have been lost after the earthquakes was devastating. The foresight of the former CEO prior to the EQs to ensure the insurance had been reviewed and increased provided a critical contribution to the large historic restoration that has been undertaken so far. This is an important cornerstone to the history of Christchurch, from the architecture to the various facilities that are available for locals and tourists alike. The Arts Centre is diverse, educational and creates opportunities for local artists to show their work in easy interactive environments. Therefore this is one place that should continue to receive funding going forward in the District Plan, it is part of Christchurch's significant history and is an important part of our city's future.

6752 - Sorcha O'Malley

It is a gem in our city.

6753 - Eva Thornley

It's the heart of the city and needs to remain how it is through funding.

6754 - Louise Shannahan

The Art Centre has long been an intrinsic part of life in Christchurch. Scores of people from all walks of life, countries and cities have loved their experiences there. It is unthinkable that this icon of our city could disappear because of a failure to include it in the CCC long term plan. What is the reasoning behind this and how can it be justified. Lets get this sorted in a rational and philanthropic manner.

6755 - Chloe Peters

The art center is an important part of the Christchurch community and culture.

6756 - Leanne Smart

The arts centre is an amazing iconic Christchurch treasure which should continue to be funded.

6757 - Hannah Higgins

Please fund the arts, it brings joy and happiness to us all

6758 - Paul Williams

The Arts Centre precinct and its historical buildings represent the fabric and heritage at the centre of Christchurch and it is available to a broad spectrum of the community as a 'living' reflection of the dreams and aspirations of our city forefathers . The whole community can support its maintenance , heritage restoration and longevity by ensuring that it is adequately supported financially by the ratepayers of Christchurch and the Canterbury region . Nga mihi

6759 - Iñaki Belton

The Arts Centre is one of the most unique parts of Christchurch and has the best buildings in the city. Its funding keeps the arts alive.

6760 - Maree Cherry

It serve everyone in the community bringing enjoyment and knowledge.

6761 - Mitch Lee

My kids and I loved the arts centre and will definitely be back again

6762 - Naroa Munduate

It's the most special thing of christchurch

6763 - Abby Popham

It's such a wonderful place to visit as a local or tourist. One of the few spectacular historical sights to visit in Christchurch!

6764 - Toni Lee

Great place for our future generations to learn about history and the arts 🇳🇵

6765 - Scarlett Grieve

The arts centre is a very special place in my heart. From pre earth quake markets every weekend to now having friends own business and work all through out the arts centre. I spend at 3 days a week at the art centre, weather it's at Frances nation (cafe & store) lumiere, cellar door or absolution it's become a huge part of my life again & it's so so beyond lovely to see it thrive again. It needs funding, the arts need funding. We don't want to loose our city to new builds and cookie cutter spots when we have beautiful historic buildings filled with arts & beautiful business ventures we can enjoy.

6766 - Alex O'Hagan

I think Christchurch's art scene is really unique and the art centre definitely showcases it! It would be a real shame if future generations don't have museums and art centres and a real loss for Christchurch as we try to gain some momentum after the quakes.

6767 - Vanessa Sollik

It's an amazing and inspiring place. I love it here.

6768 - Stephen Johnston

The Arts Centre is integral to past and current Christchurch citizens enjoyment of the city.

6769 - Nadja Grabner-Thornley

The Art Centre was so much of my childhood. I grew up there, got my first job there working at Annie's Wine Bar, and it was also where my parents lived for over 30 years, also at times running their businesses there. It has always been a space for people to gather - from the weekend markets, to the many many festivals, and so so much more. But this decision isn't most about nostalgia. The Art Centre post earthquake has only blossomed even more - creating more spaces for the community to come together and running more arts programmes for all to enjoy. In times like these, spaces like this are only even more important. In a city that lost so much through the earthquakes, don't let us lose this place - don't let us loose the largest collection of historic buildings in this country as a public space, don't allow another space where people have such connections to to be lost, and don't rob future generations from having such an important space that allows communities to gather and that fosters the arts. Not providing on-going funding for the Arts Centre is only going to cost this city and the Council a lot more in the long run and I urge you to re-consider this decision.

6770 - Malene Laugesen

The Art Centre is an essential part of Christchurch city. It provides a vibrant social hub for both locals and visitors. Its absence was deeply felt during the years after the earthquake, when it was closed to the public. The councils proposal to jeopardize its ability to continue to function so soon after its reopening, severely undermines the post quake efforts to reestablish the social functions of the city centre while protecting the historical heritage of Christchurch

6771 - Anna Macindoe

As a visitor to chch recently, we spent a lot of time in and around the art centre. To think this could all go and not be available is heartbreaking. The history.....the beautiful buildings, the sense of community- all of these are essential for Christchurch. Please fund the chch Art Centre

6772 - Margaret Harris

This is such a valuable public resource, integral to the heart and soul of our city Otautahi Christchurch. It is also a critical face for our tourism industry and provides overseas visitors with an experience of our roots and our character. This resource requires a committed funding from our local Council, so we don't lose our heritage.

6773 - Emily Underwood

It would be such a shame for it to lose the funding. So many of the creative and independent projects wouldn't have the means to keep going without it. The culture, community and creativity, which so many benefit from and love the Arts Centre and Christchurch for will waste away without the hub.

6774 - Dominick Strain

The Arts Centre is such a treasure to the people of Christchurch and we want to see it cared for and continue to be funded by the CCC so that our children and our childrens' children can continue to enjoy it. Without the Arts Centre Christchurch would be bereft, it is a real asset and drawcard to the city.

6775 - Bree Renwick

Arts are vital to the wellbeing of people and therefore the city. Cultivates creativity

6776 - Alison Erskine

I feel the city council should continue funding the Arts Centre if at all possible as it belongs to the city and provides educational opportunities for the public and schoolchildren throughout the school holidays. It also is a tourist attraction with great historical significance. Thank you. Alison.

6777 - Richard Bain

It's the beating heart of our city

6778 - Matt Naylor

The tourism value of the art center for the city must outweigh the cost to the council. If you need the cash, sell the stadium.

6779 - Roisin Scott-Towers

The arts centre is a beautiful part of Christchurch's history, arts should be funded by the council. Please don't take this away from the city

6780 - Diana Scott

This is such an iconic part of Christchurch

6781 - Louise Benton

This place means sooo much to me. I first came to Nz in 2003. I felt so at home here and the only place I ever wanted to work at because of this. Don't take my home and memories from me.

6782 - Freddie Chin

It's a beautiful heritage of New Zealand for tourists like me. With more modern buildings built, such buildings belonging to the earlier generations are rare and precious to keep.

6783 - Jody Bank

Art and culture is the heart and soul of a vibrant community, and essential to building a healthy and inspiring city. Galleries are a draw card for national and international visitors alike, who then add to a city's economy. Art is inspiration, exploration and learning and encourages different points of view to be explored. A city without the arts centre would be dull indeed. When I visit new cities I always out the art galleries first.

6784 - Marta Steeman

As a ratepayer I support the continued funding of the Arts Centre by the Christchurch City Council. These beautifully restored heritage buildings are a great asset to the city. They are not only a centre for development of the arts and culture in the city but also a visitor drawcard which benefits many people and businesses here. I believe they are as important for the city in what they offer residents and visitors as the mega stadium development by the city council of Te Kaha costing hundreds of millions of dollars. It would be incredibly sad to see this collection of historic buildings go unsupported and uncared for. I urge the council to play its part with continued funding support.

6785 - Patricia Manning

I think it is MORE important to fund this iconic Christchurch centre with its appeal across generations and ethnicities for locals and visitors. Everyone benefits from the Arts Centre unlike the Cathedral which while iconic has limited appeal to the general public.

6786 - Martin Hadlee

Since inception of the formation of the Arts Centre in about 1974, it has been unrealistic for the owner (now the Trust) of the 2.5 hectare central city property comprising a very important historical, cultural and heritage block of buildings to expect tenants to completely pay for the costs of operating this

precinct, which is available for the enjoyment and use by local, regional and national visitors. The cost of insurance premiums and rates (now over \$1.2m a year) on the property in recent years have blown out to such an extent, they cannot be expected to be recoverable from overall tenancy operations. It is unacceptable for insurance firms to increase premiums when the last 10 years earthquake strengthening work has been devoted to reduce the future risk of damage and make the buildings safer and rates based on a decade of expenditure to improve the site has increased valuations for rating purposes. Increasing excesses and/or having in fill insurance policies appear to not reduce the premiums that much although grouping the buildings collectively with other like minded organisations within the city may be of some assistance in reducing premiums. Forty years ago the possibility of the site owner having its own rating base methodology similar to that of The Canterbury Museum should have been pursued to ensure future financial sustainability of the property and its management and should be re-examined as the same rationale can be applied. In effect CCC would be the collector of the clearly defined rate, and I assume, if there is a large groundswell of support for the Centre, then there is support for a clearly defined Rate for its continued existence and purpose, funding and activities provided to the public. The internal tenancy rental methodology should follow that of The Rocks precinct in Sydney which has the philosophy of the commercial activities cross subsidising the less well off artistic enterprises and activities. Another suggestion is that a designated annual Cultural and Heritage grant be provided to contribute to the major buildings and fund a combined directorate in the area, such as The Canterbury Museum, the Arts Centre and Art Gallery to assist and encourage economies of scale. In order to provide time for consideration of these ideas and many other, I suggest the current grant to the Arts Centre remain at the last years level and reduce 10% pa for the next 5 years to enable the Board and Management time to explore Legislative and Statutory options for future sustainable funding. Martin Hadlee, (former ACTB Treasurer and Secretary for 41 years and Board Member during 6 of those years).

6787 - Nancy Borrie

The Arts Centre is a tourist & visitor attraction & adds a heritage as well as a quirky & interesting commercial dynamic and social destination to Christchurch. It also is a counter point to the very new & modern commercial centre of central Christchurch Visitors look for the different & unique so I take international & NZ visitors there to shop & explore in this part of the city. The Arts Centre is part of a unique corridor of iconic Christchurch buildings - the Cathedral, former Civic Offices & Avon River, Art Gallery, Arts Centre, historic houses, Canterbury Museum, Botanic Gardens with the Curators House, Punts on the Avon, Christ's College, and the Tramway. Visitors love walking around this area as a contrast to the Riverside precinct. Apart from the Arts Centre- Museum & Riverside Precincts there's not much else of interest to draw visitors & locals into the Central City in the day time. For the Arts Centre to become defunct would leave a gap - one of the front teeth would be missing from the face of Christchurch. So please make every effort to ensure the Arts Centre can continue to operate as an iconic visitor destination.

6788 - Michael Primrose

There has been horrifying news out of the UK of major city councils eg Birmingham being forced to defund their flagship cultural institutions because of a lack of local government funding. The cultural history of those cities is being sacrificed to an accounting spreadsheet . One had believed that Christchurch was so much better than that, and that we could maintain a vibrant cultural

infrastructure in this city, That we could lose the Art Centre and all its myriad of enthralling features and spaces defies belief, especially for what, in the greater scheme of things, seems but a pittance.. We all worked so hard to support the Art Centre and to save it from demolition post earthquake. What justification can there possibly be for forcing the Art Centre to close now, by removing its funding, just as we finally have it restored to its former glory? As a city, we lose a part of our soul, if the Art Centre closes, and there must be a way to avoid that.

6789 - Reuben Bouman

It is an vital part of the essence and character of the city

6790 - Irvine Savage

Continue funding of the Arts Centre, it's an integral part of the City's economy, every visitor/tourist and user contributes to that

6791 - Martin Howells

"Art is the stored honey of the human soul". Don't deprive this community of its hive.

6792 - Rosa Hill

It's such iconic part of inner chch, a real asset to our community and visitors

6793 - Amy Prangell

Covid should be a great reminder of why we need art. Everyone deserves a space to celebrate others creative successes. It's a space of rest and leisure - all important for a well rounded society

6794 - Keila Hoffman

It is cultural place and brings many tourists

6795 - Craig Blanchfield

This is an iconic landmark of Christchurch which attracts locals as well as so many people from afar, so it must be funded so it can continue. This city is investing millions into the Cathedral, & this complex is just as iconic & important. This is genuinely unique to Christchurch.

6796 - Richard Moreham

The Arts Centre is a key cultural and heritage resource for the city. It's a fundamental part of the fabric of the city.

6797 - Murray Cullen

You were able to fund the Stadium with my rates, so now it's time to support the Arts by funding the Arts Centre.

6798 - Glenis Giles

You can't destroy hundreds of years of contribution to Christchurch city by artists across mediums and buildings of such historic significance! Get on with supporting your wonderful city full of creative thinkers and their works. They need a current home much more than a cathedral!

6799 - Lynette Thomson

Balance sport with culture - fund the Arts Centre.

6800 - Claire Johnson

The art centre is important as a welcoming and educational place for the public and tourists alike. With the cathedral being unable to access these buildings are a great way to view Christchurch historical architecture and learn about its histories. As the museum is closed also, and Christ College is private property and the public can't experience the architecture

6801 - Anna Koch

I just got to know The Arts Centre recently, when I was invited there to perform and premiere pieces by New Zealand composers as part of my world tour. My experience there was amazing. I premiered a piece by taonga puoro practitioner Ariana Tikao together with her, as well as pieces by Reuben Jelleyman and Dylan Lardelli. This collaboration was so successful that we already made plans to perform the pieces in Europe as well in September. Without The Arts Centre we would not have been able to do that and present New Zealand art around the world.

6802 - Louise Landess

The Arts Centre plays such a significant part in the well being of our city's citizens, I find it incomprehensible that Council would even remotely entertain the idea of pulling the funding out from underneath it. Since the quakes I have watched the restoration of the buildings with awe and pride. The work has been world class and now that it's back in action, it's a lively place filled with locals and tourists congregating and enjoying themselves in a communal space. There are so few places where this happens (I can't actually think of any other. Tūranga is a great gathering place, but it's a different experience to The Arts Centre). The Council spends hundreds of thousands of dollars on community engagement and development, trying to activate events throughout the year and build a better sense of community. Why on earth would you kill something dead that's just coming back to life in a big way? I am frequently passing in and out of the local shops, occasionally enjoy a (reasonably priced) show, love taking part in/watching events there and building connections with other locals who do the same. Without this gathering place I would not have this opportunity. Similarly I watch the ever increasing number of tourists hopping on and off the tram, and thoroughly enjoying the rich history of this place. Of course, they also spend money and boost our economy while they're there. It's an equally welcoming place for those without money to spend and I think it's a cruel move to deny those

citizens the opportunity to enjoy the arts freely in our city. Surely this has to be driven by ideology rather than common sense? But whatever is behind your thinking, I ask that you reconsider your decision and fund our Arts Centre. If not, it will be city soul destroying.

6803 - Laura Marshall

This is an amazing place of history and arts. I have visited it often for cinema, shows, shops, exhibitions. It is the cultural heart of the city and as such should be maintained.

6804 - Justin Busbridge

The Arts Centre is a fabulous community space in the heart of this city. It is alive, vibrant and full of energy and creativity. Around its edges are small businesses selling coffees, drinks, food, books, arts, crafts, tourist souvenirs. It is a space for festivals. These are all valuable to the economy and wellbeing of the community.

6805 - Alison Armstrong

Chch has an arts center to be proud of and we should continue to keep it operating for the benefit of every citizen

6806 - Penny Penwell

It offers more value to me and my community (queer, art, music) than a sports stadium...

6807 - Fleur Dewar

Beautiful historic spot

6808 - Zoe Odering

I support funding for the art centre. It is a Christchurch institution. Plus it makes financial sense. No brainer.

6809 - Mark Whyte

Dear CCC , the Arts Center has been an incubator for ideas and arts related business and an integral block of buildings in Christchurch. I think its very important it remains open to the public as an example of willpower and strength having been restored after the earthquakes. I think its also important to send the message that not all public spaces need to make money. How long will it take for the new sports arena to pay for itself?

6810 - Michelle Domett

We need the arts as a reflection of the best society can be - a great world without the arts

6811 - Denis Drysdall

Please ensure adequate funding for the Arts Centre.

6812 - Denis Jelitte

To me, the Arts Centre and surrounding area feels like the soul of Christchurch. There is not a lot of historical places and buildings in Christchurch compared to other places so it is worth the money to keep the area attractive. The ensemble with Hagley Park just feels right and is a nice place to spend time. It raises Christchurch's attractiveness as a place to live and to visit.

6813 - Jennine Thomson

The CHCH Arts Ctr is an integral part of our city and what it provides in the way of community events for all ages and collaboration with a variety of different organizations. It is, as their mission says.. a central hub for celebrating diverse communities. We do not have another organization that provides the diversity that the Arts Center does. A lack of funding from CCC will significantly impact their ability to continue and this would be a huge loss for the city.

6814 - Amanda Crosby

It is our family's favourite place in the city centre and it would be a big loss if it couldn't operate the way it currently is. We enjoy the events held there and the opportunities for cultural and social events in beautiful architectural surroundings.

6815 - Georgina Young

The Arts Centre is the hub and centre of Ōtautahi its always vibrant and humming with all walks of life when I visit. Save it!!

6816 - Leigh LYC

This is history! We should save it!

6817 - Millie Jeon

Art related gatherings and centre must be protected for people in Christchurch

6818 - Andrew Cotter

Save it. Better than cycle ways

6819 - Nico Morrison West

The Arts Centre contains some of the few remaining historic buildings that managed to survive the earthquakes and were saved and rebuilt. It is also arguably one of the only places that still retains the soul of pre quake Christchurch. I personally find it disgusting that the local council would even consider cutting funding for this historic landmark, especially after all the years of blatant disregard they have shown for this city's historic architecture post quakes. So much more of Christchurch's historic buildings could and should have been saved yet in their place sit the soulless facades of post modern design at its worst. I believe Christchurch City Council have a responsibility to preserve and care for the precious few historic buildings & landmarks that still remain within this city today, including that of our cherished Arts Centre.

6820 - Therese Matheson

Invest in the arts, culture and heritage, a vital part of our city. The Arts Centre needs funding too.

6821 - Emma McClintock

It's such an integral part of the city that deserves funding over a private religious building like the cathedral

6822 - Rachel Fuller

The Arts Centre is one of the greatest assets of Christchurch. It's full value can't be measured in dollars and revenue returns. It is far, far greater and more important than that. It would be short-sighted, foolish and simply ridiculous for this extraordinary and unique creative hub to be lost to its community. Please save the arts centre!

6823 - Chris Ny

Save the arts centre , what little heritage we have left must be saved

6824 - Ben MacDonald

The Arts Centre is a unique, historical, and vital part of Christchurch. It is a feature of the city that many people (both locals and tourists) enjoy, and would be a mistake for it not to be properly funded/supported by the CCC.

6825 - Mckayla Woodroffe

I have lived in Christchurch and currently live in Wellington. Wellington is losing its creative crowd as they are priced out and continue to loose community creative spaces. Christchurch post quakes has does amazing work to use creatives to brighten the city, if it continues to support its creatives it has the potential to become a new creative capital. Places like the art centre are part of what makes Christchurch what it is.

6826 - Isla Jewitt- Deidda

Because it's a very special place. It's beautiful. I love watching movies at Lumières Cinema. My mum takes me to concerts, she also works at Cellar Door when she isn't teaching. I love playing on the piano and joining the children's activities. I took my first ballet lessons at the Canterbury Academy of Dance. I've recently discovered Altiora where I fell in love with the art of circus.

6827 - Sam Cartwright

This is a Centre that is an integral part of Christchurch Central City. It is an historically significant tourist destination to be proud of, and an accessible facility for the local community. The worst thing that could happen is the Arts Centre is run as a business where making a profit is the driving force. To deny funding would be a reflection on the counsellors of today, and we will all have to live with this poor decision in the future. I hope those that vote against further funding are named personally.

6828 - Rowena Martin

I have enjoyed so many things at the arts centre during my life - the markets, food trucks, classes, concerts and so much more. It is such a beautiful part of our city and has such heritage you just need to keep funding it to keep it going 

6829 - Jules Baird

The Arts Centre holds significant value for our city. It is a destination for people visiting our city to visit, enjoy and support local artists within. It is a place of significance for local people to use, work, visit, study, gain inspiration, perform, socialise, engage with priceless antiques, dine, hire and more. The Arts Centre holds a significance that engages one of our most important anthropological traits; our search of and conversations around our human purpose. Let's not only save the Arts Centre, let's celebrate it!

6830 - Kathryn De la Mare

The Arts centre is a gorgeous place to spend time. They have many amazing things happening that my kids always love. It would be a real loss to our community

6831 - Tom de la Mare

It would be good to keep a permanent place that encourages the various arts programs.

6832 - Helen Hastie

This city won't be the same without funding provided to the arts center and having the arts center being the place it currently is

6833 - Jocelyn Drysdall

It's a treasure , and more important than the stadium !

6834 - Dave Pearson

The first section of what is now the Arts Centre was constructed in the 19th century as Canterbury College before eventually becoming Canterbury University. It became the Arts Centre after the university vacated the site. The complex was substantially damaged in the Canterbury earthquakes. Most of the buildings have since been structurally upgraded and restored. I had the privilege of acting as the heritage architect over a period of 10 years and it was incredible to see the buildings being restored and now to see them once again in use. The complex is a Highly Significant item in the Christchurch District Plan and is rated Category 1 by Heritage New Zealand. Today, it remains as the most intact group of Gothic Revival buildings in New Zealand. Although much has been done on the site, more is required to complete the overall restoration. The buildings also require continual maintenance which is also expensive. It would be a tragedy if the buildings were to be neglected after all the work that has gone into preserving them for the benefit of future generations and I urge the Council to continue its support, without which I understand the Arts Centre would not be able to continue.

6835 - Christina Cane

So people can still enjoy it

6836 - Elise Schroeder

The Arts Centre is one of very few historic gems left in Christchurch. It would be absolutely heartbreaking if we lost such a special place after all the loss Christchurch has endured over the years,

6837 - Anna Hargreaves

It's a sense of calm in the city along with the history and beautiful buildings. Please find this special place.

6838 - Joost Schouten

Loosing this wonderful institution to Christchurch would be a tremendous loss. Not only is it crucial for a thriving and engaging community, it is a big draw card for tourists too. Without it Christchurch will loose an icon. Culture is the backbone of society and measuring its impact in just financial terms would be too limited a perspective. I hope we can keep it funded. Thank you.

6839 - Sarah McCarthy

It's a beautiful part of Christchurch with so much history. A lovely place for tourist and locals. Needs the funding!!

6840 - Sean Hughes

The Arts Centre is one of the iconic sights and most memorable visitor experiences in Christchurch. As someone based in another country, The Arts Centre is consistently rated by international tourists as a “must do” experience for first time and returning international guests. It positions Christchurch uniquely in New Zealand with its architecture, commitment to arts, culture and performance and its centrality.

6841 - Patricia Small

The Art Centre is the hub of activity in our city; It would not survive without the funds needed to show the following! Cinema; which is educational and enjoyed by young and old, Concerts; particularly Monday ones, the Craft Market which has been the iconic centre in Christchurch for budding artists etc to show and sell their works; A VERY IMPORTANT STOP FOR ALL TOURISTS All I can say it is the most outstanding set of buildings in Christchurch and I cant imagine Christchurch without it. I have many overseas visitors that come to visit and without a doubt they love the Art Centre!!!

6842 - Grant Thomson

What is a city, without a arts center? This is the question that the council should be thinking of. Without the appropriate funding, the Art Centre is likely to close. To many dumb decisions have cost rate payers of this city over the years, don't let this be the one that you are responsible for. The Art Centre is a icon of this city. Visit by both locals and tourists. Failure to keep this going will make one less thing attractive about this city. Regards Grant

6843 - Lisa Jayne Macfarlane

Our Arts Centre is a taonga for our community that needs to be funded to remain independent and accessible.

6844 - Wendy McArthur

It will cost way less to fund than to fight

6845 - Adrian Feier

Please keep funding the Arts Centre. We think it's great for our community.

6846 - Mike McCaleb

I consider the Arts Centre in Christchurch to be the spiritual, artistic and intellectual heart of the city, and a most important part of the city's heritage and character. A first stop for any visitor. I would rather have seen the money from the stadium spent on re-establishing the Dux de Lux.

6847 - Marissa Eggers

It doesn't make any sense to NOT fund The Arts Centre. It's finally starting to feel like this city is alive and thriving again. I work in the Digital Health Tech Hub there on Wednesdays and it's the highlight of

my week getting to see what's happening around the centre and seeing all of the locals and tourists alike exploring this beautiful piece of our heritage. Not only are the buildings gorgeous (reminder about how much work has been put into it over the last 11 years), but they hold a lot of history, mana, and livelihoods. It is the heart of creativity and expression in Ōtautahi. It is the heart of Ōtautahi... defunding this will hurt our city in more ways than you can imagine. And from what I understand, if you defund it, the likelihood that you will have to take over management of it anyway, thus costing you and in turn ratepayers more, is very high. It will cost you (and us) less in the long run and you won't make a lot of people in this beautiful upset, just keep funding it.

6848 - Maria Ryan—Young

Matatiki Toi Ora, The Arts Centre, is the most efficient delivery mechanism for creativity in Ōtautahi. With a team fueled by passion and determination, they craft programmes that transcend budgets, leaving a lasting impact on all who experience them. Since its restoration, the Centre has become a beacon of diversity, offering unparalleled events and exhibitions that resonate deeply, igniting a spark of inspiration in every visitor. It's more than just a venue; it's a sanctuary where minds are enlightened and healed, and hearts are stirred. Unlike three decades ago, the Centre now welcomes a kaleidoscope of faces, representing the rich tapestry of our city. It's not just a building; it's the beating heart of Ōtautahi, where beauty meets brilliance and transformation thrives within its walls. As has been repeatedly stated in the campaign and messaging, any alternative council-owned funding mechanism will end up costing the ratepayer more than the current model. The city needs to find a sustainable funding mechanism to support this taonga - to honour the legacy of all those who have gone before and for our future generations.

6849 - Pru South

We have lost so much of our beautiful city and the arts scene in Christchurch. We need the arts centre to make it thrive again. The beautiful buildings and the talented NZ artist deserve to be given a chance to live again!

6850 - Li Holling

The art centre is one of the only things left in Christchurch that is not just for tourists it is actually for locals, which I think is essential for us to keep because I'm a local, and I sometimes only go into town to go to the art centre and to see what's in there. Genuinely that's all I go into town for sometimes as a trip to the art centre but I can't say that for anywhere else. Like the Museum for instance or even the art gallery I prefer to go to the art centre over the them. I just think it's stupid if you guys change what it is now because what it is now is so perfect and so well done for a community and as tourist attraction that I think any funding taking away what's already there. It will just be a negative on the genuine Christchurch community.

6851 - Helen Lenihan.owens

The Arts Centre is a taonga to the City of Christchurch and its residents. As a rate payer and resident/stakeholder I want the Christchurch City Council to continue to financially support the Arts Centre and include it in the Council's Long Term Plan 2024 - 34. As a resident of an outer suburb of

Christchurch, the Arts Centre is a regular destination for the cafes, retail stores, movie theatre and massage service. Its proximity to the Art Gallery, Botanic Gardens and when fully rebuilt the Canterbury Museum. It is also the location to meet friends from Christchurch and visitors to the city. The centre has and should continue to play a crucial role in regeneration of the city following earthquakes in the cultural, heritage, creative and artistic spheres and cannot survive without support from the Christchurch City Council

6852 - SarahJane Perkin

The arts centre is a beautiful co-op of independent talented artists. It's a beautiful heritage building that should stay funded to continue supporting independent emerging artists. Losing the arts centre would be a major loss to Christchurch's character.

6853 - Belinda Cullen-Reid

The arts are a pivotal part of any healthy functioning community and should be the centre of all that is done. The historic Arts Centre should be the centre point of the arts in Christchurch. Please fund the Arts Centre and help us keep the arts alive and thriving.

6854 - Glenys Robinson

As one of the few remaining historic building sites post-quakes, The Arts Centre is both an important link to our past and a vital centre for both performing and static arts in the city. It offers both beauty and function in our redeveloping city but will struggle to survive without CCC assistance. If the Dux is also aided in resuming its wonderful role, The Arts Centre would again be a fabulous day and night venue. We lost so much, please do your utmost to support this precious taonga.

6855 - Debbie Garland

Unbelievable, after all the money spent on restoration of this amazing iconic building. It brings tourists and is a part of Christchurch. Once the Museum is back and running they go hand in hand. It could be The New Square

6856 - Liz Bolwell

Arts in Chch is the best! I go every month to sumth either on great hall or an exhibition Please keep Supporting the arts. I'm a current recipient of arts funding as an individual and it's really satisfying to see my community music group. Thriving.

6857 - Katie Hallam

Art is inspiration. Art is innovation. Art creates community. Art creates conversations. Art is a career. Art is economically valuable. Art is necessary. Fund the Arts Centre!

6858 - Nicola Macdonald

The Arts Centre is an integral part of Christchurch's culture and beauty. It plays an important role and should receive funding to continue to do so.

6859 - Pam Buesing

Hello! As a visitor to your city I am impressed by the Art Center. I attended a film there and the facility is wonderful. The amenities, the location, the choice of films are all of a standard not found in many cities and reflects well on Christchurch. Please fund the Art Center. It is a fantastic part of your city. Sincerely, Pam Buesing

6860 - Michi Flores

The Arts Centre has been an anchor for us in this city that has been healing and rebuilding itself. It is as much the heart and soul of Christchurch as the cathedral. It is a vital meeting place for our community and for visitors from all over the world. As artists and teachers it has been one of the best accessible venues. The Arts Centre restoration has been a beacon of hope during the rebuilding and healing of Christchurch. It is a very special gathering place and has provided us with spaces to teach and to gather for performances. It is crucial to the culture of this city and a gift of architecture with noble purpose, the likes of which we are so grateful to have access to with the rest of the community . It is as much the heart and soul of this city as the cathedral. Please do everything in your power to continue funding it.

6861 - Jean Oliver

The Art Center is important to Christchurch - the buildings, the history (since we lost so much after the earthquakes) , cafes , shops, markets etc. The musicians that put on concerts there are great and this needs to be continued - it's a place for all ethnicities to come together. An extremely iconic part of Christchurch which staggers me that funding could be cut. It's a hive of activity and a fantastic place to spend time at for both locals and tourists.

6862 - Lesley Curry

The Arts Centre is one of the largest collections of heritage buildings in the southern hemisphere. It's a huge draw card for people visiting Christchurch city. I personally worked on the renovation of these buildings for four years (architecture). So much hard work and dedication has gone into, not only saving these buildings but, strengthening them, making them accessible and adding modern conveniences. They're a huge community asset and it would be a travesty for the city to lose this incredible historic hub due to lack of funding. Please reconsider your stance on funding the Arts Centre

6863 - Justin Legg

We lost so much of our history to the earthquakes - we should save what's left. The art centre is a place for the people- not a temple to a god you may or may not believe in. It should be kept for the people. Auckland has a tower, Napier has Art deco, we have an amazing precinct of the Arts Centre & museum

6864 - Nathan Williams

This is a pivotal part of our city and community, it brings in visitors from out of town and out of this country. It's a part of the Chch pre quakes that is special to many that we can and should hold onto. The liveliness we see here, the community groups, the various arts, and performers that use the area, it brings people together and gives people a space to be themselves. It is an incredible building and space for all. We still don't have the chch cathedral, so we need the arts centre, it's Chch, so many people associate our beautiful city with thay beautiful space

6865 - Margo Askin

The Arts Centre is a beautiful , historically important group of buildings that is vital to locals and tourists alike. I rented a room for music lessons in the 1990s and have performed in the Great Hall several times. It is an incredibly important Centre used by local, national and international Artists ,Actors and Musicians. Appropriate funding will ensure this unique , special place will be used for future generations . It is run by an amazing ,dedicated group of people who are working with minimal pay to keep it open. As a musician and Arts lover - I know the importance of the Arts and how essential they are to the well being of people. The Arts Centre really requires funding to keep it going.

6866 - Jennifer Heuett

The Arts Centre is a crucial foundation to the city's community. It's thriving and if we keep getting rid of special places in this city for our city to grow, learn, socialise and connect, we'll be left with nothing that keeps Christchurch original and exciting. I'm extremely saddened this is even a process you're thinking about. Please reconsider your plans and keep funding one of the most important centres in Aotearoa. The Atta Centre provides Christchurch with the largest variety of events, experiences and activities, not to mention it's a fantastic tourist attraction that brings many to our city.

6867 - Oscar Kersey

The Arts Centre is a place where people go to have their spirits lifted, and in some cases have some respite from the misery they get from their professional lives. The people who perform or have performed at the Arts Centre are people who put 110% into their craft, and words cannot describe how deeply they care about providing great experiences for those who attend their performances. It would be completely unfair to stop funding it because it means it lessens the public's chances of having a good experience when they want one. Those who have lives in the world of performing arts deserve to have venues to perform at, so if they are deprived of the opportunity to do what they love doing, their careers will be rendered pointless and meaningless!

6868 - Sholto Braidwood

It's a great place to go with the family for food and shopping and it historic Christchurch!

6869 - Lorraine Logan

The Arts Centre is one of the most important architectural and historic buildings in Christchurch. So much has already been spent on restoring the buildings so why mothball it now? All that money will have been wasted. As has already been said, a building left unloved will deteriorate and will continue to incur costs for rates and insurance. I call on City Councillors to re-consider spending across all budgets as I am sure savings can be made so that these iconic buildings remain open and operating. It is not only a 'nice to have' but essential to the businesses which have invested heavily to be part of this historic set of buildings eg Lumiere, Bunsen, Cellar Door to name a few. The Great Hall has, and will continue to be, a place where musicians, budding and professional, perform for residents and visitors enriching our lives. If more money was available to the arts nationwide there would not be the need for the huge expenditure required for mental health issues. City Council - there is always a way to overcome perceived problems. It is up to you all to find that path. Look on the Arts Centre as if it were your personal property and the measures you would take to protect and retain it. We have lost so many buildings which contributed to the fabric of our city, we don't want to become a city with no heart. Please continue to support the Arts Centre as has been the case for previous years.

6870 - Catriona Tipene

The Arts Centre provides a necessary function for the arts community in Christchurch.

6871 - Tony Dale

I wish for the CCC to continue to fund the Arts Centre at the current rate.

6872 - Hannah Kidd

Why would you not support the cultural hub of Christchurch? The Arts Centre is the maker & the breaker.

6873 - Teag Mackay

Having worked in the arts for many years I have seen the positive impact it has made on my community. The camaraderie that it can generate between people who have shared the same is unmatched and to lose the arts is to lose that.

6874 - Anna Joseph

The Arts Centre is an icon and treasure of our city. It must be safeguarded for the community of today and for future generations. Since the EQs it has been so beautifully restored and exists as one of the key historic and publically accessible buildings in the city. It is a place that can truly be enjoyed by everyone. Like countless others in this city I have so many happy Arts Centre memories spanning many years. Heartbreaking to think this precious place is under threat. Please rethink your funding plan CCC.

6875 - Cushla Fitzsimmons

It's the only thing with character in the city!

6876 - Joseph McMahon

It is the soul of the city, the arts needs funding to be kept alive.

6877 - Syreeta Ferguson

A city without art is like a city without a heartbeat. Christchurch is such a beautiful place and we already lost so much with the earthquakes. Christchurch has always been a lively and artistic place and we should do all we can to keep it.

6878 - Michael Boulden

The Arts Centre is not just a cultural hub but a cornerstone of community engagement, fostering creativity, education, and tourism. By funding The Arts Centre, the Christchurch City Council invests in the city's cultural vibrancy, economic growth, and the well-being of its residents.

6879 - Rakuto Kurano

The Arts Centre is a place where many arts events are held. It is unique - different to others arts venues such as The Piano, Town Hall, etc.

6880 - Nikki No

You guys always seem to find enough dosh for a pay raise. This shouldn't be too hard eh?

6881 - Olivia Chamberlain

The Arts Centre is a unique, vibrant and valued part of Ōtautahi for both residents and visitors to the city. It is used every day of the year for a huge range of activities, work, socializing and community engagement. It is appreciated for its beautiful architecture - particularly post-quake. So many people have a connection to The Arts Centre and highly value what it offers today across art, hospitality, retail, workshops, learning...it should absolutely continue to receive funding from the Christchurch City Council so that it can continue to run for years to come.

6882 - Christopher Boulden

Christchurch has lost many culturally significant locations to destruction and corporate development. The CCC should continue to support important historical monuments especially when the humanities are increasingly pressured out of the reach of the mainstream in favour of corporate advancement.

6883 - Clemency Hay

I grew up dancing at the Arts Centre at least twice a week, in the old upstairs ballet studios. I remember ascending those stairs with awe at the history of Christchurch enriched in the place. My

grandmother had been to university there, so I had heard her stories. I still feel wonderfully nostalgic whenever I walk past, or spend time at The Arts Centre. I am sure I am not alone in my sentiments. Please ensure that Christchurch will not lose this precious hub of culture, beauty and creativity by including its funding in your long-term plan. It would be devastating if future generations could not be similarly inspired by its presence in our city.

6884 - David Martin

The decision of the City Council to discontinue funding the Arts Centre as in previous years is nothing short of preposterous. Do Councillors not realise what a waste of money it will have been if the buildings are no longer being used? You have seen what a state the Christchurch Cathedral is in because it has been left open to the elements. While most of the buildings which make up the Arts Centre have been restored to their former glory, they will soon deteriorate if left unoccupied. It will cost even more to re-open them at any time in the future. Withholding the necessary funds to allow the Arts Centre to remain open and operating is extremely short-sighted. It is the responsibility of all Councillors whether interested in the arts or not, to see the commercial sense in retaining these buildings. I am sure no Councillor would like to be remembered as being one of those voted to represent the citizens of Christchurch fell short of their duty to hear and support the request of all those residing in Christchurch and beyond. Review the budgets, make the necessary changes and take the right action for the city. PLEASE SAVE THE ARTS CENTRE!

6885 - Austin Joseph

The Arts Centre is an historical icon of Christchurch that has been enjoyed by many generations of Christchurch people for a wide range of pursuits. It would be a shame to risk losing it for future generations.

6886 - Shelley Reid

It is imperative that Christchurch not lose the City Council funding. The Arts Centre, the buildings and precinct, and the activities provide critical creative impetus for innovation and health and well-being for people. It is an antidote to the rampant disconnection and general heightened anxiety felt by many citizens. Humanity is at critical crossroads and we need to do some deep and radical thinking and take action to counteract the gutting effects of rampant destruction of the modern industrial society. Mankind is losing its soul - Christchurch Arts Centre is an 'essential', not a 'nice to have'.

6887 - Keith Humm

The Arts Centre is a unique, irreplaceable part of Christchurch that's internationally recognised. It is vastly more important than a stadium.

6888 - Lyn Campos Navarro

Vitally important to keep art alive and visible to the public, give artist an outlet and people somewhere to go and enjoy it

6889 - Craig Ogilvie

The Arts Centre has always been a cultural hub of the city. That took quite a hit after the Christchurch earthquakes, with the loss of the Court Theatre and the Dux DeLux, two key operations which brought the crowds to the Arts Centre and further fed locals and tourists into a multitude of other arts and F&B operations there. It was always buzzing yet offered a relaxing respite from the hustle and bustle of downtown. I fondly recall many a weekend when I'd visit the arts centre market, grab a stuffed baked potato from one of the F&B outlets, a beer at the Dux, and a pumpkin and chocolate muffin from the boulevard bake house. Then back in the evening to see a Court Theatre show and a late night coffee at Le Cafe. There is no doubt that the Center has lost some of its glow, but the current team is working hard to bring people back! As the GM of an Arts organisation myself, I'm constantly impressed at the level and standard of the output of the Arts Centre on so little resources. They certainly give so much more than they receive! They are passionate about the centre and making it available to a diverse range of artists and in doing so provide an innovative and enlightening array of events for the public to experience. The Off Centre Festival is the closest thing we have to an 'arts festival' and they are to be commended for filling this gap in our cultural landscape. Over the last 10 plus years we've lost an opera company and our International Arts Festival, seen Buskers Festival be downscaled, had COCA on the brink and Court Theatre struggle. Are we to lose our Arts Centre as well?

6890 - Matt Tidball

I believe that the Art Centre should get more funding. This is such a huge draw card to many tourists and with the museum offline there isn't anywhere that is a good representation of the historical element of the city. We need the Arts centre to be finished and we need the Cathedral to be completed. It's frustrating that all 3 historic buildings are all under some construction and all facing huge budgets. Let's get these important heritage buildings completed for the benefit of the community and the many tourists that come here. They are the jewels in the crown of our fantastic city. Let's not lose them. Cheers

6891 - Cathryn Bridges

Christchurch IS the arts centre. It's the heart of the city, our culture and our dreams and our creativity and one of "our" shared positive memories. It deserves to be funded and thriving, and the next generations of Cantabrians deserve it to be the place we all have loved so dearly. Please save and fund the arts centre. It is quintessentially Christchurch.

6892 - Ben Lay

Increase funding for this iconic area of Christchurch city. We need to protect it for future generations.

6893 - John Montgomery

Because people need art work And it's a good thing to sponsor

6894 - Erin Hills

The Arts Centre Te Matatiki Toi Ora losing council funding would be a devastating cultural loss for our city. It is one of the beating hearts of Ōtautahi Christchurch, and I urge anyone who is unsure of the value it provides to the community to engage with the people there and realise just how full and generous a place it is. It is a hub of creativity, education, publicly accessible heritage, event, and community spaces, offices, local businesses, museums and theatres, markets, retail, and hospitality, and is on track to be even fuller and more impressive in coming years should regular funding continue. Not to mention it is a place of connection, and a piece of the city that belongs to all of us, which we should hold tremendous pride in cultivating. I would like to emphasise a little some of those aspects I've already mentioned. The multiple galleries, hireable community gallery and performance spaces, Teece museum, artist residencies, pop ups, and markets showcase and nurture a wide range of local creative talent and provide sorely needed opportunities for creatives. And I cannot stress enough how much learning happens there too, from the many workshops and classes hosted on site and the always busy school holidays programmes, to tours of the heritage buildings and restored observatory, the Centre's own education outreach programme in schools, Rutherford's Den museum, and of course the University of Canterbury's Arts campus. The thing about The Arts Centre is it is so much more than just The Arts Centre. It is an extremely precious community space, one where events, people, businesses, and ideas get the chance to take root and grow. Funding it is furthering a platform that springboards so many great things into the wider world. Take the Busker's Festival, Scape Public Art, and (to a large degree) The Court Theatre, to name a few examples. Like the spring from which it is named, Te Matatiki Toi Ora is a source of knowledge and nourishment within our city. The staff have fought so hard to raise this vision and thanks to them it is a safe place to just exist, a joyful place to learn, create, and remember, and a place our city has every right to enjoy for many, many years to come. Please continue to allocate funding to allow us all that.

6895 - Kathryn Ruge

The lack of funding for The Arts Centre is inconsistent with each of the four community outcomes. The Arts Centre is an integral part of our city's identity, pre- and post-quake. It's a place where residents can actively and easily participate in community and city life, have a strong sense of belonging, and feel safe. It is THE Arts Centre, unique in New Zealand, where generations of artistic and creative journeys have been started and strengthened. It contributes to a thriving prosperous city. It's bewildering that it's been completely left out of the Draft Long Term Plan. On a personal level, it's difficult to state the importance of The Arts Centre to me personally. It's been a part of every season in my life. My earliest childhood memories include coming to Saturday markets, bringing overseas visitors here (our house was always full of them as we lived overseas when I was younger), buying numerous gifts from local crafts people, and then as I got older - the movies, Le Cafe, Boulevard Bakehouse, and of course the Dux. I encourage you to listen to the people of Christchurch and creatively work with The Arts Centre Trust Board to come up with a long-term, sustainable solution.

6896 - Chantelle Ellis

It is one of the most amazing parts of Christchurch currently and the history of Christchurch. The heritage building sans nostalgia is important to keep alive - especially after the earthquakes!

6897 - Stacey Williams

It's a beautiful heritage site that I group up with and it should be the heart and soul of the city. The buildings are worth restoring as they are part of Chch's history

6898 - Laurie Harrison

The arts centre is an important space for people interested in art, film and history and should absolutely be funded to preserve this

76 - Ben Hofmans

The Arts centre should receive MORE funding, not less. It has brought a lot of vibrancy into christchurch, which is an important factor in making a place enjoyable to live in. Christchurch needs more art, far more. Cutting costs to the arts centre will result in a net loss as someone else will have to take it over and do a worse job of running it.

92 - Bill Luff

I write to query the economic and social logic of excluding the current Arts Centre funding from the CCCPlan. I want to see CCC's economic and social cost benefit analysis of this decision to convince myself and numerous others concerned about this decision that CCC has undertaken the appropriate due diligence. Without making such analysis public CCC is opening itself to understandable criticism.

10 - Jeanne Butler

Need to fund the arts centre

>>>

Need to fund the Arts Centre

>>>

Need to fund the Arts Centre

>>>

Fund Arts Centre

100 - Anthea Fraser

Arts Centre EQ repairs should continue to be funded.

101 - Harshal Panidepu

The current art centre is great. It is futile exercise to save money by handing it over to Christchurch city council; It will only mean a higher annual cost to the Christchurch City Council.

102 - Greg Comfort

Somehow you need to support the Arts Centre. Decisions made after the earthquakes are coming back to haunt us, especially the final financial signoff agreement with the government. NZ govt should have funded the Arts Centre more while CERA was a thing.

>>>

We need to keep supporting the Arts Centre. It's not ok to walk away.

103 - Lisa Tonkin

Yes! The Arts Centre needs to be part of this plan. It is one of our most important heritage sites and it needs to be maintained. We have lost far too many of our beautiful buildings through neglect and earthquakes. The inner city is bland and this is the only part of Christchurch that remains beautiful and attracts locals of all backgrounds in addition to being an important tourist destination.

104 - Jennifer Maghzal

Ish... The changes to funding for the Art Centre are greatly concerning. The Art Centre, the local organisations and businesses it homes and supports as well as its diverse and eclectic arts programming are a vital part of this city's cultural fabric, without which this city will suffer greatly, not only in terms of tourism but also in terms of it's sustainability as a cultural hub for the South Island and Aotearoa as a whole. The arts are what bring us together through shared experiences and any defunding is frankly the most narrow-minded and short-sighted of actions that could be undertaken. Yes, times are tough and money is limited, but living is about more than just roads, its about finding connection and beauty in the world and in our communities. Art is the vehicle for such connection and beauty. Please don't strangle our city's access to such imperative cultural resources.

>>>

Terrified by the defunding of the Arts Centre which threatens to wipe it out.

>>>

To reiterate my passionate support for the funding of the Arts Centre as not only a city treasure but a national treasure. The Art Centre is not only my workplace (the place that keeps me able to pay my bills and not need to rely on benefits to get by) but as an artist it's my community, as a member of the LGBTQIA+ and immigrant communities it's a way I can see myself reflected in the image of the city through it's diverse programming. It's a home from home for me and it's loss would be leave an irreplaceable hole in the heart of this beautiful city I am proud to call my home.

1040 - Reginald Gavin

Not for the art centre

>>>

The art centre is the most important asset to ChCh

105 - Harriet Murray

Simply put, no. To take funding away from the Arts Centre is to say the CCC sees no long term value in a space dedicated to the arts for both the community and for travelers. Art drives our city forward, a hub near the gardens of the 'garden city' drives our city forward.

>>>

SAVE THE ARTS CENTRE

FUND THE ARTS CENTRE.

>>>

Supporting and maintaining the Arts Centre

1062 - Georgja van Zoelen

Growing up, my mum, sister, and I cherished our Saturdays at The Arts Centre. As an adult moving back to chch, I now love visiting with my friends and husband. I was there today with a girlfriend after walking round hagley. It's a vibrant part of Christchurch, brimming with history and creativity. Post-earthquake, its revival symbolised our city's resilience. It's crucial for the council to prioritise our cultural heritage. This centre supports our community's spirit far more than changes to roadways (Eg reducing Harewood rd to one lane/cycleway) ever could. I'm begging the council to ensure The Arts Centre remains a part of our identity and community ❤️

107 - Bri Lawrence

I want the council to support the Art Centre. The Art Centre holds so much historical and present value to Christchurch and the arts community. As a young graduated creative the art centre had created so many opportunities for me and my fellow creatives. If the funding goes dry you will see a surge in people moving out of this city. Young creatives and graduates already move away as opportunities are already scarce. This will increase if you stop funding the art centre. Post quake we need to think about what will bring people back to this city. And the art centre is already doing such an amazing job at this.

1072 - Kate Donald

I'm writing in support of The Arts Centre's call for renewed funding from the Council. As a child who grew up in the Canterbury region, went on to study Arts at university in Christchurch while living there for four years, and now a GLAMs professional in Pōneke, The Arts Centre has been an invaluable organisation and physical space for myself, my whānau, and my peers. The Arts Centre, and the organisations it allows to function through rental spaces, are hugely important to the local & national Arts & Heritage ecology. The Physics Room is one of very few, important spaces in Ōtautahi which bridge the gap between study and the arts community for emerging artists & arts practitioners. The Arts Centre's residency programme draws in and supports artists from the wider national network of artists, a rare opportunity in the underfunded New Zealand art sector. Contributing to the establishment, continuation, and access of new Zealand artists and their work. Lumière Cinema is local attraction in Ōtautahi, providing a boutique cinema experience with a programme crafted by the team to suit the awe and novelty of the venue. Events like their screening of NZIFF connect New Zealand, and specifically Christchurch, to the international film sector. Not to mention the high-quality commercial venues like Frances Nation Cafe & Paint n Sip as just two examples. As a child, my earliest memories are of The Arts Centre. The location of it being so central, and placed directly in between the Museum and Christchurch Art Gallery are key factors in this. I can imagine for my Mum this accessibility of such a variety of rich educational, entertaining, and whānau-friendly venues in such close proximity, is the reason we frequented it so often. These venues function in relationship to each other, and create a hub of arts & culture in the central city. This fact is only emphasised more now, after the earthquakes. In pre-quake Ōtautahi, my fondest memories are of visiting markets at The Arts Centre. The array of local artisans always felt magical. And the bustling crowds are a testament to how much they must have contributed to the local economy. Now living in Pōneke, whenever friends and colleagues visit Christchurch and ask for recommendations of where to visit, The Arts Centre is my first recommendation. And every time I receive rave reviews.

1077 - Stacey Dixon

Regarding the Christchurch Arts Centre, which appears to lose its funding from the Council in this draft: If there is one complex of buildings in Christchurch which I associate with excellence in this city, this is it. The Arts Centre is utterly unique within New Zealand as an accessible, open and public centre for many different art forms - theatre, music and the visual arts. It pays homage to one of the greatest scientists that ever lived through Rutherfords Den, and is a living reminder of the optimism, creativity and beauty that Mountfort sought to create as an architect for the university when it was first built, this fabulous centre of learning we have created. It inspired me as a music student, when the Christchurch School of (Instrumental) Music was still based on the premises; an organisation which incidentally has done more for music education than any other single entity in the country - easily proven by counting the numbers of its former students playing and teaching professionally all around the country and the world. I remember trekking up the stairs to my lessons in the Physics and Chemistry buildings, and in the Observatory tower; I remember walking around on summers days listening to music from every corner, I remember popping into a free gallery between lessons, or to the (now) Bunsen Cafe for a hot chocolate - on one rare Saturday morning watching snow falling from the upstairs balcony. I bought all my family's Xmas presents there (mostly from the outdoor market!) with my pocket money. I played countless concerts in the Great Hall and busked outside with my friends for a few coins. I cried tears of laughter at Scared Scriptless, I got to know all the bits of the city from walking from the bus stops from my home in Shirley to rehearsals (what a contrast these beautiful shady buildings were from the bland and windy street of state houses where I grew up), and I made lifelong friends. Every time I return to New Zealand I go back to the cloisters, get a cup of coffee and walk around and see what's new - an exhibition, a restaurant, a movie theatre (I watched a Norwegian film with my cousin there last time I was visited). It is my home away from home, and a rare piece of familiarity in a city so changed over the years, though the content is always intriguing and updating. This living artistic venue needs to be maintained, indeed treasured, for everyone in Christchurch and the Council should be thrilled to be able to contribute its existence and keep this fantastic place open and inspiring for generations to come with its corners full of art, music, and possibility.

108 - Robert Duns

Council funding needs to continue

109 - Carolyn Fee-Pulford

Need to include council contributions to the Arts Centre as it is extremely important to keep arts available to the citizens of Christchurch and also for visitors to the city

1097 - Nicky Craig

It is a big part of Chch history and we all have fond memories of the place it was before the earthquakes.

1098 - Eric Pawson

The Arts Centre Trust has done invaluable work restoring the buildings and tenancing them: this is a great asset for both citizens and visitors. I don't want to see the Trust wound up and for the Centre to become a direct liability for council. The Trust deserves ongoing council support and I would like the same amount of my rates as previously spent to this end. And council could also help by pooling the Centre's increased insurance bill in with its own assets.

110 - Frank Spiewack

funding for the Arts Centre has to stay. It is an important asset for the city

>>>

The Arts Centre is an essential part of Christchurch and attracts many visitors from NZ and abroad. It needs to be financially supported by the council.

1103 - Murray Sanders

[Grants & Funding>Other Community Grants & Funding]

Support for the Arts Centre and Ferrymead Heritage Park should be maintained

111 - Lesley Potgieter

The maintenance and continuation of The Arts Centre, Christchurch, deserves to be prioritised. It is the Grand Old Dame and a major asset to the city, and the go-to place for locals and tourists alike. It would be unforgivable to allow The Arts Centre to lose funding and be unable to continue as a hub of and for the arts and artisans of our city.

1113 - Graeme Plank

There is nothing obvious in the plan which supports the ongoing, and significant, operating costs of The Arts Centre. The Arts Centre is a major tourist attraction and needs the operational support much more than some vanity projects being funded.

>>>

Fund The Arts Centre to continue operating. It is a renowned tourist attraction as a drawcard for overseas tourists. Not funding it to continue operating will be detrimental to Christchurch especially if significant portions of it are transferred to commercial enterprises. The education programmes are

excellent and the studios, maker workshop, cloisters are wonderful community spaces which benefit many, many diverse groups in our community. Perhaps review the management structures but certainly fund it to operate as a community resource in the heart of our city.

112 - Sylvia Allan

I am a regular tourist in Christchurch, as well as a former student and resident. I choose to stay as close to the Arts Centre as I can when in Christchurch, as it has a great vibe and it is part of a very important cluster of tourism activities including the Art Gallery, the Botanic Gardens and the Museum. I understand that the Arts Centre gets modest but crucial annual funding from the Council. That should not be removed given the importance of the centre to the attraction of Christchurch. Please include the continuation of funding to support the Arts Centre in the final LTP.

1122 - Justine Essenberg

The arts centre needs funding. It's a core part of Christchurch. I wish we had more gorgeous buildings like it. Everytime u have family from out of town, especially from overseas, the arts centre is a must stop. All of the businesses within the arts centre deserve more funding so they can stay there and continue to be apart of Christchurch

113 - Sarah Cragg

I love arts and heritage and the Arts Centre is something we also need to invest in now, to save money in the future. It's the literally the most important piece of pre quake Christchurch to me. It means more to me than the Cathedral or any sports facility. For me, old Christchurch was going to the markets and the bead shop and getting a souvlaki and going to a movies at the Arts Centre (and the bead shop, compulsory teenage activity). Now it's a bit different and a bit more upmarket but it still has what post quake Christchurch needs: heritage, arts, crafts, food, drinks, space, creativity, opportunity. I love to hear a UC student playing the piano or pop into the Teece as well. How cool to have UC back at the OG UC! Looking at the numbers, I could manage to accept the Dux decision but I can't accept no Arts Centre.

1133 - Julie Stewart

Funding for the Arts Centre

1137 - Gary Cross

It seems ridiculous that closing The Art Centre is a possibility. After spending millions of dollars rebuilding, it seems a huge waste. The council needs to support The Art Centre in some way. The Art Centre is too important to Christchurch and New Zealand history.

114 - Evie Jones

I think the Arts centre needs to be a priority. Ever since we lost the cathedral to the earthquakes the arts centre has become a cultural and architectural centre on the CBD. My earliest memories of my city is watching buskers outside the arts centre. Watching its construction process felt like a rebirth for the people and the city. It's across the road from where the march 15th flowers were laid. I work in town and so many tourists come through and talk to me about how incredible the arts centre is. I got my first tattoo in the arts centre because it was the only place my mum wanted me to get a tattoo, it's so important to my family. Me and my university friends have gone to every uni night. I've used the museum for class trips and assignments. I've attended play and poetry readings in the great hall. In the past the arts centre has had great funding from council in the past, what changed? The Arts centre is very symbolic for the people on Christchurch, so we not deserve to heal? To have hope for the future?

1140 - Julien Maries

Not funding the arts centre is such a mistake that the tax Payers are going to end up paying for anyway...

1141 - Sandra Anderson

Council should support the Arts Centre, because it is an amazing piece of history, and for all the new pieces of history that can come to Ch Ch for people the don't travel the world and can't afford too. Also for future children to see all the amazing history that they will have never known before.

1144 - Lisa Renton

the Arts Centre is an amazing facility, only recently completed following the earthquakes and only partially based on the funding raised to date, rather than relay on fundraising to pay for operational and maintenance costs, this should be for the remainder of the buildings that still need to be fixed.

>>>

The Arts Centre funding should be maintained and not cancelled, this is a special heritage facility that needs to survive for generations to follow

>>>

Focus on The Arts Centre funding to remain in place to support heritage facilities for current and future generations to use, if we lose this amazing centre it will be lost for many years and prehaps for ever.

1145 - Nicole Malcolm

Not funding the arts centre would be one of the biggest mistakes the council could make. Every time I visit it is thriving with locals and tourists. Unique experiences are available and enjoyed by all. It's an important piece of history and to defund it would be a crime. Please rethink how you intend to fund our city and put the arts and community at the top.

1148 - Emma Turner

I'm disappointed to see there is no funding for the arts Centre. I believe there has been a lot of effort and consideration in place making and creating a home for smaller, niche, arts businesses. Being in the arts Centre can be a moving experience, beautiful architecture, beautifully restored, but also many memories for so many cantabrians. I want to live in a city where, as I did some months ago, I can wander around these old buildings, find my way to the great hall, marvel at the stained glass and enjoy buildings with history and life. The work to restore has been done, it's so important we take it to the next stage. I'm sure it can have a bright future with a wonderful variety of long term tenants.

115 - Dean Milroy

The decision to stop funding for The Arts Centre will be a huge loss for the city that I think should seriously be reconsidered. I feel like there's so much more great things to come from there and that this decision will put a halt to all of that and in reality cost the public more money in the long term

1150 - Nina Carrodus

Don't shut it down!

1163 - Nichola Tyson

We have lost too much of our history already, the heart of the city is becoming soulless

1169 - Luke Morreau

I believe the arts bring a real sense of joy, pride and vibrancy to the city. They make it an attractive place to live and work in. I believe its money well spent as a ratepayer in this city.

117 - John & Beryl Harrison

The proposal to deny further funding for the Arts Centre is short-sighted and irresponsible. For us as lifetime arts lovers the Arts Centre has served as our home for more than 50 years during which we have attended almost every Court theatre production and been closely involved in its administration and as volunteer ushers until the earthquakes forced its departure. Since then the Arts Centre has gradually rebuilt and re-established our vibrant arts scene eg the packed lunch hour concerts which we have regularly attended since their very beginning. We have delighted in the many and varied events staged both inside and out. Supporting the bars and cafes, we have taken visitors to admire the unique neogothic architecture of these wonderful old buildings. We were founder members of U3A Godley which was established in the Arts Centre in 2006 and for years met weekly in the Hurst Seager Room. The Arts Centre has been and is an integral and important part of the Arts in Christchurch. Its

unique historic record of the past speaks loudly and proudly for its future. For the Council to abdicate any financial responsibility for this future is untenable.

118 - Barbara Neville

Please fund the art centre

>>>

Please find something for the arts

119 - Alyssa Tull

Keep the funding for The Arts Centre Charitable Trust in your LTP 2024-2034. The Arts Centre is a pinnacle of Christchurch and impacts thousands upon thousands of citizens every day, and should continue to be supported and backed by our City council.

1191 - Ava Johnson

Also the Arts Centre is such a great community hub it deserves more funding!

1199 - Diana Proctor

The Arts Centre deserves some Council financial support. Please re-examine your finances and enable this. The Arts Centre is a set of iconic buildings at the very heart of our cultural centre alongside the Canterbury Museum and the Art Gallery. Locals and visitors alike gravitate to the Botanic Gardens along Worcester Street. The Arts Centre needs support to become a vibrant centre of cultural activity. We need more than sports arenas and swimming pools! How about the “free” entertainment programme such as Sparks in the Park be curtailed or made biennial or triennial and the money saved used to support the Arts Centre? In these financially difficult years, communities must be encouraged to create their own entertainment with some possible support from Council allowing very special features of our city such as the Arts Centre to stay viable.

120 - David Thorpe

Please don't cut the arts centre funding. The Arts centre is an essential resource for this city. I am a musician and educator. I have been part of many arts centre events teaching and inspiring children - the next architects of this city. I am originally from the UK and keep a close eye on the arts, funding and politics... Please don't be as short sighted as the UK, protect what we have here in Christchurch, invest and think of the future. Please don't screw it up.

>>>

Please don't be shortsighted Not supporting the arts will cost dearly in the future. Please think about the bigger picture, don't just think about saving a quick in the here now.

121 - Lauren Sokolik

I heard the Arts Centre is getting cut? Your subsidising of the Arts Centre is really important for maintaining this beautiful historic buildings. It's one of our favourite city centre destinations for our family! Please keep funding it, it's worth it!!

122 - Alice Terrien

Please maintain funding for the Arts Centre at current levels.

1226 - Briana Hodge

I want the council to continue funding the art centre. I think it is an essential part of Christchurch and should be preserved as such.

1228 - David Squire

The Christchurch Arts Centre is one of several jewels in the crown of the Christchurch arts community. It is a historically significant area (and unique in Aotearoa New Zealand), with important central-city multi-purpose and cross-genre spaces that are not found in any other area of our country. The city needs to support and promote this asset.

>>>

[Rates > Other]

Council rates are increasing nationwide - this is not just a Christchurch problem. However, Christchurch is a unique city with a culture that has demonstrated the utmost resilience since the quakes, and enhanced by the way the community has supported one another and taken pride in the redevelopment of the city. The Arts Centre is an important part of this culture, and has been for many years. A lack of financial support from council is devastating to this progress and cannot be unchallenged.

1229 - Cassandra Albert

Fund the Arts Centre (and build hundreds more bike stands for it) - the art centre is an amazing hub that draws many folks to the CBD and creates so much engagement and business. They deserve council funding.

123 - Stephanie Campbell

I find the proposal to stop funding The Arts Centre shocking. As a ratepayer I believe the CCC should continue to fund the Arts Centre.

1233 - Allison Crow

Hopefully you have, but the Arts scene of Christchurch needs to be so carefully managed and supported, and The Arts Centre is one of the gems in the crown of the Art assets of the city of Christchurch.

>>>

The previous history of Christchurch City Council shows that The Arts Centre Trust received approx. \$1.8 million per year. This equates to approx. \$1 per month for the average household.

>>>

I would like to see the Council vote to maintain its support for The Arts Centre Trust. These buildings are so iconic to our city, The Great Hall being a very special place for the holding of musical events, which are so appreciated by the public. In fact the whole complex, with its rich history, so firmly embedded in the stone works, the architecture, the positioning of the complex being so central to the city, the Museum, the Botanic Gardens and our main hospital make it imperative to be continually supported. The spaces rented out, offering such a variety of activities and products for sale, make a visit to the Arts Centre an experience sought after by so many locals and visitors alike.

124 - Valerie Sykes

Very concerned re plan to stop funding to the Arts Centre. It is a treasure for the city and must continue to be funded by the Council. We fought hard to revive the centre after the earthquake. That work cannot be ignored.

125 - Jacqui Oxenbridge

I am a frequent visitor to Christchurch and I have been thrilled to be able to visit the Arts Centre again. It is great to see the area thriving and businesses existing in the Arts Centre along with the Rutherford exhibition. I also have enjoyed attending art exhibitions in the hall and I feel strongly we should maintain and keep alive our Heritage sites. It seems to me that we play fast and lucky with European Heritage Buildings in some cities and the Arts Centre and Cathedral are a big part of Christchurch CBD in my opinion. I believe a lot of tourists would agree. The Trust has been managing the Arts Centre with support from Council and I would strongly support this ongoing support. I understand that if the Council funding is removed the Trust will become insolvent and the Arts Centre maintenance and all costs will then revert to council. It seems unlikely that this change will result in the cost saving that Council are looking for.

1254 - Nikki Thebault

No. Please include the arts centre funding.

Include continued arts centre funding

126 - Julie Foley

I believe the CCC is making a huge mistake in not supporting the Christchurch Arts Centre/ Te Matatiki Toi Ora adequately. The Trust has completed an heroic job of restoring 21 of its 23 Heritage 1 buildings post earthquake. It is just coming back to life again with more and more tenancies and events happening each year. I have been a volunteer at the arts centre, and volunteered there during Heritage Week and the WORD Festival. I am now a volunteer guide with Walk Christchurch, the daily tours starting at the Clock Tower. All visitors, whether from Christchurch/Canterbury, elsewhere in NZ or international visitors, are blown away by the quality of the site/ the Gothic Revival architecture and the beautiful restoration job. I attended university there from 1969-1971. To me it is essential, now that the city has saved the site from demolition following the university move to the Ilam site, the the city holds firm and supports this cultural, historical and architectural treasure for future generations. Please work with the Trust to ensure the survival of this jewel in the crown of our heritage.

>>>

[Planning & Strategic Transport, Urban Design, & Urban Regeneration > Heritage]

The build fabric of the city is also important. Given the number of older and heritage buildings that have already been demolished post earthquake, it is essential that we treasure what is left, for example, the Arts Centre and the Provincial Council Buildings.

>>>

Save the Arts Centre- fund it properly.

1276 - Brent Dyer

THE ARTS CENTRE. To close this down would be a huge short term mistake. Locals love this place and after all the city has gone through it is a beacon of consistency, regeneration, growth and looking forward with a supportive council. Close it down and the council will take away part of the city's beating heart, that so nearly stopped after the EQ's. International visitors love and admire it also. Closed and what a shabby backward thinking place this would be viewed as and rightly so. Spaces such as these are the glue, the way we create community, respect in the "now" and the "past". So much more. Please keep it going and support the Trust that has done an excellent job to date. I vote

KEEP IT OPEN AND SUPPORT THE ARTS CENTRE CCC. Thank you.

1279 - Diana Elliot

The Arts Centre is valuable not just for Christchurch but for New Zealand. It is an invaluable community centre, for artists and for the people of Christchurch and for visitors to Christchurch. I love visiting it every time I am in Christchurch and there is always something different and interesting and inspiring to look at. Please continue to provide the funding required to keep it operating.

128 - Elizabeth Ackermann

Fund places like the Art centre

>>>

Heritage building funding has been cut such as no funding to our beloved art center

1280 - Victoria Mitchell

Support The Arts Centre

1287 - Felicity Price

You should allow for continued funding of the Arts Centre at \$1.8m pa, meaning a dollar a month increase for each ratepayer - cheap at the price.

>>>

You should prioritise continuing to fund the city's valuable Arts Centre asset - if the City Council were to end up running it, it would cost ratepayers a lot more than the \$1.8m pa funding sought.

>>>

The Arts Centre is just as valuable to the city as Te Kaha and libraries so the Council should allow funding for it. Whatever the Council has set aside for heritage should also take into consideration the Arts Centre's funding needs - especially since it has been restored at only a very minimal cost to the Council - much, much less than the Cathedral which is probably never going to be restored.

>>>

Yes, the Council should put some funding into the Arts Centre - the city's most valuable operational heritage asset, taking up a whole city block and comprising the biggest heritage restoration in NZ.

>>>

If you fail to fund the Arts Centre you will end up spending a lot more each year than the \$1.8m needed - the Council will still have to find \$1.2m insurance money and pay (or lose) \$200,000 rates.

>>>

A thriving city needs to look after its community assets such as the Arts Centre, which attracts a million visitors a year, local and international. Without funding from the Council the Arts Centre will fail and a significant community asset will be lost.

>>>

This consultation process makes it hard to include popular community assets that the Council is refusing to continue funding. I can only reiterate that the city Council needs to set aside \$1.8m pa to keep the Arts Centre the thriving creative community hub that it is today and not embark on a lengthy legal process to change the Arts Centre Act to find a new owner. Only the lawyers will benefit from that, and Government could well decide the Act should stay as is and refuse to assign ownership to any other entity other than the Arts Centre Trust, which the National Government created in 2015.

129 - Barbara Harding

Now you are considering not funding the amazing Arts Centre, the star of our city, a place for families to enjoy watching or listening to some incredible artists, a place to learn arts of all kinds, a number one tourist attraction, a place offering diversity, peace, warmth and knowledge. It is appalling that after all the incredible efforts of the Arts Centre staff, who are truly dedicated to giving the local and visiting people a slice of history, that the funding from CCC is set to be stopped. I beg you to reconsider.

>>>

Yes, you need to continue to fund the Arts Centre

1291 - Christopher Bowen

The arts centre is for all and needs your funding

>>>

The city is evolving out from the quake. The quarters need more nurturing to really bring the buzz. The arts centre is vital to this and must be invested in

>>>

Save the arts centre

1293 - Jill Rice

Keep >>> the art centre funded.

>>>

Keep funding the arts centre.

>>>

Keep supporting the arts and entertainment in the city

1297 - Deborah Kapohe

Arts Centre will need funding and not good this isn't included.

130 - Jennifer Nuthall

No. By leaving out your regular funding of the Arts Centre you are condemning it to insolvency and decline. I recall how hard everyone worked to persuade Canterbury University College to gift it and retain this for the city on the understanding this would be supported by Christchurch City Council in future years. Since then many thousands of dollars have been donated by individuals, businesses and corporates and these will continue to come in if The Arts Centre remains in a Trust, money which will not be forthcoming should CCC be left with a failing venture.

>>>

As part of the generation educated at this site, I saw the strong community effort that lead to Canterbury College/University of Canterbury donating The Arts Centre to our city. Over the decades since it has been our centre for the Arts, the hosts of hundreds of popular events, the draw card for thousands of locals and visitors. The benefit to Christchurch hospitality, accommodation and other businesses is immeasurable. Without CCC's annual support and it could become derelict, dead and/or just another cluster of shops but with regular Council grants and more appropriate arts-related

businesses it would remain so. If Council has to take it over, one of its main sources of funding would dry up as donors rarely give to publicly funded bodies

131 - Helen Peate

I am shocked that it has been stated that The Arts Centre is not to be funded.

>>>

I am shocked that The arts Centre is not considered a priority. It will have better returns than Te Kaha. Where was City Councillor arts advocate Andrei Moore when it was discussed?

>>>

Restore funding for the Arts Centre. Many citizens consider it more of a Christchurch iconic building than the Cathedral.

132 - Jason King

No. The Arts Centre is a fundamental part of Christchurch City's heritage & also a prime area for tourists to see some of the unique history of Otautahi & how it is still well utilised today. You are planning on cutting the Arts Centre funding, which will be an embarrassment to the Council... I understand that insurance has increased x1000. Council is trying to save money but has not understood the finer points of the situation. It is most likely that the High Court will have to rule on who would get the Trust's assets, and that the Court would choose the City Council. Council would then have to cover all the same costs, plus pay for the transition, but would not get the grants, donations and sponsorship that currently support arts programming and other costs.

1339 - Carol Marie Ferrier

[Parks > Parks Spending (General)], [Art Galleries & Museums > Art Gallery (Capital)]

More spend supporting Hagley park, Arts Centre, Botanic Gardens, Art Gallery, everything in the Tram circle

134 - Deborah Williams

The Arts Centre needs the support of all citizens. I support it and am glad to do so but my contribution is a drop in the bucket. I go to that area most Sundays. It is A VERY IMPORTANT AREA FOR TOURISTS. It must be supported from the rates. The Arts Centre needs our support.

>>>

The Arts Centre is a wonderful magnet for tourists and also for local people like my husband and me. My father went to Boys' High School in these buildings. I later used the gym which is now named Altlora. My father and a sister and I went to university in these hallowed buildings. I loved it when the Dux de Lux and the Court Theatre were here. We have been to many events in the Great Hall and many outside such as the wonderful Topp Twins who were such fun. My husband belongs to Dekaworwor West African drumming group and they performed outdoors recently. We love sitting outside Bunsen for lunch. We often go upstairs to see what exhibitions there are in the Pūmanawa Gallery. We love the Centre Gallery which was once the university library. We have been through the Teece Museum. We go most Sundays...We love the place. As ratepayers we are happy for the city to support the Arts Centre.

1345 - Juliet Manning

Please continue to fund the Arts Centre

1351 - Elsie Burt

The Art Centre funding should be maintained. This could be funded through more commercial management of the CCL portfolios. The business case to investigate options should be completed.

136 - William Fulton

You have missed the opportunity to support The Arts Centre which contributes multiple times the current CCC investment each year in economic benefit.

>>>

maintain current investment in The Arts Centre.

>>>

Assume the Arts Centre comes under this heading. maintain current funding quantum.

>>>

Do not drop the ball on the current funding for The Arts Centre. It is a treasure that our city needs to maintain its investment in.

1362 - Pablo Rodriguez

Fund the Arts Centre!

1365 - Valerie Grose

I value the Arts centre and all that it offers us as residents of this city, we need to have a place where we can have a facility for the culture of the Arts not just sports facilities.

1373 - Luke Lagan

Work with them to find further commercial opportunities at the arts centre.

1374 - Gay Rathgen

I do feel the decision not to fund the Arts Centre this year is very short-sighted. I believe every Cantabrian has a memory of the Arts Centre-In my case my oldest daughter, now thirty-five was taken to the Court Theatre junior productions as a youngster, danced at the Southern Ballet as a junior, my youngest also attended the junior court productions, attended drama lessons with Aimee Belton, I have photos of her at the Saturday markets "helping" Mullet Man with his act, and personally my memories are Court Theatre, Saturday markets, concerts in the Great Hall, the Gym, movies at Lumiere, Annies Wine Bar and Le Cafe. The Arts are struggling and many Cantabs are struggling- a small dose of theatre, cinema, a band or just an afternoon in the Arts Centre market lifts spirits. The amount the Arts Centre is requesting is not huge when you consider how many people it touches.

1375 - Helen Johnston

The Arts Centre is a VITAL part of the community. I am currently studying through Whitecliffe and the rooms are necessary for us to participate in the programme. It would be a huge loss to the South Island if this programme were no longer able to run out of the arts centre due to increased costs.

1378 - Rowena Morgan

The Council funds the new library - the building itself is of international standard and the highest of architectural design . The Council should also be assisting in the running of the Art Center - it is iconic in Canterbury, has been remediated at international standard, and should be promoted as a go-to destination by locals and visitors alike. Of all the vast array of projects the Council puts money into, the Arts Center should be at the top of the list.

>>>

No longer financially supporting the Arts Center would be very short-sighted. It would be investing in our current and our future, on the international playing field

138 - Liam Hooper

Ensure that the art center is well funded, removing funding from art is a removal of culture and cultural heritage. From my understanding, by removing funding if it then goes under the CCC will have to take over responsibilities from the center leaving future rate payers with a higher bill.

1384 - Jessica Ball

Absolutely But please ensure the Arts centre is still funded It is a special place for the local community - myself my children use it lots for local events

>>>

Particularly if this means saving the arts centre

>>>

I understand you are not including the arts centre in the proposal, which is a travesty for the local community

>>>

Please fund the arts centre - it is part of Christchurch's heritage

>>>

Please fund the arts centre as above

1388 - Phil Gadsby

Please continue to support the arts centre. I have lived in Christchurch for 5 years after moving from the UK for a job. The arts centre is a wonderful stone building with special quadrants that are a joy to explore - a rare thing in New Zealand. It is a special place with an abundance of creative delights. To lose it would be a disaster. Please continue to fund the arte centre. Thank you

1389 - Emma Mcurtrie

I'm so unhappy to hear the council will not continue to support the arts centre, all the while benefiting from the area, spaces, tourism, even the images on your websites! Its a beautiful and vital space for all

cantabrians that needs the on-going financial support. With the news about the Cathedral this week the support is now vital that ever. Please continue to support our arts centre!

>>>

More money to arts centre please.

1392 - Robert Banks

I have just visited the Rutherford Den at the Arts Centre. This is a brilliant facility that should be well maintained for the future. This needs to include funding by Christchurch Council.

1393 - Tim Holmes

I would like to see funding support to the Arts Centre maintained.

1397 - Andrew Sprouse

I think it's essential to our city that the Arts Centre receives funding to keep it open, surely there has to be a way to repair and rent out the former Dux de Lux?

>>>

This might be in the wrong section, I think it's really important to keep the Arts Centre open and fully functioning

>>>>

The Arts Centre is in the centre of our city, it would be madness to have it closed due to lack of money!! If you have enough money to rebuild the museum, surely some of this money could be used to save an already renovated building??!

1405 - Justin Standring

Please continue to fund the Arts Centre. It is a key historic, tourism, and cultural asset to the city and is one that is remembered (by name) by many of my friends and family that have visited the city. To me and them, it is more significant and important than the cathedral, as the icon of the city. Given that the ultimate outcome of the proposed LTP will still see the council owning and funding the maintenance of this asset, it's wasteful to pour money into the high legal fees, administration, and time of the council staff to deal with the insolvency and court ruling expected to take place. The beauty of the Arts Centre is that it brings together galleries, venues, stores, and workshops all into a

single location. Whilst these could exist in other parts of the city, they would fail to get the foot traffic that the centre provides. Without this facility, why would tourists bother to hop off the tram at this spot? I have performed in many music events there, and have also attended other types of events that have been hosted there (e.g. buskers evening events, and theatre shows). I know of artists that have had residencies there early in their career, and that have sold their work through the stores tenanted in the centre. These artists have grown to be leaders in their fields in New Zealand, and the Arts Centre played a key role in their successes. Please continue to fund the Arts Centre.

1406 - Eve Lafferty

I support maintaining funding for the arts centre

1426 - Judith Coullie

The Arts Centre must be allocated adequate funding to ensure it is the vibrant, unique and beautiful heart of our city for future generations.

>>>

[Parks > Heritage (Capital)]

The Arts Centre should be a key part of the funding earmarked for heritage.

1428 - Conor Keena

[Recreation, Sports and Events > Community Arts]

I am also concerned with the lack of funding going into the Arts Centre and other arts outlets (it might be there, but I didn't see it in my reading). I know it's always an easy cost to reduce but I think the arts are key part of a happy city.

143 - Kenneth Palmer

I wish CCC to continue to provide annual support funding to the Arts Centre. This should be at a similar rate as that of recent years, \$1.8m p.a. on average. The Arts Centre has been a significant part of the enjoyment and well-being of my life in Christchurch. My 4 years of university education took place there: a period of huge significance and fondness then and in subsequent effect. I have continued since the site's reincarnation as Arts Centre to attend there, numerous musical, theatrical, cinematic, & dance performances, as well as exhibitions, lectures, presentations & such like of greatly varied kind & form. They bring a contribution to the life of the city & health of citizens we cannot do

without. The Arts Centre is also an invaluable market place for art works, crafts, education, accommodation, hire spaces, and food & drink. Hence providing daily enjoyment, essential services, and a welcoming meeting place for friends and visitors. All available year round. The Arts Centre is invested by Act of Parliament to provide services in arts, culture & education for all the people of Christchurch. The citizens Trust which runs and manages the Centre has done a sterling job maintaining and keeping in operation the physical structures & grounds, and the services provided via them. To lose all this, or have it wholly become a charge (& further increase in rates) on CCC would be a travesty of everything that the Centre & Trust have given and achieved since inception. Funding of the Arts Centre by the Council must continue.

1431 - Carissa Ptacek

I think the Art Centre should get some grant, in particular at least until the Museum is open, which would also allow some time for an alternate funding source. As the Museum is closed and the Cathedral is once again abandon (which rate payers wasted in \$10 million) it would be a real shame to lose momentum in the Art Centre now it's so nice to go through now and it feels so vibrant and alive. As we spent that eye watering amount on Te Kaha which can only be used around 30 days a year (if I remember the resource consent conditions correctly) it seems daft not to support the Art Centre in what seems like a bargain considering the number of building on the site that are actually used every single day by a variety of students, shoppers, customers, events, food and cinema users, as well as Rutherford's Den which is internationally significant. Some solutions could be to reduce the scope of the \$10 million Te Kaha roadway project, reduce the Museum Board Open grant, reduce Christchurch NZ funding (make sure don't support Sail GP request next year which sounds like it will save at least \$1 million)

1435 - Brent Barrett

I'm a tourist.

I greatly enjoy visiting Christchurch on a regular basis.

When I visit I spend money on city centre accommodation, hospitality and retail.

I'm neither poor nor rich, but I do add money into the city's economy when I visit.

With the Cathedral and Museum both set to be construction sites for a very long time, I was amazed to discover that the Arts Centre was slated to be defunded.

How bizarre that after millions going into rebuilding the Arts Centre, and it being the only real heritage space that is open in the city centre, that operating investment is proposed to be knocked on the head. Loss of the Art Centre's current functions would significantly reduce my attraction to the city. And I rather suspect I'm not alone, given that when I was visiting earlier this week there were droves of tourists in some pretty flash coaches wafting about the place.

Which the Arts Centre itself may not be a huge earner, it is a strong drawcard and therefore earner for the wider city economy. With the Cathedral and Museum years away from being viable drawcards, it seems absurd to cut off such a strong part of the visitor value proposition, esp once many millions have been invested to restore the buildings, and they are a widely recognized and popular part of the visitor and cultural offering in the city.

My submission is that the CCC LTP 2024-34 should strongly fund the Arts Centre operations for each of the 10 years, at a level that ensures it is a vibrant part of the city's cultural offering to visitors and residents alike.

1. Christchurch Arts Centre: Comments on Plan

As a [REDACTED] I was very disturbed to learn that the Arts Centre Trust may have to be dissolved forcing the closure of the Arts Centre.

I well recall that in the early 1970s the now defunct Ministry of Works and Development recommended the demolition of the beautiful complex. I was one of many people who actively advocated for its retention and development. My wife and I always visit the Centre when in Christchurch. To us it is part of the essential character and fabric of the city. The Centre helps distinguish Christchurch from other New Zealand cities and acts as an important magnet in attracting tourists to the city. It would be a tragedy if it were to close because of lack of financial support from the Council or other sources. The city would be the poorer.

As an aside, we were greatly impressed by the scope and quality of the restoration work undertaken on the complex following the 2011 earthquake. This expensive work will effectively have been squandered if the Arts Centre ceases to function.

The Draft Long Term 2024 -2034 (Volume 1) identifies four community outcomes it seeks to achieve including "A cultural powerhouse city." The Art Centre should continue to be an integral part of, and contributor to, achieving that laudable outcome.

I fully endorse the comments of the Trust's Director, Philip Aldridge, as reported in the Radio New Zealand article by Tim Brown (copy attached) published on 24 March 2024.

I hope, too, that the issues regarding the derelict Student Union Building will be quickly resolved so it can be restored and contribute to the vibrancy of the Art Centre complex.

Notwithstanding the competing financial demands the Council is facing, I hope good sense will prevail and the necessary on-going financial support the Trust requires will be forthcoming. Its viability depends on Council support.

1

[Coder Note: Full attachment available]

Please support the Arts Centre, to the extent that they have requested. To my whanau, the Arts Centre is one of the City's great treasures! We go there for concerts, workshops, and events; we visit the observatory and feel that our children and grandchildren have benefitted hugely from the rich and varied experiences made available to them at the Arts Centre. We have been both attenders and performers there (as Natural Magic) since the 1980's. The Arts Centre is one of the places to which we always take overseas visitors. My husband went to University there. We love this place! To us, the Arts Centre is one place we know we will always go to: unlike the stadium, the fireworks spectaculars and big name concerts, the Convention Centre and even the Cathedral. I would be absolutely ashamed to live in a city which did not support this jewel in its crown.

1447 - Ivan Lupi

It's the definition of civic. I strongly urge the Christchurch City Council to reverse its decision to stop funding the Arts Centre. Every dimension of this institution sits at the heart of what the city council exists to do. It is fundamentally a civic duty that we all support the artistic expression of the people of our city. Art by its very nature exists to express, challenge, provoke - and ultimately to allow the people of the city to develop a voice and an identity. The arts centre is far more than a passive gallery of art, it's a beating heart where Christchurch citizens of all ages and walks of life can come together to find meaning. It is our artists who help us make meaning of the world. You can have a beautiful city with top-class facilities and efficiently run services and beautiful herbaceous borders. But what use is any of that if the city has no soul? Please continue the funding of the Arts Centre.

1449 - Thane Tremewan

The proposed 'funding' for the Arts Centre is a disgrace. The Centre should get the support it deserves as the cultural heart of Ōtautahi. It is incredibly important to me personally, being where my grandfather began lecturing and continuing to the present day. A pre-quake performance of 'Badjelly the Witch' by the Court Theatre comes to my mind very vividly. I frequent the Teece Museum and the cinema and proudly direct every tourist I know to visit. Its loss would remove a storied cultural landmark AND a vibrant and diverse cultural space in one fell swoop. The council cannot afford the lengthy legal battle that is sure to ensue if the Arts Centre has to be sold. Even purely pragmatically, leaving aside all emotion, funding the Arts Centre is essential to providing a balanced, liveable city.

1452 - Maraed Riley

Keep funding the arts centre. Creativity is the life and soul of a city.

1456 - Henry Bersani

Find an reasonable middle ground with the arts centre funding

>>>

I think the arts centre is a crucial part of Christchurch's identity. I have fond memories of going to the market growing up and continue to enjoy its facilities - coffee at bunsen or a film at lumiere (best cinema in Chch). But nostalgia is no substitute for accountability and the council and the arts centre board need to perform better in this respect. This genuinely goes both ways - the board needs to work out how it can deliver on its mission while cutting costs - including cutting positions, and the council needs to hold it to account, not by pulling the rug out, but by supporting it to meet self-funding targets based on cost reductions and revenue growth over a reasonable period of time.

1462 - Sue Piercey

I do support a contribution to the Arts Centre as this is an integral part of the museum and art gallery precinct and I value what it offers in the way of events, concerts, shopping, and other entertainments

such as the excellent films at La Lumiere. I have been to the Arts Centre more than any other venue over the past year. I feel it is only just beginning to get into it's stride again after the earthquakes. Coming in on the bus from the airport I noticed how the passengers new to Christchurch really show interest as the bus goes down Rolleston Avenue past Christ's College, the Art Centre and then up Hereford towards the Council buildings.

147 - Colleen Eason

The arts centre needs to continue to be supported with its usual funding. Its a a cultural hub and a tourist and visitor attractions..Its historic and stunning and draws peoples from the city to the art gallery to the museum. Please.support it and the Dux to get operational again.

1478 - Lyall Lukey

The Arts Centre needs to figure prominently in the LTP. It has strong heritage value, it is a popular place for tourists and locals alike, it generates both cultural and small business opportunities and is strategically situated on the Boulevard as a key collection of historic buildings used for modern activities. The Arts Centre has already been saved twice in the last 50 years-first from the depredations of would-be developers, second from the disastrous earthquakes of 2010-11. It needs some secure long-term capital and operational financial support from the Christchurch City Council, alongside other initiatives being taken by Arts Centre management, to guarantee its sustainable future.

1490 - Carolina Nery

We must prioritize investments in education, arts, and sustainable initiatives. Not only will this create jobs and enhance accessibility, but it will also empower individuals to make positive contributions to society and address critical issues.

1492 - Frances Campbell

No. The Arts Centre is blooming and yet the council wishes to cut it off right at the roots. It is meant to be the cultural focal point of the city - something Christchurch desperately needs.

150 - Jeremy Foate

The Council must continue to find the Arts Centre Complex. This is essential to the health and identity of the city

Continue finding the Arts Centre

151 - Marg Flyvbjerg

It is a short sighted investment to ignore arts and culture. Providing venues for arts activities introduces a wider audience to the arts and performance, and improves quality of life

>>>

I see the Arts Centre as at least as important as Turanga

>>>

the Arts Center is a National treasure and must be protected as a priority

>>>

It will be a tragedy not to continue funding the Arts Center

1515 - Andrew Douglas-Clifford

I want to see that the Arts Centre is able to continue to be supported by council.

1522 - David Alexander

No, there is no provision for funding the Arts Centre. The Arts Centre is an absolute treasure that was dearly missed after the earthquakes. Given the Arts Centre costs \$1 per household per month, I think the value to community greatly outweighs the cost.

>>>

There is no provision for funding the Arts Centre. The Arts Centre is a place the holds many memories. By not funding the arts centre, you remove the opportunity for future generations to make similar cherished memories.

>>>

Heritage buildings like the Arts Centre, should be looked after and fully funded.

153 - Lindsay Strang

Where is the support for the Arts particularly for the Arts' Centre, when sport appears to get vast amount of financial help (look no further than the new stadium) which will need endless rate-payer support just for its running costs.

>>>

The DLTP does not include support for the Christchurch Arts Centre. It is imperative that priority is given to at least continue the current funding stream in order to provide the wonderful and community strengthening that the arts centre is able to provide. Such ongoing funding will protect the unique musicality and other entertainment for the enjoyment of its citizens.

154 - Chrysler Wiparata-Hammond

How can we say we're moving forward, a future city if we don't have art? The art centre is core to our city our community and bring in a lot of tourists. I don't think you have it right

>>>

Leave the art centre as is, stop trying to ruin our arts community

>>>

Leave the art centre as is! It's functioning properly as is! You want our city to be a boring city with nothing for anyone other than the Canterbury families that run the place! People will move and leave

>>>

Leave art centre as is, as it's less cost to rate payers and it's very important to the central city business as it brings in a lot of visitors.

>>>

The art centre is a space where locals can come and use the city central. It brings in locals from the suburbs into town creating more revenue and culture for our inner city. Not only is it a space for locals, tourists flock to our inner city and the art Centre is there main enjoyments. Without places like the Art centre in town there is less activities for locals are tourists and I'm concerned that our inner city will have no culture and lose a big chunk of our tourism.

155 - Georgia Hamilton

Fund The Arts Centre! We must not continue to support this amazing place. It is not only a place of great historical significance, but one of cultural and creative significance. From the businesses that operate within The Arts Centre to the accessible, diverse, activities and programmes that the centre puts on itself, it is a vibrant place that gathers people from all corners of our community and offers so much for both locals and visitors to enjoy. It would be terrible to lose it.

1556 - Jeffrey Bergman

[Grants & Funding > Orana Park Funding]

We need to keep Orana park and the Arts Centre funded. These are iconic.

1567 - Sarah Pritchett

Also I think the decision to not continue funding the Arts Centre is extremely disappointing and short-sighted and from what I understand may end up costing the council/ratepayer more if the Trust cannot continue to run it because of a lack of council funding.

>>>

Again I think the Arts Centre needs to be prioritised as it is short sighted to let the Trust go into insolvency and may end up costing the council more if they end up having to run the precinct themselves.

>>>

Yes apart from as already mentioned not continuing to fund the Arts Centre. As a child I learned ballet and played in the CSIM recorder ensemble there. As a teen and young adult and now I have frequented the cafes, watched outdoor moves and attended concerts in the courtyard, went to weddings, and visited the art centre market and galleries. This place has great significance to many of us and it is an asset to the city.

157 - Michael Grimley

Where is the Arts Centre in this plan? Probably one of the most iconic institutions in Christchurch - given my rate paying status I hope that it will be added

1572 - Olive Easterbrook

[Grants & Funding > Orana Park Funding], [Other/Special Interest Topics > Cathedral]

I think we should be supporting Orana Park and the Arts Centre. And not the cathedral.

1578 - Lucia Campbell-Reeves

We do however need to continue funding the arts centre as it is such an important space for the arts in Christchurch.

>>>

Save the arts centre.

159 - Lyn Kennedy

It is appalling that the council has not allocated funding for the Arts Centre in the Draft plan. Such a decision is narrow minded and mean. Everyone needs the beauty of the arts in their lives... so, get your priorities right and think again!

1592 - Richard Catron

I am pleased to submit this letter of support for continued City Council funding for the Arts Centre. What a treasure you have! I am an overseas Visitor who has enjoyed the many different venues the Arts Centre provides to the residents of Christchurch and Greater Canterbury. I have seen increased visitation the past 4 years, having spent much of my free time there between the cinema, coffee shops, art galleries and Great Hall. Other communities would be envious to have such beautiful heritage buildings, and to have them rented out, providing income. Christchurch has a long history of funding the arts in the parks; Victoria Square, Botanical Garden and Hagley Park all come to mind. These are economic engines for non-profits and the City. I was in Christchurch for 14 months during the pandemic, living at the YHA hostel across the street. I have been back to Christchurch twice since then, staying at the YHA and YMCA. And I have seen the tourist numbers rise each year. I anticipate a return visit this October for the Big Band Festival - one of Christchurch's many incredible events. If not for the Arts Centre, this event would not be the success it is. As a professional Park Planner, I see the value these types of facilities add to a community's livability. I encourage the Council to continue funding, and consider upping the line item for an even \$2 million, with \$200,000 dedicated to further planning/renovations. Thank you kindly.

160 - Mykalah Jones

Please do not stop funding the arts centre. Art across ōtautahi makes us stand out above other cities in NZ. Whenever I talk to anyone visiting from overseas they ALWAYS comment on the street art and

how it makes us stand out from the rest.

1610 - Rebecca Thomas

I enjoyed the walking tour. I met people in Christchurch involved in music and comedy and it was great to hear how important the Arts Centre was to people I spoke to!! What has stood out to me the most backpacking around new zealand is the rich culture and creativity and also how easily accessible this is! In cities like Christchurch I think it is so important to keep these spaces.

1611 - Natalie Collins

I think the funding for the Arts centre should be retained. The Arts Centre has meant so much to me and my family over the years. I have run holiday courses there for 100's of children, my extended family has organised multiple trips from Australia so we could attend the Buskers Festival together and we always share this special area of Christchurch with visitors. My in- laws have a wing named after Clifford Collins who was the librarian when the Arts Centre was Canterbury University. As I say, this place means a lot to us and we value what this the Arts Centre represents to the people of Christchurch.

1612 - Emma Johnson

It is extremely concerning that there is nothing in the budget for the Arts Centre - the largest collection of Heritage 1 listed buildings in the country

>>>

The Arts Centre is a key part of vital functioning arts ecosystem in Christchurch and is a place of significant cultural and heritage import. Not only is it the largest collection of Heritage 1 buildings in the country, it is a place where cultural practices have taken place and accrued over many years. Things happen in places. If the CCC is, as it outlines in its values and strategies of then Draft Long Term Plan, focused on making Christchurch a cultural powerhouse, we will need many houses in which this culture can take place. The Arts Centre must be funded. If we can spend rate payers money on a stadium that will have limited use throughout the year, surely we can spare some money for somewhere that is open 365 days a year, with mixed used and a growing and vibrant tennancy.

Funding for the Arts Centre - this is a vital hub in the arts ecosystem- For a CCC focused on creating a cultural powerhouse, we need places where this culture can take place.

1614 - Bridie Munro

Fond memories inundate my thoughts as I reflect on the numerous hours spent here, exploring its every corner, attending shows, and immersing myself in its creative ambiance. From visiting art

exhibitions to engaging in workshops and performances, The Arts Centre has served as a haven for my spirit, a realm where I could escape the ordinary and plunge into the realms of imagination. On a professional level, The Arts Centre has been a crucial support system for my business and the wider creative industry. As an artist and entrepreneur, I've discovered invaluable assistance and facilities here, ranging from studio spaces to networking opportunities. The Arts Centre functions as a central point for cooperation and ingenuity, nurturing a community where artists can flourish and audiences can connect with an array of artistic expressions. Furthermore, The Arts Centre's significance extends beyond my personal and professional pursuits; it plays a pivotal role in Christchurch's rejuvenation. Following the devastating earthquakes, this historical landmark emerged as a symbol of hope and resilience, embodying the city's dedication to reconstructing and revitalizing its cultural heritage

1619 - David Hera

Fund the Arts Centre!

162 - Christine Wehrmeier

I am very disappointed to see that there is no funding for The Arts Centre - why is this? There has been no explanation to the public for this decision as far as I'm aware and I don't see how it makes any sense. I am a resident in the CBD and visit the Arts Centre at least once a week, it is one of the liveliest and most charming places in our city. Like many people, I like to combine a walk through the Arts Centre (often stopping for coffee or to visit an event) before heading into the Botanical Gardens. I see the number of tourists who visit and delight in this space like me. The Arts Centre is historically important and adds so much interest to the city. If we lose it as the cultural venue it is now, it will kill the atmosphere of Christchurch CBD just as it's feeling so vibrant again. I also study here - I am a postgraduate student of Creative Arts Therapy at Whitecliffe College and we use the venue for our training, so we are on-site several days each month. It is magical and inspiring to be able to learn and work here. Finally, I also hire some of the rooms (eg. the Makers Space) regularly as an individual to offer therapeutic art & movement classes for the community. The location and accessibility makes it perfect for those of us who live centrally. I have looked into facilities such as the libraries or community centres, but none of them are fit for purpose and the Arts Centre is unique and offers the right kind of setting for arts-based classes. Speaking as someone with a degree in Psychology, Life/Wellness Coaching credentials, extensive somatic trauma training and now studying Creative Arts Therapy, I know first hand the positive impact the arts has on community and mental health. When there is a crisis, such as the cost of living crisis we are in, we need the arts more than ever. When so many people cannot afford or do not have access to psychologists, counsellors or other support services, they need other forms of therapeutic outlet and there is a lot of research that shows how the arts impacts our wellbeing in many positive ways. We need the spaces that incubate and showcase the arts, to bring people of together and to enjoy as a community. I fear that if we lose The Arts Centre, we will also lose the heart of this beautiful and regenerating city. I will personally lose the place I go to study, enjoy on my weekly visits and I will not be able to offer my therapeutic arts group sessions to the community because there are no other venues in this city that I feel are suitable. I truly hope you reconsider.

163 - Andy Buchanan

Must fund the Arts Centre.

>>>

Fund the ARTS CENTRE

1630 - Bridie McKinnon

I am strongly supportive of the City Council funding the Arts Centre. Much more than the Cathedral ever was or will be, the Arts Centre is a taonga for all ages to enjoy, and should be protected and supported.

>>>

The Arts Centre should be funded.

>>>

No funding for the Arts Centre is short sighted, pre previous comments

>>>

Fund the Arts Centre

1634 - Emma Cameron

there needs to be more funding for the Arts and in particular the Arts Centre

>>>

We need to have more prioritisation on the arts sector of Christchurch, in particular the funding of The Arts Centre

>>>

More funding for the arts sector; in particular The Arts Centre

>>>

Fund the Arts Centre

1639 - Keira McKaskell

Please don't cut funding to the Arts Centre, its such a great hub for creativity, and is just about to start running regular markets again. It's always popular when I visit, which is only possible due to the funding by the council.

164 - Zoe O'Sullivan

The arts centre needs funding!!!

165 - Brett Painter

Please reinstate funding to the Christchurch Arts Centre. It will cost ratepayers and/or taxpayers more in the long run if we do not.

1653 - Kate Manning

I wish the Council to continue to support the Arts Centre through funding. This is a valued and important part of our City. It is the first place I take visitors from out of town as it covers such a wide range of things from lovely dining experiences to historic buildings, Rutherfords Den, art, movie theatres and an excellent example of how the city has come back from the earthquakes. Personally it holds such a variety of memories from childhood right through until the present - ballet classes to catching up with friends while at University, graduation parades, weekend markets and now the fantastic ability to display the wonderful ancient objects belonging to the Classics department to a wider audience. It is a vital part of our City and our identity, a real showcase of what the city has to offer and a tourist magnet. The fact that this may not be funded is beyond belief at a time when we have no museum for a number of years into the future.

1657 - Victoria Panckhurst

Defunding the arts center is nonsensical. The arts center is one of our most beloved heritage sites. It is widely used, and has been beautifully restored and developed (more successfully, than anywhere else since the earthquakes). I understand the few people working there have done that incredible job while making frugal decisions and keeping within budget. The evidence is that those running it are doing a admirable job and they should be honored - not at constant risk of running out of money before they finish the next project. Reading through the document I see more support for things I don't do. I don't

have pets and I don't play or watch sport. I'm not interested in going for swims all over the city. I want to go to concerts, and visit art galleries, and see plays, events, shows, and learn about, and understand the world. Please don't ensure that the arts only become something wealthy people can do. If arts become elitist then we have our governors to blame. Wealthy people will of course continue to pay for it - because it's valuable and worthy! The balance is out. There is NO reason the arts centre should not continue being funded, in fact, based on the work they've done there since the earthquakes, there's every reason to have confidence in their abilities. Funding the arts centre is money well spent, clearly. It should be increased.

>>>

Defunding the arts center is nonsensical. The arts center is one of our most beloved heritage sites. It is widely used, and has been beautifully restored and developed (more successfully, than anywhere else since the earthquakes). I understand the few people working there have done that incredible job while making frugal decisions and keeping within budget. The evidence is that those running it are doing a admirable job and they should be honored - not at constant risk of running out of money before they finish the next project. Reading through the document I see more support for things I don't do. I don't have pets and I don't play or watch sport. I'm not interested in going for swims all over the city. There is NO reason the arts centre should not continue being funded, in fact, based on the work they've done there since the earthquakes, there's every reason to have confidence in their abilities. Funding the arts centre is clearly money well spent and should be increased so those currently doing the work there can continue with the work. They should also be publically praised by the council for the work they've done.

166 - Richard Weenink

We need to remember our past!

1660 - Sophia Bidwell

[Strategic Direction > Have we got the balance right?], [Libraries > Libraries (Capital)]

Not really. Those things are important but you have forgotten about things like the libraries and the Arts Centre. I was horrified to see you are cutting their funding. This is a very culturally important place for me and my family and one of the few links we have to pre-Earthquake Christchurch.

>>>

Please look after the arts centre

>>>

I really just wanted to submit on behalf of the Arts Centre which is both personally and professionally (as a musician) very important to me and to the greater Christchurch area. It's just getting back on it's feet - don't abandon it now by cutting their funding.

1661 - Jayne Borrill

Christchurch lost so much of its cultural heritage during the earthquake, the importance of having a historic venue like this at the centre of the city can not be overlooked. We have spent many many weekend visiting the Arts Centre with family, friends and visitors from overseas. It would be an absolute tragedy after all the brilliant work that has gone into rebuilding and preserving the buildings if it could not be preserved. Please give it priority!

1662 - Lucian Nightingale

I think the council should: (1) work to include funding for the Arts Centre, in the Long Term Plan; >>> These buildings represent and embody Christchurch's heritage and make the city a desirable and vibrant place. With the earthquakes we lost a great deal of these buildings, meaning those which remain are precious. With respect to the Cathedral, personally I am not religious, however, I think it is an important symbol of the city. As a young and recent home owner (with a young family as well), buying a house here was a vote of confidence in what makes our city special. I would be open to the idea of increasing rates so that we could invest further in buildings and events which make our city more attractive and better place to live. This would be a additional financial burden but would be worth it to live in (and raise a family in) a more vibrant city. All in all I think the council should be brave and have a bold vision for our city (which may involve spending a bit more).

>>>

You gotta fund the Arts Centre

1665 - Elizabeth Leitch

#savetheartscentre The arts are a vital part of a thriving and diverse community. The Arts Centre supports Christchurch by providing these opportunities and restoring historic buildings to keep the story of this area alive. Cutting funding to the Arts Centre will have a negative impact on Christchurch and arts in the community. Do not cut funding!

167 - Zara Garlick

I think that there should be funding for the Art Centre. It is an incredibly unique and amazing space both architecturally and as a community hub. I love going to this space either for food, the events the

Art Centre hosts. I think in a place where we have lost so much from the earthquakes we should protect and treasure what we still have for both the current and future generations.

>>>

I think not allocating funding for the Art Centre is shortsighted and will cost ratepayers more in the long run.

>>>

I Do agree with most of the priorities but not having the art Centre included in the parks, heritage & the coastal environment is wrong in my opinion.

1670 - Juliet Robertson

The Arts Centre should be included in the funding plan

>>>

[Spending > Te Kaha]

Te Kaha should not be prioritised over The Arts Centre

1673 - Rebecca Bayliss

[Grants & Funding > Orana Park Funding]

It must be a hard balancing act but both the Arts Centre and Orana Park desperately need council backing. The Arts Centre because of its historical and artistic/cultural significance and Orana park because it's a huge draw card for Canterbury and does vital conservation work. I've been going there since it opened in the 1970s, my son now goes there, and the work the park does is so important. From an educational perspective having been on school trips there, it's crucial to teaching our tamariki to save our planet and animals.

1674 - Susan Galbraith

No. You have completely abandoned the art centre

>>>

[Rates > Residential Rates], [Art Galleries & Museums > Museums (Capital)], [Transport > Cycleways (Capital)]

You are happy to waste money on red zone bridges and destroying Harewood road with cycle lanes plus contesting it with only one lane each side. Stop this wasteful spending. 13% hike for unnecessary extras when you should instead Take care of iconic heritance buildings like the arts centre and museum. I am not against an increase in my rates but I am against it being that much on crap ideology.

1676 - James Boland

[Strategic Direction>Have we got the balance right]; [Strategic Direction>Climate Change]; [Planning & Strategic Transport, Urban Design, & Urban Regeneration>Greater Christchurch Partnership]

No. Need to commit more to climate adaptation works. Need to retain funding for the Arts Centre. Where is the mention of funding for feasibility of mass rapid transport? Should that be listed in the LTP?

>>>

[Strategic Direction>Climate Change]

As already said, need to prioritise climate adaptation works urgently, and retain funding for the Arts Centre.

>>>

[Strategic direction>Climate Change]; [Libraries>Libraries (Capital)]; [Transport>Roads (Capital)]; [Spending>Our Proposed Spending]

No. Move money from Libraries and Road Maintenance program to climate adaptation works and funding the Arts Centre.

168 - Brydie Lauder
Save the Arts Centre!

1681 - Barry Morton

Maintain the funding to the Christchurch Arts Centre.

1682 - Ruby Perring

[Strategic Direction>Have we got the balance right?]

No, fund the art centre

>>>

Keep funding for the art centre

>>>

Keep funding for the art centre

>>>

Keep funding for the art centre

>>>

Keep funding for the art centre

>>>

Keep funding for the art centre

>>>

Keep funding for the art centre, it is such a valueble space for many communities in our city

1686 - Blake Teague-Dolan

It's Taonga, it's our culture, a part of our history. To defund The Arts Centre is to dishonour the tipuna me whakapapa of our city. The arts are not optional and the events, displays and what the Centre offers creatives are not things that can be neglected, replaced or 'picked back up' later on. The centre is a core part of Ōtautahi and offers so much to both locals and visitors, please don't leave it to die.

1687 - Sarah Cooper

[Grants & Funding>Orana Park Funding]

Funding for Orana Park and Arts Centre need to be included in the LTP

>>>

The Art Centre is of immense importance to Christchurch with its history and architecture. As a born and bred Cantabrian I have spent hours here throughout my life and want my children and grandchildren to be able to do the same.

1689 - Josiah Morgan

We need to see more investment in The Arts Centre, a valuable Christchurch institution. The Arts Centre is a vital asset for the arts not just in Christchurch but in the entirety of the country. The Council would be blind to leave Arts Centre funding out when it's a crucial hub for community, creative practice and economic potential. Plus the heritage rebuild is still going on and nearly finished! It's honestly kind of hard to believe this oversight on the council's behalf.

>>>

It really matters to me that The Arts Centre exists in Christchurch. I go nearly every week and I would seriously consider moving city without its fully operational presence.

169 - Helen Hanson

How can you possibly be considering stopping the funding for the Arts Centre, this is shortsighted and ridiculous. The Arts Centre is back as ChCh's bustling hub of cafes, galleries, markets and associated activities...it is highly supported and attended and it is most short sighted of the council to contemplate ceasing funding for this iconic and thriving set of buildings. Plain and simple funding should remain in place...anything else is idiocy!

1691 - Jesse Newman

Removing funding from the Arts Centre is likewise a short term decision that will ultimately cost the city more in the long run while failing to value the immense contribution the Arts Centre makes to residents and tourists alike.

>>>

I would hope to see the Arts Centre able to be funded within the heritage allocation.

1696 - Natalie Brannigan

>>> would like to see funding for the Arts Centre which continues to be a fantastic space for our city.
[Capital Programme (General)]

To meet the goals of a collaborative and culturally vibrant city I think the Arts Centre should be provided with the regular funding it requires to run.

170 - Jeff Clark

Don't cut funding to the Arts Centre

>>>

The Arts Centre needs funding as do other arts organisations

1702 - Laura Xavier

No funding for the Arts Centre seems to be mentioned in the plan. This iconic place is a landmark in central Christchurch and if no funding is allocated, we will lose a major asset as a community.

Make sure you fund the Arts Centre and other existing cultural assets.

171 - Anna Rogers

The Arts Centre is a taonga of this city, with a long and significant history, and its existence was hard fought for. I spent three of my four university years there and before the earthquakes I had an office in the Physics Building. This lovely and special place must be supported as a centre for the arts and the people of Christchurch.

1713 - Tu Ryde

I would like the council to continue funding the Christchurch arts centre as it's a very iconic heart of Christchurch and I have a lot of fond memories of it. And would love to be able to go there in the future and enjoy what goodness it has.

1725 - Celina Nogueira

The Arts Centre is an essential part of our city. Cutting its funding would put in jeopardy a lot of great opportunities and developments within the creative community of Ōtautahi Christchurch, which is crucial to keep our city and our people thriving.

173 - Mike Wicksteed

As a visitor to the City's splendid arts centre when back in NZ from time to time, I'm really disappointed to note that funding for the centre has been omitted from the plan. That may have been an oversight, or maybe not. Whatever, could consideration be given to funding this fabulous facility which is on a par with similar centres overseas? It is a credit to Christchurch and something in which the City can take great pride. Please reconsider.

174 - Joe Cole

Must continue funding the arts centre

>>>

Arts centre must be funded.

1740 - Rosalie Hughes

The Arts center is a critical piece of Christchurch. Adding colour and vive to the city it is critical that it receives funding (as per current agreement) to continue on at the calibre it currently holds

>>>

You should be including the arts center in your funding budget

175 - Matthew Watson

I support continued funding of the Arts Centre by CCC. If the trust folds, the Chch ratepayer will be left holding the bag anyway, and in CCC hands the Arts Centre is less likely to receive generous philanthropic contributions. The trust is doing a fantastic job, and it would be a shame for this absolute gem of a facility to experience any financial disruptions.

1753 - Claire Mcsherry

The council needs to support the arts centre more. It is an amazing asset and is the first place that we recommend to people visiting from out of town. We spend lots of time there as a family with young children as there is something for everyone.

>>>

Support the arts centre!

1755 - Jenny Heffer

This is a great tourist attraction so we need the Art Centre to keep doing what it has been doing. Staying open

1756 - Kieran Sweetman

[Grants & Funding - Orana Park Funding], [Other/Special Interest Topics - Cathedral]

Please, please please preserve and sustain our cherished attractions. Top of list is Orana Park. Then the Arts Centre. Then the Cathedral. Don't let these go.

1759 - Lorraine and Ross Gray

Ross and I think it is of the utmost importance that the council continue to support the Arts Centre financially. The Arts Centre is one of the city's most beloved and iconic complexes - beloved not only by Christchurch citizens but also nationwide and abroad. It is a huge drawcard to visitors and tourists, but also provides many different venues and backdrops for a huge variety of community activities. It brings people together. Especially in a city which has lost so much of its character and heritage through wanton destruction of its iconic heritage buildings, it is utterly vital that the Arts Centre buildings continue to thrive.

176 - Jay Scanlon

Yes, please. Sustaining the operation of the Arts Centre is crucial. Several hundred \$000 of private and public money and a vast amount of effort, innovation and intelligence has been invested in restoring and renew this scintillating piece of human scale architecture. More than the Anglican cathedral or isolated vestiges of our city's heritage, the Christchurch Arts Centre is our city's stunning and most successful post-EQ project. Now, the most economical way for the CCC to sustain this asset is continuing to allow a collaborative not-for-profit to operate the Arts Centre. And modestly contribute City funding.

1760 - Angus Bromley

More funding for the Arts Centre.

177 - Vanessa Grenfell

I want the CCCouncil to support The Arts Centre, because it is a wonderfully distinctive asset to our city which I have thoroughly enjoyed on many levels, from my first year at University, through lessons and recitals with Southern Ballet for my children, music and events in The Great Hall, The Court and Academy Theatres plus drama outdoors in the quad, hours spent in Le Cafe and Dux de Luxe and at the unique market, as well as the variety of boutique shops, and also the educational opportunities provided there, such as silver jewellery classes I attended. I love the history of the Arts Centre and the look of its beautiful buildings, as do many visitors to the City. The Arts Centre is a central area, easily reached by its citizens and by visitors to the City. It is the creative heart and heritage of our City which is now getting back on it's feet after the devastation of the earthquakes. I personally, would be mortified to lose such a treasure, which actually belongs to our Citizens, and I will not stand back and see it go into private hands, or be divvied up, if I can possibly help it as it would be a tremendous loss for our present and our future. I also believe The Arts Centre will end up costing Christchurch citizens even more than the current required amount of \$1.8 million for insurance if our City Council is forced to take over its assets, due to the loss of donations, grants, sponsorship and goodwill that currently support it.

1772 - Mark Bradley

I am very concerned about the cessation of funding for the Arts Centre. I know the centre is an important destination for tourists and does a good job at presenting the rich cultural history of our city. Furthermore, I am concerned the council will end up in a worse financial position. If the trust is forced to wind up then much of the revenue generated from the site will also dry up. Unless the council plans to sell the site it will still need to pay for the upkeep of these buildings, but with less revenue to offset the expenses.

1776 - Janice Tedder

Please could council support the art centre. It's an asset to local people and children. It's always a go to place. If we do not support the Art centre, Christchurch will loose a major attraction.

1779 - Connor Ellison

Funding should be given to the continued operation of the Arts Centre. This is a critical asset to the city and should continue to be funded by the council to ensure its' continued operation/maintenance. I believe it is critical that the \$1.8 million of funding to the Arts Centre is reinstated in the long term plan.

1780 - Alison Griffith-Collins

Sport/recreation gets much more than cultural activities. Both are needed for a vibrant community. The refurbishment of the Arts Centre since the quakes is one of the best investments the Council has

made. Every day there are overseas tourists, residents, children, and people who work in the Arts Centre enjoying it. It's true that insurance of heritage properties costs a lot, but \$1.8 million is nothing compared to what is spent on sports facilities and parks. Council members need to come see what happens in the Arts Centre on the average day. People enjoy it, and they spend money in it. The Council needs to commit to fixing the rest of it and helping support the operational costs because the Arts Centre and its businesses are key to supporting overseas tourism, which is a primary industry for New Zealand.

1784 - Joanna Chan

It has come to my attention that you will no longer be funding the Arts Centre. In order to encourage a diverse place for people to live funding the arts is an important part of the culture of Christchurch. I would assume you are removing this funding in order to pay for the new rugby stadium which only serves some of the population here. This place is conservative enough without removing one of the places in which creatives can feel a bit of freedom.

>>>

Save the Arts Centre and continuing funding arts and culture.

>>>

Our priorities shouldn't just serve one type of Cantabrian but should provide options for all. Funding should be given back to the Arts Centre.

>>>

Save the Art's Centre

1786 - Anna Green

Re: Arts Centre I have great memories of the Art Centre from my childhood onwards. Its is a special part of the city centre and should be thriving. However, as a current business owner in the city centre, I completely oppose supporting the Art Centre to the value of \$1.8M. After reading the Save The Arts Centre plea online combined with my local knowledge, here's why:- * highly paid CEO * 4 managers * 1 million visitors p.a. *over 70 entities *3 significant anchor tenants What KPI's does the CEO & Managers have to achieve annually? That is very top heavy management and with that team there should be significantly better financial performance. Why is it not making money with over 1million visitors per annum? Something is seriously wrong with the whole model then. It needs a complete overhaul. You only need to extract \$2 per visitor and you've covered your shortfall... 70 entities and 3 big anchor tenants should be more than enough for this center to thrive. There is a list online of things DONE by the Art Centre Trust already, where is the list of things NOT done yet? It is an unfair advantage to the rest of the city to additionally fund the Arts Centre, as a business owner I'm subsidising my competitors basically. In the current economic situation, that is a double slap on the face. I think there

needs to be a serious "back to the drawing board" about the whole complex. It should be absolutely amazing and pumping into the economy - after all, architecturally its second to none in the city centre....

1792 - Laura Parkes

[Recreation, Sports & Events - Recreation Centres (Capital)]

There is a massive disparity between "sports and recreation" and "the arts". While I appreciate that sport and recreation is important I think it is necessary to consider the importance of the arts within the culture and community of Otautahi. The arts has proven to be vital to our healing as a community and our ability to process traumatic events in recent history such as the earthquakes and the mosque shootings. They can serve as an important means of expanding our views and understanding others, which is especially important in the current world climate which unfortunately promotes divisiveness and bigotry. They are a haven for marginalised communities, where they can express themselves in a safe environment and be empathised with and understood. As a disabled member of the LGBT community the arts community has provided me with a community that is open-minded and supportive, whereas sport is often something I am unable to participate in or deliberately excluded from. Sports recreation spaces are often filled with judgement towards those of differing physical capabilities. Arts centres and museums are also vital to our children. Providing opportunities to expand their knowledge and worldview. Safely exposing them to different perspectives both current and historical and allowing expression of their own perspective and ideas. I believe their should be a greater focus on the arts and museums moving forward.

>>>

[Fees & Charges - Car Parking (Parks)]

I believe that adding fees to parking areas in key parks would have a negative impact on many at risk communities. The lessening of funding to the arts will compound this impact.

>>>

The arts are under appreciated within this plan.

1798 - Heidi Morrow

While I appreciate the importance of maintaining our infrastructure, and am excited to see the current stadium & metro center project reaching completion, I believe a great source of pride for cantabrians are our historic buildings. I believe these areas, in particular the Arts Centre, should be receiving continued funding.

>>>

I am shocked to hear that the council is proposing that there be no future funding to the Arts Centre in the LTP. The Arts Centre is such a large part of Christchurch's identity, and has done an incredible job in rebuilding after the earthquakes. I spend a lot of time enjoying the Arts Centre, and am always delighted to see so many other people, both residents and tourists enjoying it too. Considering the sad state of the Cathedral, I believe the council should be focusing on supporting the Arts Centre to continue their efforts to activate our iconic heritage site.

1800 - Judith Deans

I would support money being given to the Arts Centre.

1802 - Leah Cameron-Humphreys (The Garden City Māketē)

I write with deep concern regarding the recent decision by the council to cease funding for the Arts Centre. This decision, if implemented, would have significant and detrimental effects on our community. As someone deeply invested in the cultural and artistic vibrancy of Christchurch, I urge you to reconsider this action. The Arts Centre holds a special place in the hearts of many Christchurch residents, myself included. It is a vital hub for artistic expression, creativity, and community engagement. Memories are woven into its very fabric, and it stands as a testament to the resilience and spirit of our city. I am currently in the process of starting up a weekly market at the Arts Centre, set to launch in early May. Our trial market in February was a resounding success, with over 5,000 customers throughout the day and more than 120 artisans participating. The overwhelming response from locals underscores the deep connection we all share with this iconic venue. The Arts Centre is not just a collection of buildings; it is a living, breathing testament to our cultural arts heritage and a beacon of hope and inspiration for future generations. I implore you to reconsider the decision to defund this and instead work towards securing its future for the benefit of all Christchurch residents.

1804 - Ian Sweeney

The Art Centre and Screen Canterbury are underfunded. I don't see a meaningful investment in the arts in your future plans.

>>>

The Arts Centre is such an important part of the city. Not just because it's part of our history, but because of all the fantastic things that happen there. It's a big part of our family life. It's a creative hub. It needs to be part of our future.

1807 - Sarah Harmon

Please fund the Arts Centre. I have volunteered at the Arts Centre since losing my job while on parental leave last year. This role has been my only space outside of first time motherhood to connect with my passions and interests. It is vital to my mental health and wellbeing. I love being able to exercise my memory recalling the site's history, connecting with local and international visitors to make a positive, passionate interaction about the site and Christchurch as a whole. I feel so valued in my work, and I can't imagine contributing so meaningfully elsewhere. I also regularly attend free and paid events at the Arts Centre, it is my main cultural touchstone in the city. The free events allow me to access music and theatre at a time when my financial situation would not allow it. The children's events have been a wonderful way to introduce my son to music and theatre, enriching his early development. Please, please fund the Arts Centre.

181 - Pearlin Jacob

Yes the Art centre needs to be funded. It is a multi cultural centre that is one of the beautiful heritage buildings of Christchurch. It is the home of art and culture and Christchurch's own identity. Donot destroy a good thing .

1813 - Jenny May

I wish to lodge a submission opposing the removal of the Arts Centre of Christchurch's funding from the Long Term Plan. This is a significant community asset that brings a large number of locals and visitors into the City. It is part of the Cultural Precinct that includes the Museum, Christ's College and the Cathedral being one of the most nationally significant group of Gothic buildings in New Zealand. Its cultural heritage significance is not up for debate but its future is. I respectfully wish to remind the Council that in 1973 at the centennial celebrations of Canterbury University, who were vacating the site, the then Prime Minister Norman Kirk announced that the buildings were to be gifted to the people of Christchurch to used as an Arts Centre. The key words here are 'gifted to the people of Christchurch'. Such gifts carry the responsibility of stewardship by one generation for another generation. Thus, it is important that through the responsible stewardship of the elected Councillors, for they are the representatives of the people of Christchurch, that a percentage of the rates of the people of Christchurch are apportioned annually to ensure that this gift of these buildings are fiscally supported to function in the spirit they were given; an Arts Centre for the people of this City. It is currently a well-managed and appropriately governed entity but as with all arts and heritage budlings and organisations it needs financial support from the Council and the wider community to do so. Please reinstate the Arts Centre's funding within the Long Term Plan.

1817 - Qyana Curry

The Arts Centre has become an integral part of the City Centre! Not only a centre for the Arts, it hosts a number of independent food trucks, stores and galleries. I come here for University as well and love the place.

182 - Charlie Johnson

fund the arts centre! its important both now and as a historical sight

1821 - Angela Clifford

Save our Arts Centre!

>>>

Save our Arts Centre! Such an important beautiful centre for our city, especially as the cathedral stalls.

>>>

With no cathedral & no museum and after over a decade of rebuilding our city, please can we have a fully functional, beautiful beating heart of Ōtautahi like the Arts Centre?

183 - Alex Waitoa

The decision to leave The Arts Centre is unfair and will be detrimental long term for the future of Ōtautahi. The arts are the life blood of this city and places like the Arts Centre foster and provide spaces for artists to grow, create and perform, bringing joy to the people of this city and the people who visit from afar. Please reconsider and include funding for the Arts Centre.

1830 - Peter Dobbs

Please continue to fund the Arts Centre

>>>

Please continue funding the Arts Centre. The Arts Centre is an incredibly important part of what makes Christchurch the city it is. We need to ensure the Art Centre thrives so that people today and well into the future can learn, explore and enjoy it. Fund the Arts Centre.

184 - Rebecca Nicholls

Please please fund the art centre. I take all visitors to chch there. I shop there, I visit galleries there, I watch movies there, I eat there, I did courses there, I sit and contemplate the big trees and the craftsmanship of the buildings. It is the jewel of the city. Nothing should jeopardise this fabulous place.

>>>

Doing well EXCEPT ARTS CENTRE FUNDING. Please don't stop funding this absolutely iconic place.

>>>

Happy to pay more for the greee as t chch attractions like the arts centre

>>>

>>> the Arts centre!!!!

>>>

Mostly. Water needs money spent on it!!! But so does the arts centre.

>>>

Arts centre!! Please fund. I love this space. It's where I take ALL my out of town visitors and spend time myself.

>>>

Please fund the Arts centre. It IS chch to me.

185 - Ronan Wilson

I'm not very knowledgeable on the other aspect of ratepaying and what not, however I think the exclusion of the arts centre in the funding is a big discrepancy. I think the council should continue to fund the arts centre which in my mind is such an influential space for the arts in all of Ōtautahi. I've been to many exhibition opening at the Physics room which is a wonderful gathering space, I've had such nice experiences there and I've gotten to speak so many people I otherwise wouldn't have. Lumiere which is by far my favourite movie theatre in town, I've been to so many lovely films both domestic and international that do not play elsewhere! I've also loved the coffee available at both cafes within the centre some of the best I've had and very inviting spaces. I've also take my niece to see the galleries on offer and Rutherfords den, both of which she raved about and expressed her desire to visit again. I personally think the council would be silly to discontinue their funding of the arts centre given how unique of a space it is to Ōtautahi and the youth of the city. Humbly yours, a ginger boy named Ronan

186 - Ian Town

SAVE THE ARTS CENTRE It is breathtaking that the LTDP does not include an ongoing contribution to the Arts Centre - now an increasingly vibrant attraction for locals and visitors alike. The refurbishment is to the highest standard and the new tenancies all adding revenue. It is self evident that the complex cannot completely cover its costs and we simply cannot let the Trust fail. Please reinstate the grant in

perpetuity.

187 - John Draper

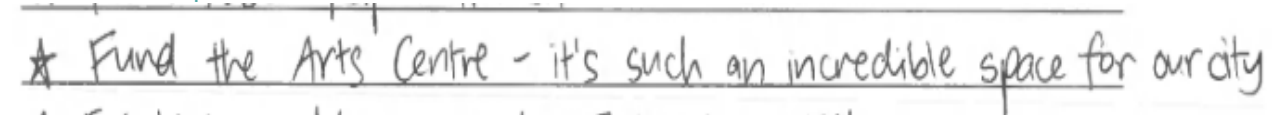

Not when you are neglecting the Arts Centre, it is a gem.

Spend more on the Arts Centre

1873 - Marjorie Manthei (Victoria Neighbourhood Association Inc)

After our formal consultation, we received unsolicited comments from members about the Arts Centre. Everyone who contacted us (approximately 25 members) said the CCC MUST continue to fund the Arts Centre. It is an important asset for the city, but is also close enough to our neighbourhood to be of particular relevance to our members. We URGE CCC to confirm ongoing funding at the current level, to ensure long-term viability.

1876 - Mika Clapson

* Fund the Arts Centre - it's such an incredible space for our city

1877 - Mani Ra

The arts centre is one of a handful of cultural sites which give Christchurch character. It is an important venue for arts. With similar importance to the museum and gallery. It is one of the places I show people when they are visiting for the first time. I believe it is absolutely worth supporting and would be a terrible shame to lose it.

188 - Tony MacHarper

Strongly urge funding to the Art Centre to be at a level which allows it to continue to operate at the present or an increased level. Its presence provides a real boost to the general CBD area and it appears to be the type of physical and cultural asset which other major centres in NZ cannot offer their visitors.

1881 - Giulia Naspì

Please consider the Arts Centre in your plan.

1882 - Anna-Marie Browne

[Transport>Public Transport Infrastructure (Capital)]; [Transport>Cycleways (Capital)]; [Recreation, Sports & Events>Community Arts]; [Three Waters>Stormwater & Land Drainage (Capital)]; [Strategic Direction>Have we got the balance right?]; [Other/Special Interest Topics>Public Transport]; [Transport>Transport (Operations)]

Has CCC got the balance between its services and rates right?

No, the CCC is not doing enough in services.
I think there should be more funding for bus lanes,
bike lanes, flood protection, the Arts Centre,
cultural and entertainment ^{and} mental health initiatives.
The CCC should also fund more electric buses ~~and~~
Rates establish free public WiFi in the bus interchange
^{and create more electric car charging stations.}
Should the council increase rates in order to maintain existing services?
 Yes No

1886 - Judith Dawson

I was sad to hear about the planned zero funding for the Art Centre, and believe this is a mistake.

>>>

Funding for the Art Centre should be prioritised if at all possible - its value to the city is immeasurable

1891 - Maree Roan

The arts centre is the heart of our post-quake city with not much else left as history of before it.
Without it we would have nothing

1893 - Elizabeth Sinclair

[Grants & Funding - Orana Park Funding]

Don't forget about key places for the community such as Orana park and the Arts centre that have value for residents, visitors to Christchurch, education, heritage and conservation work.

1894 - Peter Moody

I agree with investing in long term items that benefit the community ie The Arts Centre

>>>

It is important to maintain existing levels of service for facilities that cannot be recovered once they are gone ie The Arts Centre

>>>

A thriving, inclusive and sustainable city should include a viable Arts Centre.

>>>

Council should support the Arts Centre. It was saved from demolition in the 1970 and has been a community asset ever since. It is the largest collection of heritage buildings in NZ and Christchurch should be proud of that. It is used more frequently than either the Cathedral or the Stadium.

>>>

Preserve what we have ie The Arts Centre

190 - Darian Troon

Heritage such as the Arts Centre are an incredible tourist attraction, great for education for young people and add to the vibrancy of the city.

>>>

Don't close the Arts Centre!

>>>

We shouldn't divest from Arts and Heritage. People are already depressed because of financial hardship and we should cherish these things. The museum is closed so the Arts Centre is crucial at this time.

1902 - Elizabeth Davidson

I want Council to support the Arts Centre and to continue to fund it. The Arts Centre is a foundational cornerstone of our city. Not only is it a heritage treasure in a city that has few left, but it is a community hub for arts, culture, and creativity. It's also one of the great tourism draws of our city ... again, we don't have many, so we can't be cavalier with those we have. The Arts Centre holds a special place in the hearts of many Cantabrians. As it rose from the rubble after the earthquakes it symbolised

our own resilience. For this national heritage treasure and community taonga to be abandoned to become an empty shell for the want of a small amount of community funding is woefully shortsighted to the point of negligent. May I suggest, now that the Cathedral build has stalled due to budget blow out, that the public funds misdirected to that minority interest project be redirected to this substantial community asset.

1904 - Maria Lee

the arts are an important part of any thriving community and we need/want the Arts Centre to continue and grow. This should be seen as an asset to the council rather than a liability.

>>>

Fund the arts centre

>>>

[Libraries - Libraries (Operations)], [Parks - Spending (General)]

City's need public services such as libraries, parks, and the arts, don't cut their funding.

1908 - Amanda Gostomski

The Arts Centre is critical to Chch's culture and bounce back from the earthquake. Without it, Chch will return to the dead place it was after the earthquakes.

1913 - Liz Meek

[Spending > Te Kaha], [Revenue > Other]

You must keep finding the arts centre - it is one of the few places left in the city post-quake that allows an organic development of small businesses, creative events and ideas, all in a wonderfully appropriate building that links the more generic gallery and museum. The Arts Centre is somewhere I always take guests, and visit at least once a month, going out of my way to use it.

192 - Caroline Oliver

As a supporter of the Arts Centre and its many attractions (i attend concerts in the Great Hall regularly and the movies and anything else of interest) I am appalled that grants to the ARTs Centre may stop. As a Trust they have raised \$9m in the last few years - how could the CCC if it reverted to them compete with that expertise? These beautifully restored buildings are central to Chch and its tourism -

give them the support they need.

1920 - Jennifer Down

Continue to fund the arts Centre. The work it has taken to bring this beautiful Christchurch Treasure back to life must be respected. I've lived in Christchurch most of my life and would feel very sad to see it let go. Just tonight I spent my evening at the art centre. It is my favourite part of the city and should continue to be owned and managed by the city.

1921 - Harry Lawrence

Keep the funding for the Arts Centre. It is a vital resource for the cultural and artistic community in Christchurch. It is unacceptable to be removing the arts from our city in such a callous manner.

1922 - Tane Down

I would like the council to support the Art Centre. I am originally from Wellington, but have been a resident of Christchurch since 2007, in that time some of my fondest memories have been associated with the Art Centre, from the stunning architecture (The Great Hall), boutique shops and entertainment.

1923 - Matilda Moran

I really enjoy visiting the arts center and seeing all of the cool and unique shops that make the place fun. The building itself is really cool and an awesome part of the history of Christchurch and I think that the shops inside and around are better as a collective in the arts center then if they were to be a single shop in a mall etc.

1925 - Brittany Bastings

You cannot, absolutely CANNOT stop the funding for the Arts Centre. What a beautiful space this is, let alone having it all done up, and offices being put in a year ago, then what - done?? Not funding the Arts Centre is fundamentally giving up on the city. It'll end up like the shambles and the embarrassment of the cathedral ruins that are still sitting there as an eyesore for the city.

>>>

Prioritise the arts centre, it will save the city, otherwise there's no point in even trying to bring people to the city.

193 - Anne Mahan

Not sure but very shortsighted to not fund the arts centre to at least to the same level, if not more. It is a major drawcard for both tourists and locals to the city centre.

1933 - Aidan Moody

[Three Waters > Other]

Provided this includes continued funding of the arts and in particular the arts centre, and prioritising water. As a rate payer I find my rates give me very little value for money .

>>>

Continue funding of the arts centre .

194 - John Lieswyn

I believe it is worth a few extra pennies a week to support the Arts Centre, and at a higher level than previously - it's a gem of our city and needs to be fully completed. Major tourism benefits.

1940 - Enrica Sciarrino

I am concerned with the arts centre; the council should support it as a core location for the city and its citizens. As outlined by the Arts centre trust, this place is thriving: -One million visitors per year (includes local residents, national and international visitors). -Community-funded, multi-cultural events year round, from kapa haka to opera, music from the Muslim world to jazz, hip hop dance to ballet, Sculpture and Matariki festivals to children's theatre and circus arts. -Education programmes for school children in Christchurch and beyond (funded by the Ministry of Education). -Home of over 70 entities covering arts, performance, creatives, entertainment, cinema, food and beverage, education, two museums, Te Whare Tapere Māori arts space, and (opening in June) the Ngāi Tahu creation story. -Many tenants have a loyal and repeat customer base and new customers encounter the centre all the time. -Anchor tenants include the University of Canterbury, The Observatory Hotel, and the Health Technology Centre (seen by ChristchurchNZ as an economic driver of the city). Restoration of 20 heritage buildings delivered on time and on budget.

1943 - Harriet Scott

[Parks > Heritage (Capital)], [Transport > Cycleways (Capital)], [Spending > Te Kaha]

Keep funding for The Arts Centre - so much money has been wasted on sports stadiums, facilities & cycle ways - culture & heritage buildings are also such an important part of our city! Don't lose them

>>>

This space carries huge heritage & brings people together in the centre of our city. It would be a huge loss to tourism (so photogenic) as well as the hospitality scene to lose such well-positioned cafes, wine bars, market stalls & boutique cinema, and finally a massive loss to the Arts - so many plays, music performances etc happen there currently & are acoustically better for it!! Having invested so much in restoration it'd be mad to let it subsequently fall to ruin by withdrawing all funding it is reliant on.

1945 - Lucy Howell

[Strategic Direction > Have we got the balance right?], [Strategic Direction > Climate Change]

No. Not enough money is being put towards climate mitigation. More funding should be put into public transportation and cycle ways. The current plan would not reach the emission goals of the CCC (halved by 2030). It also does not support enough community spaces such as the arts centre.

1947 - Zoe Corrigan

NO, we need funding for the arts centre.

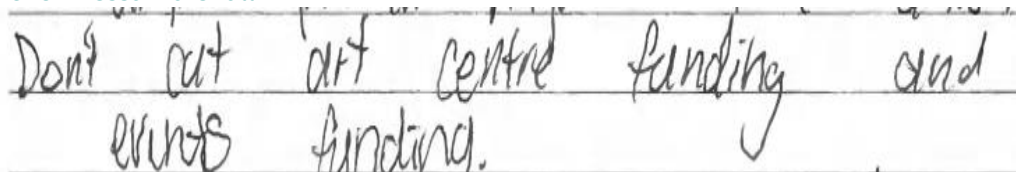

>>>

It is important that we still fund the Art's Centre

>>>

Just that it is very important that we still have funding towards the Art's Centre.

1949 - Tessa Marshall

Don't cut art centre funding and events funding.

1952 - Xin Yi Wong

[Other/Special Interest Topics > Cathedral]

I also feel that the balance is not quite right on spending on the Cathedral and not the Arts Centre. The Arts Centre is a more publicly accessible asset for the city which provides community benefits in its events programme and value as a public space. The Cathedral on the other hand does not provide such wide-reaching community benefits.

>>>

I've heard it is proposed that the Arts Centre will not receive funding which I feel is not the right decision as the Arts Centre is quite an important community hub and has been for years; whereas any funding for the Cathedral I would be less supportive of. I would prefer my rates go towards projects that have a wide and proven community focus (which I would not say for the Cathedral).

1955 - Maxine Burney

The Christchurch Arts Centre, Te Matatiki Toi Ora is on the New Zealand and Global stage as being Christchurch's No 1 Tourist attraction, along with the Botanic Gardens. The people of Christchurch need to be able to have trust in Christchurch City Council to continue to do it's best to support, acknowledge, help and maintain our Iconic, 'on the World Map', Unique, most visited, much admired, living, breathing, working Arts Centre. In such a shifting changing world, many find solace, pleasure and a sense of history and whatever else; in wandering around and into The Arts Centre buildings, businesses, functions, performances, cafes etc (especially as a Heritage site of which there are few in NZ); as much as they find in wandering around our Natural neighbour, The Botanic Gardens. Another of our neighbours is The Christchurch Hospital; and many staff, patient visitors and patients find their way to The Arts Centre for some respite from health issues which Art and culture offers. From a personal perspective, I am a tenant at the Arts Centre. I was born and bred in Christchurch but having lived in other NZ cities and overseas, I returned in 1997 to excitedly rent my 1st Art Studio at The Arts Centre. The Arts Centre provided me and other creatives with the space, non judgementalism and open mindedness to 'come out' as an Artist. I stayed until the 2011 Earthquakes forced everyone's lives to change. In that 14 years at The AC; I actively created, exhibited and sold original art on site and off, drew live Portraits in the market, worked at Art on the Railings, taught art in my Studio and off site, taught 8 years of Kids Fest and took on commissions. I shifted Studios to work alongside other creatives in varying disciplines in The Artist Quarter. Throughout this time The Arts Centre was always very supportive, welcoming and inclusive; as it is now. With the subsequent and totally decisive EQ of 2011; the rebuild and reshuffle, re everything going on in the City, it has been comforting to many that The Arts Centre was not demolished, nor lain neglected. It is constantly growing and shifting with the times. It is well managed with a dedicated, highly professional staff. Once the buildings started getting restored, myself and other artists jumped at the chance to exhibit here again in groups. A space became vacant and I happily rejoined the AC as a Studio & Gallery tenant in April 2021. Three years on, I continue to create, take commissions, exhibit and sell my work both on site and off, teaching art as time allows. Other creatives come in also, to exhibit &/or work alongside me; the space providing a light filled ambience to encourage productivity. Greeting visitors is part of being and working at The Arts Centre. Often this is overseas visitors 1st port of call in both Christchurch and New Zealand, thus making it a very important and often impressive part of their NZ journey. The Arts Centre provides a point of connection with our locals and the outside world. The idea of not being able to continue due

to an Insurance crisis that is affecting everyone is unthinkable. It would be like another death for Christchurch...when we have so much to offer. The Arts Centre is a unique environment in which to work, despite the usual ups and downs of one's working life. AND, we all want it to continue. Trusting that Christchurch City Council will do its best for The Arts Centre, Christchurch and the World.

197 - Emily Fryer

The Arts Centre is an integral part of the city and removing funding from the council will affect their work considerably and affect the local area. Removal of their funding should be reconsidered.

1975 - Trish Perkins

My husband and I would like the CCC to continue with the funding of The Arts Centre. The Arts Centre is the heart of the inner city and contains great Christchurch historical value. It is a place that we either visit or pass through on a very regular basis and we use the movie theatre, The Great Hall and the shops in the Old Boys High site often. It is the first stop for our visitors and family when visiting Christchurch. The old Dux site should be resurrected immediately and run as a business concern to create ready revenue. It would be a very sad day to see this asset ownership change.

1976 - Amanda Henderson

While I am happy to note that there is provision for the Canterbury Provincial Chambers in the DLTP, I am concerned that there is no provision for continued support and funding for the Arts Centre. If we want Christchurch to be a 'cultural power house' and a city which values its 'heritage' then the Council must continue to support the Arts Centre. It is an area and group of buildings which is as integral to our Christchurch city history as it is to our future as a city. On a personal level the buildings of the Art Centre have been an integral part of my life since my high school days in the 70s. Now they are a place for enjoyment and leisure for me as well as one of the places I always take visiting friends and family to see.

1977 - Nicholas Lealand

Fund the Arts Centre (and build hundreds more bike stands for it) If you've hung out there, you know how nice it is. If you haven't, now you know. Council's not giving them any more money, so now's the time to ask.

198 - Ning He

Save Te Matatiki Toi Ora The Arts Centre from becoming an liability by keeping the trust solvent

1984 - Chenille Anderson

~~1989~~
Fund Art centre.

1989 - Hannah Collins

No. You are failing Christchurch by cutting all funds to the arts centre, which is appalling in so many ways.

>>>

Removing all crucial from the arts centre is a major regrettable decision to make. A substantial amount was spent to restore it so why waste that investment either? It makes no logical sense to me as someone who has studied the immense impact the arts centre makes and its renowned heritage architecture, which brings in tourists and thriving businesses that improves our economy as well as overall wellbeing of Christchurch city. Cutting this funding is a major disservice to residents and lacks respect of our cultural heritage

>>>

The arts centre needs its crucial funding of 1.8million. A substantial amount was spent to restore it so why waste that investment either? It makes no logical sense to me as someone who has studied the immense impact the arts centre makes and its renowned heritage architecture, which brings in tourists that improves our economy as well as overall wellbeing of Christchurch city. Cutting this funding is a major disservice to residents and lacks respect of our cultural heritage

199 - Isabelle Lewis

Please find the Arts centre, it is such a beautiful facility. I love that i have memories of going to the theatre in the arts centre as a child, and now i can take my son there too. We went to the Off Centre event earlier in March and it was so fun! We love it so much we are getting married at the great hall and north Quad in December this year 2024.

1991 - Stevie Florent

The Art Centre funding should not be cut.

1996 - Iain Nicholls

Take pride in the Arts Centre. It is part of the heart of the city.

2 - Zed Potgieter

Funding for the Arts Centre in the LTP Ratepayers will most certainly realise the financial pressure that the Council is under in 2024. Point taken. Councillors are urged to consider the negative message being sent to the community in Christchurch, and nationally as well, by not providing funding for the Arts Centre in the Draft LTP. The Arts Centre remains a truly unique historic precinct in the city itself, and in New Zealand. We should not plan for the future without helping to preserve our past. It is inconceivable to me that, by reallocating funding between a myriad of funded options, provision to support the Arts Centre has not yet been identified. Inconceivable. Where there is a will, there will be a way.

200 - Mila Litten

Save the Arts Centre!!! Creativity, culture and history is so so important and a huge part of Christchurch.

2001 - Leo White

It is critical that The Arts Centre continues to receive funding from the council. It must remain a priority for continual beautification of our city and its significant contribution to arts and culture.

2005 - Barbara Stewart

MY CONCERN IS TOWARDS SUPPORTING THE ARTS CENTRE INTO THE FUTURE, IT IS THE CENTRE PIN OF OUR CENTRE CITY.

>>>

COUNCIL TO GIVE LONG TERM SUPPORT TO ARTS CENTRE RECOGNISING THAT ALONGSIDE ART GALLERY AND MUSEUM THE ART CENTRE IS CENTRAL TO THE BEATING PEOPLE'S HEART AND SOY OF OUR CITY.

>>>

The Arts Centre. I ask to be heard on one subject only in this year's 10-year Annual Plan process. The survival of our unique Arts Centre in Christchurch as it is in its present functioning form. It is beyond belief that this present Council and its advisory staff who work with the Council in all matters overseeing the city's sites and artists who work in the arts field will not continue to recognise the importance of the Christchurch City Council's financial support for the historic buildings and the citizens, both staff and visitors, who work onsite. The central city area, described as the Arts Precinct, from the Cathedral to the Museum, spreads its unique presence around the backbone of Worcester

Boulevard. It broadly encompasses so many creative businesses, one of them being the Christchurch City Council, which I am not sure in this present crisis can be considered appreciative of the community work done within the walls and squares of the Arts Centre. The restoration work which has been achieved since the earthquakes is of the highest standards, but like everything old will need ongoing maintenance. The hard work and commitment of the management and wider staff needs to be recognised. As a most significant site of endless activities, it brings not only a working environment but stages events and opportunities for approximately one million visitors a year. Overall, every business in Christchurch is facing increasingly difficult times. Every cost centre from rates, to power, to insurance, plus salaries and maintenance is rising - this is most certainly not the time to cease the past support of the Arts Centre, it is the time for the Council to recognise and accept that support into the future for this jewel in the centre city is vital. The Arts Centre stands alone and unique not only within our own city community but as a special site for the whole country. It is open most hours of the day and for every season with its education and creative programs. The continuing support of the Arts Centre Trust as presently in place is without question the only way for managing the Arts Centre into the future. There would be an irreversible change if it came under the management of the Christchurch City Council. There is no doubt that into the future there may have to be another positive re-think of the support for the future of the Arts Centre. Concerning this present Annual Plan the community of people working and visiting the Arts Centre and being the appreciative audience of its existence will only grow in admiration for what we treasure in our city's heart. The Christchurch City Council must realise the critical place the Arts Centre's holds in the city and alongside all the other demands that are coming into this budget, the Art Centre should remain a constant recipient now and into the future.

201 - AJ Wade

Defunding the Arts including the Arts Centre, the Court Theatre etc is not acceptable. Funding the Cathedral and the Stadium over the arts is not acceptable. Increase the funding to Canterbury Museum.

>>>

Fund the Arts Centre.

2011 - Lauren Sturm

Art Center!!

Expression and mental health go
hand in hand

2017 - Ellen Batchelor

[Grants & Funding>Orana Park Funding]

Save Orana Park Save the arts centre

202 - Anne Spicer

Please keep funding the Arts Centre as it is essential to the heart and soul of the city. Without a soul Christchurch will wither. Sell off the convention centre and use the money to maintain the Arts Centre.

203 - Mike Vincent

I want Council to support The Arts Centre. In advocating for the ongoing financial support of the Arts Centre, it is essential to highlight its historical significance and current role within Ōtautahi Christchurch. The Arts Centre was generously gifted to the city by Norman Kirk in 1973, embodying the importance of craftsmanship and preserving historic and cultural integrity in our community. Following seismic events, prudent management of insurance funds has facilitated effective restoration efforts, reflecting a commitment to preserving our architectural legacy while maintaining the integrity of its historic and cultural significance. The magnitude and complexity of the repairs undertaken at the Arts Centre cannot be overstated. The seismic upheaval experienced during the sequence of earthquakes posed unparalleled challenges, necessitating the most extensive repair, strengthening, and alteration efforts witnessed in recent New Zealand history for heritage buildings. The subsequent investment and collective efforts of thousands of individuals, businesses, and organisations have been instrumental in the comprehensive restoration and rebuilding of the Arts Centre. Today, the Arts Centre remains a vital cultural hub within Christchurch, contributing to the city's recovery and vitality. Withdrawal of financial support would jeopardise past investments and undermine the Centre's continued operation. I urge the Council to recognise the importance of sustaining the Arts Centre, not only as a physical landmark but as a testament to our cultural identity and community resilience.

2033 - Natalie Galvin

I wish to voice my concern at the lack of funding allocated to the Arts Centre. I have recently returned to NZ after living overseas for the last 15 years, and I can honestly say that I have visited and enjoyed the Arts Centre every single week since my return. It is truly the best part of our city. I constantly check

the Arts Centre website, especially for events that cater for children. My son has ASD and he has been able to attend and enjoy all the events that we have brought him to this year. He especially enjoys the circus school. The space is so safe and the staff we have met across all the venues are very inclusive. Many of my happiest memories from childhood involve the Arts Centre, from attending the markets, to late night hot chocolates, to the buskers festival. It must be able to continue to thrive. Christchurch is at risk of becoming a monoculture, and we will lose the appeal of vibrant artists who bring the eclectic energy that every great city needs. Please reconsider your funding proposal to include the Arts Centre.

2035 - Elizabeth Coady

I want the Council to support The Arts Centre.

>>>

I want the Council to support The Arts Centre.

>>>

I want the Council to support The Arts Centre.

204 - Jo Sewell-Rowe

Please support the Arts Centre it is a wonderful asset to the city and as a rate payer I think it is vital that the council keeps on funding at the same level it has been currently.

2047 - Wara Pascoe

I would love the Council to keep funding The Arts Centre. The Arts Centre is an integral part of our community, for current and future generations of the people of Christchurch. The Arts Centre is also a place that tells stories about Christchurch and provides experiences for visitors. I believe the Arts Centre needs support from the council as it brings the people of Christchurch together and Arts and Culture is vital to our daily lives. I believe the Arts Centre is a living beat of our city and it would be very sad and disappointing if it doesn't get funding.

2049 - Elsie Andrew

The Arts Centre is a hub of culture and creativity in Ōtautahi. To be rid of it would mean to rid our city of a place of beauty and significance.

205 - Denise Erikson

Keep supporting the Art Centre. It is an asset to the city especially now all the historic buildings are few and far between

2056 - Sophia Ambrose

I would like the Arts Centre funding to be included in the Long Term Plan. The Arts Centre needs funding to survive, without it gone we would lose many important cultural events and a crucial artistic outlet. The Arts Centre is a key part of this city.

2057 - Alicia Moggre

Please don't reduce Arts Centre funding. After all the money that has gone in to getting this facility back up and running it seems very shortsighted to stop funding it now when they run such a diverse, vibrant and inclusive range of events that benefits locals and tourists alike.

206 - Shane Morrow

I am appalled at the lack of funding for the Arts Centre

>>>

The council must maintain, if not increase, funding for the Arts Centre. This is a significant and special taonga for our city. It is a major hub that we are very proud of and I am shocked and angry that the council is proposing not to fund it. How short sighted. It is the largest collection of heritage buildings we have left and attracts locals and visitors alike.

2061 - Charlotte Hollywood

Fund the arts centre. Heritage is important

>>>

Arts centre

>>>

Fund the arts centre

2069 - Christine Whybrew (Heritage New Zealand Pouhere Taonga)

In general, HNZPT supports the proposed contribution to heritage protection throughout the Plan and recognises that \$51 million of total proposed spending is allocated for heritage projects over the ten-year period. 8. However, we are disappointed to note that:

- No new funding is allocated towards the continued costs of the Arts Centre for the 2024-34 period.

>>>

Arts Centre Te Matatiki Toi Ora 12.

HNZPT understands that the Targeted Rate for the Arts Centre Te Matatiki Toi Ora is to cover the previous three years' grant to the Arts Centre Trust Board, but that no new funding is allocated for the operating costs over the 2024-34 period. These buildings are important as a remarkable architecturally significant Gothic Revival complex, which relates to the wider area of Gothic Revival architecture encapsulated in the Museum, Christ's College, the Canterbury Provincial Council Buildings and the Christchurch Cathedral. Further funding would ensure the continued operation of, and public access to, this major group of heritage buildings thereby protecting the significant public investment already made. The loss of a Council grant will not only have the potential to impact ongoing works, but also the Arts Centre's ability to meet rising insurance premiums and Council rates.

In considering the reasoning behind HNZPT's support of further funding for the Arts Centre, it is important to understand that the ongoing maintenance of these buildings requires specialist contractors in multiple fields. This is costly but does have the positive knock-on effect of generating further employment opportunities. It is also useful to appreciate the economic benefits that we consider the Arts Centre brings to Christchurch. Around 70 organisations rent spaces there, employing hundreds of people directly and also indirectly through events and associated businesses. It is also a significant tourist attraction with approximately one million people visiting the Arts Centre in 2023. The Arts Centre's ongoing use and viability is of utmost importance to the city and HNZPT strongly advocates for Council to reconsider grant funding for the 2024-34 period.

207 - Milica Ekmescic

We also need to support Arts Centre that is so important for the city. it is major centre for culture for Christchurch, important point of multi cultural character of this city and cannot be forgotten.

>>>

Arts Centre is important too. in general council needs to work on roads and sewage but we also want right type of crowd in our city and we want our children to grow in right way.

2072 - Nikki Bleyendaal

Absolutely not - the decision to exclude the Arts Centre from any funding just at the point where the arts are recovering so vibrantly from the COVID shut downs is disgraceful. It is appalling to see the usual \$1.8M be withdrawn with no concrete plan to safeguard the future of the Arts Centre by the Council.

>>>

No - removing any financial support for maintaining the Arts Centre as the cultural hub of Chch needs to be addressed. It is part of what makes the historical sites of Chch so special, it is a tourist attraction, and it is a sure to pull funding just when it is getting back on its feet.

>>>

If you are truly focused on all six of these strategic priorities then defunding the Arts Centre flies in the face of achieving any of them.

>>>

Please reconsider the funding for The Arts Centre - it is a vital part of the Chch arts and theatre scene which so many residents are keen to see thriving again.

2077 - Harriet Riley

I would like to see the Council support The Arts Centre. Having these heritage buildings right in the middle of town is a major draw card to the culture of the city and provides many opportunities for appreciation of our history/arts and culture as well as to support tourism. I have many fond memories of visiting the Arts Centre while growing up here and love visiting it today and seeing how popular it is with locals and visitors. It would be a huge loss to the city if The Arts Centre was unable to continue operating and I strongly believe the Council should prioritise supporting it's continued existence.

208 - Astrid Harrison

The arts centre should continue to receive Council funding. It is an enduring cultural and heritage icon for Ōtautahi both pre & post quakes. It should continue to be available and run by the community with support from the council so it can continue to thrive.

209 - Ken Maynard

You need to fund the Arts Centre. It cannot be dismissed as a 'nice to have'. The arts are a fundamental part of human existence. Not sure if the same can be said of sports stadia.

2091 - Sarah Johnstone

As long as the art center is a continuous focal point for our city

>>>

We are in a constant increasing cost environment but we need our city to continue to be worked on to bring in tourists

>>>

Please keep upgrading and continuing to highlight the art Centre. It is a focal point of our city

2092 - Jeremy Bruce

I want to lend support to both the continuations of Arts Centre Funding #saveourartscentre >>>. Continual funding for our Arts and Culture sectors is absolutely critical to continue to build a vibrant city, community and society. This is literally our future let's keep it going.

2093 - Rachael Hemmer

Please save the Arts Centre. It's a central and very important part of the city, and needs funding to keep going.

>>>

Please extend the funding for the Arts Centre. It is an essential, much-loved Christchurch icon, with over a million visitors each year, and many loyal tenants and visitors.

2096 - Kate Divett

I am deeply concerned that there is no funding for the Arts Centre.

>>>

I appreciate how complex this process is, and the many demands on a finite budget. However it seems shortsighted and irresponsible to be discontinuing financial support for the Arts Centre.

>>>

With \$1.6 billion being spent on transport, there is surely a way to find \$1.8 million each year for the Arts Centre, which seems to be hamstrung by Acts of Parliament and other limitations that other organisations do not have.

>>>

Please reconsider the omission of funding for the Arts Centre. This will have a devastating effect on the provision of Arts and experiences to both residents and tourists. If the Arts Centre ceased to exist, it would be a travesty - it is both a connection to our past, and a place to equip, educate, and inspire towards the future. Cancelling our funding to it would also be a giant waste of money on the longer term - the buildings and facilities have already been restored post-earthquake, which gives our city its artistic heart. My understanding of the financial implications for Chch City Council far outweigh the short-term savings of not funding it.

>>>

I'm disappointed that the Arts Centre is not included. This seems very short-sighted, and neglects an important cultural area of the city. I have important memories as a younger person of visiting the Arts Centre - it was a safe, inspiring place to visit. It was very missed while we weren't able to visit it post-earthquake. Now that it has been restored, it is wonderful to be rediscovering it - visiting the movies, attending concerts, supporting local businesses by shopping - eating there, and attending educational programmes. As a teacher, it is an important resource. I would be most disappointed to think that this would all be under threat and not able to be experienced by future generations of this current council did not make the right decision to support it today.

210 - Vicky Jones

I strongly advocate for the Council's support of The Arts Centre in Christchurch. The Arts Centre holds immense personal and professional significance for me, and its preservation and thriving are vital for numerous reasons. Firstly, The Arts Centre is not merely a cultural institution but a cornerstone of creativity and community in Christchurch. My cherished memories of strolling through its historic corridors, attending performances, and engaging with local artists resonate deeply with me. It's a place where creativity flourishes, where ideas are exchanged, and where the vibrant pulse of the city's artistic spirit beats strongest. From a professional standpoint, The Arts Centre plays a pivotal role in supporting the arts sector and industries intertwined with it. As a hub for artists, artisans, and performers, it provides invaluable spaces for creation, collaboration, and exhibition. Its existence bolsters the cultural fabric of the city and contributes significantly to its reputation as a hub for creativity and innovation. Moreover, The Arts Centre holds profound significance for the regeneration of Christchurch. Its restoration following the devastating earthquakes symbolises resilience and

renewal. By preserving its heritage while fostering contemporary artistic expression, The Arts Centre embodies the city's commitment to honouring its past while embracing its future. Its presence is integral to Christchurch's identity and its ongoing revitalisation efforts. For the communities I am part of, whether ethnic, creative, or neighbourhood-based, The Arts Centre serves as a unifying force. It provides a platform for diverse voices and perspectives to be heard and celebrated. Its programs and events foster inclusivity, bridging gaps between different communities and fostering understanding and appreciation. In summary, The Arts Centre is more than just a physical space—it's a testament to the power of art, culture, and community. I urge the Council to wholeheartedly support its continued growth and development, recognising its indispensable role in shaping a vibrant and inclusive Christchurch for generations to come.

2100 - Cam Coull

The Arts Centre is a taonga that any other city globally would care for and hold in highest regard, CCC has shown that they instead take it for granted. The Arts Centre needs stay independent and be supported by local government. Run by creatives, for creatives and treasured by all. It needs ongoing funding.

>>>

The Arts Centre is a taonga that any other city globally would care for and hold in highest regard, CCC has shown that they instead take it for granted. The Arts Centre needs stay independent and be supported by local government. Run by creatives, for creatives and treasured by all.

211 - David Cole

Support the Arts Centre. Please, we must support and fund the Arts Centre. This beautiful, historic and cultural centre is an essential part of what Christchurch is. It must be kept alive!

2110 - Jennifer McMaster

[Libraries>Libraries (Operations)]; [Three Waters>Waterways Quality & Compliance (Operations)]

*More funding into clean waterways and greening
the city as well as libraries and ~~the~~ art centers.
poisonous*

2112 - Matt Easterbrook

[Grants & Funding > Orana Park Funding]

We should be funding Orana Park and the Arts Centre. These are important places to our city

>>>

Funding should be included for Orana Park and the Art Centre

2113 - Jade Webb

The arts centre is a beautiful and historic space for our community, I can't understand why the council would even consider stopping funding for such a vibrant place.

2118 - Jenny Harper

Yes, but I would like to see some funding both for the Arts Centre and another contribution to the restoration of the Christ Church Cathedral.

212 - Phil Sewell

Very concerned about the lack of support for the arts centre. It is a unique area, popular with locals and also the many visitors who are now coming back to Chch. Lack of support endangers the Centre. If it falls over it would take years to get back to where it is now. Please continue to support this heritage taonga

2121 - Cassie Welch (National Public Health Service (NPHS) Te Waipounamu)

35. Based on strong feedback and voices from the community, we recommend that the operational funding should include funding for the Art Centre. Being able to engage with art and art spaces is important in for health and wellbeing of all age groups.³⁴ Additionally, post-earthquake, heritage buildings like the Art Centre may have stronger meaning and attachment for residents of Ōtautahi Christchurch.

[Coder Note: Full attachment available]

2124 - Mary Chase

It is a tourist attraction, heritage and has businesses already using it. It would be an eyesore, like the cathedral, if left to disintegrate and would cost a lot to bowl over.

2125 - Kathryn Palmer

Keep the current funding for the Arts Centre its an important heritage cultural and tourist asset

>>>

The Heritage package is more than the Art Gallery and the Musuem, The Arts Centre is an integral part part of this precinct and needs retaining and supporting to be run by arts people.

2126 - Elfi Spiewack

The plan to stop funding the Art Centre is a big mistake! It is a vital part of Christchurch's cultural and educational landscape. An important drawing point for the tourism market and should get huge support (financial and otherwise) to keep running instead of being destroyed. It would be a huge loss to the city, its residents and community plus tourists who have been enjoying the programs and events. Culture should always be the most important part to fund in a healthy society!

>>>

The Art Centre is an integral part of the city's cultural and educational wellbeing. The thoughtfully designed and curated programs and the historical importance of the place are cherished by the Christchurch community, all New Zealanders and thousands of overseas visitors a year. The beautiful restoration after the earthquakes made it into an even more important part of the history of the city. It needs and deserves all the support and funding in an ongoing bases and should always have priority!

WE CAN NOT AFFORD TO SEE THIS IMPORTANT PART OF OUR CITY'S CULTURAL LANDSCAPE, AND THE JOY IT BRINGS TO THOUSANDS OF PEOPLE DIE!!!!

213 - Diana Plesovs

Would like to see continued funding for the Arts Centre too, to balance must haves and good to haves such as preserving the Arts Centre.

>>>

Return Arts Centre back to a beautiful, useful functioning arts and Community centre by continuing funding to allow completion.

2133 - Cathrine Ackroyd

We have a cluster of historical and modern cultural buildings between Cathedral Square and the Botanical Gardens. This area is where our overseas visitors focus their time and interest. When the Museum rebuild is complete a linked chain will be created: Museum, the Arts Centre, the Art Gallery, on into the accommodation and entertainment areas. The jewel in this chain is the Arts Centre. It truly opens its arms to all our diverse citizens as well as charming our visitors. It needs the Council's help to keep its vibrant heart beating strongly. Please reinstate the level of financial support you have given it in the past. Make Ōtautahi known as a centre for the arts, drama, music in all their wild and wonderful manifestations.

2136 - Clara Carey

I read recently that the Arts Centre isn't being funded in this long term plan. I think that that is a mistake, and that funding should be found to allow for the Arts Centre to continue to operate. It's a part of the inner city, and its existence is in keeping with the city's vision and goals

214 - John Hinchey

Continue funding the Arts Centre at the present level. It's our heritage; it sets our city apart.

2143 - Vicky Anderson

Please continue to fund the Arts Centre and it's programs - deserves full funding. It is essential. The central Dux-de-lux should be re-established especially with Kindness foundation (ex YMCA), hotels close by.

2144 - Amy Mcnaughton

Some funding for the Arts centre and Orana Park would be really beneficial to such important organisations doing great work such protecting species.

2145 - Jenny Zhong

I am disappointed by the Council's decision not to fund The Arts Centre. As a New Zealander, I tell all my family and friends that Christchurch is my favourite city in the country. The biggest contributor to my thinking is The Arts Centre. In this city full of art, humanities, history, and multiculturalism, I don't know any reason why the council should give up funding for The Arts Center. As an emerging Asian artist, The Arts Center makes me feel friendly, cordial, sincere and supportive. They are an organization that loves art and life. As a middleman, they bring art to the community. They actively

organize art activities. They occupy an important position in Christchurch's arts and culture connecting artists and the public. I understand the importance of roads and the transportation industry to residents' lives, but life can't be just these, we also need art. Art and culture can also help drive our city forward. I hope that the council can continue to fund The Arts Centre, it doesn't deserve to disappear.

2146 - Adele Milner

I'm currently post op in hospital but want to make a submission to keep the Arts Centre funded as it is

215 - Chris Bown

The council must support the Arts Centre - appalling to think you won't.

2153 - Chiara Anderson

Funding the Art Centre is essential as it underpins and links the arts precinct: Art gallery, Art Centre, and the Museum.

>>>

It's imperative the Council continues to support and grant funds to the Art Centre, it is simply unfathomable that it would would get fully repaired to only then get dumped. It is such an obviously important and historic asset to the city.

2158 - Patrick O'Sullivan

It is unconscionable that the Chch City Council is drafting a long-term budget that will imperil the existence of the Arts Centre in the heart of Christchurch. Quite apart from the fact that the Centre is home to shops, bars, cafes and other businesses—thus significantly contributing to the economy of the region—the Arts Centre has long been a mainstay civic and cultural life on numerous levels with its art and craft galleries, and as the venue of a vast array of concerts, performances, public lectures, and symposia, etc. All this has made it a vibrant intellectual and cultural hub, playing a key role in the city's recovery after the earthquakes of 2010-2011. Many events have been the work of members of UC's Classics Dept. and School of Music Performance, now housed in the Centre, which in fact was the University's original home. The site also houses the Teece Museum, NZ's premier collection of Greek and Roman antiquities, used by the Classics Dept. and a constant drawcard for the public as well, including school groups, tourists and locals. These resources will have to go under the new plan, thus causing massive disruption and uncertainty for all who work there, as well as further diminishing one of the great civic attractions in NZ. The Arts Centre fully deserves proper funding to stay viable, and be seen not as a financial burden, but as a key component in the economic and cultural life of

Christchurch. Future generations, not just our own, deserve to experience its riches, too.

216 - Elizabeth Jeanette Durey

[Transport > Cycleways (Capital)]

THE ARTS CENTRE MUST CONTINUE - ITS A WONDERFUL ASSET IN OUR BEAUTIFUL CITY - CONTINUED FUNDING MUST BE ONGOING. OTHERWISE IT WILL BE INSOLVENT, THE COURT WILL ALLOCATE OWNERSHIP TO THE CITY COUNCIL AND CITIZENS/RATEPAYERS WILL END UP BEARING MUCH BIGGER COST THAN THE CURRENT ANNUAL GRANT. THE COUNCIL MUST LOOK AT LEAVING THE ARTS CENTRE UNDER TRUST CONTROL. PLEASE PLEASE LISTEN TO US. SENIOR CITIZEN MOVED FROM WELLINGTON TO CHRISTCHURCH 24 YEARS AGO AND DISCOVERED THESE WONDERFUL HERITAGE BUILDINGS, WATCHED THEM ARISE FROM THE EARTHQUAKE CHAOS AND RECREATE ITSELF AS A MORE COMMERCIAL ORIENTED ORGANISATION YET STILL PROVIDING THIS AMAZING SPACE FOR TOURISTS AND CITIZENS TO ENJOY, PLEASE PLEASE GET THIS RIGHT. YOU HAVEN'T DONE TOO WELL SO FAR - TOO MUCH FOCUS ON FANCY CYCLE WAYS WHICH WILL ONLY GET USED DURING SUMMER MONTHS - 6 MONTHS OF THE YEAR WHEREAS THE ARTS CENTRE PROVIDES ENTERTAINMENT AND SPECIAL TREATS WINTER AND SUMMER - 12 MONTHS OF THE YEAR. I FEEL PASSIONATE ABOUT THIS AND ONLY PUT FORWARD THIS SUBMISSION YEAR YOUR 10 YEAR PLAN. PLEASE PLEASE LISTEN. .

2166 - Wendy Everingham

I would like you to support the Christchurch Arts Centre.

2168 - Katie Martin

Please consider funding Te Matatiki Toi Tora The Arts Centre of \$1.8m per year. The value of the work being done here for the arts is incomparable and the momentum is just building. This is a truly important part of Christchurch's heritage and needs to be valued by the council to truly maintain the mana of the facility

217 - Don McAra

To refuse funding for the Arts Centre will lead to the loss of one of Christchurch's prime attractions and will cost the Council in the long run as it will have to take ownership. This will raise the rates. So much has been done to strengthen and maintain it since the quakes. Without council help through keeping up the contribution paid until now the Arts Center cannot possibly pay the enormous insurance costs now demanded of it. That cost also will have to be taken over by the Council. By closing the Centre the Council will show how little it values the Arts in the Christchurch and Canterbury region. There will be a total imbalance between the Arts and the Te Kaha Stadium which is more oriented to sports. Yet Christchurch has always fought for the Arts and been well known internationally for that. Witness the City Gallery and the restoration of Town Hall and James Hay, Court, and Isaac Theatres. These all need a substructure, a place where younger or lesser known

artists of all kinds can find their feet, hold their first shows, etc. The number of people visiting the Arts Centre attests to its popularity and accessibility. Its history and heritage are unique, and that alone should guarantee how worthwhile the Council should find it, and continue to support it. It is incredible that such a valuable civic precinct should not continue to receive the Council support it has had since the days of Norman Kirk.

2178 - Sue Bridgwater

The balance as described above appears to be well enough balanced, however, one of the reasons for the above statement is to enhance the experience of those visiting the city. The Arts Centre is an integral part of our city. It is as important as the sports stadium to many many people and should be part of the CCC long term funding

>>>

BUT this spending must include a provision for the Arts Centre

>>>

Surely a small proportion of the \$870m budget can be allocated to the Arts Centre as heritage buildings?

>>>

Please fund the Arts Centre!

>>>

Long term funding of the Arts Centre as part of Christchurch's heritage is imperative

218 - Isabelle Barkley

Fund the Art Centre

>>>

The Arts Centre needs to be included in your budget, it is a significant part of Christchurch's heritage and its vibrant present.

>>>

Fund the Art Centre

2183 - Hali Stauffer

I'd like to highlight several critical areas that Council should prioritise: 4. Support for the Arts Centre and enhancement of cultural amenities: Investing in cultural institutions like the Arts Centre enriches the community and contributes to the city's vibrancy. Increased funding and infrastructure improvements, such as additional bike stands, will further enhance accessibility and cultural offerings for residents and visitors alike.

2187 - Rylee Single

This is a place that pulls in masses of people every year. It is a major supporter of our art sector in the city of which we are already lacking in comparison to others. Don't make the mistake of just viewing it as old buildings, look at what offers instead and realise this is more of a staple to the city and people than a church in the CBD

219 - Tegen Bishop

You seriously need to fund the arts centre. It cultivates a welcoming creative community that sets Ōtautahi apart.

>>>

Please consider continuing funding for the arts centre. It's truly not just a place but a community that makes people feel like they belong in this city. You don't have a good city without happy people who feel they are a part of it.

2190 - Stacy Rendall

Fund the arts centre, not the rugby stadium.

22 - Grace Colcord

Cutting Art Council completely is not a balance at all. Understandably funding needs to be cut from order of the new government, but the Art Council is the only opportunity to restore and maintain the creativity within our city. With many conversations I have with especially young people who have lived here, there is a strong narrative that Christchurch is a hostile place to be. And so our creatives and experts move away to other cities in aspirations to thrive, and the ones that stay or have moved here, slow down to almost a complete halt in confusion to the aggression of this city. The truth is, Christchurch is known and felt as a city of trauma. And on the many instances of needing to recover from this, the city was rebuilt but the Soul of the city never has been restored. Adequate balance is finding a way to allocate money into the Arts Council, especially in a time where we need more creativity within our people and spaces, and not less.

220 - Sarah Young

I'd like to see investment in heritage sites like the Arts Centre.

2204 - Vicki Blyth

The Council has a long tradition of supporting arts and culture in the city and of creating accessible spaces, events and performances for all of the diverse communities who live in Otautahi Christchurch. Please continue to support our local arts and cultural organisations and please consider how the Arts Centre of Christchurch can remain a vibrant cultural precinct in the central city. The Arts Centre needs to be a centre for the arts. It needs to be activated with performances, exhibitions, music and theatre that everyone can enjoy. The Arts Centre Trust should be funded to do this as well as looking after the buildings. The tragedy is that the Arts Centre needs secure long-term funding to realise its true potential and at the moment it has very few options. The Council needs to take a leadership role and be part of the solution to the long-term funding of these important heritage buildings and the staffing needed to activate the spaces for everyone to enjoy. It would be a travesty for these buildings to be mothballed or just maintained.

2206 - Nikki Rogers (Hospitality NZ)

27. We also note Christchurch City Council has proposed no funding for Te Matatiki Toi Ora The Arts Centre in its draft Long-Term Plan – we believe Council should provide funding for the Arts Centre. It is an attraction for visitors to Christchurch and adds to the vibrant arts scene in the city.

221 - Natalie Wadsworth

FUND THE ARTS - FUND THE ARTS CENTRE

2215 - Gretchen Smith

[Spending > Te Kaha]

Funding sports stadium instead of including funding for the arts, heritage and culture at the Arts Centre

>>>

There is no mention of the Arts Centre in the heritage part of the Consultation document

>>>

Fund the Arts Centre

>>>

Funding for the Arts Centre is crucial for tourism, heritage and culture for the people of Christchurch

2219 - Georgia Metaxas

No, the Arts Centre is an integral part of our city, hub for creatives and community, and local businesses to thrive. The Arts Centre is a loved heritage site and tourist favourite in Ōtautahi. I am so heartbroken to hear that their vital funding has been cut in this proposal. With a city that is rebuilding from the earthquakes, it is so important that we support and maintain this space, which has kept the community thriving through all of the ups and downs of the past few years, through arts and culture.

222 - Jamie Walker

Fund the arts, fund the arts center!!!

223 - Rhiannon Mason

[Parks > Heritage (Capital)]

I am disappointed in the council's decision to defund the Arts Centre, considering it is an important heritage building in Christchurch. I work in tourism and direct hundreds of people there a day, so I'm incredibly aware of how vital to the Christchurch heritage scene it is. Supporting the arts is a vital part of a strong cultural and connected society.

2230 - Robert Coleman

When looking at whether the Draft Long Term Plan is balanced, it's important to remember our city's heritage, especially The Arts Centre. This place is one of the few historic sites left after the Christchurch earthquakes. It's more than just an a group of old building; it's a key piece of our community's history and culture. While the plan does well to invest in roads and utilities, we shouldn't forget about our heritage. We need to make sure we're also setting aside money to take care of places like The Arts Centre, so future generations can enjoy and learn from them too.

>>>

Preserving The Arts Centre is a crucial part of maintaining our city's heritage, especially in the aftermath of the Christchurch earthquakes. As one of the few remaining heritage sites, it represents a vital link to our past. The modest funding required to support this institution is a worthwhile investment to ensure that future generations can enjoy and learn from these cultural assets. It's

essential that we prioritise the conservation of such valuable heritage, especially when so much has already been lost.

>>>

In response to the Draft Long Term Plan 2024-2034, I'd like to emphasise the critical role of The Arts Centre, not just as a cultural institution but as a fundamental component of Christchurch's fabric. The Arts Centre is much more than a collection of heritage buildings; it is a living, breathing space where people come to work, learn, and gather making it essential to the central city's vibrancy and appeal. Post-earthquake, The Arts Centre has been a highly visible heritage area in the regeneration of Christchurch, representing resilience and continuity. Preserving this site goes beyond maintaining buildings—it's about keeping our city's story alive for future generations, ensuring that the arts, culture, and education continue to flourish here. The funding required to support The Arts Centre is modest relative to the benefits it provides. With an annual requirement of about \$1.8 million, it costs less than \$1 per month per household, an investment that is reasonable when considering the cultural, educational, and economic returns to the city. Continuing to support The Arts Centre in the Long Term Plan is not merely a matter of allocating funds; it's an investment in Christchurch's cultural heritage and community well-being.

2235 - Cara Paterson (Creative New Zealand)

We urge Council to consider how it could further invest in Te Matatiki Toi Ora The Arts Centre, to ensure its ongoing operation and support for the wellbeing of Christchurch residents and the city's creative economy.

As recognised by the Arts Centre of Christchurch Trust Act 2015, the centre is a cultural asset of local, national and international heritage significance. The Centre delivers many regular programmes, events and activities, including three annual festivals, that engage Christchurch's residents and visitors. It is home to over 70 entities covering arts, performance, creatives, entertainment, cinema, food and beverage, education, two museums, Te Whare Tapere Māori arts space – run by Māori artists for Māori artists – and, opening in June, the Ngāi Tahu creation story.

Creative New Zealand provides project-based funding for programmes run by The Arts Centre. In 2023/24 funding totalled \$115,000, including \$50,000 for residency programmes. These programmes delivered our strategic outcomes of 'High quality New Zealand art is developed' and 'New Zealand's art sector is resilient'. The Arts Centre also provides office space for SCAPE Public Art, one of our Toi Uru Kahikatea Investment programme clients, as well as The Arts Foundation Te Tumu Toi.

Given The Arts Centre does not receive consistent government or Council funding, Council's ongoing support for the Centre is of significant value. We note that our own ability to support the sector is currently under strain. We have materially less funding to invest from 2024/25 (around 30 percent) than for the previous five years.

0. Council's investment in arts and culture is vital for creating resilient local arts, culture and ngā toi infrastructure. Strong cultural infrastructure will support Council to respond to current challenges, and The Arts Centre will deliver the community outcome of 'a cultural powerhouse city'. As we face a less certain future, the arts have a crucial role in improving social wellbeing by building and regenerating strong, connected and health communities.

As we face a less certain future, the arts have a crucial role in improving social wellbeing by building and regenerating strong, connected and health communities.

224 - Cynthia Hawes

Please fund the Arts Centre

2246 - Karen Johnston

I am surprised that the funding for the Arts Centre is being stopped. The Arts Centre really is the jewel in the crown for Christchurch. This year I have noticed how bustling and busy it is. It is the first place to take visitors to. The reinstatement after the earthquakes has been amazing. I support funding it. I teach at the university and students tell me that they have moved to Christchurch to study because they like the new opportunities that Christchurch now has to offer. The Arts Centre is part of that.

225 - Towa Wilson

Save the arts centre! Christchurch needs it, as a place for people to connect, and engage, and be inspired.

226 - Naressa Gamble

Please fund the Arts Centre

>>>

Please Fund the Arts Centre

>>>

Please Fund The Arts Centre

>>>

[Parks > Heritage (Capital)] [Coder note: "this" refers to Parks, Foreshore and Heritage Capital programme]

Does this include the Arts Centre?

>>>

Fund the Arts Centre

>>>

Please Fund The Arts Centre

2263 - Scott Babington

[Grants & Funding > Orana Park Funding], [Other/Special Interest Topics > Cathedral]

However commitments that have been established, such as with the arts centre, orana park and restoring the anglican cathedral need to continue to ensure their viability. I wonder that a different type of relationship should be established, reflecting that funding status - for example part-ownership.

227 - Megan Hopkins

The Arts Centre should be included in the heritage funding.

>>>

Arts centre should be in the funding

>>>

Continue the funding to the arts centre charity and keep it running, it has been an important part of Christchurch for so many decades to be abandoned by the council now with the current financial situation. We don't have a cathedral, we need to keep the what's left of our heritage buildings in town afloat.

2273 - Jessica Cunnold

More funding for the Arts Centre

>>>

Please consider funding the Art Centre. The Art Centre is a valuable resource and a culturally significant place in Christchurch. It would be a loss to not support the building and the communities of people that use the building, for example Indigo & Provisions, Frances Nation cafe and DeeDee Thai massage.

2275 - Bridgette Pedofsky

It is a asset to the community

228 - Martin Tatchell

Please maintain support for the art centre. It is an essential part of arts and culture with in the city. It provides for people of all ages and interest. As a art it has provided me with opportunities to share my are with other. Many of my friends benefit for what the art centre provide and it would be a disaster for the community if it was lost. There is no other organisation in the city that can provide such a

range of opportunities that the art centre does. We should support it whole heartedly to maintain the vibrant creative community that Christchurch has. It is also one of the core pillars for tourism in the city.

>>>

The art centre is a vibrant life blood of the city, providing jobs, homes for many businesses and opportunities for people to use the space in so many ways. Often when the rest of the city is quiet you will find the art centre busy and vibrant.

Losing this unique and beautiful public space would be a huge step backwards for the city.

2282 - Nicola Columbus

[Strategic Direction>Have we got the balance right?]

No. Without the Arts Centre the city will have no soul

>>>

Arts Centre should be the beating heart of the city.

2284 - Anna Western-Bell

This is an icon for Christchurch and a wonderful attraction for tourists and visitors. A treasure for the arts and culture scene that we are incredibly lucky to have and it would be shameful for this council to let it go.

2286 - Larissa Moeller

[Grants & Funding>Orana Park Funding]; [Other/Special Interest Topics>Cathedral]; [Transport>Roads (Capital)]; [Spending>Our Proposed Spending]

As a rates payer I much rather see funding go to projects for everybody like Orana park, road improvements, hospital, art centre etc than it going to the cathedral which is for one denomination only anyway

229 - Sama Mounib

I wish for council to support the Arts Centre. It is such a unique and special place. The music events that are organized by the Arts Centre always have a way of bringing communities together. The diversity of the music performances is like nowhere else I have seen. I love it so much. It would be devastating to see it come to an end. Please Christchurch City Council, continue supporting the Arts Centre and prevent yet another heartbreak in the community.

2293 - Marie Griffiths

The Arts Centre is an important part of Christchurch's history and art and culture background. After all the work put into the restoration of the Arts Centre it would be a shame for it to no longer be available due to a lack of funding. Please continue to support the Art Centre (and Orana Park) through providing long term funding. Thanks in advance.

23 - Joanne Lill

I am unsure why the Arts Centre has been left off the long term plan. The Arts Centre has been for years a key icon of the city, one that I know was often asked about and one that so many were happy to see reopen post earthquake. Having worked in the tourism sector most of my life and having promoted Christchurch as one of my jobs, I know firsthand the effects of not having this important piece of history open for all to visit. It's not just tourism though, the number of school visits I've been on shows it has a valued part of the education system in local schools too. I've also attended workshops with my kids throughout the holidays, it's fun, refreshing different and usually not that expensive.....please reconsider and put some funding towards this important part of Christchurch infrastructure and economy.

230 - Peter Elliott

Supporting the restored Arts centre is a priority

>>>

I don't think the council should stop funding the Arts Centre. This is a significant historical site that adds a huge amount to our city. Both as a tourist location and a business hub. To stop the small amount of funding now would result in it's financial collapse and likely end up having to be fully supported by the council. A much bigger long term cost to the city

2305 - Monique Maynard

[Grants & Funding > Orana Park Funding]

I would never read this plan normally, if not for the Save the Arts Centre campaign and plea from Orana Park - where are you stating the funding will be removed from these iconic, green spaces that attract locals and visitors to our city?

>>>

THE ARTS CENTRE AND ORANA PARK HAVE REACHED OUT TO MEDIA - HOW MANY OTHER ASSETS DOES THE CITY RISK LOSING AT YOUR HANDS?

2308 - Sarah Elicker

The Art Centre: I think it's a travesty to simply cut off funding without a strategy and business case in place going forward. Please maintain the funding and if you need to reduce it, make a plan with the Art Centre team. The Arts Centre is a lot more important than the cathedral in terms of our heritage as a city.

2309 - Margaret Austin

The lack of funding for the Arts Centre is nothing short of negligence and MUST be remedied in order to honour the gift of Norman Kirk at the University of Canterbury centennial in 1973 when he said "he wanted the Arts Centre to be a place for the arts for the Citizens of Christchurch and its visitors" The legislation makes it very clear that if the Trust has to fold it will be the High Court who determines who will administer the Trust. If it determines the CCC then the onus for costs will be far greater than the \$1.8M annually at present. Bear in mind that the Arts Centre is a vibrant, welcoming place running at capacity- a true cultural powerhouse fulfilling one of the focus statement of the LTP.

>>>

Again the omission of the Arts Centre is a serious omission and must be remedied. That "A day in the Life of your Rates fails to mention the Arts Centre in the itinerary tells the citizens that it is of no significance when indeed it draws people of all ages and interests to the Festival, concerts exhibitions, cinema, cafes and restaurant. To ignore it as has been done reflects a lack of appreciation of its significance in the city, its architecture, restoration, creative and commercial activities.

>>>

Review and add the \$1.8M funding for the Arts Centre.

231 - Miriam Mallinder

The Arts Centre, on the other hand, is our heritage and already established. Keep that going. It will do for now.

>>>

Arts are important to the city's culture ... it makes people think, it is entertaining, and it brings community together. Please reconsider the proposal to ditch the Arts Centre ... I understand that ditching it would be more expensive to you than to support it as it is: It is most likely that the High Court will have to rule on who would get the Trust's assets, and that the Court would choose the City Council. Council would then have to cover all the same costs, plus pay for the transition, but would not get the grants, donations and sponsorship that currently support arts programming and other costs.

2313 - William Godsoe

I visit the arts centre often and when i go there i am amazed both at the people of course. I'm also amazed by the investment that i as a taxpayer have already made. In some cases parts of the arts centre have been lovingly recreated, brick by brick after the 2010-2011 earthquake. I think this investment was worth while. Even if i didn't, the idea that us tax payers would make that investment and then abandon the investment seems to indicate that this council cannot focus on a project.

>>>

I'd like to talk specifically about the importance of the arts centre for my work. I'm a scientist and collaborate with researchers all over the world. For me the arts centre is internationally significant because of its connections to physicist Ernest Rutherford, who was a student in what is now the arts centre and philosopher Karl Popper, who fled Europe in the 1930's and wrote some of his most important work here. I use my connection to the arts centre to humanize the work of these two influential figures even in heated debates with scientists across the world.

2316 - Samina Beale

I absolutely adore Christchurch (spent a lengthy stay in the hospital after a tumble down Fox Glacier), I love how you look after your citizens and rising up after 2011. I cannot wait to return but feel the need to have my say about Saving your stunning Arts Centre, it was the heartbeat for my family and I during my recovery.

>>>

Please save the Arts Centre, many cherished memories here. Eating, making jewellery, just the total atmosphere of this iconic building. Please save and look after it for many generations to come, it was 19 years ago I first visited the building and played a pivotal part in my recovery during my stay at Christchurch hospital after a serious brain injury.

>>>

Please, please include continued funding for the stunning Arts Centre, as once it is gone it will be gone forever. Such a beautiful and interesting building which needs to be enjoyed and loved by generations to come. Such an area of beauty, please do risk this being spoilt. I have seen first hand how a beautiful city has become derelict, it has never recovered.

2318 - Lesley Kettle

As a ratepayer I would like the council to continue to support one of our most valuable assets ... The Arts Centre. It represents the heart of our city due to its Heritage recognition by UNESCO especially post the Feb 22 2011 earthquake. It is a place to gather with many entertainment events through the year , to shop , to celebrate art , to enjoy Kai , to watch great movies and to celebrate family events such as weddings. The arts centre needs to be saved for the people of Otautahi young and old and in between. CCC needs to continue to support the Arts Centre on we the people's behalf .

232 - Guy Smith

Fund the arts centre!!! Disappointed to learn funding for them wasn't included in the long term plan, it's such an important part of the city.

2323 - Pauline Guthrie

I feel the withdrawal of funding to the Art Centre of Christchurch would be devastating to residents and visitors. I feel Christchurch City Council has an obligation to continue its funding to the Art Centre - it is a crucial part of our lives here in Christchurch. It is our heritage and art centre offering locals, and visitors to Christchurch an abundance of services. But not only this but it is iconic to Christchurch and needs council funding to continue. I feel it is our heart of our city.

2324 - Steffan Kraberger

My submission is specifically regarding the art centre. It's a short sighted, reactionary outlook to block funding. Outside of the clear tension between open capacity for the council to make expenditure and capital investment, there is a degree of investment needed here to retain one of the sole thriving urban cores of the city. The art centre not only thrives in its own right, it activates from Cashel mall right through the botanical, a civil responsibility.

2326 - Amanda Booth

I just forgot one point. I would like to see funding for the Arts Centre continued at the current levels of 1.8M per year. The Arts Centre is a special place for many locals. I like supporting the current businesses & really enjoyed last year's Matariki event in the Great Hall. We don't have enough heritage left post quakes, please ensure it's ongoing presence.

2327 - Charles Shaw

I am disappointed that there is insufficient attention given in the proposed programme to culture and the arts, especially to the restoration, maintenance and development of the Arts Centre, one of Christchurch's most important heritage assets. Without it Christchurch's reputation as a tourist destination will suffer greatly, as will the arts/culture precinct as a whole.

2328 - Steven Gray

I do not have sufficient to comment on this adequately in total. However i specifically believe that funding for The Arts Centre heritage building and operations therein must continue

>>>

I believe as part of the plan - it should include funding the Arts Centre

>>>

Believe we need to make allowance to continue funding the Arts Centre- this is a great activity for community enjoyment of the heritage site and the activities there in.

>>>

I would like to see funding of Arts Centre included

>>>

I would like to see funding of Arts Centre included .

>>>

Continue funding of the Arts Centre -great use of these heritage buildings and brings enjoyment to community

>>>

Maintain funding of Arts Centre in the heritage building

233 - Luciana Orr

[Strategic Direction > Have we got the balance right?]

Not if council no longer plans to support the iconic arts centre.

>>>

Keeping the Art Centre running is critical. This is the last cultural and social hub in the city which is unique due to its architecture. I was an artist in residence there many years ago and the place has something that nowhere else has. It is beautiful and a treasure in itself. So many generations have grown up enjoying this amazing place. The people of Christchurch have lost so many of the heritage buildings that identified the city as something very special in nz, how could this now be taken away. Please keep the arts centre!

2332 - Gary Crombie

The Arts Centre is the jewel in Christchurch's crown and must be supported by sufficient funding to continue to be so

2333 - Fiona Lynch

Arts Centre is key to the character of our city. After the earthquakes so much was put into restoring this culturally and socially significant centre. It is also a key tourist visiting point and is important given its historical connections eg Rutherford's Den. To cease the funding would be a grave error and leave Christchurch bereft of this focal point.

2336 - Alastair Nicol

The LTP document hardly mentions heritage. The Arts Centre is the most important of Christchurch heritage buildings and needs to be supported financially by CCC. By virtue of it being an Arts centre it is more difficult for it to be commercially viable on its own, compared to if it was as an office block. Continuing support to the Arts Centre is much more important than any further support of the Cathedral rebuild.

234 - Jocy Kidd

Please continue to fund the art centre. It is a fantastic venue that contributes significantly to the arts and diversity sector.

>>>

Continue to fund the art centre.

2347 - Kate Flood

Not funding the Arts Centre when you are happily spending our money on niche groups like sports and event fans for stadium is ludicrous. The Arts are just as necessary as sport or religion

>>>

The funding for the Arts Centre should NOT be stopped. The Centre provides community facilities for central Christchurch and beyond. It has been an icon of how to rebuild after the earthquake. It provides many venues for a variety of tastes from restaurants, cinema, stargazing, events, weddings, great hall concerts, arts, history (Rutherford's den) etc etc. It would be a great loss to the city should it have to close.

235 - Louise Sturgess

Keep the Arts Centre Trust operational. What is more iconic in Christchurch than the Arts Centre? If the trust dissolves the asset will fall to you to manage anyway and that level of incompetence is only going to cost us (the rate payer) more in the long run.

>>>

[Parks > Heritage (Capital)]

Include the Arts Centre Trust funding in your \$870 million for parks and HERITAGE.

>>>

Keep the Arts Centre Trust operational.

2350 - Jack Bisset

We need to save the arts centre and the proposals to underfund it are a sad reflection on council priorities.

>>>

We must also save the arts centre which is a huge part of how our resilience emerged post earthquake. It is a solace for creativity and connection.

2352 - Cath Kelly

Christchurch Arts centre needs the continuing financial support from the council as this heritage building is SO important to all the people of Christchurch

2353 - Anthea Lees

The Arts centre is also well worth investing in with its historical links to the university.

2358 - Carolyn Moffat

[Grants & Funding > Orana Park Funding], [Transport > Transport (Roads (Capital))]

We do need to decide what needs to be done, and what is nice to have. For example, we probably should support the Arts Centre and Orana Park in the immediate future, to give them time to source other funds, but perhaps the upgrades to Gloucester St, Harewood Rd, and the streets near the stadium could wait a bit longer. Here's a thought ... perhaps on game or concert days, the streets closer to the stadium could simply be closed off, the same way Park Tce is when there are big events in the park. That would surely save a bit of money until we can afford to do these streets.

236 - Joanne Churcher

I am a rate-payer and I do not support the proposal to cease funding the Arts Centre. C'mon CCC. Get your priorities right. I'm happy to see the 'nice to haves' go, just keep funding the Arts Centre. Norman Kirk stood up in the Town Hall in 1973 and gifted the heritage site to the people of Ōtautahi Christchurch as an Arts Centre. After the earthquakes, thousands of individuals, businesses and other organisations helped The Arts Centre rebuild. I remember standing in the Great Hall after it had been restored, crying happy tears that it hadn't been lost to us. The Arts Centre is one of Christchurch's greatest taonga, the jewel in the crown. I'm happy to pay a targeted rate to maintain it. By effectively forcing the Trust to wind up, the Art's Centre will no longer have access to the many funding sources that are currently available. This proposal is short-sighted in the extreme. I'd prefer you sold City Care as that's an albatross around all our necks.

2363 - Andrea Wong

No I believe that the Art Centre needs to be a non negotiable commitment from our council.

>>>

I just want the Art Centre to be supported.

2369 - Rachele Allan

Fund the arts Centre

237 - Merchaleen Laaks

Please support the Arts Centre. I am shocked that not supporting the Centre is even an option for the Council. The Centre is one of our only beautiful historical buildings in the CBD and it's passion for bringing the arts to the citizens of Christchurch cannot be ignored. The events they provide gives the community access to the creative arts that they would never otherwise get (e.g., due to cost, opportunity) and this is invaluable.

2375 - John Reilly

The one thing that council has been supporting each year and which I would hate to see suffer is the Arts Centre. Some support for the Arts Centre is essential.

2377 - Hannah Maxwell

Please include some funding for The Art's Centre.

238 - Susan Gee

Art Centre funding is missing

>>>

Libraries and art centre are core for sense of community as well as their other benefits.

>>>

Arts centre is now our key heritage feature

>>>

I'm concerned at the failure to mention the Arts Centre in the plan. Post quake the Arts centre has become even more iconic as a living heart and symbol of Christchurch, and a draw card for locals and tourists. It would be heartbreaking to have this beautiful resource as a ghost.

2386 - Gail Ingram

[Libraries > Libraries (Operations)], [Parks > Other], [Parks > Heritage (Capital)]

More on libraries, fund the art centre, fund our public places - top priorities in a cost of living crisis. People need uplifting places to go, our heritage, places of education grow people and encourage visitors to the city.

>>>

Fund the Art Centre. Imperative for beauty, heritage, tourism of our city which defines us.

2388 - Guy Tapley

There appears to be no ongoing support in the Plan for the Chch Arts Centre, which has been run very efficiently by the Trust with funding help of CCC, private donors and volunteers (in-kind). No other city in New Zealand has such a large, vibrant and diverse heritage precinct providing commercial (high-quality restaurant, cafes, shops etc) artistic and cultural (performance, exhibition, film, history etc) services to both locals and tourists. I urge CCC to reinstate its support for the Arts Centre.

>>>

I believe the balance is about right but urge CCC to include operation funding support in the Chch Arts Centre in the Plan.

>>>

Don't forget the extraordinary value of the Chch Arts Centre to the City and its region. Restore its funding support.

239 - Tiffany Thornley

Very important to keep arts centre alive

2397 - Sarah McCrostie

No - don't cut funding to the arts centre

>>>

Don't cut funding to the arts centre. It is an important part of Christchurch's character and brings life to the city. It would be such a waste have it fold after all of the effort that has been put in to it.

240 - Bella Zilber

I implore the council to maintain existing funding for the Arts Centre as it is one of the best things we have in Christchurch. It forms core memories from my own childhood and my hope is that my own children will be able to enjoy it in the same way that I did, through all of the fantastic events and businesses that it supports. The Arts Centre is vital in many ways including hosting the Canterbury University School of Music. Please don't reduce funding for this great place. Phil Aldridge should have a pay cut though! From what I've read, his salary is much too high. Thanks for reading my responses

2401 - Arlee Folkers

Given the information that has been in the media about the Arts Centre, I think this needs to be funded by the Council as it is an iconic part of Christchurch.

2403 - Andrew Woodfield

[Strategic Direction>Have we got the balance right?]

No. The funding for the Arts Centre must be maintained. I wrote to council when the funding for the \$1billion (projected) stadium was proposed that the stadium (for a rich minority) would result in increased rates (That's come true), underfunding for critical services like road and path repairs (That's come true) and for valuable assets and services used for the wide benefit of the Chch ratepayer. And here now you are proposing cutting funding for the Arts Centre.

2406 - Chris Archer

[Rates>Residential Rates]

I would be prepared to pay more for funding The Arts Centre.

>>>

My comments below are in support of Te Matatki Toi Ora The Arts Centre's need for the continuation of of \$1.8M per annum to be used to cover annual operating deficits. I am Creative Director at The Arts Centre so am innately biased in my position, however, my aroha and commitment to the kaupapa of

the organisation is genuine. Previous to my role at The Arts Centre I worked for a decade at Creative New Zealand Toi Aotearoa the national arts development agency, responsible for funding the arts in Aotearoa. At Creative New Zealand I held the role of Arts Investments Manager, responsible for managing the artistic, fiscal, organisational and public engagement performance of national arts organisations across all artforms. The Arts Centre is unique in this country. Post the restoration, the centre has been turning its focus on becoming an arts organisation of national significance, and this has been spearheaded by the Director and myself and supported by the trust board. Not many arts organisations in the country own buildings, let alone heritage ones. I mean – why would you? This is one reason why The Arts Centre falls through the funding cracks – it has museums, it has art galleries, it has commercial tenancies, it offers venues for hire and it also curates an arts programme in collaboration with local and national creative communities. It is easy for agencies to point the finger at another agency to pick up the slack. Not totally museum, or gallery or arts, but a compilation of all. This has been problematic for us. Now is the time for courage to support this organisation – it has grown particularly over the last couple of years with the addition of a Māori arts space – Te Whare Tapere the establishment of which was driven by me and supported by our own Māori Arts Advisory Committee and took 4 years to realise. In fact, we are the only arts organisation in the city where such a committee supports the mahi of a pakeha led arts organisation. This is significant – unless mana whenua buy in to the mahi and the people, they will not support it. These relationships are based on trust and a courageous openness to discussing issues which can be confronting. We've opened a small black box space called Cloisters Studio – this has been well received by the creative community and interest in hiring the space and joint venturing with us has grown three fold this year. We pitched for an establishment grant from Ministry for Culture and Heritage and partnered with Circo Kali to convert the old Gym to Altiora to provide circo arts, burlesque, cabaret and other fringe experiences for audiences and work for artists. We have invested staff time and resourcing to assist Circo Kali to establish the space on the understanding that it will stand on its own legs and provide us with a market rate return within 3 years. From my depth of experience working in the arts, I can attest that we as a staff are not overpaid or over staffed. I would welcome the opportunity for any CCC staff to shadow us for a day to get a sense of the urgency of our work, the hours we put in and the outcomes we achieve. Many of our staff especially in the creative team work a 60 hour week and have to backfill our 'main' office/administrative tasks by also being available to run the myriad of roles that an arts organisation might contract in, such as ticketing, hosting, front of house, stage management, technical etc. We are in effect, a performing arts organisation, because that is our programming focus and like most other performing arts organisations, employ just three employees dedicated to delivering a programme - and this is a year long programme of an average of 1 event per day. (<https://www.aut.ac.nz/news/opinion/time-to-rethink-arts-funding-in-nz>). This is the average – we don't have any fat. Comparisons are complex, however, a 2019 study found that on average public funding for performing arts organisations comprised 63% of total revenue for one of these organisations, for another it was 86% and for another 100%. The Arts Centre's total anticipated income for 2024 is roughly \$5.5M. Arts programming costs are around \$350,000 including staffing, marketing, and delivery - \$213,000 not including marketing. Total budgeted income for arts programming is projected at \$586,700. Of this \$215,000 is approximately public funding. This is 37% of total revenue for arts activity. This demonstrates fantastic value for money and huge success with getting funding from other public sources. The problem is not the arts delivery that is costing us, it is insurance, rates and maintenance costs. Council is the only entity that can look at making a difference for us in this respect. It is important for citizens in this city to have the opportunity for unique intimate arts and cultural experiences in a beautiful heritage setting. I applaud the council for retaining

investment in its own arts and events programme, however, this cannot be at the expense of independent entities. I'm proud of the quality and diversity of arts programming at The Arts Centre - this is consistently reflected in reviews. In 2023, Dr Erin Harrington went on the record on Radio New Zealand to say that The Arts Centre's programming was a highlight of New Zealand's culture in 2023. At our public meeting arts leaders in this city said that The Arts Centre's vision is much stronger than pre-earthquakes, and that communities are at the centre of what we do and feel safe and at home at The Arts Centre. Most other arts organisations in the city have their own programme and employ or contract individual artists directly to contribute to a programme. We must contract in, but we also collaborate and work together with other arts organisations and have strong linkages - working in co-production and coordinating programmes to optimise audience and market share and save on spend. We work closely with the UC School of Music to develop and provide a public platform for emerging artists. We provide leadership in the arts in this city and we provide expertise and the infrastructure to support both individual artists and arts organisations. We are part of the arts 'ecology' of the city and the country. If we cannot sustain our creative communities and the support and services we provide, then not only are locals and visitors deprived of intimate experiences that uplift, distract, challenge, educate and entertain, then the support (and income) for the wider sector are impacted - those that work locally in AV tech, production (including film and advertising), direction and design for example. Tenants choose to be part of The Arts Centre community because of the vibrant activity, to which they also often contribute to. I cannot over emphasise that The Arts Centre is a community and works with communities. I am sure that Council is focussed on getting better value for money through funding. The key is in not duplicating effort but targetting funding to those organisations that are of an appropriate scale. At The Arts Centre we focus on supporting local - our Off Centre festival (with artist costs funded by Creative New Zealand) is the only festival in the city that provides local artists with an opportunity to showcase their work alongside their peers. Since losing the city's arts festival we are plugging that gap in the market (albeit without expensive nationally toured shows) - this year our loss is small - under \$5k. This is astonishing for a festival of 40+ events. We are the only independent organisation in the city that provides a 'cohort' residency programme (with artist stipends funded by Creative New Zealand). We are an arts organisation that hosts other arts organisations on site. I could go on. I am passionate about the arts in this city. I was the person who suggested to a council employee that the YHA over the road from us could be used as an arts space - what is that now? Toi Auaha. However, this appears not to be enough - I need my voice to be persuasive. I hope The Arts Centre and its huge community of supporters have achieved that goal. Don't cut off at the knees an organisation that has successfully managed an earthquake restoration on time and on budget and is now beginning to flourish and achieve on its new vision. There is no need for me to cite other council led projects that have cost ratepayers so much money but are failing or have failed. Please back a winner. You can share in that success.

241 - Anne-Marie Gilmore

I am very distressed to see that there is nothing in this Long Term Plan for continued Council support of the Arts Centre! This is an extremely valuable and unique site artistically to Outautahi. Personally, as a high school and Uni student I spent many hours there each week either rehearsing, performing, attending arts workshops, going to exhibitions and performances, attending the markets and soaking up the atmosphere and meeting a wide variety of craftspeople, artists, performers and friends. The

unique setting of the historical buildings fostered my love of architecture and strongly influenced my choice of degree studies. I was incredibly fortunate to be allowed to hold my wedding celebrations in the beautiful Great Hall in the mid 90's. The Arts Centre is a place very dear to my heart. I still perform both theatrically and musically in productions and concerts which use the Arts Centre venues, I've stayed at the beautiful Observatory Hotel for a special celebration, I regularly purchase gifts from the artisans shops and meet friends socially at the cafe's and wine bar. The current Trust is doing a fantastic job of bringing the Arts Centre back to the people of Christchurch post quake - it has been such a mammoth effort and the funding they have sought and gained shows the skill of the team looking after this important asset for Outautahi. I believe it is incredibly short-sighted of the Council to remove it's support for something so special and belonging to the heart of our city and it's people.

2410 - Lydia Thomas

I would like to express my support for the following organizations, which require future funding as they bring immense importance to our city... The Arts Centre: An iconic piece of Christchurch, drawing visitors from all over the world to enjoy its active, beautiful space. Without it, what is this city in terms of creativity and artistry? Many artists rely on funding that has already been cut, hindering their ability to share their work and attract people to the city. The Arts Centre brings creatives together in a safe, welcoming space that is free for everyone to enjoy. Let's support the arts, because without it, we are nothing.

242 - Ruth Wilkins

Please, please, please continue to fund the Arts Centre! It is an iconic and unique feature of our beautiful inner city that must be preserved. The diversity of spaces, activities, retail and heritage features that it offers must remain as part of our city's identity. Ngā mihi nui Ruth

2421 - Helen Foley

It is a special place in our city which celebrates people, art. Music, food and brings people together. The arts centre must be vibrant again so people come to the city centre.

2426 - Leo Dolan

I want the Council to support The Arts Centre. The Centre is owned by the citizens. Our city (Council) invested in the post-earthquake repair and should now ensure its ongoing viability. The required contribution is modest. The value of The Arts Centre is significant considering its history, its location and proximity to similar assets (Botanical Gardens and Canterbury and Ravenscar Museums). Considering the recent investment it would be irresponsible to discontinue support. The Arts Centre deserves priority over 'assets' such as Christ Church Cathedral that are 'privately owned' and present other options for retention and/or restoration.

243 - Peter Townsend

The Arts Centre must continue to be financially supported by council and the Art Centre Trust maintained.

>>>

My prime concern is protecting The Arts Centre. Council funding to support financial viability under the current construct is vital. Recent historic levels of funding must be Maintained . The Arts Centre is a fundamental component of our city, that needs ongoing Council support to remain viable.

2431 - Toni Stewart

The Christchurch Council needs to support our Arts Centre, an integral heritage precinct in our city centre. The Arts Centre historically, currently and in the future is a valuable asset that has the ability to provide and enhance a wide range of ongoing artistic development and enjoyment in the centre of our diverse community. The uniqueness of location and its historical relevance is extraordinary and requires Christchurch City Council support. We the citizens of Christchurch embrace and should continue to celebrate the Christchurch Arts Centre Trust

>>>

Looking after our Arts Centre has to be one of your priorities

2434 - Philip Bones

The Arts Centre MUST be supported to continue to be the heart of the city. I met a tourist from the UK about 2 years ago: he had just walked through the first rebuilt stages of the Arts Centre and was thrilled by what he saw, although appalled to see how much was left to do; I reassured him: of course the citizenry of Christchurch wouldn't let that project founder! I hope my confidence was justified. I have already supported the restoration personally to the tune of several thousand dollars and will continue to do so.

>>>

For emphasis: * Support the Arts Centre to the maximum possible.

2437 - Caroline Whittaker

Money needs to be supporting the Arts Centre. Not just for art, but as a place of connection and events and special activities to bring people together. It is one of the nicest areas that Chch offers.

>>>

Money for heritage needs to be also placed into the arts centre.

2438 - Courtney Bennett

I would prefer to see funding allocated to the Arts Center.

>>>

Please allocate adequate funding for The Arts Center

>>>

. I strongly consider it appropriate to allocate funding to The Arts Center as well. It is a jewel in the Crown of Ōtautahi.

>>>

Please allocate appropriate funding to The Arts Center. It is such an important part of our cities identity, and funding it aligns with a number of the LTP goals.

244 - Gary Burke

I believe it is important that the CCC continues to support The Arts Centre. Does would not mean a council run Arts centre as this to my mind would defeat the individualism the centre brings to the city. I am originally from overseas and have always loved the uniqueness The Arts Centre has within the city. This has become even more so since the earthquakes. Since February 2011 The Arts Centre stands out even more and has become a big draw card for tourists. It's beautiful architecture and rich history adds so much to our city. It welcomes all no matter their religious beliefs or ethic background. I believe it is vital to the city we continue to support The Arts Centre as valued centre of heritage and creativity.

2442 - Paula Bevilacqua

[Grants & Funding > Orana Park Funding]

Do not take funding away from Orana Wildlife Park or The Arts Centre. As a family, these are locations often visited as well as taking family from overseas here. As a breeding programme, NZ needs to be part of the conservation effort to keep animals from demise.

2445 - Joseph Davidson-Labout

Increase and maintain funding for the arts centre, it is a crucial piece of Chch's mauri

2449 - Jane Morris

I use it for several activities

245 - Talei Howell-Price

WHy on earth have you cut funding to the Arts Centre? They will go into insolvency and the council will have to run this behemoth. Insurance alone would be about 1.2 million. Outrageous oversight, I actually can't understand how anyone could draw a line through this funding without any consultation, questions or review....After that, the costs of running The Arts Centre will fall on the Council: insurance, rates, maintenance, and the legally required focus on the arts, culture, education, and creativity. Most of these activities are currently funded through sponsorship, donations, and volunteer hours – which the Council wouldn't receive. I, as ratepayer, will have to pick up the bill. The Arts Centre is growing as a community hub and tourist destination, arts are important for a healthy society. I am incredulous at the Council allowing this to happen.

2452 - Philippa J Flood

You need to fund the Arts Centre. If you can spend horrendous amounts of money on the stadium , then you can find some money for the Arts Centre which is a taonga and absolutely essential to the character and culture of our city. It is one of the few precious sites we have remaining of pre earthquake Christchurch and holds many memories for many of us. it must be funded and supported by the council.

2454 - Markus Pahlow

I would ask the Christchurch City Council to please continue to fund the Arts Centre. To me the Arts Centre is one of the most important parts of Christchurch's history and identity. I cannot think of another building complex (and the activities that it includes) in Christchurch that I want to show more visitors so that they can experience its beauty. Every time a visitor comes to visit I am looking forward to show them around the Arts Centre - with pride and joy. It is such both such a wonderful building complex, and also a spectacular venue for a broad range of activities that bring long-lasting memories for our entire family. After bringing it back to the community post-earquake (thank you!) the council should not stop to allocate funding in the long-term plan. It is part of the heart and soul of the CBD. Something to be kept and cherished.

2455 - Ben van Opzeeland

One crucial omission is the funding for the Arts Centre. It is a jewel for Christchurch and the businesses within provide so much value for the community. Instead of sinking money into restoring old landmarks (churches) lets prioritise the ones we have already invested in and restored - such as the Arts Centre.

>>>

Would love for you to continue to fund the arts centre!

2456 - Rachel Skews

I dislike that it provides no funding to the Arts Centre. I moved to Christchurch for post-graduate study in science, I chose to stay, work and buy a house in Christchurch because of its thriving arts scene, of which the Arts Centre is integral. Please continue funding the Arts Centre.

246 - Rose Shayler

No, not at all. Fund the arts, fund music and events. Please don't stop funding the art center!

>>>

Fund the art center.

>>>

Fund the art center. It's a fraction of any of those costs.

>>>

Fund the art center.

>>>

please fund the art center. it's an incredible hub in the city and it means so much to so many people.

>>>

Also fund the art center.

2460 - Nicholas Yardley

It's evident you're concerned about the funding allocation for the art center. Requesting transparency in the center's financial records, including salaries, is a reasonable step to gain clarity. Losing such a valuable community space to corporate interests would indeed be regrettable. As a taxpayer, you rightly expect both the council and the art center to collaborate promptly to address these issues and find a resolution.

2461 - Marjorie Manthei

PLEASE continue funding the Arts Centre. For such an important city-wide facility (for heritage reasons, as well as how it is used), there should be certainty about ongoing funding.

2462 - Mark Cox

The Arts centre is a gem in the city, to lose that would rip one of the best parts of the CBD out,

2467 - John Ogier

Not if it means the Arts Centre is under resourced. At worse, it may need rates to increase by more than the 12.4% & 13.24% figures. I'm prepared to wear that.

>>>

I'm definitely not happy about the cut back in support for the heritage Arts Centre.

>>>

There is an obligation to support the Arts Centre that arises from its inception. The city was gifted it on the understanding it would be supported. Thankfully the Trust had wisely taken out good insurance which has covered the majority of the earthquake repairs so that it didn't become one of the "old dungas" that were better bowled. While it houses businesses, arts facilities and a hotel, and provides a tourism draw card, it also provides venues for community groups such as our choir. I hate to think what our hire charges would have to go up to if the Arts Centre lost its traditional levels of funding. Similar increases would need to be faced by the business users too.

2468 - Sally McLennan

Not if you don't protect the Arts Centre and keep its as part of our vibrant city

>>>

Fund the arts centre please

>>>

Please preserve the arts centre. I lived 16 years in Otautahi and many of the happiest memories of my life are times at the Arts centre. It's the beautiful heart of Christchurch. From my first visit as an overwhelmed small townner new to the big smoke, eating potato pancakes and Mexican, to running into Le Cafe as a bride during a downpour and having all the patrons sing here comes the bride. Mutton birds playing at the Dux. Meals at every eatery with decades of friendships as a backdrop. Drinking in the sculpture....Christchurch has lost so much heritage. Please keep this precious treasure

>>>

If this is relevant, the arts centre was far more a part of life, more living for more people, than the Cathedral, say. Obvious isn't always better

2469 - Kaitlyn Wylie

Fund the arts centre. It is so so important that culture and heritage is preserved. Especially in a city that has lost so much of this. The arts centre is the heart of the city. It is consistently bustling with people, from Chch and abroad. It is a special place to many, I personally visit the arts centre at least 2-3 times a month, for coffee, shopping, wine or to check out the Teece museum. We also had our wedding reception in the great hall. My grandmother went to high school in the buildings 100 years ago. It is such a taonga for the city and requires funding to stay this way.

2476 - Reuben Scott (Simeon Park Community Group)

Funding for the art centre to continue would be a priority too.

2477 - Rachael Ann

When we are emotional or in need, we always turn to music, film, writing, crafts etc to heal ourselves. The arts centre is a major part of our identity and it needs funding to survive!

>>>

Please continue to fund the arts centre!

2479 - Jacqui Raymond

However I'm not happy about the proposal to stop funding for the Arts Centre. There are some things which are crucial to keeping Christchurch an attractive place to live, and I think the Arts Centre is one of those things. Start up the food markets again!

>>>

[Other/ Special Interest Topics > Cathedral]

If there was a choice between supporting the Cathedral or the Arts Centre, I believe most would choose the Arts Centre. I don't want it to be sold off.

>>>

[Grants & Funding > ChristchurchNZ Funding]

I would rather money went into supporting the Arts Centre than attracting events like Sail GP which might provide a few hours excitement for a relatively small group of people but it's at a high cost to our environment.

>>>

Christchurch lost so much after the earthquakes. The Arts Centre is one of the few beautiful old places we left, and it should be kept for the people of Christchurch, not sold off to outside interests. I think we need to look at ways to make it more profitable. It's too precious and important to lose.

>>>

The Arts Centre is there for everyone whether it is just popping into one of the cafes, or taking a wonder through the beautiful courtyard. I have never been to Sail GP but I have been many many times to the Arts Centre

>>>

The council needs to keep funding the Arts Centre as it is a precious resource that everyone visits at some stage. It provides long-term joy and beauty to many, compared with events like Sail GP, which provide a brief spot of excitement for a relatively small number of people

248 - Eric Livingstone

Omitting funding for the Arts Centre is a serious error

>>>

The Arts Centre is crucial to us as we visit it almost weekly

>>>

The Arts Centre is a key anchor to the central city both for residents and tourists

>>>

The Arts Centre funding is crucial to the health of the centre of the city and is a must for continued funding

2481 - Paul Leighton

Keep funding to arts centre

2484 - Stephen Pink

The Arts Centre is a well known Christchurch icon. It would be a serious shame to not fund this place. Every week I visit the centre and have coffee at Bunsen, buy bread from France's Nation, and always feel lucky that we've got such a beautiful place here in Christchurch. All council members should spend time here, and you would very quickly come round to the idea that this place needs to be funded.

2485 - Lucy hill

(Recreation, Sports & Events > Community Arts]

keep the arts centre and funding in general for the arts, a super important part of any city

2486 - Matthew Lynn

The Christchurch Art Centre is not just a collection of historic buildings; it is the heartbeat of our city's culture and creativity. The Art Centre is a vibrant hub where art, history, and community converge. Preserving the Christchurch Art Centre means maintaining a vital space where all can explore and participate in the arts, deepening our connection to local culture and history. It is a place where creativity is nurtured, and community bonds are strengthened.

249 - Sophie Gilmore

Please support The Arts Centre. This heritage site is one of the few we have left in Christchurch and holds so much historical significance to the community.

2494 - Alison Pink

The Art centre is the jewel in Christchurch crown! Please ensure that it gets the funding to continue as it is now. I visit the centre frequently and enjoy exploring the all the different amenities, shops and exhibitions.

2498 - REDACTED REDACTED

Christchurch has lost so many of its heritage buildings.

The Arts Centre is an amazing location.

These buildings should be funded ahead of a lot of other council spending.

We don't need new art displays, like the Chalice etc. We need to keep these beautiful old buildings.

Once gone, we can't get them back.

250 - Angelica Dumaguin

I would like for the council to support the Arts Centre as I believe it is a great heritage and platform to continue cultivate the Christchurch culture.

2505 - Leonie Reschenberg

In my rather short time as staff member of Te Matatiki Toi Ora The Arts Centre I have experienced so much joy and formed deep appreciation and connection to the site and especially the people creating this wonderful community. I had the chance to take on different roles to support the management team and make their and now also my visions come true. I encounter different, beautiful people in my daily business on site: I meet wedding couples in preparations to their big event, checking-in at The Observatory Hotel, set up games and guest books in the Great Hall, marry in the quad, take photos in the lecture theatre and, after the party, return on the next day for a tour around the site and a tram ride before leaving with the biggest gratitude for their time with us. I meet local families and school teachers on the search for entertainment and education for children and teenagers, staying with us for hours and visiting everything on site, from Rutherford's Den to Teece Museum, from Tiny Toy Shop to Fudge Cottage, from pie to gelato and from classes at Paint'n Sip to movies at Lumière's. I meet graduates from the 50s returning to their classrooms and telling stories to their grandchildren and graduates coming from the stadium to take photos on the historical site of their alma mater. I meet cruise ship and bus tourists walking through the clock tower, not knowing what to expect but soon being stunned by the architecture and history when arriving in the quad — just in time for a Lunch Time Concert with nationally renowned musicians or a free Opera performance by local talents. I meet artists who share their stories, their difficulties with finding affordable studio spaces and access to venues for (first) performances and exhibitions. Artists who work so hard to share their passion and talent but who have to keep waiting for institutions to welcome them. And after spending time on our site, thanking us with immense appreciation for our support and offered opportunities. I meet locals revisiting the space for the first time since the earthquakes, absolutely fascinated by how much there is to see and do, taking coffee breaks in between visiting the Revival exhibition to see the documented restoration process and Te Whare Tapere to meet beautiful artists of works they never experienced, connecting with the site in a new way, finding new passion for Christchurch's culture. They catch up to those having been with us since reopening years ago, having attended several performances, workshops, tours, classes, markets and festivities. I watch incredibly hardworking staff do their absolute best possible, achieving magnificent results for a small amount of money — in salaries and

expenses for the institution — more often than not sacrificing much of their own personal time in order to work late and see these results through. The efficiency of the management is absolutely impressive, every single day. Te Matatiki Toi Ora The Arts Centre deserves much, much more acknowledgement for the management, activation of the site and community it offers to every single citizen and tourist who is visiting the space. Not only is it answering the Act of Parliament and the vision of the trust, it is also what every single one of us deeply believes in. The passion and effort of the people making this site what it is, a community for everyone, will be lost without continuous funding of the city council. Make the right decision and support this unique piece of Christchurch.

2508 - Oliver Hutchison

I support maintaining (and increasing) funding for the Arts Centre. It is a significant cultural asset to the city and should be supported to keep up the good work. I have attended many great events at the Arts Centre since moving to Chch and I enjoy visiting the many excellent businesses that operate there. Any reduction in funding for the Arts Centre will hit the creative industry hard and this would be a real shame. No one comes to Christchurch to see our stupid highways! A city lives or dies by the success of its artistic scene, and the Arts Centre is vital for supporting creativity in Chch.

>>>

Fund the Arts Centre (fully!).

251 - Bettina Evans (Whitecliffe College)

I very strongly support a continued financial support for the Arts centre. We hire their rooms monthly for our Master's Programme in Arts Therapy. Our students, who come from all around Aotearoa, love coming to this space- it is indeed unique in New Zealand. It is a local taonga and so should be supported by the local Council. It is a true meeting point of past, present and future, and the Arts Centre is doing a fabulous job bringing the Centre alive with a huge variety of activities and events. Please continue your support- generations after you will thank you.

2513 - Lucy Richardson

I also think the Arts Centre is an integral part of the centre city and needs support.

2514 - Jeannie Murtagh

You have missed something crucial to Christchurch in your long term plan, we must as a city of rate payers support the ongoing financial payment to the Christchurch Arts Centre - we lost too much in the 2011 earthquakes to risk also losing these exquisite heritage buildings - we will be no better than the developers from the 70s who wanted to demolish the centre if we allow it now to slip into receivership!

2522 - Rosa Hughes-Currie

Arts centre should be funded.

>>>

[Spending>Our Proposed Spending]

Mostly good but the Arts centre should be funded - it provides a cultural heart for the city.

>>>

[Strategic Direction>Have we got the balance right?]

The Arts Centre should be funded.

253 - Daryl Cotterell

no , refusing to fund the Arts Centre is short sighted , impractical , and ignorant without any alternative sponsor.

>>>

The Arts Centre is one of Christchurch's gems ..it was the workshop of Rutherford , the original University of Canterbury complex , and has too much historical wealth to ignore its significance.

>>>

yes , include what is important to citizens and include whatever costs we need to pay to support the Arts Centre ..because let's face it , it will be far cheaper to accept out responsibility ,rather than having it landed back in our rates budget after a huge legal fee on beauracratc wrangling.

>>>

I repeat , 'yes , include what is important to citizens and include whatever costs we need to pay to support the Arts Centre ..because let's face it , it will be far cheaper to accept out responsibility ,rather than having it landed back in our rates budget after a huge legal fee on beauracratc wrangling. '

>>>

Include the Arts Ctre in any budget as it is a Parliamentary obligation that noone else should fund as one of ChCh's assets.

>>>

Heritage , History will show this Council will be the most dysfunctional ever if we overlook the needs to retain our History , and what better monument is there to our History ,than the Arts Ctre.

>>>

just the Arts Ctre

>>>

we have a venue for International buskers , international presentations and celebrations , all at the Arts Ctre ,so include this venue in our future.

>>>

[Planning & Strategic Transport, Urban Design, & Urban Regeneration > Costal Hazards Adaptation & Adaptation Planning]

happy to agree if it were ratified with due diligence , unlike what is happening with the proposed lack of support for the Arts Ctre.

>>>

I have little confidence in this council , you are not demonstrating and positive stategic priorities for ChCh if you dont fund the Arts Ctre ...are you pepole even aware of the consequence if the current funding is withdrawn.?

>>>

YES , Please keep the Arts Ctre funding , whatever else you are considering.

2530 - Clare Thompson

[Strategic Direction>Have we got the balance right?]

No Arts Centre funding!

[Coder note: later expresses support for AC funding]

>>>

Please don't stop supporting the Arts Centre

2533 - Steven Muir

Funding for the Art centre also important.

>>>

Also specific funding for art centre in heritage category

2534 - Tony Ryan

Fund the Arts Centre! It is impossible to think of Christchurch without its vibrant Arts Centre. With around 1m visitors over the past year, that's a lot of tourists, and in a relatively small city, that's a lot of economic benefit. The Centre's buildings are the crown jewels of Christchurch's built heritage, and of the cultural precinct of Christchurch; it needs to receive adequate funding to remain as a community asset and a key piece of what the city offers to the visitors from other places. The fact is that arts ventures are seldom fully self-sustaining, and generally require some public funding. Additionally, there are some very real issues facing the Council if it decides not to reinstate the funding, not the least of which is who will manage the facility; I don't doubt it will cost more in the long run. It is a wonderful community asset, with a set of unrivalled heritage buildings, an enormous amount of post-earthquake restoration, a vibrant range of cultural offerings and a team which works hard to enliven the spaces. I think it is great value for the small sum of money required. Going forward we need to protect what we already have and look more carefully at what is proposed for the future as new items may just not be feasible/affordable at the moment.

>>>

[Grants & Funding>ChristchurchNZ Funding (General)]

Funding to ChchNZ could be reduced to enable funding the Arts Centre - these two items are actually linked.

254 - Ursula Cheer

Yes. It is astonishing that the Council is apparently not going to fund the Arts Centre any more. Quite apart from lack of consultation about this, the Arts Centre is one of the few heritage buildings left in Christchurch and plays a fundamental role in the culture and attractiveness of the city as a place to live and work and play. The tenants of the Centre and the staff, as well as the buildings, are exactly the stuff that the Council should be supporting, and as a ratepayer, I fully support my rates contributing to the richness of our city in this way. As well as serving the citizens of Christchurch, the Centre and its activities and services also, you may have noticed, attract tourists. If the Council ceases funding in this way, it appears it would have to take over the running of the Centre, something it does not have the resources and skill set to do. The costs involved in making such a change and then in successfully running the Centre (either through contracting out to appropriate specialists in the private sector, or through new hires) would far outstrip any current savings the Council is trying to make. Surely someone has done this basic maths? The Arts Centre means a great deal to this city. The Council, through me and other ratepayers, should be funding it. Please restore the funding and cease the distress and uncertainty caused by its removal.

2541 - Kelsi Mosley

I believe Council should continue to provide annual funding to the Arts Centre, as a crucial heritage facility in the city and support the ongoing funding sought by TAC, including insurance being part of councils group insurance scheme

2546 - Keith Power

I am very concerned that funding for the Arts Centre is under threat. The arts in general enrich our lives and provide a unique identity for us. They rely on something that is not purely commercial to exist, eg public funding, but are nevertheless essential for a satisfying quality of life. Our lives in Christchurch would be so much poorer without the marvelous Arts Centre to visit and spend time on the cultural, lively, heartwarming and satisfying aspects of life here in Christchurch. These are the things that make us different, that make us human, and that encourage others to come and visit to share our experiences. This must not be abandoned to the whim of external market forces but actively driven by our democratically elected council.

>>>

Not if the Arts Centre loses funding.

2549 - Aria Maxwell

I would like to see the Arts Centre funding included in the Draft Long Term Plan because it is really old and it's free to visit. The Arts Center is also the biggest collection of historic buildings in New Zealand and it would be a shame to see it go.

255 - Emma Pickup

Save the arts Centre!! Revise this part of the plan that is neglecting the arts centre, it's value and care.

2552 - Katie Coluccio

I strongly support including ongoing funding for the Arts Centre within CCC's budget.

2554 - Paul Schwalger

Supportive of the Arts Centre receiving funding

256 - Bill May

[Transport > Other]

No, why was the roundabout at Clyde/Ilam redone, there had not been major accidents there? Put the money towards the Arts Centre funding

>>>

Fund the Arts Centre as you have in the past, what an asset and it brings people to the city centre.

2560 - Rosemary Ford

DO NOT REMOVE ARTS CENTRE funding. This complex is the beating heart of the city. It is a great attraction for tourists and a wonderful focus for local people. IT IS THE MOST SUCCESSFUL AND INSPIRATIONAL POST EARTHQUAKE PROJECT.

PLEASE DO NOT REMOVE ARTS CENTRE FUNDING

2567 - Elyse Rennie

What about the arts centre?! With all the effort put into these beautiful heritage buildings doesn't it deserve to have some funding to have its chance to shine? Please consider what this amazing place does for Christchurch city's population and for tourism.

>>>

Arts Centre!!!

257 - Belinda Meares

Yes. Please reconsider your decision not to fund The Arts Centre's essential costs relating to insurance, rates and contribution to its operations as a precious heritage site. This is an alarming decision, which would see its citizen-owned operating Trust become insolvent by mid 2024. How short-sighted. The Arts Centre is in my view the cultural heart of the city, and has been wonderfully restored - still not quite there yet! The site is so beautiful now, and very visitor friendly. My relationship with the site goes back to my first year as uni student, 1973, when the Arts Faculty was still located there before moving to Ilam. It is wonderful that the university's school of music has returned! As a young feminist woman I recall helping organise the first-ever Women's Arts Festival in the country, over three days at the Arts Centre (1977 or 78?). Indelible memories. Over the years it has been so gratifying to see the Centre evolve into an irreplaceable hub for all sorts of creative, community-based arts and crafts (don't forget the Court Theatre, Southern Ballet etc), which have been given a home and chance to develop and thrive. The Centre has become a vibrant location for small businesses which are compatible to the arts vibe of the place. These businesses are boosted each time the Centre hosts events and shows. The most recent, Off-Centre, had a marvelous variety of shows, to attract a wide range of audience ages and interests. I sat next to a Japanese American couple at a concert featuring Japanese musician Rakuto Kurano. They were overjoyed to have wandered into the Centre on the last day of their trip, and discovered the festival and Rakuto's concert. Impeccable lucky timing. They will return home and be great promoters of Christchurch's cultural qualities to their compatriots, I have no doubt. Tourists are well served in this city, as attractions are so nearby in the city's centre, from the Gardens, the Arts Centre, the Square, Town Hall, etc... The management of the Centre has been agile and responsive in its programming. I have been to many concerts and exhibitions that showcase the arts of our city's varied cultures and communities, especially mana whenua, and this makes me very proud. I make a point of supporting the Centre's events as much as I can, as I know friends do also. It is devastating to think that the CCC cannot see what a gem The Arts Centre represents and is going to stop supporting it. Unfortunately, at the same time, the council is committed to lavishing expenditure on Te Kaha stadium to host big, one-off sporting events and concerts mainly with international celebs that will pass through the city and are not at all connected with our local communities of arts creatives and arts lovers. I object to this mismatched prioritisation. I'd far rather my rates went to support The Arts Centre than the stadium. There, I've said my bit. Thanks for the opportunity to comment.

2571 - Anna Walker

Doesn't seem to be any funding for the arts centre - this area has huge potential to be a tourist hub + a place for families and individuals to explore arts, shows, culture and local businesses.

2573 - Gwyneth Graham

The arts centre

2576 - Matthew Polson

The arts centre should be supported,

>>>

The council must allocate additional funding for the Arts Centre. As a resident, the heritage buildings I use and admire the most are the Arts Centre. When guests visit us from out of town, the arts Centre has always been the place we take them first. Following the earthquakes, the governing body of the Centre have done a fabulous job of rebuilding with very limited funding

2578 - Sarah Polson

I think there is an oversight in not funding the Arts Centre.

>>>

- although I'd prefer that some of those rates actually go towards the Arts centre.

>>>

So does the Arts Centre.

>>>

If you're spending \$870 million on parks, heritage & the coastal environment - why can't some of that be for the Arts Centre?

>>>

Again - why not help to keep funding the Arts Centre???

>>>

If you want a thriving, vibrant and inclusive city . . . The Arts Centre ticks these boxes too!

>>>

The Christchurch City Council MUST support the Arts Centre. My husband and I held our wedding breakfast in The Great Hall. It has so many cherished memories. The fact that we met at the University of Canterbury and were able to link our tertiary education back to where Rutherford himself studied. The ornate and detailed woodwork within the hall itself, as well as the stained glass window documenting some of Ōtautahi's history is sublime. I have had the joy of attending book launches as well as listening to live music in the Arts Centre - all made the more special by the history of this cultural taonga. There is NO WHERE ELSE like this in Aotearoa New Zealand. We speak of the

significance of historical buildings - THIS IS LIKE NOTHING ELSE! The buzz and excitement seeing visitors and locals alike in the Arts Centre is a joy and treat. Please do not be backwards thinking. Please fund our Arts Centre.

2579 - Simone Hindin

To be honest I've skimmed a bit, my concern is the lack of funding for the arts centre.

>>>

Loved the vision day in the life but here's the thing, as you're wandering from the botanic gardens or museum to the art gallery what do you go past/ through... that's right the Arts Centre. Probably the most significant public area in the city. I'm appalled that you have withdrawn support for it. What's going to happen, will it just crumble away like another derelict post earthquake building. We still have it, it's survived, failing to maintain what is a key resource and important part of our heritage is just stupid. It's a false economy and one that will cost the city plenty one way or another.

>>>

So, this Arts Centre complex. WTF! Either you have a plan and just forgot to mention it or you've made a huge oversight? To me the Arts Centre, far more than the Cathedral, is the heart of Christchurch. From attending the theatre with my father to later performing there myself, and drinking or dinner at the Dux, shopping in the market, or just hanging out with friends. It's a fantastic out doors / in doors public space with no equivalent that I'm aware of in any NZ city. It's waaaay more important than some stadium or that awful inaccessible conference centre. Clearly it's current funding model isn't sufficient so do the work and sort it out.

258 - Kevin Clarke

No you've gone away from what the art centre used to be .. ie a place for all. It's too high brow and caters more for the fringes than the middle ground and your rentals are far too excessive to be realistic to many creatives in the city. Get off your high horses and stop being only for the city's elite

2584 - Susan Stevens

Provide continued funding for the Arts Centre. It is an extremely importance cultural and historical part of our city, and should be fully supported. It is of much greater significance than cycleways and covered stadiums.

>>>

Fund the Arts Centre. It is an important cultural and historical building, and it belongs in our city.

259 - Margaret McEvedy

Yes but again there will be a lot of wastage in time and resources to get there. Please reinstate funding for the Arts Centre as an absolute priority. I see \$870 million is allocated for parks, heritage and the coastal environment, surely that must include funding for the Arts Centre, a cultural icon for Cantabrians and tourist attraction that can not be overstated.

>>>

and again the funding of the Arts Centre is vital on all levels for CHC.

Maintain essential buildings such as The Arts Centre, parks and recreation areas; upgrading of roads and existing essential services until we can find our way back to a semblance of fiscal order.

2594 - Mark Belton

The future of Christchurch Arts Centre is imperilled due to omission of funding support in the Draft City Plan.

One can only think its omission is a mistake, as it beggars' belief our City Council would be so Philistine as to make such an error. All people who have knowledge and appreciation of the Arts Centre are gobsmacked, astounded.

We submit the funding amount is miniscule relative to the importance of maintaining the functioning of the Arts Centre.

Our City Council as owner of the Arts Centre precinct on behalf of the people of Christchurch has ultimate responsibility, a duty of care, both for maintaining the outstanding heritage value of the buildings, and maintaining their function as a central arts and cultural precinct.

The historic and architectural character of the Arts Centre buildings is inseparable from its functioning as an arts and cultural activities precinct.

Its value to our city is beyond calculation, its existence an extraordinary privilege. No other New Zealand city has its equivalent. Indeed, it is rare in the world.

A feature which is the envy of other major cities, a distinction which is very much part of our city's proud history, captured and woven in beautiful architecture, so much part of the foundational history of our city.

The post-earthquake restoration of the Arts Centre buildings is itself a world-leading heritage recovery achievement. A magnificent restoration, which is a proud achievement of our city.

Worth noting, the Arts Centre restoration was only possible because of \$150 million insurance cover secured with urgency by Arts Centre immediately following the huge September 4th 2010 quake. Without this insurance cover initiative, the Arts Centre restoration would not have been possible, and it would not be thriving functioning public arts precinct it is today, and it would not be a City Plan item.

Tragically, and salient to our city's ongoing post- recovery costs, our City Council leadership, unlike the Arts Centre, failed to urgently secure sufficient earthquake insurance to safeguard our city's built-environment assets.

Let us now focus on the function of the Arts Centre; the ongoing enjoyed humanising experience that is enabled through this magnificent complex of buildings.

The Arts Centre serves as a meeting place for the people of Christchurch and visitors to our city, a place for events, celebration, relaxation, exploration, and adventure. For visitors from other parts of New Zealand and from overseas, it is a defining experience of our city.,

The Arts Centre's character, of course, is about the architectural dream of the first settlers to the city, a noble and idealistic dream, a spiritual dream, which found architectural expression through Mountfort, the settlements first architect, expressed in the key heritage buildings in the central city area, built with stone, in the Victorian Gothic style, that connected early settlers with the architectural heritage of their forebears.

The amount of money needing to be contributed into the future can only be described as miniscule, when weighed against the Art Centre's central role for the city's heritage, and for arts activities going forward, and for tourism and the creative arts economy of our city.

It is requested CCC funding support for the Arts Centre is maintained into the future at circa \$1.8 million per annum.

>>>

Draft Christchurch City Plan Submission: Mark Belton

Subject: Christchurch Arts Centre Funding

The future of Christchurch Arts Centre is imperilled due to omission of funding support in the Draft City Plan.

One can only think its omission is a mistake, as it beggars' belief our City Council would be so Philistine as to make such an error. All people who have knowledge and appreciation of the Arts Centre are gobsmacked, astounded.

We submit the funding amount is miniscule relative to the importance of maintaining the functioning of the Arts Centre.

Our City Council as owner of the Arts Centre precinct on behalf of the people of Christchurch has ultimate responsibility, a duty of care, both for maintaining the outstanding heritage value of the buildings, and maintaining their function as a central arts and cultural precinct.

The historic and architectural character of the Arts Centre buildings is inseparable from its functioning as an arts and cultural activities precinct.

Its value to our city is beyond calculation, its existence an extraordinary privilege. No other New Zealand city has its equivalent. Indeed, it is rare in the world.

A feature which is the envy of other major cities, a distinction which is very much part of our city's proud history, captured and woven in beautiful architecture, so much part of the foundational history of our city.

The post-earthquake restoration of the Arts Centre buildings is itself a world-leading heritage recovery achievement. A magnificent restoration, which is a proud achievement of our city.

Worth noting, the Arts Centre restoration was only possible because of \$150 million insurance cover secured with urgency by Arts Centre immediately following the huge September 4th 2010 quake. Without

this insurance cover initiative, the Arts Centre restoration would not have been possible, and it would not be thriving functioning public arts precinct it is today, and it would not be a City Plan item.

Tragically, and salient to our city's ongoing post-recovery costs, our City Council leadership, unlike the Arts Centre, failed to urgently secure sufficient earthquake insurance to safeguard our city's built-environment assets.

Let us now focus on the function of the Arts Centre; the ongoing enjoyed humanising experience that is enabled through this magnificent complex of buildings.

The Arts Centre serves as a meeting place for the people of Christchurch and visitors to our city, a place for events, celebration, relaxation, exploration, and adventure. For visitors from other parts of New Zealand and from overseas, it is a defining experience of our city.,

The Arts Centre's character, of course, is about the architectural dream of the first settlers to the city, a noble and idealistic dream, a spiritual dream, which found architectural expression through Mountfort, the settlements first architect, expressed in the key heritage buildings in the central city area, built with stone, in the Victorian Gothic style, that connected early settlers with the architectural heritage of their forebears.

The amount of money needing to be contributed into the future can only be described as miniscule, when weighed against the Art Centre's central role for the city's heritage, and for arts activities going forward, and for tourism and the creative arts economy of our city.

It is requested CCC funding support for the Arts Centre is maintained into the future at circa \$1.8 million per annum.

Mark Belton
Governors Bay

2598 - Alice Tulkens

Its absolutely wrong to take away funding to culturally significant sites like the arts centre , if anything more money should go to a place where most of Christchurch visits and tourists too

260 - Manu Hepi

Find the arts centre, invest more funding into poorer communities like Aranui and New Brighton, Invest in education.

2601 - Laura Lawrence

[Grants & Funding > Orana Park Funding]

I believe Orana Park and the Arts Centre should be supported with adequate funding.

>>>

Adequate funding should be made available to Orana Park and the Arts Centre.

2602 - Dorothy Jordan

It's a unique place, part of Christchurch, an iconic centre much loved by Christchurch public. There's lots of things and performances I've been to there over the forty years I've lived here, and hope to go to many more. If it's not funded Christchurch will be the loser. It will lose venues for performances, eateries, and valuable spaces for learning and performing. As well as the market, the Arts Centre attracts many tourists too

2604 - Alex Samios

It is deeply saddening to me that no funding is included for the Arts Centre. As someone who studies at UC and regularly uses the services there and attends events there, my life, and the lives of the other students dependent on the Arts Centre will be significantly impacted by the financial turbulence caused by this plan. The Arts Centre means a whole lot to the many people like myself who cherish it, so it would be a big waste to not fund it. Thank you for taking your time to hear me. Alex Samios

261 - Evelyn Strecker

After all the work to renovate and rebuild the Art Centre, I find it essential for the Council to support this important historic feature of Christchurch. It is part of our city and needs to be upheld and supported at all costs. It attracts a lot of tourism and is a feature alongside the Cathedral. It offers valuable art projects that cannot survive without Council support!

2618 - Margaret Stewart

[Grants & Funding > Orana Park Funding] , [Other/Special Interest Topics > Cathedral] , [Spending > Te Kaha]

I would like to contribute towards the Orana Park, Art Centre, Anglican Cathedral requests for money. Since I am not going to be using the stadium you can divert that percentage of my rates from the stadium to Orana Park, Art Centre and Cathedral. I am sure there are a lot of other people who would be keen to do this as well

2619 - Laura Cosgrove

Funding the Arts Centre and Orana Park (especially) are unique identifying factors to Christchurch.

262 - Maria Mendoza Nieto

No if you're not funding the arts centre

>>>

Fund the arts centre. With more people struggling with the cost of living, the arts are so important in bringing people together and giving people space to enjoy life and increase their quality of life.

2621 - Caroline Gray

Appalling decision to cut arts funding. Arts Centre requires funding.

>>>

Find the arts to enable the city to flourish.

>>>

No mention here on other cultural focus areas such as Arts Centre which should receive council support.

>>>

Arts Centre

>>>

Arts Centre needs funding.

2622 - Rob Murfitt

The current plan involves no funding for operating cost of the Arts Centre and this is a travesty which must be addressed

>>>

However, the failure to support the Arts Centre is wrong. It is a cultural and heritage amenity which should be supported in part by ratepayers.

>>>

The failure to support operating costs of the Arts Centre is a baffling omission. The escalation in insurance costs is a cost the current management cannot cover. I encourage an immediate review of the Plan to incorporate sufficient funding at least matching that of the past years.

2628 - Scott Flutey

There is no way that "A cultural powerhouse city" can be achieved if The Arts Centre loses funding or support from the Council. I am very concerned about flow on effects to other community outcomes if The Arts Centre is forced to shut down through the cancelling of Council support.

>>>

I want Christchurch City Council to explicitly and tangibly support The Arts Centre through the 2024-2034 Long Term Plan. As a descendant of Ngai Tahu and Kati Mamoe, and Pakeha settlers in Canterbury, The Arts Centre is one of the main places I like to visit when I come to Christchurch. It helps me feel connected with my tūpuna and is highly culturally enriching. It is a highly welcoming and inclusive space, and I have struggled to find such a space in earlier times when visiting Christchurch. I see its reinstatement as one of the few true positive stories coming out of the earthquakes. It adds so much positivity to so many diverse communities in the city and further afield. The Arts Centre is closely intertwined with the arts and heritage sectors, of which I am a part of. To omit any mention of it from this draft document has hugely concerning ramifications. The Arts Centre already operates on an absolute shoestring - nothing more can be cut. If it had to shut down it would likely revert to CCC anyway through its legal structuring - and I doubt CCC could deliver anything close to the thriving facility we see now. I know the Arts Centre has requested you consider the following - Absorb the annual insurance bill into its own group insurance scheme = \$1.2 million. - Rebate rates = \$205,000. - Cover some ongoing operational costs (heritage maintenance) = \$400,000. This adds up to approx. \$1.8 million, which is the average amount Council has paid over the past three years. It equates to \$1 per month, or less, for the average household. I echo this request. If it was to close I would probably never consider coming back to the city, whether for a holiday or to live as a resident.

2630 - Tamara Smith

The Arts Centre links us to our historical past of learning, questioning and inspiring and the funding the Arts Centre should be a cornerstone to the future of our city and holds immeasurable long term value both in visitors to the city, having one of the healthiest Arts scenes in New Zealand, but also in the sense of belonging and wellbeing of Christchurch's people for futures to come.

>>>

It concerns me, that the The Arts Centre - a vital tourist attraction, which is one of the most unique group of heritage buildings in the country is not mentioned under your heritage funding.

>>>

The Arts Centre is where I learnt to play flute, where I first saw the planet Jupiter in the observatory, where I saw my first foreign film, where I gave my first jazz performance. It holds a significant place in my heart. I have recently been given the opportunity to extend my career as a teacher and performer and have been teaching kids workshops and performances as part of Off Centre Festival and the kids holiday programme. There was such vibrancy, joy, inspiration, engagement and life force ricocheting off the walls. The delight on overseas tourists faces as they happened upon the Arts Centre and the subsequent engagement with the Arts Centre was palpable. It has taken a long time and a lot of hard work to get it to this place and your funding is instrumental in keeping the arts thriving and the well-being of the people buoyed for future generations.

2631 - Anna Canton (Annakey Productions Ltd)

I also believe the Arts Centre funding should be retained as this is a significant cultural icon and meeting place for all people to enjoy.

>>>

Cultural, arts and creative industries need nurturing and support. The foothold of retaining the growth in the local screen industry is greatly enhanced by the Incentive Fund and would be an economic and cultural tragedy if lost. Do you want to see talent leave Christchurch due to this loss?

>>>

I think that properties such as the Arts Centre should be retained as a CCC property to ensure the kaitiakitanga and manaakitanga of these special places, and are preserved and cherished with with own character without compromising the commercial possibilities they provide.

2634 - Tessa Karati

Kia ora, I am writing to make a submission in support of saving the Arts Centre with much needed support/ funding from the Christchurch City Council. The Arts Centre has provided many cherished memories over the years, pre and post earthquake. It is such an integral part of Christchurch's arts and culture community, with many of my friends deeply involved in these communities. The councils plans will have significant negative outcomes for these people who I care about, which is largely why I am writing. Please #savetheartscentre or a whole community that brings life and vibrancy (and business) into Christchurch will I'm afraid be lost. Ngā mihi, Tessa

2635 - Graeme Paton

WE MUST SAVE OUR ARTS CENTRE. FUNDING MUST BE ALLOCATED FOR THIS.

>>>

AGAIN, SAVE OUR ARTS CENTRE.

2638 - Rose Johnston

Surprised and disappointed to see The Arts Centre get zero funding. The Arts Centre is an integral part of the city and deserves council support.

264 - Raizel Reyes

Please don't cut funding for cultural establishments i.e. Christchurch Arts Centre

>>>

Continue funding for Christchurch Art Centre.

>>>

Please continue funding the Christchurch Arts Centre. Since moving to Christchurch, we have come to love visiting this place regularly. It's beautiful, vibrant, and at it works perfectly well just how it is. It would be a shame to lose all that of the funding gets cut.

2643 - Holly Bryant-Simpson

I'm disappointed to not see Arts Centre funding! I love the Arts Centre, it's a unique, culturally exciting part of Christchurch.

>>>

Please include funding for the Arts Centre.

>>>

Please include funding for the Arts Centre within the heritage funding.

2646 - Pippa Kyle

I understand the balance is difficult to achieve. However some parts of Christchurch are priceless. The Arts Centre is one of these. This type of architecture and ambience can never be replaced. And is such a feature of Christchurch to be proud of. Always visitors / tourists to the city are taken there and the to the Botanic gardens. It is the heart of the city which is so beautiful and puts Christchurch in such a good light.

>>>

Need to maintain some of the iconic aspects along the city. These make Christchurch unique and give pleasure to those that live here but also those visiting. The parks are such a pleasure and the Arts centre complex just fits so well with the nature in the Botanic gardens. They are good for the mind, spirit and so attractive for tourism.

>>>

Very important as said above

265 - Emily Anderson

continuing to support our Arts

>>>

Please continue to support the Arts Centre.

>>>

Please continue to support the arts, including financial support for heritage and the Arts Centre

>>>

Please continue to support the Arts Centre.

2656 - A Pratap

No, I feel places like the Arts Centre need to be part of the plan and funded to help run it.

>>>

I would like to see the Arts Centre supported financially. It is a major asset for our city and it would be disastrous to see it go. A very important part of the Arts community and also of the city centre.

266 - Scott Alexander Young

Please support the Arts Centre.

267 - Fionn Walker

The balance is fine, but the arts centre is an essential hub within Christchurch for creative people and should have funding

>>>

Only yes if the extra is going toward essential funding for the arts in Christchurch!

>>>

Art is an essential to Christchurch and therefore an absolute priority

>>>

I think everything which has been made a priority is important but arts are extremely important, especially to Christchurch. the arts provide a different way of looking and thinking may lead to more positive changes for minorities in the future

>>>

Where is the funding for the Christchurch Arts Centre!!

>>>

It's an essential creative hub in Christchurch

2671 - Julia Bradshaw

I think that the Arts Centre should be funded by the Council. To me, it is the best part of the CBD and I would hate to see it close. The funding that the Arts Centre receives is a very small part of the Council's budget (only \$800,000) and not giving the grant will make only a tiny difference to rates. Please give the usual grant to the Arts Centre.

2677 - Jill Schroeder

Don't stop funding the art centre - it's one of the few areas left in Christchurch that has any character. The Dux was THE place to go and we all miss it deeply.

2679 - Brad Adlam

[Other/Special Interest Topics > Cathedral]

Use the money being given to the cathedral to save The Arts Centre.

269 - Zara Potts

There's no prioritising of arts and culture which brings in significant income to the city.

2694 - Anna Crighton

Re: Arts Centre of Christchurch. I request that the Christchurch City Council continue its annual funding to the Arts Centre of Christchurch. I was appointed by the Christchurch City Council to the Arts Centre Board and gave nine years of service until 2004, the last two years as Chair. Therefore I write with an inherent knowledge and experience of aspects of the Arts Centre governance and management. In my considered opinion the Arts Centre is a vital asset to the city and makes a formidable contribution to the city of working heritage buildings. I ask that you seriously consider reinstating the annual grant. Thank you Dame Anna Crighton

2697 - Laura Molles

I also urge the council to reinstate funding for the Arts Centre. For many long-time residents like myself, the Arts Centre is a beloved part of our city and one whose post-earthquake restoration is more personally significant than that of the cathedral.

2699 - Graham Beswick

I think keeping funding to the Art Centre >>> etc are essential items of Heritage that have to be maintained for future generations

270 - Virginia Ferguson

The Arts Center is a bastion of the arts sector in Christchurch as well as a huge Tourism opportunity for the historic building aesthetic. The arts sector in NZ brings in a huge amount of money to Christchurch and should continue to be funded and repaired as a vital asset to the city center and a key to Christchurch's history.

2701 - Blair Smith

Fund the Arts Centre! It's by far the best heritage asset that people can access and use in the city.

2703 - David Bar

I want council to keep finding the Arts Centre. Christchurch does not have a lot of cultural features compared to other cities and I consider it one of the best in Christchurch. It's insane how much is being spent on the new stadium while cutting funding to the arts centre, it's not a good balance for a modern city.

271 - Jim Veitch

understand the above however I and my family are opposed to the Council Plan to no longer support the Arts Centre which is unique as a superb multi functioning community hub - it is one of the key buildings that makes Christchurch such a beautiful city to live in and draw tourists to - with many cultural and other activities conducted there

>>>

Provided continued support of the Arts Centre is included

>>>

Support the Arts Centre

2711 - Denise George

Stopping the Grant to the Arts Centre is an extremely short sighted move, the buildings are an historic part of Christchurch and not only bring pleasure to the residents of the city but are a major tourist attraction. Needless to say this a year round tourist attraction whereas the new stadium will benefit us no more that 3/4 times a year

2712 - Imogen Maxwell

[Other - Cathedral]

Funding for Cathedral rebuild and the Arts Centre.

Arts centre and cathedral rebuild funding required

2715 - L.F. Blake

The Art Centre should have some funding as heritage buildings.

272 - Hugh Hawkins

Please give the arts centre the funding it needs to run. They're already running on the smell of an oily rag whilst pumping life into one of the city's greatest cultural centres. I study there as a student and enjoy spending time in other arts centre facilities. If Ōtautahi can be described as having come alive again after the quakes and being a current cultural hotspot, the arts centre is a key piece of that puzzle. Why would you try to choke the heart of your own city?

2721 - Emily Buchanan

No, we need funding for the arts centre

>>>

Not good enough

>>>

The arts centre needs funding

>>>

Your heritage funding does not include anything for the arts centre.

>>>

You have left the arts centre out, a key part of our identity and community

>>>

Not good enough- arts centre needs funding

273 - Ereni Pūtere

No the defending of the arts is unacceptable and shortsighted as a major contributor to our economy and wellbeing in our communities

>>>

The arts and heritage sectors are vital for our city.

>>>

This must also include arts and arts based initiative such as the Arts Centre that build healthy and diverse communities.

>>>

The Arts Centre must be well funded and resourced if we truly want to stand alongside the other cities of Aotearoa as a centre of innovation and artistic expression.

>>>

The arts must be adequately resourced to ensure the wellbeing of our people and communities and supporting them to live, thrive and express themselves.

2732 - Gordon Bruce Tulloch

Strongly support funding for the Arts Centre, a vital part of the City on the Cathedral - Art Gallery- Museum- Botanic Gardens axis. If we are to have a vibrant City Centre and compact and attractive focus for visitors/tourists this must be maintained.

2737 - Valerie Sloss

I would love to see funding continue for the Arts Centre. It's such an asset to the city, and really shows off our heritage buildings at their best. It would be a huge loss to the city centre for them to go unfunded.

274 - Mark Christensen

[Strategic Direction - Have we got the balance right?], [Parks > Biodiversity & Ecological Restoration]

No, we need to increase rates further to better provide for: - supporting the Arts Centre so that it remains financially viable; and - ecological regeneration, including pest eradication, both on Banks

Peninsula and across the rest of the City. Both of these are critical in supporting the wellbeing and prosperity of Christchurch ratepayers.

>>>

[Parks > Biodiversity & Ecological Restoration]

There needs to be greater priority given to: - supporting the Arts Centre so that it remains financially viable; and - ecological regeneration, including pest eradication, both on Banks Peninsula and across the rest of the City. Both of these are critical in supporting the wellbeing and prosperity of Christchurch ratepayers.

2744 - Andrew Clifford

As someone who's lived in Canterbury all my life, it's hard to wrap my head around the fact that our council might not back the Arts Centre. This place is a cornerstone of our city, and like countless others, I've cherished memories of it since I was a kid—through school, before and after the earthquakes, and now as a parent. Not supporting the Arts Centre would be a huge letdown for our city and its people. It's like snatching away the chance for my kids and future generations to experience something truly special. Plus, it's not just about memories and experiences. I've got friends who work in and around the Arts Centre, and the financial hit they'd take is just one part of the problem. After everything the city has been through, especially post-earthquakes, we've made incredible strides. So it's pretty disheartening to see a historic landmark like this not getting the support it deserves, especially when we've rallied behind other projects like the Cathedral. As a designer who's grown up surrounded by the stunning heritage architecture of this city, I can't help but feel like we'd be losing something irreplaceable. Let's rally together to #savetheartscentre!

2746 - Helen Taylor

As you've probably gathered, do not stop funding The Arts Centre, the cultural heritage heart of our city. We have nothing left. What the earthquakes didn't destroy, have since been destroyed by council or private development. Do not continue this process. The Arts Centre is finally up and running again, support it, always.

2751 - Helen Holyoak

The arts centre is an asset to the city and ccc support is a necessary to keep it accessible to all. I don't see how ccc can support the arena and recreation centres, but not one of the only arts and creative performance focussed facilities on the city. It's not fair to discriminate the arts, it's as valuable to health for families and adults as swimming pools to my mind.

2754 - Robyn Jordaan

I want to support the arts centre because it creates a much needed space in Christchurch for community to thrive and culture to live in this city!!!!

>>>

You need to also prioritise The arts centre and the arts community in Chch.

>>>

You will be losing a huge amount of community by defunding the Arts Centre.

2755 - Jane Demeter

Reinstate funding for the Art Centre. Tourist nights in our city are already declining. Without the Arts Centre as a destination numbers of nights could further decline with subsequent repercussions in many sectors. To not fund the art centre could lead to its closing, which is unacceptable to our communities who use this extensively. Reinstate the \$1.8m funding

2756 - Stephanie Defregger

Funding into the arts centre.

276 - Sophia Kim

Council needs to support The Arts Centre.

2761 - Annette and Michael Hamblett

We urge the Council to support the Arts Centre with annual funding of at least \$2 million annually. Council should be putting funding into our Arts Centre. It's a public good and important to the city's culture and the arts community, and apparently the largest collection of heritage buildings in NZ. And what a great job it's trust has done with the restoration - completed on time and on budget, and fully tenanted. It will cost us all a whole lot more if you don't fund it.

2777 - Jennifer Hamilton

[Parks > Heritage (Capital)], [Other/Special Interest Topics > Cathedral]

Heritage Matters

Introduction

Christchurch's heritage buildings and the spaces around them are an integral part of the identity of Ōtautahi Christchurch. Icons such as the Arts Centre, Christ Church Cathedral and Canterbury Provincial Council Buildings are to Christchurch what the Sydney Harbour Bridge and Eiffel Tower are to Sydney and Paris. They are an important part of our history.

The Canterbury Earthquakes had unanticipated catastrophic effects on these buildings, including financial effects that are potentially crippling to the buildings' owners, City ratepayers and the Council generally. It is easy to comprehend the resistance by many to any further public money being allocated to the task of restoring these buildings.

A considerable amount of money has already been spent on restoring the Arts Centre and Cathedral. The question is: do we as a community sink further money into these buildings or pull the plug?

Strategic Context

Part of the answer to that question is found in a recent report commissioned by the Christ Church Cathedral Reinstatement Limited (CCRL)¹. The Report states:

The Cathedral reinstatement will unlock the full value of these investments and support the wider regeneration of Christchurch. It will also strengthen social cohesion and contribute to New Zealand's earthquake engineering capability²

I consider that this statement equally applies to the Arts Centre and Provincial Council Buildings. (I am pleased to see that money has been allocated in the Long-Term Plan to the Provincial Council Buildings' restoration.) The Report also observes that:

Another potential major source of benefits is the additional spending of tourists who decide to stay longer in New Zealand in order to visit the Cathedral. We estimate that the reinstated Cathedral could result in additional tourism spending of up to \$20.8 million per year. Visitor activities account for only a small fraction of the benefits. Paid visitor activities such as climbing the tower or participating in a guided tour provide \$0.8 million to \$2.1 million per year in benefits, whereas unpaid visitor activities such as viewing the Cathedral interior or attending services or events provide \$0.9 million to \$3.7 million. We identified other types of benefits but could not quantify them. There has been around \$1 billion of private and public sector investment in the streets around Cathedral Square since the earthquake, and a further \$1 billion is planned for the next 10 years. The Cathedral reinstatement will unlock the full value of these investments and support the wider regeneration of Christchurch. It will also strengthen social cohesion and contribute to New Zealand's earthquake engineering capability.

In short, the restoration and on-going operation of the Cathedral, Arts Centre and Provincial Council Buildings are strategically important in Central City Revitalisation, and the broader

wellbeing of Greater Christchurch and Aotearoa New Zealand. The question becomes not whether to fund these projects over the course of the LTP, but how. Increasing rates is not a palatable answer for many ratepayers and other sources of funding are needed.

Funding and Financing Options.

Councillors are aware there are limited funding options it can call on and other sources need to be found. These need to be innovative and widen the suite of options. They include the following:

- Presenting a business case to Central Government either for direct funding, or develop new funding sources eg returning GST derived from tourism expenditure in Greater Christchurch or imposing an accommodation levy;
- Approaching local and overseas sources eg using recognised New Zealanders to make a case to UNESCO, the Royal Family, overseas philanthropists and other parties;
- Issuing heritage bonds;
- Imposing a levy on overseas visitors arriving on cruise ships and at Christchurch International Airport.

These are medium to long term options and do not meet immediate requirements. This can only realistically be met through additional borrowing or reallocation of planned expenditure. For example, it seems almost certain that some transport projects, including major cycleways, will not be able to proceed because of the withdrawal of expected funding subsidies by Waka Kotahi. These projects could be deferred and some Council funding redirected to help meet the immediate needs of the Arts Centre and Cathedral.

Christchurch Arts Centre

Christchurch Arts Centre is one of the most significant heritage complexes in New Zealand. University lectures, the student caf. (later the Dux), craft markets, movies, the Court Theatre and outdoor concerts are part of its rich social history. Its current diverse activities could continue to contribute to Central City regeneration. Yet the City Council has not allocated a cent to this priceless city asset in its Long-Term Plan.

With the exception of the damaged former Dux, plus two other heritage buildings in this stunning complex, the post restoration work has been completed and is impressive. But now the City Council has left the bill to complete the work and all future operating costs in the lap of the Christchurch Arts Centre. This potentially threatens the value of past investment.

The Council should continue allocating \$1.85 sum per annum in its Long-Term Plan. At the same time a workable plan is needed for all three remaining buildings – including the Dux – to be completed, if necessary with third party involvement, and long-term operating costs reviewed.

The Arts Centre is too important to be ignored by the City Council.

280 - Alex Green

Pulling funding for The Arts Centre is as crazy as bowling over the Cathedral, draining the Avon, or abandoning the new stadium half-built. As one of the fundamental parts of the city's identity, and a post-rebuild success story in itself, The Arts Centre absolutely has to be kept alive - the cost of doing so it is relatively modest. Especially compared to the cost of letting it go completely - or falling into the direct ownership/management of the Council, which would cost the Council/ratepayer an absolute fortune.

281 - Selwyn Gamble

Yes. I can't believe I actually have to say this it's ridiculous but fund the Arts Centre Charitable Trust. The Arts Centre is like the only beautiful part of Christchurch left, the heritage buildings actually have charm and beautiful. So many of our heritage buildings were lost in the quakes and replaced with dystopian, corporate glass boxes and car parks. Now you're telling me the Arts Centre is going to get funding? It's madness, it's like we're purposefully uglifying our cities. So many tourists visit and enjoy it too, it's such a pleasant place to be at and experience. There needs to be more emphasis of beautification in the city as a whole, we have to live and work in our built environments so why shouldn't they be beautiful? Don't pull funding for the Arts Centre, it can't just survive, it needs to thrive.

>>>

Please don't pull funding from the Arts Centre, it's the like one of the few major genuinely beautiful built environments left in the city. We deserve to thrive in beautifully built environments. The minute you think solely in terms of finances for the Arts Centre you are doomed to fail it, please be more multifaceted in your approach to its sustenance it cannot thrive without the Council's help.

2812 - Helen Broughton

This is a personal submission although I do have quite a lot of involvement with the Arts Centre as a Councillor from 2001 to 2013. I was also a student at what was then the Arts campus. It is critical that CCC continues to make an annual grant to the Arts Centre, in my view it should be an inflation adjusted grant that the Arts Centre Trust does not have to beg for. The building is critical in terms of heritage, promotion of the arts and tourism. Every time I have an overseas visitor who visits the city, they are struck by the Arts Centre. Christchurch has something special and the buildings connect with Canterbury Museum and the Anglican cathedral.

In 2012/2013 the Council had concerns regarding the funding of the Arts Centre, but more to do with how the then trust was operating and the lack of a clear windup clause requiring if the Centre should

fold the inheritor of the Arts Centre precinct would be the Council. After this period there was a much improved Trust who successfully managed the reconstruction of most of the Arts Centre. However the windup clause has not been changed. I believe it is critical that Council provides the funding to make the Arts Centre a success.

2824 - Hannah Mason

Generally I approve of the proposed operational spending. The one exception is the lack of funding for the Arts Centre - at a bare minimum, covering insurance for the Arts Centre should be included. It is the city's most precious historical area - more precious to me than the provincial chambers or cathedral - and if anything happened to it, the bill would likely fall on ratepayers anyway.

Parks > Parks Spending (General)]

Our parks are pretty good already. I would like to see more spending on culture and heritage - in particular, proper funding for the Arts Centre.

>>>

Fund the Arts Centre! There are so many heritage buildings I couldn't even name, but the Arts Centre is the beating heart of the cultural heritage of our city. It really matters, and I would love to see our city work to maintain and even grow its status.

2826 - Dan Scott

It is deplorable that no funding can be found for the Arts Centre, when there seems to be plenty available to fund vanity projects that provide minimal benefit to the public, such as the atrociously expensive Te Kaha Stadium. The Christchurch arts scene is a major contributor to our city's local economy and to the wellbeing of its residents. Without funding the Arts Centre, it will die, having significant repercussions on the present and future of our art community - and entire city.

2827 - Carley Dove-McFalls (Generation Zero Ōtautahi)

The arts centre losing funding that will jeopardise business there would be a huge loss to the appeal of that part of the city. Visitors and residents love the heritage of the building and the individuality of the business within the arts centre

2829 - Jennifer Dalziel

More should be spent on the Arts. The Dux de Luxe at the Arts centre needs to be repaired and reopened This very popular restaurant drew many people to the Arts centre. Its a terrible tragedy that it is still in Ruins. Good to see money beinf spent on the Robert McDougall Gallery THis gallery needs to be reopened It was gifted to the city for this purpose and it is another tragedy that it sits there used as a store room

283 - AnnaMarie Delaney

Save the Arts Centre continue funding this heritage investment and keep it for the future generations to enjoy

2831 - Sebastian Denize

[Libraries > Libraries (Capital)], [Parks > Parks Spending (General)],

I am against the council defunding our libraries, The Arts Centre, parks, and gardens. I am particularly against the defunding of the small amount the Arts Centre costs, in light of the huge amount the stadium is getting.

2832 - Riley Neupauer (University of Canterbury Green Party)

[Strategic Direction > Community Outcomes and Strategic Priorities]

The Council also wants Ōtautahi to flourish as a collaborative and confident city, and yet it has withheld vital support from community hubs such as the Arts Centre, a beloved and well-trafficked venue which would face complete closure if the proposed spending is not altered. There is a clear pattern of cognitive dissonance here.

>>>

Unfortunately, there are other facets of Christchurch that are potentially facing neglect. Despite the Council's goals of collaboration and community building, they have completely overlooked the Arts Centre in the current LTP draft. This total lack of funding would effectively kill the site after decades of supporting local creatives, hosting popular events, and so much more. One of the city's most beloved venues, the Arts Centre is home to a variety of engaging and inclusive programs, from festivals and dances to education programs and restoration projects. Should the Council move forward with their abandonment of the business, Christchurch will lose a valuable and iconic community hub. The UC Greens strongly discourage such a proceeding, and hope to see the Arts Centre continue to flourish. I can personally attest that many of my fellow university students enjoy patroning it; my friend Charlotte is particularly fond of the on-site cafe.

2838 - Graham Erikson

>>> Arts Centre funding is of similar importance - a great asset for tourism, heritage, arts and community values. Provide \$2 million in annual support and inflation adjust in future years.
[Other/Special Interest Topics > Cathedral]

284 - James Scouller

Keep funding the arts centre!

2840 - Matthew Carter

Christchurch City Council should back The Arts Centre open-handedly because Christchurch values heritage and cares about community. On the one hand the past: the spaces constructed for Canterbury University College, the refractor telescope now working again, the visitable Rutherford museum, Antony Gormley's "Stay" (long may it). On the other, communication and exchange: teaching, film, live performance, residencies, graphic arts. It will be tragic if decision makers take liveliness for granted or decide that fostering community is a low priority.

(2) Secondly, I wish to encourage the Council to explicitly support The Arts Centre with a reasonable contribution to The Arts Centre's operational costs going forward. The Trust Board deserves some certainty so it can plan accordingly. I appreciate that the Council's M\$1.8 support over the past three years was for capital works, and the Arts Centre's management has provocatively misrepresented the end of that support as "defunding" the Arts Centre. However I also feel impatient that the Council didn't address The Trust Board's need for ongoing financial support earlier and indicated that no support was planned. The recent public circus over the issue will undoubtedly have confused and agitated a lot of people, and should have been avoidable.

2841 - Hunter Craig

I think they should fund the Arts Centre, it is an important part of our city and its culture. It seems there is around a \$1.8 million dollar cost to the insurance of the Arts Centre, mostly due to it being a heritage status building. As such, I think the ones deeming it heritage should pay a part of that. If they don't get this funding, the Arts Centre owners will likely have to sell, no one would buy it and it would be stuck with the council to fund the insurance anyway. And now all of the staffing etc, to make it a useable space.

>>>

It has been an incredibly iconic part of my years in the city. There are lots of great businesses that run out of there that wouldn't be able to survive without this funding

285 - Sue Le Mesurier

Yes as long as Arts and in particular the Arts Centre is protected.

>>>

Funds need to be set aside for the Christchurch Arts Centre

2851 - Katharine Watson (Christchurch Archaeology Project)

We do not support the removal of funding for the Arts Centre Te Matatiki Te Ora. Based on our submission we recommend that:

1. Council considers the reinstatement of funding for the Arts Centre Te Matatiki Toi Ora for the 2024-2034 period.

Christchurch Archaeology Project is a not-for-profit organisation, set up to save, share and research Ōtautahi Christchurch's archaeological heritage. At the core of our work is the Ōtautahi Christchurch archaeological archive, a rich archive of material recovered as a result of the archaeological authority process (under the Heritage New Zealand Pouhere Taonga (HNZPT) Act) following the Canterbury earthquakes of 2010 and 2011.

No funding has been allocated for the Arts Centre Te Matatiki Te Ora for 2024-34. These buildings are a taonga for the city, for several reasons. First is their architectural significance: they are a remarkable Gothic Revival complex of buildings, and are part of broader suite of Gothic Revival buildings, including the Canterbury Museum, Christ's College, the Canterbury Provincial Council buildings and the Christchurch Cathedral. Second, they are historically significant as the site of Canterbury College (now the University of Canterbury), Christchurch Boys' High School and Christchurch Girls' High School. Together, these buildings provided important educational opportunities for thousands of young people, and there are numerous significant alumni, including Sir Ernest Rutherford, Ada Wells and Helen Connon. Thirdly, the buildings are of social significance due to their more recent use as the Arts Centre, a place visited and enjoyed by thousands over the years, whether shopping, eating, drinking, going to the movies, taking in shows or spending the night. They are also an important tourist destination, with approximately one million people visiting the complex in 2023. Further funding would ensure the continued operation of, and public access to, this major group of heritage buildings, thereby protecting the significant public investment already made. The loss of a Council grant will not only have the potential to affect ongoing works, but also the Arts Centre's ability to meet rising insurance premiums and Council rates. The Arts Centre's ongoing use and viability is of utmost importance to the city and CAP strongly advocates for Council to reconsider grant funding for the 2024-34 period.

2855 - Kat Forrester

Save the Art Centre!!! Save Little Andromeda!!! F*** the Court!!

>>>

Save the Art Centre!!

>>>

Please keep the Art centre alive. She is magnificent, a beating heart in our city that engages so many and so non-judgementally.

2856 - Rachel Puentener

[Grants & Funding - Other Community Grants & Funding]

Mostly, except for not including the Climate Resilience Fund and the Arts Centre in the current funding proposals.

>>>

I note there is no funding budgeted for the running of the Art Centre. This is needed if this fantastic asset is to be well utilised.

>>>

It is really important for the Council to continue to fund the Art Centre to the amount of \$1.8 million. As the Art Centre Trust has outlined, they have done all they can to reduce costs. There is a need for Council support. Without it, the Council will eventually end up with the burden, but will have lost all the fantastic good work and good will of the current Trustees, staff and volunteers. I have a long association with the Arts Centre, as do most Christchurch residents, having worked at the market and at the Peace Centre as a teenager. I went to the Film Society screenings there in the 90s and now enjoy the wonderful Lumiere theatre. My mother went to university there, my father-in-law also. A friend and young mother was just telling me yesterday about the wonderful events there that she takes her children to there. My friend attends the silver smith guild and exhibits there. It is a wonderful asset for the city. It brings joy and connection to the past, it fosters creativity and is a place of wonder to new generations. It has so many good memories and associations for so many people in Christchurch. It would be a tragedy and very depressing to see it be 'mothballed' like the cathedral may be. Please continue to fund this very special place.

>>>

Funding for the running of the Art Centre is needed, as per previous years - \$1.8 million.

2868 - Jonty Coulson

I also want to see the arts centre supported, with funding reinstated in the LTP. The Christchurch theatre scene supported me throughout my highschool and university years, with many of my friends still supported both financially and artistically by the institution. It is a vital aspect of Christchurch's post-earthquake artistic scene, and should be treated as such.

287 - Judy Yarwood

arts activities must be considered - especially support for the Arts centre

>>>

Arts overall needs more support - in particular the Arts centre

>>>

More support for the Arts centre at all costs

>>>

Please consider the wider communities needs such as the CSO and The Arts centre - both jewels in Christchurch

288 - Christopher Goodyer

Yes. Please continue to support the Arts Centre in your plans. As a regular user of same, and seeing the numerous visitors who also go there, it would be a travesty if this treasure were to be cut off and allowed to perish for lack of funding. It is as important as our libraries, parks and reserves and - dare I say - the new sports stadium, for which we are also paying a premium.

2883 - Camillo Schulz

Definitely keep the funding for the Art centre

2885 - Nicole Groomy

No, seeing there is nothing for the Art's Centre is disappointing. I believe the council should support the Art's Centre. The Art's Centre is meaningful to many through it's creative and community

activities. There are many activities that I attend and partake in personally at the Art's Centre Secondly, The Art's Centre is also a hub for many other locals and also tourists to the city. It is one of the unique heritage buildings that draws tourism to the centre city, alongside being a host to many local businesses. Each time I go to or go past the Art's Centre, it is bustling. Knowing where my rates go is important to me. A small price increase to absorb the necessary funding costs would be worthwhile to me, or a reduction could be made in funding to non-necessary projects that are already over-blown in allocated funds. The space, and the people who utilise it, deserves to benefit in the long term plan.

2891 - Martin Fraser-Allen

Spend the \$1.8m on The Arts Centre

>>>

The arts change hearts and minds and should be supported to play a part in enabling the transition to a life-sustaining society. The Arts Centre is a unique one in the Ōtautahi cultural landscape. CCC must maintain it's annual funding of operational costs - \$1.8m+ It brings a whole inner-city block to life, with 23 buildings and over 70 organisations as tenants. They represent arts, performance, creatives, entertainment, cinema, food and beverage, education, three museums, Te Whare Tapere Māori arts space, and the soon-to-be-opened Ngāi Tahu creation story permanent exhibition. The core tenants include the University of Canterbury School of Music, the Observatory Hotel (with night-time stargazing open to the public), and the Health Technology Centre. Since the Christchurch earthquakes, 20 of the buildings have been fully restored on time and on budget. Statistics provided by the Arts Centre detail that one million locals and visitors enter the precinct every year to attend a range of community-funded cultural events from kapa haka to opera, from Sculpture and Matariki Festivals to children's theatre and circus arts - including this month's Off Centre arts festival. It's also a regular and popular location for Education programmes aimed at Christchurch's school children, through funding by the Ministry of Education. The Arts Centre belongs to the people of Christchurch - literally.

2893 - Kate Fiedler

Please continue funding The Arts Centre Te Matatiki Toi Ora. The Arts Centre of Christchurch Trust Act 2015 states that The Arts Centre must remain operating as a cultural centre for the community, as follows: "Objects of trust and other matters Objects of trust (1) The trust board holds the trust property for the following objects: (a) holding and developing The Arts Centre in trust as a unique and outstanding cultural centre for use by the people of Christchurch and its visitors: (b) fostering, promoting, and facilitating interest and involvement in art, culture, creativity, the creative industries, and education: (c) providing accommodation for the objects stated in paragraphs (a) and (b): (d) promoting, conserving, and maintaining the heritage integrity of The Arts Centre and to that end adopting, and from time to time amending or varying, a conservation plan in accordance with accepted conservation principles and in terms approved by the trust board." To not continue funding The Arts Centre is shortsighted. It means that operational duties will fall to The Christchurch City

Council and will end up costing the rate payer far more than the continuation of the 1.8m will, as Council will not be eligible for numerous grants and other funding that the current board is. The Arts Centre is a precious community space that must remain in the care of a board and staff that can wholeheartedly provide not only what is stated in the Act of Parliament, but so much more. The Arts Centre is home to numerous diverse and unique creatives and small businesses who support and nurture its culture of community and inclusivity. The Arts are immensely important to the health and well-being of a community and access to the arts for all is vital. Please continue funding this important space. The Arts Centre Te Matatiki Toi Ora is the beating heart of Christchurch. To not continue funding would be a huge mistake - The effects of which will be felt by many for a long time to come.

290 - Kathy Harrison

No. Art and art performance fills the human soul. It improves physical and mental health for participants and audiences...a creative community is a healthy community. The ccc needs to continue supporting the arts centre of christchurch. \$1.8 million is a poultry sum in context to the council books. Do not be miserable and rob this much needed funding from all the cantabrians who enjoy the art centre.

2905 - Vida Zelenka

And the art centre definitely requires continued funding. The arts bring a huge amount to the local economy and it would short sighted to stop funding then.

2921 - Ana Pickering

It is dismaying to learn that no funding is included in the Council's draft Long-Term Plan for the iconic The Arts Centre which is one of the most significant set of buildings in the city, especially when restoration of the Christchurch Cathedral and Provincial Council Buildings remain uncertain. This lack of funding puts at risk the largest collection of Category 1 Historic Places listed by Heritage New Zealand Pouhere Taonga. The restoration of the Gothic revival spaces damaged by the earthquakes is close to completion after 11 years. The centre is an important focus for the city and part of the 'Christchurch experience' for domestic and international visitors who make the loop from Te Pae to the Canterbury Museum, through the Botanic Gardens to the Arts Centre to view the buildings, discover the galleries, museums, displays and markets. What will happen to this unique place, if the Council does not assist to keep this significant heritage centre open? Will it fall into disuse and become an embarrassing place to avoid? Let's avoid the legal wrangling and the years of uncertainty and include almost-restored Arts Centre in the Long Term Plan. Let's make the most of this wonderful place that brings people to our city and provides a unique experience of our city's history. I urge the Council to consider the recommendations of The Arts Centre to;

- Absorb the annual insurance bill into its own group insurance scheme
- Rebate rates
- Cover some ongoing operational costs (heritage maintenance)

At \$1 per month, or less, for the average household this is excellent value. I feel strongly that The Arts Centre is a more lasting drawcard to the city than two (or was it one) day of SailGP racing funded through the Council Major Events Funding. I urge the Council to ensure The Arts Centre continues as a vibrant part of the city.

2923 - Amanda Peter

My concerns are around >>> not funding the Arts Centre - which for locals and tourists is an amazing space & offers a range of activities and close enough to the hospital to be useful.

>>>

Unlike Arts Centre which supports local community but is not receiving funding!

>>>

The Arts Centre - key to a thriving community & tourism especially as sport is not everyone's interest at all. Can't believe CCC could be so short sighted.

2926 - Jennifer Barnes

The cutting of all support for Arts Centre is unbalanced. It's a small amount compared to other costs, but it's one of the few remaining cultural heritage sites in the city. Large numbers of people treasure it and use it, both locals and visitors. Supporting it should be a key priority

>>>

Reinstate regular annual support of Arts Centre

>>>

Please reinstate the regular funding of Arts Centre. It's such a tiny investment for huge return to the cultural life of the city

>>>

Please don't leave the Arts Centre Trust in the lurch by removing funding. After all the incredible work of saving the buildings, now it's the time to support it as it continues post earthquake and post covid recovery.

2929 - Peter Cook

I do not think there is sufficient funding for the Arts Centre.

>>>

I am very disappointed that ongoing funding for the Arts Centre has not been provided for in the proposed LTCP. The Arts Centre is a central attraction within the central city. My family and I have often enjoyed the historic spaces, galleries and events the centre hosts. We must be prioritising support for the Arts Centre to ensure we have this beautiful and historic venue into the future.

2931 - Kevin and Annette Broadhurst

This submission is on behalf of my wife, Annette, and myself. The Arts Centre must be funded. Christchurch will not be Christchurch without the Arts Centre (plus the Cathedral, and to a lesser extent, Orana Park) If the Trust folds, as it will if not supported by council, this will mean the loss of a major tourist attraction and accompanying loss to the city of tourists and their spending . The council is likely to be left having to fund the Arts Centre totally, therefore incurring greater costs than the cost of supporting the Trust. So not funding the Arts Centre Trust does not make economic sense for the council. For decades until the quake, my wife supplied goods to three permanent shops at the Arts Centre. The majority of her sales went to tourists. We both support an increase in rates to fund the Arts Centre Trust to help it run the Arts Centre. We do not support paying even higher rates to fund the council to run the Arts Centre.

2932 - Julia Wartmann

As a Christchurch resident of nearly 70 years, I request the Council ensures the necessary funding for the Christchurch Arts Centre is included in its proposed Long Term Plan. It is essential that the future of this uniquely valuable community asset continues to be supported by the Council. The beautiful restoration of the Arts Centre after the city's destructive earthquakes has brought a cultural, educational, social richness to the regeneration of Christchurch. The Council must not fail in its duty as the Arts Centre's kaitiaki, to protect this architectural treasure for future generations.

2933 - Jill Simpson

The Arts Centre is the cultural heart of the city. It should continue to be funded so the people of Christchurch and visitors to our city can enjoy the diversity, history and the unique atmosphere of the buildings we are so lucky to still have. Having loved and enjoyed The Arts Centre for the 36 years I have lived in Christchurch, I feel very strongly about this.

2936 - Ian Lochhead

[Strategic Direction > Community Outcomes & Strategic Priorities]

As stated in the consultation documents these are all unexceptionable. However they will not be achieved if institutions such as the Arts Centre are deprived of essential CCC funding to offset the dramatic increase in insurance costs. The Arts Centre is already a cultural powerhouse within the city and serves a large and diverse community. The suggestion that it should simply be a property leasing body is offensive since it contradicts the intentions behind the founding gift of this asset to the city which was reiterated in the current legislation. The Art Centre provides performance venues at affordable rates that allows for local groups to present their work in a supportive environment. Such groups would be excluded if the cost structures imposed by Venues Otautahi were in force at the Arts Centre. Management of the Arts Centre is efficient and cost-effective and the CCC would struggle to deliver the level of service provided by the Arts Centre at a comparable cost. Furthermore, the

charitable status of the Arts Centre allows it to access funds that would not be available to CCC if it was to operate the Arts Centre. I strongly support the ongoing funding of the Arts Centre at the current level of \$1.8 million per annum for the duration of the LTP to ensure that this jewel in the city's arts crown can continue the role it has played in the life of the city since 1979.

>>>

I wish to reiterate my support for funding of the Arts Centre of Christchurch. Recent comments on the future of the Arts Centre reported as coming from CCC staff and included in CCC documents released under the FIA are totally inappropriate in relation to a major asset gifted by the Crown to the people of Christchurch and New Zealand for the support of the arts and the preservation of heritage. This intention of central government was reiterated through the Arts Centre of Christchurch Trust Act 2015. The act states 'The Arts Centre, in particular its collection of historic stone buildings, is a cultural asset of local, national, and international heritage significance situated in the heart of Christchurch'. It further states that it 'recognises the local, national, and international heritage significance of The Arts Centre and its historic stone buildings and the importance of the trust's objects in relation to ensuring that The Arts Centre continues as a cultural centre for the people of Christchurch and visitors to Christchurch and that the heritage integrity of The Arts Centre and its historic stone buildings is preserved'. It is utterly unacceptable for Council staff to advance proposals that are contrary to the intentions of such an act.

2937 - Rosa Opie

I want the Christchurch City Council to support the Arts Centre as it is an integral part of our ever-developing city. Three generations of my family have fond memories of the area. From attending university there, to it being the first place of employment, drama classes, being featured in art exhibitions, cozy cafes, attending Court Theatre shows... the list goes on and on. I currently study the new Cultural Heritage specialisation at UC and spend quite a bit of time in the Arts Centre studying. I work at Scorpio Books and many of my colleagues have held workshops or performances there. The Arts Centre is invaluable and it would be extremely, extremely disappointing to see the Christchurch City Council stop supporting it.

2938 - Rhiannon James

[Grants & Funding > Orana Park Funding]

I was disappointed to learn there is potential for the Art Centre and Orana Park to lose funding. Please don't let this happen, both these things add so much to Christchurch. The Art Centre in particular is somewhere I regularly work from, as a self employed artist. It provides me with community and so many free events that brings people together. In these times where we're all number crunching, we need our community and free events! Art is something that brings people together, in a time when we're becoming so divided as a society. The pressures of modern day living is taking it's toll on mental health, whereas art can be a tonic for that. And Orana park is such a beautiful space, we're privileged

to have these animals in Christchurch. I can only imagine how much it costs to run something like that, and if things go wrong, they need to be able to fix it or stay afloat. Please don't let it drop.

2945 - Lynne Lochhead

[Rates > Residential Rates], [Grants & Funding > Orana Park Funding]

It is reasonable to expect some rise in rates given that all costs are rising. On the whole the LTP strikes a reasonable balance but the attempt to minimise rate increases by cutting funding to major city assets such as the Arts Centre and Orana Park is ill-judged. In the case of the Arts Centre the withdrawal of previous support is directly at odds with the stated outcome of being a cultural powerhouse city. The Arts Centre is clearly a major component of the culture and heritage of the city which should not be put at risk.

>>>

[Strategic Direction > Community Outcomes & Strategic Priorities]

The community outcomes and priorities are all worthwhile but as noted previously it is unfortunate that the glaring omission of support for the Arts Centre and lack of progress on restoration of the Provincial Buildings threaten the goal of making our city a creative, cultural and events powerhouse. The lack of any funding for heritage grants until 2031/32 is certainly not consistent with supporting our diverse communities " to understand and protect their heritage". The lack of meaningful heritage grants available to heritage building owners has had a significant influence on the number of successful applications to demolish listed heritage buildings over the past several years. The complete absence of any funding can only worsen that situation.

>>>

It is perverse to provide no funding for the Arts Centre which is not only a show piece of successful restoration but an outstanding example of a place which makes heritage accessible to all, is inclusive and provides opportunities for a diverse range of art forms and cultural communities. The Arts Centre stages a range of events from its annual Off Centre Arts Festival, its Matariki festival, annual sculpture festival, active school holiday programmes. Rutherford's Den highlights the life and work of our most distinguished scientist and the Teece Museum provides access to the Logie Collection which has had more visitors since being at the Arts Centre than in its entire previous existence. The restored observatory allows the citizens of Christchurch to once again explore the night skies in conjunction with expertise provided by the University of Canterbury Staff. These are just a few examples of what the Arts Centre has to offer. There is nowhere else in Christchurch which provides such a diverse range of activities in an outstanding heritage environment. The city has always supported the Arts Centre in the past. It provides an outstanding return on a modest investment. The success of the Arts Centre should not be put in jeopardy by withdrawal of funding and it certainly should not just be treated as a

commercial property portfolio as has been suggested by Council Staff. (This of course is not even legal under the Art Centre's governing legislation)

2946 - Florence Green

Providing a modest grant (\$1.8 million?) towards the operational cost to the Arts Centre should be included. This supports the stated Community Outcome: "A cultural powerhouse city - our diverse communities are supported to understand and protect their heritage, pursue their arts ... cultural interests, and contribute to making our city a creative, cultural and events powerhouse." The Arts Centre does all these things. It is also an iconic tourist attraction and brings revenue to businesses in the city.

>>>

[Strategic Direction > Community Outcomes & Strategic Priorities]

I support the vision, community outcomes and priorities. I support funding the requested contribution towards the operational costs of the Arts Centre to further the Community Outcome "A cultural powerhouse city". I do not support charging for parking in the Botanic Gardens or Hagley Park because it does not further the Community Outcome "A collaborative confident city". It does not support residents to actively participate in this prime green space in our city.

2947 - Katia De Lu

1. Arts Centre: The Arts Centre is a valuable educational and historical space that supports local artists and gives our community a place to gather and connect. Please reinstate its funding in full.

2949 - Graeme John Marriott

You should be prioritising the Art Centre

>>>

The Arts Centre is a City Treasure. It must be retained for the sake of our residents and tourists.

295 - Robin & Annette Mann

We want the Council to financially support the Art's Centre to at least the same level as at present. If the centre is unable to meet its financial commitments the cost of doing so (insurance, legal costs,

maintenance and the like will need to be met by the rate payers. We live very close to the Arts Centre. It is always busy with local visitors and tourists. The repairs post earthquake have been carried out effectively and well. Management of the centre has improved since the earthquakes and the centre has become a major tourist attraction for Christchurch. The quality of tenants has continued to improve and their ability to pay a commercial rental has continued to become more competitive. If the payment

2955 - Linda Morris

Continue Arts Centre funding. It's very important for the cultural prosperity of Christchurch. They are amazing buildings.

2957 - Lisa Keen

[Strategic Direction > Have we got the balance right?]

Absolutely not!! Arts is so closely tied into our culture in chch, without the arts centre we will lose it. The arts centre Has been the heart if chch for so long, as a meeting place, place of learning, discovery, entertainment and do much more. Removing it from the budget tells us the council dosnt value anything it stands for!! Clearly too many road signs and poorly budgeted aquatic centres mean more to the council than our artistic and cultural heart! Disgraceful!

296 - Deborah Spencer

Please do not stop funding for the arts centre. It is really important to support our heritage but particularly to stimulate arts, culture, music, performing arts to develop a rich experience for residents and tourists alike. Stopping funding is a very short sighted approach.

2960 - Zoe Platt-Young

Without your funding the arts centre ceases to be viable in the way it needs to be. You have to invest in the historical, cultural attributes of this cut in order to derive economic returns from them. Beyond this, the arts centre is unique in Aotearoa for it's combination of historical significance and diverse inhabitants

>>>

[Transport - Public Transport Infrastructure (Capital)]

Public transport and the arts in this city is a travesty but has promise, which you need to invest in

2970 - Timothy Hogan (Friends of the Arts Centre)

The Friends of the Arts Centre (FOAC) believe that a level of appropriate Council financial assistance should be provided to the Arts Centre. FOAC has since 2014 assisted with programmes, activities and fundraising for the benefit of the Arts Centre in consultation with the Arts Centre Board and Management. We are all volunteers committed to ensuring the Arts Centre is an outstanding cultural centre for Christchurch, the wider province and our local and overseas visitors. The citizens of Christchurch have supported the Arts Centre since the site was gifted to the Government in the early 1970s. The Arts Centre is managed in a prudent manner and has adapted to challenging financial circumstances in a responsible way while still maintaining service levels expected of a premier visitor attraction. Even at that level there is a need for a Council commitment on behalf of the citizens to sustain the future of the enterprise for future generations.

>>>

The Arts Centre is an essential asset of the cultural life of the city
It is an exemplar of adaptive reuse of heritage buildings

2971 - Nikita Todd

Include Orana Park and Arts Centre in the budget

>>>

[Grants & Funding - Orana Park Funding]

support Orana Park and Arts Centre

2975 - Carrie Keith

Save the art center please. It could be so amazing

2977 - Estelle Thomson

Please continue to fund The Arts Centre. I grew up dancing there at Southern Ballet and The Arts Centre is such a beautiful, historical place we have in Christchurch. The arts can bring so many people together and are critical to support.

298 - Zya Gurau

The arts center is an invaluable cultural hub for this city. It provides people with an important recreational space and serves as one of Christchurch's most important places

2989 - Lee Robinson

[Spending > Our Capital Programme (General), Grants and Funding > Events Ecosystems Funding, Three Waters > Waste Water (capital)]

No, there is too much capital expenditure of a wasteful nature (e.g Akaroa wastewater as one example) and not enough focus on funding that has an investment return to our city, - Events, Arts Centre as but two examples.

>>>

Sell assets, repay debt meet your responsibilities and then invest again when the pressure is off. Run this City like a business not an agency without an effective strategic plan. Events, the Arts Centre and a host of other projects are at risk because all the Council can prioritise is rate increases to supplement its poorly thought out priorities. The Akaroa waste water proposal, at a cost of \$100m for 1000 connections and with a real risk that it won't solve the problem (Beca report to council 8/4/24) is a case in point. The councils current hold on the funding for the Arts Centre will compromise significantly that magnificent asset for this City. Council, reestablish your priorities! Act like a business.

2990 - Darryl Jan Atkinson

Also supporting the Arts Centre please.

assist the Arts Centre

3 - Di Prankerd

It is a wonderful multi purpose area. Beautiful buildings and I feel they have unlimited potential with the right investment and management - the restoration needs to be finished as a matter of urgency. I would rather fund the Arts Centre than the Cathedral as I feel the interests and needs of Christchurch could be better met by a fully functioning Arts Centre

3002 - Rachel D'Arcy

[Grants & Funding - Requests for Additional Grants & Funding]

Dear Council Members, I am writing to express my deep concerns regarding the proposed removal of funding for the Screen CanterburyNZ Production Grant and The Arts Centre. As a member of the community deeply invested in the cultural and creative landscape of our city, I believe these decisions are short-sighted and fail to acknowledge the vital role that arts and culture play in shaping our identity, fostering community cohesion, and driving economic growth. The Screen CanterburyNZ Production Grant has proven to be a pivotal tool in attracting film and television productions to our region, generating significant economic returns and providing employment opportunities for local talent. Its removal from the proposed Long Term Plan (LTP) undermines the progress we have made in positioning Christchurch as a competitive destination for screen production. Without this incentive, we risk losing momentum and falling behind other regions that continue to invest in their screen industries. Similarly, any potential reduction in funding for The Arts Centre overlooks its profound significance as a cultural institution and a driver of regeneration in our city. The Arts Centre is more than just a collection of historic buildings; it is a vibrant hub of creativity, innovation, and community engagement. Since my childhood, I've frequented the weekend market and been enthralled by the captivating productions that the original Court Theatre put on. Lumiere Cinemas stands out as the city's premier independent arts cinema, a venue I visit weekly. The Arts Centre has enriched the lives of countless individuals and contributed to the cultural fabric of Christchurch for generations. By neglecting to support The Arts Centre, we fail to recognise its pivotal role in preserving our cultural heritage, stimulating local economies, and providing access to the arts for all members of our community. The proposed budget cuts threaten to undermine the progress we have made in revitalising our city and risk eroding the social and economic benefits that the arts bring to our community. In conclusion, I urge the council to reconsider its decision to remove funding for the Screen CanterburyNZ Production Grant and to ensure adequate support for The Arts Centre in the upcoming budget deliberations. Investing in arts and culture is not just an expenditure; it is an investment in the well-being and prosperity of our community. Let us not sacrifice the long-term benefits of a vibrant and thriving cultural sector for short-term budgetary gains. Thank you for your attention to this matter. Sincerely, Rachel D'Arcy

>>>

[Grants & Funding - Requests for Additional Grants & Funding]

To position ourselves as a cultural hub, prioritising the arts, including screen production, is paramount. The Screen CanterburyNZ Production Grant has been instrumental in empowering filmmakers, TV producers, and game developers, facilitating the creation of projects rooted in our city and region. Reinstating this grant in the budget is essential to sustain and amplify our creative endeavours. Moreover, supporting institutions like The Arts Centre is equally vital, as they serve as pillars of cultural enrichment and community engagement, further solidifying our city's status as a cultural powerhouse.

3003 - Sonya Hodder (Spreydon Neighbourhood Network)

We are concerned that funding is not included for the Arts Centre which is such a large part of our heritage and tourist attraction in our city.

3004 - Philip Arndt

I feel strongly that the council should support the Arts Centre. This is an important cultural hub for the people of Christchurch and its surrounding areas, as well as being a significant tourist attraction. It has been exciting to witness the restoration of this after the earthquakes and I feel that it forms an important part of Christchurch's historic and ongoing story. Recent developments such as the Health Technology Centre are really beneficial for supporting and attracting innovation in Christchurch rather than seeing this move elsewhere. I have experienced this first hand as I have involvement with local startups that have made, and continue to make, great use of this space and its collaborative opportunities which are fostering a growing community.

3008 - Wanda Kingma

Keep current ;level of funding for the arts centre

301 - Ngarie Worsley

But you all must look at funding The Arts Centre Trust to at least cover the insurance costs

3010 - Jan Cook

I support the Special Heritage Arts Centre Targeted Rate. The Arts Centre is an important part of the City's culture and the cityscape

3013 - Imogen Clark

We need to continue to fund the arts centre. It is so important for the people of christchurch. The arts is key in a healthy community. Furthermore this would also be determintual for tourism

It is a disgrace that you will no longer fund the art centre. It has only just started to become busy again since the restoration. It would be such a loss to the community. Also such a loss for tourist. So short sighted.

302 - Bronwyn Roberts

Need to be able to fund the arts centre complex

>>>

Need to support the arts centre it seems crazy that this complex could be moth balled into a dead zone it's part of the city's attraction to tourists and would be utterly depressing if it were closed

>>>

Find the chch city arts centre as you currently are, this cannot be left to fend for itself

>>>

The Arts Centre is a complex, rich in culture with the ability to bring our city together to unite our city and its people together with music art and cultural activities.

3022 - Brian Craig

I was saddened to see the lack of support for the Christchurch Arts Centre in the draft plan. I also understand that the Arts Centre will be in significant financial difficulty if support financially is withdrawn. The Arts Centre is an iconic group of buildings in the centre of the city and these have been painstakingly restored to their current condition since the earthquakes. I am a New Zealander by adoption since I arrived from Scotland with my family in 1988. The Arts Centre has been an important venue for us over many years and we appreciate and value its contribution to the city both socially and as a tourist attraction. It is functional and appears well run by the trust and is much improved since its restoration. If it folds then I understand significant costs and legal issues will default to the Council and hence all of us through our rates. With the Cathedral unrestored and possibly to be mothballed it is unlikely to attract tourists or contribute much. Hence the viability of the Arts Centre is even more important. I think therefore this proposal is a short term gain and a longer term loss and therefore the balance is wrong. I would request a significant pause and rethink on the consequences of this proposal. Thank you for the chance to submit.

The Arts Centre funding is not mentioned and I think this is short sighted as indicated in my comments regarding the balance of your draft.

Other than my comments about the Arts Centre and the Cathedral I have no issues

I am concerned about the glaring omission of support for the Arts Centre

3023 - Carolyn Brown

we already have world class assets that are in desperate need of funding from the Council to continue. In particular the Arts Centre. Both the the potential to be world class attractions but have not been included in the long term plan for improved/maintained funding.

Need to include funding for the Arts Centre.

The Art Centre is an area of significant historical significance. The Arts Centre is open to all and a vital part tourism and it and the botanic gardens are the true heart of the city.

>>>

[Grants & Funding > Orana Park Funding]

3029 - Rodrigo Gomez Fell

I don't see any support for the Arts Centre, a vital piece of Christchurch's Heritage. A landmark as important as the old University grounds should be part of the long-term council plan.

303 - M Gary Nicholls

Maintain full financial support for the Christchurch Art Centre. Without our marvellous Art Centre the city of Christchurch as we know it will be no more. If full support is not provided by Council my wife and I will likely move to Wellington, our equal favourite city in the Country. Please - please support the art centre. Thanks!!!!!!!

3030 - Matthew McFetridge

I would like council to continue to support The Arts Centre, it is an integral part of the city and without continued support its presence will diminish. This will not be good for the city long term. The Precinct brings in tourists and is a cultural hub we cannot live without!

3035 - Claire Coveney

The art centre is the creative heart of Otautahi plus holder of the history of Settlers from England UK . The Great Hall is soo beautiful and hosts many concerts that are affordable to most people. The movie theater is special.

The Dux de Luxe needs to reopen especially by Richard. We use this as residents here far more than we would the Cathedral.

Support our arts, artists and traveller's who frequent this beautiful area.

Included in the heritage must come the Arts Centre. The Arts Centre hosts many ranges of cultural events that most people can afford. The Great Hall is outstanding. Beautiful . I prefer that to the Cathedral. We need to support our creative communities and cultural diversity in Otautahi. The Arts

Centre is the most accessible venue for such a variety of art and culture to be available to the public and tourists.

Heritage buildings to include the Arts Centre. Bring back Dux de Luxe.

3040 - Claire Wichman

[Grants & Funding>Orana Park Funding]

Put money towards the arts centre and orana park. They should both be looked after and available to all now and in the future.

3046 - Gisela Faber

Keep the Arts Centre going.

>>>

Keep the Arts Centre going. Thanks.

305 - Brendan Evans

Please save the art centre! Christchurchs creative scene is the number 1 reason young people move to chch. If you remove funding for the creative arts young people will leave. The arts inspire us to live more sustainably, creatively problem solve and are good for our mental health- this is a no brainer .

3051 - Nicola wallace-bell (Artatsumnerhub)

I really believe that council should support the Arts Centre. I work in the arts and see everyday how performances , exhibitions and learning opportunities provided by amazing artists change lives. I can't imagine CHCH city without the wonderful programmes the arts centre offers. They bring the city alive in the day , at night and in all weathers! Tourists love the chance happenings they encounter when strolling around our city. Culturally the Arts Centre holds great meaning obviously! I feel it is the hub for connection for those from other cultures to come together and feel whanaungatanga. I have been so impressed with the direction of the Arts Centre since the quake. Not many establishments would have survived and increased their ability to serve the community like it has. It has cut spending yet its delivery has remained unchanged. We are very privileged to be able to have such magnificent heritage buildings that have been so well restored. If you decide to go ahead with funding cuts for the

Arts Centre I think you will be very unpopular. I wouldn't mind at all a \$1 rise in my rates for the Arts Centre in preference to a sports stadium .

3053 - Drucilla Kingi-Patterson

The Christchurch Art Centre must retain its regular grant from the City Council over the next ten years.

I have decided Green Moon Studio will be based there and also work with the Ministry of kindness next door

There are anchor organizations for youth and the arts, The Sky Dome a plus giving us the X Factor.

I shall also be holding Auditions on 5/6/7 July at Art Centre for a children's song to a puppet planned to be recorded and put on UTube.

>>>

I've now had to start Manuka Doll & Toy Museum
Manuka is a maori doll in my childrens play
a bee keeper.

I also have a collection of royal dolls

Presently networking with doll / teddy bear collectors
many are elderly

Have been going to Doll shows in Christchurch
(Hayles cricket hall) since 1989 — 2022 Cashmere

I am planning a doll display for the Art Centre
presently in talks with Christchurch Cathedral.

I also have 30 hand of the Ring Dolls plus theatre set.

I feel will have to raise about 3m for a
Manuka Doll & Toy Museum within or located
near the Art Centre to bring families a tourist
into our city regularly.

>>>

Extra Note - Draft long Term Plan: 2024 - 2034

Christchurch Art Centre.

There is a percentage of people within the Christchurch City Council proposing the Christchurch Art Centre become sole tenant property agents without a mandate from the Board and community groups plus supporters who support their kaupapa. In fact they want to change the scope / mission statement of the Christchurch Art Centre.

As a major stakeholder they do not have that right without full agreement by all parties plus public

And signed off by Commerce Commission as the Trust Deed is a legal Document.

[Full attachment available]

3055 - Josephine Drysdall

The fact that the Council is considering dropping its funding to The Arts Centre is a tragedy. The funding is a pittance compared to the money pit that is the stadium, and The Arts Centre provides so much more to so many in the Ōtautahi community and our visitors. I emphatically do not support cutting funding to this unique and special home of creativity.

I believe that the council should allocate funds towards heritage projects that promote community-building, such as The Arts Centre.

3065 - Janet Wilson

Please help the Arts Centre to survive.

307 - Rata Jamieson

Whenever we look onto the website of the arts centre, there is something great to see. At any time there is at least a great exhibition, an amazing concert we can plan around, either for a day trip and a Lunchtime Concert or a great evening out or a movie we'd much rather see in a small, passionate cinema like Lumiere than a big commercial one. With everything on one property the space is so welcoming, the people working there make it a great experience every time. Keep supporting the arts centre financially!

3071 - James Gormack

[Grants & Funding>Orana Park Funding]; [Libraries>Libraries (Capital)]

I really don't think it makes any sense to rebuild City South library. It's obviously safe enough as it is now. Spend that money on the Arts Centre or Orana Park!

3074 - Clare Currie

I feel that it is important for the Arts Centre to continue to be part of the heart of Christchurch. I love visiting it for events and also just to wander through it appreciating the beautiful old buildings. I believe that the history and culture are unbeatable and an essential part of my life here. I find it difficult to imagine Christchurch without the Arts Centre. I am part of a dancing group and we have performed there as part of a festival. I can't think of any other site which comes close to its functionality and history, and having the Christchurch Art Gallery Te Puna o Waiwhetu as a neighbour works well as they complement each other perfectly.

3075 - Amelia Broughton

Fund the Christchurch Arts Centre. The Arts Centre has been a fixture in my life. I worked at Lumiere Cinemas, as a kid I went to the bead shop on special occasions, I have met many wonderful people there - from XXX of Lumiere Cinemas to Craig the security guard. I have loved touring friends from abroad around the Great Hall with its exquisite stained glass window. I've gotten tattoos from Absolution and had brunch at Bunsen cafe. The Arts centre is one of the few heritage buildings left in Christchurch - after the Cathedral came down in the Quakes, the arts centre is one of the few places left that resemble "old Christchurch". Please continue to fund the Arts Centre.

>>>

As someone who has grown up in Christchurch, the arts centre has always been a point of pride for our city. I worked at the Lumiere cinema - an incredible place run by passionate and dedicated people. I've had tattoos done from the wonderful people at Absolution, wined and dined at Cellar Door and toured friends from abroad through the great hall with its beautiful stained glass window. To not fund this iconic landmark of our city would be a travesty. I strongly urge you to reconsider.

3076 - Melvin Anderson

Save the Art Centre

3078 - Adele Bishop

The arts are also important.

>>>

What about the Art Centre? So important to Christchurch.

>>>

Funding for the Arts Centre should be kept. It is such an asset to Christchurch and a back drop to so much wonderful entertainment, shops, cafes and so much history in the buildings.

3079 - Willem Bouman

It is my heartfelt opinion that the council reconsider their support for the Arts Centre. After years of supporting it seems counterintuitive that council withdraws funding, and if the council lets it fail now all previous support seems superfluous. We therefore urge the council to support this very worthwhile endeavour, which seeks to support the Artists and the Arts, of which the benefits are intergenerational and providing a well rounded society both to enrich lives and offer emotional well being. My family

has enjoyed many an event plus music lessons and cultural events, which buy into the heritage of our city! The funding is needed to support the running of the Art Centre not least of all the eye-watering sum for insurance. We urge you to continue the support of these walls within walls of culture and heritage.

>>>

Not prioritising the right things when the Arts Centre is not in your budget

>>>

INCLUDE FUNDING FOR THE ARTS CENTRE IT IS THE VERY HEARTBEAT OF OUR CITY

3080 - Caroline Paynter

I want the Council to support ongoing funding for The Arts Centre. The Arts Centre is an important part of Christchurch's regeneration, including heritage and creativity. It is one of the few remaining original, old buildings in Christchurch and to see it be preserved would allow generations to come to enjoy it as well. After the earthquakes having taken a lot of the heritage architecture from the city centre it is so lovely to have a space with character remaining. The businesses within the buildings have brought back such a wonderful atmosphere to the area, particularly Cellar Door, La Lumiere, the Observatory and Frances Nation. To see these businesses have to move on would be a great loss to the area and community.

3081 - Adrienne Melton

Please continue to fund the Christchurch Art Centre as it is a very special area for locals, other New Zealanders and overseas visitors.

3083 - Peter Joyce

[Art Galleries & Museums>Art Gallery (Capital)]; [Other/Special Interest Topics>Creating a Climate Fund]; [Strategic Direction>Have we got the balance right?]

Not quite; insufficient support for the environment and for the 'arts' - ChCh Art Gallery & ChCh Arts Centre.

3085 - Jacqueline Sullivan

Christchurch has lost too much of its history by mismanagement after the earthquakes. The Arts Centre is vital to our city. It is more important, more valuable to the people than some of the building

monstrosities that have been inflicted upon us. As by law, no part of the Arts Centre can be sold, the Ch Ch City Council must continue its support for its citizens.

3086 - Dave Horsburgh

Should continue to support funding the Arts Centre

3087 - Lucie Masselink

Fund the Arts Centre, that is an iconic group of buildings, and a worthy cause of Raye increases in my opinion

>>>

[Libraries - Libraries (Capital)]

If you are spending 140 million on libraries, why is for example the Arts Centre not getting any funding? They are a massive tourist attraction.

309 - Alice Huang

Keep funding the art centre

3090 - Trudi Bishop

however, it is also vital for the whole community to keep key community areas such as the iconic Arts Centre in place. It attracts tourists, it is a key community area for people across the broader community. It would be a great loss to Christchurch for it to no longer exist and then have the assets potentially sold on to developers and so longer be part of the heart of our city. We need the arts just as we need infrastructure to keep community spirits alive and together.

>>>

save the Arts centre - keep its funding.

>>>

We must keep the funding for the Arts Centre - it is an iconic part of our city and vital for the community. It requires more funding not less.

3092 - Kitty Moran

[Grants & Funding - Orana Park Funding]

I'd love to see more funding given to the Arts Centre and to Orana Wildlife Park. The Arts Centre is amazingly popular and to let it go to nothing removes one of our main tourist attractions (while the Canterbury Museum undergoes it's redevelopment). As well as being a fantastic way to keep involved, it's essential to keeping our community a "cultural powerhouse" (as per our community outcomes). Additionally, my nearly 5 year old boy LOVES going to "the big park with the big stone buildings" and just walking around the Arts Centre. It keeps our little family active, engaged with the community, and forms a part of his education too. Similarly, Orana Wildlife Park is absolutely essential to our family for environmental education, having fun, connecting with friends, and (again) staying active. While there could be some improvements made in terms of accessibility, it's a big draw card for many locals and tourists alike. It's immensely beneficial for my son to be able to see these animals in real life and not just through a tv screen. He can compare the sizes of things so much better now that he has seen how tall a giraffe is. He understands how beautiful and fierce wild animals can be. And ultimately, he has a greater understanding and appreciation for why we have inside cats (to protect our native fauna). How could he have gained all of this knowledge in the 2 years we've been visiting without Orana being at our fingertips? In comparison, we don't appreciate our rates going towards the Christ Church Cathedral rebuild. We have long questioned why we as a family should have to contribute to this, when the Anglican church should (ultimately) be responsible for the funding of the rebuild. I would love to see the building restored to it's former glory, but not at my expense.

3093 - Gareth Cook

Do not remove funding to Art Centre movie theatre

>>>

Pls save the Lumiere Theatre at the Art Centre

3094 - Daniel Smith

Funding should be provided to the arts centre as a key heritage site in the city

3099 - Stephen Miller

[Spending > Our Proposed Spending]

And then the Arts Centre is under threat. One of the few gems left in central Christchurch.

Save the Arts Centre for goodness sake. Look at selling as many assets as possible unless they are absolutely necessary for the efficient, safe running of the city. It's time to start with a blank sheet as to what assets the city should absolutely be retaining. If they are not paying their way as investments they should be sold.

310 - Graeme McNally

Arts Centre -its a serious misunderstanding of the importance to the city of The Arts Centre to cut the CCC contribution to its ongoing operation. It is unique -as one of the very important restored heritage sites in Christchurch and attracts a very large number of local and international visitors. Should it fail to continue to operate in its present legal form -CCC does not have the resources nor the capabilities to carry out its activities. CCC FUNDING MUST BE RESTORED AS AN ABSOLUTE PRIORITY

3100 - Suzy Abbott

I believe it is absolutely imperative that the Christchurch City Council continues to support the Arts Centre with the vital funding it needs to continue operating. The Arts Centre (along with the Canterbury Museum and the Art Gallery) has become the beating heart of Christchurch, even more so with the ongoing uncertainty surrounding the restoration of the Cathedral and the devastation caused to the central city by the earthquakes. As a fine artist based in Christchurch, I have exhibited twice at Pūmanawa, the community gallery in the Arts Centre and am booked to exhibit again at the end of the year. This is a really wonderful space not only offering local artists a very affordable location in which to exhibit but also offering the wider local community as well as visitors from out of town and overseas, the opportunity to engage with the arts in central, historic location. The retail and food outlets, hotel, museums, art gallery, markets and ongoing exhibitions and cultural events in and around the Arts Centre are a vital part of a thriving creative community. Over past decade, particularly after the devastating events of Feb 2011, The Arts Centre has been a shining beacon of resilience, strength, optimism, creativity and community and it must continue to shine bright well into the future.

3102 - Paul de Spa

Please maintain funding for the Arts Centre, it is an important space for the city and its communities. The buildings and the groups that operate from them are a crucial part of what makes Otautahi / Chch the city it is.

3103 - Philippa May

And now funding for the Arts Centre under threat which is of great concern to me.

>>>

Please ensure that funding is retained for our Christchurch Arts Centre. This is a vital part of our city's

heritage and culture. I have lived in this city for most of my life and over the years have attended many events at the Arts Centre - from The Great Hall, to the Gallery spaces, Cinema, Restaurants and other repurposed buildings. I was shocked to learn that the Council is intending to withdraw the \$1.8 million per year it has been contributing towards the Arts Centre. This amount seems meager in the context of current and planned spending in other areas. Funding our Centre for Arts is as important as putting money into transport, sports venues, libraries and other public services. It is not reasonable to expect the Arts to be sustained solely by commercial ventures. We need to foster and promote our local art and artists.

3105 - Tracey MacArthur

The Arts Centre is not only an iconic heritage building steeped in history but an important destination for locals and visitors to our city. Save the Arts Centre.

3109 - Rohit Bedi

Please keep the art centre growing!

3110 - Michael Beard

Money needs to be spent on the Arts Centre.

3111 - Jeanie Cochrane

Please continue to support the Arts Centre through funding. It is a valuable asset to the city. It provides an excellent setting for many shops and businesses. It attracts visitors and locals alike. I believe the Council should continue to support this amazing resource.

3112 - Dr Edward Simpson

Your decision to stop funding the Arts Centre is untenable. It has replaced the Cathedral Square as the main attraction in the CBD, and closing it after so many years of rebuilding is ridiculous. I am sure most ratepayers would be happy to contribute a bit extra to help save our main heritage centre.

>>>

Funding the Arts Centre⁰

3115 - Jane McCulla

There are some things that funding could be reduced for but The Arts Centre is not one of them! Arts, community events, art exhibitions, music and diversity are VERY important for a thriving city community.

>>>

Keep funding the Arts Centre!

>>>

I agree all these other essential things need to be paid for but the Arts Centre is important for locals and visitors. Access to those beautiful heritage buildings to take part in diverse art activities and events is very important for a healthy community to participate in!

3116 - Barbara Elliott

Support the Arts Centre give them back the \$1.8 million

>>>

No you need to focus more on the arts save the arts centre important to our culture heritage and general well-being. The arts centre has been a cultural and diverse focus of the city for years, keep it going. Support the Arts Centre you must give them back the 1.8 million.

3121 - Janet Foley

I would like to see CCC continue to provide funding to the Christchurch Arts Centre. This is an extremely important resource for our city, not only because we have lost so many other buildings of significance. The Arts Centre buildings are beautiful, of historic significance, currently used by many different groups of people and appreciated by both national and international visitors to Christchurch. I personally attend art exhibition openings, the cinema, shops, cafes and music performances. I have grown up in Christchurch and continue to be proud of and put a very high value on this public space.

3122 - Lucy Robinson

Support for the Arts Centre is vital. It is a thriving hub for the community and provides a great attraction for tourists. The events it puts on are great and add so much value to community life in the centre of our city

3123 - Kate Markman

You need to support the arts centre at the level that allows it to continue functioning in similar manner to now. It's such a core component of the city and its history, it's horrendous to not support it.

3127 - Dianne Downward

No bail out for the Arts centre. We can't always be bailing out organizations that mismanage their funds.

>>>

Just as the Arts centre needs to look at and reassess how they run things, council needs to be run more effectively and efficiently

313 - Isabell Booth

Please continue to support the artistic, social & cultural infrastructure that makes our city unique & feeds the creativity & souls of the people. The Arts Centre is necessary to my mental wellbeing & I have attended 2 workshops & taken my grandchildren to view Rutherfords Den. If the Council cuts funding to the Trust, and effectively shutting it down, I can't my life imagine my life in the future without this incredible resource and heritage precinct being part of my recreational experience.

>>>

Please keep the Arts Centre funded into the future. Its a tourist attraction & makes Christchurch unique & special.

Great idea.

3132 - Gina Harrison

The arts centre funding should not be completely wiped. As a teacher at Ao Tawhiti school in the CBD we use the arts centre a lot to deliver exciting curriculum opportunities. Over the years I have taken students to scape exhibits, gallery show cases, workshops at the area allocated to Greek arts, concerts in the great hall and many other amazing events. The arts centre even sheltered our entire junior school during the mosque shootings! We have also held our annual Ao Tawhiti film festival at Lumiere as well as staff showings of educational documentaries. It would be a huge shame for anything happening at the arts centre to lose funding, and a massive loss to educational opportunities in Christchurch.

3135 - Sarah Wakeman

Arts Centre is a key Chch feature and needs its funding- not prioritising this is a mistake

3138 - Rebekah Carey

The arts centre is a massive part of the christchurch cultural space. To lose the funding and access to it would change the face of the city. This is a well used and loved space and should continue to get its funding. Also there should be a focus on environmental sustainability and public transport to preserve canterbury for future generations

3141 - Sandra Kenneally

Please allocate funds to the Art Centre to enable them to continue. It is an awesome feature of Christchurch that deserves to be funded.

>>>

Please see my earlier comments in regards to funding for the arts centre.

3142 - Ruth Jardine

You have not mentioned funding the Arts Centre. Please reconsider this.

>>>

The Arts Centre is a unique facility. I love the new cinema. I love attending concerts in the Great Hall. Shops like Francis Nation promote local businesses.

>>>

Heritage! The beautiful Arts Centre is our jewel in the crown. Keep funding it's restoration.

>>>

But we cannot afford to neglect the work already started like the Arts Centre Restoration project.

3147 - Peter Kempthorne

The ratepayer must continue to assist the Art Centre financially

>>>

The council must continue to support the Arts Centre

>>>

The Arts Centre is Taonga. It has been a major part of our city since the earliest days. My late wife went to University there for instance so it is part of my children's family history. When I have overseas or North Island visitors it is where I take them. You can tell by the tourists streaming from the buses each day that It is a very important tourist attraction. The combination of buildings with the Museum and Christ's College makes a unique for NZ environment. It is worth every penny of the \$1 per month rates would need to increase to continue the support. Everyone has invested so much to restore it after the earthquake that to let it slide into obscurity at the stage would be a tragedy.

3151 - Julie Duthie

Please help with funding for The Arts Centre, it is inconceivable that The Arts Centre could close due to a financial shortfall. It's importance to our city and New Zealand cannot be over-stated. I don't believe there is a precinct of such beautiful historic buildings anywhere else in New Zealand. They've been restored, and strengthened and are a jewel in the crown of Christchurch. Don't let us down.

3152 - Neroli Fornasier

Save the Art Centre

>>

We need to preserve all our historic sights.

3155 - Robyn Ratcliff

The Arts centre is one of few historic buildings available for public use after the earthquakes. To take that enjoyment of spending time , appreciating its buildings and enjoying ambience of the centre away, diminishes the history and the character of the gardens/museum area in a huge way for locals and tourists alike.It would be a shameful closure!

3158 - Julian Holderness

Excluding the Arts Centre from funding totalling unbalances the funding. The Arts for goodness sake!

>>>

The exclusion of support for the Arts Centre is inexcusable, vast numbers of tourists visit it and enjoy its long term involvement in the city's life. Christchurch citizens also cherish it. I would go so far as to say not supporting it is long term vandalism

316 - Margaret Whittaker

The central city, especially the Arts Centre, Worcester Street area is an absolute treasure for Christchurch and it is essential to spend money on this area to ensure tourists come and spend their much needed money in Christchurch

>>>

I find it incredible that the Council have stated there will be no more funding to complete the Arts Centre. Surely to finish this project must be high on the list. This magnificent group of buildings is right in the centre of the tourist district and at the moment still largely looks like a war zone. To think of all the ridiculous cycle lanes, specifically Park Terrace, and St Aspah street (where I have never ever seen a cyclist) which have had millions spent on them and yet the ART Centre is still far from completed. What an absolute travesty! We should cherish our few heritage sites.

3162 - Kate Ord

I understand that the council is considering withdrawing funding from the Christchurch Arts Centre. I would be most disturbed if this was the case. The Arts Centre is a heritage site of great importance and beauty. Christchurch has 'lost' many of its heritage buildings since the earthquakes of 2010 & 2011. We should be supporting and retaining the Arts Centre and the social and cultural activities that take place there.

3163 - Simon Cobb

I would like to see the Arts Centre prioritised.

>>>

More on the Arts Centre

>>>

Prioritise Arts Centre restoration

3164 - Arthur Gordon-Wright

I'd like you to keep finding the Arts Centre. It seems such a tiny amount compared to the overall budget, for an important facility with great memories for so many in the community

3166 - Arwen Sommer

[Grants & Funding > Orana Park Funding]

The operational spending seems fairly good, and I value that the council is a living wage provider. However, I think it's important that a two of Christchurch's established assets receive some operational funding which is not currently included in the LTP. The Christchurch Arts Centre is an important heritage site with massive cultural significance. The current work being done there by curators, gallery owners, business and creatives is fantastic and such a boost to our city. The spaces of The Whare Tapere and The Physics Room have personally given me so many opportunity as a young Māori creative, I would be heartbroken to see them lost.

[Parks > Other], [Parks > Tree Canopy]

My key concern with the heritage plan is the loss of funding for the Arts Centre. To be honest I'm bewildered as to why the funding would be cut, as it such a hub of regeneration and vibrancy for the city. I want the council to support the Art Centre, as an important place of heritage, art, community and culture.

3169 - Barbara Brown

[Transport > Roads (Operational)], [Three Waters > Three Waters (Operational)], [Parks > Spending], [Parks > Heritage (Capital)], [Parks > Foreshore], [Art Galleries & Museums > Art Galleries (Capital)], [Other/Special Interest Topics > Social Housing], [Art Galleries & Museums > Museums (Capital)]

As in my introductory statement, I think that we need to review operational spend on Transport and Three Waters, and prioritise Parks, Heritage and Coastal Environment; Art Galleries and Museums; Libraries and Housing. I think we should have a larger social housing portfolio.

317 - Charles Levin

I disagree with the lack of funding for the Arts Centre. In my view the Council gets a bargain having the existing trust run it and the existing grant represents fantastic value for money. The alternative is the Council takes it over which obviously will cost much more. Doesn't make much sense at all.

3170 - Derek Doddington (Top Dog Theatre)

Make Christchurch somewhere which attracts visitors. The Arts Centre for historic value, shops, film studios, theatres, is a massive draw and should be supported.

>>>

I support funding for The Arts Centre.

3171 - Lisa Roberts

Funding the Art centre is a must !!!!!

>>>

Stop wasting money on cathedral eye sore and help art centre

3172 - Sara Shea

Funding needs to be made to the Arts Centre. Its recent development post earthquakes has recreated a jewel in the city. With so few historic buildings and a place for unique businesses it has to be supported.

3174 - Gary Morrison

An example of an Arts investment the council needs to make is supporting the Arts Centre — this is an opportunity to create vitality, support community, and potentially think about new revenue opportunities even if the "opportunities" are helping the Arts Centre increase its revenue so council support can reduce over time. It also makes no sense to cause the Arts Centre Trust to wind up if the

debts and problems will most likely fall at the Council's door. At the end of the day the Arts Centre is a part of our history, it needs to be honoured, restored and supported.

3175 - Jennifer Vartha

Within this vision the Art Centre must be retained - an anchor to our city for both local folk and our tourist industry alike all sitting alongside many vibrant groups and business it is host to eg Lumiere theatre, Great Hall & its many functions it hosts - wedding, concerts, art shows, corporate functions, the Teece Museum of Classical Antiquities to name a few. The Art Centre is so important as we and our city move forward and must be retained.

3176 - Mary-Jane Callander

Balance is great, but I think the arts are important. Christchurch has a vibrant and important NZ Art Culture. Please preserve this important piece of Christchurch.

3178 - Libby Newcombe

Community NEEDS the Arts Centre!

>>>

Fund the Arts Centre. I'm there very often and my visitors always want to visit it.

3179 - Rochelle Taylor

You must prioritise the arts Centre, it must remain open and accessible. It is the jewel of our city

>>>

Save the arts Centre, it must remain a priority to be open and available to all

>>>

Save the arts Centre

>>>

The Arts Centre should be a key priority as a cultural and heritage asset of the city

318 - Janet Howison

The Arts Centre is an important part of Christchurch for all its residents. I personally visit there many times in a year just to walk around and the enjoy the beautiful buildings and vibrant tourist scene. I was lucky enough before the earthquake to work in the arts centre and know the amount of work that all the Arts Centre staff/management put into trying to keep this alive for Christchurch and after the earthquakes the enormous extra work to maintain the damaged buildings and bring it to the stage it is now for further generations. To see the funding cut and for it to stand still and not continue on the amazing track it has already forged would be sad and almost unforgiveable.

3182 - Otilie Standring

The Arts Centre is a remarkable venue. The juxtaposition of a modern cultural and artistic scene with history and the gothic architecture that was such a hallmark of pre-quake Christchurch character is so special and unique. It still holds that university spirit within it as a place of exciting and progressive ideas. Given the fiasco that has sealed the fate of the Cathedral by way of premeditated neglect and sustained inaction, it's all the more vital to preserve The Arts Centre as a living, thriving, civic treasure. I visit multiple times per month, and it's always a go-to destination to entertain visiting friends (who also rank The Observatory Hotel as their favourite place to stay in the city). It's a great asset and attraction unlike any other. Please don't give up on it.

>>>

In my view, the Robert McDougall and Provincial Chambers -- the latter being of particular historical significance -- still pale in importance and community role to The Arts Centre.

3183 - Dylan Sherwood

The council needs to fund the Arts Centre. This is my favourite place to visit in Christchurch. I have taken my children many wonderful performances there. I love the shops and regularly see films at Lumiere. The beautiful buildings are magical - I feel transported to a wondrous world every time I visit and always take visiting friends and family there to share the joy.

3184 - Sal Davies

I'm very sad to hear that the Arts Centre won't receive the funding it requires. It has been so beautifully restored & I have been a regular user for a variety of reasons, attending workshops & the Great Hall, visiting wonderful locally focussed shops like Frances Nation, enjoying the galleries & of course Lumiere which is totally the jewel of movie theatres in this city. We can't lose this heritage especially after such a lot of work to restore post quake.

3185 - Brian Darlow

[Other/Special Interest Topics > Cathedral], [Spending > Te Kaha]

Not quite. I think the Arts Centre Heritage buildings must be completed - this is a major draw card for overseas visitors and will be widely used by, and appreciated by, locals.

3187 - Debbie Hamilton

[Libraries > Libraries (Operations)], [Parks > Parks Spending (General)], [Recreation, Sports & Events > Rec & Sport (Operations)]

But don't change that especially supporting community such as libraries parks pools the Arts Centre most importantly

Keep being equity focused preserve the Arts Centre funding it is a cultural hub & tourist attraction

3188 - Tony Kettle

Fund the Arts centre

3189 - Susan Pearson

However the funds are apportioned The Arts Centre is important to the people of Christchurch and should be maintained at a level they can operate on.

>>>

Is The Arts Centre part of heritage? What point renovating all the buildings if they cannot be used as intended due to withdrawal of funds.

>>>

Not impressed with any plans that fail to recognise the importance of the arts centre to the people of Christchurch.

>>>

The Arts Centre is part of Christchurch's culture. It is an important venue for residents and visitors. Its renovation has been a wonderful achievement and the restored ability to walk around the lovely courtyards has been delightful. Attending events and movies there always feeds the wonder at the lovely old buildings. Please lets not forget the special nature of the precinct and force the complementary businesses out or beyond the ability of people to enjoy it. The cathedral has effectively gone and there is nowhere else like it in the city.

3191 - John Massie

Fund the arts centre.

3192 - Janene Burnett

[Strategic Direction>Have we got the balance right?]; [Transport>Cycleways (Capital)]; [Transport>Public Transport Infrastructure (Capital)]; [Grants & Funding>Orana Park Funding]; [Spending>Our Proposed Spending]

Almost, I would like to see more funding for Orana Wildlife park, the Arts Centre, and green forms of transport i.e. bike lane/routes and public transport.

>>>

[Transport>Cycleways (Capital)]; [Transport>Public Transport Infrastructure (Capital)]; [Grants & Funding>Orana Park Funding]; [Spending>Our Proposed Spending]

I agree with most of the spending however I want to see more spending on housing, our arts centre, Orana Park and bike lanes/public transport.

3194 - Bianca Tawatao

I want the Council to support the Arts Centre. I value art as an important aspect of a balanced life. As such, I am a frequent visitor of the Arts Centre—to Lumiere for film festivals, or the Sunday arts market. The Arts Centre has been an integral place of comfort and community the whole time I have lived in the city; it would be devastating to lose it if the Council decides to carry on without funding.

3197 - Viv Patton

Heritage- having spent millions restoring the Arts Centre- please fund it so that the businesses and arts can continue to make it a great space for locals and tourists. It will flourish if they can continue.

3198 - Denis O'Connor

The CCC must continue to fund the Arts Centre. It is the most vital and well used amenity in the city, and has been for many years. With CCC funding this will grow and develop. The city has more citizens to use it for very many purposes. Te kaha and CHCH Square and a possibly rebuilt cathedral could never match it for human access, commercial, cultural, ethnic, and artistic activity.

32 - Norma Taylor

Please support the Arts Centre by giving them some funding.

3200 - Georgina Woods

Save the arts centre

3201 - Annabel Graham

Christchurch has a wonderful asset in The Arts Centre that Cantabrians are proud of. The support that goes to a very diverse group of artists is second to none. It is an institution that should continue to be supported financially by the council and run by people in the arts.

3205 - Judith Andrews

I would like to encourage the Christchurch City Council to continue funding the Arts Centre as it has done in the past. It is a very important part of the fabric of our city. After all the earthquake repairs that have been done it will be extremely sad if the council pulls the plug now. After the huge increase of rates in the last financial year and more to come in the next year it makes me wonder why the council is not willing to continue with support as most people I know are upset at this lack of foresight too.

3209 - Anouk Minnaar

[Recreation, Sports & Events > Pools (Capital)], [Libraries > Libraries (Capital)], [Art Galleries & Museums > Art Galleries (Capital)]

The current services exist for the council's residents and removing them will disproportionately impact elderly, disabled and lower socioeconomic residents. We cannot cut back on services people rely on (swimming pools, libraries, art centre, art gallery etc).

3213 - Alex Lockett

[Grants & Funding > Orana Park Funding]

Remain funding for Orana Park and the Arts Centre, both of these are strong attractions for our cities tourists, and bring vibrancy to Christchurch that locals deserve to experience. It would be devastating to lose either of these.

3216 - Teresa Mears

Kia ora. I am deeply concerned about the absence of funding for the Arts Centre in the draft long term plan. Please continue to support this wonderful community treasure that brings so much pleasure to Christchurch residents and visitors alike. Without the heritage Arts Centre to come to for events and activities that highlight art, music, dance, film, theatre, crafts and entertainment, this lovely part of the city would never be the same again. It is one of the most bewitching places that has been so lovingly restored after the earthquakes - a symbol too of Christchurch rising strong and treasuring its past.

3217 - Abdirahman Abdi

I struggle to see a cultural powerhouse of a city if >>> the arts centre aren't included in this plan.

3219 - Ted Meager

Save the Arts centre!! Absolutely top priority - the cultural heart of Christchurch. Which other NZ city has an arts precinct to compare?

3220 - Barbara Purcell

I want the Council to continue supporting the Arts Centre. It is an incredibly important part of our heritage and is used by businesses, the arts, education entertainment and is a huge tourist attraction. If the council increase our rates for the cathedral rebuild, which is not as well used or even a unique architectural style, and millions of dollars for Te Kaha which will only be used for certain groups of people, then they should continue to give funding to the Arts Centre.

323 - Jacqui Inglis

Please continue to fund the arts centre

>>>

Please include funding the arts centre as part of your heritage funding

>>>

Please continue to support arts centre

>>>

Please continue to fund the Arts Centre

3232 - Margaret Slack

It's essential for young and old. Also a lot of tourists go there!

3233 - Graeme McNally (Walk Christchurch)

Walk Christchurch is a long standing organisation of volunteer guides which leads over 1500 visitors each year on central city walks. The Arts Centre is a highlight for our walkers and is the only publicly accessible group of heritage building in the central city -so it provides a unique attraction. It is very appropriate that the CCC continues to provide funding -because of the "attraction" to the city experience of the Arts Centre. Any loss of funding or shift in focus will be detrimental to the visitor experience of the Arts Centre and the existing level of CCC funding support enables the Centre to operate and to develop as an outstanding attraction in the central city

3237 - Diane Leighton

The ART centre is a major civilising point of christchurch and deserves indeed requires the full support of the council otherwise what sort of place are we aspiring to be ??

324 - Richard Wesley

We need more money spent on supporting the arts, such as community museums like Ferrymead, and the Arts Centre.

>>>

We need funding for the Arts Centre and Ferrymead Museum. These are community assets that the council needs to support.

3242 - Lucy Pink

I'm deeply concerned about the proposal to provide zero funding to The Arts Centre in the Council's draft Long Term Plan. As a proud Cantabrian and a business owner housed within The Arts Centre, I cannot stress enough how vital this iconic institution is to the cultural fabric of our city. The Arts Centre has been an integral part of my life since my high school days, from spending time here with family, to spending countless hours at the bead shop crafting jewellery. Fast forward 15 years, and I feel incredibly privileged to have started a software company headquartered in one of the beautifully

restored heritage buildings. Every day, I'm inspired by the atmosphere - hearing the chamber music floating through the courtyard, the sound of kids laughing outside, and seeing all the tourists coming to check it out - it's just magic. But The Arts Centre is more than just a personal connection for me. It has been instrumental in the success of our business. In fact, we secured investment from an individual who discovered our company while staying at The Observatory Hotel. They saw our sign within The Arts Centre and reached out to learn more about what we do. That connection, made possible by our location in this hub of creativity and culture, has been a game-changer for us. I urge you to reconsider the proposal and allocate around \$1.8 million per year to The Arts Centre, as the Council has done in previous years. This funding is essential to keeping The Arts Centre alive and vibrant - a place where creativity, culture, and community can flourish in the heart of our city. Without Council support, The Arts Centre faces an uncertain future. And that would be a huge loss for Christchurch.

3244 - Sandra Radford

please save the arts centre. We need this in the heart of our city. It gives us vibrancy and the history and character of the buildings makes it a perfect fit for our arts community. There is not much left of our history in this city - we need the arts centre organisation to ensure there will always be heart and life to the buildings

3253 - Ewan Gee

The arts centre is a second home to me. Following the earthquake it has become (to me and many others) one of the few places that still exist in christchurch that still feels familiar. During both good and bad times it is a place to reflect and socialise. It is a vital part of christchurch, one that cannot be overstated. It desperately needs to keep its funding.

>>>

The arts centre is a second home to me. Following the earthquake it has become (to me and many others) one of the few places that still exist in christchurch that still feels familiar. and bad times it is a place to reflect and socialise. It is a vital part of christchurch, one that cannot be overstated. It desperately needs to keep its funding.

>>>

The arts centre is a second home to me. Following the earthquake it has become (to me and many others) one of the few places that still exist in christchurch that still feels familiar. During both good and bad times it is a place to reflect and socialise. It is a vital part of christchurch, one that cannot be overstated. It desperately needs to keep its funding.

>>>

The arts centre is a second home to me. Following the earthquake it has become (to me and many others) one of the few places that still exist in christchurch that still feels familiar. During both good and bad times it is a place to reflect and socialise. It is a vital part of christchurch, one that cannot be overstated. It desperately needs to keep its funding.

3254 - Tracey Jury

[Strategic Direction>Have we got the balance right?]

Firstly, thank you! Yes, for me the balance is mostly right and I realise that financially things (for everyone) are tough right now. However, support for our Arts Centre is an essential part of life in Christchurch and it needs to be supported and funded. To me this is paramount.

>>>

To me the Arts Centre is the best thing about Christchurch and I 100% want my rates to support it. It is a jewel and we are so lucky to have it. Please continue to support this vital and very special place.

3259 - Walter Logeman

I'm using this form to say: Fund the Arts centre! It the heart of Christchurch the repairs are going well enough - now make the thing thrive!!

3266 - Renee Mark (Italian Film Festival)

It is imperative that the Arts Centre continues to be funded.

>>>

[Libraries > Libraries (capital)]

The Arts Centre over the library.

3268 - Savannah Da Silva

[Grants and Funding > Other Community Grants and Funding]

[Grants and Funding > Orana Park Funding]

Please continue to find charitable and community organisations, especially ones catering to children and youth like Orana park and the Arts centre

327 - Roland Harrison

The Council should continue to support The Arts Centre. It is ridiculous that whilst spending huge amounts on a new stadium which arguably is not required given other facilities in the South Island, we are no longer funding an important existing facility. The Arts Centre is a unique space that hosts numerous different activities every single day of the year. I have enjoyed exhibitions, music, films, activities such as painting as well as shopping and food/drink in and around the Arts Centre. I doubt very much I will ever go to the stadium. In fact, given how close I live to it, I am likely to leave Christchurch when on the few occasions when it is in use!

3271 - Diane Powell

The City Council must help and continue with their support and fund the Arts Centre. There are so few old buildings left in the city particularly with history. The variety of use and entertainment it provides the public is like nothing else in Christchurch. It is unique and a major tourist attraction. It has so much potential to be more.

3273 - Christine Gundersen

Just been enjoying some events at the art centre this week and think it would be such a shame not to have this in our community especially when there overheads are so low. I understand the insurance for the buildings is high but this will need to be paid for regardless of what happens.

328 - Alan Hodges

Yes but we need to protect the Arts Centre & maintain funding.

>>>

Keep funding the Christchurch Art Centre & Heritage trust. The art Centre is an amazing heritage site & attracts many visitors. Living in the central city my wife & I spend much time there. I along with 2 friends had our combined 50th birthday party in the Great Hall. Hold special memories. I feel with out continued funding of the trust, the costs to the council (ratepayers) will only increase.

3283 - Elizabeth Clarke

>>> I do think it is imperatif the fundjng tk the Arts Centre continues.

>>>

Conyinue to fund the Art Centre , it is a critical part of our city and needs the annual contribution from CCC. I do NOT agree to the Council removing the annual payment. The Arts Centre has just spent over 200 million making their buildIng safe and restored, a jewel in ChCh crown and the CCC has to continue to support it with the relatively small annual contribution to its' (The Arts Centre) operational costs.

3287 - Claire Fletcher

>>> I also think that you could provide a small amount of funding to the arts centre to enable it to keep running but also hols expectation they look for commercial sponsorship too.

>>> the lack of funding for the Arts Centre >>>

3288 - Elizabeth Sandes

I think funding should remain for the Arts Centre. The Arts Centre is as iconic to Christchurch as the cathedral. It needs to be restored and funded to keep the sector from the museum to the cathedral a vibrant place. Visitors will come and spend money in this sector once this is restored fully. In the meantime funding needs to remain to support the businesses that are in place at the moment.

3289 - Jacky Bowring

It is vital that the Arts Centre continues to receive funding and support from the City Council. The Arts Centre is an integral part of our city, and is a unique heritage feature with a vibrant atmosphere - these are things that are make Christchurch memorable for locals and visitors alike. As a space for the cultural life of the city it needs support to ensure it can continue to offer what is an invaluable experience. The Arts Centre has achieved so much since it was first saved from demolition when the

University of Canterbury left for Ilam in the 1970s. It has endured the earthquakes and the restoration - these are significant achievements for a heritage complex, and this legacy should be honoured through continuing to support it.

329 - Alice Kavet

The Arts Center has brought great joy to my whanau, community and I. The Arts Center acts as one of the seemingly sparse points of culture that we have in our city. Upon my countless visits to the Arts Center we are able to experience diverse styles of art, being educated by and celebrating local and international talents. The Arts Center brings my whanau into town via the bike lane, it acts as a jumping place to the Botanical Gardens, Riverside Market, Art Gallery and other businesses in the CBD. The Arts Centre enriches our town, connects the town to its heritage and showcases what's in store for our collective future. The council ought to act as kaitiaki for our city's taonga, protecting and prioritizing it through necessary funding so that residents and visitors can share a similar experience for future generations

3292 - Gabrielle Heath

The Arts Centre needs to be saved. It is an iconic part of Christchurch's heritage and focal point for many activities. There must be a way to continue to support this centre.

3298 - Deborah Parker

Support the Christchurch Arts Centre. This is a precious heritage resource that is enjoyed by locals, New Zealanders generally and tourists. It provides life enhancing services such as cinemas as well as a link between town and gown. It must be supported.

33 - Kristina Pickford

As a former resident of Christchurch I am astonished that CCC is proposing to cease funding the Te Matatiki Toi Ora Trust, The Arts Centre Trust, its foremost heritage and cultural asset. The decision is embarrassing for the city particularly when at the same time the city is committed to building a rugby stadium for close to \$1billion. If the \$1.8m annual sum is not excessive for the enormous contribution the asset makes to the fabric of the city. If the money is simply not available in your current budget then rates must be increased to cover this small additional cost.

>>>

There is a distinct lack of vision when it comes to the proposal to stop funding Te Matatiki Toi Ora Trust, (The Arts Centre Trust) which manages the city's foremost heritage and cultural asset. The decision is embarrassing for the city particularly when at the same time the city is committed to building a rugby stadium for close to \$1billion. If the \$1.8m annual sum is not excessive for the enormous contribution the asset makes to the fabric of the city. If the money is simply not available in your current budget then rates must be increased to cover this small additional cost.

The decision is embarrassing for the city particularly when at the same time the city is committed to building a rugby stadium for close to \$1billion. If the \$1.8m annual sum is not excessive for the enormous contribution the asset makes to the fabric of the city. If the money is simply not available in your current budget then rates must be increased to cover this small additional cost.

330 - Katherine Bonner

Keep the Arts Centre funded. It's the most important heritage site in the city

>>>

The Arts Centre is the cultural heart of the city. Please continue to fund it

3300 - Jenne Robb

Yes, however the art center is an important part of Christchurch. Number one attraction for our visitors.

3301 - Anna Wilkes

The Arts Centre is the city's flagship of arts, culture and heritage in our city. With the return of tourism to the city the Arts Centre should begin to flourish and relies on support from the Council to ensure this happens. Withdrawing funding for the Arts Centre shows poor judgement by the Council, especially given the hundreds of millions that continue to be pumped into sports facilities

If you can afford to bring forward 1.8 million to fast track your grasp of climate risks then you can afford to continue to fund the Arts Centre.

Reinstate funding for the Arts Centre

331 - Stephen Spencer

Please continue to fund the Arts Centre - a city without music, arts, culture, history is a soulless characterless environment and as the Council you have a responsibility to nurture, protect and promote a city of culture on our behalf. Not everything is about dollars - where is your soul and sense

of values?

3310 - James Lunday

Grants for Arts Centre to finish the job and operational for them to become world leading arts centre

3313 - Alice Martelli-Martin

I'd like to see some funding going towards the arts centre. To me it's an essential part of the cities life force. It's somewhere I remember going at a child, and I can't say that about very many buildings in this city. We've all been looking forward to seeing it rebuilt for so long. It would be devastating to see it crumble again.

3316 - Rachel Conway

Funding for the Arts Centre needs to be added. Its historical and architectural value is significant. Why waste the funds that have been spent restoring it by failing to support its operation in a meaningful way.

3317 - Nik Kneale

[Planning & Strategic Transport, Urban Design, & Urban Regeneration > Strategic Transport]

Prioritise active travel. Fund the Arts Centre. Both in the interests of providing value to our people (through healthy living and access to culture and heritage) and to reduce the cost to ratepayers into the future.

>>>

Fund the Arts Centre.

3318 - Mary Ogilvie

I think it is vital that chch council support the Arts Center because it's important that people have an opportunity to expands their minds culturally, artistically, and globally.

3320 - Annie Rutherford

The Council needs to find the Arts Centre. These beautiful heritage buildings hold so much history within their walls. I was a student there in the 70's for many years and felt privileged to spend that time there. So many similar buildings have been destroyed with the earthquakes. My family own properties around the Arts Centre and it has always been a wondrous backdrop for them.

3327 - Ann Godfrey
Fund the Arts Centre

333 - Josephine Jilly Marshall (Christophers wife)

I cannot believe the council is considering withdrawing the finance it has given the wonderful Arts Centre, as situated where it is, near the Botanical gardens, museum and art gallery, it has been the hub for tourists who bring in money to your council. It is one of NZ's gems, full of history, the old university, Rutherfords Den etc. A collection of fine greek vases at the classics department also housed there. Surely the council knows what an asset to the city it is. My husband, Christopher Marshall ran classical music concerts at the great hall for many years and everybody enjoyed the wonderful atmosphere. And also had a piano play day which was enjoyed by many people. My son as a ex-classic student at the university values their position greatly.

>>>

Many NZ, Canterbury and Christchurch citizens I feel would be shattered if this treasure was lost.

>>>

Small rises may be necessary if people knew the money was going to save the Arts Centre, they would be doing their bit.

>>>

Already wonderful work has been done to save these old historic iconic buildings. Surely that money time and effort should not be thrown away.

>>>

After the earthquake there is so little left of Canterbury's early history, please save this valuable asset.

>>>

Once something as valuable at the Arts Centre is lost, you cannot bring it back! Christchurch would be the poorer especially having lost so much already in the Earthquakes.

3330 - Marijke Dryfhout

Ongoing funding for the Arts Centre is important. It is one of a few buildings of that style and era that remain.

3331 - Lisa Fazi

The Arts Centre is the cultural fulcrum of Christchurch, so to stop or reduce investment in it will be financially & culturally counterproductive.

3332 - Deborah Clarke

Please continue to fund the Arts Centre. It has a range of wonderful spaces and already showcases a wide variety of art, music and culture. A destination that truly has something for everyone both locals and tourists music and culture

3333 - Andrew Borrowdale

The proposal to discontinue funding for the Arts Centre is outrageous. The Arts Centre is a vital heritage site that complements the Botanic Gardens and the Canterbury Museum. And you propose letting this fall into disuse and disrepair? At a saving of a measly \$1.8m - and this after you have squandered hundreds of millions of our money on senseless vanity projects? Get a grip!!

3334 - Shona McDowell

Please support the arts centre

3336 - Margaret Lovell-Smith

Two local facilities (the Arts Centre and Orana Park) which rely on Council grants have recently highlighted the need for ongoing funding. Whichever category provides funds to these organisations ('recreation and sport' ? community and citizens?) needs to receive increased funding to continue these grants.

3339 - Frank Lad

As the song goes ... how bizarre! how bizarre! You've got rugby on the brain. Please fund the arts centre, the jewel of chch

Fund the arts centre

334 - Clare Marshall

I want the council to continue funding the arts centre. I can see how it is not the mayor's cup of tea, but it is not okay to let personal interests take over the needs of the city. The Arts centre is a part of our city and the council should fund it. Cutting funding is a false economy. The Arts centre provides numerous free events which increase the well-being of the population, is a major tourist destination in the city and is an essential part of our heritage - it's the old university site. So much of the city's heritage was lost after the earthquakes, we fought to keep this centre and now you want to close it

down - a place like this is not self-funding. It cost millions to restore the arts centre, half the population of Christchurch will have contributed additional personal funds to contribute to this. It is the viable, living heritage heart of our city , a real attraction and destination for locals and tourists. In stark contrast to the cathedral which is still crushed and broken over a decade since the earthquakes. It's right opposite the (newly revamped) botanical gardens and the (being restored) museum -why would you want to create an empty shell after huge money is spent on these other neighbouring projects? I want the council to continue funding the arts centre. If you're looking for cuts, perhaps fund a few less Mauger trucks to transport gravel and hard-fill around the place!

3340 - Ric Summer

[Strategic Direction>Have we got the balance right?]

I don't think so. The arts centre is one of the best spots in the city (visitors from Sydney (a city largely with the balance right) also had this view). The charitable trust should be adequately funded so that it can continue to function. Cardboard Cathedral to replace the broken one.

>>>

The arts centre is one of the best spots in the city and the charitable trust should be adequately funded.

>>>

The arts centre is one of the best spots in the city and the charitable trust should be adequately funded.

3343 - Heather Davidson

The Art is a treasure for us all. The beautiful and heritage. Whats in the buildings ate important to something that is unique markets something that will bring people there and tourists. The council has a responsibility to support this very special and unique place. I really support the council funding and supporting this place. Pleae listen to the people

3344 - Yumeka Hildreth

I am not alone in believing that the Arts Centre is the beating heart of the community in Ōtautahi, Christchurch. If you fail to continue your funding, it will be a huge loss to not only the arts community, but for tourism, hospitality, and the economy. In these trying times of inflation and recovery from the ongoing pandemic, it just makes no sense that you would not include this economic power house of an organisation in your long term plans. Please reconsider including the Arts Centre and do the community and the hard working staff justice.

3348 - Laura Williamson

No. Please do not discontinue funding for the Arts Centre. I am a frequent visitor to the city and the Arts Centre is always thriving - an exceptional facility and community that is an ongoing draw for visitors.

>>>

As per my previous comments, please prioritise the arts and the Arts Centre.

335 - Wayne Bates

Following the earthquakes Christchurch has developed into a bland neutral city that does nothing to excite anyone, until you get your first view of the Arts Centre. We cannot afford to have this stop operating as it now does.

3350 - Davina McNickel

Some key places are not being sufficiently funded. This includes Orana Park, and the Arts Centre.

3351 - Derek Goring

The Art Centre funding should be reinstated along with the Dux as it was pre earthquakes. For this, the present CEO of the Arts Centre needs to go and be replaced by someone with better financial and management skills.

3353 - Janna Gresham

[Rates > Residential Rates]

If there is rates increase then prioritise visible key community places like the arts centre; then I feel I am getting value for a rates increase

>>>

Where is the funding for the arts centre?

>>>

Yes I think you have missed the priority of providing funding for the arts centre

>>>

It breaks my heart that the arts centre is not receiving funding-it is short sighted and money grabbing

3355 - Laura Coleman

There is still work to do to truly build and maintain thriving city. However cutting funding to the incredible and beloved Arts Centre is ludicrous and short sighted. It is a major tourist attraction and gives loads to my friends and family in terms of an enjoyable meeting spot and partake in various activities. It's such an important part of our city, I believe. It saddens me to think that our council do not believe the same.

3356 - Mary-Anne Borrowdale

No, it is madness to remove Arts Centre funding. It is the beating heart of the city, its most successful drawcard and asset to tourists and locals alike. I would have fewer new cycleways and keep funding the Arts Centre.

>>>

and save the Arts Centre.

>>>

Prioritise the Arts Centre. ChCh is a nothing city without its gothic heritage, used in a productive way.

>>>

I would much rather that you spent money on the Arts Centre than on Cunningham House, which is hardly a vital city resource.

>>>

The city cannot manage without a thriving Arts Centre, right in the heart of the heritage precinct.

>>>

My family and I are devastated by proposed funding cuts to the Arts Centre. The Arts Centre is a beautifully restored heritage asset, with thriving use and involvement by businesses, tourists and locals. It is the Jewel in the Crown of ChCh and should be non-negotiable for Council funding sufficient to continue it's (well-run) operations. Please revisit that proposal and do not cut funding to the Arts Centre.

>>>

The Arts Centre is a unique, special and vital community amenity. It is unparalleled within NZ and is the Jewel in the Crown of Christchurch. If city funding were limited, this is among the very last amenities that should be defunded.

336 - Vickie Hearnshaw

The Arts Centre must be saved. It also must be recognized as an integral part of the historic fabric of our city. Everyone loves the Arts Centre and so do the visitors to our city, especially when so many of our other historic buildings are not open to public/in good repair. Please ask the people of Christchurch what they want!. It is our jewel in the crown.

>>>

This is not to do with rates. It is over and beyond this: the Canterbury Museum restoration project is being partly financed by the CCC.

>>>

Funding the Arts Centre must be in the Long Term Plan!

3362 - Cherie Mansell

To me the Art Centre has just as much historical significance as the Cathedral. The Art Centre is functional and enjoyed weekly by Christchurch citizens of all ages plus International visitors.

3363 - Brodie Marra-Stevenson

[Recreation, Sports & Events > Community Arts], [Parks > Heritage (Capital)]

We need to protect our music and arts space, and heritage sites that are arts focused such as the arts centre cannot be left unfunded.

>>>

but again, art centre needs operational funding.

>>>

heritage funding should cover the art centre.

>>>

The Arts centre is one of the few standing pieces of heritage architecture in Christchurch that is still a friendly useable space. If anything we should be embracing the arts centre more, and increasing funding over cutting funding. It is a destination location in the CBD. It is where Ernest Rutherford scrawled out his notes. It is where many a child has eaten copious amounts of fudge in the last 30 years. The theatre is one of the best places to see a movie in Christchurch, Bunsen is one of the best cafes in Christchurch. Walking through the outdoor space on a cold winters night with a steaming cup of mulled wine is a core memory for me as a young adult, trying to fall back in love with the city I had grown up in, but that had felt so broken for most of my life.

The Arts centre gallery is run by some of the coolest people I have ever met, their passion is unmatched.

Please don't defund the spaces that make Christchurch Christchurch.

Ōtautahi is finally regaining strength. Tearing out the foundation of that is not the way to go.

3366 - Robert Manthei

Of all the City's public spaces, the Arts Centre is one of the busiest, most attractive, home to varied activities enjoyed by everyone, and is a heritage site known throughout New Zealand. Because it benefits so many people, groups and businesses--every day, all year long--Council should fund it. Please save the Arts Centre!

3367 - Kaye Nasralla

I think The Arts Centre is a valuable and important part of Christchurch's past and future. So many of our heritage buildings have been lost and we need to ensure such a beautiful, social and community space is retained and funded by the Council. If need be, happy to support a rates rise to go direct to funding of The Arts Centre.

3368 - Roland van Bommel

No, I think that it is vitally important to continue supporting the Art Center. Life in Christchurch is not only about big sport events and popular concerts, it is also about small scale cultural events in a historically important set of buildings.

337 - Debbie Jones

[Transport > Cycleways]

I was mortified to see that you are proposing spending \$199m on cycleways and then not funding things like the Art Centre. I think there is a gross overestimation on the cycling requirements in Chch. I spent 6 weeks commuting from the Chch hospital in peak hour traffic earlier in the year (leaving between 5.00 and 5.15 pm) and the most I ever saw using the Tuam Street cycle lane was 2 people. Surely we can cut some of this funding and allocate it to other areas in Chch (like the Arts Centre).

>>>

See my previous comments regarding the proposed spend on cycleways, esp in light of the Govt and NZTA advising there will be no money coming from them. I feel that a large chunk of that money could be spend on other things in Chch including the Arts Centre. I think there needs to be a proper understanding of the current use of cycleways and

3370 - Eliot Blennerhassett

In constrast, there is insufficient support for the Arts Centre.

As part of being a "cultural powerhouse city", I think it is important that the council enables the continued operation of the Arts Centre. It is a key part of the heritage axis of the city from the cathedral through to the museum. As an amenity that is (partly) available 24 hours a day, it serves needs that those other places do not.

3374 - Diane Morcom

I would like the Council to continue its financial support for the Arts Centre. As a relative newcomer to Christchurch I love the buzz of the Arts Centre - there is always something interesting to view - exhibitions, community events, wonderful, classy shopping opportunities, great movies, food and coffee. All in a stunningly restored historic environment. Whenever I have guests from out of Christchurch I take them to the Arts Centre - for me it is the beating heart of the arts and the community in Christchurch - fun, lively, interesting and uplifting. What you can see and experience at the Arts Centre is the best of this city's - and New Zealand's - heritage and creativity. The things you can do and see in that small, but beautiful and historic area is important because looking at the buildings and the art challenge us, make us think, make us wonder, make us feel part of this city and this country. In an increasingly divided society the Arts Centre offers a very special place where the citizens of this city - and tourists - can appreciate the beautiful diversity and creativity of New Zealanders past and present and can be inspired and uplifted by the experience. I do hope that the Council will continue to fund it, as it has in the past.

3375 - Sarah Hadley

No I would prefer money was spent on The Arts Centre instead of the stadium.

>>>

The Art Centre needs to be a priority.

3377 - Roderick Syme

[Strategic Direction > Have We Got the Balance Right]

I support most of the proposals, but have a serious concern at the proposed omission of ongoing support for the Christchurch Arts Centre.

>>>

The proposed discontinuation of support for the Christchurch Arts Centre is of particular concern. I consider the Arts Centre to be an essential component of the cultural fabric of the City, along with the Canterbury Museum and Christchurch Art Gallery, deserving of significant ratepayer support. Certainly the Arts Centre should do everything possible to develop appropriate commercial activities in this Heritage environment, but features such as the Rutherford Den, the Great Hall and the Observatory are fully deserving of support. I was a student on this site 1956-64 and have enjoyed a range of activities at the site since establishment as an Arts Centre. There would be serious negative consequences if the City Council was forced to take over responsibility for the site.

3379 - Mike Currie

Arts Centre I want CCC to continue funding the Arts Centre. There is nothing for The Arts Centre in Christchurch City Council's draft Long-Term Plan. By contrast the last plan included \$1.8 million per year (average) for The Arts Centre. Without Council support, The Arts Centre Trust will be on a path to insolvency. It costs a lot to insure, operate, and maintain an entire city block of heritage buildings. The current insurance bill alone is \$1.2 million – up 1,000% since the quakes. The Arts Centre is a thriving community facility, used by a wide range of Christchurch people, from Māori artists to Muslim musicians, from sculptors to hip hop dancers. It now attracts one million visitors a year. The 2022 proposal for restoring the Dux involved no rent to The Arts Centre for 50 years. That proposal would worsen the Trust's financial position by raising insurance and maintenance without bringing in any revenue. A new proposal is now on the table so here's hoping the Trust survives to consider it! The Arts Centre has a leadership team of four: Director, Finance Manager, Operations Manager, and Creative Director. Each of them is paid less than equivalent positions at Council. Staff at The Arts Centre work incredibly hard and do a lot of tasks in-house. Recently, for instance, they brought cleaning and security in-house to get better service and lower costs. Here are my 3 main asks for the CCC LTP.

338 - Jennifer Riley

The Art Centre matters

>>>

I see that there is no ongoing funding for our beautiful and historic Arts Centre. This is scandalous. We have an obligation to protect and cherish our most important heritage buildings. Get your act together, only providing the “basics” makes a dull and pedestrian life with nothing to relieve the monotony.

3382 - Meg Biggs

The art centre is an integral part of Christchurch’s heritage not only by its physical presence but also its social importance both historically and currently . Without the art centre being open to the public in the way it has been for many years the central city would loose a great deal of foot traffic, money and its appeal to tourists. The loss of the art centre would result in the entire feel of the city being reduced both culturally and historically . The art centre provides a venue for so much that makes Christchurch tick for every age group. The required funding being asked for from the council is very small in comparison to the importance of the art centre to the city and its residents.

3384 - Robert Biggs

The Arts Centre is loved by local people and engenders visits from tourists from around the World. We should not become a city for Philistines. When \$600 million plus is being spent on a sports stadium a paltry request for \$1-2 million dollars for the Arts Centre Trust to continue operating should not be ignored. If the Trust collapses the Council would be left with a white elephant on its books. Most citizens of Christchurch have been grateful that the Neo-Gothic buildings that make up the Arts Centre were not demolished prior to the Earthquakes and that expeditious and skilled strengthening and repairs were carried out until the money ran out. Some ongoing, long term funding should be found for the Arts Centre continuing as an entity as it will decline if commercial interests alone are pursued.

>>>

Please find a small amount of money out of the total budget for the Arts Centre to continue functioning in the future and to avoid it becoming a White Elephant and an even greater drain upon City Council resources. I have lived in Christchurch since 1978 and regard it a a very special place, but there has never been any lack of controversy. A City Council and Mayor are elected to make difficult decisions in the hope that things gradually improve for the inhabitants of the City'

3386 - James Herbison

We want the Council to support The Arts Centre, to us the Arts Centre is the heart of ChCh, it has led the way in the restoration of the earthquake ravaged city and with the Cathedral restoration delays the Arts Centre provides a central hub for a raft of people and activities (at a recent meeting we were

amazed at how many there are) for both current and future (contingent on Council support) generations. The Arts Centre holds special significance for us for a number of reasons including (note this is not a complete list): - Our daughters have attended numerous holiday and other activities at the Arts Centre - Our daughter has learnt music, busked, played at gallery openings and most recently worked at the Arts Centre - We frequently visit and appreciate the beauty of the buildings and surroundings, visit the numerous Art Galleries, view performances and activities, attend the cinema, and enjoy the markets and vendors on site. It is incredible to see the draw this place has for tourists and the business they bring. We cannot think of a better organisation/facility for the council to support. As long-standing residents and rate payers we can't think of a better place for our rates to be spent. Please see sense and support the Arts Centre Funding of \$1.8 million per year in your LTP.

3389 - Megan Roulston

3. Fund The Christchurch Art Centre. I support submissions made by the Arts Centre trust (not sure if name). This area is essential to Christchurch and our tourism. CCC should fund this.

339 - Mary-Louise Hoskins

Please continue to support our Arts Centre - do not discontinue your funding for this precious and significant centre. So much has been spent getting the centre back on its feet after the trauma of the quakes, and a magnificent job was done. Something for all Cantabrians to be extremely proud of. I frequently go there, to the movies, the cafes, the art gallery... I am aware of the health innovation hub which is only just getting established and is of great value not only to our city but to the nation. When I visit during a specific event, such as the sculpture expo, the place is always humming. It would be a disaster to see this place go backwards. Already there are sections of the complex which cannot be refurbished due to funding constraints. That hopefully will all get done in the fullness of time. The centre management have taken all the measures that they can to ensure it is operated efficiently. Now it is up to the Council to back it. Don't let the citizens of ChCh down on this.

3394 - Hamim Uddin

I would like to make mention of the arts centre about which no funding plans have been made. Seeing this change would mean a lot to me. I'm a third-year student at UC and am doing one of my BA majors in Classics. Needless to say, the Arts centre has a lot of sentimental value to me. I'm eventually going to graduate and hold on to dozens of fond memories which have arisen from my visiting the arts centre. Making sure it continues thriving is important and I hope the council can ensure this occurs.

3395 - Amanda Harris

Save the arts centre!

>>>

The Arts Centre holds both cultural & historical significance. To interfere with this solemn space is not only short-sighted, but cruel & heartless. Our future generations will be robbed of their right to bask in

their ancestors memories. It is both vile & selfish to cut funding for the Arts while our City is still healing from the earthquake.

3398 - Robert Pethig

Continue funding of The Art Centre to previous levels or at least partial funding. It is a cultural landmark and tourist draw, with the botanical gardens and museum all in the same area. It is a community asset and should be taken care of by the council. Increase of public events, markets and reduced parking costs would also help this important symbol of the city. I grew up going to The Art Centre, exploring the buildings, wandering the market stalls over the weekends and trying new foods from the food stalls that I might otherwise never have experienced. I feel that is why it is such an important place. It is a beautiful representation of our past, a place of experiences and a meeting place that we might become more aware of the various cultures that make up our city.

3399 - Gilbert Best

I want Council to support the Arts Centre. Christchurch's Arts Centre is a focal point for artists, performers, students at all levels of study and the general public. On the outside the Arts Centre may appear to be an old set of buildings that once housed the University but if one looks a bit closer it can be seen that there is a thriving artistic community making good use of the performance spaces and exhibition areas. There is no other place like this in Aotearoa New Zealand so if it was lost, or fell into disuse, due to lack of funding then that would be a huge loss to the artistic community. When the artistic community suffers the community as a whole suffers since it is art that helps define our humanity and brings meaning to our lives.

34 - Jean Flannery

Please reconsider funding the Arts Centre. It cannot survive with no funding and is a wonderful cultural asset to the city. It draws in many, many visitors a year, both to explore the complex with all it has to offer and to attend a broad and diverse range of activities, events and entertainments which cannot be found elsewhere. It manages its finances prudently and it would be a false economy for the council to withdraw funding, costing more than it would save.

>>>

It would not be a savings to withdraw funding from the Arts Centre, given the likely cost of it going into receivership and the money that comes to the council indirectly through its visitors.

3403 - Shelley Keach

You should keep funding the arts centre.

3404 - Maureen Heffernan

Please continue to fund the Arts Centre as it is a real taonga. I have fond memories of going to University there, participating in concerts and attending many events in the Great Hall, Court Theatre, Lumiere Cinema and other venues. The Arts Centre is vital to our city's life and mental well-being. Please keep it going!

>>>

Please keep funding the Arts Centre. Thank you very much.

3410 - Boubey Black

As above! Continue funding locations that provide art and culture!

Pretty disappointed with the proposed decision to stop funding to the Arts Centre. Not only is it an incredible location that holds many good memories for me (in a place where I continue to get lost in the CHCH rebuild, now unfamiliar with the changed landscape, but it has incredible historical value, tourism draw and houses many excellent small businesses that I often frequent.

>>>

Again, really upset by the possible changes to defunding the Arts Centre.

>>>

These are all great things, however I would hope the Christchurch Arts Centre funding, along with other historic buildings, would be covered under 'Heritage'.

>>>

As above! Continue funding locations that provide art and culture!

3412 - Alicia Harbison-Price

I'm concerned to hear that the Arts Centre is no longer receiving operational spending from the Council. Recreation & Sport receives 5% of funding, but for many people places like the Art Gallery, Museum, and Arts Centre (1%) are their places of recreation over gyms and pools. These are also

spaces which support the community outcome of creating a "cultural powerhouse". They are also locations frequented by visitors to the city.

>>>

As mentioned before, I would like to see continued financial support for the Arts Centre.

>>>

>>>

[Recreation, Sports & Events > Events]

A cultural powerhouse city relies on continued funding for cultural institutions like the Arts Centre and for community events.

3414 - Chrissie Williams

I propose you DOUBLE the 'Special Heritage (Arts Centre) Targeted Rate' from to 0.000389 c/\$ to 0.000778 c/\$ - this would help fund the Arts Centre operations.

342 - Mary Davison

I am very concerned about the lack of financial support proposed for the Christchurch Arts Centre. This is a taonga for our city and for many of us, the heart of Ōtautahi. Having nearly come through the post quake rebuild, I cannot believe the Council would abandon this vital part of Christchurch's culture. Please rethink!!!

3421 - Mary Clark

I am deeply concerned about the proposal to cut funding to the Arts Centre. The precinct is attractive, vibrant and diverse. It is a triumph. I cannot imagine what could be a higher priority for us rate payers to support. It is vital to the city and to the precinct. The funding MUST continue. I cannot overstate the importance of the Arts Centre to our city.

3423 - James Upton

I urge the Council to retain its funding for the Christchurch Arts Centre as it is at the heart of the culture and heritage of Christchurch.

The centre is a major tourist attraction and we always try to bring our visitors to experience this special place.

Christchurch's long term social fabric and the infrastructure that supports central liveable spaces needs the collaboration of all of us through the mix of City Council funding, along with business and community support.

Please continue to honour your responsibility to provide adequate funding support for the Arts Centre so that it is able to continue to develop its strong community and arts focus.

Yes in general, but the exclusion of the Arts Centre seems anomalous. Given the Mayor's aspirational call to make Christchurch a fantastic place, and community outcomes that include the city being a cultural powerhouse, funding of the Arts Centre is in line with the council's aim to maintain existing services, and to hold a steady course at this time.

>>>

The Arts Centre is missing from the Heritage spend. Surely that is an oversight.

3425 - Hugh Dacre

According to media reports the city owns the Arts Centre. The Trust which runs it does so under an Act of Parliament but it is the responsibility of the owners to look after their property and you, the City Councillors, are the elected representatives of the owners. If you are not prepared to protect and maintain the city's assets you should step down from your roles.

The Arts Centre is one of the few major historical buildings/complexes which are both standing and functional. An amazing job has been done to restore it and ensure that it is used. It is an architectural jewel in a city which is mostly quite ordinary, especially since the earthquakes, and a place to which we can take visitors with some pride. It is beyond my comprehension that we could spend so much money, time and effort to restore it, only to de-fund it now. How did the plan get to this stage without action by our councillors?

This complex, along with just a few other buildings, embodies the vision, courage and determination of the people who built this city - with far fewer resources than we have now. How we treat their efforts is a measure of our own characters. You have a last chance to put matters right and ensure that the Arts Centre continues to provide citizens and visitors with a beautiful, tranquil and versatile blend of man-made and natural spaces, which are symbolic evidence of our *turangawaewae*.

Mostly but your savings seem to have excluded other important services and facilities. Two that come to mind immediately are the Arts Centre (which you should regard as your direct responsibility given it is owned by the people of Christchurch) >>> If we provide inducements for external business ventures such as sports etc we should certainly look after our own, especially those which are directly benefiting the community, often with a lot of voluntary input.

3426 - Ann Richards

In relation to the above spends, the current monies allocated to the Arts Centre would appear to be minimal. A further plan to stop funding would, in my opinion, be short-sighted.

>>>

[Other/Special Interest Topics > Cathedral]

Please continue funding the Arts Centre. Consider reducing monies to rebuild the Cathedral ?

>>>

Presumably the lack of mentioning funding for the Arts Centre was a deliberate omission?!

3430 - Philippa Upton

Heritage - needs to include funding for the Arts Centre

>>>

We strongly urge the Council to retain its funding for the Christchurch Arts Centre.

We love the mix of carefully chosen commercial and non profit community-based ventures spread throughout this beautifully restored and centrally located complex that has so much history to share.

The centre is a major tourist attraction and we always try to bring our visitors to experience this special place. Our children and grandchildren love to explore the centre including Rutherford's Den, where their great-great grandfather studied at the original Canterbury University.

Highlights for us include being in spaces such as the great hall and the quadrangles for exhibitions, festivals and concerts such as the Antarctic and Sculpture festivals.

We are privileged to attend as well as take part in concerts by local and visiting performers and to experience the luxury of Lumiere Cinema, and it's great to be able to wander through to markets, cafes and food carts, not to mention browsing the quirky Custard Square book caravan and finding Classical treasures at the Teece Museum.

Please keep funding the Arts Centre so that it is able to continue to develop its strong community and arts focus and ownership.

A shortsighted and apparently ill-considered decision to cut funding to the Arts Centre will only add to future costs for the rate payer.

The Council must continue its funding support for this unique, Crown-gifted treasure in the heart of Christchurch.

3440 - Vanessa Ruppert

I would really like you to include funding for the arts center in your long term plan. The arts center has been a great venue since I moved to Christchurch and was one of my favorite things that I discovered in the city center. It has a great range of program for all ages, the summer outdoor events are amazing and it would be a great cultural loss to not have those activities and the arts center in the city anymore. It has also become one of the few venues in this city for live band and dance sessions and it would be a great shame to loose those events. The arts center is important for the city!

3441 - Graham Kennedy

Please save the Arts Centre!after all the work done to reestablish this facility as a premium...iconic...Christchurch attraction, it is totally unreasonable to cancel the \$1.8m contribution towards operational funding

3445 - Simon van der Sluijs

I think the Arts Centre needs your continuous support. It is the heart of Christchurch arts and culture and without it it would be a great loss to the city. Actually it should not even be a question if you need to support the Arts Centre, it should be a given. The Arts Centre is a drawcard for locals as well as tourist, so please do not take it away from us, show that you care, show that you have a heart beating for Christchurch and its Arts Centre!!

3446 - Olle Hartvigsson

I want the Council to include the arts Centre in their long term plan. Free and accessible culture is an essential part in any equal society, to make too many cuts in culture is doing the future a disservice.

3451 - Sarah Lovelady

We need to also protect and save our historical and cultural buildings. It's beyond important, it's a major part of us as Cantabrians and to lose it would be a crime. Please save the arts centre. It's beautiful and rare, and creates so much opportunity for art and culture to thrive. I personally have much history there. My parents were in the Chch Theatre Workshop in the 70s, I went to Southern Ballet and performed in the theatre there, and I also went to Opera lessons in one of the smaller studios, not to mention all the various show and films I have been to see there. We need the CCC to do the right thing and continue to invest the the Arts Centre. Also, why would you want to stop a rebuild that is almost there!

3452 - Sabine Handel

The Arts Centre is an invaluable attraction of Christchurch with its historic buildings, academic background and very creative art scene. The fantastic events put on for the whole family are not to be missed! We love the Arts Centre. Don't stop supporting it!

Put money in family friendly places, The Arts Centre, Orana Park, football greens.

>>>

Places like The Arts Centre, Orana Park, football greens and libraries make this city a good family friendly place to live!

>>>

Keep The Arts Centre, Orana Park and football greens as well as current services for libraries in your funding! They are important features for families in Christchurch. Check the money draining projects and think before making decisions with the rate payers money!

3454 - Sandra Abbott

I really want the Art Centre saved as it's such an important building that has arts, cinema, restaurant, cafes shops which I visit often and always take visitors too. Lumière Cinema must be saved 🎬🎬

346 - Janet Earle

PLEASE continue to support the Arts Centre. It is so important for our local community In many ways. I go to the Lumiere theatre regularly I use the markets for gifts every month and take tourist friends there. I use a cafe every week,(ditto tourist friends) I take my grandchildren to events there every holiday I attend the monday afternoon concerts regularly. (Where else would you ever get high quality music for \$20??) The Arts Centre is also in the centre of the tourist area: Botanic gardens, Riverside Market, the Art Gallery, the Museum (in the future), Avon River boating and the river in general, the River walkway , Te Pai, and the town centre. The buildings are special ,both historically and visually. PLEASE, PLEASE KEEP SUPPORTING ONE OF THE BEST FEATURES OF THIS CITY. JANET EARLE

3460 - Jasper Van der Lingen

Fund the Arts Centre. It is one of the most important focuses of the cities identity, heritage and vibe.

3469 - Sasheen Brownlie

Because this is an iconic identity to Christchurch people and loved by them, it's the heart of our city and needs saving with your help.

3473 - Damian Sims

One crucial missing piece - funding of the arts centre. This is the absolute jewel of Christchurch and must be supported.

>>>

Missing funding for the arts centre

3479 - Rhys Glenjarman

The Arts Centre, Orana Wildlife Park and the rebuilding of the Christchurch Cathedral are core tourist attractions. Not allocating funding to such major attractions will severely limit tourist interaction with the city. Having spoken to many cruise ship tourists in the last 7 months, they are already struggling to find entertainment in Christchurch area. Many say they would like to actually spend their money they have withdrawn from cash machines but find nothing to do here. Without continuous funding to the Arts Centre, Orana Park and the rebuilding of the cathedral will diminish tourism and potentially have genuinely catastrophic economic impacts for Christchurch businesses. The loss of many of the cities character buildings had a significant negative impact on the mental wellbeing of Chch residents. The neo-gothic architecture of Chch is genuinely rare internationally and is part of the soul of the city. Allowing these iconic buildings to be abandoned is akin to iconoclasm. The loss of significant buildings to earthquakes has been shown to have a similar effect on residents as actual iconoclastic loss in peer reviewed research.

348 - Christiana Raphael

Not including funding to the Arts Centre is just plain idiotic. Mr Mauger you say you want to protect the things we have. Cutting funding is not protecting!

>>>

Include the Arts Centre thanks!

3480 - Martin Robertson

Funding should be included for The Arts Centre >>> as per previous budgets

3481 - Gabrielle Macdonald

The arts centre is such an appointment part of Christchurch, especially for our tamariki, I remember numerous school trips to the arts centre, and special time with family exploring exhibits and learning in a visual and interactive way.

3482 - Col Pearson

The Arts Centre must be supported to the same level as it has in previous years. This is an essential part of our city and is much more deserving of support than the Christchurch Cathedral in the Square. Support for this complex is essential to ensure it remains a public space rather than is turned into apartments and hotels to which those with high disposable incomes can access.

3484 - Prue Stringer

The Arts Centre needs funding. When there recently I found it absolutely buzzing , with locals and tourists flocking to its attractions. It is a major city hub.

3485 - Dr Sally Price

But funds need to be included for supporting important visitor attractions such as >>> the Arts Centre, Tim Brown, Historic Arts Centre faces bleak future... 22 March 2024, RNZ).

349 - Liam Dangerfield

Please keep funding the Arts Centre, it is a Christchurch institution and provides diverse arts programming attracting many visitors to the centre of town every year. Failure to fund it will be a shortsighted approach and drive up our rates which are already high enough from a number of large projects that have been thrust upon the city.

3495 - Elizabeth Lochhead

I consider it vital that the Council continue to support The Arts Centre. I understand that the future of the Arts Centre will be seriously jeopardised if the Council withdraws its funding. The Arts Centre has always been central to my experience of the city - from weekend lunches at the market and visits to the Salamander Gallery as a young child, to enjoying the space with my own children, who love it. It is always the first place I bring visitors to Christchurch. Without even touching on the heritage and wider social, cultural and economic values associated with the Arts Centre, the city simply seems unimaginable without it.

3496 - Bindy Barclay

Supporting heritage , arts , galleries and museums has been haphazard. CCC ought to consolidate its commitment to these by: Support the independence of the Arts Centre by funding costs as has been a precedent. The successful establishment, creation and restoration of the Arts Centre has been a direct result of its independence by a trust but recognised for its importance to heritage and cultural meaning for residents by successive councils vis rates relief, insurance support and operational funding. This model must continue and , if anything, be increased. In the post quake debacle of mismanaged heritage losses the Arts Centre gave the residents hope. It continues to perform as a place of excellence and pride for the city. As such Council should not withdraw but should gladly continue its financial support.

3498 - Lucas Tomasi

The Arts centre needs funding. It feels ridiculous that it needs to be said. All summer everytime I have visited it has been flooded with tourists. It is one of the very few things left after the earthquakes it is very important for Christchurch's cultural heritage. Orana Park also needs funding. Three waters is taking an enormous amount of the budget. Any minor cuts to three waters can pump millions of dollars into the rest of the public infrastructure. I don't know what the tourists visiting the city are going to do without the arts centre. It will cost us so much more to lose the art centre. If we want to generate income from the large amounts of tourists coming in off the cruise ships they need something to do. Art and cultural centres like galleries and museums are vital.

>>>

The residents of the city will also benefit greatly from more public art and cultural events. The art centre needs to stay open it is a hub for these kinds of activities and with the museum currently closed for construction it needs to stay open.

>>>

The arts centre is clearly missing

35 - Graham Taylor

Funding is required for Arts Centre - failure to provide funding is a false economy, as the consequence would be likely dissolution of Arts Centre Trust Board and ultimately the Council becoming liable for the site and upkeep. This will ultimately cost the ratepayer more in the long run, as the Council will not receive other external grants and funding that the Arts Centre is able to attract. It is an important cultural and historic asset to Christchurch City.

>>>

Funding is required for Arts Centre - failure to provide funding is a false economy, as the consequence would be likely dissolution of Arts Centre Trust Board and ultimately the Council becoming liable for the site and upkeep. This will ultimately cost the ratepayer more in the long run, as the Council will not receive other external grants and funding that the Arts Centre is able to attract. It is an important cultural and historic asset to Christchurch City.

350 - Chris Hoopmann

Prioritise cultural heritage funding - museums, art centre, art gallery.

>>>

[Grants & Funding > Other Community Grants & Funding]

There must be continued funding for cultural heritage which draws many tourists and locals out to enjoy the city. In particular, funding for the Arts Centre and Museum must be maintained (or better yet - increased!). If these assets are not properly funded or managed now, the costs will only become greater in the future. One of the community outcomes states "Our diverse communities are supported to understand and protect their heritage, pursue their arts, cultural and sporting interests, and contribute to making our city a creative, cultural and events powerhouse.". Any reduction of funding for key heritage such as the Arts Centre or the Museum is not compatible with the stated outcome.

3504 - Nicola Holt

My concern is to keep the Arts Centre and the Great hall facility for future musicians and artists.

>>>

There is no point in having infrastructure when we have no art. I think the arts centre and the great hall need to be preserved for musicians and artists to have a beautiful and purpose built centre. There is so much history connected to that space and it has given so many people immense joy and memorable experiences. I think it should be connected and available to artists and performers always.

3505 - Rebecca Sims

I think the council should support the arts centre because it is an integral part of what gives our city life. The events and spaces within the arts centre bring soul to the city and Christchurch will simply not be the same without it.

3509 - Mitchell Salisbury

The Arts Centre is the only place that frequently provides accessible events by people with challenges for people with challenges and should be supported for this alone! But it doesn't stop there: All events are affordable, especially for children and in comparison to what we would have to pay in other places around town. Why would you not support this institution? Keep funding it!!

351 - Ashley Boot

The Arts Centre should be funded because it is a vital element of the arts sector in Christchurch, its a great hub for our small and local businesses, including the weekly markets which draw in locals and tourists alike. If the funding to the Arts Centre is cut this will likely mean that the Christchurch City

Council will most likely have to take over the running which will inevitably lead to higher rates and be less accessible for small business to work out of due to the rise in costs. Don't stop a good thing going, keep the funding and the vibrancy will remain.

3512 - Christine Haertel

No place other than The Arts Centre is where we can hang out during weekends and holidays without paying so much money for everything! So many free events, activities to do at any time, affordable paid workshops and performances. This has to be supported, keep funding it and support them more!!

3518 - Uwe Reschenberg

Whenever we look onto the website of the arts centre, there is something great to see. At any time there is at least a great exhibition, an amazing concert we can plan around, either for a day trip and a Lunchtime Concert or a great evening out or a movie we'd much rather see in a small, passionate cinema like Lumiere than a big commercial one. With everything on one property the space is so welcoming, the people working there make it a great experience every time. Keep supporting the arts centre financially!

3519 - Fiona Fenton

Disappointed that there is no funding for the Arts Centre in the draft LTP. I want the council to support the Arts Centre. The Arts Centre is an outstanding example of heritage restoration. It is the best in the city and brings in visitors - local, national and international. The Arts Centre is a fabulous multi use destination and is an important asset for Christchurch. It provides a centre for multi cultural and multi ethnicity programmes for education, arts, museums in addition to the the shops, cinema and restaurants . It is far more deserving of City Council funding than the restoration of the Anglican Cathedral. I greatly resent having a percentage of my rates payment going towards this. Please continue to fund the Arts Centre.

352 - Julia Nicholls

I would like the Christchurch City Council to support The Arts Centre financially because it is a significant part of Christchurch's cultural and heritage sector. The Arts Centre contributes to Christchurch communities and international tourists by providing multi-cultural events, education programmes and markets, to name a few. It also supports multiple small businesses who operate from their buildings. If the Council does not support The Arts Centre, this could result in insolvency, with the Council likely to take up the running costs, and subsequently an increased cost to ratepayers.

3523 - Kate Hedworth

No. Fund the Arts Centre.

>>>

I support funding for the Arts Centre

>>>

I support full funding for the Arts Centre.

3524 - Patrizia Fortmeier

The Arts Centre needs much more support from everyone, you cannot leave it out of your plan, people appreciate it so much. Save them!!

3532 - Jonas Reschenberg

The arts centre is the most welcoming space in town, because they actually believe in what they do. I know how much the people there work and they always come up with new ideas and more offers for anyone who wants to join. You cannot deny that the arts centre is a hotspot for the people, you have to help them keep going. Fund them!

3533 - Elisa Richnow

Art is a way of expression, creativity, being individual, it's people's livelihood, spreads joy, creativity, thinking. Makes events unique and memorable, connects people, allows artists to have a space to showcase their crafts, draws people in to the city. Art is so important and can have massive influence in people's lives. I have so many fond memories of the arts Center growing up. It would be awful to lose the arts Center.

3534 - Hanafi Machirus

Please keep funding the Arts Centre, it's a Taonga and we are so lucky to have it here, it would be a sad loss for our city.

3538 - Leonardo Cockburn

[Recreation, Sports & Events > Community Arts], [Grants & Funding > Orana Park Funding],
[Other/Special Interest Topics > Public Transport]

No, fund the arts, especially the Arts Centre, fund orana wildlife park, make bus fares cheaper again

Fund the arts centre!!!

3544 - Ginette Pethig

Considering there does not seem to be any funding allowed for the Arts Centre NO I don't think you have the balance right. I see you mention art gallery/museums - I would have thought the Arts Centre would have warranted your support.

>>>

I am answering No here because I believe the lack of funding for the Arts Centre means you are overlooking a very important part of what should be included in your operational spending as detailed above.

3545 - Sarah Eve Tunstall

I strongly believe a focus on supporting the local arts community in Christchurch, especially maintaining funding the heart of arts community that is the arts centre, is vital. A city without it's beating heart is not a place I would happily reside.

>>>

If the goal for Christchurch is to increase belonging, identity and a sense of community, why would the council be cutting funding for something as valuable as The Arts Centre.

3547 - Juliet Thomson

This is a priority for our city. Locals and visitors use it. Our children need it too. No to further cathedral funding. The Arts centre is up and running and a pleasure in my life and that of others.

[Fees & Charges > Carparking (Parks)]

Not if you don't fund the arts centre and charge for parking in the Botanic gardens Bs

355 - Lynda Clark

[Grants & Funding > Arts Centre Funding], [Recreation, Sports & Events > Community Arts], [Libraries > Libraries (Operations)]

Although I agree with fiscal responsibility, I think supporting and funding the arts is important, including the libraries and the Arts Centre.

>>>

There is no mention of support to the Arts Centre, which I presume would come under Heritage. In case this is not so, I'll repeat my comments on Section 8 under Anything Else. I want the Council to continue to support the Arts Centre, a very important heritage building. I've been a resident in Christchurch for over 40 years and I would not be able to count the number of times I have visited - for art exhibitions, art gallery, concerts, Buskers Festival, talks, movies, dining etc. It is also very important for tourists in our city, e.g. visiting the Ernest Rutherford exhibition. I have spent many happy times at the Dux de Lux and would love to see this restored to its former glory.

>>>

I want the Council to continue to support the Arts Centre, a very important heritage building. I've been a resident in Christchurch for over 40 years and I would not be able to count the number of times I have visited - for art exhibitions, art gallery, concerts, Buskers Festival, talks, movies, dining etc. It is also very important for tourists in our city, e.g. visiting the Ernest Rutherford exhibition. I have spent many happy times at the Dux de Lux and would love to see this restored to its former glory.

3550 - Sam Hewitt

There is no funding for the arts centre. That seems outrageous as the arts centre is an incredibly valuable asset for this city. The amount of money required to keep it running at the same level is almost insignificant, but the cultural impact to the city of its impaired services would be huge. Outside of the arts centre operational spending seems reasonable.

3554 - Tanmayee Boddu

I think the Arts Centre must be funded

3556 - William Tuckey

Please continue to support the Arts Centre as a key asset of the city.

356 - Charlotte Foate

Please continue to fund the Arts Centre in Christchurch!

>>>

Continued funding of the Arts Centre of Christchurch is a priority for residents and tourists alike!

3560 - Susannah Smith

The Arts Centre requires continued funding

>>>

Yes, but the Arts Centre must be included in funding.

3562 - AJ Russell

The arts Centre should be better supported as an iconic taonga of Otautahi Christchurch,

>>>

Please ensure the Arts Centre is well supported

3563 - Zani Polson

The Arts Centre is a historic location synonymous with Christchurch. It's one of a few public places that truly give a sense of old worldly charm to Chch following the earthquakes. The Arts Centre should be supported as an integral part of the fabric of our city. It would be a shame to lose this iconic location for the small amount of cost per household that is required.

3566 - Jacqui Emslie

Why would you cut funding to the arts centre? On page 15 of your LTP document you clearly state you wish Christchurch to be a cultural powerhouse, yet you would cut funding to one of the most culturally significant areas in Christchurch city centre. Why? It doesn't make sense. Rutherford's Den, splitting of the atom? Not just culturally significant to Christchurch, but also the world. We lost so many beautiful heritage buildings in the earthquakes that added value to Christchurch. Take away the arts centre and the city centre becomes very bland. You want people to spend money in the city centre. The arts centre facilitates this.- cinema, shops, exhibitions, eateries, history, diversity. So in short if you are intending to put my rates up by an amount that far exceeds what my wages will increase by, I will be incredibly pissed off if you stop funding to the arts centre.

3567 - Rachel Briggs

Please fund attractions such as the arts centre and Orana Park. They support our community, provide an attraction for our visitors and are unique to Christchurch. It would be devastating for our community to lose these and what they currently offer.

3573 - Joyce Yager

I strongly suggest funding for the Arts Centre

>>>

Please re-instate Arts Centre funding.

3580 - Becky Helliwell

I'm disappointed to not see any funding for the Arts Centre. It has gone through all of its restoration on budget and become a thriving bustling place at the heart of that part of the city. It offers so many varied opportunities for venues and cultural activities that there is something for everyone. To think it might struggle and decline without the council's support is very sad and very short sighted.

3588 - Olive Maxwell

I would like to see the Arts Centre included in the Long Term Plan because it's an awesome community place and it's really old so it has lots of history.

3589 - Roxanne Brassington

I think you need to keep funding the Art Centre. It provides a vital cultural resource. Lumiere Theatre in particular adds culture, diversity and is well-attended. It's a real little community, providing a friendly convivial atmosphere and brings people into the centre of town where they also eat and drink and spend money

359 - Lisa Davies

No - You need to reinvest in the Arts Centre and the Warehouse Tapere. These spaces are essential to invest in for our artists and our communities.

>>>

Please keep investing in the Arts Centre and Te Whare Tapere. These spaces are essential for bringing together artists of all disciplines and connecting with our community.

3590 - Dominic Maxwell

I would like to see inclusion of funding for the Arts Centre in the Long Term Plan. The Arts Centre is both a historic and contemporary jewel in Christchurch city. Many important community and personal events have occurred there over generations, it has the support of the people and needs the support of the council.

3593 - Jill Rothschild

And include funding for the Arts Centre

>>>

Include funding for the Arts Centre

>>>

Include funding for the Arts Centre, a key heritage site for the city and tourist attraction.

>>>

Include funding for the Arts Centre

3594 - Roanna Dalziel

Tēnā koutou Please do not cut funding for the Te Matatiki Toi Ora The Arts Centre (“Arts Centre”) as that would be devastating to Ōtautahi Christchurch, Aotearoa New Zealand, and a global reputation. The Arts Centre integrates with the Council’s vision of a place where anything is possible. Artists and practitioners are innovative and push boundaries. Their need to belong in a conducive and centralised environment is imperative. As I am neither an economist nor cultural advisor, it is difficult to quantify the huge risk to the local sector. But, as one immersed in the performing arts, I can see an enormous loss of a vibrant, historic, and invaluable key stone of the arts ecology. Personally speaking, I started my artistic career performing improvisational theatre at The Court Theatre in my late teens. It taught me to think on my feet and to be part of something bigger than myself. I entirely endorse current management with Philip Aldridge ONZM and Chris Archer, having worked with them, The Court Theatre and Toi Aotearoa Creative New Zealand, respectively. Thank you for your consideration of this submission. Ngā mihiXX

3595 - Nora Thornton

I would like to see the Art Centre supported as formerly. It has always been a living centre for all kinds of thriving art based programmes. I attended a year of lectures in the 50s when it was the University. Our family used a room for a weekend Art gallery for my sister's paintings when she had 1 month to live. I have attended regular Movies nights prior and subsequent to the Earthquake. I have attended functions in the Great Hall. It's careful restoration is making it a Christchurch Living Icon , replacing the Cathedral as a landmark . Christchurch would be soulless without it.

3596 - Susan Lau

I do not understand the omission of funding for the Arts Centre from this long-term plan, nor the lack of consultation and public forum for discussion of this with Christchurch residents and visitors. The Arts Centre has been an amazing cultural institution of this city over the course of my whole life. This is a really big change to spring on residents without discussion. If the council wants the Arts Centre Trust to become disestablished so that the council can take over the running of the Arts Centre, or if it wants to turn the Arts Centre over to private business interests, then it needs to be transparent and share this plan with the public. I don't know why the issue of funding the Arts Centre is not transparently included as a question in this long-term plan. I think there are several landmarks that are the cornerstone of Christchurch, and the Arts Centre is one of them. I feel incredibly lucky to have access to a place that provides such a diversity of arts experiences that are both free and at cost, that is such a welcoming place for everyone in the community. I've enjoyed the lunchtime great hall concerts, weekend market, antarctica evenings, storytime events, Rutherford's Den exhibition. Been meaning to get along to the free heritage stargazing. If the city council has plans to do better than the wonderful job that the Arts Centre Trust has already been doing (especially in the wake of building back after the earthquakes), then I would really like to hear it, and I think other residents would as well. I do not agree with the council silently taking this choice out of our hands. I would like to know why they are proposing not being able to fund \$1.8 million for the Arts Centre, and what would happen to the space, its function and what it offers to the public in the likely event that as a result the Arts Centre would no longer be able to be run by a charitable trust.

3598 - Kyle Sutherland

Increase funding to save the Arts Centre, it is a crucial part of our city's culture and is money well spent.

36 - Simon Broekman

It's better value than a stadium and you have a better tourist attraction

3600 - Murray Wiig

Expenditure disciplines in every organisation illustrate the sincerity the organisation has towards maintaining a balanced plan that supports it's main goals. By not supporting the Art centre in the

same manner as they have provided significant support to say cycleways I believe CCC are not being consistent. In the time I have had to prepare this I'm not sure if its capital or operating expenses the is providing the barrier. that is a role for the existing board of the trust. Assuming that its capital then I see no impediment in providing this and if its Operating expense. then the council has to ensure the Trust board has the right skills to review and provide a better performance. If they havnt, then there is a obvious path to making that correction. I urge the Council to continue to support the trust to preserve what is an outstanding facility and I believe asset for the community. In my mind it is far more important to do that rather than investing in additional cycleways. The Art Centre is vital asset for the community in the same way the Libraries, pool complexes, Parks are. I urge the council to review their decision and take what ever steps are necessary to preserve the Art Centre in the same and consistent manner as other community supporting assets as covered above are.

>>>

It appears now that some modicum of cost control is being placed on a small but significant section of the overall budget in an area that could if handled correctly generate reasonable revenue. Council is urged to reconsider the priority it has been placing on the Arts centre funding. Considering the expenditure that has been invested in the reconstruction of the centre since the earthquakes it seems unwise to the uninformed that this investment would now become part of a significant "sunk cost".

3602 - Lorraine Woodfield

[Other/Special Interest Topics>Cathedral]; [Strategic Direction>Have we got the balance right?]

Driving the city forward is maintaining the efficient restoration of the Arts Centre. Hagley Park and the Arts Centre are the HEART of Christchurch to me. They are the CENTRE of wellness, movement, bringing together, education, fun, laughter and creativity. The Anglican Cathedral is NOT the HEART of Christchurch, as it suggests authority and power by a few and silence which are the worst aspects of our city. Celebrate the restoration of the ARTS CENTRE FOREVER through its continued annual funding. DON'T WASTE the hours and expertise involved in the restoration, value it.

3604 - Caroline Burt

The removal of funding of The Arts Centre by the Christchurch City Council is shortsighted and does not take into the legal requirements in relation to The Arts Centre. If The Arts Centre does not receive funding from CCC there will be cost to be incurred by CCC due to the legal requirements. This cost will exceed the \$1.8million for many reasons including:

- higher wages required for the new staff
- CCC will not be able to apply for the funding that The Arts Centre currently receives

This increased cost will need to be passed onto the rate payers.

>>>

The removal of funding of The Arts Centre by the Christchurch City Council is shortsighted and does not take into the legal requirements in relation to The Arts Centre. If The Arts Centre does not receive funding from CCC and the Foundation closes, there will be cost to be incurred by CCC due to the legal requirements in relation to the legal status of the Arts Centre. In addition, the Council will need to take on the management of The Arts Centre. This cost will exceed the \$1.8million for many reasons including: - higher wages required for the new staff - CCC will not be able to apply for the funding that The Arts Centre currently receives This increased cost will need to be passed onto the rate payers.

3608 - Heather Gillam

I would like to see continued funding for the Arts Centre in Christchurch. This is a draw card for tourism and has always been a go to for Cantabrians. More effort should be put into organising events to take place outside in the courtyard during summer and in the Great Hall during the winter. Simple and reasonably priced food options/cafes should be available during and after these events, and also in the evening, when the public/tourists are visiting the Lumiere Theatre, Christ College functions, events in Hagley Park, and just walking around the district taking in magnificent sights! A free bus from the bus hub in Lichfield Street to the Arts centre may also encourage more people to visit as parking is a bit of a nightmare. Without funding, businesses may be forced to vacate, and an historical icon of Christchurch would be left without its soul. What an enormous waste that would be after all the money spent on restoration after the earthquake! Don't throw that money away by not funding now, after all, the funding is only a drop in the bucket when it comes to our overall rates!! I am a pensioner, but I would still like to see some of my rates go towards the Arts Centre.

3609 - Laura Caygill

I would like to see financial support continue for The Arts Centre. The Arts Centre is one of the best places to visit in our city, for residents and tourists, and I am often there on the weekends seeing how well used it is and overhearing comments from tourists who love it. I love living in a city with a vibrant arts and culture scene and I would hate to see this go. It's important that our rates contribute to sustaining the arts landscape in our city as well as things like roads. Please continue to support The Arts Centre.

361 - Rowena McNabb

The Arts Centre is part of our heritage , please support it by funding in LTP

3617 - Bronwen Bisley

I would like to see financial support for The Arts Centre restored. Living in Selwyn, events at The Arts Centre are one of the primary reasons my household visits the city - and such a joy to attend. We often visit local businesses before or after a concert. It's such an asset to the community.

362 - Christine Stiles-Pickard

We have been made aware after a truly amazing concert in The Arts Centre Great Hall, that Christchurch Council is cutting funding to this incredible heritage asset. My 93 year old father went to University there and when we took him recently to look around, he was in awe of the restoration and beauty of the highly skilled craftsmanship. It is such an incredibly precious collection of buildings that is a jewel for a number of reasons. It has very successful businesses that we often frequent as in The Cellar Door, Lumiere and The Observatory. It is a hub of many forms of art both visual and musical. The lunchtime concerts feature world class musicians that have made New Zealand their home. We are immensely privileged to hear them in such an intimate setting. There are many volunteers and patrons that donate their time and money to support this operation plus in Phillip Aldridge you have someone qualified in finance from his time as Chairman with BNZ and the arts from his great success with The Court Theatre. If the Council ends up with having to take over the running of The Arts Centre, you will lose that specialist knowledge plus the public donations already mentioned. It will come as no surprise to you that people will not donate money to Christchurch City Council even though you have an extremely onerous job. You definitely do not need to take on more responsibility and especially in an area that is not your field of expertise.

3620 - Rosemary Turnbull

For example, the Arts Centre must have at LEAST the same basic council funding as last year

>>>

not enough assistance for the Arts--Arts Centre and Court Theatre in particular

>>>

Cultural aspects of our city are being under-funded. They are the parts of the City that are available to all and often at no or low cost. They cater for all ages, races, and the physical and mental well-being of all.

>>>

Arts Centre need to be prioritised for the mental well-being of the City!!

3625 - Angela Brett

[Spending>Our Proposed Spending]

Although I will still quibble about specifically what is funded. I'm in the - I'm guessing - large group of people writing in to say we'd like the arts centre to remain on the funding list!

>>>

I would strongly like to state my preference that the CCC commit to funding the Arts Centre again. I realise that it might feel like a 'mall' or other commercial space that wouldn't normally be considered for CCC, but it is the space itself - the buildings and the rebuild, its history - that makes it different. The connected 'loop' of the Canterbury museum, the Arts Centre, the Art Gallery, and down into the square for the Cathedral and Turanga feel like the axis that defines Christchurch for me - it's where I take visiting family and friends and my children whenever we return to the city after being away. We have recently begun using the Altiora hall for a community group that I belong to, and it has been such a joy to be able to dance in the historic space. It would be such a shame for this space to become unavailable to the public or to be consigned to having to meet some kind of financial targets to remain afloat.

>>>

I'll mention here again that I think the heritage buildings in the arts centre should be publicly funded through the CCC. They are a publicly used space and an important part of our city's character.

3626 - Connie Christensen

The Art Centre needs funding. We cannot have spent 100s of millions on repairing this amazing historic complex, and then not ensure funding to make it come alive again!

>>>

Art Centre needs to be funded to ensure all the investment already put into this heritage complex is not wasted and existing tenants can stay.

363 - Nathan Carroll

I think the arts centre funding should be included in the LTP

>>>

I think the arts centre should be included in the long term plan and to continue to be funded by the council. The arts centre has been repaired to a high level and now is open to the public. I work at the arts centre as a painter. I am a rate payer. I have been going to the arts centre since I was a child and now I take my family to the arts centre for many events now free and paid.

3630 - Julian Glyn

The following comment relates specifically to the intended cut in funding for the Arts Centre. Noted that current funding is ~\$1.8m per annum. For context, the proposed 10-year operational budget for art/museums is \$144m and for Parks, Heritage & Coastal \$725m. The Arts Centre features under both categories. The activities in the Arts Centre are many and varied but are not key in themselves. What are key issues are that (a) the whole site consists mainly of heritage buildings and (b) it is home to Rutherford's Den. Do we see these buildings being demolished or repurposed? Unlikely. How then to preserve them? I submit that the current arrangement where Council funds part of the cost while the Trust works flat out fundraising the rest represents about the best situation Council could hope for. Were the Trust to be dissolved and the Council take on the assets, Council would really feel the full load. Interesting times await the councillor who then first proposes to dissolve the whole thing ...

3631 - Charlotte Sparrow

The Arts Centre is critical to the city and funding should be reinstated.

3632 - Judith Bell

I would like to see supported: The Arts Centre continuing as they are Local Festivals and events supported Building of bike lanes continued

3639 - Stephen Burgham

No, the lack of funding for the Arts Centre is a glaring omission,

364 - Kenia Zuniga

Please Fund the Arts Centre

3642 - Olivia Wilson

The heritage of the arts Centre is hugely important to cantabrians and I'm very sad to see no funding allocated to that.

>>>

Yes, I'm really angry about the lack of funding for the arts Centre. This is a major attraction and hub for so many and its restoration and maintenance is fundamental to the life of our city. Please rethink cutting its funding.

3643 - Chris Morgan

I would like the Christchurch City Council to continue their financial support of The Arts Centre. The Arts Centre is a space that I have engaged with throughout my life in Christchurch, from school outings at the Court Theatre, socialising at the Dux-de-Lux, movies at Lumiere and most recently at the Katakata comedy club. It is without fail a precinct I recommend to any friends visiting Christchurch, with shopping, eating, drinking and arts to suit all tastes. The stunning restoration highlights what was almost lost to the earthquakes, so am more than happy to have a portion of my rates used to continue its ongoing existence.

3646 - Thomas Blakie

That the Arts Centre should get the funding that they have asked for in response to getting nothing in the LTP. It is crazy that the funding wasn't in the proposed plan. This is essential.

3647 - Helen Rockel

While the Arts Centre means a lot to me personally, I'm also aware that it means a lot to others, too, and is an important asset for the city. Over the years, I have studied there, held exhibitions of my artwork, attended many concerts, talks and performances, enjoyed films at the Academy and now at the Lumière, joined friends on many occasions for coffee, enjoyed the markets, been inspired by world class art of the ancient world - in fact it has fed my spirit in many ways. It has always been evident that it draws others in a similar way. Visitors who accompany me to the Arts Centre often remark on our luck in having such a place - I can't imagine Christchurch without it as it plays an essential role for locals and visitors alike. I believe it should be seen for what it is - an essential contributor to appeal of our city - and funded accordingly.

365 - Wendy Burton

The finest example post quake of our heritage in the heart of the city. So much work has been put into it, what a waste to just let it go. Its loved by people who live here and tourists. It's incomprehensible the council would consider to pull out financial support.
GET A CREATIVE SOLUTION !!!!!!!!!!!!!!! KEEP OUR BEAUTIFUL ARTS CENTRE OPEN!!!!!!

3659 - Alex van den Broek

Please continue funding the Arts Centre, its a vital part of our city and is more than a collection of buildings.

366 - Namalee Kodikara

It's not clear what the 870m [Coder note: Capital Programme budget] breaks down into - at the very least it should include some portion relating to the arts centre.

>>>

Some of this budget [Coder note: Parks & Heritage capital budget] should be reallocated to the arts centre.

>>>

I think that some of the cultural spending should be reallocated to the arts centre.

3660 - Alice Shanks

Please fund the Arts Centre to stay open and alive. It is the centre of the visitor experience to Christchurch - The Botanic Gardens, Museum, Art Gallery, The Square, the Otakaro/Avon eels, tram, with the beautiful Arts Centre in the middle. After the earthquakes we have so little heritage to enjoy.

3661 - Steph Walker

[Recreation, Sports & Events > Community Arts], [Grants & Funding > Strengthening Communities Fund], [Grants & Funding > Other Contestable Funds]

I don't believe this current operational spending proposal is a balanced reflection of the Council's community outcomes and strategic priorities. As someone working in the arts, culture and creativity space with a particular interest in festivals and locally-based organisations and companies, I am not confident that Ōtautahi can be a "cultural powerhouse" without further investment that enables local artists and organisations to thrive.

I am incredibly thankful that Council has not proposed cuts to funding which supports our sector, and funding for libraries and galleries which also play a big part in supporting creativity in the city.

What concerns me though, is the increase of new festivals and organisations in the city that, having been seeded by Council funding, or been receiving funding prior, will then stretch the "strengthening communities fund" and the "events and festival sponsorship fund" to the point where rather than funding for success, Council is funding for... for a meagre existence, I guess. These funds have, I believe, got modest increases but the sector could really do with further funding, and at a greater amount.

The Arts, Culture and Creativity sector is a lot like sports. We have grassroots organisations, we have organisations recognised and succeeding at a regional level, and we have organisations that tour/play nationally and are at the top of their game, so to speak. Christchurch loses a lot of talent once they get past grassroots. They leave because they cannot see how they can make work here consistently, and how to grow. I should know - I've left Christchurch twice, at pivotal points in my career. I came back to give back to my hometown, but a lot of people won't. If that happens, then festivals and organisations that remain face steeper bills to bring talent to Christchurch, steeper learning curves when it comes to running these sorts of places and spaces, and have to work harder to keep people here.

It's an ecosystem where Council plays a big part - and not just with funding, but with having ways for cheap access to venues, to ensure the organisations you do fund have to foster local talent and to partner and assist other organisations in the city. Council can be quite creative with the resourcing you can offer!

This is where I get to The Arts Centre. When I think about the Arts Centre I think about the buildings, and who "lives" in them, and then I think of the activities, or programming, that happens there. I think that the Arts Centre does

amazing programming, bringing in artists and companies to bring spaces to life. What is lacking, though, is affordable space for those artists and companies to actually be in residence year-round. When I go to the Arts Centre right now, I see commercial tenants (health tech, a hotel, a University...) but I do not see arts companies "living" in the arts centre and getting to choose what they put on. At the moment, the way to be able to make work there affordably is to be programmed by them or partner with them. It is fully curated. My experience of working at resident companies in Arts Centres in Australia is of quite a different model. Nonetheless, I certainly want the Arts Centre to be "saved", but perhaps whatever this looks like could take into account what is needed to help this city become a Cultural Powerhouse.

3668 - Gavin Hardie

Support Arts Centre

>>>

Our heritage is important so pay for ARTS Centre

367 - Gwen Macready

I would like the Council to save the Arts Centre. I have seen first hand over 30 years the importance of the Arts Centre to the arts community from students through to award winning artists and practitioners. As someone who worked there, I have seen how the arts and this special place has touched the lives of people young and old. It is a place that people love, have great memories of and there is nowhere else in NZ like it. It HAS to be a priority to the city.

3674 - Andrew Driver

People have lost enough without losing the arts center

3676 - Ash Mcneur

Keep the funding for the Arts center- it's a hub for the community, along with being an important heritage site.

3679 - Janet Perry

Am very disappointed to see no funding for The Arts Centre a very important heritage arts and culture centre and would prefer to see funding allocated here.

368 - Marshall Macready

To fund the arts centre my whole childhood revolves around the arts centre and it is still as important to me to day it is a crucial part in what Christchurch is as a city and was fundamental on getting moral back during the rebuild it would be very sad to see it go and would leave Christchurch with a big piece missing

3680 - Bridgit Anderson

It makes no sense to me to not continue to provide funding for The Arts Centre. It's a vital, vibrant, accessible historic group of buildings in the center of our City, widely used by the people of Christchurch and a massive tourist attraction. I don't think you can put a price tag on its value, cultural and historical value. Having lost so many other buildings of historical and cultural heritage to the recent earthquakes, it seems madness to me to put its survival in jeopardy through cancelling ongoing funding support from the council. There is nothing else like it in Christchurch that is up and running. Particularly at a time when The Cathedral Reinstatement project hangs in the balance and with the Museum closed for refurbishment until 2027.

3682 - Paolo Rotondo

Please do not stop funding the Arts Centre. In the past the Centre received \$1.8 million annually, but this year they have been allocated zero funding. However, reducing other service, is not an intelligent option because it reduces the tangible civic benefits for Christchurch's citizens. In a recession, it is even more important that arts infrastructure and initiatives are maintained and promoted.

>>>

As we now know maintaining the arts centre and cultural practice will contribute to the economic and lifestyle value of the city. All western nations now recognise the value of arts in communities, both in economic terms and to create the culture of a city. Christchurch has in the Arts Centre a unique space that perfectly adds value for its citizens.

>>>

Please fund the Arts Centre. It will be much more expensive to lose it and have to build it up again in the future. It is an archaic mentality to think that the 'Arts' are a 'nice to have'. The Arts are the medium by which a place establishes its identity and expresses its voice. Christchurch need to maintain a voice.

>>>

Please do not remove funding from the Arts Centre. It is an icon of Christchurch and contributes to the city economically and culturally through tourism, arts, identity and civic pride.

3686 - Suzanne Peddie

In general. Plans to cut Arts Centre funding would be a great blow to the Arts in Chch and a significant loss to the City. The Council needs to support the Arts Centre as it makes a valuable contribution to the arts, including providing venues for performance of music and drama, showing of interesting films, and display of art works.

>>>

The varied activities the Arts Centre supports enrich our lives as residents of this city and are attractive

>>>

[Spending > Te Kaha]

...except Te Kaha ...and should not jeopardise the survival of the Arts Centre, which is a great asset to the city

3689 - Catherine McClean

I wish CCC to provide funding for the Arts Centre of Christchurch in its Long Term Plan My reasons are: Value for money from Council perspective. The amount of continued funding sought (of 1.8M per year) is modest in size and a small fraction of the CCC operating budget, yet is absolutely vital for the Arts Centre. The Arts Centre provides a civic role in its provision of performance and creative space for the Arts in Christchurch which CCC could not hope to emulate, and certainly not for the sum sought. It is much better for the CCC to support a group providing an excellent service to the city rather than trying to do these same things itself. The Arts Centre is a success story with its independent board solely focused on fulfilling its function as defined in its Deed of Trust and subsequent Act of Parliament. This independence and expertise has been crucial to The Arts Centre's continued existence and is a fundamentally important aspect of its foundation in 1978 endorsed by Parliament in 2015. As an example the earthquake insurance that the Arts Centre board had in place prior to the Canterbury Earthquakes ensured that these significant heritage buildings, (in a prime location in the centre of Christchurch) survived to be rebuilt, whilst many (even those under the Council's protection) did not. It makes good strategic sense to have such entities continue separately to Council assets held by the CCC. The Arts Centre is a collection of heritage buildings highly prized by the citizens of Christchurch and of unrivalled importance to our city's tourism appeal. It would be very short sighted for the Council to remove the modest contribution to the Arts Centre's funding that has been granted previously and is sought to be continued. Described as a cultural asset of local, national, and international heritage significance situated in the heart of Christchurch, the Arts Centre's is more than just the stone buildings. Of all the claims upon the Council for support in its Long Term Plan, the Arts Centre should not need to labour the point of its strategic importance to the city. Nor should the Art's

Centre be penalised for its success in raising the bulk of its own funding. Council should be glad and relieved that it is not requiring more from them. For obvious reasons post-Earthquake Christchurch must do all that is necessary to ensure the continued survival of this heritage treasure.

369 - Alice McLean

I deeply want Council to reconsider their financial support of The Arts Centre. As a Christchurch resident, the art centre to me is 'the centre of chch city'. No where else do I think has such a balance of beautiful, cohesive, commercial, social and inspiration as what the facilities offer at the arts centre. I have very fond memories as a child of theatre shows at the court theatre and hot chocolates at le cafe. Now my new memories that I can create with my children are the beautiful outdoor movies, operas and the most recent off centre festival which was an incredible showcase of creative expression. Not to mention the escape of a wine in the courtyard and a film in the evening. The Arts Centre means so much to me and for the future of my children to have a central hub where they can go to experience Chistchurch's heritage, a diverse range of arts that fall to the fringes and all at a financially assessable rate. It is one of the few structures post quake in this city that make me proud to belong to this city and is integral for future generations if we want to preserve a thriving arts culture in this city.

>>>

Please see my earlier comments about funding for the arts centre. You will inevitably end up with a larger bill and a dysfunctional centre. Let the volunteers and committed trust do the leg work for an asset that will inevitably end up under your responsibility !

3693 - Lynette Wills

Christchurch's Heritage Buildings are ICONIC and at the heart of ChCh City History. CCC MUST ensure the ChCh Arts Centre, the ChCh Cathedral, the Provincial Chamber Buildings in Durham Street are supported and restored back so tourists and citizens can return to using and enjoying these beautiful world-heritage buildings.

3695 - Pamela Pye

Heritage - Arts Centre/Museum precinct is by far the city's most important heritage asset and Council support for it must be maintained/increased.

[Grants & Funding > Other Community Grants & Funding]

Grant funding priorities - current amounts must be maintained to support Arts Centre Trust, pest free Banks Peninsula and Rod Donald Trust

3696 - Jim Porteous

The Arts Centre is iconic, keep funding it

37 - Pamela Niskanen

Please continue funding the Arts Centre at equal to or above last year's rates. I don't give a toss about the arena or the downtown sports complex, but we desperately need funded arts spaces, and the last two buildings at the centre should be finished and Dux supported to move back in.

3702 - Lisa Sinke

Why I'm submitting is I believe strongly in us having a vibrant functioning and open Arts Centre. These buildings were given in trust to the people of Canterbury to be enjoyed and used by all. Therefore it must be helped to continue. This is a world class precinct, and it is diabolical to think of it being closed up. We are a young country, with not much architectural cultural history therefore it is even more important. I do not think any other country would be so shortsighted about such a great asset. Please help ensure the viability and longevity of the Arts Centre. If it is being mismanaged then step in to help out.

3703 - Greg Hay

You need to give more serious consideration to the investment in heritage buildings. The Arts Centre - I support continued funding of this centre, given its historical, cultural and arts importance to the city.

3707 - Susan Gillespie

I can see no mention of funding for Christchurch's beloved Arts Centre. I have loved and appreciated the Arts Centre since the 1970s and have attended performances at the theatres, cinemas, the Great Hall, open air jazz and pop concerts, choirs, ballet, modern dance, and cultural events, lectures, to name a few events. I have also enjoyed the cafes, restaurants and bars at the Arts Centre over the years. I strongly believe that supporting the local arts scene is crucially important to the health and well-being of our the people of our city's present and future. Please, please recognise the value of and generously fund our beautiful Christchurch Arts Centre.

3708 - Joan Simpson

I do however expect the council to continue its support for the Arts centre. You cannot pull \$180 m per year without due notice and within a period of time for the centre to find additional funds. The buildings are doing their best to earn an income and they have worked excellent projects to return the buildings for the centre. It is a fabulous resource for the city.

3709 - Charlotte Hopkinson

Please reconsider funding for the Arts Centre. The arts are so important and this space has so much history and value. As someone who grew up in Christchurch and lost so many places of my childhood to the earthquakes I would be heartbroken to see another place gone. I also used to work in the tourism space and this area is such a special place to showcase Otautahi. Please, please ensure this taonga is protected.

371 - Justine Aldous

I am concerned about lack of funds reserved for the arts centre. The trust has been doing some great work, especially with the earthquake challenges, and the centre is starting to look much more like its former self, attracting large numbers of visitors. As one of the largest collection of heritage buildings in New Zealand, ChCh residents need to be supporting the arts centre in its current form. I would much prefer to see the current leadership remain, than have it taken over by the council or other parties with as-yet-unknown ability to garner funding and support. As someone who was born and bred in ChCh, the destruction of the city has been very upsetting to me, and the lack of support for restoring the heritage buildings is something we will grow to regret (many already are - old girls high etc). Please show some foresight in this matter.

3710 - Kit French

The Arts Centre needs funding

>>>

Fund the art centre

>>>

Fund the arts and the arts centre

3711 - Hamish Keown

Please support the Arts Centre in its bid for funding. Its legacy to the city and into the future needs to be funded. Over time, it could be considered a sustainable operation with CCC as a major shareholder. I urge CCC to consider what can be done to include funding as part of the LTP.

372 - Kyle Bluck

I just have some concern for how the arts always dies when money is tight, but without the arts, economic problems snowball because the city loses its soul, no one wants to visit, culture and community dies, social issues increase, etc. I also have concern over the lack of funding for the Arts Centre - it is such a drawcard to the city, and their funding is now uncertain.

>>>

I also have concern over the lack of funding for the Arts Centre - it is such a drawcard to the city, and their funding is now uncertain.

3720 - Eddie Newman

I would like to see the grant for the Arts Centre reinstated. I am highly concerned an important part of the vibrance of the city could be jepordised by the Council not continuing the funding of this extremely important heritage site.

3727 - Carl Fox

[Grants & Funding > Orana Park Funding]

Two examples of diverting expenditure from poor expenditure to investment would be to ensure the future of the Christchurch Arts Centre and Orana Park. These are two attractions that can and do attract tourists and also provide a community benefit to local residents.

373 - Charlene Herring

Why isn't the Arts Centre in the list of Heritage items? The Arts Centre is crucial to maintaining the heritage of the city and needs support funding from the Council to continue to be a thriving community. The Arts Centre Trust will not continue with financial support from the Council and city rate payers. To not do this is completely short-sighted.

>>>

My major points would be -- the Council should continue support for the Arts Centre

3730 - Ian Mason

This submission is in support of continued funding for the Arts Centre. This is a key part of our cultural heritage and it is important that it remains available for residents and visitors alike. In these challenging times the Arts are equally as important as engineering solutions.

>>>

Keep funding the Arts Centre

3734 - Catherine MCKellar

I am writing in support of maintaining funding to the Arts Centre. Not only a valuable tourist destination, but a beautiful piece of Christchurch history. It would be so sad to see this place closed down, esp after the millions of dollars spent on restoring it. The Arts Center is definitely a worthy place for some of our rates to go.

3739 - Trish Rainey (Concerts for Christchurch Foundation Trust)

The Arts Centre is a gift and should be retained, maintained and nurtured for the future generations. We do not have much history as a young country. These buildings are our slice of history. Currently they are cared for and curated by knowledgeable individuals that understand what is required. Surely it makes sense and cents to provide support to this essential facility which gives the entire city such a wonderful profile and encourages activity in the central city every day of the week

>>>

We are all proud of the Arts Centre, the rebuild, the activities that take place. It is wonderful to observe and experience the visitors experience as they wander the quad, have coffees, get that wow moment when they enter the Great Hall. There needs to be recognition of this in the Councils Long Term Plan 2024-2034.

>>>

There needs to be an allocated amount for the Arts Centre which is truly a 'jewel' in our city and is enjoyed and shared by so many in our local community and attracts people from around the country and International visitors.

>>>

The balance needs to cover the arts and creativity in our city, Christchurch, which is nationally and internationally recognised as a cultural hub. The Arts Centre represents our history and future and people are amazed at the accessibility of the centre, all the offerings there, the non elitist nature of the buildings the activities and all that is encompassed in the Arts Centre zone since rebuild and reconstruction post quake.

374 - Jill Winfield

Please keep funding the Arts Centre. As much as communities need roads and infrastructure (particularly cycling infrastructure) they need spaces for culture and the arts to connect with each other, to speak and to be heard and to support the unique lifeblood of a city. The Arts Centre is a valuable hub right in the city centre connecting Christchurch's past with it's future.

3740 - Nicky Sharples

[Libraries > Operations], [Transport > Cycleways (Capital)]

Facilities in Christchurch eg libraries, Art Centre, cycle ways are important for the overall wellbeing of the city and it's population

3743 - Ben Ellis

Fund the art center please?

>>>

I would really like to see the remainder of the Arts Centre completed, to make the unit complete. It has an amazing potential as a space and a huge heritage component in the central city.

3750 - Kathrin Affeld

Public funding for the Arts Centre needs to continue. It's one of the most iconic places in the city, it brings the community and visitors together, celebrates the arts and is a place full of memories. Having lost it for years following the earthquakes has been hard and losing it again would break my heart and I'm sure that of many others. The Arts Centre is a vital part of the cultural heart and soul of this city and enriches our daily lives. We need it to be supported.

3751 - Tom Rainey

Please budget for ongoing support of the Arts Centre to ensure tis future is secure.

>>>

Of course all these things are essential, however as part of ongoing life, people need access to recreational activities, and the arts fills a huge gap in providing for that. The Arts Centre provides for that in Christchurch, and must be supported to continue, rather than being set up to fail.

>>>

Mostly, but there is a glaring, and most important omission for funding - a commitment to ongoing funding for the Arts Centre. Every indication suggest if this funding is not put in place by the council, the Arts Centre trust will fail, and the ongoing future of the organisation will be put into question. This is simply unacceptable for such an important asset for the city. An essential focus for Arts, but also many other activities and groups that serve the public of Christchurch so well. The trust is NOT seeking a huge contribution in anyone's terms. The council simply must find ongoing budget so support the small shortfall being sought, by an organisation that is already balancing commercial realities with the open provision of access at reasonable cost to arts practitioners and groups. Comparing the funds and support the council provides for sports in the city, arts and arts activity is a very poor cousin. I urge to consider the wide demographic of the rate payers of Christchurch, and consider how the small contribution required to support the Arts Centre support the needs and preferences of so many Christchurch citizens.

3756 - Christina Hamilton

Not quite; as a consequence of the Christchurch Earthquakes, we lost many heritage buildings, so it's vitally important that the Council continues to support The Art Centre that makes most use of these buildings. If they're not used, they'll deteriorate. They're actually a tourist attraction too which brings in much needed revenue. One particular attraction that regularly brings me, my Christchurch friends, and visitors into the Centre is the Lumiere Theatre. I ask the Council to reconsider keeping its annual funding.

3757 - Sonia Kennedy

I was disappointed to see that the Arts Centre was allocated no funding. As a central part of our city's heritage, this seems short-sighted, as a lack of investment in heritage buildings can see degradation over time that is more costly to repair than to maintain. While I acknowledge that other projects require priority spending (and at a time when costs have been rising), I'd like to see a balance where the Arts Centre receives some funding from the council while it works to boost its income from other sources too.

Heritage - I'd like to see some level of support for the Arts Centre.

3761 - Fiona Henderson

It is also disappointing to see loss of funding for Pet Free Banks Peninsula, Arts Centre and Orana Park.

>>>

Please return funding for the Arts Centre, Pest Free Banks Peninsula and Orana Park. In particular the arts centre and Orana Park are icons in Chch and their loss would be such a shame.

3762 - Nina Koele

Council to support The Arts Centre please. Vital part of the city, much more important than attracting events, this is an ongoing feature of the city!

3766 - Christina Hartung

Almost, please keep the Arts Centre, it is iconic, and we spend a lot of happy times there.

>>>

Please support the Art Centre - it's an icon of Christchurch

3772 - Sue McFarlane

Continued funding for the Arts Centre - I would like to see continuing support for the Arts Centre, as the living heart of our city, far more so than Cathedral Square. I was horrified to see that support has been withdrawn from this city landmark. The buildings and their history are very special to our city and the restoration of the buildings a captivating story in itself. It is a great place to visit for locals and out of town visitors alike, from the cinema and events in the Great Hall to the top restaurants onsite and the commercial offerings. Rutherford's Den is a hidden treasure, with a well presented story, that should be further promoted to locals and visitors. I do appreciate this money would need to come from somewhere else.

3773 - Elizabeth Benson

It was unclear if the Art's Centre had been allocated any funding. As one of the best examples of heritage buildings in Chch and the opportunity for it to become a must-see attraction as it once was it needs to be funded.

>>>

As I noted the Arts Centre should be funded if it hasn't been allocated funding.

3774 - Cameron Ralston

I want the council to support the Arts Centre. The arts centre is a place of importance to me in the city in the way it supports the growth of art communities and creates a more interesting place to live. I have attended many events at the arts centre which have changed my life for the better. I believe the council should be doing everything in its power to create spaces for communities to come together through art just as it does so keenly with sport. Keeping the arts centre spaces affordable and accessible would be incredibly valuable to retaining the city's energy and charisma.

3776 - Jacqui Morriss

Please preserve funding for the Arts Centre. It is unique in NZ and very special to Chch. It would be so sad to see it mothballed after the gargantuan restoration effort and cost.

3777 - anne abadie

The art centres and museums are as important as the libraries and should receive the same amount

3778 - Tricia Urch

The Christchurch Art Centre needs continuing financial support from the CCC to continue its operations. It is a vital part of the Christchurch experience for foreign and New Zealand residents. It is part of the iconic older buildings which counter balance the new rebuilds of the earthquake stricken city. We visit the Art Centre -probably monthly, for the cafe, art displays and the Lumiere Cinema. Nothing could replace the excitement of the Lumiere venue and style of films. A great place to meet friends. I have fond memories of my university days on the Art Centre site.

3783 - Arthur McGregor

I would like the council to continue funding the Arts Centre. In my opinion, it is a crucial part of the fabric of Christchurch! I remember visiting as a child, and now love to visit with my son. We often pop in for a look around the shops or to grab a bite to eat. My wife and I went to the Cellar Door for our anniversary dinner the other week, as one of our first dates was at Annie's Wine Bar! We've also enjoyed a range of music, craft and cultural events there pre- and post-earthquake. Reading through the Arts Centre website about the alternatives they've explored makes it pretty clear that Council funding is vital, and that stopping funding would be a worse outcome financially for the Council. Not only that, but the number of tourists who hop off the tram absolutely delighted by the restored buildings makes it one of the highlights for any visitor! It would be very short-sighted to stop funding the Arts Centre, and I'd happily pay a little bit more on my rates to continue funding this amazing centre.

3787 - Deb Donnell

[Spending > Our Proposed Spending], [Grants & Funding > Orana Park Funding], [Parks > Heritage (Capital)], [Borrowing & Debt Management]

Householders are under pressure and facing significant financial challenges. Consequently they are

cutting back spending as much as possible to the bare basics, in order to survive. The Council should be doing the same - so that any proposed spending covers maintaining the core infrastructure, insuring key assets (including grants to assist the city's heritage and other assets, such as The Arts Centre, Orana Park, etc.), and debt servicing and reduction. Nothing more.

>>>

Heritage - Reinstate the grants for key heritage assets, such as The Arts Centre

3788 - Robin Laing

I would propose that the Council maintains its support of the Arts Centre. Its unthinkable that it would not continue to do so when the Centre is such an asset to the city, the community and the tourism business. As an out of town resident and frequent visitor I shop, dine, go to the movies there - and in earlier times, to entertainments in the great hall. The Arts Centre is at the heart of what makes Christchurch such a unique city to visit (and I'm sure to live in). Please find way to continue Council support.

3789 - Samantha Astin-Brown

Continue to support the Arts Centre

3793 - Mark Gerrard (Historic Places Canterbury)

The Arts Centre: HPC requests the Council fund the Arts Centre in the LTP for \$1.8 million annually. Specially including the following: \$1.2 million Insurance. HPC requests the CCC to absorb the Arts insurance into the Council's own group insurance scheme. \$205,000 Rate Rebate HPC requests the CCC provide an annual rates rebate for the Arts Centre. \$400,000 Heritage operational and maintenance costs. HPC requests the Council annually fund \$400,000 of the Arts Centre Heritage operational and maintenance costs. This total amount per resident amounts to a quarterly sum of just \$1.00.

Our reasons for the Council to fund the Arts Centre are the following: The Council has funded the Arts Centre for a number of years without public concerns along with other cultural institutions. HPC asks why is the Arts Centre being singled out by the Council for the withdrawal of its support? If the Arts Centre were to become insolvent, whilst the process is complicated, the CCC will likely end up owning it and having to cover all the costs. Unlike the Arts Centre Trust, the Council will not be able to apply for grants and HPC doubts it will be as successful in securing sponsorship, donations and volunteer hours. The Arts Centre is an internationally significant collection of Heritage Buildings attracting a million visitors year round. (Consisting of locals and national and international tourists.) Such extensive complexes are not commercially self-sustaining. The Council does not expect its venues to break even so why is the Arts Centre, a prestigious community asset, being held to a different standard?

>>>

[Planning & Strategic Transport, Urban Design, & Urban Regeneration > Heritage (Strategic)]

If the Arts Centre were to become insolvent due to the Council choosing not to fund it, HPC is of the opinion that the Council is in breach of its Heritage Strategy. "Our Heritage, Our Taonga" Heritage Strategy 2019–2029 adopted by the Council and was widely consulted and supported by Christchurch Residents.

The Council appears to have the expectation the Arts Centre should be run solely as a property company. According to media reports The Arts Centre Trust has been successful in its commercial tenanting.

HPC notes the Arts Centre is legally required to focus on the arts, culture, education, and creativity. The (Arts Centre) Act forbids selling off part or all of the land so securing a loan against assets is problematic and it is doubtful the Trust could service a commercial loan.

Administration: We understand the Arts Centre senior managers pay scale is lower than their Council equivalents at the Art Gallery and 4 of the staff positions are funded by grants. If the Council had concerns why didn't it work with the Arts Centre Trust and Management Team to address its concerns? The Arts Centre has outstanding Heritage Buildings and is a Christchurch cultural powerhouse that generates 1 million visitors a year with a number of commercial tenants and home to 70 entities. It runs education programs as hosts galleries, opera, jazz, Matariki children's theatre to name but a few. Why would the Council risk such a successful enterprise? The only Council enterprise, HPC considers the equal of the Arts Centre are the Cities Libraries, another cultural powerhouse.

[Full Attachment Available]

3798 - M-Webb User

The Arts Centre is great hub we need to support too

38 - Bruce Herman

I am writing to encourage the Christchurch City Council's continued support of a true treasure, The Arts Centre. My wife and I are residents of the USA but have travelled to NZ several times since she completed some of her medical training there in the 1980's. We have many friends in Christchurch and most recently visited December 2023, touring The Arts Centre with Katie Martin. What an incredible place! We are so impressed with the restoration and the active use of the Centre for so many arts offerings. Christchurch is such an outstanding community with wonderfully varied arts experiences. The arts are clearly a draw for both regional and international visitors. I am bringing a performing musical group of 30 from the USA in October who couldn't be more excited to experience the arts in Christchurch and perform in the Great Hall and other venues. Please renew and continue your wise support of The Arts Centre and the arts in general in Christchurch. Thank you.

380 - Pene Walter

Please continue to fund and support the wonderful concerts and other arts featured here in this amazing venue for all including visitors to enjoy for years to come.

3800 - Rachel Barker

I am very supportive of the arts, and wish to emphasise that the Christchurch Arts Centre is like a home away from home i.e. I have grown up spending many happy hours at the Arts Centre events, festivals, galleries, shops, shows and have taken all my visitors to see this special place.

>>>

In summary, I support operational priorities of: >>> Arts, especially Arts Centre

3802 - Matthew Baird

Arts Centre: The Arts Centre funding should be reinstated in full - it provides a lot of value for the community.

3803 - Polly Ackroyd

Please please please continue funding the arts centre. It's a fundamental and beloved part of city. I have such fond memories of visiting there as a child, and now I go there with my own child. It's been such a an important part of city for such a long time - give it the support it deserves.

3809 - Johnathon Ridden

[Spending > Te Kaha]

Te Kaha stadium is a terrible investment that I am opposed to on several levels and amount of money gone into this is too much. An example of why this is a bad decision is the council suggestion to cut the funding for the Arts Centre, a vibrant and important anchor for Ōtautahi's culture identity. If the council takes the funding, the Arts Centre Trust will fold and CCC will take over operations. This will not be done efficiently and cost ratepayers even more year on year than the current setup. It is run as a tight ship and as it's rebuild continues the Trust is taking it from strength to strength. The Arts Centre will be more regularly accessed than Te Kaha and will grow with support from NZs second largest industry, tourism.

381 - Courtney Fraser

Please support the art centre! Art and community is the heart and soul of any city, it's such a special historical building, meeting place and event centre that I absolutely think it's worth keeping

3812 - Nick Paris

The operational funding must continue for The Arts Centre Trust year on year... As a commercial tenant (Lumiere Cinemas) it is common knowledge that the costs of the Arts Centre precinct do not much the revenue generated by our market rate tenancies and never could quite frankly.. pulling the rug out from underneath of such an important part of the city will destroy years of work made over the last 45 years or so. The most important prescription for the mental health of the city and it's inhabitants is 3 letters ART- let it be on perpetual repeat to ensure the Trust has a mandate to continue to serve the city and it's visitors

3813 - Marg Morrison

I am concerned about the ongoing financial viability of the Arts Centre and its omission from funding in the draft plan

>>>

We can't let Orana Park and the Arts Centre go the way of the A and P Show.

>>>

The Arts Centre is a beautiful treasure in our city and deserves to be funded and managed appropriately. There is no point repairing and retaining our heritage if it is the not managed and supported long term.

3817 - Melissa Macfarlane

However, I would like to see the operating costs of a wider scope of what I believe are community facilities being supported including the Art's Centre and Orana Park - important for both residents and tourists to our city. I value access to these two facilities and would like to see these sustained through continued and increased operational support.

>>>

I acknowledge the input into the Museum to complete the work started here and the commitment to the rebuild of the Cathedral and Art Centre. However, a considerable investment is evident for Wastewater and Transport.

Operating cost investment in the Art's Centre (at what I understand is on average \$1.8m) is minimal in comparison and I believe the Arts Centre is an important historical and social hub for our city. Considerable investment has already been made in the repair and restoration of the Art's Centre – let's not waste this by taking away the base

support to run the facilities. I note the growing number of businesses on site and the reintroduction of the popular weekly markets – this is a key site and one I highly value.

>>>

[Transport > Transport (Operations)], [Grants & Funding > Orana Park Funding]

I support 0.26% less spending on transport to support the operational expense of the Art's Centre and Orana Park.

>>>

Operating cost investment in the Art's Centre (at what I understand is on average \$1.8m) is minimal in comparison and I believe the Arts Centre is an important historical and social hub for our city. Considerable investment has already been made in the repair and restoration of the Art's Centre – let's not waste this by taking away the base support to run the facilities. I note the growing number of businesses on site and the reintroduction of the popular weekly markets – this is a key site and one I highly value.

3819 - Jessica Halliday

I also think CCC should support the Arts Centre with a multi-year funding commitment.

>>>

I would like to see Council committing multi-year funding to support the Arts Centre Te Matatiki Toi Ora to continue to operate - as long as it is linked to them continuing to support the arts and culture. They've done a great job so far - and this should be supported.

3820 - Rowan Sprague

I heard that the CCC is considering cutting funding to the Arts Centre. I am not supportive of this. I think this is a terribly short-sighted strategy that will not only result in poorer service, but also higher costs in the long term. I would much rather see less money go to Te Kaha and more to the Arts Centre.

3821 - Peter Guy

Save our arts centre! Keep the heritage in Christchurch. It is such an important site, the old university and boys high. The centre for the city's arts and markets.

3823 - Beverly McNabb

As citizens of Otautahi we need the Arts Centre to be a place for people to gather and enjoy ourselves. The cinema Lumiere is magnificent as are many venues in the precinct.

3828 - Peter Harris

Funding of the Arts Centre My wish is that the Council continues its support of the Arts Centre and that the support is long term. I believe such support is essential for the ongoing cultural well-being of Christchurch. Reduced funding and a subsequent diminished presence and contribution by the Arts Centre would be a blot on the city and an embarrassment in the face of the many thousands of local and international visitors who are attracted to the unique place that is the Arts Centre. The attraction to the Arts Centre is for good reason. It is one of the quartet of pillars of the arts and culture precinct: the Museum, Botanic Gardens, Art Gallery and the Arts Centre. These very much complement each other. I visit the Arts Centre almost weekly. I value and enjoy the history and architecture of the site, the range of diverse and interesting businesses, the markets, galleries and culture and art exhibitions and performances. I think the Arts Centre particularly excelled with its events this last summer. What a wonderful asset we have. Thank you for reading this submission.

3829 - Tamzin Roe

Heritage is a concern with the decision not to fund The Arts Centre as one of the flagship heritage diverse functional locations in the city this is a serious oversight. This facility is a Taonga. It is used by a large number of groups annually, with onsite education and visiting artists, educators, theatre, music (popular and classical), childrens groups and others, and also includes a festival annually bringing in tourists and locals alike. As a person who over many years has enjoyed the use of various parts of the facilities for education, and recreation and art events. I have also performed and worked backstage at events, and you can see how valued the facilities are by the community. Please reinstate the funding into the plan again.

3830 - Brenda Banning

Fabulous spot. So much to do. My first spot to take visitors

3836 - Tessa Morrow

You CANNOT stop funding to the arts centre. The arts is a sector that is constantly overlooked and underfunded. The arts struggles as it is. It is unacceptable that a place which brings so much joy and opportunities to so many artists and to the public. Having a sanctuary like this is equally as important as some of the other priorities outlined in this plan. This is not what I voted for. The focus is wrong. Christchurch is a vibrant city and that does not come from "transport and infrastructure" it comes from people and these people need spaces! Please protect the arts. It is ESSENTIAL!

384 - Susan Yardley

The Arts Centre is a major historical site of which there are very few left in Christchurch. It has special significance to me as I got married there and have been a repeat visitor for many years. My very first day as a visitor to NZ was spent at the Arts Centre. To lose this attraction would be a great loss for

Christchurch and the CBD. Please reconsider funding the Arts Centre.

3840 - Liz Horton

Funding should not be cut from the Art's Centre.

>>>

Do not cut funding from the Arts Centre!

3846 - Rebecca Finch

We need to retain funding the arts centre.

>>>

Fund the Art centre!!!!!!

3849 - David Peddie

Continue to support the Arts Centre. Important to support heritage-history and the arts in ChCh. [I was a student at Canterbury University in the early 1960s]

3856 - Portia Bishop

Such a beautiful part of our city centre. I really love visiting there and seeing all the small artisan businesses (which we really need more of in Christchurch) over the big international brands that are within our town.

It really is such an asset to the city centre. How do you expect to see your city thrive and nourish the lives of its residents and wow those visiting from outside if you don't invest into it? It seemed as though the council was so quick to encourage on the construction of the stadium, something that doesn't seem to have a great benefit to cost ratio from the sounds of it. Yet also so quick to neglect an already exist part of the city, something so integral to not only its business owners but to the rest of us in Christchurch.

Please fund the Arts Centre. Seeing the life come back to Christchurch has been so incredible. Talking to overseas visitors, they have also found it to be that way. Don't fumble it!

3857 - Pauline Smale

[Libraries>Libraries (Operations)]; [Libraries>Libraries (Capital)]

My main response is that I am strongly for retaining existing funding for all libraries and also the christchurch arts centre

386 - Christine McPhail

I despair at the current Council and their de-funding of the Arts Centre yet they want to increase payments for questionable shows and events. The amount now given to the A C is small but the return is immense. How many times do we have to “save” this Absolute irreplaceable jewel.

3861 - Alex Robinson

In particular, it is unconscionable that there is no funding planned for the Arts Centre Te Matatiki Toi Ora in terms of further capital works or operational funding. The site is far from complete, with the Trust being forced to mothball some unrestored areas, which is outrageous (although they need to be pressured into accepting an offer for the Dux / Student Union building's restoration, ideally with the Redux group, even if it is a 50-year rent free arrangement). The Arts Centre team create fantastic opportunities for the public to engage with their heritage and a broad array of culture. They have a massive insurance bill forced upon them, which the Council will have to pick up anyway if the Trust folds, so why not fund it, and rebate their rates as well?

add in funding for restoring the rest of the Arts Centre campus.

>>>

How is it possible to say that we're a cultural powerhouse city when we're not prioritising and expediting our heritage restoration projects and making no mention of the Arts Centre?

>>>

Fund the Arts Centre!

3863 - Michael Ryan

The Arts Centre should receive financial help from the Council

387 - Rowena MacGill

The Art Centre needs to be treasured.

>>>

The Arts Centre is a huge tourist attraction and is our heritage.

>>>

Save the Art Centre.

3871 - Philip Buchanan

Funding for the Arts Centre should be increased to at least a minimum level where it can continue to run.

3874 - Simon Gray (The White Room)

We would also support continued funding of the Arts Centre, we have worked with them on several projects, that has enabled us to expand our involvement with the cities art sector and reach new audiences and participants in our own work.

388 - Jennie Chapman

Council to support the Arts Centre.

3888 - Miriam McCaleb

[Spending > Te Kaha]

Take a couple of million from that stadium (live video gamers? gimme a break ...) and give it to the Arts Centre, ffs!

>>>

less for new stadium, more for arts centre!!!

>>>

The Arts Centre is genuinely iconic and mustn't be left high and dry. If 1.8 million is too much (hard to believe, given the massive amount being spent on stadium, etc!) then give a little less (1.5 million) but it would be a false economy to abandon the jewel in our neo gothic crown. Please - in a time of uncertainty and insanity of funding at a national level, please do the right thing, Christchurch!!

>>>

Kia ora I don't envy you this difficult task - I empathise. HOWEVER ... I gotta speak in firm and clear terms that I think the zero funding for the arts centre is a poor plan. Fair enough you want them to be independently viable, but the fact that they have yet to recover from the quakes, (Dux corner, anyone?) let alone covid ... crikey. Fade them out, don't go from 1.8 million to nothing in one go. Give them 1.5, then 1.2, then 900K, etc. Back away slowly. Don't all-then-nothing. Nope.

>>>

Arts Centre, baby!

>>>

Just find a little wriggle room for the Arts Centre and you'll be sweet.

3889 - Jessica Rees

The Arts Centre remains an important site of Ōtautahi's identity. Adequate funding must be provided for this asset to our city to continue to operate, and to avoid further cost being incurred by council and ratepayers.

389 - Phil Skewes

I would like to lodge my support of the Arts Centre as it currently is and keeping it as a Trust-run enterprise with City Council funding support. This is a unique space and under its current management system, offers a rich, diverse and accessible range of events and services. This would be lost forever if the Trust is forced to cease operation. No other organisation would have the same commitment to public events and services that the Trust does. For the sake of public access to quality independent and diverse arts-based events and installations, please do not stop funding the Arts Centre.

3890 - Michele St George Waugh

In terms of heritage please provide rates relief and insurance subsidy for the Arts Centre trust so that this internationally unique gem can continue to be enjoyed by city residents, visitors and the arts community.

3893 - Joe Pope

And now no funding to run the Arts Centre which is the only community art space left and has to be run for the community by law. The council and their plan will cost more in the long run for less out come and is a disgraceful failure of duty and fiscal responsibility

39 - Christina Preston

I ask the council continue to support the Art Centre to continue all of the amazing offerings and spaces it provides to the public, to our artists, to our craftspeople, to our performers and to visitors to the city. I suggest non residents of Christchurch visiting the arts centre are charged a small fee to enter certain spaces and events to help support the ongoing mahi of ALL peoples and council involved in the 'ongoing' daily life and annual calendar of events at the centre.

3900 - Cameron Jasper

For me, the arts center has been a key way for me to learn about Christchurch beyond the usual touristy offerings. Being able to connect with and see firsthand what and who make up the creative nucleus in Christchurch has been eye opening. From the various art classes offered through the arts center by native artists to watching art house films at the Lumiere, this has been the most unique way to get to know the city.

3901 - Amanda South

Please support the Arts Centre and Orana Park

3906 - Sarah Bennet

[Spending > Te Kaha]

\$286 million on Te Kaha is OUTRAGEOUS. Libraries get less than half that?! And the Arts Centre - a heritage site which is far more accessible to the public than Te Kaha will ever be - gets nothing.

>>>

The Council must continue to fund and support the Arts Centre. Growing up in Otautahi, the Arts Centre serves as the backdrop of many formative memories and to see it get so ruthlessly discarded would be devastating for not just me, but the whole city and her future generations. In my opinion, it is the heart of Christchurch and should remain so. It supports a range of individuals and communities and provides a unique space that would be impossible to recreate if it were to be subjected to the cuts the council is proposing. Please, reconsider this short-sighted decision!! The expenditure of millions of dollars on Te Kaha and nothing on an established heritage area is absolutely nonsensical and not a decision that suits Christchurch. Please protect the integrity of our city and **SAVE THE ARTS CENTRE.**

391 - Paris Porter

No, the arts centre is an institution and ought to be funded moving forward

>>>

Arts Centre is the beating heart of chch and deserves more funding. It's an embarrassment to cut their funding and expect they cover the cost for insurance and operational costs

>>>

You have forgotten about the arts centre

>>>

Arts Centre should be part of your strategic priorities

3911 - Tom Somerville

The council should continue its support and funding of the Arts Centre. The centre is not in a position to be entirely self supporting, and without the councils support, would likely not be able to continue to operate in it's current manner. This would risk an iconic piece of Christchurch history, a significant landmark, and cultural centrepiece of the city falling into disuse and disrepair. This would be a huge loss for Christchurch, and would cost the council more in the long run.

3913 - Mark Darbyshire

In addition, Council needs to ensure the Arts Centre remains adequately funded and sustainable in its current form.

3914 - Holly Osgood

I would like to add my voice to the many that are speaking in support of the council including arts centre funding in their long term plan. The arts centre is the cultural heart of the city, it is stupid to ignore the positive impact it has. I love those buildings and I love even more that they are currently alive and busy, it is a gem of history in a city that has very little of that left in our surroundings.

3915 - Redacted Redacted

More allocated capital for >>> The Arts Centre would provide significant social return on investment.

3918 - Rachael Travaille

We need the art centre to be continued in the council's funding. It is a focal point for the city in terms of tourism, history and the arts. It would be a dark day if the council decided to stop funding this essential part of our city.

>>>

Fund the arts centre

392 - Emma Johnson

The Arts Centre should be funded as it an integral part of the heritage, cultural and tourism landscape of Christchurch. Council funding will ensure that this iconic part of Christchurch City continues to be beloved by residents and visitors alike for generations to come. It is a gem in the crown of Christchurch that the Council should be proud to fund.

3924 - Rachel Purcell

The Arts Centre and arts in general also need support.

>>>

The Arts Centre is a vital part of both the current fabric and history of Christchurch. It is a space for art and artists, locals and tourists. It shouldn't be underestimated in its role as a hub that gives Christchurch its unique flavour. It's extremely short sighted to defund the art centre. If you look globally, it's places like this that are the beating heart of cities.

3926 - Hannah Powell

Save the arts centre.

>>>

Save the arts centre, culture and heritage should be at the heart of priority. No stadium will support local live music, wares, cafes and everyday enjoyment like the art centre does

>>>

Fund the arts centre!

>>>

Fund the arts centre!

>>>

Fund the arts centre!

>>>

Fund the arts centre!

>>>

Fund the arts centre! It's a crucial part of Christchurch and supports the local community.

3927 - Wendy Marshall

You must provide funding for Christchurch's Art Centre

>>>

Fund the Art Centre

3928 - Philippa King

I wish to make my support known for continued funding for the Arts Centre. The Arts Centre is a taonga. I have had a personal connection with it spanning over nearly 50 years. I used to have Cello lessons in I think it was the Science building and later on Orchestra practice in the Student Union and the Great Hall. I went to Art Holiday programmes and used to go to the Cloisters Cinema with my beloved mother. I learned Silversmithing with the Silversmiths Guild in their old premises. When my children were small, we spent a lot of time pottering around in the Arts Centre and its surrounds. I was so grateful when the Arts Centre was rebuilt post-earthquake. I walk through the Arts Centre each day on my way home from work. I never tire of the beauty and vibrancy of the space. It would be a backwards step for funding to be cut. I have read what the Arts Centre have done to make cost saving measures and fully support their request for funding to be continued.

3929 - Kate Aitken

Please continue to support The Arts Centre. I love The Arts Centre. In my opinion it's the cultural heart of our city and the place that holds my fondest memories of Christchurch both before and after the earthquakes. As a child I recall roaming through the passageways of the craft shops, the smell of bees wax at the candle makers, making beaded necklaces and tasting samples at the fudge cottage and even setting up a stall in the weekend markets. This exposure to craft has stayed with me. As an adult and post the restoration of the buildings, I now enjoy the Arts Centre from a new perspective, working in an architecture practice across the road from the Arts Centre. I visit frequently, I'm fond of the community that thrives there and I can see that appreciation for craft remains the essence of my

experience. The peaceful courtyards are a sanctuary in the city, not to mention the remarkable architecture. It would be devastating to see this compromised. Please continue to support the Arts Centre.

3931 - David Moorhouse

I would like Council to continue the support for the Arts Centre. Cutting the grant is short sighted and will endanger this wonderful asset and cost the city more in the long run. There is already a strong commercial base of tenants in the Arts Centre (hotel, cinema, bars, cafes etc) plus event based rentals. It would be unrealistic to expect the centre to be able to squeeze these businesses to cover all costs when there is a very strong public benefit from the complex.

>>>

I'd like to add some more info regarding the Arts Centre. This has a deep and personal connection to our family. My father in law studied here when it was a working university. We have attended numerous events and celebrated many occasions here. We also donate what limited funds we can to help sustain. Then we look at some of the council owned / operated facilities such as the art gallery, museum etc and are staggered at the resources they extract from council for more limited outcomes. The centre is a thriving community for the creative sector, and will no more be a commercial \$ making entity than the white elephant Te Kaha that the council has saddled us with - both hundreds of millions of capital costs and ongoing operating losses. I ask that you do the right thing and restore the funding for the Arts Centre.

3934 - Greta Simpson

I'd like to see the Arts Centre funded - it's somewhere that a lot of people go from all kinds of backgrounds and stages of life, to enjoy culture (craft, art, music, etc).

[Art Galleries & Museums > Art Gallery (Operations)], [Art Galleries & Museums > Museums (Operational)]

I think there should be more funding for the arts (gallery and museum, as well as Arts Centre).

3935 - Michael Healey

In this case, defunding the Christchurch Arts Centre disrupts the artistic ecology that needs to be cultivated and not merely activated around events. Effective professional administration is essential to maintain the line. The inner city risks becoming a vapid billboard without substance or actual cultural activity behind it.

3936 - Carley Dove-McFalls

I also support the arts centre receiving funding

3938 - Ben Stafford

I believe the council should continue to provide funding to Te Matatiki Toi Ora The Arts Centre. There are many good reasons the Arts Centre should be financially supported by Council. Primarily council has a duty to support the Christchurch community in all its needs. This includes access to the Arts. The Arts centre provides an essential service to the community, importantly it provides Arts in a way that is accessible to everyone. This is not a business that can run at a profit, it needs support from many elements within the community, and Christchurch City Council should consider it a duty to play a role.

3939 - Michele Hollis

I work one day per week for Te Matatiki Toi Ora The Arts Centre, and three days per week for one of the tenants. In my experienced, The Arts Centre has made great strides in adapting to the post-quake reality and in building community. I note that officers have advised councillors that the centre could put on more mainstream/crowd-pleasing shows, which surprises me as I think the programming is already pretty mainstream. Councillors should also bear in mind that venues at The Arts Centre are relatively small -- The Great Hall is often too small for smash hits to play in. I also note that officers suggest the centre could do more to increase footfall. I would invite councillors to look at the wider context for footfall -- the effect of the rebuild plan with its precinct nature has been to shift activity to east of the river - the arts centre is attempting to adapt to this new reality partly by aligning itself with the health precinct via the Health Technology Centre.

>>>

[Planning & Strategic Transport, Urban Design, & Urban Regeneration > City Planning]

More broadly, don't expect single institutions to swim against a tide while making that tide stronger -- every time you encourage more greenfields development, downgrade active and public transport in the city centre, continue to enable landlords to use their central city property as gravel carparks (while others invested in parking buildings), or give in to NIMBY pressure, you make it harder for places like The Arts Centre which need a greater concentration of people living, working and playing around it.

394 - Lisette Williams

Defunding the art centre is short sighted. It needs to be preserved, and therefore funded, as an icon of our city. It is a key part of the history and character of Christchurch, and as such, needs to be given specific value in any plan the council creates. It is a tourist attraction, generating income for not only those businesses in the centre, but the greater CBD. Additionally, it provides invaluable educative

experiences for the inquisitive minds of our city. Beyond these reasons, the art centre is quintessentially Christchurch; since the earthquake, Christchurch has risen from the rubble with its identity stronger than ever, and part of that is the fabulous art produced all over the city, quite literally. The art centre fosters this creativity through its educational programmes and mere presence as a uniquely Christchurch land mark. Removing support for these buildings will cripple that image and artistic narrative

3940 - Molly McKinstry

I go there almost every weekend, use all the shops. My whole family and friends rely on the art centre. It's why we love chch

3943 - Maria deSilva

I believe the Arts Centre is a huge part of Christchurch's heritage and deserves attention, funding and support.

395 - Jacob Harford

I would like to see the Arts Centre funded and remaining operational. It is an asset to the CHCH community and one of few historic community centres places in Christchurch, this needs to be cherished

3952 - Robert Simpson

No, am very concerned reducing funding for venues such as the Arts Centre will damage the vibrancy Christchurch has worked so hard to rebuild since the Earthquakes.

3953 - Hamish Oliver

I strongly believe that the Long Term Plan must support The Arts Centre Te Matatiki Toi Ora - this organisation is a very important one to the city heading into the future. Even just logically, with no thought of the significant role it plays in the cultural life of the city and country, it doesn't make sense to not support it (future running costs being picked up by the CCC / ratepayers. I'm a full-time lecturer at UC's Digital Screen Campus - the only Screen Sound lecturer there at present. I'm involved in the game development industry which is having huge growth across NZ, and have been part of the theatre, film and TV industries for more than 25 years. I was fortunate to grow up in Christchurch and it's always been clear that the Arts Centre has played a concrete role in what I do now. Now I play piano for the CSO, I write and arrange music for the NZSO, and I'm a composer and sound designer for games/film/TV/theatre. In the past I've toured internationally and performed with world-famous performers. Throughout this time and actually since I was a teenager, The Arts Centre has provided many many opportunities that have given me the musical skills and knowledge that I now have (and can share back to the community and students). Since around 1987 I've busked for years in the various quads, rehearsed performed and improvised with Stu Buchanan's CSM Jazz Band, CHCH Youth Orchestra, the Court Theatre, the Court Jesters, Chamber Music NZ / Alti Ora (for a national tour last year), Free Theatre Christchurch, Christchurch Drama Centre, Mark Hobson, and many other

creatives. This was my equivalent to Gladwell's "10,000 hours" for mastery of a discipline. The Arts Centre buildings helped, but it was the organisations in them that I - and many other current NZ professional artists - got to directly engage with, developing our craft and careers. I'll be there tomorrow, helping run the weekly UC Composers' Workshop, publicising the Great Hall concerts to the students, and enjoying seeing them benefit from the same unique, vibrant and vital Arts Centre that I have benefitted from so much.

3955 - Elise Harris

I wish for the council to reconsider and continue to provide funding for both the Arts Centre and the Screen Canterbury Production Grant. I believe the Arts Centre provides great artistic and cultural value to our city, and is one of only a few truly egalitarian community spaces in Christchurch. I have many fond memories of visiting with my late brother when we were children, attending markets, plays and performances. I've attended concerts, comedy shows, and the buskers festival in my teens and early adulthood. More recently, I've hosted my wedding there, and am now an employee of Lumiere Cinemas. These things barely scratch the surface of all that the Arts Centre has had and continues to offer, and it would be a shame to lose the opportunity for so many people to continue to make wonderful memories here. Additionally, it would be wonderful if a solution could be found to help fund the potential restoration and re-opening of the Dux De Lux.

3958 - Emma Turner

I strongly believe we should maintain funding to Te Matatiki Toi Ora, The Arts Centre. Although it has taken a few years, they are now providing integral opportunities for the community to engage in the arts in an inclusive way. They offer a range of ways for the community and artists to connect, that complements and and is not covered by the Christchurch Art gallery and Museum.

>>>

Please continue to support the Arts Centre too!

>>>

Please continue to support the Arts Centre, even if that means increased CCC control over how the money is spent.

3962 - Malia Hay (Voices Co. Academy)

[Grants and Funding > Events Ecosystem Funding]

Clearly both Events and creative arts are important to the Christchurch economy, so it would be great to see this supported locally (i.e. The Arts Centre); as well as looking at bids nationally and internationally.

>>>

As an Arts Manager and Business Owner in the Arts space here in Ōtautahi I'm saddened and deeply concerned to see that the Arts Centre Te Matatiki Toi Ora has not been included in the Council's Long Term Plan for Christchurch, meaning that the Arts Centre will cease to exist in its intended form.

Since the Sept / Feb Canterbury Earthquake Sequences (CES) occurred 12 years ago, as a city we have all watched and contributed to the rebuild of the city (whether through active involvement, or as rate-payers); restoring the old, strengthening the existing, and championing the new.

Alongside this, we have learnt the hard way that a 'fixed' city is nothing without the life and livelihood of its inhabitants, and that there are many, many contributing factors that allow this to happen: For a city to thrive, all aspects of its communities must also be positioned to thrive.

Over the past 12 years Ōtautahi has seen her fair share of tragedy and challenge. Through earthquakes, fires, shootings, and pandemics, the Arts have been at the heart of our whanaungatanga, uniting communities and giving a common voice to her people; whether in joy or in strife.

The Arts Centre Trust are kaitiaki of the Arts here in Ōtautahi, trusted by both by members of the public and by the Artists that they represent. They are home to over 70 Arts entities. Post-quake they have managed and overseen the restoration of 20 heritage buildings within the site, within minimal external contribution.

The provisions of the Trust guidelines allows the Arts Centre to meet the needs of the Arts community in a unique way; combining accommodation (heritage buildings), community (a creative hub), and facilitation (support, promotion, education and oversight), while ensuring that all those critical aspects are not provisional based on external agendas.

Additionally, the kaupapa and mandate of the Arts Centre Trust allows it to represent the Arts and Artists in a way that a council-led format cannot. The people who represent the Arts Centre Trust are passionate advocates of, and for, the Arts. The tenure of the Arts Centre Trust highlights the ongoing need for an advocate for the Arts and Artists of Ōtautahi, and as we move into a 'Cost of Living Crisis' their role is more critical than ever.

Throughout the challenges of the past 12 years, the Arts Centre Trust has worked tirelessly to create a space to facilitate the return of the arts to the city centre, particularly those arts and artists that may not find an easy fit elsewhere, who need patronage from within the Arts Sector itself, or who simply need the support of a physical arts community around them.

Our business is one such arts programme, and without the ongoing support and community of the Arts Centre, we would not exist today. Voices Co. is an internationally recognised Pop A Cappella

programme, and is the only one of its kind across NZ. We were born post-quake, out of the desire to highlight and represent the creativity within Performing Arts and music here in Ōtautahi.

The Arts Centre is home to more than 70 arts entities. Post-quake they have managed and overseen the restoration of 20 heritage buildings within the site, within minimal external contribution, and have continued to operate and deliver on their kaupapa throughout the process.

We have been tenants at the Arts Centre for 5 years, including throughout Covid, and have had the opportunity to work alongside the Arts Centre on different joint initiatives; both ours and theirs. We have benefitted hugely from being amongst and active community of other creative artists and programmes, and the hundreds of students / families that have come through our doors over the past 5 years have benefitted from this also.

The Arts Centre is so much more than just a significant landmark in our city. It is purpose-built and purpose-driven by those who understand that, although the Arts may never be quantified as an 'essential service' in the infrastructure and economy of our city, without the Arts, the very heart and whanaungatanga of Ōtautahi would cease to thrive.

I ask that Council reconsider providing the \$1.8M necessary to allow the Arts Centre Trust to continue to maintain and deliver the Arts Centre.

As an Arts Manager and Business Owner in the Arts space here in Ōtautahi I'm saddened and deeply concerned to see that the Arts Centre Te Matatiki Toi Ora has not been included in the Council's Long Term Plan for Christchurch, meaning that the Arts Centre will cease to exist in its intended form. I ask that Council reconsider providing the \$1.8M necessary to allow the Arts Centre Trust to continue to maintain and deliver the Arts Centre.

3967 - Graham Wagener

>>> Maintaining funding for the Arts Centre is also important as it's the cultural heart of the city. I received a painting for my wedding that was purchased from a vendor at the Arts Centre, I have many memories from my pre-quake university days of going to Le Cafe and the observatory, and I plan to take my children to Rutherford's Den so they can learn about the scientific history of our city.

3974 - Amanda Jenkins

Heritage - The Arts Centre needs to be funded.

>>>

As long as you continue to support the Arts if that falls under heritage - The Arts Centre and Ferrymead Park.

>>>

No. Culture and the Arts in Christchurch MUST CONTINUE from the City Council. The Arts Centre is unique in this country. Post the restoration, the centre has been turning its focus on becoming an arts organisation of national significance. Not many arts organisations in the country own buildings, let alone heritage ones. The Arts Centre falls through the funding cracks – it has museums, it has art galleries, it has commercial tenancies, it offers venues for hire and it also curates an arts programme in collaboration with local and national creative communities. It is easy for agencies to point the

finger at another agency to pick up the slack. Not totally museum, or gallery or arts, but a compilation of all.

>>>

Now is the time for courage to support The Arts Centre – it has grown particularly over the last couple of years with the addition of a Māori arts space – Te Whare Tapere the establishment of which was driven by The Arts Centre and their own Māori Arts Advisory Committee and took 4 years to realise. Quote from the Creative Director at The Arts Centre Chris Archer "Comparisons are complex, however, a 2019 study found that on average public funding for performing arts organisations comprised 63% of total revenue for one of these organisations, for another it was 86% and for another 100%. The Arts Centre's total anticipated income for 2024 is roughly \$5.5M. Arts programming costs are around \$350,000 including staffing, marketing, and delivery - \$213,000 not including marketing. Total budgeted income for arts programming is projected at \$586,700. Of this \$215,000 is approximately public funding. This is 37% of total revenue for arts activity. This demonstrates fantastic value for money and huge success with getting funding from other public sources. The problem is not the arts delivery that is costing us, it is insurance, rates and maintenance costs. Council is the only entity that can look at making a difference for us in this respect. It is important for citizens in this city to have the opportunity for unique intimate arts and cultural experiences in a beautiful heritage setting. I applaud the council for retaining investment in its own arts and events programme, however, this cannot be at the expense of independent entities. I'm proud of the quality and diversity of arts programming at The Arts Centre - this is consistently reflected in reviews. In 2023, Dr Erin Harrington went on the record on Radio New Zealand to say that The Draft Long-Term Plan 2024-2034 from Jenkins, Amanda Arts Centre's programming was a highlight of New Zealand's culture in 2023. At our public meeting arts leaders in this city said that The Arts Centre's vision is much stronger than pre-earthquakes, and that communities are at the centre of what we do and feel safe and at home at The Arts Centre."

>>>

Please fund "A New Zealand icon, the Arts Centre Te Matatiki Toi Ora is a hub of culture, creativity & education." Quote from Chris Archer, Creative Director of the Arts Centre "We provide leadership in the arts in this city and we provide expertise and the infrastructure to support both individual artists and arts organisations. We are part of the arts 'ecology' of the city and the country. If we cannot sustain our creative communities and the support and services we provide, then not only are locals and visitors deprived of intimate experiences that uplift, distract, challenge, educate and entertain, then the support (and income) for the wider sector are impacted – those that work locally in AV tech, production (including film and advertising), direction and design for example. Not to mention the Screen Canterbury production grant which has been dropped by Christchurch NZ - that's another story. Tenants choose to be part of The Arts Centre community because of the vibrant activity, to which they also often contribute to. I cannot over emphasise that The Arts Centre is a community and works with communities. Don't cut off at the knees an organisation that has successfully managed an earthquake restoration on time and on budget and is now beginning to flourish and achieve on its new vision. There is no need for me to cite other council led projects that have cost ratepayers so much money but are failing or have failed. Please back a winner. You can share in that success."

398 - Claire Robb

Save the Arts Centre - it is outrageous that you are not financially supporting this incredibly important Christchurch landmark. It is iconic and unique in a city which lost so much of its heritage buildings. My family and I have enjoyed many different cultural experiences and activities, which have been unique to The Arts Centre. It is absolutely impossible to understand why this unique taonga has been allowed to struggle financially as much as it already has. Shame on you Christchurch City Council. This Long Term Plan is the perfection opportunity to show your support and secure it's future, thank you.

399 - Evie Walker

To destroy our prestigious Art Centre is a terrible idea. Visitors & locals alike love it. It is also false economy which will ultimately cost the Council more money. Please rethink this outrageous & foolish plan.

>>>

The Arts Centre is not only iconic to the local people, it is a magnet for visitors, & will most certainly help create revenue for our city. It has only just been revived, & is a wonderful drawcard. Please help fund it- there is nowhere else in the centre of town so delightful. It is open most of the time, & is a huge contributor to the mana of our beloved city.

3999 - Adrian Rackley

Regarding the heritage plane. Keep the Arts centre for the benefit of Christchurch People, I know you want to sell it to [REDACTED] or any other developer that may rip the heart of the Area.

All of you need to look forward to it. not being manipulated by the Developers within the council. Who we all know are only there for the benefit off the family business.

--es

4 - Diane Heather

I notice from the draft LTP that the Arts Centre is not explicitly mentioned, from which I infer that there is no plan to provide the funding which the Arts Centre relies on for such costs as insurance, rates, maintenance, wages and other costs. The omission of the Arts Centre from the draft Long Term Plan does not fit with some of the strategy and policy documents currently available on the CCC website. The Letter of Expectation sent by the mayor to executive staff in 2023 outlining his expectations for staff as they develop the LTP for 2024 -2034 envisages Christchurch as the "City of Opportunities". It includes a wish to "support diverse cultural interests, activities and events". The draft strategic priorities include: "put people at the centre" and the financial strategy "must take residents' quality of life into account." Arts Strategy The current arts strategy document has a vision

for Christchurch “to be known as NZ’s best place to live and create, where the arts activate Otautahi Christchurch and creative exploration defines who we are.” It describes Christchurch as “A place where there is support for local artists and this support provides new employment opportunities in the creative sector. “ It goes on: “The strategy is not just about supporting artists - it is also about bringing wider benefits to the city – improving people’s wellbeing, sense of identity and connectivity, activating and bringing life to the city, attracting visitors and boosting the economy”. Creative NZ research conducted in 2017 found that 72% of Christchurch residents believe the arts have a vital role to play in rebuilding their city for the future. The arts strategy goes on to add that: “Arts are central to our identity” “Arts sustain our wellbeing and help us cope with adversity” “Arts and creativity underpin innovation and boost the economy.” It is exactly because we are going through a sustained period of uncertainty and difficulty that council should continue to provide funding. Its own arts strategy has identified the role that the arts play in community wellbeing in times of adversity.

Heritage Strategy The current city council heritage strategy shows the results of a survey on heritage in 2017 that included asking “What do you consider to be of heritage value”. Here the Arts Centre rated highly, only slightly less than local history and trees. The Arts Centre is unique in New Zealand. As this is the largest collection of grade 1 listed heritage buildings in the country, a Christchurch CBD without the Arts Centre as a leading dynamic arts promoter and facilitator is unthinkable. Given that the arts programmes are largely externally funded, the major concern is funding to protect and maintain the immensely important collection of heritage buildings that are at the Arts Centre. Since so many heritage buildings were lost in the earthquakes, it is vital to retain and cherish what we have. Having our local heritage maintained, improved and supported is vital to the psychological wellbeing of Christchurch residents and if Council maintains this position of not providing funding, it will be sending a very dismal message to us. Heritage speaks to our collective and individual souls and meets needs that are sometimes hard to express, in the case of Christchurch it is also a major selling point that attracts visitors who bring much needed income. Thinking about all the people who have designed and built the centre from its beginnings in the late 19th century, all the people who have studied here and become leaders in their field, the people who worked so hard on the post-earthquake restoration and the current dedicated team looking after the site and creating an amazing and diverse range of offerings: can this all really be left to uncertainty, potential loss and decay for a short term financial benefit? As a ratepayer and resident, I would gladly pay more to have the Arts Centre receive ongoing support from you. I am aware of how tight the financial situation is for the council and for households, and of the need to concentrate on “the basics”, but I note many other community, heritage and arts funding proposals in the LTP so do not understand why the Arts Centre is not on the list. Only thinking about “the basics” will make for a dull city, unattractive to live in and unattractive to visitors. The Arts Centre is a functioning, active and well-loved institution in Christchurch. I ask the Council to consider ensuring that the Arts Centre receives the funding it needs in the LTP.

40 - Barbara Russell

We must save the Arts Centre at all cost. It is, and has always been, a jewel in Christchurch's crown of wonderful buildings. It would be very short-sighted to not continue giving a grant to the Arts Centre.

400 - Olivia Dowell

I am writing to express my strong support for the continuation of funding for both the Arts Centre and the Health Technology Centre in our community. These two institutions play crucial roles in fostering creativity, innovation, and community development in Christchurch, and I believe it is essential that they continue to receive the support they need to thrive. The Health Technology Centre serves as a valuable hub for emerging businesses, providing a platform for networking, collaboration, and growth. By bringing together entrepreneurs and innovators in the health technology sector, the centre enables them to work together to improve their products and achieve their goals. This collaborative environment not only supports the success of individual businesses but also contributes to the overall advancement of health technology and the betterment of society. Furthermore, the Arts Centre holds a special place in our city's history and cultural identity. For generations, it has been a hub for creativity, learning, and artistic expression. By providing a space for artists, performers, and learners to come together, the Arts Centre fosters a sense of community and enriches the cultural fabric of Christchurch. Removing or limiting funding for this important institution would risk eroding its historic legacy and diminishing its capacity to support the arts and education in our city. As someone who has cherished the Arts Centre since childhood and now has the privilege of working at the Health Technology Centre, I have witnessed firsthand the invaluable contributions these institutions make to our community. I believe that maintaining funding for both centres is not only a wise investment in our city's future but also a testament to our commitment to fostering creativity, innovation, and social good. I urge you to carefully consider the importance of these institutions and the positive impact they have on our community when making decisions about funding allocation. Your continued support is crucial in ensuring that the Arts Centre and the Health Technology Centre can continue to thrive and serve the people of Christchurch. Thank you for your attention to this matter, and I hope to see funding for both centres remain as it is.

4003 - Kristine Jolliy

Support the Old Arts Centre. The balance is right here for tourist and community events.

4023 - Bethan Sommer

FUND THE ART CENTRE. It's been a community hub throughout my teens (after it re-opened) and 20's. All my friends also frequently participate in events held there. It'd be a real loss one I know would be missed very much.

>>>

Keep the Art Centre!

4026 - Helen Van den Bogaert

Don't cut arts centre funding

4027 - Rona Buttimore

The arts centre is the most important feature in Christchurch.

4033 - Juliana Venning

Keep The Arts Centre it is a real cultural hub with creative communities, arts, cinema, architecture...it is a taonga

4038 - Jodi Wright

I would appreciate the Arts Centre receiving ongoing funding from the CCC. I love the place and so do many others. It would be a shame to overlook the Centre's prominence and ongoing creative development they contribute to the city.

4048 - Kate Burt (PH) (ICON - Inner City West Neighbourhood Association)

ICON – Inner City West Neighbourhood Association supports the proposal that the CCC continues to support the Arts Centre of Christchurch financially. • The Arts Centre is the current heart of Christchurch and also ICON. • It is a vibrant stimulating environment for tourists, visitors and residents to visit and enjoy. • The Arts Centre has been beautifully and painstakingly repaired to a magnificent standard attracting tenants and businesses who enjoy the atmosphere and surrounds. A model that the rest of the city could emulate. • The Arts Centre is always busy but not crowded, it provides a peaceful and relaxing atmosphere to meet, hear concerts, see a movie, stay in the Observatory Hotel, have coffee or a glass of wine or a meal. Enjoy art, creativity, retail, educational and historic experiences. • The Arts Centre is a unique oasis in our city which adds immeasurably to lives of all who visit, work, perform or exhibit in it. • Our city would be the poorer without the Arts Centre which is providing professional, quality venues, shopping, hospitality and educational occasions which reflects the twentyfirst century in a beautiful authentic nineteenth century setting. • Where else can this be done- nowhere !

4049 - Laura Foley

They provide wonderful services and activities for the community. As well as being a focal part of the city with lots of heritage. It would be a big shame to lose this

405 - Harriet Boyle

I am writing to request the Council's continued support of the Christchurch Arts Centre. The Arts Centre is an iconic feature of Christchurch that brings in thousands of tourists and locals every year. It champions local artists and vendors and has become a space of celebration and discovery that would be a desperate shame to lose.

407 - Bic Runga

Just wanted to mention the Christchurch Arts Centre and what an important part of the music/arts eco system it has historically been. It is also a wonderful piece of architecture and its proximity to the

Botanical Gardens/Museum and art emphasis is such key hub and gives Christchurch its character as a place of culture.

408 - Melissa Leighton

Please plan to support the art centre

409 - Maud Jumelle

Please save the Arts Centre! I work in tourism, and I feel this is the most valuable place and building in Christchurch. After so much efforts and money put into it following the EQs, it would be a massive waste!

41 - Rhonda Campbell

not quite... I was a visual artist who had 3 different galleries over a period of 32 years at the Arts Centre...and made my living from selling paintings to people from all around the world...including the Clintons who visited me 4 times ...resulting in 4 personal letters from Bill C....which of course helped my name...I also sang regularly in the Market Square.. which I enjoyed...if the Arts Centre is dissolved... it will leave a big hole in the creative industry in Christchurch...people like me could not survive without the Tourists..in face 90 per cent of my work still goes to the USA..UK and Australia...I wouldnt have made the contacts I have without the venue....you are taking away the right to live and earn a living as an Artist...the only thing I would suggest is..you halve the operation...maybe just use the Chemistry Block... the Artists building on corner of Hereford Street..and the Great Hall and greens for markets and concerts...you could rent out the rest or sell off some of the buildings...

>>>

read the previous statement about halving the operations

>>>

The Arts Centre used to be the Heart of Christchurch...from the Cathedral (before quakes) down the boulevard to the Gardens was a World Class walkway...reminiscent of Paris...it could be again...but with a smaller operation as quoted earlier...I am happy to discuss this with anyone who will listen...

410 - Prue Edmond

I think it is important to provide funding for the Arts Centre. It is the heart of the city, particularly because Cathedral Square is such a disaster zone.

411 - Doreen Watkins

Happy to pay more rates to keep the Arts Centre funding, to keep the wonderful concerts going

412 - Rachel Huston

Please support the Arts Centre. It is the creative and social heart of the city. Over the years I have frequented the Arts Centre countless times. I have enjoyed the market, the wine bars, the galleries, the movie theatres, the Great Hall for music and theatre, the ballet and school holiday events for my children. I have worked in the coffee shop, attended Classics lectures and I have exhibited my paintings. It would break my heart to see the Art Centre fall to ruin or close. I truly would move cities if this happened. It would destroy Christchurch for me. I don't believe for a minute that not funding the Arts Centre will save the Council money. It's a horrible, undemocratic, anti-social idea that just can't happen.

414 - Jackie Maurice

Should be funding the Arts Centre.

>>>

The Art Centre is a hugely important heritage building and is enjoyed by a wide range of people.

419 - Peter Worsp

How essential to the fabric of any city, or indeed village, is the long-established heart in the form of heritage buildings, not only for their physical presence and history, but for what they embody in the way of character, continuity, and a sense of permanence in the face of rapid change. The 'contents' of the building are equally important in terms of the Arts, artisans, and business tenants in this case. How much poorer would we be without that collection of buildings that is such a vital part of the heart of Christchurch, for a good number of very valid reasons, not the least being that it is an 'interesting' place where 'interesting' things happen. Creativity is essential in the ongoing regeneration of Christchurch if we are to become a fully mature and complete entity as the second biggest city in NZ. The Arts Centre is the hub of this creative initiative and there is still a lot of potential to be explored before the Centre hits full speed. We are well on the way to creating great hubs for sport and there is a big opportunity for an equally important major hub for the arts, creativity, and like-minded businesses. We need the creative hub to develop at a similar pace to the contemporary commercial buildings which are also playing a vital role in the regeneration of Christchurch as a multi-faceted modern city. The earthquakes were a catalyst for these major changes and we are starting to see the benefits that can come out of that enforced change. I appreciate the ongoing tension for the Council with the demands for support and funding for so many essential and diverse elements of Christchurch, but I see the Arts Centre near the very top of the priority list. The Centre is currently being successfully run by a trust and I see merit in that continuing, which would also relieve the Council of one more role. Given the greatly increased insurance cost of the buildings perhaps some rates relief might ease the financial burden, alongside Council promotion of the Arts Centre as a great

venue that would attract tourists and businesses into the city and create revenue. Over the years I've been to many memorable events in the Arts Centre, from conference dinners to cultural events to social events. Having that dearly loved heritage site with such potential slowly dying would be a travesty.

42 - Anna Mathieson

Please continue to fund and support the arts centre it is an amazing place that elevates Christchurch's art and cultural heritage. The arts overall continues to get less funding in many areas of New Zealand when its impact and importance not only culturally but to society is huge. I urge you to reconsider your position in retracting funding to such a significant organisation.

420 - Melanie Rae

The Arts Centre's continued contribution to the fabric of Ōtautahi is essential. As a ratepayer and lifelong Cantabrian I can't image why it would even be considered to pull funding from this important precinct that brings together the old and the new in Christchurch and is a draw for tourists and locals alike. I strongly object to the plan to remove the funding for The Arts Centre.

421 - Vicki Bretherton

I think it is disgraced and an embarrassment that the council has taken such a short sighted and dim view of the financial requirements to keep the Arts Centre going whilst at the same time we have a mayor who thinks we have the money to have the commonwealth games here, many people of chch are unaware of the amazing resource on its own door step and it's cultural significance cannot be under estimated

424 - Katharina Stirland

You need to keep funding the Arts Centre. The Arts Centre is a cultural hub for Christchurch and Canterbury. The events put on by the Arts Centre are fabulous and the fact that a lot of them are free is great, especially for families. With the museum closed for the next 5 years, it is vital that the Arts Centre continues in its current form. Furthermore, as a rate payer, paying more in the long term if it becomes insolvent is not something I support.

426 - Elyse Thompson

I believe the Arts Centre should continued to be funded. It is a very special hub of arts and culture in the City, for both locals and for visitors. The businesses in the Arts Centre are wonderful and unique - they offer experiences not found elsewhere in Christchurch. The Arts Centre also put on wonderful events. I recently attended Off Centre which was really fun! It was lovely to see all ages out and enjoying music and entertainment. Not to mention, the buildings are absolutely stunning, and are a real point of distinction for the rest of now-modern Christchurch - obviously so much of "old" Christchurch was destroyed in the quakes. Whenever we have visitors, we enjoy showing off the Arts Centre, and everyone really loves it! I'm truly shocked and dismayed to think council would consider stopping funding. Arts, culture, and heritage are important to retain, particularly as Ōtautahi

Christchurch grows. I'd be happy to discuss my thoughts and opinions further if need be.

427 - Jessica Close

I wish for the Christchurch City Council to (financially) support The Arts Centre in a committed, ongoing capacity. I have been privileged enough to have been commissioned by The Arts Centre to design and install the interiors for their anchor tenant The Observatory Hotel. It was an extraordinary project to be part of, one that I will treasure for the rest of my life. Over the course of the project we engaged in an enormous number of small, local, Canterbury based businesses to execute the manufacturing for an almost entirely bespoke commercial fitout. The Arts Centre's commitment to our community changed peoples lives during covid. It kept businesses going. I can't begin to fully express in words how much the entire precinct means to me, and my family. We visit it at least once a week to enjoy the extraordinary offering that TAC has worked so hard to achieve. Their mission is wonderfully well rounded and beautifully executed. Please let them keep doing this!

428 - Beth Dunn

The ARTS CENTRE is an icon of Christchurch - especially NOW!!!! We MUST retain it as it, as it is so very well used by so many organisations & people! We owe it to future generations to do everything we can to make it available in perpetuity into the future!! There has already been so much investment in it post-quakes that we can't afford NOT to keep going! Our city's arts scene depends on it - as does our events scene.

429 - Margaret Giertz

Please keep it up, everything the Arts Centre does.

43 - Naomi van den Broek

Fund the Arts Centre. It's a cultural and architectural icon of the city, it belong to the community, it serves the community. Personally I will never attend a rugby match, but my rates are funding a stadium regardless. I spend a lot of time at the Arts Centre and I would hate to see it fail because a comparatively small amount of funds are not made available to ensure it continues the vital work it is doing already.

431 - Silvia Schneider-Rowse

I'm really proud of the great hall and would like to continue with the funding, It's an institution and needs to continue with concerts and other performances

432 - Gaye Morton

It's such an important place and I have been involved with the Arts Centre for years, it needs to stay part of the city. Please fund it.

434 - Adam Hutchinson (oVRcome)

Last year, the Arts Centre created the Health Technology Centre, a space for startups focussed on solving problems within the Health Sector. oVRcome, is one of those startups currently benefiting from the space. Being physically located with other startups in the same industry, solving the same problems, and attracting people into the space has enabled us to grow from a 3 person team, to a 9 person team. The Health Tech Centre has also created a sense of belonging, which has directly benefited the culture of oVRcome. There is a real need for the HTC to grow more companies in Christchurch like we've grown ours, and it would be a shame if this was not able to work as it has been.

435 - Vanya Maw

The arts centre is an icon of the city and so important. It's our gathering place to enjoy and relax, enjoy music, exhibitions and the movie theatre. Please fund the Arts centre.

438 - Cheryl McGuinness

We must save the Arts Centre. We can't let the trust go.

439 - Alison Taylor

Continuous partial funding through rates to keep the Arts Centre alive.

442 - Peter McCallum

I would like to see the funding given to the trust of the Arts Centre as it is now to continue for the future.

443 - Keryn Roberts

[Strategic Direction > Have we got the balance right?], [Rates > Other], [Spending > Te Kaha]

Not at all, I am deeply concerned about the 8% other spend and the fact it seems to be increasing. I also think it is highly important that council removes its running costs out of this 'other' portion and is honest about its allocation. If you are proposing Museums and Galleries can be run on 1% and Libraries on 7% then surely the administration and counsellors can work on ensuring their operations can be run on something in-between AND BE TRANSPARENT about this. I also question your rationale for keeping some larger projects, like the stadium, but not others like the Arts Centre. Personally, I would like the arts centre and not to pay an extra 6% rates (over three years) on building a stadium when we already have good alternative venues available.

>>>

I am generally concerned that no space has been made to fund The Arts Centre, this is a valuable resource for Christchurch city and so much cost has already gone into it's development it seems silly to risk this growth from lack of funding.

>>>

In choosing not to fund it we risk losing a vital hub in your cityscape that would reduce our cultural spaces but also impact negatively on the business around them as the arts centre provides an important focus point alongside the art gallery to this side of town. If it shutdwn it is going to be an awful space between the botanic gardens, the new museum and the aet gallery. Having it there makes this entire space a place to visit.

444 - Veronica Shepherd

As a rates payer for many years. I think the arts centre must be allocated some funds from the councils budget to help it continue running at the high standard it is now. Please reconsider your decision to not fund them at all.

445 - Maria Arrillaga

I think that the Arts Centre should continue to be funded as it's an important heritage site in Christchurch and provides a sense of identity and history for locals. It doesn't make sense for the rate payer to fit the bill given how high rates already are, but rather I believe this should continue to be protected by the government. There is already so much loss of history and heritage in Christchurch (since the earthquakes) and it's extremely important that we look after what we still have.

446 - Andrew Peach

Maintain support for the Arts Centre

>>>

Very odd the Arts Centre appears to be left out of the long term plan

449 - Robin Hughes

I am making a submission in support of the CCC providing ongoing financial support to the Christchurch Arts Centre. I regard the Arts Centre as a pivotal part of Inner City Christchurch and a key part of the Tourism sector in Christchurch. I am a Director and Shareholder in a company which owns two Properties adjacent to the Arts Centre being No 21 and No 27 Worcester Boulevard. I am a shareholder and Director of Hughes Developments Ltd which operates from No 21 Worcester

Boulevard. Being located in Worcester Boulevard gives me a unique firsthand knowledge of the level of activity the Arts Centre generates and the wide spectrum of local and Overseas visitors that it attracts on a day to day basis. I have witnessed the amount of time and effort and resources that have been invested in the Arts Centre to restore this property to a high standard after the Earthquakes and I would like the CCC to ensure that it continues to value this property and its diverse group of tenants which offers unique and interesting retail opportunities which only a Heritage precinct like this could provide in this setting. The Arts Centre is also a Social Hub and Community of like Minded People who make their living from this location and I would encourage the CCC to acknowledge this and ensure that this community is not put at risk through lack of financial support by the CCC. A large part of the success of the Arts Centre is the Management of the Property by the existing independent Trust who clearly are doing a very good job of establishing and growing this complex through what has been and continues to be challenging economic times. This Trust is very invested in this Property and should be valued and there should not be any changes made to this set up as their track record speaks for itself. In closing I would make the point that Christchurch has lost a lot of its Heritage Buildings and opportunities for arts and creativity to flourish due to the Earthquakes and The Arts Centre is a very good example of regeneration in our City and I would request that the CCC respect and support this special part of Christchurch.

45 - Conan Fee

The Arts Centre appears to be entirely missing from consideration and there is no mention of continuing to fund it. This is a very short-sighted omission. The Arts Centre was gifted to Christchurch people for the furtherance and support of the arts and I believe an act of parliament means that whoever operates the Arts Centre is obliged to fulfil these objectives. At the moment, there is a trust, that employs staff to run the Arts Centre. If it cannot meet its financial outgoings, which requires funding by the Christchurch City Council, then the trust will inevitably fold and the upshot will be that the Arts Centre would be handed to the only other viable organisation that has a responsibility to the people of Christchurch i.e. The Council. The Council will then need to employ staff, pay them at the rates that are equitable with other CCC-operated facilities such as the Art Gallery, and somehow (without the focus the trust currently has) operate the Arts Centre to attain its annual objectives. All this, without the various grants the Arts Centre is eligible for, but which the CCC is not. It is inconceivable that the annual cost to the CCC would not be significantly MORE than the funding it has provided prior to date. Thus, the idea that CCC can reduce its costs by failing to continue to fund the Arts Centre is demonstrably wrong. If this conclusion is not correct, then the CCC should put up their detailed analysis of just how it will cost it less to allow the Arts Centre to fail financially and then take over its operation. It is also inconceivable that CCC employees will be able to devote the same level of focus and specialist knowledge that the current trust employees offer, and the result will be a far poorer level of investment and activity in the arts in the city. Why on earth would the CCC wish to neglect and therefore destroy one of the best-known and unique cultural assets of the city? In short, the omission of Arts Centre funding from the long-term plan is plainly wrong-headed for many reasons, the foremost one being the ill-conceived and superficial notion that this will reduce costs to the ratepayer.

450 - Allison Husband

I don't believe that the cost of transport should overshadow the cost of retaining/maintaining the Arts Centre.

451 - Pip Voller

I am shocked that CCC would cut funding to the most special historical and cultural buildings site in NZ and ChCh. Functions, performances, meeting places. Great for mental health and well being to wander round the place. Locals and tourists love it! It needs the money from rentals too. Hence the Dux must be rented out by the Arts Centre. Please council. The arts are very important as well as sports and cathedral. More people attend Arts Centre than they would the Cathedral I would think.

453 - Simon Beardsley

There needs to be funds for the Arts centre.

>>>

You should review how much you fund the Arts Centre.

>>>

You need to fund the Arts Centre in Town. It is a crucial and cultural part of our city! It draws in many tourists and provides so much - venues for concerts, art exhibitions and more. Not to mention its a historic part of the city!

454 - Jude Rogers

Please, please, please support the Arts Centre! they cannot lose their Council funding and have to wind up - it would be a huge loss to the city and region. I emigrated to Aotearoa NZ in 1982 and have lived in Christchurch most of that time - and much of the rest of the time in towns where I still visited Christchurch and the Arts Centre frequently. The Arts Centre has always been one of my favourite places in Christchurch and a big part of my life here, one of the reasons I'm proud to show my visitors around. It's wonderful from the point of view of heritage and history (including post-earthquake history); arts - visual, music, theatre, dance; restaurants; community. I can't believe you're even thinking of withdrawing their funding!

456 - Lewis Tumata

I think a city that is built around is art center should get the recognition it deserves. Cutting its funding is absolutely fucked.

457 - Wendy Murray

[Strategic Direction>Have we got the balance right?]

By removing funding from the Arts Centre you do not have the balance right. This is our most important cultural asset in Christchurch. It needs to be supported by your Council. Do not abandon our treasure.

>>>

My main priority is for CCC to continue to fund the Arts Centre.

46 - Karin Lange

[Coder note: For context "Mostly. Not sure what CCCs role is wrt the stupid Cathedral rebuilt which swallows up so many hard needed funds."]

The Arts Centre however offers so so so so much more...

>>>

Please keep the Arts Centre ours. (Except the stupid as Chch Cathedral reinstatement.)

>>>

Please keep supporting the Arts, even more green recreation and the arts centre going as well.

463 - Elizabeth Wilks

This submission is to request the Christchurch City Council include the Arts Centre in funding and support in the 2024-34 Long Term District plan.

We are immensely fortunate in Christchurch to have a legacy like the Arts Centre: A large precinct of heritage buildings devoted to all forms of arts. As a city we should be supporting and encouraging the sense of community and social cohesion that develops around a vibrant arts scene.

Thanks to forward thinking by city planners, the Arts Centre is well connected to the rest of the city with aesthetically pleasing and safe pedestrianized routes. This ensures visitors and residents alike explore on foot or bike and engage with local businesses. Foot traffic helps integrate the Arts Centre into people's daily lives and ensures positive economic effects for Christchurch city. The Centre provides a destination enroute between the commercial areas, the Cathedral and other heritage buildings and the Botanic Gardens.

The Arts Centre Gothic revival buildings are unique within NZ, with superb craftsmanship and attention to detail. Unlike many purpose-built arts centres internationally, our buildings are at a human scale – they fundamentally welcome. People relax in the space and engage with each other, while enjoying a wide variety of artistic endeavours. Sensitive re-development post-earthquake has created range of spaces that feel intimate: they complement other arts spaces in Christchurch.

The Arts Centre board and staff clearly aim to provide a wide ranging suite of shows, activities and educational opportunities. Their choices are inclusive and representative of the entire Christchurch community. Engaging with all generations and social groups is a challenge the Arts Centre is rising to.

We have an impressive asset in the Arts Centre. It is important to recognize and acknowledge the contribution the Arts Centre makes to Christchurch as a liveable and progressive city. As a rate-payer, I believe part of that recognition should come in the form of committed, long term financial support from the City Council.

Elizabeth Wilks

465 - Jane Donnithorne

The Arts Centre is phenomenal, I absolutely love these Chch buildings and surrounds, so many past memories and new memories I make each day by visiting Frances Nation, and then on special occasions the Cellar Door, Lumiere, Art Openings, the various food stalls, the shops upstairs. I met my husband at the Dux, I did yoga in the dance room 40 years ago, I hired the architect's room for a leaving Chch party for 100 people, weddings, symposiums and celebrations in the Great Hall. Le Cafe was amazing, the old fancy dress shop in the basement. Every time i enter the Arts Centre I feel absolutely privileged to enjoy the atmosphere and greatness of the Arts Centre. I want my rates to go towards saving these buildings, I would lose all hope for Chch if they are lost. I'd be devastated. Would I pay? Yes I'd pay more rates to keep, I am absolutely committed to saving the magnificent Arts Centre.

466 - John Pryor

As a property professional with a specialisation in tourism and leisure assets, to cut funding to the Arts Centre is a major concern. This is one of very few attractions in ChCh and quite unique.

468 - Genevieve Bergin

Not funding the arts centre would be a shambles and reflect poorly on the council

>>>

[Strategic Direction>Community Outcomes & Strategic Priorities]

Not funding the arts centre would be a shambles and reflect poorly on the council

47 - Jamie Billings

Yes, except you need more funding for the ARTS - specifically for the Arts Centre.

>>>

Please continue the funding for the Arts Centre.

>>>

Fund the Arts Centre please.

>>>

[Transport > Cycleways]

Overall it seems fair, but Arts Centre funding and cycleways for Westmorland are missing.

470 - Nicola Allely

Support the Arts Centre.

471 - Lynette Harris-Hogan

Save the Arts Centre

>>>

Please continue funding the Arts Centre it is our home, where we meet every week to educate Christchurch folk on communication and leadership giving them confidence to contribute to the Christchurch community in so many valuable ways . THANK YOU .

473 - Don Royds

Please fund The Arts Centre. This is a crucial part of our city's identity and history and needs to have the support of CCC to ensure we can have it for the future.

476 - Catrin Jacksties

Being European I know how valuable historic buildings and their stories are. There is no question in my mind that this is worth every effort the city council in regards to funds can do.

478 - Robin Meier

Please support the Art Centre as you have been doing. I would be very concerned if the Council refrained from helping out this iconic site.

479 - Tracy McCaw

The Arts Centre and all that they are, is an integral part of our city, history and culture! Save the Arts Centre for the people of Christchurch and all of the wonderful businesses that inhabit the amazing space!

48 - Kean Mitchell

This includes things like The Art Centre. If special rates need to be implemented and ring fenced this should be done.

480 - Denise Murfitt

Please save the Arts Centre, as it is at the moment. Staff and the Board have made sensible suggestions as to how this can be done, through CCC. It means a great deal to me and my husband - we attended university there (as students from outside of Christchurch) and thus we learned to appreciate the heritage of the architecture and the function of it as a place of learning. We have remained in Chch as residents and ratepayers and value the longing aspects of its current diverse and creative programmes. Please preserve it.

483 - Narelle Gilmour

Arts centre needs funding

>>>

Support the art centre

>>>

Support the art centre, its a chch icon

>>>

Fund the arts centre. It's a chch icon

484 - Tjalling de Vries

I am saddened and surprised that the arts centre has been left off the long term plan. I think the Arts Centre is one of the most important cultural centres in Ōtautahi Christchurch for many reasons. It houses a thriving and vibrant community of arts and crafts people. It is becoming an ever more important site for Māori and Pasifika venues and dialogue. The Arts Centre also has an incredible history that is integral to the history of Ōtautahi Christchurch and something that should gain from continued support in this post earthquake city where so much heritage was lost. I sincerely hope this is reconsidered and the City council continues to fund the Arts Centre.

485 - Mike Bickers

Can funding please be included for the ongoing operation of the Arts Centre? This venue is incredibly important to Christchurch. The City should/can have a vibrant arts scene and the Arts Centre is a critical part of that infrastructure.

486 - Neil McConachie

Concerned about funding cuts for the Arts Centre

488 - Jo Wilson

I cannot believe the short sightness of zero funding for the Christchurch Art centre. This is a HUGE community asset which should be looked after and supported. It not only brings local but international revenue into the community. We need to support this centre in anyway we can. We were lucky it didnt fall victim to the Christchurch Earthquakes - we need to ensure we do all we can to be a thriving community asset for coming generations

49 - Judy Newton

Please save the Arts Centre - this is a vital heritage building and part of the heart of Christchurch. The Council must continue to support the Centre in the same way as previously, if not with more funding. I

love this building, my father studied there back in the fifties, and I have attended markets, courses, films and music events there, and proudly shown it to visitors. It is such an asset to Christchurch, from a tourist perspective and from a local perspective, and must be supported and allowed to continue to flourish. Thank you!

491 - Rhonda Skilling

As a disclaimer, I am not a rate payer and nor do I currently reside in the wonderful city of Christchurch. I was born in Christchurch and lived there a number of years. My whanau still lives there and so I visit regularly. I am disappointed to learn of the proposal to no longer provide funding to the Arts Centre. I have a number of fond memories of this cherished location. I believe the Centre is an amazing place for locals and tourists alike. The beauty of the centre, other than the fact it is a beautiful place to visit, is that there are multiple uses and so it serves those visiting well. Surely the Council can work in partnership with the Arts Centre trust to keep this taonga in the hands of the community? I, like many others who visit the centre would certainly appreciate a second look at what us possible.

495 - Kate Stutter

I wish to express my concern of the council's announcement to withdraw funding from the arts centre. Christchurch has always been the music centre of New Zealand. The Great Hall and Arts Centre plays a major role in providing a venue for the amazing young students to show their talents, whether instrumental or vocal, before a live audience. Also local groups of talented experienced musicians regularly entertain a full hall on a Monday. The wonderful art exhibitions, the University of Canterbury Music School and the cafes all contribute to a wonderful experience for locals and visitors. The much loved historic buildings are our buildings and they must be used and maintained for future generations.

5 - Dr M Peter Moore

No Failure to provide any funding towards the Arts Centre is very short sighted. It is a vital asset for the city

>>>

My impetus to submit related to the failure to support the Art Centre.

50 - Emily Phillips

The Council need to continue to support The Arts Centre. The Arts Centre is a Christchurch icon it brings a large number of tourists to our city every year and beyond that is a place for people from all around Christchurch City and the wider Canterbury region to gather. We learnt during lockdown that

the arts is what keeps people going it is incredibly short sighted of the Council to even consider pulling funding of The Arts Centre when it contributes so much to our diverse community.

>>>

The arts centre is vital to the city of Christchurch! It brings so much joy and vibrancy to the city. Christchurch needs the arts to not find the arts centre would be a crime!

501 - Dee Swadi

Continue Funding The Arts Center an iconic feature in our City

502 - Rachel Macmillan

The Arts Centre is the lost significant group of buildings in Christchurch and huge part of the culture and identity of the city. To lose its funding would be to horrible

504 - Angela Templeton

Dear Council members Please include support for the Arts Centre. It is a timeless and beautiful architectural achievement and such a pleasure to walk around, before even considering the many events and arts it provides. The Arts Centre is a unique feature of Christchurch and should be central to council planning. I'm happy to continue to give money to the Arts Centre, while hoping that CCC will also play its part. Thank you

>>>

[Libraries > Libraries (Operations)], [Parks > Parks Spending (General)]

Agree with spending on libraries and parks and similar facilities, but please don't forget the Arts Centre

505 - Laura Jones

do not think CCC should remove support from Arts Centre- it is a vital and one of the primary attractions in ChCH . we have lost too much of our heritage buildings and need to treasure this one.

506 - Conal McCarthy

I am very concerned about the affect on the arts centre of funding cuts which seems like a ludicrous step given the value, reputation and outputs of this facility.

>>>

No the social value of arts culture and heritage is not accounted for with regards funding cuts to the arts centre

>>>

Do the right thing by the arts centre, cultural capital is as deserving of funding as any other area of CCC plans.

>>>

I visited the arts centre recently which was buzzing with activities, full of tourists and locals, and boasted wonderful attractions like the Teece museum and the Hamish Kikgour exhibition in the community art gallery. Daniel Stirling and his team are doing a great job eith an asset any city should be proud of. Cutting funding to this centre with its heritage buildings appears to me, as a visitor to ChCh, a bizarre decision.

508 - Brigid Kelly

The council should be supporting the Arts Centre, as a crucial hub for local arts endeavours and an unmatched historic asset that has ever more value to our community now that the vast majority of our historic buildings are gone/

509 - Penny Griffith

YES -- please ensure funding continues for The Arts Centre, so that its mana as a national cultural centre is treasured. Although I have (sadly) left Te Waipounamu after 35 years, I travel to Christchurch at least twice a year to enjoy the cultural offerings of the city, especially the Art Gallery, The Arts Centre and the Museum (currently being redeveloped). After all the trauma of the 2011 earthquake and the patient rebuilding of these core institutions I had started to feel a renewed sense of hope. It would be a deeply saddening situation if the precious buildings of the Arts Centre were again forced to be abandoned and closed to visitors. Please continue realistic funding for The Arts Centre... or you might turn into another Wellington. Now, there's a threat. Thank you for your consideration; surely it must just be a accidental slip-up that there is no funding for The Arts Centre in your draft long term plan? ngā mihi Penny Griffith (researcher and editor)

51 - Zoe Brock

NO. Your decision to stop funding the Arts Centre is a heinous travesty and a disgusting blight on all that makes Chch wonderful and creative. Shame on you.

>>>

Again - just plain disgusted and horrified at your ineffectual decision to stop funding our Arts

>>>

You can throw in another 1.8 million for the Arts Centre. Take a pay cut.

>>>

Yes. Arts. This dumb stadium should not take away from our precious Arts Centre. SHAME ON YOU.

>>>

Fund the Arts Centre

510 - Eleanor Sim

Whilst I understand these priorities, I am concerned that it would seem that a cultural icon that is of historical, economic, social, commercial, aesthetic and cultural significance such as the Arts Centre is seemingly a low priority in the funding buckets. I understand fiscal restraint, the significant need for infrastructure improvements but to potentially give this taonga, the Arts Centre what is effectively a death knell is of significant concern.

>>>

[Art Galleries & Museums > Art Gallery (Capital)]

I would like the addition of the Places such as the Art Centre and Art Gallery added to this list. This imperative - particularly having seen the large numbers coming through such places recently when cruise ships are in port. In other cities in the world, these are the things Tourists visit. I suppose, if we have to pay admission fees for Museum and art gallery we have to.

>>>

[Strategic Direction > Have we got the balance right?], [Strategic Direction > Additional Efficiencies], [Parks > Parks Spending (General)], [Libraries (Operations)]

We MUST continue to priorities, parks, libraries and places such as the Arts Centre. The Council staff do a GREAT JOB !!!! I understand that these things cost money and money is limited. Efficiencies must be sought at all levels where possible. There must be activities/ facilities that add to the heart of a city.

511 - Noemie Clarke

Save the Arts Centre!!!

512 - Rosalind Butdon

[Planning & Strategic Transport, Urban Design, & Urban Regeneration > Heritage (Strategic)]

Not enough emphasis on culture and heritage. The Arts Centre are city features in doubt which need council help to survive . Both are the character and history of Christchurch. The soul of the city . Give heart and soul to Chch. To stop supporting the vibrant energetic much loved Arts Centre would be a travesty after so much effort has gone into revitalising it in the last ten years .

>>>

[Planning & Strategic Transport, Urban Design, & Urban Regeneration > Heritage (Strategic)], [Other/Special Interest Topics > Cathedral]

There is not enough support for culture and Heritage . Particularly the Arts Centre and the Cathedral both crucial community treasures much used and loved . The heart and soul and character of the city. Without them the city would be a sadly deprived place. History is important . So much effort has gone into ensuring the Arts Centre is a centre of energy and vitality and people. Pity to lose it .

513 - Irene Marks

I feel the Arts Centre plays a vital and essential part to play in our life in ChCh.The arts must be supported like sport is.Please keep funding this amazing place.This is a place for the future citizens as well as present.A long term view must be held

514 - Dennis Foley

More equitable funding for Art Centre

>>>

Art Centre funding inadequate.

>>>

[Strategic Directions > Have we got the balance right?]

About right apart from Art Centre funding

>>>

An iconic part of Christchurch.

515 - E Bell

Extremely disappointed to hear the arts Centre funding is proposed to be removed. This is the sort of place and programmes the council should be protecting. Placing cost burden elsewhere is short term thinking and will only result in the council footing the bill later on. I have found the Arts Centre interesting, inclusive and welcoming, as well as they have an impressively broad 'perspective'. I don't want to see the fantastic variety of courses/music disappear (and all the creativity) from the this central Christchurch Hub

516 - Carole May

[Other/Special Interest Topics > Commonwealth Games]

Please fund the Arts Centre it is only a dollar or two on the rates, forget about Commonwealth games, a silly idea!

517 - John Coulson

Keep funding for the Arts Centre. It is a heritage centre, an attraction to both domestic and international visitors, with its buildings, its history, and events of a hugely diverse range. It is very well run, no profligacy. To remove funding would be not only morally and ethically wrong, it would be false economy.

518 - Penny de Jong

I am dismayed to see no funding for the Arts Centre. This is a visitor attraction as well as a much loved venue for locals. I would hope the Council would have sufficient foresight to recognise not only the historical significance of these buildings, but also the value to the local community,

519 - Johnathan Todd

This submission is to plead you continue to support the arts centre. It is a treasure!

>>>

Please save arts centre!

52 - Greg Tuthill

As an artist I am a steadfast advocate for the cultural and artistic heartbeat of Ōtautahi Christchurch, I am reaching out to express my profound concern and unwavering support for Te Matatiki Toi Ora The Arts Centre amidst the proposed funding cuts in the Christchurch City Council's draft Long-Term Plan 2024-2034. The Arts Centre is not merely a collection of historic buildings; it is a vibrant epicenter of creativity, education, and heritage that has enriched our lives and community for generations. Since its gift to the people of Christchurch by Norman Kirk in 1973, and more so after the devastating earthquakes, The Arts Centre has symbolized our resilience and commitment to not just preserving our heritage, but also fostering a dynamic future through the arts. The proposed discontinuation of funding by the Council threatens to extinguish this beacon of culture and innovation, pushing the Trust towards insolvency and potential dissolution. This decision overlooks the profound long-term costs, both financial and cultural, that would ensue. Moreover, the assumption that ceasing funding would save money is critically flawed. Legal and transition costs, coupled with the loss of grants, donations, and sponsorships currently supporting arts programming, would impose greater financial burdens on the Council and, by extension, the ratepayers. I urge the Council to reconsider the proposed cuts and continue funding The Arts Centre, preserving this irreplaceable asset for Christchurch. Together, let us ensure that Te Matatiki Toi Ora The Arts Centre remains a cornerstone of our community's identity and vibrancy.

521 - Fern McRae

Not funding the Arts Centre and ensuring its continued existence is a blow to the cultural life of Christchurch. It brings great joy to a number and variety of citizens. Please review your decision.

522 - Richard Hindle

The Art Centre is an integral part of what make Christchurch unique, we need to save what little heritage we have in NZ little alone in Chrischurch since the Earthquake. As a rate payer, I would be more than happy to pay what's needed as my share to keep the grants going.

523 - Andrew Eadon-Jones

How about supporting a NZ iconic building complex called the Arts Centre! If you don't it will cost everybody more funding BECUSE THE ARTS CENTRE HAS AN ACT OF PARLIAMENT PROTECTING TS EXISTENCE. Spend to Save!

>>>

Surely the Arts Centre is heritage? So why not save it from going bankrupt?

>>>

You seem to have forgotten about supporting the Arts Centre. Its not to much to ask in the grand scheme of things.

>>>

Saving the Arts Centre from bankruptcy is a good idea for everybody except the lawyers maybe.

>>>

[Strategic Direction > Performance Framework]

Your existing level of service includes funding aspects of the arts centre, but thats has disappeared from the LTP... its a very iconic piece of NZ heritage thats needs public funding.

>>>

[Strategic Direction > Additional savings and efficiencies]

Save the Arts Centre from bankruptcy which would cost ratepayers a lot of money in the process. Spend to Save!

>>>

[Strategic Direction > Have we go the balance right?]

Yes. But you seem to have forgotten the Arts Centre..?

524 - Peta Glover

Please continue to provide funding to the Christchurch arts centre

525 - Bruce Bascand

Yes. My submission is all about the CCC continuing to support The Arts Centre with \$1.8 million per annum. The Arts Centre must continue as a trust. It would be a totally wrong decision for the CCC to take over The Arts Centre. For one thing - it would cost the ratepayer a lot, lot more - and that would be stupid & wasteful.

>>>

City leaders before you had a vision for The Arts Centre. I can't believe that 'you', whoever 'you' are, are prepared to throw away all that invested wisdom. Think 20 years from now. 50 years from now. You have a responsibility to not drop the baton. The Arts Centre should continue to be an independent trust. Absolutely. And the CCC must provide \$1.8 million per annum to pay for insurance and other specified overheads. It's the 'cheapest' and only option.

>>>

Your options above are cleverly limited. Of course, the CCC has to keep core business running. But continuing to support The Arts Centre with \$1.8 million p.a. is fundamental.

>>>

[Strategic Direction > Have we got the balance right?]

Your balance is not right - regarding cutting your support for the Arts Centre.

A 'no' because The Arts Centre is missing. I support spending money on water & waste infrastructure - owned by the CCC; on parks & heritage (and that definitely includes The Arts Centre; on Te Kaha; on The Court Theatre new complex; on libraries; on rubbish collection & treatment.

>>>

Include \$1.8 million for the Arts Centre.

>>>

[Transport > Cycleways (Capital)]

Too much money is being spent on bike lanes. And The Arts Centre support for \$1.8 million should continue.

526 - Stephen French

The Arts Centre is missing in the future planning budget as it must continue to receive sufficient funding from the council to enable it to continue with all its current activities. This would need the council to cover its insurance costs in addition to those items covered in the last 3-year council

budget. The Arts Centre was gifted to the city in order to provide a hub for so many community activities and to preserve its historic heritage for the city. It has nearly completed the repairs following the earthquakes and to a high standard that has attracted many tenants sufficient to appeal to visitors to the city as well as large numbers of city dwellers. I am a 'friend' for the regular Monday & Tuesday concerts in the glorious Great Hall, and my choir has often valued the acoustics that inspires glorious music. Luminaire has an excellent series of quality films and Bunsen is ever popular as a character central cafe. The shops and galleries are always worth a visit. While the Court Theatre has moved on to new premises other art specialisms have replaced them. I understand that the Arts Centre is threatened with losing its Council funding which seems totally illogical and crazy budgeting, as the inevitable result will be expensive court cases to overcome the legal status of the trust, and the unnecessary additional costs for the Council at due to its ineligibility to access funding from the current sponsors. The Arts Centre is under good management currently, so there is no need to disturb what is working well.

527 - Hans Daellenbach

[Other/Special Interest Topics > LTP Consultation]

The consultation document lacks detail. It reads more like extensive promotional material. Not a valid basis to give a judgement about balance. It remains largely silent about options and spending alternatives that were not considered or ruled out. A case in point is the renewed funding for the Arts Centre. What is the justification not to continue support for the Arts Centre Foundation that currently looks after the the centre and does an admirable job?

>>>

The Arts Centre was donated to Christchurch in recognition of its cultural and historic importance. It is currently operated by the Arts Centre Foundation. It attracts over a million visitors a year. (The events expected to use the Stadium may struggle to generate that many visitors.) It has been supported by the City Council up to this year. The new plan suddenly drops that support, citing that the facility should be self funding. The result will be that the Arts Centre Foundation will go under and having to be dissolved at huge legal costs that ultimately will fall on the new agency to run it, which is most likely to be the City Council. That new agency is unlikely to be able to generate the amount of donations, currently obtained by the Foundation. So, the Council will become liable to cover the unnecessary costs of dissolving the Foundation, and will be deprived of donation income. It is hard to understand that the Council should even contemplate such a self-defeating decision. In fact, the City Council has a binding obligation to Christchurch and to New Zealand to make sufficient contributions to the running of this unique icon to this city and to New Zealand. Any "commercial" considerations that endanger its continuance in its current form are unthinkable.

529 - Don Reekie (Parkstone Musical Appreciation Group)

[Art Galleries & Museums>Art Gallery (Capital)]

Do not diminish or cut funding to the Art Gallery or Art Centre. They are life blood services for the residents of our city.

>>>

[Strategic Directions>Community Outcomes and Strategic Priorities]

Services that ensure a quality of life and cultural and pleasure activities are important. The Arts Centre not only does this it is Iconic. For citizens and gives unique value in tourist attractiveness.

53 - John Caldwell

I feel that the Arts Centre has brought much of Christchurch together in supporting its rebuild after the earthquakes, and now that it is operational it is repaying that support by being an exciting artistic hub and part of the tourist fabric of Christchurch. It is an unqualified pleasure to have the Arts Centre represent us to visitors while being a joy to visit for its amenities, performances and its connection to our heritage. Please ensure it remains as part of the city's wonderful unique attractions, and support their ongoing funding.

531 - Cameron Bradley

Please don't cut funding to the arts centre. It is a standout attraction of Canterbury and it would be a shame to see it degrade so future citizens can't enjoy it the way we have.

532 - Chris Abbott

[Strategic Direction>Have we got the balance right?]

There is one glaring omission - there is no ongoing funding mentioned for the Arts Centre. I have 2 main gripes about this 1) the cessation of funding is not mentioned. This is unethical - I expect the CCC to mention variances from one LTP to another. 2) the proposal not to assist the Arts Centre, the should-be vibrant centre of the city, is not what I want to see as a ratepayer. Many visitors include the Arts Centre as a must-see destination when visitng Chch. With the Museum currently closed, it is even more important to keep this collection of gothic buildings open and vibrant.

>>>

The value that the Arts Centre returns is many many times the cost to ratepayers.

For the last 30 years at least The Arts Centre has been a jewel in Christchurch's crown. It has been used for many arts - active and passive - and wonderful dining experiences. It is also a mecca for both

locals and tourists. I am very much in favour of CCC being the conduit for more funding rather than less (noting that the funding is generated by ratepayers).

533 - Judith Livingstone

[Parks>Heritage (Capital)]

Heritage buildings like the Art Centre should be maintained, it was given to the city by the government just because they put it in a trust doesn't mean they forget it. If the trust goes broke then it will be handed back to the council and they will have to fund it anyway. It brings tourists to Christchurch

>>>

This is a vital piece of Christchurch history and landscape. It is a tourist destination especially with the cathedral and museum out of action.

534 - Russell Hignett

[Strategic Direction>Have we got the balance right?]

No - I am concerned with the omission of funding for the Art Center Trust. The Art Center is an icon asset of our city. It is essential we preserve it for its historic value, its architectural and hereditary value and as a working asset for our community. I attended University at this venue and have attended functions there regularly ever since.

>>>

Art Center funding should be included.

535 - Victoria Mentink

Please continue to fund the Arts Centre. This is a vital cultural precinct in our earthquake ravaged city, providing spaces for artists, groups to create, meet and perform. It's accessible for locals and visitors, providing valuable connections to our past, both architectural and educational. Without a clear, viable reason provided by the Council to omit the funding from the draft, it's difficult to understand why it has been omitted. If we don't value this unique central landmark and the people who use it, we risk losing the benefit of the extensive restoration, a world-class heritage complex in our city to private landlords, speculative investors and developers who only see the 'bottom line'.

536 - Marilyn Yurjevich

[Strategic Direction>Have we got the balance right?; Other/Special Interest Topics>Cathedral; Parks>Other; Spending>Te Kaha]

The balance is sort of reasonable, given our circumstances. HOWEVER THE ARTS CENTRE is not mentioned. It needs about \$1.5 million to keep it going. Please include that! We don't need the bells and whistles on the arena and the Anglicans, a wealthy segment, can pay more for the cathedral in the square. Please ensure there is provision for an ECO-SANCTUARY IN THE RED ZONE. Christchurch sorely needs one.

>>>

Keep the Arts Centre going!

537 - Beverley Cocks

Funding of the Arts Centre is essential. This is a New Zealand Icon and we must keep it open and operating.

538 - Ken Dowling

I am very concerned that the Arts Centre is no longer receiving funding from Council. We re-emigrated from Australia 18 months ago and very much enjoy the Arts Centre offerings especially Great Hall performances and displays. When we use our annual tram pass we note there are always tourists getting on and off at the Arts Centre stops. So it is not just residents that value the Arts Centre. Apart from the activities available at the Arts Centre, the buildings, both singly and collectively, are extremely important and highly valued by ourselves and the same is true of others we see there. The Arts Centre deserves continuance of Council support at a high level.

54 - Kelly Shrimpton

Please continue to support/fund The Arts Centre. Not only do I have wonderful memories of visiting The Arts Centre growing up (in Chch) but I continue to visit regularly when I am in town. It's a big part of why I come into Christchurch City when visiting family in Rolleston. I feel The Arts Centre is important educationally and to the arts culture of your city and our country.

541 - Zia Lilley

I believe cutting funding to the Arts Centre is incredibly short-sighted and this should be rectified. The Arts Centre is both literally and figuratively at the heart of our City - the buildings themselves and the programming should be protected.

543 - Kate Bloomer

Very disappointed to hear about the funding cuts to the Arts Centre. It's such a special place, I can remember going there for the market and jacket potatoes as a kid. My husband and I got married there, and we love going regularly to the shops, cinema and restaurants. Please keep funding the Arts Centre!

544 - Kaydi Comerford

No the arts centre must be funded

>>>

The arts centre cannot be allowed to go insolvent and must be locally funded by you on behalf of the people

>>>

As noted before I disagree wholeheartedly with not continuing funding of the arts centre it must remain a priority. I have enjoyed the centre with my family numerous times this summer and been drawn in to the city & supported local business as a result. It is a very important asset to the city and must be preserved under its current circumstances

545 - Sue Ryan

The Christchurch Arts Centre is the jewel of our city and my favourite place to spend time. Work needs to continue and the buildings need continued funding please treat these beautiful buildings and the stunning architecture with pride, love and financial assistance. The Cathedral, the Arts Centre, the museum and Christ's College are the most beautiful buildings in Christchurch. I love visiting the Arts Centre for any reason - to eat, movies, dance classes for a grandchild, sitting in the courtyard, a coffee at France's Nation and anything so I can feel the special feeling I being part of this absolutely wonderful place!!

>>>

The Christchurch Arts Centre is the jewel of our city. It is the most wonderful architecture and full of creativity inside. We deserve to have these amazing buildings fully restored and a source of beauty to both visitors and residents. The Arts Centre is very special and needs the full funding to support it. The old Student Union building also needs full support in restoring this iconic structure. We are waiting for the funding to be given immediately without any question!!! Please be generous to this very special place which I have loved all my life!!

546 - Lisa Boyce

Yes. I have been to many events in this space. Moth performance by fluer in an under ground space. Fashion in the great hall. Comedy in the grounds. Absolution pierced my daughter a long time ago.

547 - Greg Husband

Please continue to support the Art Centre. This forms an extremely important part of the city's heritage and cannot be lost. Its architecture is iconic and its multi-purpose facilities make it an incredibly useful asset to the central city. The Arts Centre is of use to a far wider sector of our city's population and visitors to the city than the Te Kaha will ever be. It has been saved from destruction once before and it's essential that it be saved again.

548 - Mark Morel

The art center is a gem to be thankful for that i believe we should be funding on a yearly basis

549 - Prue Kennard

Killing the Arts Centre would amount to killing the heart of Christchurch. It must always be supported if Chch is to remain a credible respected city.

55 - Jen Abernethy

Your proposal to NOT fund the art centre is ridiculous; this centre is one of Christchurch's Icons and the people of christchurch fought hard to save it after the earthquake. Without this centre of arts Christchurch has little of value to offer visitors to the CBD; Hagley park, a huge convention centre and fairly nice town hall and not much else. It is not a big spend in the scheme of things; this cost should NOT be the rate payers alone to bare. Funding should be redistributed from other discretionary spending or increased fees to services which are optional (library, parking, swimming etc.)

550 - Colin Mansell

[Planning & Strategic Transport, Urban Design, & Urban Regeneration > Strategic Transport], [Three Waters > Other], [Strategic Direction > Have we got the balance right?]

Not all of it. Yes the water must be safeguarded and public transport improved but you need to protect people's well-being and mental health. So fewer cars, more outdoor activities and more protection for culture, in particular the Arts Centre. Christchurch must not be turned into yet another car dominated anonymous City like Auckland or Melbourne.

551 - Louise Beer

Losing the Arts Centre would be an enormous loss to Christchurch and to the wider NZ art environment. They provide endless free exhibitions and community programmes at a time of worldwide upheaval, and climate concern. They go far beyond their paid work to make the best situation possible for local and international artists. Aotearoa will be a much poorer place without them. Please continue to fund their organisation.

552 - Victoria Samuel

I want to support the Arts Centre. The Arts Centre has always been such a special place in Christchurch - part of the original Christchurch Company design of the city. But it has become even more special since the devastating earthquakes. It was a credit to the Arts Centre that they had enough insurance cover to be able to start their repairs so quickly and get to the point that they are today. It is a part of the city that I am so proud to show overseas visitors. It's one of the top locations for tourists to visit while in the city. It embodies the history of the city. It gives the city character and personality. The Arts Centre has been so proactive with its commercial tenants and various events. But there is only so much they can do to raise money. They need help to survive. It would be terrible for the City Council to let such an important part of the city to suffer. The city should be more than just the Riverside Markets and the Margaret Mahy playground. The central city needs as much help to be vibrant. With historical buildings like the Cathedral, the Provincial Buildings and the Museum in various states of repairs/construction, it's even more important for the Arts Centre to be supported. Please support the Arts Centre.

553 - Marian Grant

The Arts Centre is one of Christchurch's iconic places. You are wanting more people coming into central Christchurch to live and enjoy. The Arts Centre offers so much to all. Please continue to fund it.

554 - Veronika Gabel

The Christchurch Art Centre is a unique and irreplaceable asset for locals and tourism. It relies on Council funding to survive, and has received this in the previous LTP. I am very concerned that this has been dropped from the current plan. Without essential funding to offset significant maintenance costs, the Art Centre will be on a path to insolvency.

556 - Jemma Penelope

I do not support ending the funding for the Arts Centre. I believe this should continue to be funded as an investment in our community, our tourism sector, and our creative sector. The Arts Centre is a critical part of Christchurch culture, heritage, and community infrastructure and its on going funding should be prioritised.

557 - Jane Goodey

The council needs to include continued funding for the Arts Centre in the Draft Long Term Plan. It is a historic gem in the heart of Christchurch, full of life, beauty, entertainment and culture. It benefits both local residents and visitors to the city. It deserves as much council support as it can get.

558 - Brigid Buckenham

Priority to the Arts Centre

>>>

Support the Arts centre financially

559 - Neville Ross

Please support the Arts Centre. This is a key feature of Christchurch which has already been restored nicely after our earthquakes. We need the council to continue to support it financially by providing operational funding. Arts activities provide a cultural vibrancy to Christchurch.

56 - James Loveridge

There shouldn't be any need to dissolve any creative funding and shifting that funding towards other elements that have been butchered time and time again by the council. Why take money out of the things that help make Christchurch what it is. Dissolving funding from creative industries in turn dissolves community.

>>>

Creative industries help communities thrive they co exist in the same eco system so these funded efforts need to be looked at together not separately. It is in creativity that community events are created.

>>>

Don't take money from the arts centre we have only gotten this beautiful space back to it's former self and it is still recovering why dissolve it so quickly and take control over it?? If the council takes over the arts centre it won't ever be the same again. This is a place that is thriving under the leadership it has currently.

560 - Sally Browning

I think the Council should continue to support the Christchurch Arts Centre. The Arts Centre is an absolute asset to Christchurch. The work that has been done to repair and update its use since the earthquakes has been magnificent and it's a joy to visit. It's usually full of visitors, both local and international, and to possibly lose this asset due to the short sightedness of the city council would be unfortunate. Funding from the council should be balanced between sport, business, and arts and culture. Looking at the LTP it seems that this is not the case.

561 - Eleanor Taffs

We should be funding the Arts Centre as needed to maintain the trust. This is a key part of Chch's civic fabric.

2787 - Jean Drage

[Other/Special Interest Topics > Cathedral, Spending > Te Kaha]

And where is the debate on this at Council which spends so much time responding to the noise around funding an obsolete cathedral, the Arts Centre and the new stadium (for example)?

562 - Sutris Winata

Please save the arts centre ; for us and for our children

564 - Lorraine North

The Arts Centre of Christchurch is an essential resource for the cultural health and well-being of our city today. It is of national and international significance as an important heritage site which showcases the excellence of our city's unique Neo-Gothic architecture and the genius of founding architect Benjamin Woolcroft Mountfort. The site has been an anchor for the identity of not only Christchurch but the whole of Canterbury, originally built as Canterbury College in the 1870s. Later it became the University of Canterbury, an institution which is associated with luminaries on the world stage such as Ernest Rutherford, Kate Shepherd, Apirana Ngata, James Hay, Karl Popper and Ngaio Marsh to name but a few. As The Arts Centre of Christchurch one of its first directors was international opera singer Christopher Doig. Dedicated local professionals fought long and hard in the 1970s to secure the status of charitable trust for The Arts Centre of Christchurch to enable the historic site to not only be preserved but owned by the people of Christchurch. I spent six wonderful years as Events and Promotions Manager from 1989 to 1995, securing funding and producing hundreds of public arts events, most of them free. My work was defined by the trust's mission statement which at that time was that the Arts Centre of Christchurch must serve "the artistic, cultural and educational needs" of the whole community. This is a role the Arts Centre has undertaken very successfully, developing and expanding it over many decades, but in order to continue serving the widest possible public in this way it is essential it retain core funding from the Christchurch City Council. The Arts Centre has

achieved an admirable degree of commercial success and has attracted significant funding from donations and grants, but to survive as an essential historic, cultural and community resource which has been known, loved and utilised by millions of New Zealanders over the past fifty years the Christchurch City Council must continue to support it. The council must not strike \$1.5m from the Arts Centre's budget.

>>>

The Arts Centre of Christchurch

The following supports my opinion about the importance of retaining enough funding from the Christchurch City Council to ensure the Arts Centre of Christchurch continues to be a community-based asset administered by a charitable trust. It is the largest heritage site in the country and I came to know it very well after working there for six years, as the first Manager of Events and Promotions (1989 to 1995) and living there for two years.

Preservation of this site was by no means assured when the old university moved out in the early 1970s. It was hard-won and, I would argue, it serves us well as a reminder of past great achievements for Maori as well as non-Maori. Its preservation has bestowed upon us a unique community resource which exists primarily to enrich our lives and benefit Christchurch residents today, whatever our origins.

It is relevant to point out that its characteristic neo-gothic style of architecture, which was revived by the Victorians, heralded the beginning of a new social order which eventually led to greater freedoms for working people. After the Black Death decimated the population of Europe in the 14th Century labour was in short supply, especially skilled labour. A consequence of this was that stone masons who worked on the massive stone cathedrals or castles could no longer be owned by their bishops or lords and paid a pittance. Instead they were able to bargain for their rates of pay, move and work wherever and for whomever they chose, and set many of their own conditions. They protected the quality of their craftsmanship by organising themselves into guilds and were free to express themselves creatively by carving their own designs (sometimes including a caricature of an unpopular figure) into the requisite ornamental features of the style (which usually also had a practical purpose, such as gargoyles for drainage etc).

The revival of the gothic style of architecture by the Victorians and adopted by our city fathers symbolised a revival of progressive principles based on freedom and creativity. It embodied an idealism represented in the architecture by the great spires reaching heavenwards, striving towards higher things, urging us to be the best we could possibly be as flawed human beings in this temporal world full of imperfections.

After the major earthquake of February 22 2011 I worked hard, alongside many other heritage advocates, in a committed effort to save as many heritage buildings as we could. We did not save many. We were members of the ICONIC group and met weekly, led by university lecturer Dr Ian Lochhead, world expert in Gothic Revival architecture and author of highly acclaimed "City of Spires" which many experts regard as the definitive book about Gothic Revival architecture in Christchurch. For Dr Lochhead the destruction of so much of our early architectural heritage was devastating. After

many years of effort, he had almost succeeded in having part of central Christchurch, particularly the Worcester Street stretch from cathedral to museum, recognised as a United Nations World Heritage Site. This was on the basis of the character of our unique stone heritage buildings along Worcester Boulevard, most of which were designed by or had significant input from Benjamin Woolfield Mountfort. The most significant collection of these was the Arts Centre site.

As architect to the province (1857 to 1875) B.W Mountfort was responsible for many of the notable 19th Century buildings which gave our city its special character. This included his supervising the construction of Gilbert Scott's Christchurch Cathedral. He designed the Canterbury Provincial Chambers (a magnificent and internationally unique "miniature show-piece" of Gothic Revival architectural features), the museum, and key buildings of the Canterbury College site which was to become the university and which is now the Arts Centre of Christchurch .

Such buildings reflected the humanist idealism of Canterbury's founder, John Robert Godley. Some of our most significant Gothic Revival architecture was intended to serve the material, and it could be argued, the moral purpose of our fledgling religious, justice, education, health and democratic local government systems. These were to be the foundation blocks for the building of a new world, one more inclusive and socially progressive than the old one which our city founders and early settlers had left behind in England.

Godley's departure from New Zealand in 1852 was regretted by many in the new colony. He was highly regarded as a man of principle and quite exceptional for his day. Among the many gifts he received prior to his departure was a symbolic taonga pounamu which was bestowed upon him by an unknown Ngai Tahu rangatira. There is every indication, according to local art historian, Ken Hall, that John Robert Godley was "on honourable terms with local Maori". Their relationship appeared to be based on mutual respect.

From 1989 to 1995 I was employed by the Arts Centre of Christchurch as Events and Promotions Manager. It was the most enjoyable position I held between graduating from Canterbury University and starting my own business. Several years prior to that I had been employed for eighteen months in the Promotions Department at the Court Theatre and , apart from also being immensely enjoyable, this position had provided me with some insight into the way the Arts Centre worked, something I found invaluable later in my new role.

In those six years I came to know the Arts Centre very well: its physical lay-out, its history, its tenants (who varied from those involved in teaching or presenting the arts professionally, to small business owners or weekend market stall holders) and its appeal to the public who passed through the site daily in steady and sometimes great numbers. They were there to attend classes, have a meal, enjoy a music or theatre performance, shop at the craft studios, visit the market and the international food fair, or just sit on the grass and soak up the atmosphere. I produced many free outdoor events in the weekends and on public holidays.

It was a shock for me to learn that at least half of the site (possibly more), after the university had moved out, could have been demolished and replaced with a car park or who knows what. It was only thanks to the vision and years of hard work by Christchurch's civic and cultural leaders (galvanised by Malcolm Douglass and including David Caygill) that eventually in 1974 the Arts Centre of Christchurch

was secured as an entity and could start its journey towards becoming a Charitable Trust. Its main mission as a trust was to contribute to the development of the artistic, cultural and educational life of the whole community. This was the challenge presented to me as the new Events and Promotions Manager. With my background experience in the arts and education it was an ideal job, one which had me brimming over with ideas, and I soon learned how to budget and raise money for special events.

It was a very intense time for me and I loved (almost) every minute of it. For six years I was hardly ever anywhere else. Managing the arts events I was producing kept me on site most of the time, and for two of those six years I lived in one of the spacious upstairs Arts Centre apartments overlooking the Botanic Gardens (it was previously a cork-tiled ballet studio). I even heard the thumping and banging upstairs attributed to the resident ghost - at that time apparently occupying the Free Theatre (or perhaps it was just a stage pack-in taking place in the small hours... I don't suppose I will ever know).

On the basis of my personal experience and background knowledge of the Arts Centre's history and current use as a community-based arts, cultural and heritage asset I would argue that it would be very short-sighted of the Christchurch City Council not to continue funding it to the current level so it can retain its charitable status and supplement its commercial income with grants and donations. The Arts Centre of Christchurch is an active and vibrant site with a strong purpose and positive identity looking towards the future. It is at the heart of not only our city's but our region's unique identity, past and present. Secondly, in its original role as Canterbury College, and later as the University of Canterbury, the site has always been a focus for the pursuit of knowledge and will always be associated with innovative, progressive, and tolerant values.

It is where Ernest Rutherford, a farmer's son from Nelson, started unconventional experiments in his "den" while a student (1890-1894). These, the legacy of an open attitude to the scientific imagination espoused by his controversial mentor Professor Bickerton, eventually led to his being awarded the Noble Prize for research into the chemical nature of radioactivity in 1908.

It is where Helen Connon became the first Australasian woman student to be admitted to degree classes on an equal basis with men. In 1881 she became the first woman honours graduate in the British Empire and the first, much admired principal of Christchurch Girls' High School, inspiring her girls to seek higher education and a life beyond the limited roles ascribed to the women of her day. It is where Apirana Ngata gained three degrees to make him not only the first Maori scholar in New Zealand to complete a university degree but one of the few students of any race to be so well-qualified. He graduated with a B.A in 1894; an LL.B in 1897 and MA in 1921, later working as a member of parliament for thirty-eight years, many of them as Minister of Native Affairs where he worked tirelessly on portfolios of Maori land development, culture, education and sport. He was remembered by his fellow students at college for his beautiful waiata. He worked throughout his life to promote training in Maori craft and preserve te reo. Sir Apirana Ngata was honoured for his services to the Maori people and has been described by historian Glyn Strange as a "truly bicultural figure ... [who] became one of the founders of our modern nation".

It is where multi-talented Ngaio Marsh attended Art School (1914 -1919) and became a member of the breakaway modernist art movement known as "The Group". New ideas were revolutionising the fine arts, and Christchurch, far from being parochial, engaged in the same debate about the changing role of art - and women - in the 20th Century that was taking place internationally. At a time when

independent women were rare she was able to earn her own living as a young woman writing for local papers. She travelled to England to pursue her love of theatre and develop her writing skills, and by the time she returned to Christchurch in the late 1930s, she had become a novelist of international celebrity. Ten years later she was recognised as an acclaimed director, her work at the university heralding in a “golden age of New Zealand theatre”. This role was further developed several decades later by her protegee, Elric Hooper, in his work as Artistic Director of the Court Theatre.

Some of Ngaio Marsh’s literary contemporaries at the University of Canterbury in the 1930s and 1940s were James K Baxter, Denis Glover (who set up Caxton Press), A.R.D.Fairburn, Robyn Hyde , R.A.K Mason and Frank Sargeson to name just a few. They wanted to renew the way English was taught and contributed to a radical magazine entitled “Tomorrow”, “which encouraged freedom of thought and expression and provided a platform for “new” New Zealand writers’ (Glyn Strange ‘The Arts Centre Then and Now” p 82).

The presence of Maori culture on site which began with Apirana Ngata’s admired waiata almost a century earlier was continued with the establishment of Riki Manuel’s Maori Carving Centre as one of the Arts Centre’s earliest tenants in the 1980s. His studio and shop formed a central location for making and selling pieces of high quality Maori craft, carved in wood or pounamu by a master craftsman and his apprentices. Riki was keen to pass on his skills to young carvers and willing to share the working of his studio with visitors. Restored as the Arts Centre of Christchurch, the site that was originally Canterbury College continued to further the development of Maori arts and culture and promote awareness of these in the wider community.

In response to a request from the award-winning Brennan family, performances of traditional haka and dance were also presented regularly on a professional basis as part of the outdoor summer programme at the Arts Centre. They provided outdoor performances in the North Quad during summer, and were at the core of Waitangi Day celebrations which I produced in consultation with them.

The Arts Centre established a multi-cultural identity and provided meeting and teaching spaces, rehearsal rooms, and public performance opportunities for many nationalities. The Pacific Island arts community were active on site and for much of my time at the Arts Centre had a permanent presence on site as Pacific Underground, the fledgling theatre group established by a young Oscar Kightley. His first play, “Fresh off the Boat” directed by Nathaniel Lees, premiered at the Rolleston Theatre (later the Free Theatre), in November 1993.

Sometime later Lees played the leading role in “Othello” directed by New Zealand playwright Mervyn Thompson, who was also a guest director and playwright at The Court Theatre, enriching the Court Theatre’s more traditional programme under Elric Hooper with New Zealand plays of his own such as “Coaltown Blues” and “Songs to Uncle Scrim”. I remember a young Jim Moriarty honing his acting skills at the Court Theatre, going on to mentor young Maori who aspired to a future in acting. Classical singers such as Teddy Tahu Rhodes and Jonathan Lemalu graced the stage of the Great Hall for many a Friday lunchtime concert, the series that international opera singer, Christopher Doig, had re-invigorated during his energetic years there as director. Geoff Ellis had just been appointed Director when I started in 1989 and he made many courageous and far-sighted innovations which secured the future of the Arts Centre, not least of which was to prioritise attracting enough funds for

the effective earthquake strengthening which was later to save much of the site.

An annual Artist- in- Residence Award was established in the early 1990s enabling one artist a year to enjoy free accommodation and studio space (above Annie's Wine Bar) in addition to a modest but useful stipend and an exhibition at the end of his/her tenure on site at the Centre Gallery hosted and promoted by the Arts Centre.

My experience of the Arts Centre was as a beautiful site where the heritage architecture of the old university had been transformed, by insightful city leaders establishing it as a charitable trust , into a very special meeting place which belongs to the whole community.

The Arts Centre of Christchurch is today an iconic and well-established destination in the central city. It is utilised and loved by local people ,as well as visitors ,as a place where people representing many different backgrounds, interests and ideas are welcomed. They are encouraged to enjoy the hospitality of the site which makes it easy for them to communicate with their peers, professionals and the public. The Christchurch City Council must ensure the charitable status and public ownership of the Arts Centre of Christchurch is retained for the benefit of current and future generations.

565 - Rae James

The Council must include annual, ongoing and substantial funding for the Arts Centre of Christchurch.

>>>

I am horrified that the Draft Long-Term Plan does not include annual, ongoing and substantial funding for the further restoration and continued operations of the Arts Centre of Christchurch. This is an ill-informed and short-sighted omission that must be corrected.

567 - Sarita MacGregor

Really want to make sure that the Art Centre is maintained and kept for future generations. It's a gem. It needs some funding from all of us to make that happen. I'm happy for some of my rates to go to this. Please.

568 - Erin Oakley

I think the council must continue to support the Christchurch Arts Center. At least to cover the cost of insurance annually. It is such an attraction. And our city has lost so many heritage buildings because of the earthquakes that we must do all that we can to keep/maintain the remaining ones. Thank you.

57 - Alison Tait

I am appalled to hear that you are no longer going to fund the Arts Centre. I simply cannot understand how such important buildings are not part of the plan. They are a focal point for both the local community and for visitors to the City. Such a decision reflects very poorly on this Council. You will go down in the annals of infamy and deservedly so. Your lack of understanding of what sets this City apart is incomprehensible but it is deeply upsetting that you do not consider you have a role in preserving some of the most of important buildings not just in Christchurch but in NZ not just as buildings but as a focus for artistic talent.

570 - Greg Partridge

No. You've pulled funding from the Christchurch Arts Centre, an historical and cultural site which is not only beloved by Christchurch residents and visitors to our city, but also economically beneficial for Christchurch. In addition to that our Mayor, Phil Mauer, committed to ensuring that the Dux De Lux would reopen and operate under its former management. That hasn't happened.

<https://www.stuff.co.nz/national/129671313/bid-to-restore-famous-dux-de-lux-pub-not-over-yet-after-shortsighted-rejection>

>>>

The Christchurch Arts Centre: Speaking of long-term value, the Council should be providing funding to the Christchurch Arts Centre. It is a significant asset to Christchurch, a major tourist attraction which benefits the city in terms of economic gain as well as the arts. It is an institution of enormous historical value which is much loved by the city and those that visit it. It should therefore be the beneficiary of much greater financial support from the Council.

>>>

The Council should allocate more funding to the Christchurch Arts Centre, given its historical and economic significance as a major tourist attraction.

>>>

The Council should allocate more funding to the Christchurch Arts Centre, given its historical and economic significance as a major tourist attraction.

572 - Brian Nelson

Spending needs to be allocated for the running and maintenance, and Insurance, of the Arts Centre.

>>>

Funding for the continued operation of the Art Center must be included in the LTP.

573 - Rebecca Dean

I also think the council needs to continue funding the Arts Centre. Based on what I've read, this shortfall will mean higher costs in the future (if the Arts Centre goes insolvent, then the council will end up facing all the same costs without the grant funding currently in place). The Arts Centre is at the heart of the city and needs to be supported. It would be awful if the precinct ended up like the old Dux De Lux. So: more funding for more projects please.

Please include the Arts Centre in your planning!

576 - Joanne Knight

Save the Arts Centre - this is an iconic part of Christchurch that survived the earthquakes and now is a highlight of this city. Support the day to day running of the home of Ōtautahi arts community for now and generations to come.

577 - Donna Tse

Arts Centre is the soul of the city. Maintain the funding to allow the communities to come together; massive drawcard for national and international visitors

>>>

Keep funding alive for Arts Centre

>>>

Keep funding the Arts Centre. Essential heart and soul of Christchurch along side the Botanical Garden.

578 - Susanne Trim

The area I wish to focus on is CCC support for The Arts Centre. It is an integral part of Christchurch and its history. It requires support (financial) to the tune of \$1.8million per annum.

>>>

The heritage component of the budget needs to include \$1.8million per annum for the Arts Centre; a real omission in the draft LTP.

58 - Kate Stevens West

I admire your arts centre so much, it's such vibrant and important part of Christchurch. A real jewel in the crown I hope you can reconsider your funding of their operations.

>>>

Funding the arts is so important for tourism as well as the life of Christchurch residents. The heritage aspect of the arts centre is such a draw card hard to imagine you would stop funding their operations.

582 - Prunella Harris

I think it's tremendously important to fund the Arts Centre with at least as much funding as it has always been given. It's an asset for our city and has been well run up until now. Don't rock the boat as it were. It needs that money and it's an absolute investment. On the other side I'd like encouragement to have the stalls and Dux de Lux brought back there. We KNOW that Dux is successful so I believe the Council needs to work with the current Arts Centre to come up with a plan to allow it to restart there, rather than trying a different venue there.

583 - Rochelle Suddens

Funding the Arts Centre is important, it is a essential part of Christchurch's identity

>>>

Fund the Arts Centre

584 - Claire McCallum

Please save the Arts Centre. My dance class Retro Gym Club happens there and the space fits the vibe and is affordable for all. It's such a home for Cabtabrians. It is ours.

586 - Harriet Maher

I would like the council to support the Arts Centre. As an integral part of our city's heritage landscape and history, the Arts Centre is indispensable for both locals and tourists alike. I grew up spending time in the Arts Centre daily, as a student of the Southern Ballet school, and have vivid memories of the incredible studios and theatre, as well as the lovely weekend food market, Fudge Cottage and other

cafes. I have attended a friend's wedding there, and most recently took my daughter to her first ever live performance in the Cloisters Theatre, a real full-circle moment for me. It is imperative that the Arts Centre continues to be funded in order to remain a stalwart of arts and culture in the city for generations to come.

587 - Diana Holderness

Please continue to look after the Arts Centre.

588 - Ariana Winikerei

[Strategic Direction > Community Outcomes and Strategic Priorities]

Most my whole life I have lived in Christchurch and as long as I have The Art Centre has played a fundamental role in our city's culture. It is a place of community, creativity, education and expression. It was a healing tool for Christchurch city post earthquakes and if you lived here through during that time, you'll know firsthand how Art played a massive role in rejuvenating the city. It's more than an Art Centre and deserves the councils continued support. Please don't stop funding a fundamental part of our city's culture. If "a cultural powerhouse city" is what you want the Arts Centre needs to stay.

589 - Frances Tennent-Brown

We must support the Arts Centre, at a minimum paying its annual insurance. It has been the cultural heart of the city for decades, frequently visited by locals and tourists. Let's make it the vibrant centre that it was pre-earthquakes, especially as the restoration so far has been brilliant

59 - Heather McVicar

Absolute necessity that Council continues to fund the Arts Centre at least at the level of last year. The 'Jewel in The Crown' of Christchurch is dearly loved, enjoyed and appreciated by residents, and visitors alike. Unique in this country and so lovingly and meticulously restored post quake the centre must be supported and cherished by one and all. To deny funding is to deny us all of culture, history and resilience .

591 - Julie Riley

I would like you to fund the Arts Centre yearly as you have been doing. I was the wife of the first Director of the Arts Centre. I understand the full value of the centre to the people of Christchurch more than most. The rich heritage of the buildings and the cultural input for our citizens is priceless. Please continue funding.

592 - Cindy Bolderston

Please continue to fund the Art Centre

>>>

And hopefully some of the Heritage \$ will continue to fund the Art Centre

>>>

Yes, but to create a vibrant city, we need tourism, and even as it currently stands in its incomplete earthquake repaired state, the Arts Centre should be left to be managed as it currently is. To withdraw the funding (which is minimal, compared to some of the spending which has gone on) would be a huge step backwards.

593 - David Holderness

This is a submission in support of continued Council funding for the Arts Centre. I submit for the following reasons that Council funding should most definitely continue at the same level as in the previous year:

1. The Arts Centre, comprising an entire block of heritage buildings, is unique in New Zealand and is without doubt one of Christchurch's most important assets. It is of great importance to a very large number of Christchurch citizens and also residents of the wider Canterbury region. The proximity of the Arts Centre to the City centre, to the Botanical Gardens and Hagley Park will ensure that it remains a priceless attraction not only to locals but also the large number of overseas tourists and visitors to the city from elsewhere in New Zealand.
2. It would be a tragedy for Christchurch if the Arts Centre languished through a lack of funding particularly in view of the meticulous repairs carried out after the earthquakes.
3. The Arts Centre is also a most important part of the history of Christchurch. It is of course where Canterbury University was established and continued to be based for many years. More recently it has been home to numerous popular venues and activities such as the Teece Museum of classical antiquities.
4. Surely continued Arts Centre funding, at the existing level, is every bit as important for the City as the funding, for example, of further cycle lanes around the city (sufficient already) and some of the annual events in Hagley Park and elsewhere which receive Council funding.

>>>

The Arts Centre is one Christchurch's most outstanding and important assets. It is of major importance to the city and is greatly admired by citizens, visitors from elsewhere in New Zealand and overseas tourists.

The wonderful condition of the historic buildings is the result of dedicated and successful restoration work carried out over a number of years following the earthquakes.

It would be a tragedy for Christchurch, the wider Canterbury area and New Zealand if the future of the Arts Centre was compromised by a lack of continued City Council funding which, I submit, should be at the very least at the same level as it has been in recent years.

594 - Folina Vili

The Arts Centre should continue to be funded by the council. The Arts Centre trust and all its employees have been doing a brilliant job of reinvigorating the area and engendering a genuine and harmonious sense of community spirit. Without council funding the trust would have to dissolve. I don't believe that any other group (council included) would be able to achieve or maintain the wonderful work the trust has been doing. It would be such a shame to end council funding now after all the wonderful mahi that has been done. The Arts Centre Trust is run by people who have a real passion for the arts and for preserving the integrity of the precinct. I believe the council should continue to support this by continuing the funding of The Arts Centre.

595 - jeffery Thackwell

What about the Arts Centre

>>>

[Spending > Te Kaha]

I wish that the grant that the council gives to the Arts Centre continues. I attend the lunch time concerts held in the great hall. I also visit the art center frequently. To allow the trust which runs the Arts Centre to go bankrupt makes no sense for anyone, especially the council. Which will have to step in and run the Arts Centre its self. I see large amounts of money being spent on sporting facility's which I will never use. Such as the new stadium. There has to be some balance. Not everyone is interested in sport. What about other cultural activity's, which the Arts Centre promotes.

596 - Julieanne Eason

Please fund The Arts Centre! We need a thriving Arts Hub in Christchurch, and the Arts centre is it!

598 - Winsome Brown

Every time I walk through the archway from Worcester St, or up any of the stone steps to various Arts Centre buildings, I look at where they are worn down from the countless number of feet that have gone before. There is so much history within the walls, so many stories told and untold, so many

stories yet to eventuate. But they will never see the light of day if the funding disappears. Life needs art and beauty and creativity in it to make it worthwhile, to stop it being at best, merely utilitarian and at worst, Orwellian. Don't be the people who will be remembered for letting this taonga go.

599 - Tim Harding

I would like Council to continue to support the Arts Centre and not withdraw funding. The Christchurch Arts Centre Trust are doing a good job of promoting the arts, culture and education as well as refurbishing the historic buildings. I enjoy going to various music concerts at the Great Hall and the UC Music Centre. I have also enjoyed the Sculpture festivals and recently the Off Centre Arts festival weekend.

60 - Debbie Hicks

You need to keep supporting our Arts Centre.

>>>

Why Council's proposal will cost ratepayers more The Arts Centre has always had Council support. No arts centre this size, especially in heritage buildings, can survive without public funding. Insuring, maintaining, and operating an entire city block of heritage buildings costs money. Without Council support, The Christchurch Arts Centre Trust will be heading towards insolvency. It will have to wind up once the current Council funding runs out on 30 June. The process for dissolving the trust is complicated, and could take years, with hefty legal fees. Because The Arts Centre is owned by a citizens' Trust and governed by an Act of Parliament; it's likely the High Court will have to rule on who should get the assets – most likely the Christchurch City Council. So, Council as the new owner will bear the costs of the legal wrangling. After that, the costs of running The Arts Centre will fall on the Council: insurance, rates, maintenance, and the legally required focus on the arts, culture, education, and creativity. Most of these activities are currently funded through sponsorship, donations, and volunteer hours – which the Council wouldn't receive. The ratepayer will pick up the bill.

600 - Nurashah Binte Abdullah

I hope that the Council can revisit its earlier decision and #savetheartscentre. As an art therapist, I have used the Maker Workshop twice in the main building in late 2023. Recently in January 2024, I set up my therapy space at the Registry Building. I started seeing clients in-person there since February 2024 and all of them have commented on how lovely the space is. I made it very cosy, aligning it with the ambience and vibes that the Registry Building gives, along with the rest of the buildings in the Arts Centre. My clients and I feel very comfortable and I must say that I am privileged to soak in the historical vibes that exudes in every corner, every brick of that building. I encourage my clients to take a look around at what the Arts Centre can offer. Even if they just sit there to enjoy in the moment, it can add on to the healing that they need. I hope the Council can revisit the plans and #savetheartscentre because more than just a historical place, it can be a place where hope and

healing can take place for the community. Please, please do reconsider. The space is really for everyone and it has so much intangible benefits to offer that will impact generations to come.

602 - Isabelle Guitard

I am making a submission to specifically ask the Council to increase its support to Te Matatiki Toi Ora The Arts Centre, which is facing almost certain insolvency due to exponential, exorbitant insurance costs. The Arts Centre is a central building and institution in Christchurch's cultural and historical landscape, and we cannot afford to lose it and its cultural programming. In my job, I frequently welcome tourists in Christchurch and it is the first place I send them to, for them to understand and admire the city. I have attended countless events there with friends and family, and I cannot conceive of Christchurch without it. The city would be culturally so much poorer. I urge you to consider supporting this capital institution to the level that it needs to survive.

603 - James Mehigan

[Strategic Direction>Additional savings and efficiencies]

[Libraries>Libraries (Capital)]

I am disappointed to see that CCC is considering de-funding the Arts Centre. This would force the Centre to close and be a great loss to the city. It seems especially strange when you consider that once the centre dissolves, the trust that runs the centre will have its assets redistributed. This will mean that CCC will have the same problems the trust has now (high insurance and other costs), but lose the experience and capacity of the trust. This seems like a lose-lose for CCC and the inhabitants of the city. I would urge you to reconsider this short-sighted policy. You could save more money by cancelling the South Library re-build and keeping that library going through steady maintenance of the building, for example. No doubt there are other ways to manage our valuable cultural resources. Thank you for taking the time to consider this proposal.

604 - Shona Cole

We need to at the least maintain the current funding of the Arts Centre. This is a vibrant central city setting with a rich history that provides an alternative to the newly constructed Oxford Terrace precinct, in a calmer and more reflective setting. The arts centre compliments the botanical gardens perfectly.

605 - Peter Beck

I believe you should reinstate the annual grant to the Arts Centre. Omitting it altogether from the LTP has led to a furor in the media and online with some wild and inaccurate opinion from some who approve of this cut, rather than focusing on the essential purpose of the Arts Centre, and the responsibility of the City Council to maintain and develop it for the citizens of Christchurch. By Act of

Parliament its purpose is 'to foster and promote arts, culture and creativity'. It is a councillor's job to ensure for the citizens of Christchurch 'a healthy environment, thriving families and business, safe places for all and a culture that supports every individual's sense of belonging'. The Arts Centre is a jewel in the heart of our city and is an essential part of the cultural spine leading from the cathedral to the museum. There is a sense of being and presence in the Arts Centre, if you like - its spirit, which at its best defines the activity which goes on and is fostered there. Its purpose is to celebrate our 'humanness' - what it means to be human through the creative expression of the arts. So all that happens in and through the Arts Centre community of people who enable and offer the shops and stalls and cinema, food outlets and stalls, display and craft making, exhibitions, celebration of history and story, creative use of its spaces for celebration, study, debate, performance, events and much more - all of this is in order to express the Centre's very essence, its *raison d'être*, its spirit, its soul, to be for our city a beating heart of artistic celebration and challenge. I fully agree with the following quotation: 'A great mystic of the 14th century, Mother Julian of Norwich, encouraged us to 'put your mind into your heart and stand in the presence of God all day'. We would put it differently now. This not so much about religious belief [though it is!] but rather about what it means to be fully human. People of all faiths and none, which is all human beings, at their best and even at their worst hunger for meaning, value and purpose. That in its essence is what the Arts Centre is, not only in what it does but also its very sense of presence, where the heart and mind of our city and its people come together.' I could go on and talk about the significance of the Art Centre to the visitors to our city, and the economic benefits we reap as a region. But most of all this highly successful restoration of this unique gothic complex is a matter of pride for us all, a treasure to be savoured, sustained and to be nourished. You councillors have some tough decisions to make about our infrastructure, levels of service and much more. Please do not neglect your responsibility to care for what is an essential part of the heart and soul of our city. Please restore the grant for Arts Centre for the period of this LTP.

606 - Hongyu Lu

Please continue to fund the Arts Centre!

609 - Jocelyn Farquhar

The Arts Centre is a wonderful space that showcases the power of creativity and art in our lives. It has supported many people and businesses from diverse sectors and serves as a hub for innovation and collaboration. The regeneration of Christchurch is closely tied to the heritage, arts, and creativity fostered by The Arts Centre. By preserving its history and embracing new forms of expression, this institution plays a vital role in shaping the cultural landscape of the city. Moreover, The Arts Centre serves as a beacon of community spirit, bringing together individuals from diverse backgrounds such as ethnic, creative, religious, and neighborhood communities. It is heartwarming to see how this space unites people through shared experiences and artistic endeavors.

61 - Tim Hamblin

The Arts Centre isn't just about art; it's an economic driver, a community hub, and a symbol of our city's resilience. Keeping it open means preserving jobs, supporting local businesses, and maintaining a vibrant cultural scene. Let's invest in our future by protecting this essential institution.

610 - Charlotte Borra

I would like the Council to continue support for the Arts Centre. The Arts Centre is a beautiful building and such a lovely place with multiple purposes, shopping, learning, entertainment, food. The Arts Centre runs some fabulous events which I have been proud to participate in and show off to friends and family visiting the city. The Arts Centre is very important for fostering art and creativity in the city. While not directly involved in the Arts Centre, I do enjoy going there often and I would like it to continue with its current support level from Council. It adds to the vibrancy of the city centre, and it would not be the same without it.

612 - Annette Mauger

Cutting funding for the Arts Centre is disgusting. This is supposedly a tourist attraction in the city. The decision to not allow the original Dux de Lux owner to invest in reopening the Dux at the Arts Centre is again, disgusting. I realise the Arts Centre is run by a trust, but the CCC has sway and is ultimately responsible for this and has the power to make the Dux rise again so the Arts Centre thrive. Once again, perhaps not flashy or trendy enough for the CCC.

>>>

It's a treasure for Christchurch and reinstate the Dux

613 - Jenny Lee

Without the Arts and centres to support them, people lose their humanity and levelling. In Christchurch the Arts Centre has been vital for the life of the city in positive ways since its opening in the late 19th Century. It needs to remain a thriving hub for its citizens.

>>>

To me the Arts are extremely important

616 - John Owens

Support the arts and culture. Ensure funding for The Arts Centre, a centre for the entire community that is visited by hundreds of people everyday.

618 - Natalie Dixon

Fund the Arts Centre.

62 - Kirsten Disse

The council should support the Arts Center - it is a precious taonga which should be preserved for community use

621 - Sophie Morton

Please fund the Arts Centre

626 - Merissa Foryani

Fund the Arts Centre! It's an incredibly important part of our Christchurch heritage and arts scene.

627 - Alex Lewis

Removing funding for the Christchurch Arts Centre will severely damage our ability to conserve Christchurch's heritage and continue to attract tourism. We are the second biggest city in New Zealand and one of our biggest drawcard is the gothic architecture of the Arts Centre and Museum complex. Without adequate funding, especially given the current closure of the museum, there will be less ability to support the continued functioning of one of our most significant cultural centres, and one of the most recognisable features of central Christchurch

>>>

There needs to be an inclusion of continued support to the Arts Centre

628 - Kim Wright

Make sure you fund the arts centre. It is so important for residents and visitors alike

629 - Chin Abey

Please continue to fund the arts centre.

63 - Jean Lindo

Need to keep funding the arts centre

>>>

Must maintain funding for the Arts Centre

>>>

Must keep funding the Arts Centre

630 - Kate Cater

I think the Council is generally doing well but will be appalled if funding is not restored to the Arts Centre. We moved here in 2020 from boring Tauranga in large part because we love the flavour and atmosphere of this lovely city and many people are clearly doing the same. But it is the Arts Centre and other beautiful old buildings that make Christchurch so special otherwise it would just be like every other boring city although the new parts are being spectacularly done here I think, places like the Riverside Market. These old buildings can never be replaced, they must be preserved for not just our enjoyment but that of future generations. We would much rather have an Arts Centre than a stadium!

632 - Juliet Reynolds-Midgley

I have concerns upon hearing that The Arts Centre will lose funding. The Arts Centre provides a place for the community to gather, a multipurpose venue for the arts to flourish and is one of the only spaces of its kind that remains following the Christchurch Earthquakes.

>>>

As I have mentioned The Arts Centre is both a heritage site, a venue for community to gather and a place to foster the arts. I feel strongly that my rates should go in part towards this very special part of our city.

633 - Susan Cambridge

Please include funding for the Christchurch Arts Centre. The Trust has done an amazing job with the restoration of the beautiful heritage buildings and made it a space for performance, events and the arts. The city needs this space to come together, promote and celebrate art and culture.

634 - Caitlyn Due

It is a pivotal part of chch community and culture. People travel to chch to visit these sites

637 - Bernice Swain

[Other/Special Interest Topics > Vertical Capital]

Generally I agree with the priorities, however in relation to Heritage I would like to see funds allocated to The Arts Centre over the Provincial Chambers. Who uses the Provincial Chambers? I can't recall every having visited them. The Arts Centre buildings are of much more significance to many more Christchurch people. I think you need to revisit this decision.

>>>

See my previous comments about The Arts Centre. This is a significant Heritage site which is the city council is responsible for maintaining.

>>>

I can't believe that the council is even thinking of not funding The Arts Centre. The Arts Centre is a taonga in our city and the activities that occur there enrich the lives of many Christchurch people.

I value The Arts Centre a lot more than the cathedral in the square - the restoration of which I am being made to pay for via my rates. I would much rather pay to support The Arts Centre which offers so much more to so many more people from a range of different backgrounds.

The current Arts Centre staff are doing a great job of attracting people to events there. The CCC needs to look after these beautiful buildings and continue to support their ongoing use for the benefit of the people of Christchurch, The council needs to show that we value both the buildings and the creative arts that are celebrated in and around them.

I believe this is a short sighted decision which ratepayers will end up paying for in the long run.

[638 - Amanda Cropp](#)

Provide funding to the Arts Centre, a key attraction for locals and tourists.

[64 - Lindy Drury](#)

Therefore do not remove funding for the arts centre

>>>

As a principal example of 19th century architecture in NZ this needs to be protected

>>>

Very important to maintain funding for the Arts Centre, supporting artists, musicians, etc

640 - Peter Cottrell

[Strategic Direction > Have we got the balance right?]

Not really if you're not supporting the iconic Arts Centre.

>>>

Really short sighted of the Council removing any support for the Arts Centre. The Arts Centre has worked incredibly hard since the earthquakes to restore the heritage buildings and to provide a range of facilities for residents and visitors, both domestic and international. The Council needs to acknowledge this by supporting some aspects of the Arts Centre's expenses, particularly the cost of insuring these buildings for future generations. Too many other heritage buildings in Christchurch have been lost in the earthquakes and since so these are a unique site not only for Christchurch but also for New Zealand.

641 - Jayne Rusbatch

I oppose the proposal to no longer fund the Arts Centre. It is the cultural heart of the city and must be funded.

642 - Stella Ward

I think you have left out funding the art centre

>>>

[Rates > Residential Rates]

It's too high but if that increase can also fund the art centre then I support it

>>>

Please prioritise the art centre it is a massive asset to the city

>>>

Heritage Art Centre not included and must be

>>>

[Spending > Te Kaha]

I don't believe Te Kaha should get that much when the Art Centre gets nothing both will attract visitors but one allows for free enjoyment for residents

>>>

Please prioritise funding the Art Centre

646 - Adrienne Dempsey

[Parks > Heritage (Capital)]

Heritage should be supported. Where is support for Arts Centre?

>>>

Reconsider funding support for Arts Centre. This (along with Cathedral) used to be, and has potential to be again a real arts, community and heritage hub. It would complement activities at the renovated Robert McDougall and Botanical Gardens. Given the amount spent on the new stadium only reasonable some support given to the Arts Centre trust to continue with the revitalising work they have begun.

648 - Helen Charlton

The Council needs to support The Arts Centre. The Arts Centre is a cluster of iconic heritage buildings that are a talisman for the regeneration of our city. These buildings and the team who manage the venues and events provide performance opportunities for visiting and local artists of all genres of music, visual arts, dramatists and poets. These performances attract all ages and ethnicities in our community. A number of the buildings are presented to acknowledge our forebears scientific and historical achievements on an international level. As a Christchurch born artist I have had the privilege of presenting recitals and staged productions in various rooms in the Arts Centre over the past 35 years. I have conducted community and secondary choirs in the Great Hall and the numerous outdoor spaces, attracting a varied audience. Most recently I was singing in the Toi Toi Opera production of A Christmas Carol which attracted a diverse audience, some who had never attended opera before. Many a concert was followed by a drink and supper in the local wine bar. My mother recalls fondly attending lectures in the Arts Centre back in the 1950's and now the University of Canterbury Music Department has returned. Are they to find another space? Tourists and Residents alike visit the Arts Centre to experience our vibrant City, finding a place to eat, rest, learn of our historic achievements, attend live performances, stay in 5 star accommodation or participate in a workshop. If the council follows through with removing financial support for the Arts Centre, there will be tremendous

negative impact and financial effect on the businesses housed in the buildings, Arts Centre staff and contractors. There are still a large number of 'eye-sore' buildings in our City Centre that have not been demolished or restored since the earthquakes. Yet the Arts Centre buildings provide architectural beauty, representative of its era, so it makes no sense to risk the buildings falling into disrepair with no financial assistance from the City Council.

651 - Billy Charlton

The Art Centre is part of the significant cultural identity of Christchurch. It hosts all ethnicities art. The Arts, always under funded but so significant for the well-being of so many. We need fun and entertainment in our lives just as much as we need road etc. I sit here writing this while you fund a cathedral that is not for all but where as the Art Centre touches so many more of our ratepayers and wider citizens. Not funding g the Art centre would be a terrible decision as, it is important that we can all enjoy sport, arts and science. We need our politicians to recognise this. Please do not pull funding... recently we attended Toi Toi Opera's production of A Christmas Carol... they had to put on extra performances because of how many of your citizens turned up to see The Arts! It is so short sighted of any Council to underfund Arts. They are essential for our wellbeing... I am sport mad and can say hand on heart the stadium is essential.... so is the Art Centre and all that goes with it... the funding needed is so small compared to the stadium. You ask all of us to pay for that, millions of dollars... the Art Centre funding is so small in comparison and in the big picture of Council spend, pulling thus funding makes no difference over 10 years. Also, tourist love it, it is a gem.in our crown. There is real value to our city funding the Art Centre, please do not be short sighted... thank you regards XXXX

654 - Samantha Bates

The Arts Centre is a jewel in Christchurch's crown. Architechturally alone it is a signifcant heritage building. It is a cultural hub for locals and attracts plenty of tourism. It's a tough time for small businesses. Totally not fair that council will fund Sail GP and not the Arts Centre. The Arts Centre is a regional asset that needs financial support from council to survive. As a local resident I have benefitted greatly from the Arts Centre first volunteering at the SOFA gallery during my university days, as an adult enjoying dinner at Cellar door, films at Lumiere, numerous art exhibitions, and now take my children there to see performances and participate in art making workshops. The Arts Centre is looking better than ever post quake and I think it has far more to offer now than it did previously. It would be such a shame to let it go down hill. The location of the Canterbury museum, robert mcdougall art gallery, papa hou, ravenscar musuem, chch art gallery and the ArtsCentre are together a very strong arts precinct that should be celebrated. You cannot justify taking money from Arts and Heritage which offers so much to so many and pouring money into the stadium and Sail GP which only benefits a few. Keep the hEART of pur city please.

655 - Patricia Holden

Heritage should include support for the Arts Centre. This is right in the centre of our city and it was gifted to us.

>>>

See earlier comments about the need to provide regular funding to the Arts Centre. It is vital to the cultural life of residents and visitors

656 - Bethany Keeley

please give the arts centre funding because it is such a cool place

658 - Chris Boot

The termination of funding for the art centre is extremely short sighted unless the council believes it can run it better which seems unlikely. The arts centre should be given the same level of care and support as is given to the botanic gardens. They are equally important to the city.

66 - Esta Tonkin

Please could the council include supporting the Arts Centre financially in the Long Term Plan. Having worked in the Arts Centre it was a truly special place and one where the arts industry can thrive. Its a place of tourism, events, history and culture, all of which are so important to a lively and thriving city. If a modern and rebuilt city like Christchurch doesn't support the arts, then that is to me like not supporting science or construction or our parks. The arts are a crucial part of a healthy society and to see all the hard work and millions of dollars that have gone into the restoration of the buildings there go to waste would be criminal.

660 - Lyn Cotton (Jolt Dance)

[Strategic Direction > Have we got the balance right?]

No - this focus places emphasis on transport, roads and infrastructure and ignores our cultural/social heart. Places like the Arts Centre are ignored. The Arts Centre has become a space that is not accessible but celebrates diversity and inclusion

>>>

Leaving the Arts Centre out of funding means we are undervaluing the arts as a space for inclusion, connection and social cohesion. The Arts Centre has shown in tangible ways that they are building and connecting diverse communities through their festivals and artistic programmes

>>>

There is a lack of funding for the arts. the Arts Centre should be viewed in the same light as the museum and Art Gallery. It supports the performing arts which are an essential element of a vibrant and inclusive arts community.

>>>

[Strategic Direction > Community Outcomes & Strategic Priorities]

The strategy clearly states Be an inclusive and equitable city which puts people at the centre prioritising wellbeing, accessibility and connection but the arts spaces you are supporting while accessible do not promote connection and accessibility to the extent the Arts Centre has. To deny funding to the Arts Centre is to return it to an elitist space.

>>>

The Arts Centre over the last five years has become a space that has supported inclusive arts in real, tangible ways. Jolt has performed there 3 times, celebrating our dancers with disabilities and bringing people with disabilities into the heart of our city. We are not the only disability group to be involved, The Arts Centre has moved from a space where we felt we didn't belong to a space that celebrates inclusion and diversity. By refusing to fund the Arts Centre, the council is limiting opportunities for people with disabilities and denying the importance of the performing arts as an essential part of a vibrant and diverse community.

668 - Julian Anderson

I feel that the CHC City Council should raise the level of support it gives to the Christchurch Arts centre. As a venue this is a unique collection of buildings in the very heart of the city that attracts huge numbers of visitors now, and with enough financial support, could do much more in the future. I have lived in Christchurch, and on it's periphery, all my life and the Arts centre has been at the hub of so many things I have been part of: as a performer; as a Movie goer; "amateur tour guide"; shopper for uniquely NZ items for gifts; market visitor; and the list goes on. The council MUST consider funding this venue generously, even in times of stringency, as once the life and energy leaves those buildings it will never return. The Trust should be able to consider more than just "covering the costs" as they have to now, and financial support would allow them to explore what more can be done in a venue that has no peers in the Southern Hemisphere, and few in the world.

669 - Daniel Barkley

The council still needs to add the funding for the Arts Centre. It seems ludicrous to not give them funding. Especially if they go bankrupt then the council will have to bail them out anyway. Better for them to have a little money now and keep getting funding from other sources than for them to have no money now but need a whole lot later.

67 - Nelson Myers-Daly

I want the council to support and fund the Art Centre. I am a musician and I feel the art centre is the life and soul of Christchurch. The community sharing art and creativity is what makes culture! It would be terrible for such a beautiful part of what makes Christchurch special is cut from funding.

671 - Linda Barnes

The Council should continue to fund The Arts Centre. As a restored, functioning major tourist attraction it is the Jewel in the Crown of Christchurch and should be left to function as it has been. When I returned from living overseas 15 years, with the city devastated by earthquakes, the Arts Centre was a beacon to me and the promise of it being restored to functionality was one of the only reasons I decided to live here again. Over the years I have been to hundreds of artistic performances/events/films/exhibitions both inside the beautiful buildings and in the outside environment. I also worked on many festivals (World Buskers, Festival of Romance, Jazz Festival, Cello Festival), and for The Arts Centre itself for years as a graphic designer. I love The Arts Centre for it's beauty and it is unique in Aotearoa, in it's size and the way it has been restored and utilised with many different businesses and organisations operating out of it. It is currently functioning well, and all unnecessary expenditure has been cut. It would be insane of the Council to cut funding causing The Arts Centre Trust to be dissolved at great expense, and the running costs currently covered by grants and donations, to have to be paid in future by the Council, namely ratepayers. It would disrupt a functioning hub of retail, art and tourism permanently, in order to save a paltry 1.8 million per year.

672 - Edwin Du Plessis

My wife and I have been long time users of the library services. In fact, my wife was a professional librarian and spent a lot of her working life in library management , including preparing art exhibitions in library facilities. We stopped visiting the Christchurch libraries after the earthquakes and since they were reestablished they no longer felt like the places we knew as libraries. On the other hand, we visited the Arts Centre for the first time in 1993, on a visit to Christchurch, and we we blown away by the Arts Centre and the uniqueness of the buildings, facilities and events, provided at that time. We moved to Christchurch in 1996, the Arts Centre played a part in convincing us that this was a city where we wanted to live. We continued to visit the Arts Centre regularly until my wife died a year ago. We loved going there together after the recovery from the tragedy of the earthquakes allowed us to once more go there. She would be totally dismayed to hear that the Council do not know what they have and really believe they no longer need to maintain the funding it needs to survive. I have today read in the Press, a column by Mike Yardley. He is one of the many who fail to realise that we are not dealing with a simple commercial reality, but much more than that. There is so much in his article that simply degenerates his thinking to a lack of realisation to what matters so much to so many of the Christchurch citizens.

673 - Chris Adams

Arts funding, including the Arts Centre, needs to be prioritized.

>>>

The Arts Centre should be continue to be funded at least to \$1.8 million per year. This is a vital community resource and provides a vital arts hub for the city. The number and diversity of events is

invaluable and overlooking funding this as a core council asset is short sighted and flawed. Council should be looking to support the arts in a number of ways as this creates a vibrant and livable city.

679 - Jacqueline Doing Smith

The maintenance of. The Arts Centre should be part of the long term plans budget

68 - Judy McGirr

The Arts centre was one of the few rebuilds/fixes to be partially finished in a shorter amount of time than most others. The trustees/management of this iconic complex had a financial base of their own to get started. Further funds should be contributed by the City Council to support this restoration to completion.

680 - Pam Goard

I visited the Arts Centre 3 weeks ago on a visit from Australia and was very impressed. It is such a beautiful and interesting building and a hive of activity. There was a lunchtime concert taking place the day that I visited. It is such an asset to the residents and a real drawcard for visitors like myself. It is one place that certainly does not deserve to be defunded!

681 - Janet Ainsworth

[Rates > Other]

I can't even believe we are going to have this conversation about potential closure. This is an iconic beautiful space that oozes great memories and history, even more so since we lost so many heritage buildings post earthquakes. Meanwhile box like, ugly steel buildings are growing out of the swamps. This should be called The Hearts Centre, the cultural beating centre of the city. I don't mind more rates to keep this building alive, however let's be bold, shouldn't heritage buildings like The arts centre either be exempt from rates altogether or have a lower charge as it attracts people and concerts anyway that bring in revenue. As for insurance, surely after all the post repair the future likely hood of damage is minimal their way LESS risk and less liability the insurers. You could also make a standalone payment opportunity on everyone's rates bill. If there was an option (but not mandatory) I would opt in, same with all the new projects around the city, I wouldn't opt in for sports centres or stadiums not that I'm against sport but if this centre continues to thrive and attract new residents we need a balance for population.

682 - Louise Jolley

The arts centre is a vital part of Christchurch and is the gem of our shared hardships. It has been a big part of my life in my early 20s, and having it back after the earthquakes as been amazing. There are so many visitors and locals going through the centre each week and weekend. Not forgetting all the small business in the art centre as well, all of them play a vital role to the economy. I understand that is an extremely hard time, with the cost of living etc But if there was funding for sailGP there would be enough for thsi

683 - Mark Vanilau

Please continue to fund the arts centre the amount they need to keep delivering the programmes and events for the community . It is a wonderful asset to the city and a unique site we are all enjoying. It should be supported by rates if they can't fully cover their costs.

685 - Richard Laing (The Central Art Gallery)

I would like to register a specific concerns regarding the proposed withdrawal of funding for the Arts Centre which threatens its viability. This AC is a major draw card for local and tourists alike adding vibrancy and economic activity to our city. As a commercial tenant any change in financial models around rent etc or the sustainability of the AC itself would lead to the closure of our business with the subsequent loss of public access to some of New Zealand's best and brightest artist and the economic opportunities that is essential to sustain their practice.

686 - Nicola Bush

[Rates > Residential Rates]

Please help the Arts Center but keep rates as low as possible

688 - Christina Duncan

[Other/Special Interest Topics > Cathedral]

I would much prefer to be supporting the Arts Centre with my rates than the Cathedral

>>>

The Art Centre is so important to the well being of the city. It attracts thousands of visitors and has so many interesting facets

689 - Lindsey Rhodes (Rhodes & Associates Limited)

Given its Heritage significance, why has the separate funding for The Arts Centre been removed? We have attached a submission document with full comment.

>>>

Comments

Professional View

Our company had the privilege to be involved with the restoration and rebuild of the Arts Centre (AC) from our inception in 2013 to 2022, with some of our senior team involved prior to this through previous employers.

First-hand we saw the hard work, dedication and commitment by the Arts Centre board and employees, carpenters, stonemasons, consultants, et al, as they rebuilt Canterbury heritage.

These heritage buildings have seen world wars, turmoil, and a major plague before; they need to be supported to ensure a continued guardianship that allows this heritage rock and mortar to see and withstand what else the future may bring, and for our future generations to be inspired from what has and is contained here.

The costs during those 12 years of rebuild were significant. To see this and the hard work of so many, potentially become mothballed would be a sad indictment.

Tenant's View

We were tenants in the Arts Centre complex for over 7 years. When we first arrived the red zone of the CBD was still in a desolate state, and life on the streets was extremely quiet - one could practically walk across Montreal Street without the need to look for traffic.

As the city slowly recovered and buildings were completed, life in the city returned. Office workers returned, overseas visitors were fascinated to see how a devastated city recovered, and around AC there was always a buzz as locals and visitors alike looked at wonder as our heritage was slowly rebuilt. Given our location in the complex, hardly a day went past without visitors accidentally entering our building, even though it was an office environment and not the galleries, artists, and museums that they were really looking for.

CCC Capital Programme

In the LTP there is \$870 million ear-marked for parks, heritage, and the coastal environment. Could the CCC not continue to keep The Arts Centre funding separate by pulling funds out of this area? Over 10 years, and allowing for some inflation in that time, \$20 million represents only 2.3% of this total allocation. This would provide the City and People of Christchurch the continued access to this unique setting.

Summary

Having worked on, and been housed in, the complex we watched and listened to the local people as they waited for their favourite parts of the complex to re-open, and the excitement when that happened. It would be sad for these people to return to such as scene and be again kept out.

>>>

The Art Centre is one of the largest historic sites in New Zealand and an integral part of NZ History. The Arts Centre has gone through 10 years of reinstatement and refurbishment since the earthquake with all buildings except for the Engineering Block and Student Union building left to be completed. Funding is necessary to ensure the continued up-keep of these buildings.

69 - Stella Grant

Fund The Arts Centre. Please & thank you! :)

690 - Sheryl Keeley

You have left out funding for The Arts Centre of Christchurch. This is a BIG mistake. You need to fund the Arts Centre so it can continue to be a fantastic place for all the people of Christchurch and beyond. It is such an amazing example of heritage restoration but also keeps a warm welcoming vibe to visitors, tenants & tourists. There's so much going on there... concerts, artists, kids programming, cultural music and workshops PLUS all the wonderful tenancies and venues for hire. The restoration was such a good news story for Christchurch, it is a cultural icon for the city - why shy away from funding it? Yes, heritage buildings cost a lot to maintain and insure - but it is WORTH it for the future of the city and its people. CCC fund The Arts Centre !

6906 - Alice Weston

The Arts Centre is the heart of Christchurch city - put the money where places are developed for people to enjoy everyday

691 - Sam Falkinder

Save the arts center!

697 - Joanne Claire Eaton

no you are cutting funding on the art centre, this provides many activities for city

>>>

you need to keep the art centre, we have very few of these building left and it is an icon of the city

7 - David Stiles-Pickard

The plan to remove funding for the Arts Centre in the Long Term Plan is bonkers, bonkers, bonkers! The Art Centre is for the people of Christchurch. It is also visited hugely by visitors (who spend \$\$\$\$'s in Christchurch). The Art Centre is visited by all generations; it is such a beautiful complex and an integral part of Christchurch life. Having visited and enjoyed many events at the Art Centre, they have always been full/oversubscribed. I understand that if the funding is removed by the Council, the Council is by law required to take it over, and will be subject to legal of costs of \$9m handling the disestablishment of the Art Centre Trust. I also understand that any existing grants and donations will not transfer to the Council. Knowing that there are funding issues at the Art Centre, I (and I'm sure many more people) would be happy to make donations to keep it operating. However, I would only be willing to do that if the Art Centre is still run by the Trust; I would not be happy to make donations if it is run by the Council.

70 - Noel Marceau

[Libraries > Libraries (Operations)], [Art Galleries & Museums > Art Gallery (Operations), Museums (Operations)]

Libraries, public spaces such as the Arts Centre, the Art Gallery, and the Museum, should all be maintained.

>>>

Council does need to support The Arts Centre, and more so than supporting the Christchurch Anglican Cathedral.

701 - Judith Paulin

As a long-time resident and patron of the Arts Centre, I fully support the Arts Centre Trust in its request to the City Council to continue its funding at the same level of the past three years. The Arts Centre remains an iconic collection of heritage buildings in both Christchurch and New Zealand. It is a absolute "go-to" for international visitors, and having resided overseas I am always delighted at the enjoyment, diversity and interest the Arts Centre offers. It is the only one of its kind that I have seen, either in NZ or overseas, and offers a vibrant hub for the city. Specific fond memories of mine include the Creative Writing programme for children, which my daughter attended and gained greatly from the enrichment offered. Likewise theatrical performances, from outdoor Shakespearean theatre to the Busker's Festival, music Friday lunchtime concerts, cafes and restaurants, the Arts Centre is a hugely valuable and unique feature of the city. The increased link with Canterbury University of recent

times, including specifically the Music Department and the re-location of the Teece Museum of Classical Antiquities, has further enhanced the breadth of opportunities in the Arts Centre. I also note with interest that the highly valued and well-supported Lumiere Cinema is the only Christchurch venue that the New Zealand International Film Festival (NZIFF) will be supporting this year, compared to 4 venues in the city in 2023. All of the above are hugely important assets, and imperative for the city to cherish and value, whilst at the same time acknowledging that the site is a heritage site that has already shown its capacity to re-build and evolve, not only post-earthquake, but also to serve Christchurch residents and visitors. One example is the recent opening of the Observatory Tower on Friday evenings for tours - earlier in the year I had three separate groups of visitors from overseas, all of whom wished to see in the Observatory Tower, but at that point it was not open. Disappointing at the time, but good to see options are now available. The dynamic, thriving and ongoing involvement of the Arts Centre has much to commend it, and it is an essential foundation to all the Christchurch offers. I sincerely hope the City Council will continue to support it as a highly valuable asset to the city.

703 - Courtney Williams

SAVE THE ARTS CENTRE - it is truly the only remaining good thing from pre-earthquake Christchurch that this city has and is turning out to be one of the only good things that make up post-earthquake Christchurch also! It is where we spend our family time, catch up with friends and purchase beautiful things from the retailers it houses. It is one of the few places you can feel inspired in this city, as well as remember the incredible historical architecture the city was once full of (before certain developers were allowed to build black and white plastic boxes everywhere). When you think of the great cities around the world, they all have important cornerstones such as the Arts Centre - when living overseas, any foreigner who had been to Christchurch always presented a memory of the Arts Centre and it also holds some of my fondest memories as a child growing up here. My husband and I often discuss how we would find it hard to live in this city without places like Hagley Park and the Arts Centre - a place that already has more going on than most parts of the city but equally has the potential for an incredible future.

704 - Eileen Hennessy

Please reconsider the lack of funding for The Arts Centre in this Plan. Please fund the Art Centre at the current level for The next ten years. There is no more important or iconic facilities and heritage as the Art center. Personally it has been a place of family enjoyment , celebration, learning and solace after the earthquakes. It is both a symbol and the heart and heart-beat of the central city and the image of Christchurch Otatahi. It is the pinnacle of the vibrancy of the city. My family lived I. And around The city for many years. I was active in the Rebuild of the city. The future of the arts Centre is critical to the city. The City government budget must show its partnership support to this critical institution. For the City's investment- the return is enormous. It is careless to not provide support The Art Centre. Funding at the current level is, due to inflation, a reduction over the past years. But it so crucial. Budget decisions are very difficult, I know having worked in local government over the years- but this is a huge mistake. Please correct this in your final plan adoption. Kind regards.

706 - Rachel Dawick

There are many great things being done but taking away funding for The Arts Centre seems to go away from every logical principal behind your strategy.

>>>

Inclusion of the funding of the Arts Centre - of huge community value.

71 - Tim Huber

The Arts Center needs to be financially supported

>>>

The Arts Centre needs to be supported

710 - Emily Tobbell

Please include funding for the Arts Centre. It is such a special place to me. I work at the Fragranzi Perfume Studio there and it's such a pleasure seeing everyone come in and enjoy the place. The amount of compliments we get about the building and how beautiful it is. I couldn't imagine our store any place else.

711 - Isabelle Lee

Because it's Christchurch's heritage and we wouldn't be human without the arts

714 - Elisabeth Bertrand

The Arts Center is my favourite place to visit as a tourist. Please continue funding this jewel in your city and you will see thousands of tourists pour in. We are telling everyone about it back in California.

716 - Caelan Thomas

I am deeply concerned about the council's proposal to cut funding for The Arts Centre. My name is XXXXXX, and I am an avid arts practitioner in Christchurch. I am the Assistant Musical Director at The Vocal Collective, and we had the absolute pleasure of performing with the choir at The Arts Centre in both 2023 and 2022 as part of the Great Hall Lunchtime Concert Series. We sung to sold out audiences, and shared parts of our Great New Zealand Songbook and our Reimagine concert series'. I accompanied the choir on a beautiful grand piano on the stage, and around 60 members of our choir filled the entire stage. The energy in the room was electric, and moving for all involved. The arts in Christchurch are still yet to fully recover from Covid. While many other businesses are seeing pre-covid

numbers, the lag has been much more severe in the arts. I'm currently the President of CentreStage Rolleston, and work closely with Showbiz Christchurch and The Court Theatre (among many other organisations). This pattern is consistent and prevalent, and we are all still battling to survive. Spaces to perform, share, and connect are fundamental to the survival of arts organisations and practitioners. This ecosystem is incredibly interconnected. Not only would this change see the end of The Arts Centre, but it would damage all arts organisations in Christchurch. The Arts Centre is a space for connection; for celebration; for joy. The Christchurch City Council must continue to support The Arts Centre in the long term.

717 - Hamish Dugdale

I believe the Art Centre should continue receive council funding in order for to be run and maintained. The Art Centre is a valuable, historic part of Christchurch history and legacy.

72 - Norma Porter

So much work has gone into preserving the fabric the buildings. To pull the funding now is a betrayal of the people Christchurch.

721 - Raphael Menke

I love the arts centre! I go there for workshops, an afternoon stroll and think it would be a shame if such a historical building would be lost to another cause. Christchurch is already not a city with a boosting cultural scene, losing more would cause Christchurch to become more and more just a giant car park with cafes and some offices. It should be kept alive with cultural life.

722 - Sinéad Horgan

Please don't cut funding to the arts centre, it will cost more in the long run.

723 - Scott Kotoul

Arts Centre funding is critical to CHCH

724 - Sophie Cooney

Please don't pull the funding from the Arts Centre!! It really is a special Christchurch place!

Please keep funding for the arts centre!

726 - John Billows

Save the Arts Centre ! ...this should be owned by us !

729 - Rodney Thompson

Funding for the Arts Centre Trust needs to be maintained. As I work a block away from the Arts Centre and often go past to visit the gardens, it is clear this is a hub of activity and a tourist hot spot. If this isn't adequately funded, a key heritage area may fall back into disrepair, wasting the money spent on post-quake restoration. Having them reduce the activities and services offered will also impact on tourist and community activity in the city centre.

73 - Millie Morgan-Petrie

Please keep funding the arts centre it is a vital heartline of craft, art & community for our vibrant city

731 - Marjorie Cook

I want the Council to continue to support the Arts Center. It is an important base for creative arts in the city, and is much loved and used by people of all ages and backgrounds. It is also one of the few, and certainly most beautiful and architecturally significant, set of buildings left after the quakes. Not only is it of huge historical significance, it has also featured large in many Christchurch peoples' lives. My long standing association with the Arts Center includes: music performances, the market, live drama performance, and activities and studies through University of Canterbury. The Art Centre is part of the heart and soul of Christchurch, and as a rate payer I adamantly implore the Council to continue to support the Arts Centre to at least the current level, if not more.

732 - Alexandra Harteveld-Turnbull

Art centre needs to be continued to be funded

>>>

Fund the arts centre!

735 - Nicolas Bondancia

Please give the arts centre funding

738 - Tara Heeran-Harris

Arts, culture and conservation are high priority to me and a thriving city. I believe The Arts Center funding should not be cut, it is a hub for locals, an attraction for tourists and a key part of Christchurch's Arts and culture scene.

74 - Amy Mcmillan

prioritize the arts. find the art center. save the art center. something that is so uniquely christchurch and is a symbol of our city and all the art that it holds, you could be prioritizing it more.

>>>

you should find the arts.

>>>

FUND THE ART CENTER.

>>>

find the art center.

>>>

find the things that make out city our city. the art center.

>>>

THE ART CENTER. TAKE CARE OF IT. FUND IT. PRIORITIZE THE ARTS FOR ONCE. christchurch has a thriving arts community that would fall flat and die without more attention and care out in by the council. act like you care.

741 - Ursula Ryan

[Grants & Funding > ChristchurchNZ Funding (General)]

It is unconscionable that the CCC is proposing to cut all funding to the Arts Centre. The Centre is the centrepiece of Christchurch's heritage buildings. When so much was lost after the earthquakes (and prior to them also), to have this suite of buildings in the cultural precinct of Christchurch, Te Whare Tapere, is simply stunning; it needs to receive adequate funding to remain as a community asset and a key piece of what the city offers. The proposal to fund ChristchurchNZ to the tune of \$15.9m could include financial tagging that enables the Arts Centre to at least meet current costs while maintaining current services. While ChristchurchNZ may be called an "economic" development agency, such development necessarily goes hand in hand with attractions that Christchurch offers to visitors/emigrants/new economic ventures. This is made clear by the promotion on the ChchNZ website of various arts and cultural entities where, unsurprisingly, the Arts Centre is the second item

featured. The Arts Centre has similar charitable trust status to the Canterbury Museum and should be treated in a similar manner. Like the Museum, the Arts Centre has always had some support from the Council and that needs to continue. It is imperative to protect what we already have and look more carefully at what is proposed for the future as new items may just not be feasible/affordable at the moment.

743 - Sally Page

I am very concerned about the lack of funding for the Arts Centre. I have fond memories of my time as a student there, but more importantly, I consider that it makes an important contribution to both the heritage and the cultural life of the city, as well as being a tourist attraction. It is certainly not important only to those of us who knew it as CUC. It would be a great loss to the city if it were to cease to be maintained or to function.

744 - Iris Kuok

Please continue to fund arts centre

749 - Sandra Pearson

I would like to see the Council to continue to fund the Arts Centre which is for all Christchurch citizens and visitors to enjoy the heritage buildings, arts and events, etc.

>>>

The council needs to continue to fund the Arts Centre because of its heritage buildings, arts and events for all to enjoy.

>>>

Continue to fund the Arts Centre.

>>>

The Arts Centre is a vital part of Christchurch's history, history and Arts with University of Canterbury and Christchurch's Boys High and Christ College . With future focus on Maori arts too. Long history with Art Centre Markets and Dux De Lux too. Future Hub for arts, dance and creativity

>>>

The Arts Centre is a great place for Christchurch arts, heritage, events music and cultural hub even to promote indigenous arts too.

>>>

Continue for Council to fund the Arts Centre as part of Christchurch History, heritage and culture. Future Hub for creative and indigenous arts and crafts.

>>>

Please continue to fund the Arts Centre in the Long Term Plan as it's a historical part of Christchurch heritage and the buildings are beautiful and provoke many memories to Christchurch residents and also visitors within New Zealand and overseas.

753 - William Liu

please keep art center it is very meaningful and long impact.

758 - Annabel Inglis

Save the Arts Centre. I have so many memories as a child going to the fudge shop, Sir Rutherford Den, the food trucks, the beads shop and lying on the grass on the quad. Now I go to the Arts Centre 2-3 times a week. I take my 3 year old to Ballet lessons there and then the entire class of 12 (including the teacher and her family) go to Francis Nation cafe there for a coffee. Then we buy a second hand book from the yellow caravan there and some paint brushes or children's gifts from the children's educational store above. I now know the names of all the people working at 5 of the businesses there. My daughter and I spend the entire morning there, her running through the daffodils in the quad and browsing the secondhand book stand while I follow closely behind with all our friends. It's our favourite day of the week and I know it will be some of my daughter's strongest memories of her childhood. It makes no sense to spend so much money on the post earth quake repairs there and then give up on the funding of the insurance and maintenance. With the museum, botanical gardens, riverside, tra, Hagley park, Ravenscar House and the river close by this should be priority for building a beautiful city for locals and tourists alike.

763 - Nicola Fagan

Save the heritage buildings, one of my favourite parts of growing up in chch, it's makes it chch. The art centre is such fundamental part of seeing chch.

>>>

Save the art centre

764 - Gay Richards

Please continue to support the Christchurch Arts Centre. it is such a cultural and historic treasure for the city. it is a real drawcard for tourists and residents. with so much of Christchurch's heritage having been lost as a result of the earthquake, the Arts Centre is well worth continuing to fund for its full restoration and ongoing upkeep.

769 - Julie Kidd

I am very disappointed in the withdrawal of funding to the Arts Centre and a different way of operating events. This seems completely at odds with the goal for a cultural powerhouse city. I attend the Arts Centre and events there roughly once a fortnight. This taonga needs to be high on the list for cultural and heritage funding.

77 - Gill Patterson Kerr

Probably mostly, however funding the Arts Centre is imperative

>>>

I don't agree with charging at Parks for parking.

>>>

Retain council funding for the Arts Centre. These buildings are the jewel in our city. The architecture is unique and the feel of the space truly reflects the city our residents have stayed in Canterbury to celebrate. It's enduring appeal is something you could never underestimate.

773 - Neville Blampied

I urge the Council to make provision for a multi-year grant to the Arts Center. This should be at a rate approximately the same as prior funding. This is a place that is unique to Christchurch and is of immense benefit to the citizens of the city and a major attraction for visitors. For example, I have just received an email from visitors I hosted in February 2024, one from the USA the other from Australia, expressing how much they enjoyed visiting the Arts Center. I contrast that with the under-construction stadium, which I do not think will be on most tourist itineraries (unless they are specifically in the city for a game or show). If, as a city, we can fund a very expensive stadium and meet its running costs each year (and I support us doing so) then I believe that we can support the Arts Center. The cost of doing so is much less than the predicted stadium costs, but with major benefits to the city and maintaining a very significant part of our heritage.

774 - Frank Webster

[Strategic Direction > Have we got the balance right?]

Yes, in some respects. Specifically, though, I strongly feel it should be possible for the Arts Centre to stay in its present form and the Dux de Lux Restaurant resurrected.

>>>

The Arts Centre would always be well worth saving.

>>>

I hope that the continued thriving of heritage assets like the Arts Centre and the Dux de Lux Restaurant will always be in the forefront of the thoughts of our elected Council members and leaders. I've never been in the Dux de Lux myself but about half the population of the city has, and we would all like to see these premises revived to the full!

>>>

The Arts Centre is a great treasure and valuable asset to the City.

775 - Nigel Burchell

As a visitor to Christchurch I valued the centre and would use it to recommend others to visit the city

776 - Ann-Marie Smith

Provision must be made within the long term plan to fund The Arts Centre. This is so much more than a collection of historical buildings, it is the heart of the city for culture and art and the City Council has a moral and legal obligation to see that it continues to perform that role as designated by legislation. The small team employed by The Arts Centre Trust is propped up by a large number of volunteers including myself, who work to provide a welcoming experience to all who visit and attend the many festivals, concerts and cultural events. I provide short term accommodation for many visitors to Christchurch and the Arts Centre is high on the list of attractions visited by all. It is integral to the character of our city and failure of local Government to nurture it's continuation as such would be a travesty, and one which would prove more costly in the long term by forcing The Arts Centre Trust to fold. I can only assume that the omission of funding for The Arts Centre has been an oversight and one which can surely be corrected. As a Christchurch rate payer, funding of The Arts Centre is a priority for me.

777 - Charlotte Campbell

The Art Centre - This needs to be funded, we have lost so much heritage in Christchurch and there is no provision to support The Art Centre in the Long Term Plan. The Art Centre is such an integral part to the arts and culture of Christchurch and needs to be able to run effectively and it won't be able to if

not funded.

778 - Shirleu Beedham

Please continue to fund this important site

779 - Eleanor Bain

I want the council to continue supporting the arts centre. I've seen so many amazing artworks/artists be exhibited in Te Whare Tapere since it opened and I know that space is very important to marginalised communities in Ōtautahi. The art centre is also a wonderful creative hub and the main space that people visiting the city like to go - taking away its funding will severely impact the businesses and cool events that are running in this space all year long! It's my favourite spot to visit in the city and I would hate to see it descend into chaos. Keep the arts centre thriving!!!!

78 - Michele Laing

The Arts Centre needs to continue to be funded.

>>>

Support the Arts Centre

>>>

Keep finding the Arts Centre

785 - Ariana Tikao

As a full-time artist I would like to see more resource going towards the arts in Ōtautahi/Christchurch. I believe that the Arts Centre/Te Matatiki Toi Ora is a vital player in terms of providing venues, opportunities, and general support for both local and touring artists. I would like to see a continuation of the \$1.8m contribution towards the costs of running the Arts Centre and the Trust so they can keep doing the great work they are doing. I have performed in various events at the Arts Centre since returning to Christchurch last year, and feel that it is a really important part of our cultural eco-system here in the city. I value the staff who work really hard to make it a vital and welcoming place, full of opportunities to engage and utilise for the benefit of all.

>>>

[Recreation, Sports& Events>Rec & Sport (Operations); Libraries>Libraries (Operations); Art Galleries & Museums>Art Gallery (Operations); Galleries & Museums>Museums (Operations); Recreation, Sports& Events>Community Arts; Community Facilities>Community Facilities (Operations)]

I'd love to see continued support for our recreational and community facilities, libraries, galleries and museums, as well as continued support for the Arts Centre Te Matatiki Toi Ora as a vital contributor to the cultural life of the city, as well as Toi Auaha and other organisations such as The Loons in Lyttelton.

>>>

I recommend funding is not only maintained for the Arts Centre Te Matatiki Toi Ora but that long term funding support for them and their activities should be increased. Currently we are the only city that does not have an arts festival, and Te Matatiki Toi Ora has been filling the space where there is no such festival, providing a great mix of community-based events as well as the Off Centre Festival, which could potentially grow into something bigger, if given more funding. I also believe that CoCA and the WORD festival is doing a great job, as are the other arts and culture institutions.

>>>

For as long as I have been an artist (30 years) the Arts Centre Te Matatiki Toi Ora has been a massive part of my life and career. Some of my first performances in 1993 were at the Arts Centre in the market as well as for events and festivals. As a local Kāi Tahu artist who just moved back to Ōtautahi last year, I have appreciated the support of the Arts Centre Trust and their staff and have done many performances and projects based at the Arts Centre, including the WORD Festival, the Off Centre 'Portals' performance with visiting Austrian Musician, my Poetry with Puoro event, and an upcoming performance produced by Juanita Hepi of Whiti Hereaka's Te Kaupoi theatre production. I have also been to many memorable shows in the last year or so including Whirimako Black, Delaney Davidson with Marlon Williams. The type of music I do mostly now is taoka puoro based (Māori instruments), and waiata often more traditional in nature, which really requires a listening audience. We are blessed with some beautiful venues with a perfect ambience to support these kinds of performances. I have also been involved in a new longterm exhibition due to open in June which will be in the Observatory area, based on a Kāi Tahu creation story. I very much support the campaign for ongoing funding support at current levels or higher, so that planning can go ahead and that the staff there can continue to support local artists and communities as well as touring arts events. I believe that the Arts Centre is a true taoka and must be supported with Council Funding in the Longterm Plan. Kia kaha, kia māia, kia manawanui!

786 - Jenny Stuart

[Rates>Other]

Please continue to fund the arts centre it is a public space and I love what they have achieved and are offering the public now. Happy for some rates to support it being run by a charitable trust.

790 - Giulia Naspi

Please continue to fund the arts centre

791 - Lynne Havenaar (The Canterbury Opera Foundation)

PLEASE CONTINUE TO PROVIDE FUNDING TO THE ARTS CENTRE The Arts Centre must be looked after to ensure Christchurch has heritage buildings for arts and creativity in the city. The Arts Centre: - attracts one million visitors per year (includes local residents, national and international visitors); - has year round community-funded, multi-cultural events; and is - home to over 70 entities covering arts, performance, creatives, entertainment, cinema, food and beverage, education, two museums, Te Whare Tapere Māori arts space, and (opening in June) the Ngāi Tahu creation story. Without Council support, The Christchurch Arts Centre Trust will be heading towards insolvency which, because The Arts Centre is owned by a citizens' Trust and governed by an Act of Parliament, it is likely the High Court will have to rule on who should get the assets – most likely the Christchurch City Council. So the Council as the new owner will bear the legal costs, and on-going costs of: insurance; rates; maintenance; and the legally required focus on the arts, culture, education, and creativity which will need to be covered by the ratepayer. Please reconsider your proposal and fund The Arts Centre to no less than what was funded in the last three years.

792 - Jennifer Small

Keep funding the arts centre

80 - Elizabeth Velde

The Arts Centre complex is one of the city's biggest attractions. Both visitors and residents visit it and enjoy the beautiful buildings and bless those who had the drive to restore it after the earthquakes. Please continue to fund it properly- we need this cultural heartland to remain for future generations.

81 - Chloe-Rose Purcell

support the arts center!!!!

810 - Susan Mullord

I strongly urge the council to continue funding the Arts Centre. The trust is doing an excellent job. A large number of Christchurch residents and visitors enjoy the activities there.

>>>

I support the CCC funding The Art Centre.. There is a big community of Christchurch residents who support, spend time at and enjoy the activities offered by The Art Centre. This is not necessarily the same community that uses the sports grounds and the recreation centres also funded by the CCC and all types of activities should be encouraged and supported.

If the running of the Art Centre becomes the responsibility of the CCC, it has been mentioned on the news that it would cost the ratepayers more as the council would not be eligible for some of the

grants received at present. I believe that the Trust are doing an excellent job and the CCC funding should continue so that they can continue.

815 - Sophie Ryan

I believe the council should support the Arts Centre. The Arts Centre is currently the heart of the city especially with the ChCh cathedral being rebuild (which now may be mothballed). I grew up in ChCh and have many treasured memories of visiting the Arts Centre while growing up. I used to love visiting the bead shop, fudge cottage, exploring the market and wandering around exploring different areas. And then later on going to The Dux for drinks, food and music. I now have children of my own and we still visit the Arts Centre regularly. Even my children at their young age realise the magic this place has and how there is nothing else like in ChCh let alone New Zealand. My daughter now goes to ballet lessons at the Art Centre weekly and it is a really special time each week. After the lessons the whole class goes to Frances Grocer for coffee and fluffys. The Arts Centre is so important to the heritage of ChCh especially following the loss of so many beautiful heritage buildings in the earthquake. It is also just as important as the museum and art gallery who are both continuing to have funding from the council. The Arts Centre brings so many tourists and locals into the city and with the team passing it by it is a frequently used stop to explore. I would be very concerned if the council went ahead with their plan to withdraw funding. Future generations would lose out on such a vibrant and vital part of ChCh.

>>>

No because you are cutting funding to the Arts Centre.

816 - Murray Dickinson

I support the funding of the Arts Centre for \$1.8m. It is essential to the vibrancy of the CBD and the wider community.

>>>

Fund the Arts Centre. The city can't be a Cultural powerhouse city if the Arts Centre isn't funded.

>>>

Funding the Arts Centre is essential to the success of the City. The reinstatement of the Arts Centre is complete, but it cannot operate without funding from the CCC. And the CCC is funding the Art Gallery, Canterbury Museum and the Library, to the tune of hundreds of millions of dollars.

>>>

You are proposing to spend \$144m on the Museum and Art Gallery. But you aren't funding the Arts Centre. The Arts Centre requires \$20m (for 10 years) and will host more events for our communities. This doesn't make sense. Surely you can come up with efficiencies across the Arts Precinct to fund the Arts Centre.

819 - SIMON THOMAS

The arts centre generates income as well as all the cultural benefits. It's the first place we bring tourists. It's a great investment not a drain on resources.

82 - George Kolff

Don't defund the arts. We love the arts. We need the arts. We are not, and will not be a nice city to live in without the arts. Why don't people get this? Don't do it.

820 - Shelley MacDonell

I would like the Council to support The Arts Centre. The Arts Centre is a central part of my family's life. We visit the Arts Centre frequently, to go to Lumiere, to take in an event in the Great Hall, to look at art in the Gallery or to eat at Bunsen. The Arts Centre is such a quintessential part of Christchurch. It brings together such a diverse array of people and provides access to one's own culture as well as the possibility of sharing that with others. The Arts Centre is such a special place for both local residents as well as tourists to the city, before I lived in Christchurch it was one of my favourite parts of the city, and now that I live here it is core.

821 - Hannah McGowan

Funding for the arts - and the art centre, as well as the environment (rivers) should be a strong priority

>>>

yes - but the arts centre needs funding

2471 - Jennifer Taylor

No more council money for the Cathedral.

83 - Murray Victor

Save the Arts Centre!!!

830 - Hamish Gilchrist (Christchurch Civic Trust)

The Christchurch Civic Trust wishes to add its voice to the growing clamour for continuance of CCC ratepayer funding support for the Christchurch Arts Centre.

There is no contrary view that this group of 22 stone heritage buildings are an irreplaceable asset for Christchurch. They are an integral part of the city's history and educational story. They were saved from destruction in a world leading project following the Christchurch Earthquakes.

Are we to let the vision of those who strived so hard to save these buildings as a community centre, protected by its own governing Act of Parliament, to ensure the land and buildings remain accessible in the public domain in perpetuity?

Should the Christchurch Arts Centre Trust be forced to wind-up, it is likely the CCC could not avoid assuming full responsibility for this local heritage precinct. However, the long-term costs to the city could well be much greater than continuing to provide a modest annual boost to the Arts Centre Trust's operational funds to maintain their activities and attractions.

It is an appalling indictment on the CCC if this decision to cease all funding support for The Arts Centre is deliberate and not just an unfortunate omission. Maybe the CCC should at least cover the insurance costs.

How does the 100% cut in annual support for the Christchurch Arts Centre compare with lesser cuts proposed for other budget items?

For instance, compare the CCC support for Test Cricket in all formats at Hagley Oval with support provided to the Arts Centre. Commercial/Professional cricket at Hagley Oval is a charge to Christchurch Ratepayers but these collective costs are spread over different cost areas and not shown in any consolidated CCC accounts. Curation of Hagley Oval is provided by the CCC. The major beneficiary is NZ Cricket and TV promotions to overseas audiences.

Cricket at Hagley Oval has more than 100 years history but that was for amateur club cricket, not professional/commercial operations. It took the imposition of Emergency Earthquake Legislation to allow minority cricket interests to circumvent the Hagley Park Management Plan made under the Reserves Act. The Christchurch Arts Centre is surely worthy of similarly favourable treatment and support.

Cricket at Hagley Oval does not generate visitor attendance comparable to the Arts Centre measured on an annual basis. The Christchurch Arts Centre generates more visitor spend in Christchurch than

does cricket at Hagley Oval. From a purely financial perspective, the Arts Centre is a better drawcard than cricket at Hagley Oval.

We cite Cricket as one example here of the CCCs apparent favouritism of sport over Heritage and Art, but there is another obvious example in the Te Kaha Stadium where professional rugby will be a significant benefactor of Council/Ratepayers money pumped into that facility...

...and we won't even go into the completely undemocratic and un-transparent, closed-door deal with the organisers of the A&P Show. Council channelling an estimated \$5million into the failed A&P Show Association to keep them afloat.

Our point here is that there are obvious double standards at play and compared to the sums of public money the councils sees fit to indulge on these professional, Regional and National sporting organisations (using our facilities) and other ventures, the funding for Arts Centre is small change, but of incalculably better value.

It is probable that physically the Christchurch Arts Centre will endure for many more generations of Christchurch citizens. Its uses are circumscribed by its Act of Parliament to ensure public enjoyment and the promotion of Arts in many forms. It cannot be demolished or privatised.

Please reconsider and weigh the merits of the Christchurch Arts Centre funding within the long-term City Planning process.

84 - Isabella Macdonald

Please fund the arts centre

>>>

Fund the arts centre

>>>

Fund the arts centre!

840 - Kim Morton (Ōtautahi Creative Spaces)

We take our artists to events and exhibitions at The Arts Centre Te Matatiki Toi Ora. We support their call for funding towards its operating costs so that it is sustainable. However, we understand the issues behind their funding situation to be complex and we want to see information made available to the public about this. Our concern is that discussion of access to art, culture and creativity in relation to this LTP will be dominated by this single issue/organisation, when the question should be what is the right level of support to arts culture and creativity across the city that enables our citizens access and participation.

841 - Philip Aldridge (Te Matatiki Toi Ora The Arts Centre)

What's the Ask?

The Arts Centre is asking the City Council for a grant of \$1.83 million per annum in its Long-Term Plan funding. This would mean the Council continuing its current grant from the 2021-2023 LTP (though this time it will be specified as operational rather than a capital sum split over three years). This will allow the Centre to remain open and operate at a nominal level. Staff and operational cuts from 2020 would remain in force.

The shortfall of \$1.83 million per annum grant could be partially subsidised from The Arts Centre's ring-fenced reserves in Years 1 and 2 providing it is made good in subsequent years.

For The Arts Centre to really thrive, however, a grant of \$2 million pa would give us wings and secure continuation of the many festivals, events and programmes that make up our significantly culturally diverse community.

A Mechanism for Funding

In our Proposal for Funding of last September we requested that a Mechanism for funding be established. The LTP process has been frustrating and costly in resource and hours for all concerned. We all go through this process every three years.

Everyone seems to agree on the value of The Arts Centre to the city – and the public overwhelmingly do. We ask Council to establish a Mechanism for Funding that can give certainty to the public, the Council and The Arts Centre.

What's the Context?

The Arts Centre is projecting an annual deficit of around \$1.85m per annum. This has been covered by the Council grant for the last three years. Without the grant the Trustees would be unable to recognise the Centre as a going concern and cannot sign off the annual accounts.

The Centre's income is predominantly rental revenue. This has been maximised (fully let at market rates) but the cost of running a heritage site is always higher than the income that can be derived from it.

Since the 2021 Council grant, on top of inflation, five more heritage buildings have been restored and reopened incurring increases in insurance (now \$1.2m pa), rates (approx. \$205,000 pa) and staffing costs. The lift in income from additional rents is outstripped by the higher running costs.

Prior to 2023, when restoration insurance funding was fully expended, the annual deficit was covered by the interest on the 2012 \$168m earthquake insurance pay out.

The LTP Process

Having not included The Arts Centre in the Draft Plan the Mayor encouraged The Arts Centre to "make your case in public". This has been done through a campaign which, it is important to note, has been paid for by a private donor and supported by print, media and creative partners.

We would like to thank Council staff who, in anticipation of receiving large numbers of submissions, worked with us to facilitate an easy way of making submissions using a QR code to a Google form. This saved Council staff a tremendous amount of time processing large numbers of email submissions.

We understand many people have made submissions showing clear and loud support for the continued full funding of The Arts Centre.

Correcting Misinformation

The briefing document received by Councillors at the Council Workshop on 26 March contains a series of misdirection's and factual errors. These errors have been repeated in the media. For Councillors to make informed decisions it is important that they are presented with facts, viz:

- Since The Arts Centre was gifted to the people of Ōtautahi Christchurch in 1975 it has regularly received operational funding from the Council
- The grant of \$5.5m made in the last LTP was for *operations*. It was 'dressed up' as a capital grant to allow the Council to borrow at a cheaper rate. It was given on the understanding that the Centre used its last earthquake insurance restoration funds to pay \$1.83m per annum to cover the operational shortfall.
- The Arts Centre is requesting the continuance of this operational funding.
- The Council's briefing document refers to the cost of Creative Programming as being \$800k pa. This is incorrect. The arts programme is \$200k pa. The line-item referred to in the accounts is in fact the full departmental 'Creative Team' budget which includes marketing, Te Whare Tapere, education, venues and arts programming.

For example, our programming includes three major festivals (funded by a grant from Creative New Zealand, sponsorship, donations and ticket sales), three school holiday programmes, a day long festival of Music from the Moslem World (funded by a Boosted campaign), Monday Lunchtime Concert series and Rising Stars programme (both funded through a partnership with Concerts for Christchurch Trust and proceedings from venue hires), a Chamber Music series in partnership with the University of Canterbury, Rutherford's Den Museum, the Rauora exhibition, Creative Residencies (predominantly funded by a grant from Creative New Zealand), a Christmas programme, Te Whare Tapere (Māori arts space) (with start-up funding provided from Rātā Foundation and the Lottery Canterbury Kaikoura community fund), stargazing etc. As you can see, this programming is paid for in the vast majority through one-off grants, donations and sponsorships. This huge programme costs just \$200,000 a year, and this list is not exhaustive.

The document presents programming as a fiscal failure but actually it speaks of an incredibly efficient and effective delivery mechanism. In comparison one small Council supported festival with permanent full-time staff costs around \$500,000 per annum.

- The Council document recommends that The Arts Centre bring back the market, which has been happening since 2016 and in May 2024 will increase in size fourfold.
- It recommends the return of food trucks – all suitable sites for food trucks are already fully let.
- It recommends an "increase in foot traffic and vibrancy through activities with a wider appeal" :

- Footfall is 980,000 pa
- To get an understanding of the vast array of diverse communities that the staff at The Arts Centre facilitates please confer with the Māori arts community who have a home in Te Whare Tapere and who have created the exhibition of a Ngai Tahu creation story and showcase mahi toi in our annual Matariki Festival; the lovers of heritage architecture for who we provide experiences during Open Christchurch and the Council led annual Heritage Festival; the Islamic arts community, the Chinese arts company, Everyone an Arts Trust; inclusive dance company, Jolt; Pasifika led youth arts organisation, th'Orchard,; Dr Erin Harrington, UC Cultural Studies Lecturer and cultural critic, the thousands of parents who bring their tamariki to the holiday programmes; the many people who attend dance and voice lessons; the audiences at the sold out lunchtime concerts and to the young performers in the Rising Star concert series; the musicians of Canterbury University that we collaborate with; the parents of the young children who engage in theatre with Cubbin Theatre's year long programme at The Arts Centre this year; our past Creative Residence who create bold new arts work and provide public programmes for our communities; the artists who annually exhibit work at our Sculpture Festival; the street artists who regularly perform here; the mural artists who have adorned the hoardings around the site; the choirs who rehearse and perform here; the corporate community who hold events here; the weddings that fill the summer months; and the huge array of organisations that we partner with: Lumiere Cinema; film and advertising companies who use The Arts Centre as a location for shoots; arts and crafts classes; outdoor cinema events. We will endeavour to increase this

vibrancy through further engagement with Council staff to ensure we are a world class arts centre – this is our bold vision and ambition for this city.

- It has been suggested that management salaries are high.

In 2022 (the last Audited accounts) the Senior Management group was 5.5FTE with remuneration of \$709,250.

The Director's salary was set by Strategic Pay Ltd in 2018 (on appointment). It was subsequently reduced, as were all management salaries, in the retrenchment of 2020. The Director took a 33% cut. It has been increased subsequently but is still a long way down from the agreed salary in 2020.

We have looked at salaries of equivalent positions paid by Council at The Arts Gallery. A Tier 1 manager at The Arts Centre is paid about the same as a Tier 3 Council employee.

Staff costs at a Council owned Arts Centre would be higher than under the Trust.

The reduced staff structure made in the 2020 retrenchment remains in place. Four positions are funded by grants; two are partially funded by grants; 1½ are self-funding; five are in Maintenance and 29 roles are volunteers.

Of the remaining, 8 positions were created to cut costs (contractors: cleaning and security).

Otherwise there is a small core staff of one Operations Manager, one Marketing Manager, a part-time graphic designer; a Visitor Services Co-ordinator (who manages the Volunteers hosts), the Finance Manager and the Director.

- A comparison with a similar major tourist attraction:

Canterbury Museum (2022-2023): Public Subsidy \$9.7m
Visitors 766,000 (including 'Quake City)
Staff 77.5 FTE
Wages: \$6.8m

The Arts Centre (2023): Requested Funding \$1.8m-\$2m
Visitors 980,000
Staff 24 FTE
Operations Wages \$1.76m

- It has been suggested that Tenants are not paying full commercial rates. We have changed the model for tenants' rents from before the earthquakes (when arts tenancies were subsidised). Now all tenants pay market rents. The issue is with opex. The cost of running heritage buildings is always higher than the amount that can be on-charged to tenants. So not all tenants pay full opex. Some do but not all. If we on-charged it all we would lose some tenants.

However as The Arts Centre becomes more and more popular (footfall is now 1m per annum and the place is vivid and exciting) we will have more and more demand from tenants and we will be able to recover more from tenants as they compete to be here. We are not in that position yet but we are fully let.

- **The Dux**

There has been media coverage of the trustees' decision to decline the offer from the group Redux to restore the Student Union. The offer was a poor commercial offer with no rent coming to the Trust for the 50-year period of the proposed agreement.

The proposal had further weaknesses: the necessary hospitality expertise was missing as Richard Sinke, the owner of The Dux, said he would not be involved beyond licensing the brand for an annual royalty payment and promoting the project. The Trustees felt that it was important to have an experienced owner operator involved.

The business case was not convincing. The Trust took advice from experts using solid hospitality data. Redux's model was based on a number of false assumptions.

The model had considerable risk in its reliance on raising millions from Dux enthusiasts. Having successfully run fundraising campaigns which have raised \$38m for The Arts centre since the earthquakes we were well positioned to assess those risks.

Hospitality businesses tend to fall either side of a middle ground; they can be failures or huge successes with few falling in the middle.

The Redux model, if successful, accrued large benefits to the founding directors – but not to The Arts Centre. It would have contributed no rental income.

Redux promoted the idea that additional footfall would be of great value, albeit no financial value. We already have footfall of 1m per annum.

As there was no commercial benefit to the Trust beyond a modest ground rent, after two years engagement with Redux, the proposal was declined, on commercial grounds.

It has been suggested that the Trust should have reengaged with Redux and that a few tweaks to the agreement could have got it across the line. This did happen. Lianne Dalziel, while still Mayor, brought the parties together again and the lawyer David Stock proposed a simple agreement which fulfilled the stated ambitions of both parties. The Arts Centre accepted this proposal.

The proposal was rejected by Redux.

Dissolution of the Trust

We believe that Councillors understand the implications of not fully funding The Arts Centre. The Trustees, as Directors, would be negligent were they not to initiate the dissolution of the Trust if they are not confident it remains a going concern.

Assumption of Council Ownership

On dissolution, The Trust, as a charitable company would distribute its assets according to the Charities Act. Being constituted “for the people of Christchurch and its visitors” we believe that the most likely future owner would be the Council. There is legal precedent for Councils to receive such assets. Council has taken its own legal advice on this.

Costs of Transferring Ownership

If the Trust’s assets are transferred to Council, there will be significant costs that would then fall to the ratepayer:

- The process of dissolution will be through the High Court and is likely to be long and protracted with high legal costs. The trust could use its reserves, which are otherwise held to maintain the hotel over its 35 year lease. Maintenance and the funds required are an obligation of the Hotel Lease. Those funds would have to be replaced at the ratepayers’ expense.
- Without changing the 2015 Arts Centre Act – which would be fiercely resisted by many, including parliamentarians – the Council would have the same obligations as the Trust, including staff costs. We have compared senior management salaries to those at The Art Gallery (Council employees) which shows that staff costs would be higher under Council ownership.
- Council would not receive the one-off grants (from Gaming Trusts, Creative NZ, Rātā etc) nor the sponsorships or philanthropy that the Trust receives to support our work.

In the last three years we have received \$1.5m, for operations and programming alone, from such sources.

The Arts Centre is a hugely successful vehicle for delivering the Council’s arts strategy and the ‘Cultural Powerhouse City’ community outcome as defined in the draft Long Term Plan– and does so very efficiently.

844 - Ben Scott

I wish to submit in relation to Council support for The Arts Centre I personally love the amazing collection of buildings that make up The Arts Centre and the contribution they make to the City in terms of the arts, economically, and socially. My sister was married there in 2003, my employer (Beca) use it for client and staff functions, and I attend other functions there approximately 6 times a year (excluding my support for the businesses that rent from there). If council stop funding then I'm under the impression that the Arts Centre Trust will have no option but be wound up. According to the Act of Parliament that the Arts Centre must run under, following winding up the Trust, ownership would fall to Council. This will result in higher costs to Christchurch ratepayers for a lower level of service from existing The Arts Centre setup. Under Council control, access to philanthropic support (amongst other support available to the existing Trust) disappears and staffing costs will increase (current staff have taken a pay cut to keep the current setup running). Wake up Christchurch City Council and understand the implications of removing funding to The Arts Centre. Reinstate immediately.

846 - Sarah Anderson

I applaud the council for their continued support of the Arts and of vital services like our libraries, sports facilities and the like. I would like to see money set aside to continue to support the Arts Centre, it would be truly depressing to see this fantastic piece of our city's heritage founder. The post earthquake restoration is wonderful and it needs to be fully supported so that it can be completed and thrive. Please consider continuing to help the Arts Centre with an annual funding grant. Continued support of the Art Gallery and Museum are also to be applauded, these are our centres of culture and heritage and a real draw card for both visitors and residents.

85 - Teresa Bushell

I think that the Council should continue to support The Arts Centre.

850 - Rhondda Poon

Christchurch Arts Centre, please continue to fund the \$1.8m. It is a significant part of central Christchurch. We spend there, we go and sit in the quad, we remember, it's where my mātua met when women didn't go to University, but my mother did. It's part of our lives here. Please find the money for the next three years. I understand the pressure of 3 Waters, infrastructure and the other outlined costs. But this is important to us.

>>>

Please reinstate the \$1.8m operational funding for the Arts Centre.

853 - Gavin Low

Continue funding the arts centre, which I note is not part of the funding

>>>

Need funding of the arts centre

>>>

The Arts Centre MUST be funded, which I note is not part of the funding plans. I visited the Arts Centre a few years ago from the UK and it allowed me and my family to experience the rich culture of the area. This would be a huge loss to the council and all those living in the area, as well as for tourists. The music entertainment for my family, as well as the educational aspect of being aware of the different communities in the area, made the visit extremely memorable and enlightening. The variety on offer meant there was something for everyone. Please continue to fund the Arts Centre. My family and I have long lasting memories and it would be a shame to deprive future generations, should the Arts Centre cease to be funded to put on such wonderful events and offer itself as a beacon to the community.

854 - Fiona Van Oyen

As a mid career visual artist, I am seriously alarmed to hear that the Council appears not to continue to provide funding to the Christchurch Arts Centre! My concerns are for the broad Arts Community in Christchurch, that is dance, theatre, music and visual arts, not to mention the artisan food/furniture/design businesses, plus the Hotel in the Centre. The momentum in the use of the Arts Centre is a hub for both international visitors and residents (artists and the public). On a personal level The Central Art Gallery, who represents me as an artist is the only gallery of its type in Christchurch, offering top quality established through to early career artists, where their artworks can be purchased. I have exhibited with The Central since its inception, enabling me to survive as a working artist! My works have been purchased by national and international art collectors. Please, please reconsider!! The Arts Centre is a jewel to our City and it pumps with creative energy. It is unique and offers so so much.... please support it.

86 - Rhondda Bergman

Cutting the funding for The Arts Centre will put the centre in jeopardy and will undo all the marvellous work The Trust has done in not only saving the buildings but providing a cultural space as important to Christchurch as the Cathedral. \$1.8m dollars is rather a small sum to pay for the work that is done by the Trust in providing Christchurch with a unique cultural space where all people can be represented in art, culture and heritage. If the funding does not go ahead it appears that there could

be years of legal wrangling and the future of the buildings will likely suffer because of this. The Trust saved these buildings from execution- please give them the funding they need to keep giving Christchurch people and the tourists this wonderful space to enjoy.

860 - Gaynor Stanley

I believe it is short sighted to not continue funding of the Arts Centre. This is an immense asset to the entire community and visitor drawcard that helps drive the destination appeal that brings in millions of dollars of visitor spending to the city. Why not charge visitors to enter key buildings like the Great Hall instead.

>>>

Find the arts centre.

>>>

Keep funding the Arts Centre. It will be very shortsighted not to.

>>>

[Grants and Funding>Events Ecosystem Funding]

[Grants and Funding>Arts Centre Funding]

Major events as an attraction to fill city coffers and enhance city life are important - and the Arts Centre's continued existence and enhancement has a vital support role to play.

863 - Joanne Lim

I'd like to see some transparency how funds are allocated. The art centre has done an excellent job in providing the community to get involved through the arts and music, local artists too! Taking away these funds would mean that the trust will undergo insolvency.

864 - Claire Lenitua

You need to fund the Arts Centre, it is highly important that the council shows proper support!

866 - Ashara Evergreen

I am begging you to support The Arts Centre. Please. This space is a vital part of Christchurch for me, both professionally and personally. I spent a large amount of my time studying here, and now I work here, at the Teece Museum. So many people would suffer from your decision to not fund The Arts

Centre, workers, locals, visitors, and students alike. The Arts Centre is of great historical importance to Christchurch, it is a space of heritage, creativity, history, education and arts. It is a place where various people, from various communities can rally together to appreciate the arts, to be inspired, to create and learn. It's where people come to express themselves and showcase their talents, where people come to reminisce about their time spent here as students, to learn about something new, to study, to exist. Please, please don't take this away from us.

867 - Catherine Northcott

The Council needs to support The Arts Centre. Please. Every day there is more loss for the citizens of New Zealand, more cost of living, fewer job prospects for the young and downtrodden. We don't have much, and we can't buy much. Please don't take this too. For many of us, the arts fill up our wairua, the existential and spiritual component of being human. To have a place in the community to rally around the beauty that still exists and is still being created. Don't take that from us now, not when we need it most.

868 - Lucas Moreno

[Strategic Direction > Community Outcomes & Strategic Priorities]

You are saying that “our Community outcomes 2024-2034” is a “Cultural Powerhouse city”, yet you cut funding for the Arts Centre? It doesn't make sense. My daughter has had really good experiences here with their activities and so have I.

869 - David Wildbore

Continue funding the art centre

87 - Jan Need

Please keep supporting the Arts Centre. CCC support the Christchurch Cathedral - religious, and the new stadium - sport and music events, so should have a balance and support the Arts Centre as well. Without the Arts Centre where will the centre of tourism be?

871 - Sandra Shaw

My submission is made due to the Christchurch City Council's non-funding of the Arts Centre. I feel very strongly about this terrible omission, mainly because of the funding of various other things I consider should be standing on their own; the Hagley Park cricket oval for instance, and the money being granted to the sports/multi use stadium rearing its presence in Madras Street, in my opinion the Arts Centre is a wonderful resource for both local people and visitors from elsewhere. Such a large collection of heritage buildings in one place is rare indeed, and deserves to be treated by the council as the treasure it is. Please reconsider your decision, and stand by the Arts Centre - the amount

involved, in the total spending of the council, is not great.

873 - Rachel Palmer

It is your duty as the council to not only fund projects which improve the city's future but to also protect Christchurch City's historic heritage. The Arts Centre is one of the few remaining heritage stone buildings for which Christchurch used to be famous. It was our first university building and has ongoing importance in being a wonderful venue for many various cultural events for the enjoyment of Canterbury citizens. If you allow the Arts Centre to fall into disrepair due to your proposed cutting back of funding, you will have contributed to the loss of one of the most important buildings in Christchurch. Since the quake where so many of Christchurch's heritage architecture was lost, the Arts Centre's importance to Canterbury citizens has increased tenfold. Please direct your cost cutting somewhere else and please continue looking after and funding our beautiful irreplaceable Arts Centre. Thank you. A concerned citizen.

874 - Arna Morton (Morton Music)

Do not cancel funding for the Arts Centre.

878 - Glenda Lorimer

Re: Arts Centre funding. While acknowledging the Council has many competing demands on its funding I strongly ask Council to continue funding the Arts Centre. Since the post quake restoration the Arts Centre has a strong and constant feeling of vitality and dynamism. I visit the Arts Centre several times a week and there are always good numbers of others taking advantage of its offerings, both residents and visitors. It has a huge personal value to me as a place of learning, entertainment and hospitality, and I regard it as Christchurch's heart. However, I also feel the Arts Centre has a wider value to all of Christchurch in its economic, cultural and heritage contribution to the city.

88 - Anne-Marie Hampton

Support the Arts Centre as it's a massive draw card for tourists and locals to enjoy.

881 - Katherine Doig

On the whole, in the light of the understandable need for fiscal restraint given the current economic climate, I think that you have - with one very significant and concerning omission. Your community outcomes for the period, as stated on page 15, include the fact that you want Ōtautahi Christchurch to be 'a cultural powerhouse city' where 'our diverse communities are supported to understand and protect their heritage, pursue their arts, cultural and sporting interests, and contribute to making our city a creative, cultural and events powerhouse'. Your exclusion of funding for The Arts Centre Te Matatiki Toi Ora directly contradicts this stated outcome, and threatens to derail the (frankly) incredible work (especially given their own budgetary constraints) that The Arts Centre management team are doing to revitalise, promote, share, and celebrate the work of a diverse array of local artists working across a multiplicity of artforms in the city, and to restore the site and buildings as the

beating heart of the city's arts and cultural heritage. The Arts Centre is a living taonga - it is one of the few remaining jewels of our city's built heritage in the devastating wake of the earthquakes, and as such, one of a tiny number of sites which still allow generations of residents to have a tangible connection with the city of their past. On page 32 of the plan under 'Heritage' - you state that 'All sorts of unexpected things make up our heritage - they celebrate our past, present and future, and it's our job to identify and protect them.' On that page, you rightly identify three other significant heritage sites for investment under the plan, however, The Arts Centre's exclusion from that list is absolutely unacceptable - and in fact, of those four sites, speaking both as a professional historian and a professional musician, it should in my opinion easily be weighted as the top priority for continued investment. I hope that this and many other similar submissions will assist you to identify just how treasured and meaningful The Arts Centre is to your residents, and as such, that you will take every step possible to protect it - investing both in the site, and also in the amazing personnel who are reinvigorating it. To squander this rich and beautiful legacy to the city - especially when it continues to give so much to so many, would be shameful.

>>>

Yes, so long as the plan is amended, and that The Arts Centre is included in that \$870 million parks, heritage, and coastal environment spend.

>>>

See my general comments. It is critical that The Arts Centre is included in this part of the plan.

>>>

See my general comments earlier on - we can't be 'A cultural powerhouse city' if we don't invest in one of the cornerstone pieces of that puzzle, The Arts Centre.

883 - Elizabeth Steel

I'm concerned about the lack of funding for the Arts Centre. This provides an important hub of activity for both tourists and locals alike. It's one of the most frequent places I, and people in my social circle, visit. How are they meant to function if the council won't provide them money in the long term?

>>>

The Arts Centre is such a boon for young people like me because it provides an easy way for us to connect with the arts. It's one of the places I visit most often with my friends when we're looking for something to do on the weekends. It really acts as the central heart of the Christchurch area. Without funding, The Arts Centre won't be able to provide that place for us to gather and explore the art side of Christchurch. It'd be awful for such an important place to suffer through lack of funding.

884 - Graham Dockrill (SCAPE Public Art)

Graham Dockrill Chairperson of the Board SCAPE Public Art 27/03/2024 Dear Christchurch City Council, Re: Continuation of Funding for The Arts Centre I am writing to urge the Christchurch City Council to continue its invaluable support for The Arts Centre. As a representative of SCAPE Public Art, I firmly believe that sustaining this cultural institution is not only vital for the preservation of our city's heritage but also for the flourishing of arts and creativity in Christchurch. The Arts Centre holds profound significance for me both personally and professionally. It is a place where I have witnessed the transformative power of art in our community. From childhood excursions to recent collaborative projects, my journey with The Arts Centre has been one of inspiration and growth. My cherished memories of The Arts Centre span from attending captivating performances to participating in thought-provoking exhibitions. These experiences have shaped my understanding of the arts as a fundamental aspect of our collective identity and cultural expression. Moreover, The Arts Centre plays a pivotal role in supporting businesses like ours within the arts sector. Its vibrant atmosphere attracts tourists and locals alike, fostering economic growth and providing invaluable opportunities for artists and creatives to showcase their work. The Arts Centre has both economic and societal importance to the City of Christchurch. It is a significant drawcard attraction bringing in national and international visitors and tourism. Beyond its economic impact, The Arts Centre is a cornerstone of Christchurch's regeneration efforts. Its restoration following the devastating earthquakes stands as a testament to our resilience and commitment to preserving our city's heritage. Furthermore, The Arts Centre serves as a hub for diverse communities, fostering inclusivity and social cohesion through its myriad of cultural offerings. In conclusion, I urge the Christchurch City Council to prioritize the continuation of funding for The Arts Centre. Its significance transcends mere bricks and mortar, serving as a beacon of creativity, heritage, and community in our city. Thank you for your attention to this matter. Sincerely, Graham Dockrill Chairperson of the Board SCAPE Public Art

89 - Randall Grenfell

You need to fund the Arts Centre appropriately.

90 - Wendy Hay

Fund the Arts Centre

903 - Emma Hayes-Smith

I want the council to support the Arts Centre. It is a fundamental hub for the arts in Christchurch. I grew up learning saxophone with Mark Hobson in the Arts Centre and it holds a very special place in my heart for a place to go and grow my passion, a place to meet up with friends and family for drinks or food and countless days and nights exploring plays, musicals and exhibitions. The Christchurch Earthquakes stripped Christchurch of so much history, The Arts Centre is a core hub filled with history and it would be such a loss to Christchurch if this was not continued to be resurrected and restored.

909 - Sharon Semmens

I totally disagree with the Council not funding the Arts Centre considering it was built by our fore fathers and is possibly the oldest heritage building in Christchurch excluding the Sidney of the Takehe and the Cathedral which is hardly ever used when it can be. The amount of tourist and Canterbians alike gain a lot of pleasure out of the architecture and facilities .Why not bulldoze the gardens away as well ,,!!!! That's how ludicrous the non funding is .Lets have some more cycle ways Too...at great expense. Sharon Semmens

916 - David Minifie

[Strategic Direction - Have we got the balance right?]

Generally yes. If you want our city to be a cultural powerhouse you will need to continue to support the Arts Centre.

>>>

As long as this includes supporting The Arts Centre.

>>>

I would like to see it continuing to support The Arts Centre so that it can continue to maintain its heritage buildings and continue with festivals, markets and creative events.

917 - Mhairi Flett

The Arts Centre is a treasured asset to Christchurch not only because of it's heritage status (of which we have very few beautiful historic buildings remaining after the earthquake) but also as a tourist attraction, special venue for events and the connection many residents have with the centre. Continued financial assistance from the council is essential for it to retain its trust status for additional funding as well as a commitment from the council that the centre will remain open for all Cantabrians to enjoy and benefit from. The Arts Centre is the anchor to the art gallery, museum, botanical gardens, tram and many more destinations encouraging residents and tourists into the centre of Christchurch and thus supporting businesses in this area.

920 - Marie Porter

Please continue to fund annually our Arts Centre, it is the Arts Centre of our city and is a valuable and essential asset at the Arts Centre of our entire community!

>>>

[Spending - Te Kaha], [Rates - Residential Rates]

\$286 million on Te Kaha (4.41%) ? Please ensure the wider Canterbury councils/ratepayers contribute to this excellent facility. Please ensure our Arts Centre is funded too!

>>>

Fund our Arts Centre!

93 - Julie Doornenbal

The activity which surrounds and is within Arts Centre is critical to our city. We as citizens of ChCh are proud of our heritage building and I believe strongly that this hub of our city needs to continue. The council needs to support the Arts Centre

94 - Rod Fee

Why is the Arts Centre not getting its normal contribution from rates? The CCC is obliged to fund it. Having to pay in some other way is a bit pathetic. Robbing Peter to pay Paul is a rather pointless act which takes away transparency.

95 - Anton Wilke

Save the Arts Centre! As key center of tourism and culture, and one of the largest collections of heritage buildings in the southern hemisphere, this space is a unique slice of our community, made even more so since the quakes. Driving visitation across a wide part of the CBD and aligning with the botanic gardens, Worcester boulevard, botanic gardens, Hagley Park and the Avon River - the Arts center is a quintessential part of the Christchurch experience - any reduction in funding will be wildly detrimental to a proud city still reestablishing its unique narrative.

951 - Michelle Cane

Save the arts Centre, fund The Arts Centre! The Arts Centre plays a massive role in bringing cultures, communities and people together! The Arts Centre is important to the people of Christchurch , just as much as the Museum, cathedral, The Art Gallery. The Art Centre need the funding to survive.

955 - Daniel Stirland

I would like to strongly suggest that the City Council reverses its decision not to provide funding to The Arts Centre. As an employee of The Arts Centre, I can state from a well-informed position that the annual amount requested by The Arts Centre is the lowest amount required to continue operating within the terms of The Arts Centre of Christchurch Trust Board Act (2015). Insurance, maintenance and City Council rates alone add up to the requested amount. This is before the legally mandated artistic, cultural, educational and creative activation of The Arts Centre is taken into account. Staff

costs have been cut as much as possible, maintenance is being deferred, grant funding is utilised to cover as many costs as possible, and revenue from leasing has been maximised. There is nothing more that The Arts Centre Trust can do. Public funding is essential to ensure its survival. The Arts Centre's request is about more than just survival though. Its campus is currently buzzing with activity – the amount requested will allow it to continue thriving. The Arts Centre is home to more than 70 organisations, the vast majority of which are small, independent, creative businesses. Together, they employ hundreds of people and bring much needed footfall, and therefore dollars, into the city centre. The Arts Centre is a powerhouse of entrepreneurialism and business in Christchurch. What will happen to those businesses, and those jobs, if The Arts Centre is allowed to fail? Furthermore, with Canterbury Museum closed until at least 2028, and the Christ Church Cathedral's restoration on the brink of failure, The Arts Centre is the jewel in Christchurch's heritage crown. There are few other tourist attractions in the city centre. Allowing The Arts Centre Trust to fail, or forcing parts of The Arts Centre to close, would be devastating for our city. What's more, by providing The Arts Centre with the \$1.8 million per annum that it has requested, the City Council would greatly increase the probability of The Arts Centre restoring its remaining earthquake-damaged buildings. This is because The Arts Centre team would not have to waste time seeking funding for its operational expenses, and could focus its efforts on fundraising for these expensive projects instead. The Arts Centre is a core piece of our city's identity. As an immigrant from the "old world", I found its Neo-Gothic architecture comforting and familiar whilst learning to call Christchurch my new home. Now, having lived in Christchurch for 8 years and having fallen in love with the city, I have come to learn that the importance of The Arts Centre to that identity is far more than the bricks and stones that make up its buildings. There is something for everybody at The Arts Centre – art, toi Māori, toi Pasifika, Asian art, cuisine from every corner of the world, wine, coffee, cinema, music, theatre, markets, tattooing, massage, clothing, accommodation, history, science, engineering, and much more. The Arts Centre represents the very best of our modern, diverse culture in, ironically and wonderfully, the nation's foremost colonial landmark. I no longer bring visitors from Europe to see The Arts Centre's buildings; I bring them to marvel at the range of activities that happen here, and to revel in the liberal arts and the learning that is available to all who venture within its quads and courtyards. In their short lives to date, my children have spent more time at The Arts Centre than any other cultural venue in Christchurch. They have laughed at buskers, danced to hip-hop, listened in awe to opera, watched movies under the stars at outdoor cinema events, tried food from India, Thailand, the Philippines, Korea, China, Japan, and of course New Zealand, taken painting classes, played with weird and wonderful musical instruments from across the globe, and learned about nuclear physics. Where else in Christchurch, even Aotearoa New Zealand entirely, can somebody do all of these things in one place? Christchurch City Council has an opportunity, and has the power, to ensure that this crucial resource in the heart of our city continues for future generations. Please fund The Arts Centre.

96 - Moya Radley

Continue funding the Arts Centre so that it continues being a shared resource for Christchurch.

967 - Audrey Baldwin

- I support funding the Arts Centre. Not providing funding is incredibly short sighted and risks destroying a key part of our community, which is currently thriving. It has also delivered on it's deadlines and promises, unlike many other organisations. It needs and deserves funding from CCC.

This particular space that provides income, inspiration and connection for so many people and art forms; surely we can move some funds away from the Te Kaha Project to support one of our surviving heritage sites and essential community hub? - Toi Ōtautahi and the arts advisors are doing a great job at keeping our community informed, connected and offering great learning and professional development opportunities to artists at every stage of their careers. - Toi Auaha is a wonderful space for our art communities, I'd like to see it further activated with more events and workshops run by Toi Ōtautahi. The incubation programme and (Artist) Life School are great - keep funding them!

97 - Hannah Beasley

The Arts Centre should remain a publicly funded and run space. It offers huge and wide ranging benefits to the Christchurch community and is something that has so much potential. The place is just starting to get going again! If insurance costs are an issue then deal with the issue and don't lose a massive asset to commercial purposes that is so special.

98 - Alison Gentleman

I would like the Council to support The Arts Centre. It is a local treasure - with over one million visitors per year - and should be protected. It is a unique space for everyone - whatever nationality, ethnicity or age - and it would be a disaster to lose it. Without The Arts Centre, Christchurch's reputation as a vibrant, thriving, cultural city would certainly be diminished. Please support it.

984 - Olivia Inglis

Please continue funding The Arts Centre. It is such a fantastic collection of historically significant buildings and is a taonga not only to Christchurch, but to the whole country. I have many happy memories at The Arts Centre from throughout my life and I am very grateful that so much of it has been restored.

>>>

Please continue funding The Arts Centre. It is such a fantastic collection of historically significant buildings and is a taonga not only to Christchurch, but to the whole country. I have many happy memories at The Arts Centre from throughout my life and I am very grateful that so much of it has been restored.

99 - Megan Fraser

Removing the Arts Centre from the plan seems likely cost the rate payer more in the long term, and unwise in terms of how it will be managed. Thank you

991 - John. Thomson

Please continue funding for the art centre which is irreplaceable and iconic.

993 - Kate Stallworthy

Please fund the Arts Centre!!

994 - Richard Jones (Alarm Solutions Ltd)

Hi, please re consider your proposal to remove the Arts Centre funding. After considerable challenges that The Arts Center has faced since the earthquakes & subsequent lengthy rebuild processes & setbacks I believe that it is now poised to realize its place as a true unrivalled national treasure & international place of historic significance & must-see visitor destination & therefore to now severely jeopardize the Centre reaching its full potential with the goal well in site by way of funding cutbacks would be a short term oversight to what this asset could deliver in long term wealth, investment & community pride if left to flourish under its current level of funding & management.

Oppose

1027 - Bruce Shalders`

I agree with the proposal to no longer fund the Arts Centre as it is essentially a business that derives its income from commercial rents.

1641 - Win Douglas

[Other/Special Interest Topics > Cathedral]

Stop taking my money for the christchurch cathedral and arts centre

2065 - Robin Lake

The Council is under pressure at the last minute to provide funding to a number of projects. I do not think the Council should supply (unbudgeted) money to the Cathedral or Arts Centre, but I do support providing increased funding to Orana Park. I think that the volunteers deserve our support following the COVID downturn, and we have a responsibility to the animals.

2079 - William Muir

Cut all funding for the arts centre. It's a commercial entity that should be able to pay for itself through rent.

>>>

Important to defund the wasteful running of the arts centre

[2545 - Antony Gough \(Terrace Christchurch Ltd\)](#)

The Arts Centre has a rent roll of around \$2 million and a management structure of around 24 full time equivalent people with a wage cost of more than the total rent roll. I support the council in refusing to support this wasteful spending and would suggest that the management of the Arts Centre should be outsourced to a professional body who would charge between 4% and 5% of the rent roll. It would then leave substantial cash available for Arts Centre projects. The Arts Centre has incorrectly been advertising that the end of the Arts Centre is at risk. This is not correct. It is the massive management structure that needs to go and be replaced with a normal management structure. There are many inefficiencies at The Arts Centre that need to be addressed such as the 50 car parks in Hereford Street that are a free for all. The market rate for CBD car parking is around \$70 plus GST per week for a permanent car parking space or \$3 per half hour for casual parking. There is lost income here of between \$300,000 and \$400,000 per annum.

[2792 - Graham Robinson \(Addington Neighbourhood Association\)](#)

Removal of funding for the Arts Centre could result in their being unable to survive financially. Please reinstate funding for the Arts Centre.

[2849 - Patrick Dunford](#)

Arts Centre, >>> and other community organisations asking for million dollar handouts should not get any major grants especially over multiple years. If we all have to cut our cloth to suit these recessionary times, they should as well. [Grants & Funding > Orana Park Funding] [Other/Special Interest Topics > Cathedral]

[2854 - Annabel Turley \(Christchurch Central City Business Association\)](#)

We fully support the Council's zero funding proposal for The Arts Centre. The Arts Centre campaign has been misleading, as The Arts Centre will continue to exist even if the Trust does not continue in its current form due to zero funding for The Arts Centre from the Council. It is not fair on businesses within our membership area (but outside the Arts Centre) to be contributing to the operational costs of the Arts Centre. Essentially, The Arts Centre Trust is asking for a subsidy to be paid to the businesses in the Arts Centre by all Christchurch ratepayers (including our member businesses). The uncommercial way in which The Arts Centre is being run is demonstrated by the 'no cost' parking provided in its new at grade carpark on Hereford St. The Council is not able to afford to provide 'no cost' parking on city streets or within its central city carpark buildings. The Arts Centre Trust's request for Council funding demonstrates it also cannot afford to have 'no cost' parking but nevertheless does.

[2982 - Hiroko Tatsuno](#)

[Other/Special Interest Topics > Cathedral]

However, I am NOT happy to pay for cathedral or art centre building fee as It's NOT life-threatening, so opposed to increased rate if plan to spending to them.

3308 - Monica Jasper

[Transport > Roads]

The loss of funding for the Art Centre is unthinkable. Consider somewhat less funding for roads.

I'm so disappointed that Art Centre funding isn't included in the budget. You state a savings of \$6 million in 2024/25, without impacting on current levels of service, yet the amazing service that the Art Centre provides to the community would be impacted greatly. This is one of Christchurch's core institutions and its importance should not be understated. Alternatively, consider deprioritising a portion of road work and increase funding for rather than defund the Art Centre. The joy provided to our city by the many programmes, from concerts, to makete, to the fantastic Lumiere theatre, far outpaces the joy of a few roads being smoother. Honestly, this omission is unthinkable. There's enough difficult government decisions to swallow as it is, that I'm really saddened that locally we're doing such damage too.

3527 - James Stringer

I object to the request from the Arts Centre for additional LTP funding. The Arts Centre has a strong commercial income from reputable tenants and should restructure their overheads to operate sustainably without reliance on funding from the City. Many Trusts and organisations require Council support but very few have the stable commercial income that the Arts Centre benefits from. Council support of this nature should be focused towards organisations that enhance the City but do not have an ability to generate its own income - it's a reality of a City that has pressure on its rates and limited funding available. Rather than Council accepting their proposal for further funding, I propose to establish a new board of skills based Trustees to restructure the organisation to operate within its means and initiate further commercial opportunities onsite to ensure it does not need to rely on public funding for operations. I have support from potential Trustees and would propose 4 Trustees plus a 5th as a Council appointed Trustee or observer. The skills based positions will be pro-bono and it's anticipated it would take 2 years to resize the organisation to be commercially sustainable. Through a very public marketing campaign, the Trustees and CEO have made it clear that without Council support they will dissolve the Trust, incurring significant legal fees and putting tenancies at risk. I would urge Council to request that in the interests of preserving the Arts Centres cash, the current Trustees resign 30 June 2024 and the new group of Trustees take over from 1 July 2024.

3741 - Kevin Spaul

[Other/Special Interest Topics > Cathedral]

No more money for the cathedral or arts Centre Look after the cost and the city history

3745 - Victoria Rathgen

[Other/Special Interest Topics > Cathedral], [Spending > Te Kaha]

No more money to go towards cathedral and Arts Centre both places have recieved huge sums

>>>

Do not spend money on that catedral, arts centre and stadiums.

3805 - Antony Lawrence

The council needs to stop being the first port of call for organisations in difficulty. The Arts Centre is a good example of an organisation that has refused to look at it's own operation for savings first. They have created their own problem over the years by failing to manage their \$500 million property portfolio effectively, Their accounts at the Charities Register reveal they spent \$75,000 on public relations last year. That money would have been better spent getting professional property management advice. To their credit council staff recommended they focus on their property assets but the director rejected that and expects the ratepayers to pay their poor nmanagement.

3866 - Nicki Carter (Carter Group)

We support the Council's zero funding proposal for The Arts Centre. A more commercial model needs to found for the management of The Arts Centre. There are a number of advantages that The Arts Centre has – it does not have an obligation to return a dividend to its ultimate owner; it does not have debt to service; and it is a charitable trust and so does not have to pay income tax. With these advantages, The Arts Centre should be able to cover its operational costs without seeking funding from Council.

3969 - H Bloomer-Law

>>> it is a bizarre choice for the council to stop supporting the arts centre, and budget should be allotted to allow the heart of the city to keep beating in the same way it does now.

4021 - Cornelis F De Jager

I don't want to see more money being wasted on the likes of the Cathedral, Orana Park, Art Centre etc if they can't survive on their own, then they can go.

826 - Jen Amner

Is it always a shame to see funding lost to the Arts, including that funding to Christchurch Arts centre

Other

1008 - Angela McPherson

I would like to see some action on the Arts Centre. Is it time to revisit the funding and running of the centre? I am unimpressed by the attitude of the A.C. management to the restoration of the Dux de Lux. That building will fall to pieces at the present rate of progress.

1047 - Rachel Davies

I am curious and excited about many elements of the plan if it will allow Christchurch to flourish with efficient spending. However, entities like the Arts Centre are a focal point of the city's attraction and boost for tourism. They have done an incredible job with the council's funding to become so popular; this will surely go to waste should they lose funding. If there is already intended funding for heritage buildings within the plan, why can this not be maintained with the private entity that has run the arts centre so well? My biggest reason for this submission is because I am a music student of the University of Canterbury. How will this affect my regular studies at the arts centre? What will happen to the Teece Museum, a gem for Christchurch and necessity for classics students. At current, the arts centre is not just a tourism spot; it is vital for so many occupations, students being just one example. Should the arts centre become council property and continue to run as it has, how will you tell us of another increase in rates despite your plan? Please consider this carefully

1125 - Nigel Tecofsky

I support the Arts Centre and the contribution that it makes to the Cultural Precinct and to tourism within Christchurch. I would like the Council to investigate including the Arts Centre buildings in the Council's insurance programme (possibly on a first-loss basis but avoiding under-insurance in a Natural Disaster). This would provide security for the Art Centre (which I assume has buildings that are now seismically stronger) without a significant increase in the insurance premium costs, and hence the call on ratepayers.

1258 - John Chrisstoffels

I think that heritage properties such as the Arts Centre should be retained as a CCC property to ensure the kaitiakitanga manaakitanga of these special places, and are preserved and cherished with with own character without compromising the commerical possibilities they provide.

1469 - Susan Grant

Comments:

i believe the grant to the arts centre should continue as its a major tourist attraction and should remain in a trust so it can not be sold off . I think the trust should be audited as to see if it is not being run properly. The Dux De Lux should have been reinstated before now as it was a great money earner.

1583 - James Pomeroy

[Strategic Direction > Have we got the balance right?] , [Strategic Direction > Climate Change]

Yes but I feel there needs to be greater focus on funding for Arts & Culture, climate change/resilience.

>>>

[Other/Special Interest Topics > Cathedral]

No funding for the cathedral unless equal funding is given to other heritage projects such as Arts Centre.

2392 - Wendy Blair

Why is the boss of the Arts Centre being paid so much when the money should go to the restoration? He won't even reveal how much he gets paid which is not transparent?

1702 - Laura Xavier

>>> More money should be invested in >>> arts centres. [Libraries > Libraries (Capital)] [Parks > Parks Spending (General)] [Community Facilities > Halls & Community Centres (Capital)] [Transport > Roads (Capital)]

What's the point of saying we want to be a cultural powerhouse if little finding is being allocated to arts centres? [Strategic Directions > Community Outcomes & Strategic Priorities]

1778 - Jane Houghton

This goes for the Arts Centre - great to have it but at the end of the day but it's free for tourists to enter. If taxpayers are paying for it as part of their rates, (as with the museum), it should be free for Christchurch rate payers but others need to pay (they did something similar to this with Auckland War Museum so it can be done).

2319 - Mark Todd

I am a previous Trustee of the Arts Centre, and I am confident that the Centre is being professionally and efficiently managed, as it has been since the new Trust Board was formed in accordance with current enabling Act of Parliament. There are a myriad of reasons in my view why the current method of tenancing, managing, operating and maintaining the Arts Centre is the right model for this critical piece of our City's heritage that also has appeal to tens of thousands of residents and tourists who visit it every year. I have a suggested solution to saving the Council money whilst still maintaining the current Arts Centre business model, linked to my earlier comments on insurance costs and scope of coverage. The Council's previous grant for the Arts Centre that is now proposed to be cancelled would primarily have been needed just to pay for insurance, as the cost of insuring heritage buildings continues to increase at an out of proportion and unaffordable rate. This is not unique just to the Arts Centre. Can the Council please consider: 1. Requiring, as a condition of providing an ongoing grant for the much lesser deficit excluding insurance costs, that the Arts Centre Trust Board to cease its insurance programme (other than the portion relevant to health and safety/ legislative compliance and directors and officers indemnity) so that coverage ends for aspects such as the reinstatement of all the Buildings and any business interruption cover. All parties and the community will therefore be accepting/informed of the fact that a significant event causing loss/ damage would then render the Centre unable to operate. This would be a worthwhile first step and test of community support in relation to my earlier comment regarding the reality of having to restrict our future insurance programme in response to market conditions. And at the same time it gives a clear message of support from the Council for the ongoing operation of the Arts Centre as a critical attraction/ part of our community in so many ways.

2485 - Lucy hill

[Planning & Strategic Transport, Urban Design, & Urban Regeneration > Heritage (Strategic), Spending > Te Kaha)

no, I think it is really important to keep what already exists rather than creating new things. I have always thought that the arts centre was an amazing and valuable cultural asset, especially in Christchurch where there are barely any heritage sites. i feel that its important to keep them, its a place that is vibrant and used daily whereas the stadium wont be.

>>>

I think it is really important to keep what already exists rather than creating new things. I have always thought that the arts centre was an amazing and valuable cultural asset, especially in Christchurch where there are barely any heritage sites. i feel that its important to keep them, its a place that is vibrant and used daily whereas the stadium wont be.

2611 - Papataitua Harrington

Can this all be afforded and if not, what alternative options are there for ensuring the likes of Orana Park and the Arts Centre can open their doors.

>>>

In regards to the Arts Centre >>> I do not support additional rates. The Council could run the Arts Centre and that might be more efficient

2671 - Julia Bradshaw

[Libraries and rates]

though I am concerned about reduced spending on community facilities, especially libraries and grants to the Arts Centre, for heritage and environment projects. I am happy to pay more rates to fund these.

2746 - Helen Taylor

Shortsighted and ignorant not to include The Arts Centre in your plans. This is the heart of Christchurch's heritage, arts and culture. It should always be accessible to the public and never in private hands. Your priorities are way out. I've always valued that my rates go to something I actually enjoy.

2838 - Graham Erikson

The CCC vision, community outcomes and strategic priorities are not reflected in failing to provide substantial support for >>> Arts Centre funding. [Other/Special Interest Topics > Cathedral] [Strategic Direction > Community Outcomes & Strategic Priorities]

2868 - Jonty Coulson

It also seems hypocritical to increase events funding whilst dropping funding for businesses such as the arts center, which occupy a similar niche of improving cultural wellbeing within the city.

3266 - Renee Mark (Italian Film Festival)

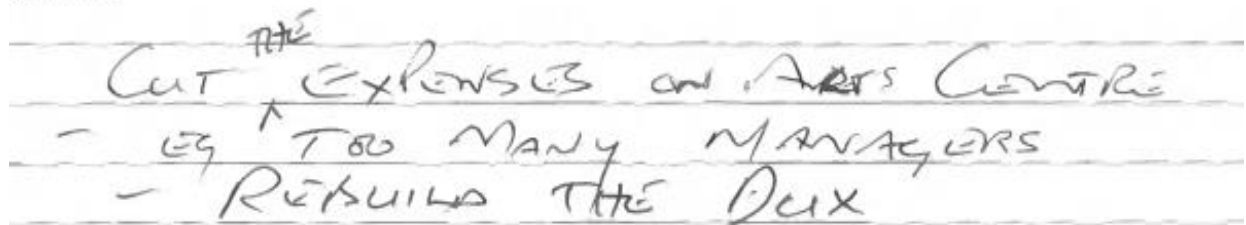

[Three Waters > Taumata Arowai Requirements]

Absolutely not! 3 waters was an opportunity to find water infrastructure WITHOUT the heavy burden being placed on ratepayers and now we the people have to pay for this and we miss out on heritage and community buildings like the art centre.

3613 - Catherine McLeavy

Make contribution to >>> arts centre optional. Giving a donation is tax deductible, paying rates is not.

6904 - Jean McIntyre

CUT ^{THE} EXPENSES ON ARTS CENTRE
- EG ↑ TOO MANY MANAGERS
- REBUILD THE DUX

709 - Michael Gousmett

Regarding funding of the embattled Arts Centre: As described in my letter in The Press on 4 April, the Council needs to take control of the Arts Centre as a Council Controlled Organisation with charitable status of which there are currently 93 non-profit CCO's in New Zealand. The current model is, as is so apparent, unsustainable in this day and age. It may have worked well in the past, but it no longer does. It is time for radical change to rest the functions of the Centre as an arts centre.

736 - Helen Westrupp

Let's think outside the box with the arts centre. It's one of our last big historical draw cards to the city, how can it be used to fund itself rather than be turned into residential houses.

756 - Jonathan Harrington

I don't support the Arts Centre's request for 1.8mil+ p.a. noting that we are already paying for previous support through till 2031. I believe Council does a great job of running pools, libraries, parks and the arts gallery and so I am confident Council could do a great job at the Arts Centre if that is the result.

848 - Jan Harrison (-)

I am concerned about the proposal to no longer fund the Arts Centre Trust. My understanding is that taking the centre back into Council will likely increase the cost of the maintaining it to the ratepayer longer term due to the loss of the ability to seek charitable funding for it and I would like this aspect investigated further.

Orana Park Funding

General Comments

997 submissions were received relating to funding for Orana Park.

997 comments supported Orana Park receiving funding from Council this LTP cycle, with the parks multifaceted value to submitters coming through strongly in submissions.

Six comments opposed Orana Park receiving funding from Council. 3 provided alternative proposals for Orana Park, and 7 provided general comments about the park.

Officers Response

Submitters supported Council funding Orana Park primarily due to its value as a popular intergenerational community attraction, a visitor attraction and a centre of conservation for native and worldwide endangered species.

Many submitters recalled an important or significant personal connection with Orana Park over the course of their life. Orana Park was seen as unique and intrinsically part of Christchurch.

Generally, submitters were not specific on the amount although many mentioned the need to keep the facility open and maintaining the status quo, [rather than supporting growth].

Historically Council have supported Orana Park through an annual grant of approximately \$240k p.a. from the Strengthening Communities Fund. From time-to-time Council has made additional contributions for specific works such as a grant of \$500k in 2023 from Better Off funding to offset operational costs.

Orana Park have requested increased Council support to offset operating costs and maintenance and avoid a financial decline to insolvency as follows:

- 2024/25 \$500k total
- 2025/25 \$1m total
- 2026/27 ongoing \$1.5m total

Orana Park need a level of operational support primarily for specialist facilities, feed and staff. Escalating costs exceed available income streams and their reserves are declining. There are almost certainly measures Orana Park can use to improve their financial position and lower any reliance on a Council subsidy. Staff will recommend that should Council decide to provide additional funding a

portion of any additional funding is set aside for external professional advice on financial sustainability. This information can also be used by Council to inform longer term decision making.

Council has approached neighbouring Territorial Local Authorities to discuss a regional approach to funding due the regional nature of the Park. Neighbouring TLA's have not supported this approach.

Based on the information available the following is suggested as a basis for agreeing a way forward:

The Council:

- Contribute \$240k in years 2024/25, 2025/26 and 2026/27 to offset operating costs. - Funded from the Strengthening Communities Fund at no additional cost to rates.
- Contribute \$310k in 2024/25, \$260k to offset facility maintenance costs and \$50k to employ an external party to provide professional advice on long term sustainability. - Funded from the Capital Endowment Fund at no additional cost to rates.
- Contribute \$500k in 2025/26 and 2026/27 to offset facility operational and maintenance costs, conditional on Orana Park implementing financial sustainability initiatives to the satisfaction of the Council. - Funded from the Capital Endowment Fund at no additional cost to rates.

Orana Park:

- Adopt efficiencies to the nett value of approximately \$260k in 2025/26 and \$760k in 2026/27. - These figures were identified through examining Orana Park funding applications and are considered an achievable target in the short term.
- Proactively fundraise for Capital renewal projects from time to time.
- Implement external professional advice achieving greater financial sustainability.

Long-term:

- Request that Council ask the Finance & Performance Committee to oversee a review of Council's approach to supporting the Orana Park (and potentially other major organisations). Changes, if any, would be considered in the 2025/26 and 2026/27 Annual Plans.

Support

1000 - Coral Henderson

Orana Park needs increased annual funding support

1001 - Jessica Schulz

Fund Orana Park!

1005 - Wendy Walters

I want the Council to help Orana Wildlife Park, they are such a unique park and need more help to continue their amazing work, PLEASE HELP by increasing their funding to 1.5 Million each year, a small cost to help fund such an amazing cause, we have to help fund all the great work they do, PLEASE!!!

Thankyou Wendy :)

1007 - Carolyn Laing

Please allocate more funding to orana park

1009 - Penny Knowles

Provide increased funds for orana park.

1010 - Amanda Todd

As an ex employee and regular visitor at Orana Wildlife park. I think it's important that they receive the funding they need to continue.

1011 - Kristy Hohneck

Support Orana animal park!!

1012 - Andrea Mcgregor

Include Orana Park as a park and heritage. It is a big drawcard for locals and visitors.

>>>

Include Orana Park in your funding

>>>

Orana Park is more important than Christmas in The Park. It attracts tourists.

>>>

Dont forget important places that bring tourists in other than sport and conference venues. That is lacking versatility. Orana park gets left out every year.

1013 - Jennifer Edmonds

Would love support for Orana Park. They are an important park of Christchurch, not only for entertainment but for conservation and animal welfare yet lack funding from the council. They are helping with breeding of animals to stop them being extinct. Would rather money be spent here than on cycle ways etc as it adds so much value.

1014 - Sandy Porter

I would like to support the wildlife Orana Park funding. This is an experience that your average Canterburyan gains and to decrease this would be unthinkable. They have worked hard to make this an important attraction. It is the closest we have to a zoo. When travelling overseas I like to visit the animals at the zoo. Animals that I might never have seen. This is unique to Christchurch and the South Island. I support funding for Orana Park.

>>>

[Spending > Capital Programme (General)]

These are necessary community, which makes us Christchurch. Included in that should be Orana Park as part of our nature.

1015 - Penny Hallowes

I realise that councils are always trying to find ways to save money. However, I strongly urge that you increase the amount of funds given to Orana Park. This is not only a tourist attraction but for some locals, the only way they will ever see these animals alive. There is also the very important work with endangered animals. There is very little educational and fun things to do in Christchurch and supporting Orana Park by increasing their funding will have huge benefits.

1016 - John-Paul Avent

Orana wildlife park deserve to be council funded. How many other Zoos in NZ are council funded? Why not Orana. 1.5m is a small drop in the bucket. How much is spent on consultancy fees alone? Orana is a necessary part of Chch and should have some certainty around funding to enable it to plan for the future.

1017 - Olivia Meyer

Orana park is in dire need of funding. The conservation efforts undertaken at Orana are a crucial part of the overall efforts to save many endangered species. It also provides an attraction for tourists and children.

1019 - Sarah Gabites

Keep funding for zoos/wildlife centres

1021 - Heather Butcher

Please increase funding to Orana Wildlife Park. It costs around \$100k a week to just feed the animals, and the work Orana does is so important to the survival of our most vulnerable species.

1023 - Melanie Thomson

Please continue to financially support Orana Park. There is no where like it in the South Island and it's a wonderful asset to the community. In a world so focused on technology it is a great place to keep education up on how we can continue to develop technologically but in a way that is safe for our animals.

1025 - Phoebe Grant

This submission is in support of securing funding for Orana Wildlife Park. The park is an important institution for Christchurch City, not only for attracting visitors and it's conservation efforts, but for educating the community. Orana has supported many students over the years, including myself, by providing invaluable work experience to those studying toward their Certificate in Zoo Keeping. Without Orana Wildlife Park's support many students wouldn't have had the opportunity to graduate or have a career in zoo-keeping. Moreover, Orana Wildlife park provides the opportunity for members of the community to learn about some of the world's most interesting and unique species right at their doorstep. Which in turn can foster an interest in animals and help to raise an awareness of different conservation efforts, which can go on to have a global impact. In summary, the educational benefits that Orana Wildlife Park provides to the community of Canterbury are unmatched and must be considered when deciding on funding.

1026 - Sarah Sim

Orana park needs to continue to receive its funding to keep the facility running as a visitor attraction

1031 - George Tylee

I strongly support increasing funding for Orana Park and other outdoor parks.

1032 - Lisa Grenfell

Christchurch city council should help fund Orana park

1033 - Amelia Wright

I would like to see more support given to Orana park this is an integral part of Christchurch and the South Island they need the money more than anything else to be able to sustain the cost it takes to stay afloat but also would be nice if the council helped them make some upgrades. This will also bring revenue to the council so I think this should be a huge priority

>>>

If it means helping with this then I would be all for it I would like to see more support given to Orana park this is an integral part of Christchurch and the South Island they need the money more than anything else to be able to sustain the cost it takes to stay afloat but also would be nice if the council helped them make some upgrades. This will also bring revenue to the council so I think this should be a huge priority

1035 - Jean Peneha

Support Orana Wildlife Zoo by sponsoring them \$1.5million per year to help keep the doors open for many generations to come. Losing Orana Zoo would be a drastic loss for the local economy. I have always had good memories of Orana since I was a young girl. When I went to Auckland and Hamilton Zoo, I would compare them to Orana. And it had been many many years. Orana was always the top zoo for me. And I was able to take my own daughters there when we moved back down here. I would love to take my grand children one day too. The staff there do an amazing job and they need help keeping the doors open and keeping the animals here in our backyard. Orana is a one of a kind. Save it!!!

1036 - Charlotte Cairncross

Orana park needs more funding! I'd much prefer my rates to help orana park than to the cathedral

1038 - Samuel Moreton

Please support Orana Wildlife Park. We are losing so many good things in Christchurch and I don't want Orana to be lost. It is one of the go to places for tourists and also families across the South Island. Conservation should be a high priority for our council and Orana should be front of mind when they ask for help, the council should be there straight away to help. For Christmas I love gifting family members 1 year passes to the park rather than giving them money or an item that isn't going to bring much joy. Because I know how much joy Orana brings to families and the experiences you get when you visit Orana and see all the animals and learn about our native animals as well. As I said, Christchurch is slowly losing the fun and cool stuff it used to have, Science alive to mention was an awesome place growing up. No the city is turning into an almost boring uptight concrete jungle. If we keep our world class Zoo going, we can offer world class experiences to visitors from all over NZ and the globe.

1039 - Colin Appleton

I would like to make a submission for Orana Wildlife Park to make the LTP. Orana Wildlife Park has been an important part of my life since I was 14 years old. They offered me weekend experience through highschool as a volunteer and helped nurture and grow my passion for conservation. Later in life they pathed a way for a career in the conservation and zoo industry. I have contributed positively to wildlife conservation thanks to Orana Wildlife Park, they are an important asset in the Christchurch community creating learning opportunities for people of all ages and connecting them with wildlife. They are also creating career paths which are very limited to achieve in the south island. Please

consider funding them as they bring huge value to the economy and conservation of Canterbury.

1041 - Gavin Burn

Increased council funding (and any other funding) to Orana Park.

1042 - Manu Muehlbauer

Please include Orana Park

>>>

Orana Park needs more money

1044 - Kirsten Leonard

Orana Park Please allow for some extra funding to help keep this well known City Icon going, we understand times are tough financially. However those of us over have so many memories of Chch that are all we have since the Earthquakes, we need the things still going to keep going esp Orana Park

1045 - Nick Jackson

I support increasing funding to Orana park. This is a fantastic world class facility that we need to support in Christchurch. It attracts visitors and is a great recreational activity for locals.

1046 - Josie Crampton

Orana wildlife park needs the funding to continue to keep christchurch on the map of new zealand. For families, orana wildlife park is a place where many will gather with their children (tourists included) With ongoing costs and repairs and orana needing funding this will help boost the economy in general.

1048 - Ben McQueen

Please increase the funding for Orana wild life park.

1049 - Minson Chloe

Orana park needs more funding

1051 - Andrew Wood

Orana park needs funding, a great place to visit!

1052 - Holly Adams

Please help orana park with their operational costs. They are a huge asset to the city

1053 - Melissa Tauwhare

Orana park. I'd happily pay \$10 a year to help the animals

1055 - Fumiyo Iwane

Whenever we go to Orana park and see animals, it reminds us that this planet doesn't belong to just us human and makes us feel humble. In Orana park, there are many things we can learn and feel through watching animals, feeding animals, cuddling animals, which are great experience especially for children. It's one of the great educational place, so I think we should keep supporting what this charity has been doing.

1056 - John McDonald

Allocate a minimum of \$1.5M p.a to the Iconic Orana Wildlife Park. I think this is the best wildlife park in NZ and Christchurch council needs to ensure it remains sustainable and viable. Do more to promote the park and get visitors through the gates. We visit Orana park regularly when we are in Christchurch, one of the best attractions in Christchurch

1060 - Katherine Trainor

I would like the CCC to give the support to Orana Park where needed. It was part of my childhood, part of my children's childhood and I've worked at schools who have made visiting orana park part of their curriculum.

1063 - Janet Toogood

I live in Palmerston North but have family down south and have visited Orana Park several times. I have also given a family entrance voucher to Orana Park as a Christmas present. I want to be able to visit each time I come to Christchurch as I regard the Park as iconic in the NZ landscape and too many other riches disappearing into the night (the Chateau, Rainbow Springs). To be able to see the wild animals in as reasonable a natural setting as possible is a powerful attraction and adds immeasurably to the Christchurch visit experience.

1069 - Kieran Norton-Taylor

Please fund Orana Park it plays a vital part in Christchurch having a world class tourist zoo

>>>

Please fund Orana Park

>>>

Orana park should be funded and assisted financially

1070 - Selena Holt

Orana wild life park keeping this in Christchurch please

1073 - Arabella Jarman

Please find Orana Park, I am 28 years old and I go with my partner who is 30 years old, we have no children but we love Orana Park, not only is it essential to teach our young children about nature and the beauty of these animals and how we must protect them but it is also essential to breeding programs around the world, going to Orana park is a small part we can play in conservation, it is also a huge part of tourism in chch. I have travelled the world and gone to zoos everywhere and I find Orana a top class facility. We need to ensure it can continue to survive and thrive for our future Tamariki, the future of our city and to do our part in conservation. Thanks for your time in reading this

1076 - Michelle Mclean

Support orana park its Christchurch family history

>>>

Support orana park the north island tax payers do for There local animal parks be fair for Christchurch

>>>

Please help Orana park.

Christchurch can't see this close

1078 - Adelle Thompson

I feel that there needs to be more funding to support Orana Park in keeping the amazing wildlife there healthy and well cared for. The more funding they get, the better kept the animals and park is, the more visitors we will get into the city to utilize the amazing facilities.

1082 - Rachel McRae

I would like to ask that Orana Park gets the yearly funding that it needs. I have a year pass and I've been going often, as it's a safe place for me to go for walks.

1084 - Grace McMahon

I want to add a comment about Orana Park. Orana Park is a very special asset for Christchurch, not many other councils have a world-class facility for public education about animals and nature like this. I think it's very important for the council to assist in keeping Orana Park afloat, and I support their request for \$1.5M extra funding per annum.

1085 - Sarah Harrow

Thank you for the opportunity to submit. I would like the CCC to consider increasing funding to Orana Wildlife Park. Orana will be in severe financial difficulty in less than two years without increased Council operational funding support. At present, admission prices cannot keep pace with inflation and the continual rising costs of operation. It is not practical for Orana to dramatically increase admission prices as they need to remain affordable and competitive. According to Orana, until 2018, visitor income covered 90% of annual operating costs; visitor income now covers only 65% of annual operating costs. The park has been operating in CHCH for over 50 years, it is possibly the oldest remaining tourist attraction in CHCH. Families have enjoyed coming to Orana Park for generations and it is a local icon worth saving. It attracts visitors to the region and they carry out very important work for conservation and education. Orana requires a minimum of 1.5 million funding per annum. This would equal 68 cents per month per ratepayer. I would hope that the Council would put some of their priority towards this cause as you do your main commercial interests - such as the neighbouring airport which constrains a lot of surrounding neighbourhood for its commercial benefit.

1086 - Stacey Burnett

Orana Wildlife Park needs increased funding from CCC. I studied a BSc at Lincoln University majoring in Conservation and Ecology, and volunteered at Orana while studying. It is important that this facility/charity is supported to maintain the great conservation work that they achieve in conjunction with other zoos and parks throughout NZ and Australasia to increase genetic diversity of endangered and critically endangered species.

1088 - Chelsea Daly

Would love to see long term funding continue with Orana Park. A brilliant tourist attraction for people visiting Ōtautahi as well as locals.

1089 - Aroha Upritchard

Orana is a part of Christchurch. The team there do an amazing job at rehabilitation and education of animals that otherwise would be at risk of extinction in the wild.

1090 - Bob Brown

I'd like for the council to seriously consider Orana wildlife park in their long term plan. I've visited Orana park many times and support them on a regular basis, the work they do for endangered animals and conservation work for NZ native species is outstanding and cannot be unrecognised and unsupported by the council. I've seen all walks of life visiting Orana park from locals to tourist from all over the world. it's a great place for the children to enjoy the animals and be educated on vital conservation issues. please strongly consider including Orana wildlife park in the long term plan.
regards Mr Brown

1091 - Nadia Bell

Please include Orana park they need the assistance to keep the park a float

1092 - Alex Holder-Kirk

I'd specifically like to speak about Orana Park (OP) and the funding that it receives Orana Park is a very special place to me. I have lived in Canterbury for 30 years and OP has always been a highlight for me. The diversity in animals, the education it provides and the opportunity for learning for primary aged children through to PhD candidates conducting research. Its been immensely sad going to OP over the past 10 years and so and seeing just how diminished the grounds and infrastructure of the park has become. Abandoned buildings, rundown grounds and refuse are an unfortunately common fixture at the park. I directly relate this to the lack of funding the OP receives. It's no secret that OP has been neglected and been used as a local politics football due to zoning and budget issues, however this current state of affairs does not benefit anyone and actively hinders the development of conservation locally, nationally and internationally. with the current enviromental conditions globally, conservation and ecological education is now more important than ever. I implore you to significantly increase the funding to Orana Park, to invest in the future of natural science, to invest in local business, and to invest in the future of New Zealand.

1093 - Alisa Moore

I would like to see Orana Park receive more funding. The work they do for the animals is amazing but it seems like they may not be able to continue helping animals without more money. The price for entry is already quite high so I don't believe raising admission prices is the answer. We have many fond family memories of visiting Orana Park and would be devastated if we could not continue to do this in years to come.

1094 - Katie Godman

Orana Park needs funding... most of us would be happy to provide this as opposed to some other things that most of us do not use

>>>

[Other/Special Interest Topics>Cathedral]; [Libraries>Libraries (Operations)]

Take my share of the rates for the cathedral rebuild and the libraries and give it to Orana park.

>>>

[Other/Special Interest Topics>Cathedral]

Help Orana Park and get rid of our input into the cathedral

1096 - Jessica Jamieson

Orana Park! I would love to see my rate payments go toward Orana Park.

1099 - Rebecca Mackle

Please increase funding to Orana Park so we dont lose an important attraction in christchurch

1102 - Robyn Warburton

Include Orana park update to allow for more tourism opportunities.

>>>

Orana park should get an increase in funding as it is a staple of the city. Could be good tourist attraction if done correctly.

1106 - Emma Richardson

Orana Wildlife Park deserves being in the 10 year plan, receiving \$1.5mil annually for next 3 years. I am currently employed by the park and have been here for 5 years working with the Natives Team. We do a lot of important conservation work, especially with our local kakariki karaka with our breed for release program. For longer than I have been here, we have needed a lot of maintenance and repairs on buildings and infrastructure and desperately need new structures but there isn't the funding to push it all through. Please add us to the plan. It will make a huge difference to us working here, help with our important work we do, and improve visitor perception. We are a major attraction for visitors to Christchurch, being the only major zoo in the south island and the other zoos in NZ are backed by their councils. Yours sincerely, Emma Richardson

1107 - Claire Gullidge

[Strategic Direction>Have we got the balance right?]

Yes, I am happy with the balance, but I am concerned about Orana Park.

>>>

I am concerned about the funding for Orana Park. It is an amazing opportunity for children to view wild animals up close. We have had an annual pass over the last year. Christchurch does not have a zoo, and this is the closest we can get. It is immensely educational, and I think rate payers should invest in this place to support it and teach children about animals and conservation. The zoo is currently rustic, but with some investment could be an even more outstanding facility and attraction.

>>>

Funding for Orana Park.

1108 - David Aitken

I would love to see Orana wildlife park put on the draft long term plan. With the direction the world us heading towards , places such as Orana are green havens for people to come and relax out doors and help with mental health. And further more the native programs such as there orange fronted pakeket breeding programs. A species thats from canterbury and is in need of as much help to prevent it going extinct.

1109 - Sarah Hosking

Please please give money to Orana Wildlife Park on a regular basis, so that they can keep going. They are struggling and are such a great organisation. My family has learned so much about conservation and wildlife preservation and with an annual pass my children have grown up regularly visiting the park.. it is part of Christchurch's heritage and been operating on little funding and gate sales for ever. It is a source of joy and connection to nature and the wider world of animals for our children and family. We came from Auckland and we were so happy that Auckland Zoo, which is an amazing world class facility has a large percentage of council funding and is a huge source of pride and joy for all aucklanders and attracts many overseas and domestic tourist visitors every year bringing money into the economy.. the park is able to be kept at a fabulous quality and offers many different learning and recreational experiences for people.. plus a huge cohort of volunteers that help for free at the park daily.. it would be stellar if Orana Wildlife Park had the same level of support and helped it become the amazing attraction that it could be for christchurch.. This is a missed opportunity for Christchurch - i mean there isnt even public buses that go past Orana - so very hard for visitors and locals alike to get there. How hard would it be to have a regular public bus service going past the gate?. Please consider Orana Wildlife Park in the LTP. Thankyou

>>>

We came from Auckland and we were so happy that Auckland Zoo, which is an amazing world class facility has a large percentage of council funding and is a huge source of pride and joy for all aucklanders and attracts many overseas and domestic tourist visitors every year bringing money into the economy.. the park is able to be kept at a fabulous quality and offers many different learning and recreational experiences for people.. plus a huge cohort of volunteers that help for free at the park daily.. it would be stellar if Orana Wildlife Park had the same level of support and helped it become the amazing attraction that it could be for christchurch.. 1110 - Esther Wew

Increase funding for Orana

>>>

Please increase funding support for Orana Wildlife Park

1111 - Danielle Ashby

Orana Park needs our support, please increase their annual funding. This is a staple in our family and my son has a real passion for helping and learning about animals

1114 - Shunzi Wang

Please support the maintenance of Orana wildlife park, it is such an amazing zoo we have in Chch that children, families and visitors can visit and have fun.

1115 - Karl Stringer

Continued funding for Orana Park. Important as a regular local visitor and as an attraction for out of town visitors.

1117 - Brent Elder

As long as Parks includes things Like Orana Park, an important resource for the community and one that we cannot afford to lose. Our family supports Orana Park frequently, and it is the one place in Christchurch that gives children close up opportunities to see animals they otherwise only see on television. It would be a shame to lose that valuable piece of Christchurch history. Not to mention the

opportunities to volunteer it provides. Hopefully your plan includes things like that, which are important to our great city!

>>>

Don't let things like Orana Park die. It's a part of the fabric of our City, and would be a shame to lose it for all ages. We visit often with our young children, we enjoy it ourselves and my retired parents often join us and enjoy it also. If anything, funding should be increased to the location and it be publicised more frequently. So many great memories, and one of the things that makes us a great city, most cities I have visited overseas have had a zoo, ours is a great one.

1118 - Caleb Eaton

Give money to Orana Wildlife Park, they're becoming a run down facility and need the support. They have infinite potential and could be an extremely powerful draw card to Christchurch as the premier (the only good) zoo/wildlife park in the South Island.

1120 - Nicola Crawford

I would like to see Orana Wildlife Park receive the amount of money they are applying and hoping for. It is the only wildlife park in the South Island and is amazingly popular with people from not only New Zealand but from overseas as well. People come and they spend money elsewhere in Christchurch.

>>>

Orana wildlife park is the only open range zoo in New Zealand. Visitors love the space for both animals and themselves. This park is such a valuable place.

>>>

I have been volunteering at Orana Wildlife park since 1995 and I consider it a privilege to be a part of all that they offer. I am also part of the zoo education team that offers education to the children and high school students of Canterbury. My experiences over the years have been varied and many. I admire the dedication of the staff. They provide wonderful care for their precious animals daily and they are committed to maintaining not only recreation but conservation, education and research. Without this facility I feel that the next generation of children growing will miss out on the utmost importance of conservation and what they can do to help these amazing animals. The park offers education on a daily basis to the public through the volunteers and staff and of course the zoo school brings the wow factor for the children. Over the years I have wonderful memories of the staff and animals that reside there. It's such an opportunity to constantly learn and grow not only in knowledge but in the many conservation projects they are involved with. For example they are one of only a few parks in the world that have been successfully able to breed in captivity the cheetah, and the rhino. They also are part of release programmes for native birdlife in New Zealand e.g. blue mountain ducks,

kiwi, Brown Teal and Kakariki. would implore you to give this money to Orana Wildlife park... 68cents per month for the ratepayer is not too much when the amount asked for is broken down to this. Please help Orana Wildlife Park.

1124 - Lisa Fa'au

I strongly support the continued funding of Orana Wildlife Park. Orana is an amazing place not only for visitors to our city but provides amazing education to the next generation around areas of conservation and animal welfare. I am an annual card holder and regularly visit Orana with my young child. Having a zoo in Christchurch provides us with great learning opportunities for our young ones and it is always a wonderful experience.

1127 - Sue Andersen

I have been a volunteer at Orana Wild Life Park for the past 7 years. Over that time I have watched the park battle with funding and trying to constantly prioritize animal care and welfare. Each day I am at the park, I explain to visitors about the role Orana plays in conservation of our indigenous animals as well as the exotic animals. Many of these are endangered species, such as whio duck, kakariki, kiwi as well as rhino, cheetah, Lema, addax, to name a few. The visitors are always amazed at the amount of breeding that occurs at the park and how all the New Zealand animals are returned to our own National Parks. This is a huge aspect of Orana Park - it is not merely a zoo to come and view animals, it is a place to conserve so many species which are on the brink of extinction. The addax is the third most rare animals on our planet. Rhinos are facing extinction in the wild. Kakariki have been described as extinct before, but now are breeding successfully. I have watched the emotions of the animal keepers as they struggle to provide the best care and often their sorrow when an animals dies. If the council could contribute to Orana Park, the board would be able to focus on the big projects and have some future proofing toward the park. I love to volunteer at the park and always am delighted to see the faces of the public when they experience a close encounter with a giraffe, lion or kea. When they discover the walk through native bird aviary and sit in the canopy having kakariki, kereru, tui and koromiko flying around them, or enter the kea aviary and have a cheeky kea try to steal their hats. This wild life park is an asset to the city, to tourism and also to the environment. It deserves the support of the city.

1128 - Andrea Urquhart

Orana wildlife park is a fantastic conservation park. It is so fabulous to visit as an annual card holder. They are vital for animal protection, education and conservation. Also a fantastic place for young tamariki to learn about animal and conservation. Essentially they are the safe place for animals and educators can utilise this fabulous resource.

1130 - Hinekaha Atariki

Orana park needs help with funding from the council. They need a minimum of 1.5 mil per year. I support them getting the funding as my family and i regularly visit the park and we all love seeing the

animals. I feel the team at Orana park do a great job and they have a good breeding system in place. A lot of the animals are endangered species and Orana park do a good job at protecting them.

1131 - Kirsty Smith

Orana Wildlife Park needs help

>>>

Help Orana Wildlife Park they need money to feed the animals.

1139 - Andy Parkinson

I believe that Orana Wildlife Park is one of the major attractions for visitors coming to Christchurch. Greater visitor numbers who come to see the only major zoo in the South Island will generate business and increase revenue for the local population. Improving transport links from Christchurch airport to Orana would add greater opportunities and encourage tourists to spend time at the park.

1142 - Karen Curtis

Please support Orana Wildlife Park as it is conserving rare animals, plus educating children & adults. Orana also brings in tourists to Christchurch, which bring revenue to the area. Thank you.

1143 - Stuart Berryman

Keep Orana Strong. A lot can be done here.

1146 - Melissa Heap

Please increase funding for Orana Park. This is a big attraction for not only visitors to our city but also for locals like myself who have visited the park for 30 years.

1147 - Georgia Richardson

I want to see Orana Park get the funding it needs to continue to bring in tourists but also to continue to be able to educate our children about animals we would not normally get to see in New Zealand.

1152 - Mark Bishop

My submission is to request for appropriate financial support for Orana Park to allow them to continue their educational, conservation and ecological work. This is a valuable organisation that as a charitable trust, relies on the visitor numbers and donations that in these difficult times are probably under pressure. It's the only large scale zoo of its type in NZ and it would be a major blow to lose it.

1153 - Hayley Olsen

Orana park needs more funding

1154 - Francesca Rae

We have a world-class animal park in Orana that needs council financial support and also a council-supported transport system to the park so spend some money on them whilst also giving unique opportunities to children to learn about conservation.

>>>

Please increase our ability to educate our youngsters on conservation. Orana Wildlife Park is a world-class facility and needs financial support to be able to keep up with maintenance and inflation costs. This is a great recreational facility for the Christchurch area.

1155 - Renee Tither

Christchurch offers a variety of activities however I find Orana Park to be one of the best things to do here. Always take my family and friends from out of town to see the amazing zoo. A little extra help is all they need to ensure animals stay here for all of us to visit

1158 - Sheryl Elson

I would like to see some of what we do in our city get some of the rates increase such as Orana

>>>

I would like to see Orana park get more financial support

1161 - Jenna Zanchettin

Fund Orana park with feeding their animals, we would rather do that than fund a cathedral and a stadium

1162 - Jacinta Charlesworth

Orana Park requires desperate attention. It is a tourist destination with wonderful animals. However the park is sparse, some animal enclosures are actually unethical. They do not provide a habitat and

people are sharing this information. It has so so much potential. This is essential for local tourism.

1165 - Corey Sampson

Orana park needs to get more funding. Being the largest zoo in the South Island it's really looking run down. They have so much space to do so much and it could really attract a lot of overseas visitors. We buy annual family passes every year and feel they really deserve more rate payer money to be able to not only maintain the park but also expand. The potential is huge

1166 - Paula Seaward

[Transport > Cycleways (Capital)]

I believe that orana park should stay and that money shd be spent for helping the animals not for cycleways as there not many cyclists around. Orana park is great and fun and is good for outings, however in saying this during these times it is a bit expensive

>>>

Orana park shd stay and be helped

1167 - Anja Luecht

[Parks > Biodiversity & Ecological Restoration]

No I think you should support Orana Park and also plant more natives around Christchurch.

I think it would be great if you can support Orana Park. It holds a huge interest for the Christchurch rate payer as well as children. It is in desperate need for help and I would like to see it get some support.

1171 - Josephine Brenda Good

I would like to address Orana Park - it is so unique for Christchurch, New Zealand and the world. For people to be able to visit animals in as near as it is possible for captive endangered species, in their natural habitat is unique and a bonus for Christchurch. Please can the council provide more funds for Orana Park?

1172 - Colleen Appleton

I believe Orana park is an essential part of our tourism in NZ. Many families that visit us from overseas and out of town go to the park. It is also an educational park for our children to see wild life. Orana Park needs to have funding to help with the continuing upkeep of the park.

1177 - Alex Simpson

Increase funding to Orana park A zoo is important for the city, provides education, specialised jobs,

1178 - Eva Fenwick

Orana wildlife park needs a funding increase. It is a charity and brings joy and education to so many. With advertisement as well you could boost attraction and see the difference.

1181 - Alison Eagle

I would like you to increase the funding for Orana Park as it is such a taonga to Christchurch and in fact all of the South Island. Even though our family is grown up, we still visit Orana Park whenever we come to Christchurch, it is a must do during a stay in your beautiful city. The conservation work they do is truly admirable and at the extra cost of only 68c per rate payer, to be able to keep this wonderful place going and properly funded, it is an absolute must do. Thank you

1188 - Christine Steer

As a Nanny I have been taking children to Orana Park for at least 30 yrs. All the children have learned so much and to this day have great empathy with all animals.

1190 - Callum McGlinchy

Fund Orana Park fully.

1193 - Stephanie Van Dalen

Oran park is a great asset to Chch and the wider community. We've been purchasing an annual pass for years. Ours kids are various ages love coming to visit, it's a great day out. Their favourites are always the giraffes, lizards and birds and the farm yard. They love the experience. If they were to close it would be a huge loss to the community.

1194 - Aaron Tallott

Orana park needs to be supported

1195 - Poppy Mullan

Orana park does the most amazing work and is helping our future so much and they provide the best care to the animals but they must be funded more!! I love Orana Park so much!!

1196 - Rob Lee

Please take Orana park wild life park into consideration for future funding. This is a place we visit and there are post earthquakes very few places worth visiting to be honest. Tourist wise it is a major attraction and draw card for Canterbury. Thank you

1200 - Lisa Mazey

Please continue to fund Orana Park it has such an important role of educational and also offers people to see animals from countries that they may never be able to see. As well as helping conservational efforts to help breed and protect endangered species

1202 - Rosemary Brownsett

Please keep Orana Park financial assistance going... Christchurch only has one wildlife park & Orana Park is widely known throughout the world for their conservation efforts... council/ government should be funding the park and advertising as a tourist destination more to help the Park to maintain their costs...

1204 - Sam Yates

Orana Wildlife Park is one of our family's favourite places to spend time. The animals are well looked after & you can see the staff genuinely care for them. Increased funding for Orana Wildlife Park would be so appreciated & help them maintain the level of care the animals deserve.

1205 - Ambalee Sinclair

Orana Park

>>>

Save orana park

1207 - Diana Mellor

I visit Christchurch on a regular basis. As well as its beautiful parks and gardens and successfully reconstructed city centre (congratulations) after the earthquakes, it has other tourist attractions to offer. For me; and many others, one of the foremost of these is the wonderful ORANA PARK. This is a real gem, and very well run and maintained and even through Covid, the animals were foremost. Please enable this unique (in New Zealand) facility to continue by extending funding, for both education(for us, our children, and grandchildren,)and informed entertainment, it is one of the facilities which makes Christchurch unique . Diana Mellor

1208 - Rachel Ballinger

Please support Orana Wildlife Park with increased funding. They are an important attraction in Christchurch and unique in what they do.

1209 - Kevin Ward

Yes i think orana park needs more funding its ap fantastic place to go to considering Christchurch is turning in to a boring place especially for kids we need to keep orana park around for years to come

1213 - Anne Mackechnie

As an educator at our school, I cannot overstate the significance of Orana Park for our students' education. It provides an unparalleled opportunity for experiential learning outside the confines of the classroom, offering real-life contexts for understanding animal behavior and conservation efforts. A visit to Orana Park is not just a field trip; it's an immersive educational experience that leaves a lasting impact on our students. My favorite memory of Orana is witnessing the awe and wonder on the faces of our pupils as they observe animals in their natural habitats, gaining a deeper appreciation for wildlife and the importance of conservation. Orana Park perfectly complements our curriculum by providing tangible examples and practical applications of concepts learned in the classroom. It reinforces theoretical knowledge with hands-on experiences, enriching our students' understanding of biology, ecology, and environmental science.

1214 - Susanne Tregurtha

I strongly urge that Orana Wildlife Park be granted increased annual funding support from the Christchurch City Council of \$1.5M each year, equating to 68 cents a month per rate-payer, to ensure the on-going financial sustainability of Orana. Orana Wildlife Park is an invaluable part of the community and is a registered charity. Orana needs the support of council and community.

1215 - Kay Neale

I would like you to consider mor funding for Orana wild life park. It is a diamond, for the wonderful breeding programs. For the immersive experiences of being close to the animals, what fabulous experiences for all who visit. Its a true tourist attraction, well worth more funding and support.

1222 - Storm Rogers-Boult

Orana wildlife park needs an increase in funding. It's a massive assest to Christchurch and somewhere I frequently visit. It's a great way for people of all ages to learn about conservation as well as animals. Would be devastating if they had to close.

1223 - Chris Biddle

My whānau and I regularly visit Orana Park and have done for more than 26 years. The park provides lots of education and has taught us about caring more for the environment and protecting species from extinction. One of our kids is currently volunteering there, as she wants to work with animals. There are so many reasons why Orana Park is important, for us it is a positive, uplifting place to visit with friendly staff and animals who deserve the right to live. Please please please support them. support the

1225 - Josh Brown

I would like to see the council commit to providing ongoing funding for Orana Wildlife Park as part of the Long Term Plan. Orana is a massive asset to the city and provides a huge variety of benefits, however it needs council support and funding to continue the important work it carries out. This includes vital conservation work for several native New Zealand species which are on the brink of extinction, including local Canterbury bird 'orange-fronted kakariki' which numbers fewer than 400 in the wild. Orana is part of the critical breed-for-release program for this species to help protect it from going extinct. Additionally, Orana provides recreational opportunities for Christchurch citizens (including school groups) in a large, open outdoor space, that not only promotes exercise, health and well-being, but also helps educate about the importance of protecting and caring for our environment and all the species that inhabit it. Providing funding for Orana will ensure that it remains an asset to Christchurch city for many years to come.

1227 - Emma Hawke

Orana Wildlife Park plays a critical role in the conservation of our native fauna, for example Kakariki Karaka. I have grown up going to the Park and was lucky enough to conduct University research out there. It is one of my favourite places in Christchurch and I cannot speak highly enough of what the team at Park do. They must be included in your Long Term Plan!

1234 - Wendy Andrews

Im a huge fan of Orana Park and think its a gem in our community. The parks work with diverse animal species Particularly gorilla habitat, is truly impressive. What stands out to me is their dedication to mimicking natural environments, which is crucial for the animals and enriches the visitor experience. Their contribution to saving endangered species like the South island who who and southern white rhino demonstrate a real commitment to conservation. And let's not overlook the educational impact they have., reaching out to 200000 visitors a year to spread the word on conservation. I strongly feel that the councils funding plan should prioritize support for Orana Park. Its an investment not just in the park but in our environmental future and community education. Thank you

1240 - Rob Goodman

Orana Park is a gem in the crown of the Christchurch City council. Many families from all over Canterbury have visit this wonderful park and found memories of going here. I would really like to see the council up its funding to help support this great attraction we have in our own back yard.

1241 - John Ballantyne

Orana wildlife park is an incredible asset in our region. As an 8 year weekly volunteer at Orana I am always surprised by the number of overseas visitors that visit the park. Orana is also focused on educating visiting families and school classes through their zoo school programs. As a volunteer I enjoy helping visitors to meet Orana's animals and more importantly talking about habitat loss and the affect humans are having on species numbers around the world. Unlike North island zoo's like Auckland and Wellington who are financially supported by local councils, Orana is highly reliant on gate takings and struggles maintain the quality and progression into the future that such an important regional asset requires. Orana needs financial support and recognition in the Long term 2024-2034 plan.

1248 - Ash Murphy

I would like to see the council better supporting Orana Wildlife Park, which is a critical amenity within Christchurch for local families, for children's education via school and family visits, for local businesses bringing in significant visitation and revenue to the wider Christchurch area and, of course, providing a vital conservation benefit for native and exotic animals. I visit Orana Park with my family regularly, and enjoy the space to spend time with whānau, relax in the outdoors and appreciate the animals and environment across the Park. Its especially pleasing to know that visits are enabling conservation support for some of the world's most threatened species - including kākārīki karaka/orange-fronted parakeet - which is New Zealand's rarest parakeet and only found in a couple of Canterbury valleys. The captive breed for release programme and advocacy work Orana conducts for this species (the only native bird restricted to Canterbury) is a vital part of its ongoing survival, and it is great to still have this bird (even if in captivity only) in Christchurch - where it once would have flourished. I greatly value this charitable facility for its positive educational, environmental and societal impacts. Council support at \$1.5million annually to the Orana Wildlife registered charity, will be a valuable investment in Christchurch, our people, our environment and wildlife. Orana is an amazing place for families to get into nature, learn about wildlife, and connect with each other. It should be treasured and supported, not just treated as any other business. The potential closure of Orana Wildlife Park if long-term funding is not secured would be a great loss for Christchurch, making it a less desirable destination for families, and reducing the connection of our people to nature. I encourage council to financially support Orana Wildlife Park at \$1.5million per year, for now and into the future, for the benefit of all Christchurch.

1250 - Christina Dalton

I think Orana wildlife park should be part of the councils long term plan as it is a fantastic asset to Christchurch and they do great work for our native species. It is a great facility for families and a great tourist attraction so should be prioritised for funding.

1251 - Amy Tuffnell

I think Orana Wildlife Park should be part of the long term plan because I think that it is a great space for everyone (especially families) to enjoy a time in a great expanse of green space and interact with animals. I think the work they do is great for educating tourists about our native species, along with providing important work for rehabilitating native animals and conservation work for exotic species

1252 - Clare Walsh

Orana park should be part of the long term plan for funding - overall, it is a massively important part of Christchurch's tourism sector. One of many positive day time, family attractions that Christchurch needs as part of its constant development as a welcoming, family orientated city. The park does incredible work for NZ native conservation, and I believe it should be supported fully by CCC.

1253 - Emily Brewer

Increase funding to Orana Wildlife park

1255 - Sharon Gutsell

Orana Park requires a substantial amount of money to continue investing in the future of NZ's and the world's wildlife. Decent funding (over \$1 million) from council would help ensure the continuation of this. Orana is a big drawcard for visitors to Christchurch, its future is important. Spread through the ratepayers, this funding needed by them doesn't equal a huge amount, so please consider the positive reasons for helping Orana park. Especially in a world where the natural environment for these animals is often disappearing leaving them at risk of extinction. Thank you

1262 - Cassandra Harper

Support for Orana park. We love taking our girls to Orana, definitely prefer it over Willowbank. Our oldest knows most of the animals, loves running round and can easily spend a few hours there. And we always like to get an annual pass there to. Any funding they can receive especially for the animals will be so appreciated and is well deserved. rs

1263 - Josie Webster

Orana park needs more funding. Other major cities in NZ fund local zoos, and Orana park should be no different. They are barely keeping afloat. If the council put more funding in they will be able to keep running and should be able to do some more updates and maintenance to zoo. If looked after it will bring in more business.

1264 - Maxim Kaluzhny

One area of interest for me is Orana Park, compared to other zoos around New Zealand, Auckland, Hamilton and Wellington, Orana seems to be lacking resource and capital. It is the only open range zoo in New Zealand, that makes it incredibly special, and it has so much potential. Wildlife conservation is incredibly important, and globally it cannot be under evaluated.

1266 - Simon McGartland

Orana Park needs an increase in funding in order to maintain such an amazing asset for Canterbury. They do such great things. Please consider increasing their funding in order to keep this great place

open. Kia Ora team.

1268 - Rae Volante

ORANA PARK I am writing this submission to support increasing the funding support to Orana Park on a long term basis. I have bought annual passes for many years and it is the one outing my children regularly get on my limited income. Orana Park has meant so much to our family to be able to see and learn about all the animals, my 3 year old is obsessed with the Giraffes and has no problems telling other people in the line what the rules are when feeding them. The staff do a fantastic job and if they were to close down due to lack of funding it would be a massive loss to local families and visitors to the region.

1269 - Paayal Dyer

Please help Orana, we love going there and those animals are like family.

1270 - Qian Zhang

About Orana: Our kids love to go and we have purchased annual family pass for more than 3 years. We love to see more animals as well. It is good place for children to learn animals, community and environment. WE DO NEED ORANA FOR OUR COMMUNITY.

1271 - Juliet Duder

Please support the upkeep of Orana park, it is a phenomenal addition to our city and a vital park of world wildlife conservation.

1272 - Sarah Hogan

Please include Orana Wildlife Park in your long term plan. It is the only large scale facility of its kind in the South Island and offers a multitude of services to visitors. Additionally, it is an important conservation facility for native birds, through involvement in breed for release recovery programmes (whio, pāteke, Kākāriki karaka). The Park needs to be able to compete with similar facilities in Aotearoa to attract and keep it's very skilled staff.

1274 - Phillip Bewick

Orana wildlife park needs to be kept open, invest more into local attractions like this

1277 - Sarah Masters

Orana Park is a huge part of Christchurch and we need to give more support. This Park has been a part of who we are for years, and we need to have it around for future generations. Please look at more funding for this amazing asset.

1281 - Jason Lathe

Orana Wildlife Park will be reaching its 50th anniversary in two years' time, but without the support of the council, this iconic wildlife park could run out of money before it is able to celebrate this milestone. I work as the retail manager at the park and see first-hand the impact visiting the animals has on the community, as well as how many visitors it brings to Christchurch. Every week I meet people bringing their grandchildren who talk about the days when they visited as a child, or the fantastic school visits with the education teams bringing hundreds of excited children in for close encounters with the amazing animals. Many locals join as members and have expressed how the animals help them with their mental health struggles, with others coming for afternoon strolls around the park and a catchup with friends. Orana really is an iconic part of Christchurch's history, and I don't envy the challenges the council have in deciding funding to support so many sections of the community, but not to allocate support would be a travesty.

1285 - Lorna Revis

Orana Park is a great tourist attraction and wonderful place for Christchurch families to go. For the past four years I've used a family pass to take my five granddaughters to Orana Park. They are now aged 4-12 years and they all really enjoy this outing. I usually go 8-10 times a year and stay 3-6 hours each time. The Park used a lot of volunteers but requires desperately need increased annual funding support from the Christchurch City Council of \$1.5M each year, equating to 68 cents each month per rate-payer, to ensure the on-going financial sustainability of Orana Wildlife Park. I strongly support and encourage the Council give this financial support to this unique wildlife park. It saves endangered species and is a wonderful educational and recreating resource for our city.

1286 - Tristan Kamps

Orana Park has been a draw card for residents and visitors for at least 40 years. Helping educate and amaze the public about the diversity of animal species we have in the world. It does this by bringing the public in contact with these great animals and educates them as to the plight of many of these as being endangered. Not only is Orana Park important for educating the public about wildlife, it takes an active role in world wide breeding programmes ensuring the endangered animal population and maintaining genetic diversity in the populations. The importance of Orana Park is not only one for CHCH and it's residents but as a draw card for visitors, in education and in ensuring a healthy worldwide population of amazing animals for our children and our childrens, children to enjoy.

1288 - Olesia Martins da Fonseca

Not enough for Orana park

1289 - Leanne Hughes

Please keep Orana Park open by continuing to provide funding to this wonderful resource in our community. It is the only open range zoo near Christchurch and is a huge asset to our city. I have so many wonderful memories from my childhood of visits with my father and it is one of the reasons I am an animal lover. I am looking forward to introducing my two children to Orana Park and sharing their joy.

1301 - Caitlyn Robertson

[Grants & Funding > Other]

I believe there should be more funds going towards parks like Orana Wildlife park & Willowbank as they are home to many Taonga species and precious animals to many who reside in Christchurch/New Zealand.

>>>

Places like Orana Wildlife Park and Willowbank are key recreation and educational facilities and for some people are the only opportunity they will ever get to seeing such species in their life. With consistent decline of species and environments due to change of land use and agricultural growth, global warming and many other factors, we need to prioritise places like these. Christchurch is so lucky to have these accredited wildlife parks and actually can make a difference to population numbers if the support and money is contributed to them. Coming from someone who has lived in Christchurch most of their life and studied in Dunedin, I have gone to animal parks as much as I could, when living in Dunedin I was so sad I couldn't go and look at these magnificent creatures. Please consider contributing some of the money to these places not only for continued care of these animals but for the health and well-being of the citizens of Canterbury :).

1304 - Kevin Stanley

I would like to submit the following in support of additional funding for Orana Wildlife Park. We know they require more support from Council to continue their work, and what they do is one of the magic things about Christchurch and the wider NZ community. My family have visited several wildlife facilities around the world, and Orana, particularly considering the size of its supporting community, is right up there. Offering people the chance to see animals in as close to their natural environment as practical, is more important now than ever. The support for endangered species, and the research these parks do to prepare us for inevitable future species endangerment, is priceless. My family returned to NZ 5 years ago and we have been annual supporters of Orana since then. Our two grandkids, aged 9 and 6, are regular visitors to Orana, either with us or with their parents. It's a joy to watch them learn how to value the wonders of the animal kingdom without having to go overseas, or to a more limited "zoo" facility, which Christchurch doesn't have anyway. We have had many friends and family visit since we returned "home", and everyone comments on what an asset Orana is to our city. Christchurch is known as the home of Orana, and if that doesn't continue, Christchurch will be known as the city who didn't understand the value of Orana, with all that implies. I sincerely hope the Council provides the financial support required for these folks to continue their important work. It's not an option in my opinion.

1305 - Cheryl Cartmell

Please consider the funding of Orana Park, I have found it to be a place of excellence re wildlife care and management. Education of the general public on many topics, including habitat diversity and climate change, is always evident when visiting the park. It is a place our children have fond memories of visiting, and we make a point both visiting Orana when in Christchurch, and of recommending as a place to visit to friends and our overseas visitors and family. It is a real asset to Christchurch.

1306 - Tammy Wells

it's imperative, especially in this difficult economic time, to continue the wonderful work of Orana Park in rural Chch and to assist in supporting and upholding this facility. The animals need us and the city needs Orana Park...

1307 - Lynette Reed

As far as funding for Orana Wildlife Park it needs to be maintained. It is a wonderful asset for the city and is enjoyed by residents, visitors and tourists.

>>>

We want the Council to continue to fund Orana Wildlife Park. It is a wonderful asset for Christchurch and it is a must visit when we visit Christchurch. Good for residents, visitors and tourists

1310 - Sue Hales

I think we need to put money into Orana Park, this is great for Christchurch as a tourist destination as well as local visitors. They do amazing conservation and educational opportunities for local schools. My daughter did 'a keeper for a day' during the school holidays and absolutely loved it and it opened her eyes to conservation and care of exotic animals. My job is wholesale at Reward Fresh Harewood and we have supplied produce to Orana park for over 10 years and this is a big customer of ours. We have looked after their needs through as we have our supplier as we see Orana as an important part of Christchurch.

1313 - Julie Albengrin

Long term support for Orana Park, this is an important part of any city. Having a Zoo is crucial for conservation of wildlife, can be expensive but is a good opportunity for children to appreciate the beauty of this planet. Part educational, conservation, tourist attraction, have many functions I hope the council provides support to this important part of the community

1314 - Charmaine Thomas

Support for Orana Park is vital to the enhancement of Christchurch City.

1315 - Robyn Peart

Please fund as much as you can for Orana Park. I believe they need 1.5 million. The South Island needs this park and the enjoyment is great no matter what age group we have visited with. The learning about other areas of the world and its animal life is very interesting

1316 - Paula Taylor

Please ensure that funding is kept adequate to keep Orana Park viable. It is an essential asset to the city and also the long term breeding programmes in place.

1317 - Azariah Aitken

Please make sure special family spaces like orana park are funded enough to keep existing

>>>

Orana park and family and community spaces to be funded to keep existing with more funding to make sure they can recover from covid times and keep up the standards for a great place

1318 - Anne McMaster

I would like the Council to continue to invest ratepayers money in Orana Park. It is essential, not only for the animals welfare, ongoing breeding programmes, etc but for the City of Christchurch. Orana Park has an excellent reputation in the Garden City.

1320 - Carmen Kleinhans

Orana Wildlife Park provides such a valuable tourism, conservation and education facility. I teach kindergarten in Timaru, and I often speak to parents of young children about their visits to the park and what an enriching experience it is for their children. My own children love to look at the photos of their visits to the park and remember what they learnt about different animals. When visitors to Canterbury ask me for ideas of what to do, Orana is always top of the list, and our whanau will travel to Christchurch especially to go there, planning the rest of our visits around them

1321 - Raelyn Franklin

The protection of animals is a high priority for me and that includes endangered species and especially the work that Orana Park does to help with this course.

1324 - Anaru Matai

[Spending > Te Kaha], [Libraries > Libraries (Capital)]

Fund libraries, orana park stadiums etc

>>>

[Libraries > Libraries (Capital)]

Just want to keep the funding for libraries and orana park

1328 - Belinda Nicholls

I would like to see funding go towards supporting Orana Park Wildlife park. Protect of these animals is extremely important , as is the experience and education for our younger people, encouraging connect with nature and environmental concerns.

1336 - Chris Woodruff

Orana Park needs some help too

>>>

Orana Park could do with a hand

>>>

Orana Park is a valuable local and world important business that needs the councils help to continue. I absolutely am happy with some of my rates going to assist this fine venture to survive and continue its excellent work. My children grew up with Orana Park and I would very much like my grandchildren to do the same.

1337 - Ashley Earlgoulet

Orana wildlife park should get funding!

1338 - Gail Krsinic

The councils financial support of Orana Park is a crucial and essential must to maintain. Christchurch families and visitors flock to this iconic attraction which provide world class facilities for conservation

and learning. I have been visiting Orana Park since it opened in 1976. We made use of the benefits of having a family pass when the children were young and today we still have annual passes as adults. I would not like to think about Christchurch without this amazing place being able to exist and thrive.

1343 - Simon Bird

CCC needs to continue and increase its support of Orana Wildlife Park. I am from CHCH originally and I still have family that lives there. We travel to there from New Plymouth at least 1-2 times per year and a visit to Orana Park is a bit of a tradition for my own family now. Our children are now 10 and 13 years old but they still have a wonderful day out there when we visit. By the way I can still remember the days of when you were allowed to drive your private car into the lion den! The importance of the conservation and/or educational work that the staff carry out there is huge. It is surely a top attractor for tourism to the city too. Although we do not purchase an annual pass yearly (due to our residential location), my brother's family does and they use it a lot.

1349 - Caitlin Devor

I am a high school biology teacher and visit Orana Park each year with Year 13 students completing AS91601 "Carry out a practical investigation in a biological context, with guidance." Students spend a day getting field study training from education experts at Orana Park and then return for at least a second full day to complete their study observations. Students are welcomed by Orana Park to return for a third day if they need additional time to complete their observations. Orana Park allows Christchurch city students the chance to observe endemic wildlife like the kia and tuatara that they would otherwise not have access to for school projects. Orana Park is requesting Council funding to pay for animal care. That is money well spent to inspire future ecologists and appreciation for and understanding of Aotearoa's endemic species in students destined for other careers.

1360 - Jack Baker

As a council, you need to fund a minimum of \$1.5 million to Orana Wildlife Park annually to ensure this great facility can be financially supported for the future. The cost to care for the animals and maintain the wildlife park is reliant on visitor entries, but a boost from the council will mean animals can be continued to be fed and well-looked after. This extra bit of money, which will cost the average rate-payer very minimal, will also allow the park to have much-needed renovations, especially for some enclosures which have been run-down due to the financial stress of COVID. We need your help, CCC. Orana Wildlife Park has been a huge part of my life and one of my favourite places to visit from a young kid to today. The range of exotic and native animals in a great open-range setting is something that sets Orana apart from other zoos in NZ. Animals like gorillas, Sumatran tigers, giraffes and white rhinos are amazing to see every single time I lay eyes on them and I would hate to not be able to see these incredible creatures in our city. Orana Wildlife Park is something our city needs, and Orana needs the CCC to help. Please!

1361 - Jess McConnell

Orana park is a jewel is Christchurch's crown and needs an increase in council funding to be sustainable. We regularly visit with our family and visitors.

1366 - Fiona Rutherford

Please support Orana Park, this wildlife park is a great asset to Christchurch. I am happy to support this via my rates.

1367 - Kay Lemm

Funds to Orana park for animals

1368 - Lorraine Dobson

Orana Park Please dont let these animals be invisibile

>>>

Please dont forget the animals at Orana Park are luving breathing sentient beings

>>>

Please please please overspend at Orana Park.... your gorillas are sooooo beautiful bearly human beings

1369 - Christopher Roughton

Our many visits to Orana Park have confirmed our opinion that this is a wonderful asset to the City of Christchurch and to the ongoing survival of some of New Zealand's endangered species. The successful breeding programme being undertaken by Orana Park is World class and every effort to support the Park in its endeavours should be encouraged. A loss of funding would be disastrous to the Park, the City, New Zealand and eventually the World. Maintaining or even increasing its funding is vital to the ongoing operations of the Park which obviously has a reputation second to none.

1370 - Jeremy Kaye

Funding grants should not be cut, such as to Orana Park, as these organisations rely on Council support to continue operating and significantly as to the city's culture.

>>>

I do think the CCC should help support orana park though.

1372 - Teressa Moir

Orana Park is such a special place for families to see these amazing animals up close, learn about wildlife conservation and for our children to know more about these animals & be able to make a difference in the future. We have been many times and it's always a favourite.

1376 - Tarrant Paterson

ChatGPT Orana Wildlife Park stands as a beacon of hope for both New Zealand's native wildlife and exotic species facing threats in the wild. As a vital sanctuary and conservation hub, Orana plays a pivotal role in safeguarding the future of indigenous fauna while raising awareness about their plight. The need for securing funding in the Christchurch City Council's long-term plan cannot be overstated, as it directly impacts the continuation of Orana's crucial conservation efforts. Not only does Orana provide a haven for native species, but it also serves as an invaluable educational resource for local schools, communities, and international visitors, fostering a deeper understanding and appreciation for biodiversity. For our young family, Orana has been more than just a park; it has been a gateway to nature, fostering core memories that will endure a lifetime. Witnessing the wonder and amazement of fellow visitors and families as they connect with the park's inhabitants underscores its significance. With adequate funding, Orana can not only sustain its existing initiatives but also enhance its facilities and expand its reach, ensuring a brighter future for wildlife conservation and education in Christchurch and beyond.

1379 - Shannon Hanrahan

I believe in Our Orana Park it's a wonderful resource for our children and our grandchildren we should be preserving it. Such an amazing place to share memories and discover animals of all description. It would be a significant loss the the people of Canterbury to loose this. There is a significant up lift needed in funding but we should make this a priority especially with the breeding programmes that they provide. We need a commitment to our animals and the protection of these beautiful beings

1382 - Emma Coutts

Orana Park attracts a lot of visitors and the excellent work Orana does for conservation.

1383 - Bridget Ryan

Orana park needs funding, they help alot of animals

1387 - Helena Leigh

Give Orana park their funding

1390 - Roxanne Spivey

Funding for Orana Park!

1398 - Carol Woolf

Please support Orana Park which is a special place for our people. 1.5m is not enough contribution. We will lose something special for our children. I would much rather support this than the cathedral etc...as a rate payer

1399 - Tim Coopey

Orana Wildlife Park is a much loved place for Christchurch visitors and needs to be in the councils budget.

1400 - Dean Cooper

I would like to express my heartfelt support for Orana Park, an invaluable asset to Christchurch and a treasure trove of natural wonders for both locals and visitors. Orana Park is a sanctuary of learning, conservation, and unforgettable experiences that resonate with my family, with young children in particular, and I believe the broader community. With two young children of my own, finding activities that are both educational and engaging can be a challenge. Orana Park meets this need every time. The park offers a unique opportunity to connect with nature and witness the majesty of wildlife, from the lions in their spacious enclosures, to the thoughtful gaze of the gorillas, the graceful stride of the giraffes walking over to be fed by hand, and the playful antics of the meerkats. These entertaining and educational moments stay with us long after our visit. Orana Park is a gateway to understanding nature and the critical role humans play in conservation. Not only does it provide sanctuary for species at risk but also engages in vital breeding programs and educates the public about the importance of ecosystems. The educational programs offered by the park, particularly those aimed at children, help to foster a new generation of conservationists. Orana Park contributes to our local economy, attracting tourists to our city. It enhances Christchurch's reputation as a city that values and protects its natural heritage. In a world where urbanisation and technology often distance us from nature, Orana Park serves as a vital bridge, reconnecting us with the planet we share with these incredible animals.

1401 - Jenine Screen

As a family, we want the Council to support Orana Wildlife Park. Orana has had a huge positive effect for us for the last 30 years that we have lived in the South Island. The amazing work that they do for Conservation and Breeding here in NZ as well as Internationally is so essential more so than ever before. The Educational Programmes are amazing and need to continue for the sake of the animals, the environment and the planet and ensuring that this knowledge is continued to be delivered. We have supported Orana for many years through visiting (30 years) and by sponsorship and annual membership (15 years) as we have always loved going there and know the important & vital work that they do and the role they play in the survival of animals around the world. Of course there is also the attraction of visitors to our region that is important as well.

1403 - Carolyn Kaye

Orana Park is a very special unique place that needs council support. We need to look after Orana Park and Willowbank that offer such unique experiences and are educationally important. We need to protect these places for future use as they are an existing gift to Christchurch. Please ensure that funding is available for Orana Park.

1404 - Logan Eager

I believe that Orana Wildlife Park is in absolute urgent need of being added into the long term plan more specifically I support that Orana park receives an increased funding of 1.5 million a year. The projected revenue for Orana park has shown devastating effects for its hundreds of animals and I believe also to the overall community and morale of Christchurch. The park has been open since the 80's leaving long lasting emotional connections and memories for the people of Christchurch, the park closing down could lead to decreased morale among the people of Christchurch. Furthermore, as a growing city, open green space becomes ever smaller and more valuable as time goes on, in fact one of the major values of the redesign of Christchurch city post earthquake was for it to be far more interconnected with nature, primarily for the purpose of mental health. Therefore it would contravene Christchurch's very design by not supporting Orana park during its times of struggle. Orana closing down would mean that a humongous area of nature and wildlife in Christchurch would be lost. In conclusion I support the movement that Orana park has an increased funding of 1.5 million a year and this to be added to the long term plan.

1409 - Dawne Reader

I would like to suggest funding to Orana wild life park, having been a zookeeper there working with native birds and reptiles, I'm very aware how important of a role this wonderful facility plays in being a voice for these animals, and advocates for the exotic animals, providing learning opportunities for people to understand why our environment is important and why we need these creatures here with us!

1410 - Letitia Taylor

Money needs to be spent on Orana park, it's been around for so long, we went as children when it was a drive through and to be able to go now and take my daughter and share the same memories is priceless. For my father still to be able to go and visit and reminisce is brilliant. This park is a great asset to Chch and NZ with nothing else quite like it. Where else can you go and spend the day watching the animals have their very life not in cages. It needs to be supported and helped to survive.

1413 - Tania Brewer

Now Council threatening to lower support to Orana Park, which is a great tourist attraction. If the Council got onto the stadium sooner we would have more concerts and events, which would increase tourism in turn supporting Orana Park and other attractions. Therefore, Council have let rate payers, hospitality, retailers and tourist attractions down, so should at least support the likes of Orana Park, as Council's procrastinations have caused their money issues.

1414 - Emily Goomes

I would like to support Orana Wildlife Park becoming a part of the council's next long term plan. I volunteered there for two and a half years which was incredibly rewarding but also led me into my current job there. I have been working at the park now for a year and love every minute of it. We see a massive variety of visitors from Christchurch locals to north islanders to tourists from just about every country. Tourists often come to see us after just having gotten off their flights, or just before their departure flights, given our proximity to the Christchurch airport. Many people tell me that they love their time at the park but there are some who are beginning to see us becoming a little scruffy around the edges. Increased funding would help us keep up to date and be a welcoming attraction for all of our visitors. Having been a volunteer myself, I understand the value of being able to help out at Orana, not just for the park but for the volunteers as well. It is incredibly rewarding for us and, for several previous volunteers, has led us into careers within the park. We have a range of volunteers, from high school students and university students, all the way to retirees. For some it is a great way to stay involved in the community after retirement as well as a great social outing. For others it is a foot in the door for a future career path in animal care, with many young volunteers going on to secure a placement at Orana to study animal management courses on their way to becoming zoo keepers, biologists, vets, animal behaviouralists, etc. There is also the incredibly valuable and ongoing conservation work taking place at Orana. This is mainly for our precious native species but also for exotic species as well. The Canterbury spotted skink was rediscovered living at Orana after previously being thought extinct in the area. We are also host to a wild boulder copper butterfly population, with a new butterfly garden being created with the help of local primary school students. We breed the kākāriki karaka, the rarest kākāriki in new zealand, for release into their natural habitat, having released around 100 so far, adding to their current population of only 300-400. We also try to convey 'take home messages' for our visitors in our daily presentations, highlighting things such as keeping your dog on a lead if you are walking through native bush, not feeding wild kea, or planting some New Zealand native plants in your backyard to encourage native birdlife to return. I believe strongly in what Orana Wildlife Park is doing to support the conservation and preservation of our precious natives before it is too late. I also see great value in our volunteer program and the doors it can open for all sorts people. We engage the community in so many different ways, from school children in our zoo school program and corporate volunteering days, to the elderly in our rest home guided tours. I even remember coming our to the park during my childhood and have my own cherished memories here. I would love to see their future secured with a place on the council's long term plan, and see what other great things Orana is capable of with the right resources. Thank you.

1416 - David Laughlin

My particular submission is to ask council to give financial support to Orana Wildlife Park, to assist in its increasing operational costs. The park has been a feature of city life as a recreational, educational, and environmental asset without comparism, anywhere in the country. While visitation by city residents is the biggest segment, out of town and international visitors are significant numbers, along with the economic benefit to the city in respect of the many aspects of he hospitality industry. I have personally supported the park for over 40 years, as I believe in all it stands for and what it actually achieves. I feel that council should also examine the parks record over the years, and hopefully arrive at the same view, and in doing so offer some financial support. Thank you for the oppotunity of

making this submission. Best regards, XXXX

1425 - Angela Poole

this is an amazing attraction for Christchurch and needs to be well funded in order to stay a fabulous attraction.

[Coder Note: referring to Orana Park]

1438 - Robert Alan Ross

2. Orana Wildlife Park: Comments on Plan

The creation of the Orana Wildlife Park in 1976 was an extraordinary achievement. Those visionaries who created it and those who operate it in these challenging times can be truly proud of their achievements. It is unique in this country, being the only open range zoo.

My wife and I are [REDACTED] and almost always take the opportunity to visit the Park when we are visiting Christchurch. We always commend it to friends who are planning visits to Christchurch.

The Park performs many roles including: native species conservation; exotic species conservation; and conservation education, especially amongst children. As a former Youth Activities Officer in the Department of Internal Affairs, Christchurch, in the early 1970s I took an active role in creating junior naturalist groups in the city. Thus I fully appreciate the importance of conservation education for children. Apart from the Park's role in native species conservation, the Park's involvement in exotic species conservation is vitally important. The Orana Wildlife Park, and similar zoos in other parts of the world, provide essential safe havens for animals whose natural habitats are being degraded and eroded by human activity, and threatened by climate change.

As you well know the risks of the Park not securing the Council funding it needs are:

- Financial sustainability;
- Deferred maintenance (an apparent problem when my wife and I last visited the Park); and
- Retaining specialist staff.

The Park argues that it needs \$1.5 million each year from the Council to ensure its on-going viability. I endorse this request and have myself made a modest donation to the Park during the Covid-19 crisis.

The creation of the Orana Wildlife Park was an extraordinary achievement and it must be preserved for future generations. Apart from being a significant tourist attraction and having an educational function, its importance in preserving local and exotic species cannot be overstated.

Also attached for your convenience are copies of the above comments plus a copy of the Radio New Zealand article regarding the Arts Centre.

[Coder Note: full attachment available]

Putting my support forward for additional funding support that is required for Orana Wildlife Park (1.5mil). It is a huge part of our Tamariki's childhood experience. Ensuring that it has sufficient funding is important so it operates at the outstanding level that it has been, and even enable it to offer more. Please consider apportioning a piece of the pie to this amazing organization.

1443 - Earl Bennett

The 80-hectare public area of the park provides for both active and passive recreation. Following the daily feeding schedule requires 5,000 to 10,000 steps – a good day's exercise. The centrally located playground is intensively and actively used by children as well as “big kids”.

>>>

With some 200,000 visitors to the park each year, there are obvious economic benefits to the city of having a quality visitor attraction there. Visitors are mainly family groups. Local visitors include those who come regularly and those that come occasionally, as well as those who haven't been back for many years. The park is also host to school groups of all ages, speciality clubs (like photography), and rest home visits. A good number of visitors come from throughout New Zealand, and internationally, ranging from Australia to Zimbabwe. The city also benefits economically from the park's current payroll of 60 staff (FTE of 47), primarily younger people.

>>>

An intangible benefit of the park to the city derives from its Volunteer workforce, of which there is currently about 70 members, who give thousands of hours of their time annually as guides, shuttle drivers, farmhands, and gardeners.

>>>

The potential to fully realise the benefits of the park, is dependent upon the quality of the environment in which the activities take place. I note that the existing environment has been described as “rustic”. There is a fine line between “derelict” and “rustic”, and the latter is often a polite euphemism for the former.

>>>

In my opinion, the park has done an outstanding job of meeting its first priority of caring for the animals. But, because of financial constraints, it has been less successful in dealing with the physical environment, leading to a devaluation of the visitor experience and negative reactions from some

visitors, including local residents. The park is seeking funding in the Christchurch City Long Term Plan in order to better fulfil its commitments to its Conservation, Education, and Recreation aims. Meeting these will also have Economic and Social benefits for the city. Longer term funding will give the park certainty to plan for future development as well as to better program routine operations and management, including enhancing the physical environment, which is an important contributor to achieving its aims and fulfilling its commitments. . I support the park in its request for funding in the Long Term Plan

>>>

In my opinion, the park has done an outstanding job of meeting its first priority of caring for the animals. But, because of financial constraints, it has been less successful in dealing with the physical environment, leading to a devaluation of the visitor experience and negative reactions from some visitors, including local residents. The park is seeking funding in the Christchurch City Long Term Plan in order to better fulfil its commitments to its Conservation, Education, and Recreation aims. Meeting these will also have Economic and Social benefits for the city. Longer term funding will give the park certainty to plan for future development as well as to better program routine operations and management, including enhancing the physical environment, which is an important contributor to achieving its aims and fulfilling its commitments. . I support the park in its request for funding in the Long Term Plan.

1450 - Tayla Stapleton

Orana wildlife park is a huge part of Christchurch. It provides such a fun place for tamariki to learn about animals and the environment. Conservation should be apart of our learning curriculum, and having schools go out to Orana is incredibly important. Who is gonna look after the world when we're gone? Our children. These kids need to grow up with a love for animals and an understanding of the environment for there to be any sort of future. Its a shame the park gets little funding, things like updated pathways to make it more accessible for less active or abled people to get around the park would make a huge difference, and if the admission price was lowered just a touch we would see many more people learning about our home, planet earth. I have personally volunteered at Orana, and loved every minute. The friendly staff and the learning environment they create is special and crucial. I really hope that Orana can receive more funding to keep its doors open for many years to

come, and with many more young learners leaving with a firey passion for Conservation.

1453 - Alison Dodds

Please give funding to Orana Park. It serves multiple purposes including saving some animal species in a safe and appropriate environment and providing a wonderful sanctuary where future generations can learn about, enjoy and contribute to the future of animal kind. What a marvellous facility in our very own city. Quite the draw card for travellers.

1454 - Dylan Bialek

I think orana should be part of the draft long term plan because it is such a symbol of New Zealand in our city Christchurch and it represents our commitment to providing the people with access to these rare animals and conservation of its native species

1455 - Scott Morrison

I believe Orana Park should be out on the Draft Long Term Plan for 2025-2034. It is a strong venue for community and family. Providing happiness and wellbeing for Christchurch families and people. I have attended Orana Park numerous times and each time has been uplifting for all there.

1457 - Jenni Mason

Orana Park There are benefits when attracting visitors to the region that are widespread to the region. Orana is an amazing asset an Internationally recognised Zoo & participates in the world wide Conservation breeding programme for endangered Exotic species something Christchurch should support & be very proud of. Here in Northland NZ the public are well aware of Orana Park its location & especially the part it plays in animal conservation & education both native & exotic, where else in NZ can you see the World famous Gorrillas for example. A place to visit when travelling. Orana is a unique Zoo which deserves the Christchurch Cites Council financial support to ensure the ongoing financial sustainability of their park.

1459 - Megan Kelman

Further funding required for Orana Wildlife Park. We are one of the leading cities in NZ and should have a zoo that reflects this. This park is valuable for both international and domestic tourism and if funded appropriately could become much more. With a child who is interested in a future in zoology, the park has been integral for his education and interests through annual passes, school education visits, school holiday programmes run by the park to give him hands on experience/learning about conservation and general enjoyment of being in this specific environment.

1461 - Chelsey Taylor

Orana wildlife park is a very important part of the christchurch community as well as a vitally important part of the future of many different species of animals and deserves appropriate funding to continue their conservation work.

1463 - James Kettle

More funding for orana wildlife park

1465 - Rachel Hughan

Orana Park needs more funding. It needs to stay open. It is an amazing place and the best place to visit in the South Island. We have had yearly passes for a long time to help support them. I use to go almost every weekend to just sit and watch the animals. I can't wait to come back. Please increase your funding for this amazing place.

1466 - Amy Warwood

Orana park is a valuable asset and the work they do for conservation and the animals needs to be supported by the council.

1476 - Jenna Willocks

Orana Park - Orana Park provide such an exciting and vibrant resource to our City community and deserve secured increased funding. - It supports our region by attracting new visitors and engages our community to learn about the wildlife.

1479 - Benjamin Hussey

Please include Orana Park, they are providing a wonderful service to both tourist and families as well as completing sufficient conversation work which benefits Christchurch, NZ and the wider area

1482 - Shae Gallagher

Orana Park needs to received the funding it requires. It is great that Orana Wildlife Park ensures that the animals are secure and safe. This is especially important for the animals that are endangered such as the Gorillas. Times are tough and the need to balance the budget is important, however some things are worth it and subsidising a charity that both entertains the people who visit while also helping the animals is definitely worth it.

1484 - Rex Marsden

Orana Wildlife Park NEEDS your support to keep those animals fed and healthy. Hands down Orana is THE best wildlife park/zoo in New Zealand so please keep it that way!

1494 - Nik MacArthur

Please support Orana park with the extra funding they desperately need. This facility brings visitors/money to the city. It is a huge asset.

1495 - Summer Waller

I would like to see Orana Wildlife Park considered in the draft long term plan 2024-2034. - Orana Wildlife Park has supported me through learning to become a Zookeeper and offering me a full time Position on the exotics team. - Orana contributes immensely in the conservation of native fauna and 20 exotic breeding programmes for the conservation of near threatened species. - Orana also supports the education of numerous schools in Christchurch and provides resources and teachers when visiting the park. - Orana also brings domestic and international visitors to Christchurch and in turn other places in this city. We also have an abundance of local families/individuals who support us through annual passes who weekly visit the park. - I believe Orana should be re considered to have a place on the long term plan.

1496 - Vicky Hawkey

I would like to see increased funding from Council for Orana Park. Currently Chch ratepayers pay less than an extra \$1 (\$0.68) per month for this family and visitor friendly facility. Orana Park and Willowbank have both played important roles for many people over decades. Not only is it a great place for learning, Orana Park also looks after many endangered species, not least our native flora and fauna. 20 years ago I was involved with saving our native Kaka, and Orana Park hand reared two chicks Roto and Iti that were rescued after a stoat had killed the female on her nest. We need this facility to remain affordable for individuals and groups to visit and to be fully resourced so that the very best of care can be afforded to these precious animals which we have endeavoured to be caretakers for. As animals have lost so much of their habitat due to increased demand for land for human use, introduced pests and threats such as pollution, vehicle's and on top of that, climate change altering the ecosystem dramatically we therefore need to make important, careful consideration for the future. Christchurch is a great city and Orana Park is one of the reasons it is regarded so highly. Please increase the funding for this facility so that it can keep up with the necessary maintenance, retain its staff, remain affordable for visitors, and most of all so that all of the species it looks after get the very best of care. Thank you for your consideration.

1499 - Ben Davidson

I think that the LTP needs to include funding for Orana Wildlife Park. This is a prime example of a facility that provides recreational opportunities for all of Christchurch, brings people back to nature and can bring a real sense of purpose, with people able to support conservation of both native and exotic species. I have been involved as a veterinarian for Orana wildlife park for the last 20 years and have seen the tremendous contribution of the park to kiwi, kakariki, blue duck, brown teal and other native species conservation projects. The park has also made significant contributions to cheetah, tiger, rhino and gorilla conservation through raising awareness and direct contributions. Currently working with Australian partners to import southern white rhino from South Africa, the park recently donated Tb testing kits to vets in the Kruger National Park area to enhance the conservation efforts of the rhino in that area. These types of activities are making a significant contribution to the future of these endangered species. This is something that all Christchurch residents can be proud of and it is meaningful for people to be a part of something bigger than themselves. Orana wildlife park offers just that to not just locals but it is also a big attraction for people from across New Zealand and

abroad. Seeing the enjoyment of the families and groups of people enjoying the open range park, filled with vegetation and native birds inhabiting the grounds and large open spaces, and of course the large range of animals is difficult to quantify but I suspect it contributes significantly to their wellbeing and quality of life. This is an outcome at the core of what a council should be aiming to achieve and without council funding we are risk of losing what I would consider to a very special feature in the Canterbury landscape. The importance of our conservation and/or education work. The role Orana has in attracting visitors to our region. Why you already support Orana and for how long. How the Annual Pass benefits you or how volunteering opportunities have helped you and/or your group.

1503 - Geoff Robinson

Orana Park should be funded where ever it can be, it is the only "Zoo" in NZ that is not Government funded, and it is not just a Zoo, it does a tremendous amount of work for our near extent species and the ecological system in NZ, plus now recognised as the best quarantine facility in the world for Rhinos, which will spread to other species and is awesome for NZ. Sadly, most people do not realise the work that goes on behind the scenes at Orana,

1507 - Briar User

Keep Orana park the way it is

1518 - Kathleen Anderson

I think Orana Wildlife Park should be among the top priorities for Council grants. I was a volunteer there for more than 20 years and I am convinced of the value of a Wildlife Park in the South Island. Not only does it welcome locals and South Islanders, but also overseas visitors many of whom come to Christchurch specifically to visit the Park. The Park has a team of amazingly dedicated workers who need to be paid fairly for the wonderful work they do both in looking after the animals in their care and in educating the public about the importance of conservation and caring for the world. They run an effective education programme for schools giving children the opportunity to meet the animals and learn about caring for them and for the environment they need to survive. Maintenance of enclosures and buildings is crucial for the wellbeing of the animals and for visitor satisfaction, and this has become increasingly expensive over the years.

1530 - Robyn White

please increase support to Orana park, its essential to the city as an educational and tourism destination

1538 - Elise Dalrymple-Keast (Brandsitters)

Increase Orana Park funding to \$1.5m per year to support the work they do

1539 - Elise Dalrymple-Keast

Increase Orana Park funding to \$1.5m per year

1553 - Rosina Rodgers

I think Orana Park needs more funding! This is an amazing educational tool for children and adults alike! They need to be able to keep the care and facilities up to a high standard so that people will visit and learn about different types of animals and the effect we have on the environment which in turn affects all animals. Please consider giving them more money.

1554 - Sharon O'Loughlin

Orana Park plays a unique role in the cultural make-up of Christchurch, Ōtautahi. I grew up in Christchurch in the 1970's and became involved in the tourism industry when I left school. I have many memories of showing off Orana Park to all of our out of town friends and family. Orana Park was a key player in the tourism industry then, and continues to be now. As we step out of the covid-based lull of visitors to NZ, now is the time to invest in the future of the facility, to ensure it can attract visitors to our region. Orana Park attracts a hugely diverse audience, across all demographics - this is special too. The earthquakes have taken so much of Christchurch's cultural heritage. The familiar places that I make Chch home, and want to bring my family and friends to, are mostly gone. My primary and secondary schools, the pubs and bars, the gig spaces and shops are mostly replaced with new, beautiful places. But we need to have parts of Christchurch that indicate that it's still home. Orana Park is this place. Please spend the \$1.5M each year it takes to ensure the community, both current and past, to fund this world class zoological facility so visitors can remain able to explore this special place.

1556 - Jeffrey Bergman

[Grants & Funding > Arts Centre Funding]

We need to keep Orana park and the Arts Centre funded. These are iconic.

>>>

The funding of Orana park should continue. There needs to be a balance between sport, culture and attractions. This is the premier wildlife experience certainly in the South Island and maybe in NZ. Orana park needs more development. Our children deserve to have this experience. - not to see it underfunded and dwindle away.

1557 - Carena Parish

I would like to ensure that Orana Park is supported in the long term plan.

1558 - Tania Graham

I have been a regularly visitor to Orana Park for many years and also an annual pass holder. Through my work I have attended functions at the park which has been enjoyed by those attending. The work Orana Park does in the education and conservation space is important nationally and internationally. They need to be included in the long term plan as they need the support to continue the work they do and improve the facilities they have. Please help keep Orana Park part of Christchurch so they are still around for future generations

1561 - Peter Peri Alaba

I am writing this message to support Orana Wildlife. Since we started living here in New Zealand, we have been regular customers of Orana. Now that i have my own kids, we would really love to continue visiting the animals in the facility. Orana means so much to our growing family as it has always been a place where we can have many wonderful memories with friends. it would be amazing if we can continue visiting in many years to come.

1562 - David Cutlet

[Transport > Other]

More on Infrastructure, Transport, Parks like Orana.

>>>

Ensure Orana has enough funding as it is a unique gem.

>>>

More funding for Orana

1564 - Bart Brichau

I want CCC to support Orana wildlife park. The Park positively impacts our family and our company. Orana Wildlife park does important conservation and education work. Orana has a role in attracting visitors to our region. We already support Orana and have so for many years. The Annual Pass benefits us and volunteering opportunities have helped our company come together.

1565 - Allie Rogel

Orana Wildlife Park's funding is integral to conservation of both native and exotic species, as well as providing education and advocacy to current and future generations. The world that we live in is focused on consumerism and instant gratification and the by-product of this has been immense damage to our planet and the wildlife that inhabits it. Orana is doing the mahi to ensure that these

incredible species are not thrust by the wayside, doomed to be part of the extinction talley. Education current and future generations will ensure that these animals continue to thrive and that the ecosystem we live in remains diverse and full. I have so many happy memories at Orana, and it would be such a shame for such an incredible facility that attracts people near and far, to be thrown by the wayside due to a lack of funding.

1566 - Lauren Briggs

I am requesting that the CCC increases funding for Orana Wildlife Park. This park has provided education and given joy to families for many years and is involved in an international breeding and conservation programme. They are constantly struggling for funds and the amount the CCC contributes annually is a tiny amount of our rates. Too much ratepayer money has been wasted on frivolous and unnecessary items. It would be reassuring to see our rates payments used to sustain and provide facilities for the city that the whole family can enjoy for years to come.

1569 - Peter Schwartz

I am writing to support Orana Wildlife Park in its request for increased annual funding support for its work. Even though my wife and I have never had the opportunity to visit Orana, we have been annual donors each year for at least the last 26 years. We have given substantial donations and have even been Diamond level adopters of the kiwis and tuataras at Orana each year for many years. We very much value the contributions that Orana has made to the conservation and breeding of both native and other wildlife (not to mention the value to the Christchurch economy and amenity). We strongly support Orana in its bid to obtain support from the City Council and we hope that their request will be viewed favourably (and followed by actual monetary support). Thank you.

1571 - Richard Edmunds

My partner and I are long-time visitors and, since 2020, financial supporters of Orana Park, which clearly requires additional long-term funding. We are from Whangarei and specifically travel to Christchurch to visit the park, as many tourists, domestic and international, do due to the free-range nature of Orana, which more closely simulates a natural environment for animals than any other wildlife park or zoo in New Zealand. It is a wonderful facility and fantastic for wildlife education and advocacy, for example, how mining for coltan affects gorilla populations. There are some parts of the park that do need upgrading, so I would urge the council to consider this for residents and tourists alike.

1572 - Olive Easterbrook

[Grants & Funding > Arts Centre Funding], [Other/Special Interest Topics > Cathedral]

I think we should be supporting Orana Park and the Arts Centre. And not the cathedral.

1576 - Luke Hassan

Orana Park is a staple of tourism in Christchurch for all ages. The support towards Orana Park is pivotal

1577 - Yuki Kawamura

Orana Park

1579 - Anita Puohotaua

Dear Council Members, I am writing to express my wholehearted support for Orana Wildlife Park and to encourage the Council to continue its support for this invaluable institution. As a frequent visitor to Orana, both personally and professionally, I have witnessed firsthand the significant positive impact it has on our community and the wider region. A visit to Orana is not just a leisure activity; it's an enriching experience that fosters a deep appreciation for wildlife and conservation efforts. My favorite memory of Orana is witnessing the joy on the faces of children as they interact with the animals, learning about their habitats and behaviors in an immersive and engaging environment. From a professional standpoint, Orana Wildlife Park complements and supports our work by providing a unique venue for educational programs and events. The conservation and education initiatives undertaken by Orana are paramount in addressing environmental challenges and promoting biodiversity conservation, which aligns perfectly with our organisation's values and objectives. Moreover, Orana plays a crucial role in attracting visitors to our region, contributing to the local economy and enhancing our reputation as a destination for nature enthusiasts and wildlife lovers. By supporting Orana, we not only invest in the preservation of endangered species but also in the promotion of tourism and sustainable development. I have been a supporter of Orana for many years, recognising the vital role it plays in our community. The Annual Pass program has been particularly beneficial, allowing me to enjoy unlimited visits to the park while also supporting its ongoing operations and conservation efforts. Furthermore, volunteering opportunities at Orana have provided me and my group with invaluable experiences, allowing us to contribute directly to wildlife conservation and education initiatives. These opportunities have not only enriched our lives but have also fostered a sense of responsibility towards the environment and the species that inhabit it. In conclusion, I urge the Council to continue its support for Orana Wildlife Park, recognising its importance in promoting conservation, education, and tourism in our region. Together, we can ensure that future generations have the opportunity to experience the wonder of wildlife and the importance of protecting our planet. Sincerely, Anita Puohotaua

1580 - Eliesha Tay

ORANA - please ensure Orana Wildlife Park! It is such an an important part of Christchurch, for the children in particular. It plays a part in every Christchurch child's childhood, and is likely the first place they see these precious animals in person.

1582 - Sara Ward

I think funding for Orana Park should continue. It's a great asset to Christchurch drawing both citizens and tourists who and around support our economy.

1584 - Pippa Jefferies

I am a long-time visitor and, as of 2020, a financial supporter of Orana Park, which clearly requires additional long-term funding. I am from Whangarei and specifically travel to Christchurch to visit the park, as many tourists, domestic and international, do due to the free-range nature of Orana, which more closely simulates a natural environment for animals than any other wildlife park or zoo in New Zealand. It is a wonderful facility and fantastic for wildlife education and advocacy, for example, how mining for coltan affects gorilla populations. There are some parts of the park that do need upgrading, so I would urge the council to consider this for residents and tourists alike.

1586 - Sally Quinn

I believe Orana Park plays a very big part in our Christchurch landscape. I've been several times, taken family and visiting friends and relatives. It's a lovely place to go to, relax and as an added bonus find out interesting facts about nature and animals. The staff have always been friendly. It's a very welcoming place to visit. Please include Orana in the long term plan. It's a place that encourages us to think about our environment, enjoy it and help it. The staff and animals need our support.

1587 - Rebecca Robb

Orana Park

1588 - Aly Maclean

I hope Orana Park is still kept. The education it provides for school children and environmental information is important. It is a great attraction for Christchurch.

1590 - Simon Andrews

Please support the fantastic conservation work of Orana Park with funding them!

1595 - Mark Sherman

Orana Park needs to be included in the long term funding plan of the council. The park provides a major tourism boost to the city and its contribution to conservation is large and continuing to grow. By providing the tiny amount of money needed from the budget a significant increase can be made to not only the conservation outcomes but also in tourism and the wellbeing of the staff employed there. At the moment the park barely maintains its infrastructure and in order to succeed they need to be supported.

1596 - Graeme & Margaret Bluett

[Parks > Parks Other]

Maintaining open space and parks for recreation, enjoyment and well being is essential as well as habitat for animals, such as Orana Park.

1598 - Jill Drake

Please support Orana Park! It is always a great place to take overseas visitors to our country, and grandchildren for an educational day out. This place is a treasure for our city and it needs a boost to it's funding in order to keep all those magnificent animals in Christchurch.

1601 - Tara Clark

Orana is a registered charity. They desperately need increased annual funding support from the Christchurch City Council of \$1.5M each year, equating to 68 cents each month per rate-payer, to ensure the on-going financial sustainability of Orana Wildlife Park. It would be such a shame if such a place was not available for the future, or if it was not kept to the maintenance that it needs to attract visitor and provide the right care for the wonderful animals there

1602 - Lisa Marr

Orana Park desperately need financial help, the work they do with and for the animals is so valuable as well as educational for members of the public.

1606 - Jason Tippet

As a long term employee at Orana Wildlife Park the visions and goals for such a magnificent Zoo have good potential for visitors and students in the long term. Being placed close to Otautahi Christchurch, the park has and will continue to offer not only exotic animal experiences. But also a great place to be immersed in the local flora & fauna, right in the heart of one of the largest greendot projects on the Waitaha plains at Mcleans Island. The park offers so much more than a Zoo visit, but a natural footprint for generations to come. Having more key access to funds for improving structures and facilities in the park is important, which in turn will help with the economic growth draw card to the park. Orana Park is lit up with old memories of people driving cars through the lion reserve, to hand feeding Lemurs. Let this be such memories to continue as the park looks to grow.

1607 - Donna Byrne (Wild Republic)

At Wild Republic we believe that educating Children about the care and conversation for animals helps create a more compassionate and empathic community. Animals teach our children of the importance of taking care of the planet and the animals and their habit. The education and carers of the animals at Orana Wild Life care for over 1,000 animals to assist with encouraging education around conversation.

1615 - Leonie Craig

I would like the council to ensure funding for Orana Park to sustain their activities. I believe Orana Park do essential work with wildlife and are an asset to this city.

>>>

Please see my previous comments about Orana Park. Their funding needs to continue and Council needs to support their activities as they are essential to a diverse, inclusive city.

1627 - Dave Williams

In regards to Orana Park: Orana Wildlife Park is an incredible institution that not only serves as a home to diverse species of animals, including a state-of-the-art gorilla enclosure, but also plays a pivotal role in conservation efforts. The park provides expansive grounds for herds of wild animals to thrive, closely replicating their natural habitats and offering visitors a unique and immersive experience. The park's active participation in breeding programs aimed at preserving endangered species is commendable. Their involvement in conservation initiatives for native species like the South Island whio and exotic animals such as the southern white rhino is a testament to their dedication to biodiversity preservation. Furthermore, Orana's educational programs play a vital role in raising awareness about conservation issues and fostering a connection between the public and wildlife. By engaging with up to 200,000 visitors annually, Orana effectively promotes positive behavior towards conservation. I firmly believe that your support towards Orana Wildlife Park would not only enhance the local community but also reinforce your commitment to environmental stewardship and education. I urge you to consider this proposal favorably, as it would greatly benefit not only Orana but also contribute significantly to global conservation efforts.

1631 - William Miller

Orana Park attracts a lot of tourists to Christchurch, contributes to education and conservation of endangered species, and it is very responsible about not overpricing their entry fees to the detriment of their visitors. I feel the Council needs to support Orana Park more and help keep this great asset in Christchurch viable for everyone to enjoy.

1633 - Emelia Oleary

I would like to see Orana Wildlife Park included in the Long Term Plan as I believe it is a very important place for the community. I volunteered there for 2.5 years before becoming a keeper there and I credit Orana

1637 - Megan Andrews

I don't see any mention of how the council will continue to invest in Orana Park. Does this come under Parks, Heritage and Coastal Environment? Orana Park is very important to us, both as a place to visit as well as an important feature of the city, and something I am really proud of, that Christchurch has such an amazing park, so much better than your average city zoo. It's something I always mention to people who ask me what to do when visiting the city. The work the team does to educate people and look after the animals that live there is incredible and to be treasured.

1638 - Leigh Percasky

I would like the council to consider increasing the funding for Orana Wildlife Park. As the largest zoo in the South Island, this facility plays a major role in providing educational and recreational value to the region. This facility is involved in several threatened species recovery programs including the kakariki karaka which a critically endangered species that numbers only a few hundred individuals. The current level of funding provided by the council is not enough to ensure this iconic place can continue to operate. Operating costs have not kept pace with inflation and there is real risk that the zoo will no longer be financially sustainable in the future. I work for a Trust that breeds endangered native birds for release to the wild. We work closely with Orana Park on several of these programs and their dedication to the cause is vital and valued by all partners. It is my view that the council doesn't currently adequately value and support Orana Wildlife Park as the huge asset to the region that it is.

1642 - Maxine Johnson

We fully support council increase funding to Orana Wildlife park by \$1.5M each year. We consider Orana to be the best animal sanctuary in NZ. Orana provides a unique experience unavailable anywhere else in NZ. Orana is a big drawcard for Christchurch.

1643 - Colleen George

My first trip to Oarana park was way back when you were allowed to drive through the lion enclosure. I remember dad driving us through there it was so scary and thrilling all at the same time. My husband and I have also been there and when our children came along we took them too. When the Gorillas turned up it was magic! I would like to say to our council you do need to give Oarana park \$1.5M in the Draft long term plan as it creates special memories that are life long we have been rate payers for over 30 years and I 68 cents from each rate payer a month is well worth it in my opinion. I got the love of animals from my dad and it would be a real shame for Oarana park to close. It is beneficial to all who visit there!

1645 - Elizabeth Grubb

Please support Orana Park. It is so important for the Native section where they breed native birds that are endangered and educate the visitors about them . I love volunteering at Orana as I am aware of the number of animals are now so desperately endangered. It is an amazing park it has so much space for each animal specie. I have supported Orana since it opened and now i live in Christchurch I can

volunteer which i do 2 days a week. It gives joy and knowledge to so many visitors each day. Please support it. Elizabeth Grubb

1648 - Andrew Bowman

[Strategic Direction > Have we got the balance right?], [Spending > Te Kaha]

Overall, I believe the plan strikes a good balance with the exception of spending money on Te Kaha. This seems like a boondoggle and a fraction of that money could be used to provide Orana Wildlife Park with the funds it needs to continue.

Please provide the funding Orana Wildlife Park requires to remain operating and taking care of its animals to the highest standard. I have many fond memories of visiting Orana when I was younger, and still enjoy it today. I also understand the park to provide significant educational benefit to young people and visitors in Christchurch, particularly regarding conservation. Orana also functions as Christchurch's zoo, which surely makes it an important attraction for those who come to visit.

1651 - Cecily Fisher

Please increase support for Orana Park. This is not just a precious asset to our city, but a means of alerting people to climate change and the way in which it affects all life as we know it. Places like Orana Park alert us to the worsening plight of endangered species and, thanks to the input of its knowledgeable caring staff, make us care more about saving our planet and its diverse inhabitants before it is too late. This is a must have, not just a nice to have (though it certainly is that as well!)

1655 - Lloyd Hasson

Support of Orana Wildlife Park's Funding Request Dear Christchurch City Council, I am writing to express my wholehearted support for the increased annual funding of \$1.5M for Orana Wildlife Park, as outlined in their request tied to the Draft Long Term Plan. As a long-time supporter and visitor of Orana, I have witnessed firsthand the incredible impact this park has on our community, wildlife conservation efforts, and local education. Orana Wildlife Park is more than just a zoo; it's a sanctuary for endangered species and a beacon of hope for conservation efforts worldwide. My visits to Orana have always been highlights of my year, offering unforgettable encounters with wildlife that have deepened my appreciation for nature and the urgent need to protect it. The park's dedication to conservation and education is evident in every aspect of its operation, from the carefully designed habitats to the informative talks delivered by passionate staff. The request for additional funding from the Christchurch City Council is not just a plea for survival; it's a call to action for us to prioritize the preservation of our natural heritage and to invest in the educational future of our community. The modest investment of 68 cents each month per rate-payer is a small price to pay for the enormous benefits Orana provides. The financial sustainability of Orana Wildlife Park is crucial not only for the well-being of the animals in their care but also for the continued educational opportunities they

provide to our children and the attraction of visitors to our region. The park's struggle to maintain operations in the face of rising costs and reduced income due to the pandemic highlights the need for robust support from the council. Increased council funding is essential for Orana to continue its vital conservation work, to ensure the park remains a place where future generations can learn about and connect with the natural world, and to maintain the high standards of animal welfare and visitor experience that Orana is known for. In conclusion, I urge the Christchurch City Council to grant Orana Wildlife Park the requested \$1.5M in annual funding. By doing so, we not only secure the future of this cherished local institution but also reaffirm our commitment to conservation, education, and the economic and cultural vitality of our region. Thank you for considering my submission and for your ongoing efforts to make Christchurch a better place for all its inhabitants, human and animal alike. Best regards, XXXXX

1656 - Lauren Cummings

Please provide more funding to Orana wildlife reserve. Its not only an asset for Christchurch but NZ. We live out of Canterbury but love visiting. Its a big attraction for the city

1659 - Llewellyn Emery

Please keep funding the Orana Wildlife Park. It is attractions like this that encourage people to visit Christchurch and this in turn brings more spending on accommodation, food and shopping etc.

1661 - Jayne Borrill

Please support Orana Park. It is a great asset for the city and provides a wonderful amenity for families. We took our children there many times when they were young and it was not only enjoyable but a fantastic education opportunity. We have also taken several overseas visitors there over the years who have been impressed with the diversity of animals and particularly enjoyed the native species areas. The facility is extremely well run and the animals are cared for to a high standard. It would be a travesty to lose such a valuable asset.

1664 - Christina Wust

Please increase funding to Orana Park to ensure they are able to stay open. We visit a few times a year and would hate to see it go. They do wonderful work with help towards saving endangered species.

1666 - Colin Peebles

Strongly support increased funding for Orana Park. The other major cities in NZ find zoos and Orana Park is a fantastic facility for education and conservation.

1667 - Sue Alsop

Orana Wildlife needs council support this is a local attraction that needs to be kept for rare animal breeding and protection through public education and understanding of their plight.

1669 - Sandra Ballantyne

Please help Orana Park. This is a great asset to our community both for residents and our tourism

1673 - Rebecca Bayliss

[Grants & Funding > Arts Centre Funding]

It must be a hard balancing act but both the Arts Centre and Orana Park desperately need council backing. The Arts Centre because of its historical and artistic/cultural significance and Orana park because it's a huge draw card for Canterbury and does vital conservation work. I've been going there since it opened in the 1970s, my son now goes there, and the work the park does is so important. From an educational perspective having been on school trips there, it's crucial to teaching our tamariki to save our planet and animals.

1675 - Lidia Klingenberg

Orana Wildlife Park is truly a gem nestled in the heart of New Zealand. I have discovered their work and animals through zoolife.tv and ever since have grown connected to their mission. Through endangered species breeding programs, rehabilitation efforts, and immersive educational experiences, Orana is at the forefront of safeguarding some of the world's most vulnerable inhabitants while educating visitors about the delicate balance of ecosystems. Funding Orana Wildlife Park isn't just an investment in a park; it's an investment in a healthier, more sustainable world for generations to come.

1678 - Sarah Bonnington

Orana Park Continue to support and fund the park, it is a significant attraction and means a lot to family and visitors to the area especially those with kids. A great affordable day out for the family especially with the animal passes they are great and bring the family together. They do conservation work which helps now and out future generation. I wish for the council to continue its support and funding where possible if the Orana Wildlife Park and ghe

1679 - Katy Clook

Please provide the necessary funding to ensure that we don't lose Orana Park and the precious creatures for whom it is home. It's absence, and the opportunity for generations to encounter, understand and appreciate wildlife, would be a travesty.

1680 - Lisa Lodge

Support Orana Wildlife Park financially to maintain their wonderful zoo. We need to keep and love what we have not just build new new new.

1684 - Wynand Verwoerd

[Other/Special Interest Topics>Cathedral]

Please support Orana Park, a living asset for Christchurch and the region, rather than the dead relic of the Cathedral.

1686 - Blake Teague-Dolan

Please provide Orana with adequate funding. I feel their work is so important and I would love for Ōtautahi to keep such a remarkable and impactful place thriving.

1687 - Sarah Cooper

[Grants & Funding>Arts Centre Funding]

Funding for Orana Park and Arts Centre need to be included in the LTP

1688 - Loudon Keir

I notice that the funding to Orana Park may be cut. This is an important feature within Christchurch both in terms of education and also leisure. I have had the benefit of being on safari in Africa, but most people will not. Having the ability to see wildlife from around the world in carefully designed enclosures is life enhancing.

1692 - David Bluck

Give money to things that make Chch a good place to live >>> like Orana Park

More money to Orana Park, and other similar organisations.

1697 - Chris Goodman

Orana is a registered charity. They desperately need increased annual funding support from the Christchurch City Council of \$1.5M each year, equating to 68 cents a month per rate-payer, to ensure the on-going financial sustainability of Orana. if you put so much to Cathedral then you should look after Orana we need it in CHCH. you lost the Aquarium which is bad

1698 - Jeni Quince

I fully support Orana Park's submission. I realise I don't live in the area but I have visited this amazing place and would hate for anything untoward to happen to it. Thank you.

1700 - Kim Scott

I would like the council to consider increasing the amount they contribute to Orana Park. Orana Park means a lot to families, visitors and animal loving people. It is a wonderful opportunity for people to see the animals up close, learn about animals and support the preservation of animals that can be endangered in their natural environment. I support Orana Park by purchasing an annual pass for my grandchildren (two families). However the cost of maintaining animal welfare to a high standard is a constant struggle financially. Please help to keep Orana Park to keep operating by increasing their funding.

1703 - Susan Tansey

I would really like to see more funding for Orana Park. As an organisation that relies on donations, I feel the Council could support the zoo with more funding. It provides a wonderful family space for residents as well as tourism dollars.

1704 - Sharon Creamer

I wish to implore you to give more funding to Orana Wildlife Park

1705 - Kevin Topham (Hollywood Marketing Ltd)

Orana Park is a wonderful Christchurch facility which supports our own efforts in conservation. It costs over \$100000 per day to run the park and the councils support is critical to enable the park to continue. I always try to visit Orana Park when in Christchurch as it is one of the premier destinations for tourists.

1706 - Katie Morriss

Please increase funding for Orana Park. Their programme is incredible. From conservation and breeding through to their incredible school education programme, Orana Park is a local treasure. I have taken a school group there many times and the educators are outstanding. Please help save this amazing place.

1707 - Emma McCleary

I urge the council to stand behind Orana Park, ensuring its sustained presence for future generations by providing additional funding. As a mother of two boys, our family has cherished countless experiences at the park. I firmly believe these visits are not just recreational but vital for their education, fostering an appreciation for the wonders of the animal kingdom. The invaluable role

Orana Park plays in enriching Christchurch cannot be overstated. It is a place of joy for families and visitors alike, and to lose it would be a loss felt deeply across our community.

1714 - Caitlin Busch

I feel strongly that Orana Wildlife Park should be afforded an increase in annual funding from the Christchurch City Council. Learning that the park is forecasted to begin experiencing severe financial difficulty in the coming years, and having visited the park many times as a child, adolescent, and adult, I am greatly saddened by the prospect of the park closing. I believe that the park is an important institution in Christchurch, loved by many. Most children of Christchurch will recall having visited the park on various school trips and many tourists who have made a stop in Christchurch will have enjoyed the attraction as part of their itinerary. I think that for educational purposes and to support tourism in the Canterbury region, the park is invaluable.

1716 - Courtney McAlpine

Help for Orana park

1719 - Mary Leslie

Orana Park is so important for not only the children, but also all New Zealanders as it is the only Open Range zoo in the country. Im sure the people of Christchurch would be only too happy to pay an few extra dollars in their rates to enable the Council to double their yearly contribution.

1720 - Catherine Richardson

Orana Park is an absolute asset to the city of Christchurch and Canterbury region. There is no other "zoo" in new Zealand like it. I have very happy memories visiting there when my children were young. It is a fantastic place to see the animals up close and the education talks by committed, dedicated, caring keepers well worth listening to. I would like the council to provide for the ongoing work and support of Orana Park financially. It has often amazed me that Christchurch council do not fund this - as many other councils in New Zealand do their zoos (e.g. Auckland, Wellington). This would help to improve the facilities not just for the animals but also for visitors who bring so much to the local economy.

1721 - Skylee Silver

As a frequent visitor of your wonderful country from Australia, my family and I have frequented the Orana Wildlife Park whilst visiting family. It has been a great place to meet and catch up with the children all whilst walking the track and viewing all the animals. Another incredible note is that Orana is internationally renowned for its involvement in zoo-based breeding programmes for endangered exotic and native species. In order to further support their conservation work and the already incredible work they do for the community by just being a natural gathering place it is understandable that the Orana Wildlife Park needs further CCC council support of \$1.5m each year. This is a great tourist and local gathering area that has much to offer - why let something already great go to waste, it's perfect for all ages! Sky

1726 - Gavin Umuhuri

Orana park should be funded. We visit at least once a year by ourselves. When we have foreign visitors, maybe every 2 years. We take them to Orana park. Both myself and my children have great memories of Orana park. I know people who save to be able to let their children experience the park. An asset to the city.

1728 - Aaron Kwak

Funding for Orana Wildlife Park

1729 - April McMahon

I am writing to urge you to continue the vital funding support for Orana Park Zoo in Christchurch, New Zealand. Orana Park Zoo is not just a local attraction; it is an invaluable asset to our community and plays a crucial role in education, conservation, and promoting biodiversity. Here are several key reasons why maintaining funding for Orana Park Zoo is essential:

- Education and Awareness: Orana Park Zoo provides educational programs for schools and the public, offering unique opportunities for people of all ages to learn about wildlife, conservation, and environmental sustainability. These programs inspire a sense of stewardship and responsibility towards our natural world.
- Conservation Efforts: Orana Park Zoo actively participates in conservation initiatives, including breeding programs for endangered species and supporting habitat restoration projects. By funding the zoo, we contribute directly to global conservation efforts and help protect endangered species from extinction.
- Tourism and Economy: Orana Park Zoo is a significant tourist attraction, drawing visitors from both within New Zealand and overseas. The zoo contributes to the local economy by generating revenue for businesses in the hospitality, retail, and tourism sectors. Supporting the zoo means supporting local businesses and job creation.
- Community Engagement: The zoo plays a central role in community engagement, offering events, volunteer opportunities, and partnerships with local organizations. It fosters a sense of community pride and belonging while encouraging active participation in conservation initiatives.
- Research and Innovation: Orana Park Zoo supports scientific research and innovation in the field of zoology and wildlife conservation. It serves as a hub for researchers, educators, and conservationists, driving advancements in animal welfare, veterinary medicine, and species management.
- Environmental Education for Future Generations: By funding Orana Park Zoo, we invest in the education and awareness of future generations. Children who visit the zoo develop a lifelong appreciation for nature and wildlife, becoming advocates for conservation and environmental stewardship.

In conclusion, Orana Park Zoo is more than just a zoo; it is a center for education, conservation, research, and community engagement. Continuing funding for the zoo is an investment in our collective future, ensuring that future generations can enjoy and learn from this invaluable resource.

1730 - Claudia Bouvet

It is really important that Orana Park is prioritised in this plan. Conservation is extremely important and the park brings happiness and fulfilment to so many people. These animals matter and need to be looked after which requires funding from the govt.

1732 - Carole Logan

Have you put any thought or funding in for Orana Park. This is a desperately needed attraction for our city & people come from far & wide. It is worth the investment for both tourism and helping endangered species, both native & exotic. We need to keep it, most zoo's etc are funded by local councils/governments & Orana Park should be too.

1733 - Susan Forsyth

What a great place Orana park is with the animals and ChristChurch and the whole country would lose if this was to close. I am hoping the council goes along with public submissions to save the park regards Susan Forsyth

1735 - Neki Patel

yes support Orana park - everyone we are in christchurch this amazing facility is our first point to visit - i am writing from norway - visiting the polar park - we visit st so many but nothing like orana - it has s yr family / adult / environment/ education facility that need the councils support ! if you do not the city will be at a loss ! support oran's and conservation!

1741 - Madeleine Hodge

I strongly believe the Christchurch councils long term plan for 2024-2034 should prioritise adding Orana wildlife park charitable trust to the plan. Not only does it benefit in generational education both in school and university group learning of all ages and stages/ capabilities, orana wildlife park prides itself in core conservation efforts with breed to release programs in the wider nz along with onsite conservation efforts, public awareness and advocacy , research to name few not to mention the passion seen in the next generation coming through having orana wildlife park on there doorstep showing them such unique species from around the world and most importantly getting them excited and involved with our native endemic Taonga species.

1742 - Graeme Hodge

I believe we should help fund Orana Wildlife Park. It is effectively the only Zoo in the South Island and it would be tragic if it were to close and lose it as a conservation, education and tourism facility.

>>>

As mentioned I feel it is important that we as ratepayers help fund Orana Wildlife Park as it is a major asset to the city and Canterbury area and it is the only large NZ Zoo not significantly funded by local councils.

1743 - Jess Higgison

Would be good to see some more funding go to Orana park to continue their conservation work

1747 - Victoria Bouvet

Orana park must be factored into the councils plan. The park brings so much enjoyment to so many people and the conservation work is extremely important.

1748 - Bee Prinsloo

Supporting orana wildlife park should be a high priority for the council. As New Zealand's only open range zoo, and as one of the only zoos in the South Island; orana park is a very important part of Christchurch and is loved by many. Orana park is an important part of tourism, education and holiday fun. With a bigger budget they can do some much needed repairs and really flourish.

1752 - Carolyn Boulton

I strongly support Orana Wildlife Park.

>>>

I am writing to express my strong support for Orana Wildlife Park. I have been regularly visiting Orana since I moved to Christchurch in 2005. When my daughter was young, we had an annual pass and visited every few months with other families. It was such an amazing experience for our children to see the animals - not just farm animals, the amazing big cats, apes, lemurs, spider monkeys, kiwi, kea, zebra, rhinos, and of course (our favourite) feeding the giraffes. We always sang a song in the car on the way to the zoo about the different animals we were going to see. It's not just the experience of seeing the animals that we treasured, it was the quality time together. Orana is a place where children and families can be present in the moment, away from digital distractions. It's also an accessible place - for old and young, abled and disabled. So many activities that the councils funds are for athletic people or older children. Orana is a place for everyone to be together and learn about our place in nature. Given the huge amount of money the council spends on things like transport and water and a new stadium, supporting Orana Wildlife Park is a small expenditure that generates huge returns in terms of enriching the lives of people in Christchurch (and visitors). It is the only zoo of its kind on the whole South Island.

1754 - Shanneka Gurden

Orana park is important and needs funding

1757 - Louisa Bangma

Please support Orana Wildlife Park with much needed increased annual funding. They are vital to the city and surrounds to support, endorse and further environmental and conservation efforts as a critical contribution on behalf of our area. In addition, the park is an attractor for visitors, both domestic and international. It also assists in the education of our young people about conservation that is so needed in our world today.

1758 - David Griffiths

My wife and myself wish to show our support for Orana Park We have visited Orana Park numerous times over the years And have taken our children and now grand children We think Orana Park is a huge asset to Christchurch and New Zealand We personally donate on an annual basis Any support Christchurch City Council can offer would be greatly appreciated

1764 - Chris Conwest

[Planning & Strategic Transport, Urban Design, & Urban Regeneration - Strategic Transport]

You need to better fund Orana park, it is one of the last iconic symbols of Christchurch left standing. A bus route should be set up, directly from the airport to enable anyone in Christchurch and international tourists to use it.

>>>

However Orana Wildlife park should be included in the parks, heritage & the coastal environment plan

>>>

Orana Park should be included, the culture impact is very important to the identity of Christchurch

>>>

Orana Wildlife park should be included in our strategic priorities.

1765 - Melanie McLean

I'd like the council to support Orana Park. They have huge overheads and offer a fantastic experience for our region. Our family visit, and we take visitors new to the region. My kids loved finding out that Cheetah kind of meow like our family cat! The opportunity for our children feed the farmyard animals and giraffes, get up close to the exotic animals such as rhinos is second to none.

1767 - Sara Coggan

Orana Park is an incredible asset to Christchurch. My children are now teenagers but we were regular visitors when they were younger. As the only zoo in NZ with Gorilla's its a major attraction for tourists. It absolutely must continue to be included in the long term plan for Christchurch.

1768 - Sue Sunderland

Please continue to fund Orana Park \$1.5 Million + CPI per annum. It is a great facility used by many. Great value for money and all inclusive no matter what ethnicity or religion. I wish to express my displeasure as a ratepayer, of Council funding the rebuild of an Anglican cathedral which is not used by 99% of rate payers. I would like to see council move commercial concerts out of North Hagley Park. This seems to have continued beyond the EQs. These musical events used to be in stadiums or appropriate facilities. Not only does it stop rate payers being able to use the park completely because of barriers etc. but concerts are extremely noisy and effects the wildlife in the park. Roadside Gardens These have not been maintained since the earthquakes and are in need of attention. Thank you

1774 - Ashleigh Williams (Sweet Louise)

We want the council to support Orana Park because Orana provides the Whanau's we support with incurable breast cancer the opportunity to create special memories together. The Orana Team go above and beyond to ensure our members are well looked after during their visit to the park. They donate the visit given the circumstances, and we are so incredibly grateful. Without their generosity this would not be able to happen. They also get volunteers to drive the Whanau around, as mobility can be an issue. This makes it accessible and possible. Animals provide amazing mental health benefits. Seeing the animals together during a difficult time, gives the Whanau a chance to fill up their tank ready to proceed with medical treatment. It gives them a chance to have a break, and create memories the Tamariki will treasure in years to come. The community needs Orana Park and Orana looks after the community. We need to ensure we do not lose this incredible asset. Orana Park is more than just a zoo to so many people, including the population we support.

1782 - Amanda Nolan

Orana Park is a important part of Christchurch - I have memories of visiting the park as a child, ad now that I have my own children, it is always exciting going to Orana Park now - the kids are always excited to feed the giraffes, and visit the lions. The park is also special, in that the facility promotes animal welfare, in comparison to other parks/zoos around the world, and I feel maintain this reputation is important to Christchurch.

1783 - Diane Fergusson

Orana Park is a long standing icon of Christchurch. I remember all my visits to the park over the years and it is not just for the young, there is lots to see and the people who run the park do an amazing job. Obviously they can't do it with just gate sales and donations and need the support of the Council. I

would rather my rates money go towards keeping the park going than renovating the Christchurch Cathedral. Keep supporting the park.

1787 - Judi Gosney

Orana Park funding should be kept in place as it is an asset to the city and the world. An asset to the city as it brings in tourists and an asset to the world as it protects species that are endangered and allows us to see them. It is also a great place to go and relax

1789 - Naomi Tsuchida

Orana Park is an important facility and educational center for Christchurch citizens. Thanks to them, I have been able to experience and learn about many animals. I urge the Christchurch City Council to please provide financial support to ensure the well-being of the animals and the staff at Orana Park.

1791 - Graeme Brown

Please continue to provide funding for Orana Park. This is not only an amazing facility for the people of Christchurch, but also attracts visitors to our city. For children to experience what Orana offers is great & hopefully starts them on a journey towards protecting our environment. Orana plays such a huge role in protecting New Zealand's native bird species & evidence of these successes are clearly obvious with increased birdsong in some Canterbury valleys. Please continue to support this amazing facility & the passionate people that are doing a terrific job. The conservation work they do with our threatened native bird species is

1794 - Heather Matthews

I would like to record my request for additional funding for Orana Wildlife Park, which is such a unique and amazing place in Christchurch. I feel it is important to find a way to support the work that Orana Wildlife Park do, and the opportunities it provides for families and individuals to enjoy their facilities. Thank you.

1795 - Melody Browning

It is vital we secure the long-term future of Orana Park and the animals they care for. Orana Park is an iconic facility to Christchurch and the wider Canterbury region not to mention New Zealand. If they do not continue to run due to lack of taxpayer funding, the demise of all animals in their care will be devastating and there is no option B for them, we need to take care of them now and in the future.

1796 - Rhondda Brown

I would like the council to continue providing funding for Orana Park. The park provides important conservation work, not only for international wildlife but also for NZ endangered wildlife. The park is an important tourist destination for Christchurch and also an amazing destination for NZ families to learn about our unique wildlife and how we need to preserve it. It important that the hard work of Orana Park is allowed to continue into the future.

1799 - Sue A'Court

help fund Orana Park which is a wonderful asset to Canterbury with the breeding programmes and the amazing animals and education programmes for kids and adults.

>>>

Orana Park is an asset for Christchurch. As a City and region we should continue supporting this wonderful Park, the amazing conservation and breeding programs the Trust is involved in. We have some amazing unique animals at Orana Park, the Gorillas are the only Gorillas in New Zealand. There are so many other rare species at the Park. It is very upsetting to know they may have no funding, I for one, will continue our support in membership and donations of which we are regular contributors. We strongly oppose any closure of Orana Park.

1805 - Leigh Cunningham

As a teacher using the services of Orana Park I would like to reiterate the importance of maintaining this park in light of education. My school has used the Education Programme on a regular basis and it is an extremely well run and educational service that cannot be provided from a within school teaching programme.

1817 - Qyana Curry

I just wanted to submit my opinion that Orana Wildlife Park should be included in the Long Term Plan! It's such an integral part of Christchurch and holds a lot of memories for many people from here but also around the country and abroad. Not only that, but the conservation work Orana contributes is so important for the future of our ecosystems and animal populations.

1822 - Brian Travers

I would like to strongly request that the council increase funding to Orana Wildlife Park by \$1.5M per year. Orana is such a great asset to the community and is one of the better zoos globally, which are a strong reflection on Christchurch. My family and I have been annual pass holders since moving to Christchurch and visits to the park are always a highlight for both the adults and children. It would be heartbreaking for us to see Orana negatively impacted over the next several years. At only \$0.68/ratepayer/month, I think it is a very worthy investment for the community.

1831 - Renee Cockroft

Support for Orana Park to continue, it does a great service of teaching our tamariki about wildlife.

1848 - Leigh Drayton

Please help out more to Orana Park, our children loved it and now so do our Mokopuna's.

1849 - Amy Brewer

Help places like Orana park remain open by providing some council funding to them. We lose tourism \$ when places like this close. Reduce rates so Christchurch remains a city that is affordable to bring up your family in.

1850 - Kate de Silva

Orana Park should return to being a central attraction for Christchurch, for both residents and visitors. It is currently very run down and unappealing as a local. This icon deserves our support and ratepayers money.

1851 - Jasmine Rabbett

I would like to see more funding go towards the upkeep and care of the animals at Orana park this park is an asset to our city they provide education for school groups and a fun day out for families, the cost of caring for the animals is significant and they are needing more help at this time

1853 - Caitlin Brown

I would like to see more council funding to quintessential attractions such as Orana Park. The Park needs and deserves taxpayer assistance to continue to run and complete much needed upgrades.

1854 - Sarah Dring

That orana park must be supported in it's increased needs. we must retain orana park for generations . The public support by visiting and the council can also utilize it's rates collection to help fund rising costs. These cost are due to government changes,wage increase , feed and food increases and rising compliance cost, it's must be supported back by further council support.thsnk you.

1856 - Kylie Pedley

Help orana park

1857 - Jess Collings

Please help with additional funding for Orana Park. It is one of Christchurch's main attractions and it would be devastating to so many if this was to close due to lack of funding

1858 - Abbey Harvey

Please consider increasing funding to Orana Park. The park is iconic to Chch and they are not asking for much in the grand scheme of things,

1860 - Michelle Waters

Please put money into Orana Park.

1861 - Adam Oakson

Orana park needs a greater level of funding to survive

1862 - Lani Davidson

Please consider the ongoing funding of Orana Park. It's a big part of our city and community, and a fantastic place for learning about animals they care for. A lot of people have many fond memories of going there, either as children, or of taking their own children there and it would be a real shame if this place was lost.

1863 - Bonnie Wheeler

Please support orana park and provide the extra funding they have asked for. They are iconic to chch, it's an essential tourist attraction, everyone who visits the city goes there, we don't have enough zoos in no so it's important to keep Orana open,

1865 - Tina Bond

Please support Orana Park Wildlife Sanctuary.

1867 - Chloe Fraser

Please provide a small contribution from our rates to Orana Wildlife Park and Willowbank Reserve to help them care for their animals and providing us with a fun activity in Chch. Orana have proposed that \$0.68 from each rate payer will provide them with the financial support they need. I am willing you to add this to our rates as this is something we would rather contribute towards, rather than some of the other council expenses.

1871 - Marlena Cooper

I would like to encourage the council to help orana park stay open. Would be very sad to see it go. It's not only a great tourist attraction but it's great for school and family outings and so great to have these animals to see and learn about in person.

1874 - Liam Brown

Please continue to fund Orana Park to levels which allow it to operate at full capacity. It is a one-of-a-kind wildlife park that has immense value in conservation, breeding and education, beyond providing a super fun experience for both tourists and locals alike.

1875 - Sandra Tarrant

Hi I would like you to put more funding into helping Orana Park. This is a wonderful asset to our city and tourist attraction. I remember going when I was young back in the 70's and 80's. I now take my son and we just love it there and have plenty of friends that also enjoy going. They also do an amazing job with their conservation work. In my eyes they are very worthy contenders to receive more help through funding and would be more than happy to know some of my rates are going towards this. It is very sad to see them struggling as an animal lover I strongly hope you will help them out in your 10 year budget.

1878 - Catherine Harris

Please help Orana Park with funding! I for one have many happy memories of many visits there over the years since childhood. I would rather support a long term proven organisation in my annual rates involved with conservation, education and caring for animals than any, often ugly building! Christchurch has lost enough over the past, almost 15 years, please don't let a wonderful asset to locals and tourists like Orana Park be another.

1879 - Jenna Hopkins

Save Orana Park, it is a Christchurch icon. They need more funding

1880 - Elaine von Rhenen

[Grants & Funding - Other]

Yes, it would be good if you could consider funding for places like Orana Wildlife Park and the A&P Show. Such facilities help build the community and bring tourists to town who in turn spend money at local businesses which boost the economy.

1883 - Eira Anderson

Please keep fully funding Orana Wildlife Park. It is most precious lovely place to take my two preschoolers and show them animals that I grew up with in Africa especially. I remember going on school trips once when moved to NZ and it was a highlight! Places to go with kids if very high on a lot of family's priorities I would think, and the cost of entry into Orana Park is already high.

1887 - Michelle Haslett

Please increase funding for Orana Park. It is a world class facility and one of the top tourism destinations in Christchurch. Whenever I have visitors come from overseas I bring them to Orana Park. It is my favourite memory of growing up in Christchurch. We would go every school holiday.

1890 - Michelle Hammond

I ask that you increase funding to Orana park, it is such a great asset and tourist attraction to the city. They. Adky need your assistance

1892 - Christopher Barker

I would like you to support Orana Wildlife Park. As a member of Pest Free Banks peninsula /Banks Peninsula Conservation Trust I feel it's important for a well run and maintained wildlife park to be accessible to younger people. It's much easier to get young people involved with conservation of NZ biodiversity when they can access the positive and negative achievements in conservation efforts across the globe. I truly believe that continued support for Orana develops a net positive in support for NZ conservation efforts and knowledge in the younger generation.

1893 - Elizabeth Sinclair

[Grants & Funding - Arts Centre Funding]

Don't forget about key places for the community such as Orana park and the Arts centre that have value for residents, visitors to Christchurch, education, heritage and conservation work.

1896 - Foster Newman

The Christchurch council should unequivocally support Orana Wildlife Park due to its pivotal role in animal conservation efforts. With a rich history spanning over four decades, Orana stands as a cornerstone landmark in Christchurch, embodying the city's commitment to preserving biodiversity. By endorsing Orana, the council not only reinforces its dedication to wildlife protection but also ensures the continuation of vital educational programs and research initiatives aimed at fostering environmental stewardship within the community.

1900 - Gillian North

I would like to state my request that Christchurch City Council continue to fund Orana Park to secure its future and the vital work they do. Volunteers do a lot but secure funding is needed. Orana Park is an absolute jewel for Christchurch as well as an essential place for protection and preservation of endangered species. Please enable Christchurch to continue to play a vital role with this. I understand there are many demands on council funds but feel Orana Park is worthy of some priority. Thank you

1901 - Teresa Bowditch

I would love to see more support from the council towards Orana Park, what an asset this is for Christchurch, so well run, but definitely need council support to continue the great work, these people care so much about their animals and the tourism sector for the city, the least it deserves is more support, financially in particular, animals can't live on fresh air, please help them to make

Christchurch proud

1903 - Grant Dickson

CCC funding for facilities such as Orana Park should be considered. This is a longstanding facility that has provided many years of entertainment for both Chch Residents and Visitors. It is really the only facility of its type in the SI, and is much loved. It also provides very important conservation and breeding work which is vital to wildlife and the environment. There are also numerous opportunities for local business staff to contribute as volunteers, with our workplace having enjoyed many days volunteer work there. They do such a great job there, and certainly deserve some CCC to remain viable, as a Tourist destination as well as a Chch Icon. Obviously prices can only be increased to a certain level, with both Private and Public sector funding being required to keep it operational.

1906 - Teri Ford

Save the zoo

1907 - Cherry Daly

Please support more funding for Orana Wildlife Park. It is a great asset to Christchurch and a safe haven for many beautiful and also endangered species.

1909 - Prerana Karki

I believe we should do more to ensure that we support Orana Park. The costs they incur is too high to cover just as a charitable trust and even the \$1.5m that would make all the difference should be more than manageable when spread to all ratepayers (less than 70 cents per rate payer). Thanks.

1910 - Cynthia Muir

Please increase annual funding support for Orana Park to \$1.5M each year, equating to 68 cents a month per rate-payer, to ensure the on-going financial sustainability of Orana.

1911 - Shezardh Nabinath

Orana wildlife park is an amazing place that does so much for the conservation of these beautiful animals, it would be such a shame for them to struggle to take care of the animals, to make a long story short, fund them!!!

1912 - Emma Borrie

[Parks > Biodiversity & Ecological Restoration]

Orana Wildlife Park is not only a massive part of Christchurch's tourism sector, there is essential conservation work being done for not only Christchurch's biodiversity but Aotearoa as a whole.

>>>

[Coders note. Question is "Parks, heritage or the coastal environment?"]

These are definitely important aspects to be putting money into. When parks and heritage and the environment are being prioritised it is senseless that Orana Wildlife Park is not being supported by the council.

>>>

With climate change there is an increased threat against our wildlife. Orana Wildlife Park needs financial support from the council in order to help protect our unique ecosystem here in Aotearoa from the effects of climate change

>>>

Orana Wildlife Park is a great community location for children and adults alike for connecting and learning

>>>

I don't like getting into politics but with the exclusion of Orana Wildlife Park I felt it necessary to reach out and urge you to reconsider the massive positive impact the council could have on our wildlife, conservation, tourism, and community wellbeing by financially supporting Orana. I sincerely hope you reconsider the inclusion of the park

1913 - Liz Meek

[Grants & Funding > Funding for other CCO'S], [Grants & Funding > Requests for Additional Grants & Funding]

Fund the arts centre.

1916 - Tracey Gregory

My family loves visiting Orana Park and we would like to support them, hoping the council will be able to give them more funds to help to keep this valuable asset for the community

1919 - Virginia Simcock

ORANA PARK I am writing in support of the park and imploring the Council to continue with its funding of the park. Orana Park is not just an asset for the city and its residents and visitors but perhaps more importantly it is part of a world wide nature parks conservation effort to protect and save numerous endangered animal, and bird species. An example are the Tasmanian devils which are here to preserve and protect the species from facial cancers. My husband and I have a long association with the park having being members of the South Island Zoological Society and Friends of Orana Park. My husband donated his engineering expertise to design the aviary. Conservation of all species is very dear to my heart. We have purchased annual passes to the park and have already taken our grandson there twice. Orana Park must continue to receive financial support so it can to continue its fantastic work with its care of native and exotic species, and with its efforts to breed endangered species, alongside its educational programmes that are teaching children (the future guardians of our country) about the importance of preservation and protection of our, and all, flora and fauna. Roughly 70c/month per ratepayer from the Council's derived ratepayers' income is a small amount adding up to about \$1.5 million/year is a vital financial life line for the park to enable it to continue its conservation work as well as being a fantastic park for the residents of our city. As a city, and a country as well as a world wide we will be all the poorer if Orana Park has to close its gates due to lack of funding. Please keep this funding going !!!

1924 - Mark Smith

I think there should be funding for Orana Park because it's a important for young and old to see such beautiful animals It's a important attraction for Christchurch Christchurch has lost so much since the Earthquakes.... It would be such a shame to lose such a Beautiful Wildlife Park too

1926 - Catherine Adams

Support orana Park

1931 - Roz Kinraid

Please continue to fund Orana Park so it can continue. Orana Park is a marvellous resource for the city especially for the kids, where they learn the importance of conservation and develop an awe for the natural world.

1936 - Angela Watson

Please increase funding to Orana Park. It is a unique NZ treasure.

1937 - Louette McInnes

Orana Park should be given as much support as possible. Not only is it the only 'zoo' (as such) in the S. Island, but it also is instrumental if saving and preserving some of the rare animals from overseas such as the rhino, which is an endangered species in Africa. Breeding populations around the world are needed for animals like this. Aside from the conservation of wildlife by the park, my grandson loved going there and seeing all the animals in a more natural environment than the old style zoos. He was fascinated with the rhino and loved feeding the giraffes. So please support Orana Park.

1942 - Sarah Lowery

According to Orana Park, Council funding of \$1.5M per year is needed to assist with their operational costs. Apparently this is the equivalent of 68c each month per ratepayer which when you break that down it doesn't seem a lot. This is an amazing asset for the city and surely brings in additional spending in the city as it would be on the list of visitor attractions. The Park also provides educational opportunities for schools, groups etc and continues valuable work on animal conservation. We support Orana Park by purchasing an annual pass and our kids love going there. We live 5mins away and cherish having the Park so close. When family are in town we also take them (at their expense). I have been going there since I was a kid also and love seeing animals we'd otherwise have to travel to see. It is a fine line between raising ticket prices and making it an affordable place to visit so if additional funds are available then that has to be a bonus for all parties. I certainly believe this is a special place for Christchurch that needs protecting at this time for at least a few years until such time as additional funding is not required.

1943 - Harriet Scott

Please allow \$1.5M funding for Orana Park to keep running, this is a phenomenal facility for residents & visitors alike & it needs council funds to ensure continued care for the animal care & park facilities

1953 - Nick Lawson

Dear Christchurch City Council Members, I am writing to you as a concerned member of the Christchurch community regarding the future of Orana Wildlife Park. It has come to my attention that there is uncertainty surrounding the Council's provision of funding to support this beloved institution, and I feel compelled to express my deep concern. Orana Wildlife Park holds a special place in the hearts of many residents, including myself. It serves as a vital hub for families, nature enthusiasts, and tourists, offering an unparalleled opportunity to connect with nature, observe diverse wildlife, and learn about crucial conservation efforts. For years, Orana has been a beacon of education, entertainment, and environmental stewardship in our city. However, recent reports suggest that Orana is facing severe financial difficulties, with the risk of closure looming in the near future. Despite the valiant efforts of its staff and the support of generous donors, the park's current funding model is simply not sufficient to sustain its operations. The Trust's budget is stretched to its limits, leaving little room for essential maintenance and upkeep. I understand that operating a world-class zoological facility comes with significant costs, particularly in terms of animal care, staffing, and infrastructure maintenance. These expenses are non-negotiable, as they are essential for ensuring the well-being of the park's residents and providing visitors with a memorable experience. As a member of the Christchurch community, I implore the Council to step up and provide the necessary funding support to ensure the continued operation of Orana Wildlife Park. The park's closure would not only be a devastating loss for our city but also a blow to the cause of wildlife conservation and education. Orana Wildlife Park is more than just a tourist attraction; it is a symbol of our city's commitment to environmental sustainability and biodiversity preservation. By investing in Orana, the Council has the opportunity to demonstrate its dedication to these values and to the well-being of our community. I urge you to prioritize funding for Orana Wildlife Park in the Council's budgetary considerations and to work with park management to find sustainable solutions for its financial challenges. Together, we

can ensure that Orana continues to thrive for generations to come. Thank you for your attention to this urgent matter. I look forward to your positive response and to the Council's continued support of Orana Wildlife Park.

1954 - Carol Brookling

Yes, I would be much happier if a further budget allocation was made for Orana Park. I do donate but I feel they need far more support and locally from council. It is a beautiful place to visit, either as a local or a tourist to our gorgeous city. Their work to ensuring best breeding practices are so important to the whole community of wildlife as a whole, that we do not wish that to be compromised, I would implore you to find more in the budget for them.

1961 - Bridget Howe

Please support thr animals and survival of Orana Park.

1965 - Grant Bowater

I wish to recommend CCC's on-going financial support for Orana Wildlife Park. Christchurch is very fortunate to have such an important facility locally, that contributes significantly to our community - particularly for children and their wider education.

1966 - Melissa Murray

Please support orana park

1971 - Matt Bevan

We love Orana park and would like to see more investment made in the park not only for Cantabrians, but also to encourage tourist toChristchurch

1982 - Alana Brown

I would like to see Orana Park receive funding. I'd rather see my rates go towards this than overpriced artwork and cycle ways

1983 - Nick Draper

Please look after and support Orana Park.

1986 - Merrilyn Grey

It has come to my attention that Orana Wildlife Park is struggling. I have been visiting Orana Park since about 1990, when I was a very young child. It holds many special memories for me. In addition to this, Orana Park plays an important role in conservation programmes for both native and exotic animals. It is also a significant domestic and international tourist attraction. It is in Christchurch's best interests

that the Park continues to receive the financial support it needs.

1987 - Bridget Muir

Fund orana park. Important part of our city and learning.

1988 - Laura Green

In regard to funding for Orana Park, Orana is a great facility for international visitors, school students and locals to learn about and experience native and endangered wildlife. I personally volunteered at Orana from the age of 15 for four years and had an amazing time, gaining knowledge and confidence, learning about the animals Orana house and working hard with the team to keep the park clean and provide great visitor experiences. Orana has many international visitors and tour groups including cruise ships which is great for the local economy as well as putting Christchurch on the world map. Also retirement villages often have groups visiting which is so lovely for our elderly community to have a nice outing. Orana have unique teaching facilities for school students which is awesome for the local students to learn about as well as learning about personal responsibility for keeping their community tidy and the affects of climate change to the animal kingdom. Orana has been crucial in their participation in national and international breeding programs. They have directly helped support our native species (including species that are critically endangered) in biodiversity and increase in numbers. I've completed this submission as it is important to me that Orana continues with their conservation work, providing the local community with excellent education and hosting international visitors.

2002 - Bridgitte Dunn-Breen

Support Orana Park, This would be a sad loss to the city if they were unable to continue operating. They play a huge role in educating locals, families and visitors, about preservation of current and on the list endangered species. A hands on learning environment is a great tool that as a city we are lucky to have on our doorstep. Jobs would be lost if they were unable to get additional funding, the animals loose too and Christchurch loses another icon

2003 - Rachel Brownie

Please increase Orana Parks funding. It is a huge attraction for the city. And the animals need it, it already has many volunteers devoting their time... CCC should help them out. 68c per rate payer for what they are asking.

2005 - Barbara Stewart

I have also submitted on the support of ORANA PARK.

>>>

I have also submitted on support for ORANA PARK
21 April.
(69 had)

>>>

Orana Park

Orana Park has made a request for desperately needed financial help of ongoing annual of \$1.5 millions to continue the running costs of their special animal Park.

Visitor income covers only 65% of annual operating costs. Alongside the park being a fascinating and joyful place for families of all shapes and sizes to visit, it is also a world class zoological facility.

In its own special field it ranks the work ~~and~~ with study to increase animal knowledge — it is in its learning field ~~it is~~ alongside our universities agricultural and other learning expertise.

I ask the Council to consider what we could lose without choosing to give Orana Park support.

As a long time season pass holder to Orana Park I am concerned that the Christchurch Council is not supporting them enough. The Park draws additional tourists to Christchurch, plays a big part in conservation, and is a wonderful place for local Christchurch families to have a look at endangered species. Everyone benefits from Orana Park so more help is needed to cover the short falls they are experiencing.

2012 - Nick Boyd

Need to do more to ensure the survival of iconic, one of a kind facilities like Oran's Wildlife Park

You need to offer the things people want in a big city. More support is needed to ensure businesses like Orana Wildlife Park remain operating. It is an iconic Canterbury institution and is the only place you can see wildlife from around the world. They play an important role in wildlife conservation and education around the world, including many breeding programmes for NZ natives. There is NOWHERE else in the South Island that offers what Orana Wildlife Park does. Every Canterbury and thousands all over NZ and the world hold the park close to their hearts. We need attractions like Orana in Christchurch.

2014 - Colleen Kilkelly

Prioritize Orana Wildlife Park

2015 - Lindy Matheson

Increase funding for Orana Park, save the park and all the wonderful things they do. It sets us apart from other cities in NZ.

2016 - Gregg Franklin

My wife and I have supported Orana Park with annual donations for many years now. In addition, we have also supported various campaigns as they arise. A visit to Orana Park is always top of our list whenever we visit to Christchurch! The work that is done here is absolutely fantastic. It is great to see the numerous School Groups visiting for a day of education and fun. The look on kids' faces is precious as they wander around the Park and see all their favourites. Ongoing Conservation and Education is imperative, as our World slowly reduces habitat for our wildlife. Of course we will continue supporting Orana Park, however it is imperative that they also have funding support from Christchurch City Council, to allow them to continue to operate this world class zoological facility.

2017 - Ellen Batchelor

[Grants & Funding > Arts Centre Funding]

Save Orana Park Save the arts centre

2019 - Andrea Savage

Please support Orana Park in the long term plan as this is an amazing place to have in our community

2021 - Donna Sellier

Please support Orana Park

2023 - Peita Scott

Orana park needs help! This is where the money should go.

2027 - Kelly Darby

Please help Orana Park with funding. Its a massive asset to your city and was the first place we visited while we stayed there. A fabulous tourist attraction and it would be a massive loss to have it close down

2030 - Amanda Williams

I saw this, "Orana is a registered charity. We desperately need increased annual funding support from the Christchurch City Council of \$1.5M each year, equating to 68 cents a month per rate-payer, to ensure the on-going financial sustainability of Orana." I totally support the council supporting Orana Wildlife Park and paying extra in my rates to help keep this important icon for Christchurch.

2031 - Christine Suwandy

More money for orana zoo to maintain.

>>>

Spend for orana and other parks for animals and family

>>>

Increase the funding for orana. More money for family and children active

2032 - Susan Gardenbroek

Increase the funding paid to Orana Park. This city does not want to lose this fantastic wildlife experience.

2034 - Kevin Walker

Please increase the funding for Orana Park. This is vital for the wellbeing of all Canterbury residents, especially the young. In a changing world this little gem aides in securing the future of these animals. Orana Park was a special place for our three boys when they grew up, with regular visits. These experiences led them to their future careers and their overall attitude to both their environment and the animals that inhabit them. This is truely a special and unique place in NZ and I can imagine the uncertainty in funding must make for stressful management. For all current and future residents of Canterbury, this organisation is vital that it continues and thrives long into the future.

2041 - Brian Burrell

[Parks>Other]

Orana wildlife park amongst other wildlife and heritage parks are important to attract tourists and educate the public.

2042 - Eileen Keane

I am a volunteer at Orana Wildlife Park and I am so impressed with the work they do around conservation and protection of endangered animals. A boost in funding from the Council would give them the much needed funds to continue this great work. Thank you for your consideration.

2051 - Rachelle Withell

Please increase funding to Orana Park. Canterbury has very few actual tourist destinations. This is one and when compared to overseas examples - it is quite obvious that there is very little funding going on. I went to Orana Park as a child and had very fond memories of it, but as an adult taking visiting family or overseas students, I am very underwhelmed. Please show that Cantabrians take conservation, education and the care of the animals seriously. Highly trained staff are being lost from all areas of our communities by higher salaries overseas, and it is an abhorrent thought that the animals will suffer because of this. We should show that we are proud of the wildlife park experience we offer to our communities and tourists.

2052 - Katherine Bennetts

I would like the Council to increase their financial support for Orana Park. The park carries out important conservation and education work; which is particularly relevant in the changing climate. It is a popular place for both locals and visitors from outside our region. I have enjoyed many visits from the first year of opening to much later, taking my children. I hope that I can Orana Park can continue to provide an ethical animal animal-centred experience to all for many years to come.

2054 - Sean Garratt

To an extent, infrastructure is key to a functional and growing city such as Christchurch. However, funding should also be provided for the maintenance and upgrade to existing recreational features of the city (Orana park). Without these you have a city with no life and the city will not continue to grow

>>>

Continue to provide funding to Orana park. There should be questions about the operational efficiency, but the work completed by the park is integral to conservation and losing this establishment entirely would be a large loss to the city

2062 - Khloe Peck

As a ratepayer I fully support CCC in including Orana Wildlife Park in the LTP. They do incredible work in conservation and education along with the amazing work they do for the community much of which is not spoken of and flies under the radar. As someone who has been on the receiving end of this generosity I could not imagine there not being such a facility for Christchurch and the wider community to access. Last year my aunt sadly passed away from cancer. She was given six months to live and we took the time to give her as many incredible opportunities as possible and make some special memories for her and my uncle. One of which was a visit to Orana, she loved giraffes and I contacted the team at the Park who offered us a free visit, a driver to take us round as she couldn't walk far along with a private giraffe feeding. This experience is still something we talk about and we cherish the memories of this day. Christchurch needs to have these facilities to ensure future generations can have these amazing and for some, once in a lifetime experiences.

2063 - Peter Bell

I am a private individual who has continuously visited Orana Park from a very young age (over 50 years now) with my parents, and now own family. The importance of Orana Park to future generations should be clearly recognised as are the restoration projects for some significant buildings in the city. These buildings that we have spent tens of millions of dollars on will be standing eerily still in the future along with the natural world which is rapidly falling silent and will no doubt sooner than later become an "acoustic fossil" for all, without urgent action to halt environmental destruction at all levels. We need to protect these seemingly last genuine wildlife sanctuaries for our children and future generations so they can experience a small part of an ever-diminishing wilderness.

2064 - Julie Burgess

I believe that the CCC has an obligation to provide ongoing funding to Orana Park. It is an incredible asset to our city and provides so much joy for locals and tourists alike. There is nowhere else quite like and I know as Annual pass holders that our family we have spent hundreds and hundreds of hours

exploring the park over the years. . My children have grown up running around there and each visit they spend time reminiscing about when they visited as young children. The tourism income must contribute to the city through job and money spent. The on site cafe is brilliant and provides employment to many. We have happily supported Orana for nearly 14 years through the purchase of our annual pass. When family from Australia visit we love to take them - it's a wonderful place to show them NZ flora and fauna as well as other magnificent creatures that can't easily be seen like the phenomenal gorillas and giraffes. Orana work in the worldwide conservation space has put in on the map - it's no way thing to be able to care for gorillas and it is a testament to the work the park has done that they have been given such a privilege. I implore CCC to continue to fund Orana Park so they can continue to support the animals in their acre while maintaining current infrastructure and planning for the future with new projects.

2065 - Robin Lake

The Council is under pressure at the last minute to provide funding to a number of projects. I do not think the Council should supply (unbudgeted) money to the Cathedral or Arts Centre, but I do support providing increased funding to Orana Park. I think that the volunteers deserve our support following the COVID downturn, and we have a responsibility to the animals.

2067 - Jack Woolcott

More funding needs to be put towards Orana Park.

2070 - Imogen Crooks

PLEASE HELP SAVE ORANA PARK We need to work for our animal friends too!!

2073 - Peter Cook

To have a gem like Orana Park begging for money when countless millions are being spent on stadiums and restoring the Cathedral is a short sighted disgrace. We should be spending money on REAL elephants instead of white ones that influential people promote to make them feel important

2080 - Kathryn Stringer

I would like the council to increase funding for Orana Wildlife Park. I think the park is far more important to our city's heritage than for example, the cathedral. Many families visit Orana with their children, and parents can often say they went there when they were children too. Furthermore, Orana does a lot of important conservation work, such as breeding and releasing endangered native birds. It is also very important for education - I am a high school teacher, as well as a parent, and I love taking children to the park to educate them about animals and the environment. This is important for children to develop empathy which makes them better citizens. Orana Wildlife Park is also a vital asset for tourism in our city - many cruise ships and tourist groups include a visit to the park in their programmes. The future of Orana is uncertain, so it is essential that the council increase their funding to secure the future of this amazing community resource and part of our history.

2081 - Shannon Irons

You cannot cut funding to Orana Park. That place is amazing, what they do for the future of wild animals, the breeding programmes that have to keep these beautiful animals around in our world longer is incredible. The place needs funding otherwise those animals will not get fed. They need support - increasing their entry fee is not an option as it will likely turn people away. It's such a massive tourist attraction too, most people I know visit there if they don't live in Christchurch, it's the place to go. Orana Park needs the councils support to survive - those animals rely on it!

2083 - Katrina Burdett

Orana Park needs more funding. It is Christchurch only animal park where our kids can come into contact with and experience large animals. It is a vital resource for schools, I am a Special Needs Co-ordinator as well as a mother. Our school uses it for school trips as well as my wee ones and me go monthly. My kids adore it and learn some much from going there. Christchurch doesn't have the same animal amenities as bigger cities the Council should be making this a priority to save.

2090 - Chui Boon Goh

I live in Auckland and had donated \$200 to Orana Wildlife Park's during its budget crisis in 2020 due the lockdown resulting from the manufactured fake Covid crisis. A receipt is attached. Reduce ridiculous overly-fat salaries, eliminate perks and cull Council headcounts. This is an easy thing to do and there will be plenty of funds for Orana Wildlife Park.

2094 - Nicola Craddock (Zoo and Aquarium Association Australasia)

As the Executive Director of the Zoo and Aquarium Association Australasia (ZAA), I write to express my full and enthusiastic support for the request to Christchurch City Council to increase Council funding for Orana Wildlife Park.

ZAA is the peak body representing the collective voice and animal welfare standards of zoos, aquariums, sanctuaries, and wildlife parks across the South Pacific region that operate to the highest standards.

Orana Wildlife Park is a valued member of ZAA with a strong commitment to animal welfare, tourism, conservation and community / visitor education. The increase of funding to Orana would progress their important conservation endeavours and ensure they continue to deliver engaging and educational experiences for the community and tourists. Orana makes significant contributions to six key Department of Conservation recovery programmes for some of NZ's most threatened species, e.g. kākāriki karaka, Canterbury's critically endangered parakeet species. The future health of Aotearoa's natural environment is a national priority, and Orana Wildlife Park's efforts to amplify action for this cause should be supported.

Orana Wildlife Park is a member of ZAA's accredited zoo whanau, which collectively receives just under 3.5 million visitors per year, 1.9 million of whom are local community members or domestic tourists. ZAA members in New Zealand, including Orana Wildlife Park, are heavily focused on their value within their communities and invest heavily in community

engagement programmes. Almost \$2 million is invested in formal community programmes by ZAA-accredited zoos and aquariums in New Zealand annually.

Additionally, zoos and aquariums reach over 330,000 people via their membership databases and have regular contact via 600,000+ people and their social networks; Facebook, Instagram, and Twitter. Orana Wildlife Park is no exception to this type of

activity. Connection with this number of people by ZAA zoos and wildlife parks across New Zealand is a powerful mechanism for supporting Aotearoa's native species and ecosystems and driving environmental excellence.

Animal Welfare Accredited zoos like Orana Wildlife Park play a critical role in communities as they communicate the issues animals face in the wild. A zoo visit is a fun day out with family and friends, a destination to forge life-long memories from shared experiences. Zoos like Orana are also places where people can form and develop their connection with animals and nature and explore why they are important to themselves and the planet. For this reason, shared experiences with friends and family at the Park have the power to drive meaningful community-based action.

As a community influencer and conservation educator, Orana Wildlife Park is an important community facility that plays a significant role in driving pro-conservation behaviour and supporting community mental well-being.

I express my full and enthusiastic support for the request to increase annual funding to Orana Wildlife Park from the Christchurch City Council to \$1.5M annually (equating to 68 cents per month per rate-payer).

Orana Wildlife Park is a jewel in the Christchurch community, providing entertainment for local people and tourists and a valuable opportunity for people to connect with nature and better understand the need for environmental preservation. Ongoing development of this vital community asset can only be a long-term benefit for the community and the region overall.

2101 - Craigie Withers

Orana Park should also be supported financially to ensure that it continues to operate successfully on local, New Zealand wide as well as world wide levels. To me it is an integral and vital part of firstly, attracting visitors Christchurch itself through to the whole country and internationally. Secondly, Orana provides many benefits in a great variety of ways such as socially for people - for me with family outings, visitors from overseas and so on for many many years. From a financial perspective, as a money earner in general as it has been and still is a destination so the spending of money along side a visit/visitors to NZ should also be taken into account. Finally, and very importantly, its purpose for general education on animal conservation of endangered species world wide alongside its vital role in local and international animal advocacy, recovery and breeding programs. For all the above reasons, I strongly support increasing the funding needed to ensure that Orana Park continues to have a well-run, fit for purpose position in Christchurch, Canterbury, New Zealand

2112 - Matt Easterbrook

[Grants & Funding > Arts Centre Funding]

We should be funding Orana Park and the Arts Centre. These are important places to our city

>>>

Funding should be included for Orana Park and the Art Centre

2122 - Jessica Bullock

Please give required funding to Orana Park. This is an extremely special asset to Christchurch and educational place for past, present and hopefully future generations.

2123 - Kathleen Lawson

Keep orana park open and funded

2124 - Mary Chase

Need to fund Orana Park as is tourist attraction

2128 - Kyle Lawson

Keep orana park funded and open!!!

2129 - Marcella Marshall

Fund orana park. Each rate payer give \$1 per month.

2130 - Sam Mathieson

I would like to see Orana Park to receive funding they need. It would be an absolute shame to lose this attraction in Ōtautahi.

2131 - Tracey Hubbard

I would some of the allocated funding to go to Orana park. Orana park is a key element of christchurch and has been for year. The funding would not only allow the park to stay open but contuine it breeding programs

2132 - Jeneane Jefferson

Please support Orana Park and the wonderful work they do with the animals. Orana Park is an incredible resource here in Chch for locals and visitors to the city. I remember visiting Orana Park as a child in the 1980s and since then I have taken my own children, and visitors to the park to enjoy the animals. My children have also been to Orana Park as part of school groups, and this is a vital resource to aid in their learning. Please continue to support Orana Park so that future generations can enjoy it.

2134 - Kate Freeman

Please support Orana Wildlife Park. It is an asset to Christchurch, and I would be happy to pay a bit more in rates to ensure this Park can continue to operate.

2135 - Tina Lib

Please give more funding to Orana Park. I had a family pass there for years and years while my kids were young. Such an important asset to the region.

2137 - Paula Densem

Need to finance Orana park, they do a great job, particularly in the conservation of endangered animals

2138 - Samuel Burdett

The council needs to dedicate more funding to Orana Park. This is Christchurch's only large animal park and such a crucial resource for our children to experience. We have two toddler and we go monthly - the learning they get from this is huge. It would be devastating to see this go. By not funding these guys properly resulting in them closing will mean so many children will never experience seeing these animals in the flesh. Christchurch is very limited as it is compared of to larger cities of what there is for children in relation to animals and wild life. The council needs to make this a priority!!!!!!

2139 - Baird Fleming

I am writing to let the Council know that I want them to support Orana Wildlife Park. The Park positively impacts Christchurch, the South Island and New Zealand in general. It has a robust conservation program that is responsible for supporting many native animal programs as well as provides significant support to the regional zoo breeding programs as a key member in several very important species such as rhino and giraffe. Without Orana, the breeding programs of these species would fail and the only way to get these animals into the country would be to fly them in internationally which can cost into the hundreds of thousands of dollars. Orana also provides a significant contribution to New Zealand's tourism and education programs. Supporting them with an additional \$1.5M/year would be very helpful.

2140 - Brendan Fraser

I believe Orana park is an essential part of Christchurch. Over the years we have purchased annual passes my children have found great benefit with these. It is the only place I know of where you can see animals like these in the South Island and the education benefits from this are huge. I can't believe Orana park don't get much funding from the Christchurch City Council as I believe the majority of the population of the wider Christchurch community benefits from them personally as well as what they do for flora and fauna around Canterbury. I see in your plan you're looking at environmental issues. Orana park could probably help with a lot of these.

2141 - Wulf Borrmeister

Include Orana Wildlife Park in the LTP - as per the park's detailed phased funding plan starting with \$500,000 for the 2024-25 year, increasing annually to \$1.5 million, adjusted for inflation through 2034. Orana Wildlife Park is a big part of the citizens of Christchurch, and for the National and International visitors it attracts. I believe OWP is a very important part of the growth of Christchurch and this needs to be recognised and acknowledged by the CCC.

2144 - Amy Mcnaughton

Some funding for the Arts centre and Orana Park would be really beneficial to such important organisations doing great work such protecting species.

2147 - Fiona White

Keep Orana park going. It does a lot of good work with the animals there

2148 - Sue Watts

please Help Orana park. i have been going there 40 years, i took my children and now my grandchildren

2149 - Carole Price

Very concerned about Orana Park. I feel the Council needs to help out. The park is a very important asset of Christchurch for local people and visitors, especially children to see wild animals without Orana a lot of people would have no chance of seeing animals in the wild. The park has a great number of volunteers. That must help out financially. I think the Ltp should include help for Orana. It has been there many years, and being such a great asset for Canterbury and New Zealand.

2150 - Dennis Wang

Dear Christchurch City Council, I support the request to keep Orana Wildlife Reserve in the roster of the Christchurch Long Term Plan (2024-2034). Orana Wildlife Reserve is one of our family's favourite tourist sites in Christchurch, and it is also the only place children can contact the big animals living in wildlife. In one sentence, the zoological reserve left us with numerous happy memories since we arrived in 2016. Orana once contacted its customers for financial help during the challenging

pandemic period in 2020. From then on, I acknowledged that the zoo heavily depended on revenue from tourists and would be unsustainable if the revenue became unstable. So, I understand its request to bid for continuous public funding through the Long Term Plan. It can provide onsite animals with a great living sanctuary and help staff make grand educational schemes to reach its teaching function. Thanks very much. Kind regards Dennis Wang, an Orana's annual pass holder

2152 - Bethan Elley

Support Orana Park Financially and other animal rights/ protection initiatives. Let's make Christchurch the animal rights capital of New Zealand!

2156 - Claire George

Orana Wildlife Park needs some funding support to keep this Christchurch asset going. It is a tourist attraction as well as an attraction for locals to enjoy and also educates children and adults alike. They also are part of breeding programmes helping to keep some animals from extinction.

2157 - John Quayle

I support additional money being given to Orana Park

2158 - Patrick O'Sullivan

It is regrettable that Chch City Council is drafting a long-term budget that will imperil the existence of Orana Park. In my view, it is of the best open-range zoos of its kind. Even if limited to some extent in its range of animals, it is in other respects superior to some more well-known zoos in larger, older cities which can often retain something of the 'Victorian' idea treating animals as creatures to be caged, as opposed to roaming more freely in open environments. Orana has long been a source of joy, wonder and education for my children (now adult) who still love to visit there when they can; as a family we have been members for nearly 25 years. The park has introduced my children to a range of animals and provided us with many fond memories, and it is frequently mentioned as one of the 'things to do', whenever we have visitors. Orana Park fully deserves proper funding to stay viable, and be seen not as a financial burden, but as a notable part of the economic and recreational life of Christchurch which plays an important role in raising awareness about environmental and conservation issues, too. Future generations, not just our own, deserve to experience its riches.

2159 - Lea Gibson

Orana wild life park needs more funding

2160 - Vern Grant

As a family, we have visited Orana 5 times in the last 4 years, principally with grand children in tow. We feel that it is a high priority to keep the park operational in the long term. Currently, much of the council energies are spent on sports and convention type assets whereas orana is the only educational/scientific/ecological and environmental venture the council does and should continue to

support. The Park does a great job in attracting visitors. Today, for example, we overheard two German, 3 Spanish, 2 Canadians and a small troupe of French tourists. We also witnessed a group of about 15 intellectually handicapped and challenged teenagers who were all obviously enjoying their outing. Orana contributes significantly to breeding programmes from around the world - this should not be allowed to acquiesce. Council balance is imperative. Many organisations require council funding to stay afloat but this appears to be the only conservation based entity to do so.

2161 - Jaimee Ferris

I would like the council to support Orana Wildlife Park with increased funding. As a born and bred Cantabrian, I am 43 years old and I have three children aged 9, 19 and 20. I could not say how many times I have been to Orana Park in my lifetime, but I would estimate at least once every year. I have three children aged 9, 19 and 20. They have all experienced Orana Park regularly through visits with myself and their Dad, with their grandparents and with their schools. There is nothing else like Orana Park in Christchurch. The experiences and learning/education that a visit to Orana Park provide are not available anywhere else in the South Island (possibly even New Zealand). I know the staff and board work tirelessly to make Orana Park successful and they must be credited for this. Orana Park receives up to 200,000 visitors every year - with borders now fully open, imagine what this number could get to and the positive impact that would have on the whole city in terms of expenditure. If Orana Park did not receive funding it would be an absolute travesty. I understand there is a lot the city needs to pay for, but surely within a budget of \$16.8 billion dollars, Orana Park can secure funding which will be less than 0.009% of the total budget over ten years!

2162 - Gail Pooley

Keep Oran's Park

2164 - Samantha Storm

Please support Orana Park. This is a valuable part of Christchurch and Canterbury and has been a large draw card to Canterbury for us before we even lived here.

2165 - Brittney McLean

Christchurch City Council should seriously consider including funding for Orana Wildlife Park in the long term plan. The Park is a huge asset to Christchurch, for locals and tourists alike. People of every demographic enjoy visiting Orana Park, from young children to the elderly, meaning that funding would benefit a huge range of people and be an effective use of ratepayers money. The work that Orana Park does for conservation and education is essential so that future generations can maintain the populations of the amazing species that Orana cares for. Some species, such as the critically endangered Sumatran tiger, heavily rely on conservation programmes, such as those that Orana is involved in, for the survival of their species. I have seen first hand how the Park is run by a group of hard working, passionate people and they are what make Orana a truly amazing place to visit. The financial position of the Park is very worrying, and overall the loss of Orana Park would be a huge loss to Christchurch. A small contribution from each ratepayer would ensure the longevity of Orana Park, and make a huge difference to the future of the species that call it their home.

2169 - Danielle Armstrong

Orana Park is a special irreplaceable taonga in the Canterbury area. I would like to see the Christchurch City Council, supported by WDC and SDC provide funding to keep this wonderful asset and tourist attraction viable for future generations. Even \$1.00 per rate payer would make a massive difference. Thank you for your time

2170 - Heather Mein

I think Orana Park needs to be looked after better and the extra funding would help significantly towards the look of the park which would increase the visitor numbers , the animals need to fed and by doing so I think an increase to rates by such a small amount to keep the zoo up and running is a worthy cause . I would like to see the park up and running for years to come for my grandchildren to be able to enjoy the park and there children in the future too.

2182 - Diane Singleton

Annual Funding for Orana Park should be considered.

2184 - Rachel Allen

I would like the 1.5 million dollars required by Orana Park be funded by the ratepayer. It is internationally recognised and a major draw card to Christchurch. Anywhere else overseas rate highly their zoos, we should do the same. It's an institution and we must keep it going

2185 - Rochelle Cousins

Support Orana Wildlife Park!

2186 - Katie Todd

I'm here for Orana Park

>>>

Orana park is a huge asset to both chc and New Zealand. The funding for this needs to continue/increase as required

2188 - Kim McNeilly

Orana Park! Please consider supporting this amazing asset for the local community and visitors to the region. I have fond memories of visiting as a child and now with Grandchildren living in Chch we love

sharing the experience with them. I have developed a new love for ChCh as it has rebuilt over the years. It is becoming a fun, vibrant place to visit. Orana Park adds another dimension for families and we don't want to lose that! If anything, funding should be a priority to continue to upgrade and develop in line with the rest of the region 'rebrand'. I would much rather visit Orana Park than a stuffy cathedral!!

2192 - Russell & Nancy Field

We have supported Orana Wildlife Park for many years and respect the work being done taking care of the animals and providing a safe environment for endangered Species. It is a valuable attraction for the City offering an interesting time for families and Tourists.

2193 - Leanne Reid

Yes Orana Park needs financial aid of 1.5million a year. It costs the park \$100,000 a week and they are struggling. I buy a yearly pass to help and last year I brought the family tickets to go inside the lion enclosure. The kids were amazed and excited to learn all about the lions, the primary school did a trip out last year and the kids loved it. It's a sanctuary for our native species esp if injured, it's an educational tool for everyone esp children. The majority of people will never see these animals in their natural habitats, and so there needs to be an understanding of the animals in order to protect them and their natural habitats. The more understanding and knowledge people have of these amazing creatures the more protection they are afforded by generations to come. Orana park is iconic to Christchurch, it's a tourist destination but also is used by Cantabrians. During lockdown they opened their cameras to the world and every morning we checked out what the animals were doing, that was when I realised how much Orana Park needs our support to stay open. I've been trying to go there as much as I can in order to support them. I think the council should too, otherwise we will lose something very special, a big draw card to Christchurch. You ask about putting money into finding new events. You have very cool stuff here in our back yard why not make a big even day out at orana park? Make it a family event to bring families together, get outside, learn something new, get some exercise walking around. I wouldn't mind my rates going up if it actually supported the things we need as a city, and we need orana park. \$1.5 million apparently that's like .68cents per household.

2194 - Chris Rayner

Please continue to fund Orana Park, its one of canterbury's vey few tourist attractions that keeps people in the city rather than farming tourists out to the regions, its a fantastic source of education and learning for everyone who attends

2195 - Rachel Trowbridge

More support for Orana park

>>>

Orana park needs more support

2196 - Paul Ainsworth

Please increase your support of Orana Park. The work it does supporting wildlife around the world is amazing. The value of taking my children and now my grandchildren to view animals they may never experience otherwise should be protected.

2197 - Leeanne Peterson

Help with the funding of Orana wildlife, for the future of the animals. It will cost more to relocate them to other zoos here in New Zealand and in Australia. Having something like this in Christchurch for future generation is beneficial.

2203 - Abigail Strydom

Orana Park should continue to be funded

2205 - Rachael Privilege

I think that the council should continue to support Orana wildlife park. It is an important part of our community and provides a significant draw card for tourists- both foreign and domestic.

2209 - Rob Woodthorpe

Orana

2210 - Wendy Pos

Please include funding to help Orana Park. It is such a vital part in helping protect wildlife and educate about them and us the only major zoo in the south island.

2211 - Abby Thompson

Keep orana park alive!!

2212 - Jonathan White

Please provide some funding to the Orana Wildlife Park. My business pays significant rates towards the CCC LTP and I would like to see what we can do to keep this operation going. Its is one heck of a facility and I think is very useful for children and families to get a greater understanding of their environment. It looks like they are running short of funds and need to upgrade the facilities. Whilst I know this is not a core business of the CC, providing funds to such a venture is more useful than some of the other projects that you read about. We will regret losing this facility, if it cant be sustained.

2216 - Angela Bertacco

Please seriously consider increasing the funding for Orana Park. This is a precious and valued attraction for Christchurch enjoyed by both locals and visitors to the city. As well as providing all those animals with a safe and loving environment in which to spend the rest of their lives.

2218 - Vince Lockwood

Orana Wildlife Park is a unique park in NZ. I strongly recommend the council support & Fund this park.

2223 - Jill Turner

Need more funding for Orana Park

>>>

Orana Park needs more funding

>>>

Orana Park is special. Let's increase the council grant

>>>

More funding for Orana Park

>>>

I volunteer at Orana park and this is a great visitor attraction. Please more funding

2224 - Michelle Chung

Please increase the funding requested by Orana Wildlife Park. Covid hit many businesses hard and many have now gotten back on track with visitors to our lovely city. Orana is struggling to get their income back to what it was pre-covid. I first visited Orana only holiday here in 2004 visiting whanau and have many fond memories of visits over the years - especially now I live here and have citizenship. Orana plays an essential part in educating out tamariki on the importance of conservation. A boost in funds will help in attracting visitors to our region, which in turn helps Christchurch in general.

2227 - Megan Officer-Christmas

Orana wildlife park needs our support

>>>

Help orana wildlife park

>>>

Orana wildlife park needs our support.

>>>

Orana wildlife park has been in chch all my life . I love going there . Sadly there is no bus service out there they need our support. How can a big attraction run without our support. You can go onto the loins now if there was a bus . People who do not drive can get out there please dont let one of our major wildlife parks which is way better than the other disappear

[2228 - Phillip Mora](#)

More funding more Orana Park. This park needs millions more put into this to make in a better attraction for tourists and locals. It's in a sad state and risk closing entirely without urgent funding

[2231 - Heather Andrews](#)

Save Orana Park!

[2232 - Maegan Connell](#)

I'm really sad to hear about the financial struggle Orana Park is currently facing. I have been visiting the park every year since I was a toddler and I have very fond memories of the park. It's a hot spot for tourists, School children and the general public. It's conservation efforts are so widely acknowledged and it would be a huge loss for everyone if that had to stop. Orana needs help, Please, Please help with funding. It will make a huge difference, not just for the animals or general public but for the staff who work hard everyday to care and protect these animals. Imagine creating a bond with an animal and removing that bond all because of lack of funding. It would be incredibly stressful for both the keeper and the animal, and that isn't fair. Please help them! Please fund them and help keep Christchurch's greatest attraction and home to these incredible animals alive!

[2233 - Stacey Lane](#)

Happy to pay a contribution to Orana Park in my rates.

[2234 - Jane Edens](#)

Libraries are a thing of the past put money into other areas like orana park

2239 - Amelia Duthie

Its essential to hold onto what is iconic as well which is supporting Orana Park

>>>

But support what is near and dear which is Orana park. Not only locally but to all new zealanders. Ratss ate rising everywhere and cant be avoided sadly

>>>

Support Orana park

>>>

Yes if Orana Park is part of the 870 million

>>>

Orana Park is a priority

>>>

Please support Orana parks day to day running. Its iconic and an important part of Cbristchurch amd Canterbury to all New Zealanders. Its a huge draw card for Christchurch

2241 - Francesca Hayes

You must continue to fund Orana Park - it is a very special part of the city and important for residents and tourism

>>>

Also an increase in events and things to do, including keeping Orana Park going.

2243 - Catherine Birch

[Recreation, Sports & Events > Events]

Please give the funding for the Santa parade and Orana wildlife park to help the animals as everybody loves to go there.

>>>

We would like more funding for the new Christchurch stadium and the Christchurch Santa parade and for Orana wildlife park to help the animals.

2244 - Amy Woermann

Orana Park has a massive impact on education and prevention of endangering species through animal products. They deserve a portion of this money to ensure their conservation efforts are continued.

>>>

I want to see a portion of funds given to Orana Park to cover their running costs so that they can continue their conservation efforts, upkeep the appearance of the zoo, and bring down admission prices to allow the zoo to be more accessible to lower income households. They do amazing education work but the zoo cannot function relying solely on the income from admissions.

2245 - Laura Anderson

Please support Orana Wildlife Park. I live in Selwyn but often visit Orana, and could not imagine a world where my child (and I) would not be able to see Giraffe, Rhino, Lion etc up close. They are a huge part of all our futures and the work they do for animals and conservation is so very important. Please do not let that fall away because they do not receive the funding that they need so desperately!

>>>

Please support Orana Wildlife Park and the work that they do with DOC - this impacts climate change and our natural environment

2247 - Esha Dickson

Sav Orana Park

2248 - Laura Stuart

SAVE ORANA WILDLIFE PARK IT IS CRUCIAL TO CHRISTCHURCH'S ATTRACTIONS FOR TOURISM AS WELL AS THE JOBS IT PROVIDES.

2249 - Aimee Guckert

Orana is a registered charity, who desperately needs increased annual funding support from the Christchurch City Council of at least \$1.5M each year (equating to 68 cents each month per rate-payer) to ensure the on-going financial sustainability of Orana Wildlife Park and is needed for their ongoing conservation and education work, and for the continued care of existing animals in their care, what will happen to them without increased funding?

2250 - Paulette Jones

To help with the cost of feeding and looking after the rare animals that we get to enjoy.

2251 - Mobim Mathew

Allocate funding for Orana. It is a place worth saving. The best of it's kind in the south island.

>>>

Save ORANA PARK

2252 - Shanice Adair

PLEASE HELP ORANA PARK!

2254 - Caitlin Raudsepp

Increase funding for Orana Park - a Christchurch mainstay. Letting it fall into disarray by not increasing this will become an issue on a number of levels. Consider funding the things that people living in Christchurch actually care about if you intend to raise rates.

2255 - Taylar Hubbard

Keep funding Orana Wildlife Zoo, I want my kids to experience the magic I did visiting when I was a child. Watching these beautiful animals on tv is one thing, getting to experience them in person is magical, a wee snippet into a world some may never experience. Please don't take that magic away!

2258 - Jak Hartley

Please give funding to Orana Wildlife Park, this place needs to continue to stay open

2259 - Mathilda Rains

Orana park is the best part about Christchurch. Kids, families, place for first date. It's for everyone ever. Without it so many animals will be displaced. Funding should be prioritised to keep this place open, it's the heart of Christchurch

2260 - Natalia Wilkinson

Please put money towards Orana Zoo

>>>

Orana Zoo

2262 - Rowan Prestage

Orana Park needs more funding - or perhaps you could help allocate land for providing the food needs rather than the land remaining empty

2263 - Scott Babington

[Grants & Funding > Arts Centre], [Other/Special Interest Topics > Cathedral]

However commitments that have been established, such as with the arts centre, orana park and restoring the anglican cathedral need to continue to ensure their viability. I wonder that a different type of relationship should be established, reflecting that funding status - for example part-ownership.

2264 - Sarah Scollard

[Three Waters > Water Supply (Capital)], [Recreation, Sports & Events > Community Arts], [Parks > Playgrounds & Play Equipment]

We need to spend less on 'The Arts' and more on maintaining the good things we already have such as Orana Park, outdoor play areas and water quality.

Please continue to provide Orana Park with funding so future generations can enjoy seeing endangered species. Orana has a fantastic breed and release programme for our native birds. This aligns with protecting our precious taonga.

2266 - Dayna Carswell

Orana Park Orana has a large role in attracting visitors to our region.

2267 - Redacted Redacted

[Other/Special Interest Topics > Cathedral]

Orana Park and the Cathedral both need CCC support.

>>>

Orana Park, which in NZ's only open range zoo should receive the very small 'top up' funding it is asking for.

2270 - Maria and Natalie Couper

[Parks > Parks Maintenance, Art Galleries & Museums > Art Gallery (Operational)]

Also for people coming to visit Christchurch there must be activities like the tram, Gondala, Arts Centre, Orana Park and our amazing parks and spaces like the Port Hills. These areas need to be cherished and saved for everyone.

2271 - Catherine Roughton

I would like to support Orana Wildlife Park being included in the Long Term Plan. Orana has been a part of my life for many years, it provided me with the opportunity to complete my qualification in zookeeping and progress in the career that I am so passionate about. The conservation work that

Orana undertakes is so valuable and the potential to do more is enormous. It is vital that Orana receives this funding in order to retain skilled staff to continue its very important role in protecting and conserving NZ's precious taonga species

2274 - Liselle Silver (RARE HORSE SOCIETY OF NZ)

Support is needed for Orana park and their important conservation work.

2276 - Joshua Wells

Increase funding for Orana Park

2277 - Josey Fleitas

[Recreation, Sports & Events > Events]

I absolutely love the Christmas parade and Orana park, focus on keeping these and other family attractions and activities funded. The A&P show has already been cancelled due to funds. I'm not sure what is happening but these should be funded to keep families with low cost activities. Thank you.

>>>

Please keep Orana park, the Christmas Show Parade and the A&P show going, along with other family activities. These are important parts of our community!

2278 - Amy Hyland

I would like to support the funding of Orana Park. I have many happy memories of visiting the park myself as a child, and would be very sad to see it lose Council funding and be unable to continue. I have visited once in recent times, and intend to purchase annual passes in the near future so that my family and I can visit more regularly. Orana Park is an important feature of Christchurch and should be supported.

2279 - Alan Prescott

I think that the council should continue to support Orana Wildlife Park. It is the only open range Zoo in NZ and it undertakes important conservation work. It is a Canterbury Icon. Generations of children have grown up visiting the Park. It is also a drawcard for international visitors and visitors from other parts of NZ. Many local people including those with disabled family members are able to obtain annual passes which provide ongoing enrichment that their family members would otherwise not be able to access. This organization deserves the support of the council by increasing the annual funding to \$1.5m

2283 - Elisabeth Hendrickson

Orana park needs funding to be able to stay open. They are a major part of christchurch and it would be such a shame if it had to close its doors. Christchurch has such minimal stuff to do with family as it is we don't need to lose another thing

2284 - Anna Western-Bell

The council should absolutely continue to fund Orana Wildlife Park. This is a wonderful asset for our city in terms of education, wildlife conservation and tourism.

2285 - Sarah Hutchinson

Orana park needs funding. It is an asset to our city.

2286 - Larissa Moeller

[Grants & Funding>Arts Centre Funding]; [Other/Special Interest Topics>Cathedral]; [Transport>Roads (Capital)]; [Spending>Our Proposed Spending]

As a rates payer I much rather see funding go to projects for everybody like Orana park, road improvements, hospital, art centre etc than it going to the cathedral which is for one denomination only anyway

2288 - Danette Wereta

Kia ora Christchurch City Council,

I am writing to express my strong support for increased funding to Orana Wildlife Park and to advocate for a substantial investment in the park's future.

Orana Wildlife Park is cherished in our community, providing not only education but conservation efforts. However, it deeply concerns me to learn about the financial challenges the park is facing. Merely getting by and surviving is not sufficient for Orana.

In order for Orana Wildlife Park to thrive and continue its invaluable contributions to our community and environment, it requires more than just basic operational support. It needs a substantial investment to address its current state and to ensure its long-term sustainability.

The park's facilities are in need of maintenance and improvement to enhance visitor experiences and ensure the safety and well-being of its animal residents. Additionally, attracting and retaining skilled staff is vital for maintaining the park's standards and fulfilling its conservation objectives.

Furthermore, Orana Wildlife Park's impact extends far beyond our city limits. It plays a crucial role in conservation efforts nationally and internationally, and its presence enhances the reputation of Christchurch as a hub for environmental stewardship and wildlife conservation.

Therefore, I urge the Christchurch City Council to not only continue its support of Orana Wildlife Park but to significantly increase its funding to ensure the park can thrive and flourish. Investing in Orana is an investment in our community's future and in the preservation of our natural world.

Thank you for considering my perspective on this matter. I trust that you will give careful consideration to the importance of Orana Wildlife Park and the significant benefits it brings to our city and beyond.

2290 - Vicki Sullivan

Please help to keep Orana Park going. It is a real asset to the entire Canterbury area and will be a true loss to NZ if it has to close and we lose the beautiful animals that live there.

2291 - Grace Olliver

We want you to support Orana Park, it is a very important part of the Christchurch community and is a cornerstone of the cultural attractions for locals and tourists. Amazing location for conservation and education, many children won't have the opportunity to travel elsewhere and see the animals. I visited as a child and have taken many groups to visit when volunteering, eg with GirlGuidingNZ. I look forward to one day taking my own children there. It would be a travesty if Orana was forced to close or deteriorate due to lack of support from the Council. Separately, I am a huge supporter of more safe bike lanes, particularly ones separated from the road.

2292 - Lynaire Odey

Funding and support of Orana Park to keep the facility running

2293 - Marie Griffiths

Funding for Orana Park needs to be included. Orana Park has been a well loved and much visited facility for my family since it opened. Their conservation efforts need to be supported and it would be a huge loss to the city if it had to close due to lack of funding.

2294 - Marina Robertson

Support Orana Park!!!

2298 - Jim Sullivan (AJ Day Options Trust)

We encourage the Christchurch City Council to support Orana Park, with the required financial assistance to maintain the park as an ongoing valuable asset to our city. The following is how Orana Park positively impacts our organisation: We are AJ Day Options. We are a charitable trust that provides support to adults with an intellectual disability. Our clients provide a regular weekly supply of shredded newspaper to Orana Park, which is used for animal comforts. This regular and ongoing activity offers our clients an opportunity to provide a meaningful service to their community. Clients are involved in the entire process: the surplus newspaper bundles are collected from the distributor, pages individually separated and folded, shredded and transported to Orana Park weekly. These tasks can be broken down into several steps, to enable the inclusion of a large number of clients. We find this is an extremely popular and enjoyable activity. It also seems to encourage calmness and relaxation for many. Orana Park kindly give us access to the park, each time we make our deliveries. Clients who have been involved in the shredding process are able to visit the park for the morning. The vast park setting provides an excellent opportunity for physical activity. With the drawcard of viewing the next animal enclosure, clients are often walking much further than they normally would. They can be unaware of the distance they have walked, because they are distracted by the animals. And being out in the open air, away from the city, surrounded by nature, is always therapeutic. The social aspect of getting to know the volunteers and park staff over the years, has also been invaluable to many of our clients. Orana Park have a wonderful team who are always very friendly and welcoming. Our clients have learnt many animal facts from the keepers and volunteers and have been very observant of the changes and habits of the animals, over the years of regular viewing. Seeing the shredded newspaper being used by the animals around the park, and knowing their work and effort is being used for a meaningful purpose, gives a good feeling of pride and satisfaction to our clients. Orana Park is a well-loved and important experience for our team at AJ Day Options.

2303 - Ann-Marie Murray

In terms of funding for orana park, i believe this is essential to preserve this iconic facility. Many people from within the CCC boundaries and surrounding districts visit Orana park which brings money into the Christchurch and several business. Without funding, it is probable the park will be unable to

remain open. If they increase prices, this will only sustain the park short term and visitors numbers will probably decrease as they won't want to pay the prices. I have taken several overseas visitors to the park and they have been extremely impressed and recommended. it to many other people. I believe the local economy would suffer if Orana Park was not supported. Thank you.

2305 - Monique Maynard

[Grants & Funding > Arts Centre Funding]

I would never read this plan normally, if not for the Save the Arts Centre campaign and plea from Orana Park - where are you stating the funding will be removed from these iconic, green spaces that attract locals and visitors to our city?

>>>

THE ARTS CENTRE AND ORANA PARK HAVE REACHED OUT TO MEDIA - HOW MANY OTHER ASSETS DOES THE CITY RISK LOSING AT YOUR HANDS?

2315 - Nigel Davies

I would like the council to continue funding of the orana park. This is a asset for christchurch for tourism and education.

2321 - Pamela Camp

A big concern, i want to ensure Orana Park remains open. It is a wonderful facility for Christchurch

2325 - Lisa Ferdinand

Following recent media attention and considering the massive increase for unnecessary new projects I think the proposal to assist Orana wildlife park - which is an established christchurch attraction - with funding too stay open - for atleast a few years while under the current financial climate should be considered.

2340 - Hazel Sligting

Facilities such as Orana Wildlife park are an incredibly important part of Christchurches heritage, education for all ages and tourist attraction. As well as an integral part in the breeding and conservation of New Zealand's native creatures. Funding for this organization is imperative.

2341 - Gina Widdowson-fowler

I believe Orana Park should get more funding for the park and there animals.

2342 - Daniel Lack

Priorities need to go into maintaining the existing draw cards like Orana, the south islands only exotic animal park, and the countries only open range park that many internationals visit and kiwis.

>>>

And where does the rest go ? Surely a small half a percent can go to keeping parks like orana running well. They only need 1.5 mill a year. Wellington and the north island zoos receive 8 + million a year each!

>>>

Orana needs far more - 1.5 mill a year. It provides an incredible platform for all aspects of the local and outer communities, society, and visitors. It also provides education, job opportunity, and further tourism draw.

>>>

You must include orana wildlife park in your spend. It is \$8 a year for residents . And 15% of what other zoos get from their rate payers annually. Orana is the only exotic open range park in the country, and the only one in the South Island. A place for all to enjoy, witness, experience, learn, and grow.

2343 - Maria Cassin

I would like to advocate for funding for Orana Wildlife Park to continue as part of the Draft long Term plan. It is a small amount per person and it is the only park of its kind in the country and fantastic for families and tourists. Thank you for taking the time.

2348 - David Williamson

Orana Wildlife Park is a great asset fir Canterbury and the South Island. It is the only Wildlife Park in New Zealand and asva charity deserves better funding from all our local councils, and I would like the CCC to give this careful consideration in you 10 year plan. Visit the park and find out just what ths park does, not only what you see but what happens in the background especially conservation.

2349 - Tracey Butler

Please ensure Orana Park is fully funded for its continued success. It's an incredible facility staffed by passionate professionals and the value that locals and visitors get from their visits is huge. There's nowhere quite like it in NZ. It deserves local Govt support a generous funding increase.

2351 - Nicola Martelli

Please please please keep funding Orana Wildlife Park and help keep this park open. Its not just about the park but the conservation towards our native and endangered species Orana Park are directly involved with, and education they provide around why so many animals are now endangered. I hope the CCC continues to support this amazing facility

2353 - Anthea Lees

Orana wildlife park is fantastic and should also receive funding. Its really important younger generations learn about wildlife habitats and conservation.

2358 - Carolyn Moffat

[Grants & Funding > Arts Centre Funding], [Transport > Transport (Roads (Capital))]

We do need to decide what needs to be done, and what is nice to have. For example, we probably should support the Arts Centre and Orana Park in the immediate future, to give them time to source other funds, but perhaps the upgrades to Gloucester St, Harewood Rd, and the streets near the stadium could wait a bit longer. Here's a thought ... perhaps on game or concert days, the streets closer to the stadium could simply be closed off, the same way Park Tce is when there are big events in the park. That would surely save a bit of money until we can afford to do these streets.

2359 - Sarai Rangi (aka Roper)

I personal would like some of the rates I pay to support Orana Park. While i dont visit the park often now, I have happy memories of visiting as a child, taking my child to visit, and now my grandchildren. Five generations of my family have enjoyed visiting Orana Park and have benefited from the education about conservation and protection of our flora and fauna it has given us. I genuinely hope CCC continues to financially support Orana Park, and would like to think my rates will contribute to increased support for the park. Bugger the Cathedral!

2364 - Caitlin Wilson

I would like the draft long term plan to include funding for Orana Wildlife Park as it is an important place for conservation in the south island and a fantastic tourist destination for visitors to christchurch

2373 - Jason Flood

It's a great educational facility that i would my grandson to be able to continue to attend as he grows and learns.

2378 - Carolyn Bepple

Hello, as a visitor to New Zealand I had the opportunity to spend the day at Orana Park, April 18th. What a treasure you have with an open range zoo. Huge park with beautiful animals. The outdoor animals all looked well cared for with ample paddocks or pastures to roam in. Other creatures in buildings were healthy as well with adequate housing. But some of the buildings or structures were in need of maintenance. Then I was shown the article in the paper regarding the park's financial struggle. Please support your wonderful park. The rate increase of \$8.11 yearly is little compared to the joy that the park gives to the many families and other tourists who I saw on April 18th. A small price to also make it a tourist must see site. The benefits to hotels, motels, restaurants and others would be enormous for even an extra overnight to see the park. Thanks you for considering thoughts. Carolyn

2379 - Hannah Balderson

The continued support of Orana park is beneficial for tourism and education. It is a great resource right in our doorstep

2381 - Kim Franicevic

Keep orana park open

>>>

Keep Orana park open

2391 - Mitchell Rogers

Continue Orana Park funding - this is a unique place in Canterbury and NZ, and can't continue without sufficient funding.

2393 - Coralie de La fage

Please ensure that Orana is well supported - it's an fantastic attraction for our city and an amazing opportunity for Canterbury residents to see wild animals.

2394 - Yolanne Kennedy

We need to help the park as losing these animals would be devastating not only for the animals but for the public. I love going here as does my family

>>>

We need to keep orana park we can not lose it

2400 - Martin Riley

I believe the Council should support Orana Park to help it to survive the current financial crisis but it should also support it to such an extent that each ratepayer be given on free (or heavily subsidised) admission a year. That would allow residents to take visitors there which would in turn boost visitor numbers and income for the park.

2402 - Brandon Jones (Duncan Cotterill)

Submission to the Draft Long Term Plan 2024-2034 in support of Orana Wildlife Park

I am writing this letter on behalf of Duncan Cotterill as a submission on the Christchurch City Council's (the **Council**) Draft Long Term Plan (**LTP**).

We submit that the Council should support Orana Wildlife Park (**Orana**) through inclusion in the LTP and increasing the level of funding to ensure financial viability moving forward.

Duncan Cotterill has had long-term involvement with Orana, in both professional and non-professional capacities. A recent Duncan Cotterill peer group event was held at Orana, where employees spent the day exploring the park, interacting with the animals, and socialising. This was a successful event which those attending thoroughly enjoyed. Orana has also been kind enough to host some of our teams for team-building days at the park, allowing 'behind the scenes' access which was highly valued by those involved.

Orana is a registered charity that provides a great benefit to our community, whether it be through their educational opportunities, or as an enjoyable day out for all ages. We also appreciate the important conservation work that Orana carries out and would like to see this continued long into the future.

As a charity in these difficult financial circumstances, Orana relies on funding to continue operating effectively. Therefore, we submit that the Council should include Orana in the LTP and allocate increased funding to ensure their beneficial work continues.

2412 - Sonia Baker

I'd like to see funding provided to orana wildlife park. I see orana park as an asset to Chch. It's doing amazing conservation work with endangered animals & I'd like to be able to take my grandson there many times in the future. It's also educational for our children to see & understand these animals as well.

2413 - Kevin Buley

Orana Wildlife Park is a key New Zealand member of the Zoo & Aquarium Association Australasia and a member of the World Association of Zoos & Aquariums. This Christchurch organization contributes to a wide variety of coordinated international breeding programmes for species and is a crucial partner in the intensive management and recovery programmes for threatened endemic New Zealand taogna species. In partnership with other zoos and the Department of Conservation, Orana Wildlife Park plays a key role in helping to secure the future of these species in the wild. Unlike the other three main zoos in NZ (Auckland, Wellington and Hamilton), Orana does not receive significant local government funding to support their operational and capital requirements. As a result, the organisation has to focus its limited resources in a way that means it is not able to achieve its full potential for the conservation of wildlife or the support of the wider Christchurch community. Additional financial support from the Council through the LTP would enable Orana to grow and develop its programming and better secure its ongoing sustainability with consequent beneficial outcomes to the wider Christchurch region and the taiao.

2415 - Gabrielle Sa

Funding for orana park should be provided. A zoo is a great resource for children and an asset to the city.

2423 - Tanya Naylor

Iran's Wildlife Park requires more financial support

>>>

Orana Wildlife Sanctuary need more financial support

>>>

More financial support for Orana Wildlife Sanctuary

>>>

Increase financial support for Orana Wildlife Sanctuary

>>>

Orana Wildlife Sanctuary need more support

2425 - Bronwyn Kircher

Help Orana park out with funding they are needing. Children need to be outdoors and running around. Protect the animals before it's too late

2427 - Joe Henderson

Keep Orana Park going please

>>>

Keep Orana Park going!

2428 - Deborah Hanning

Orana is a great park that deserves some council love to help with the animals

2433 - Jan Donaldson

To whom it may concern,

Orana wild life park , has an education conservation project, ongoing, to teach the public about endangered species, everyone is aware global warming, and this is one way that Christchurch can help out in a small way for the precious animals of this world , The wildlife Park he's a massive wonderful volunteer team, which help out a lot which helps keep wages down ,these volunteers are dedicated to their jobs shuttle driving ,walkabout, conservation talks, and at times help keepers when they need a hand, if it wasn't for volunteers , Orana the wildlife parks wages would be sky high, so they are saving money by having volunteers that help out at times BUT you can't use volunteer's, as keepers .

Do you think that maybe not painting streets and other unnecessary projects that the council is doing, could use that money to help Orana park .

Orana means peaceful, don't you think in these times of stress, we need somewhere to have a quiet peaceful to wind down, to sit in many of the leafy places to just sit and watch , contemplate on nature to enjoy nature life

2436 - Chris Marriott

I am one of the many volunteers out at Orana Park and I submit that if the organisation has to close through lack of funding it will be our children and children of the future who will be missing out. One of the things I enjoy most about the Park is watching children enjoy learning about the animals and conservation without a device in sight.

>>>

Once again if we lose Orana Park it will our children and their children who will miss out

2440 - Erin Jamieson

I would like to see funding go to Orana Wildlife Park.

>>>

I am a Trustee of Orana Wildlife Park. We respectfully ask for \$1.5M each year in funding from Council. There are huge risks to the viability of the park if we do not secure increased funding. Orana will be in severe financial difficulty in less than two years without increased Council operational funding support. COVID was a silver lining as central government funding bought time, but increased Council assistance is crucial for the future financial sustainability of Orana Wildlife Park. The Trust's budget is managed on a 'critical expenditure only' basis, which does not allow for crucial maintenance funding. Operating a world class zoological facility is expensive. The same high costs apply regardless of lack of income, given our responsibility to care for our animals 24/7, 365 days a year. Admission prices cannot keep pace with inflation and the continual rising costs of operation. It is not practical to dramatically increase admission prices as we need to remain affordable and competitive. Until 2018, visitor income covered 90% of annual operating costs; visitor income now covers only 65% of annual operating costs.

>>>

Yes, but please can you look at some funding for Orana Wildlife Park.

>>>

Just the need to help Orana Wildlife Park.

2442 - Paula Bevilacqua

[Grants & Funding > Arts Centre Funding]

Do not take funding away from Orana Wildlife Park or The Arts Centre. As a family, these are locations often visited as well as taking family from overseas here. As a breeding programme, NZ needs to be part of the conservation effort to keep animals from demise.

2444 - Angela Slade

Please help Orana Park wild life rescue with funding so they can continue to help all animals

2446 - James Briskie

I am writing to support the request by Orana Wildlife Park for increased and sustainable funding in the Council's draft long-term plan. My support for Orana Park is both personal and professional. On a professional level, in my role as a Professor of Vertebrate Biology at the University of Canterbury, Orana Park provides us with a valuable and irreplaceable resource for teaching. Since 1997, I have used Orana Park as an outdoor lab for the students in our second-year paper in Animal Behaviour (BIOL 272). This course has enrolments of 80- 90 students per year and is one of the most popular second year papers offered by our department. Each year I take the students to Orana Park to run an all-day lab on sampling animal behaviour for use in comparative analyses. Using the animals on exhibit, the students learn a variety of techniques in sampling methodology (e.g., instantaneous sampling, focal sampling, reliability testing, etc.) as well as having to later analyse the data they collect statistically and prepare it as a written report. This requires the students to carry out systematic observations on more than 20 species of animals, a task requiring at least 6 hours of work (thus, it is not just a pleasure trip to the zoo). Alternatives to Orana Park are simply not available in the Canterbury region. Prior to our visit, I require the students to complete a tutorial using online videos of animals, to prepare them for using their time wisely while at Orana Park, but this is not a substitute for observing a living animal. At third year, we offer an advanced course in Animal Behaviour (BIOL 383), with students then using the observational and sampling skills developed at second year on independent research projects on wild animals. Thus, Orana Park provides that critical resource for us to build the practical skills of our students that online videos alone cannot do. Indeed, many of our students go on in careers in conservation biology, using the practical skills they first obtained in observing animals at Orana Park. Feedback from the BIOL 272 students consistently rate the lab at Orana Park as the most favourite part of the course. Apart from its value in helping us achieve our teaching goals, Orana Park plays an important and growing role in the conservation of endangered animals (both native and overseas species). Orana Park is one of the few organisations in the Canterbury region that is helping through its efforts to breed endangered species including whio (blue ducks), orange-fronted parakeets and brown teal. Scientists have repeatedly warned us that the planet is in the grip of a conservation crisis: almost a quarter of all mammal species and 20% of bird species around the world are at risk of being lost in the next two decades. The figures for New Zealand are even worse. If there is one thing future generations will not forgive us for is letting species go extinct when we had both the knowledge and resources to prevent it from happening. New Zealand is a wealthy country at the global level; future generations will be asking why if we had money to support transient sporting events (e.g., yachting races), we did not also support the conservation of this country's native animals and plants? Finally, at a personal level, I greatly enjoy my visits to Orana Park as a member of the public. My wife and I have seasonal passes and visit regularly to support the Park's efforts at both conservation and education. The role of Orana Park in education and nurturing a concern for the natural world cannot be under-estimated. As a child myself, a visit to the local zoo was my first experience with seeing a wild animal, and later inspired a professional career as a Biologist. For most people, their only contact with animals other than their pet cat or dog is through a visit to Orana Park. One only has to watch the excitement of the young children as they queue to feed the giraffes or when they look through the glass and into the eyes of the gorillas staring back at them, to see the importance of making that connection. The loss of Orana Park would be a loss not only for conservation efforts but a loss of opportunity for inspiring future generations to care for our planet

better. I strongly urge Council to support Orana Park to ensure it can continue in its service to Christchurch and the Canterbury region.

2447 - Sue Lang

I would like to see increased funding from Council for Orana Park. It is a long held institution of Christchurch and is very important for the conservation work it does. It is a great place to visit for all and provides educational opportunities to learn about the animals that are in residence there. It is also an important tourist attraction for our area. Even though it sounds like a lot of money being requested, on a per person basis it is not a lot and I am sure that nobody would like to see the loss of this wonderful place.

2458 - Sofia Nunez

The Orana Wildlife Park needs more money for the sustainability and conservation of the animals. These are species that are in danger, and thanks to the efforts of the park and its staff, these animals are able to reproduce and survive. Along with the global importance of looking after the animals, the park represents money for the city as a touristic attraction that is open all year around. The Closure of the Orana Wildlife Park would be a dramatic loss in terms of the money that represents for the city and for the animals that live in there

2466 - Tracey Cloughly

We need to keep assets like Orana park. Excellent for children and families to visit l

2470 - Robyn Hodge

Yes. I feel strongly that the funding Orana Park is requesting should be accepted. The proposed increase only affects us by approx 68 cents per month. Other councils fund their zoos. Orana is a great asset for the city and Canterbury as a whole for conservation, education and entertainment. Thank You.

2472 - Jan Stevenson

Please continue support for Orana Park. I have annual pass it is an excellent place for my children to go to, get outdoors, learn about conservation, learn about animals and support the important animal conservation programs being undertaken at Orana

2473 - Juanita Wilson

We need to invest more in Orana Wildlife Park.

>>>

I would like to see more money invested into Orana Wildlife Park. Without more funding they are going to struggle and I would not like to see the city lose the park. The park does a lot for the city. While I agree that some management strategies are required going forward I do feel that more funding will provide the backbone for this to happen. The park is not just a place for people to go look at animals it plays a vital role in conservation and stopping the extinction of some amazing species we have in this country. Not only this it offers a great visitor opportunity and going forward as we continue to recover from the aftermath of covid this is critical. The annual pass benefit that is offered is a fantastic opportunity to the locals and one that we take up. It's great for both our mental and physical health. We have been supporting and visiting Orana Park for more years than I can count now. It is great that it gives people the opportunity to volunteer with them which I know people have done and have loved it. Funding to ensure the ongoing operation of the park I believe is essential as the loss of the park would be a massive loss to the city

2478 - Shanae Thomas

Orana Park needs more Funding

2480 - Kristin Muirhead

Orana Park desperately needs more funding, it's such an important location for so many cantabrians. It's far more important than cycle/bus lanes

2483 - Kate Parker

Please help Orana Park. Its such a special place. I loved Orana Park, as a child, we came all the way from the West Coast to visit, in the 1970s and i have such fond memories of this amazing place. It was always such a special treat. I loved how free the animals seemed to be. We would love to be able to bring our Grandchildren here, it is such an educational, amazing place that needs to be available for future generations.

2487 - Amy Burrough

Orana park must stay open and to do that they need council support and rate payers money. Chch needs attractions, the world needs our conservation. Yes other things in Chch need attention... pot holes included! But I'd happily give up bike lanes (and yes I use them daily for my work commute) to fund orana park. Please please keep the funding going

2491 - Heidi Warren

Orana park needs to keep going, we could include theme park rides, events, a theatre and allow diversity of shops there to create more revenue. Christchurch needs a permanent theme park and more tourist attractions(not sport stadiums, they're just not that hip anymore). Nature will always be the biggest attraction so keep supporting Orana park, cultivate more gardens and allow overseas investors to contribute to big projects here.

2492 - Jemma User

I would be happy to pay a small amount to support orana park

2496 - Nikki McDonald

Support Orana park and give them the 1.5m they need

2498 - REDACTED REDACTED

I do think we need to preserve and support some of our facilities like Orana Park. This is essential for preservation of our precious animals, many who face extinction without facilities like this. Many people would not get the opportunity to see animals without places like Orana Park. It needs investment to bring it back up a great condition.

2500 - Carsten Knott

S Cooperative work with conservation organisations like Orana

>>>

[Parks > Other]

Support organisations doing conservation work like Orana, Travis Wetland

2501 - Timothy Rowse

Orana Park Wildlife needs more funding. Its often overlooked and is a vital place to have in are region and NZ. It has the potential to be better if it had the funding it needs. Ever since my wife and i had our kids its been a special tradition to visit each year and we hope to continue for generations to come

2509 - Angela Nicol

I do support helping Orana Park and to improve its services and animal care. I do not mind my rates contributing to a place that is about learning and conservation for both residents and tourists.

2510 - Ayla Barnes

Please consider Orana Wildlife Park! What they do is not only amazing for the animals, but the community too. There is nothing in the South Island quite like it and I'm sure it attracts a lot of tourists to the city

2513 - Lucy Richardson

Orana Park plays a huge role in our city in encouraging both tourists, and locals, to learn about wildlife conservation and to help keep these species alive. Please support them financially, in the work they do to preserve both native, and exotic, species. Covid lockdowns hit them hard and they really need the support to keep their animals fed and maintain the park. I am an annual pass holder and have been for 2 years. My toddler and I, visit the park every few weeks. I think lunch at the cafe, watching the giraffes, has got to be the best lunch spot in the city.

2517 - Tracie Poole

Kia ora, please include orana park in your funding plan. They are a big draw card to christchurch for out of towners which must have an impact on your local economy. If they dont receive funding assistance, they will likely become derelict over time, animal welfare will be harder to meet and people will stop coming.

2531 - Karen Atkinson

Please consider increasing funding to Orana Park which is an iconic and valuable asset to our residents and tourist attraction

2547 - Carlin Curry

I don't think I just know ORANA PARK is sentimental to all cantabrians as a lot of use went when we were younger n haven't been in ages and when we do go it's just a nice childhood feeling and I Would love for council to contribute to the important conservation and animal work efforts that Orana Park provides

2554 - Paul Schwalger

Supportive of continued funding of Orana Park

2555 - Emily Huang

Orana has in attracting visitors to our region as a key tourist attraction in the city. The importance of encouraging visitors to Christchurch for economic growth and having facilities in the city that help to keep people here for longer. I was there to visited a couple week ago and spend nearly 5 hours there; it provides great value for money and potentially spill over benefits.

2562 - Tara Stewart

Support orana wildlife park. Take it from the 140m library budget, thats out of control [Libraries > Libraries (Capital)]

2564 - Christian Williams Schwalger

Hi there, just regarding Orana Wildlife Park I'm 19 years of age now but when I was 13 years old I didn't have any friends and was quite a shy person. My dad used to take me out there most Saturdays then I found a passion for animals and the staff members there got to know me and were extremely nice to me which had a huge impact on my mental health so much so that stepped outside my comfort zone and at the age of 15 I became a volunteer. The social skills and people skills I have learnt from there have been life changing. The park means a lot to me and the community.

2566 - Charlene Clements

Wow, Orana Park is the most amazing place to visit. I went as a child with my family and have since taken my children and now taking my parents back to visit. Orana Park is such an asset to Christchurch, bring in visitors from overseas and local. Allowing schools to use as an education tool - which I have participated in as a parent help. The conservation and breeding programs are essential to the survival of our local wildlife and is something we as a nation pride ourselves on and to have Orana Park part of this is something the whole community can be proud of. Orana Park should be included in and allowed to receive increased funding to allow them to continue to provide important conservation and educational work, not to mention the wonderful family and visitor experiences to be had.

2568 - Karen Archibald

Orana Park needs funding so they can carry on with conservation and helping endangered species. This is vitally important. Also to educate people about the endangered species.

2575 - Andrew Scott

Please support Orana Park as they encourage tourists to stay longer in Christchurch. A city without a Zoo has no soul.

2577 - Wendy and Verity Busby (Braingains Tutors)

We would far rather see Orana Park funded than this silly cycleway built.

2585 - Susan Macann

I would like to see Orana Wildlife Park receive increased support of \$1.5M per year. I have been supporting Orana Park for several years now with private donations in support of the park because I love the environment and learning opportunities, and they have been an important part of my life since I was born here. I know infrastructure and services are important too, but I would like the Council to signal their value of cultural and environmental opportunities outside the generally understood scope of Council responsibilities.

2593 - Mike Wall

As the Chair of the Orana Wild Life Trust Board I encourage council to continue supporting Orana Wild Life Park. The work carried out by the trust is of national importance and of local significance. As one of the major tourist attractions for Canterbury the continuing financial assistance is required and graciously accepted. Without council support the animals we love and the public support could be in danger of disappearing. The Trust Board works tirelessly to ensure the costs and expenses are prudently spent. We seek your continued support. Thankyou.

2597 - Simon Ashby

Keep it open

[Coders Note: subject was Orana Park]

2600 - Jodie Mckinley

There's too much financial strain on individuals and rate increases from the city and regional council is too much.

2601 - Laura Lawrence

[Grants & Funding > Arts Centre Funding]

I believe Orana Park and the Arts Centre should be supported with adequate funding.

>>>

Adequate funding should be made available to orana park and the arts centre.

2609 - Di Purcell

We need to keep assets like Orana Park updated to attract not only locals but world visitors. Without funding we will not be able to view the animal kingdom on our doorstep.

2616 - Jane Chrisp

Yes but more needs to be done for orana park

>>>

More should go to Ōrana park

>>>

More to orana park it provides a unique activity to all citizens and overseas visitors

>>>

Increase funding to orana park

2618 - Margaret Stewart

[Grants & Funding > Arts Centre Funding] , [Other/Special Interest Topics > Cathedral] , [Spending > Te Kaha]

I would like to contribute towards the Orana Park, Art Centre, Anglican Cathedral requests for money. Since I am not going to be using the stadium you can divert that percentage of my rates from the stadium to Orana Park, Art Centre and Cathedral. I am sure there are a lot of other people who would be keen to do this as well

2619 - Laura Cosgrove

Funding the arts centre and Orana park (especially) are unique identifying factors to Christchurch.

>>>

Please support Orana park it keeps this amazing resource accessible

2632 - Cory Palmer

I want Orana park to be included in the long term plan. It's a great asset for the community and they need more support for their conservation work

2641 - Melissa Jarman

Also please support Orana Park. This special place is a unique attraction where kids of all ages can learn about animals from all around the world. They learn empathy and to care about these animals by interacting with them therefore going on in life to actually give a damn about the endangered

animals both big and small. We need to make sure we provide not just sporting options for our tamariki but cultural and environmental learning as well. Forget about the cycle ways for a few years and invest in the growth of our children's values and happiness.

2642 - Stan Price

Christchurch has Orana Park the only genuine wild life zoo complemented to a degree by Willowbank. Thousands of voluntary hours have been invested by Christchurch people to ensure people (children, parents and visitors) see, be educated and understand that these animals and birds are real and not just pictures on TV or magazines. Orana Park is a fantastic destination helping to preserve some threatened species. The Long Term Plan should include ways and means to ensure the future of Orana Park. Orana Park is a fantastic destination

2650 - Alexander Amies

Please also fund Orana Wildlife Park

>>>

Please fund Orana Wildlife Park

>>>

Please fund Orana Wildlife Park - they need \$1.5 million a year

2655 - Michele Mccaw

Also feel that its important to invest in our tourist attractions. We've just traveled to Auckland and Wellington and there zoos are amazing. Vibrant busy places with lots of visitors. Orana park has amazing wildlife. Only gorillas in the country and needs your continuous investment

2661 - Emma Battrick

Orana Park needs support. It's a tourist attraction and losing it would be a real deficit and draw for tourists. Locals alone love it having the ability to keep going is important

>>>

Please support orana Park

[Requests for additional grants - for Willowbank, Tram etc]

Keep the places like gondola tram orana Park willowbank going for a locals and tourist, ensure places are disability friendly

2662 - Emma Forrester

Orana Park needs saving! With Orana park in its current 'rundown' state the great work that goes on behind the scenes is being forgotten. The conservation work, the amazing staff and the educational aspect of the park are being overlooked by the aging buildings and facilities. We recently visited and had a wonderful day seeing all the healthy animals (family favourites being the giraffes, rhino and gibbons) and having a great walk around the park but there were people talking about how "it isn't what it used to be". I am a proud member of the Rangiora Vet centre which has a lot to do with Orana Park and it is a privilege to have assisted in the health care of the very well looked after animals. For me and my family it is a no-brainer, there should be a huge effort to support Orana Park and help secure its future. Thank you for taking the time to read my submission. Kind regards, Emma

2665 - Kelly Donaldson

Support Orana Park!

2666 - Kathleen Crisley

SUBMISSION POINT 12: I fully support the request of Orana Park for funding from the Council, particularly because I've just saved you more with this submission than the Park is requesting and the fact that the Park is currently funding 65% of its costs through admissions (far greater than our own pool/recreation facilities).

Zoos make a fundamental contribution to the World in their efforts to save threatened species, allow people to experience nature, and to learn about biodiversity, conservation and sustainability. These sentient and innocent animals and the qualified people that care for them should be supported.

2667 - Hayley Simpson

Support Orana Park. Orana Park is a fantastic place to visit, to learn about many different animal species and they're doing a fantastic job of conservation of many of our native species. This work needs to be recognised and supported. Orana also needs funds to help maintain the park and help make it look attractive to visit. Other zoos across NZ receive council funding and so should Orana.

2674 - David Fomm-Ward

Orana Wildlife Park should be supported with the funds they need to flourish. The zoo is a Christchurch icon known around the world by millions of people and is that synonymous with the city it was included as a property on the new Monopoly Christchurch edition. They do great work for the city attracting international and domestic tourism, while providing bespoke educational activities for the younger generations of Cantabrians. They complete great conservation work saving a number of NZ native and global exotic species all while being the only large zoo in NZ that doesn't already get significant council funding. For example Auckland Zoo gets around \$12m and Wellington gets around \$8-9m annually. Orana is seeking \$1.5m which will help them repair and upgrade the infrastructure of the park to continue the good work that they do and to maintain and attract experienced staff with competitive salaries.

2675 - Dianne MacCormick

Increase funding for orana park

2681 - Carolyn Hamlin

I'am submitting this email in support of the council's future funding of the Orana Wildlife Park.

It is imperative that the Park receives this funding to continue to support its wildlife conservation program. Not only is it of local importance, but it also contributes to the worldwide effort in keeping these crucial animals from exploitation and extinction.

Orana Park run many educational programmes for children and young people, teaching the importance of conservation and environmental issues in a changing world where the animals are at risk of their species disappearing from the planet in the near future.

Orana Park is extremely popular with the general public and provides a genuine Tourist interest as well by highlighting our unique Wildlife found only in New Zealand.

The Park also plays a vital role in significant global breeding programmes.

It is a wonderful place to visit, the animals are truly enthralling, and holds a special place in the hearts of the local people. It is fantastic to see families and children spending an unforgettable day out together in the fresh air, learning about and experiencing the animal kingdom and other creatures we share this world with.

The thought of the demise of such a magical place is beyond comprehension. I do hope the CCC will continue too appropriately fund such an important Wildlife Park, and protect it and its inhabitants for future generations.

2683 - Jay Collins

We are writing to support and express the importance of Orana Wildlife Park in the local community and in the broader scope of international collaboration for the conservation of endangered species.

Orana Wildlife Park not only serves as a vital sanctuary for endangered animals but also contributes significantly to education, research, and conservation efforts on a global scale.

We have become aware that Orana Wildlife Park is facing severe financial difficulties and is in danger of experiencing a significant setback in less than two years without increased operational funding support from the Christchurch City Council.

While the central government funding during the time of COVID provided a temporary relief, sustained Council assistance is imperative for the continued financial sustainability of Orana.

The Trust managing Orana Wildlife Park currently operates under a 'critical expenditure only' budget, which unfortunately does not allow for essential maintenance funding. Operating a world-class zoological facility entails substantial costs that remain consistent regardless of the income generated.

The responsibility to care for the animals round the clock, every day of the year necessitates high operational costs that are not completely covered by admission fees.

Despite their best efforts, admission prices cannot keep up with inflation and the increasing operational expenditures. As a result, the gradual decrease in visitor income coverage from 90% to 65% of annual operating costs since 2018 has left Orana in a financially precarious position.

Orana Wildlife Park not only serves as a local attraction but also contributes significantly to international, national, and regional conservation efforts.

The Park plays a crucial role in nature conservation and offers countless social, economic, and environmental benefits to the Canterbury region.

With over 200,000 visitors annually, Orana Wildlife Park is a key player in promoting wildlife conservation, education, and awareness.

Therefore, we strongly urge the Christchurch City Council to consider providing long-term funding support of \$1.5 million per annum to Orana Wildlife Park.

This financial assistance will not only help secure the Park's future but will also ensure the continuation of its invaluable contributions to conservation efforts.

Supporting Orana Wildlife Park is a cost-effective way to uphold its mission and sustain the benefits it provides to the community and the broader ecosystem.

1

Thank you for considering this funding proposal, and we look forward to the Council's support in preserving Orana Wildlife Park for current and future generations.

2684 - Michael Stewart-Smith

Orana park needs more support

2696 - Bev Fremaux

It is imperative that the council provides more funding to the Orana Wildlife Park. The importance of their conservation and educational work is highly underated. The park plays a significant role in attracting visitors to our region, and is visited time and time again by local residents. The annual pass is an excellent benefit and ensures long term local support for the park. The cost of living has increased and so to the cost for running everything including the Park, that's why the council must help by providing more funding for Orana Wildlife Park, as it truly is on of the "jewels in the crown for the Canterbury region.

2698 - Gillian Sweeney

Whilst the need for infrastructure is important, so is preserving wildlife parks for ensuring that animals of all sorts are around for generations to come. Orana park has excellent recognised breeding programs as does Willowbank and need sufficient funding fm the council to carry on their good wors

2700 - Selena O'Brien

I fully support the hard work of Orana park looking after very special animals. I'm happy for a part of my rates to go toward funding this important part of Christchurch, I believe if there was better transport out there for locals and tourists alike, like a direct bus from the city, there would be more visitors. We have the opportunity to make this as good as world class zoos.

2704 - David Macdonald

I would like to see an increase in funding levels for Orana Park. The current funding is not enough to support what is a key attraction in Christchurch.

2714 - Rachel Fechny

I think more funding should be allocated to Orana Wildlife Park. Orana is important to engage with the community and educate people on environmental and conservation issues. The park is also a attraction for tourists and activity for locals to enjoy.

2716 - Megan Fraser

Orana park budget needs review, its a huge part of christchurch. Please dont let it close down, christchurch has lost so much already. Im sure next year other councils could help too id much rather my rates went there than the museum or stadiums.

2717 - Jacinta Maguire

Places like Orana Park rely on your help. As a tax payer I'm happy for my tax to go towards and every year we get a pass to help.

2718 - Milena Manusheva

Help Orana Wildlife reserve with funding.

2719 - Karen Betony

Orana Park is a unique space in NZ that provides excellent educational and family time experiences for local and tourists alike. It is essential that CHC recognise this and work with Orana to provide financial, promotional and professional mentorship support.

2722 - Danae Ward

I would like to come on Orana Park and how necessary it is to continue supporting it. It is a special place for family and I always take visitors there. We had a homeschool group led by the fantastic guides there, it was fun and informative. The kids came home with a gazillion facts and a deep love for Tasmanian devils. My favorite memory is of my little boy a few years ago, standing transfixed at the gorilla glass watching the ape slowly eating a pile of stool. He spent weeks after that deciphering any droppings he saw on the sidewalk, in the park, etc. It was both disgusting and very funny.

2726 - Susan Adams

Orana Park is the best place to go in Christchurch. Enjoyed by the young and old, locals and tourists. Please help out with funds for this amazing attraction.

2727 - Aleesa Royds

I think we should still support Orana Wildlife park, it is a great place to spend time with the family and their ongoing conservation means that everyone has the chance to see endangered species in the flesh.

2728 - Angela Harrison

I would be more than happy to contribute from my Rates the amount sought by Orana Park at \$8.11 per year per rate payer or monthly, 68c. It is a small price to pay for preserving Orana Park which is important to all walks of life. They do a wonderful job and it would be a regional disgrace were depriving it the funds it needs caused it to be endangered, especially when money is given to things such as a money-gobbling destroyed cathedral which ought to have been demolished when realistically it was beyond repair. There is a lot to be learned from Orana Park which is a legacy for children educationally, the elderly giving so much pleasure, and to everyone in between. Far better than wasting money on a decaying cathedral which ought to have been demolished after the Earthquake. Orana Park on the other hand is life. Jesus was humble. Wasting money on a earthquake destroyed cathedral to the tune of millions of dollars is immoral and irresponsible. Life is what matters. Paying millions of dollars on the ruined cathedral is not for the glory of God. It's being done

for the glory of obsessed persons, and is immoral. Orana Park is a far better use of my Rates money. It would be a disgrace regionally and nationally were Christchurch to endanger it by depriving it the proportionately small amount of funding Orana Park needs.

2729 - Phil McGregor

Rates increases are always a difficult topic of discussion, especially these days when everybody seems to be short on money with costs of everything rising. HOWEVER I would like to give my support to the Council providing more funding to Orana Wildlife Park. This is a fantastic asset for Canterbury and New Zealand being the only Open Range Zoo in new Zealand. I work at the Park as a Volunteer, generally one day a week but will also go out on an 'as required' basis when I'm free. I have been there since June 2022 and completed some 900 hours. I work in the Visitor Services area and my main position involves driving the Safari Shuttle around the Park. In this role I meet several people whom I really enjoy talking to. Majority of them provide very positive feedback and think the Zoo is fantastic and it's great with the conservation work that is carried out there. It is quite amazing the number of International Visitors that I meet and really enjoy the park. There is also an awful lot of people who visit the park from around New Zealand, especially during the school holidays. The money the park is requesting from the Council for is not large and could easily be found in other other Budget categories as I mentioned earlier. I strongly support Orana Wildlife Parks request for funding.

2739 - Bethany van der Krabben

Please consider supporting Orana Wildlife Park. It's a fantastic community resource benefitting all walks of life. Most Cantabrians have great memories of the park and would love future families to have the same. It's a great educational facility for a large number of Christchurch schools, both primary and secondary. Holders of an annual pass find comfort from visiting whenever they can, be it for an hour or a whole day. The volunteer side offers retirees a purpose and gives school leavers people skills. Don't forget all the amazing conservation work they do too and and they also hold the only Gorilla in New Zealand.

2740 - Brenda McGregor

I would like to see some increased funding for Orana Park. It is a great asset to Christchurch. It is the only free range zoo in New Zealand. It attracts people from around New Zealand and tourists from overseas. This helps put money back into Christchurch. It is also a great learning environment for children regarding the future for endangered animals and the habitat these animals live in. Also native birds and lizards. Orana Park needs our support. I would much prefer we put some of our rates towards this than a vast array of cycle ways that are in the planning. Thanks.

2743 - Heather Anderson

Orana Park has long been a part of the attraction of Christchurch. I remember visiting from out of town when I was a child - where else in the South Island can you see Lions and Tigers and now Gorillas? I take my own children there, and I'm pleased to see the new playground which has been thoughtfully built in the last few years. This facility has to be one of the major tourist attractions in Christchurch too. Not only having 'exotica' animals but a focus on native New Zealand animals, from

kiwi to farmyard animals. It's a real experience. I think it would be a real failure of the council not to provide the financial support the park needs to keep running.

2749 - Laurel Young

Please include Orana Park in your long term plans. The park offers a wonderful attraction to residents and tourists alike, and the animals are well loved.

2752 - Richard Gibson

With an increasingly urbanised population, disconnected from wildlife and nature in its broader sense, it is essential that the people of Christchurch and surrounds, are able to experience and grow an appreciation of animals, biodiversity and conservation. And how people cannot live sustainably and comfortably without fully functioning ecosystems. CCC should therefore consider very seriously the benefits of investing in the ongoing support of valuable local assets dedicated to this work, namely Orana Wildlife Park, but also Willowbank Wildlife Reserve. These successful organisations have long played an essential role in the recreational, educational and overall wellbeing of hundreds of thousands of local people. They provide an invaluable educational resource to local schools and contribute important space and expertise to collaboratively managed populations of zoo animals across NZ and Australia and, increasingly, support conservation and recovery initiatives for NZ's rarest taonga. These are underestimated and undervalued services, essential services, which CCC should be meaningfully supporting in these increasingly challenging times.

2753 - Saurabh Bhargava

Please include Orana Wildlife Park in your LTP 2024-2034. Places like Orana need Council support for their operational requirements. They are doing amazing work around conservation and taking care of animals. It would be a shame for Christchurch to lose a place like Orana Wildlife Park. Orana is only seeking marginal funding from big monies Council get to handle. It is like a drop in the ocean of funds available for Canterbury. I would like to support Orana to be included in your LTP.

2757 - Jo Kirwan

Please support Orana Park financially to ensure that this valuable resource for Christchurch is able to remain long term. Orana park is special and important to the people of Christchurch

2778 - Tony Short

Dear Councillors

I wish to make a submission on the CCC Draft LTP in support of funding for Orana Wildlife Park.

I am grateful for the job you all do for us ratepayers, running our wonderful Christchurch City. Also, I understand the pressures you face from so many groups seeking funding support in these tough economic times.

Over many years as my children were growing up, a visit to the Park was always a "family" highlight. We would enjoy a full day out, including a picnic lunch (on one of the many green grass areas). We built memories together at the Park in a wonderful outdoor healthy environment.

I have always been impressed by the great educational experience for both parents and children as part of our visit. We learned more about animal care, conservation and environmental issues including what we can do to help. I have always been delighted to hear about the Park's extensive conservation work, resulting in so many native species being released back into the wild.

As a Christchurch rate payer (for decades) I ask you to please support the Park financially going forward. I understand this would cost each Christchurch ratepayer 68 cents per month, which I consider to be the best 68 cents a month I could ever spend. Please support this amazing Christchurch community asset.

We now take our grandkids to visit the Park and continue to build amazing family memories. Two years ago, we flew our Mum down from Nelson to visit the Park. To see all the wild animals at Orana Wildlife Park with her own eyes had been on her 'bucket-list' for a long time. This visit was over 2 days given her frailty at 91. Mum suffers early dementia and forgets most things. Two years later (now at 93), when our mum recalls her visit to the Park, her eyes light up with excitement and enthusiasm, as she remembers this visit with so much detail!

I realise your job to decide which community facilities are funded and by how much must be extremely complex and difficult. Please know that everyone I speak to are more than willing for you to add \$8 per year to their annual rates bill to support the Park financially. It is perhaps the most iconic community facility in Christchurch.

Thank you very much for your time and consideration of my submission.

1

2802 - Yvonne Palmer

KEEP SUPPORTING ORANA PARK - THIS IS AN ASSET TO CHRISTCHURCH RATEPAYERS AND VISITORS PLUS THOSE VISITORS FROM OUR NEIGHBORING COUNCILS. NO WHERE ELSE IN NZ IS AN ORGANISATION DOING SO MUCH GOOD. IT EMPLOYS UNEMPLOYED, SUPPORTED BY VOLUNTEERS AND ORGANISATIONS BUT THE ANIMALS NEED FEELING AND THE GOUNDS NEED MAINTAINING.

2812 - Helen Broughton

I also consider funding should be provided to Orana Park on the same basis.

2821 - Dave and Denise Falls

Please help fund Orana Park.

2836 - Jillian Frater

I would be happy to support keeping Orana Park.

2837 - Deborah Harwood

Yes to funding Orana park. As a rate payer, I now would rather fund this than the cathedral rebuild, which has taken too long and blown vastly out of all reasonable cost vs benefit to residents. The animals need continued support which benefits endangered breeding programs etc.

2847 - Colleen Philip (Sustainable Ōtautahi Christchurch)

>>> [Grants & Funding > Events Ecosystem Funding] Rather than bringing in more large events why not give more support to some of the wonderful attractions we already have e.g. Orana Wildlife Park. [Grants & Funding > Orana Park Funding]

2859 - Tiana Phillips

Funding for Orana Park

2869 - Josiah O'Neill

[Libraries > Libraries (Capital)], [Recreation, Sports & Events > Pools (Capital)], [Recreation, Sports & Events > Recreation Centres (Capital)], [grants & Funding > Orana Park Funding], [Spending > Te Kaha]

I would also like to see the Council working for the community by inviting in things like libraries, swimming pools and gyms as well as the things that make the city vibrant and diverse like Orana Wildlife Park, and Te Kaha Stadium.

2874 - Cherie Carter

I support the financial proposal for long term funding Orana Park. It is a Taonga for generations of Cantabrians and also the wider country. Can the city afford to lose the money the park generates toward our economy. We have a duty of care to the park, it's curators and must importantly it's

inhabitants. I fully support, and know that many, many local families do too.

2876 - Sarah Hastie

If possible, it would be nice to assist/allocate relevant existing funding to Orana Wildlife Park. It would be nice to see it remain open, but not at the cost of causing economic hardship to ratepayers. For example I would prefer money was given to Orana Wildlife Park, rather than put towards the cathedral rebuild.

2877 - Tess Woods

I support the Orana Park funding request for \$1.5m per year

2879 - Dan Woods

I support the Orana Park funding request for \$1.5 million per year

2881 - LeeAnne Fuller

Orana Park needs council help and I do not mind helping to pay for their shortfall by a small increase in my rates. I feel the council is putting up rates to cover unnecessary upgrades, I would rather my money was used for at least one thing that interests me.

2884 - Giselle Duarte

[Public Transport]

Orana Wildlife Park requires more funding. I would rather have a portion of my rates spent on animals than cycle ways and Arts Centres that are thriving under tourism. Animals there are protected and endangered. And shame on CCC if you do nothing about it. We also need a bus service for McLeans Island - people without transport cannot visit and support these businesses.

2887 - Linda Keall

I would like to see Orana Park supported as they have requested, \$1.5M per annum. Orana Park is a real point of difference for Christchurch and Canterbury, different from any other 'zoo' experience in the country. The park has developed from its very basic and modest beginnings to a real experience, educational, fun, different and uniquely Christchurch. The wide open spaces and more natural enclosures give a real sense of what the animals' lives are like, and the addition of food outlets and the shop hopefully bring in much needed funds. Our family has always visited, and even adult children enjoy returning. Now I'm a grandparent I can't wait to take grandies along to marvel, learn and enjoy. It tries really hard with fundraising, volunteer support etc to support itself but cannot manage alone. I have been an annual subscriber to help support, and ask that the Council steps up and supports it too.

2892 - Graeme Foster

Don't let Orana park fail

>>>

Please support Orana park

>>>

Of we are spending all this money support Orana park.

>>>

Make sure Orana park doesn't shut down

2904 - Jared Thomas

Orana park needs to be saved,do whatever is needed to be done to save it, Its a big part of chch and iys history,my grandparents were part of the trust that started it,my dad built all the stone walls around the kiwi hut aswell as some others,90% of chch grew up going there with school every year it would be a shame to loose it,

2905 - Vida Zelenka

I think granting Orana park the additional 1.5 million in funding it requires is a must! It provides huge enrichment oppportunities for tamariki of all ages.

2909 - Nicholas Chapman

Fund more to Orana Park so they can provide their services

2910 - Hazel Twyman

Please increase ling term funding for Orana Wildlife Park. It is a wonderful tourist attraction that i visit every time I'm in NZ and i send all my friends there on their travels too. I love that it supports native species too as well as endangered species around the world. The learning experiences outside the classroom are also an amazing attribute too, being an ex teacher. Orana did so well through so many financial challenges such as the earthquakes. Please don't let covid and the cost of living increase be the thing that ruins this asset. Please support it. Please give more funding to Orana Wildlife Park.

2911 - Penny Moore

[Planning & Strategic Transport, Urban Design, & Urban Regeneration - Greater Christchurch Partnership]

Link Orana Park to a bus route

>>>

Support Orana Park

2912 - Shari Walker

I would support future funding to orana park annually, this park is a huge asset to ChCh and conservation

2913 - Amanda Ovenden

I would prefer my rates money to go to Orana park than dangerous fireworks displays like sparks in the park .

2916 - Geoffrey Woodley

I am asking for extra financial support for Orana Wildlife Park as they are a vital tourist attraction for Christchurch and a vital conservation centre for New Zealand wildlife and endangered wildlife overseas. The park needs to survive. Thank you.

2935 - Tina Christians

Please help orana park its important part of our city.

2938 - Rhiannon James

[Grants & Funding > Arts Centre Funding]

I was disappointed to learn there is potential for the Art Centre and Orana Park to lose funding. Please don't let this happen, both these things add so much to Christchurch. The Art Centre in particular is somewhere I regularly work from, as a self employed artist. It provides me with community and so many free events that brings people together. In these times where we're all number crunching, we need our community and free events! Art is something that brings people together, in a time when we're becoming so divided as a society. The pressures of modern day living is taking its toll on mental health, whereas art can be a tonic for that. And Orana park is such a beautiful space, we're privileged

to have these animals in Christchurch. I can only imagine how much it costs to run something like that, and if things go wrong, they need to be able to fix it or stay afloat. Please don't let it drop.

2940 - Wendy Groom

Orana

2944 - Danni Stephens

Please give orana the funding they need, the animals deserve it after what we have done to their homes

2945 - Lynne Lochhead

[Rates > Residential Rates], [Grants & Funding > Art Centre Funding]

It is reasonable to expect some rise in rates given that all costs are rising. On the whole the LTP strikes a reasonable balance but the attempt to minimise rate increases by cutting funding to major city assets such as the Arts Centre and Orana Park is ill-judged. In the case of the Arts Centre the withdrawal of previous support is directly at odds with the stated outcome of being a cultural powerhouse city. The Arts Centre is clearly a major component of the culture and heritage of the city which should not be put at risk.

2949 - Graeme John Marriott

You should be prioritising >>> Orana Park

2952 - Sylvia Devaraj

Please consider funding orana park, our kids love visiting, feeding and learning about the animals. The great job that the staff do to preserve these animals are to be encouraged and supported. Thank you.

2956 - Jacque Skinner

I would like to see funds directed to help Orana Park - the work that they do there for animal conservation is invaluable, not to mention the educational benefits for children and the tourism benefits for Christchurch

2959 - Maan Alkai

Please support Orana Park. It is the only animals park in Christchurch and serve our community at Canterbury and the entire the South Island. The Park serve as educational, tourist attraction, breeding of endemic wildlife and has unique enclosure where animals have space and appportunity.

2961 - Cassie Anderson

Help Orana with funding so this and future generations get to see animals they would otherwise never get the chance to

2963 - Carolyn Roos

But would like to see you help Orana park its a great asset

>>>

Orana park

2965 - Toni Stewart

I would like to see investment in Orana Park. Of all the things Council directs rates into and yet the continuation of this facility is at risk. Please do the right thing.

2966 - Angelin Raymundo

Please keep Orana Wildlife Park. My young family just moved here in Christchurch. We have recently discovered Orana and my kids absolutely love it. There is not much to do around here so please keep the park and save this sanctuary for those animals.

2967 - Silvia Davies

Orana Park is essential for all the conservation work it does and for kids who will never travel to observe these animals and know what's trying to be saved on our planet and how they can help to do so too.

2968 - Angela Moran

Meanwhile, we have just heard Orana Park is at risk of not being able to stay open. The one zoo the children of our region have had access to. They say they need an extra 68c per ratepayer per month. That is definitely something that should be prioritised.

>>>

Please support Orana Park to continue to remain open for all those who benefit from going there. It is a fantastic place for young and old and Christchurch would be a far poorer place without it. You are

considering bidding for more major events but forget that there is nothing for visitors to do without great attractions such as this. Support what we already have before we lose it, looking ahead without maintaining our existing gems.

2969 - Amanda Mulvena

Please consider adding more budget to the running of orana park.

>>>

Add more budget to orana park.

>>>

Id be happy to pay more for orana park to continue operating

>>>

It would be very dissapointing to see the zoo shut down because you wont fund it.

>>>

You need to add more budget to Orana park. They are an incredible facility who need your help to keep going. I am sure most of christchurch would prefer to pay more in rates for that than the cathedral or somw art installation...i think its definitely in tour best interest to consider orana park as a higher priority in the plan.

2971 - Nikita Todd

[Grants & Funding - Arts Centre Funding]

Include orana park and arts centre in the budget

>>>

[Grants & Funding - Orana Park Funding]

support orana park and arts centre

2973 - Stevie Byford

Please consider more funding to Orana Park. "Remember art is as vital as food to a kingdom, without it a kingdom is nothing and will be forgotten over time" Whilst Orana Park is not "art" this quote rings true of such facilities and should be taken as such.

2974 - Sam Da Silva

Please provide Orana Wildlife Park with the additional operating funds they require. Me and my kids love going there, and it would be a real shame if 'the capital of the South Island' didn't even have its own zoo equivalent.

2978 - Louise Brownlee

Orana Park is a huge asset to the Christchurch region. It attracts a large amount of tourists and visitors to our region and their work on conservation is hugely important.

2980 - Sandra McLachlan

In addition , I would be in favour of funding being allocated to Orana Park It is a unique wildlife park in NZ with the wild animals in a park like setting visited by perhaps not enough visitors to cover the amounting costs A sad day if it was closed .. I visit regularly when I have guests....wonderful for children to view the unique animals that share the planet with us ..and the breeding programmes in place with them ...

2982 - Hiroko Tatsuno

I just saw the TV 1 rearing to funding cut to Orna wild park. I am happy to pay for them with increased rate.

>>>

Please DO NOT cut for Orana wild park funding as lead to immediate life-threatening to rare species.

2983 - Pauline Neale

Please support our zoo Orana Park. Auckland and Wellington have great zoos, Christchurch doesn't not want to be the poor relative. Thank you.

2984 - Claire Martin

Need money to ora a wildlife park

>>>

Orana park needs funding

2985 - Marama McKenna

Oran's Park desperately needs funds

2986 - Maree Mackle

Supporting orana wildlife park is a good thing to do as they do alot of educational advantages for children of the Canterbury region and its also a great place to visit

2987 - Penny Raid

I support the councils investment in Orana Park

2988 - Mark Stevens

Hi haven't made a submission on this site before but am prompted as I would be more than happy to support Orana Park as a Christchurch rate payer. This park I feel is a valuable part of our city and well worth preserving.

2990 - Darryl Jan Atkinson

I would like the council to back Orana Park. It is a fantastic facility to visit and they need help

Support Orana Park

2991 - David Christison (Marian College)

In support of Orana Park. Marian College has been a user of Orana Parks Zoo School education facility since 2005. Zoo School provides excellent education outside the classroom supporting the New Zealand Curriculum in areas such as ecology, habitat/adaption, human evolution, speciation and conservation to mention the areas covered on our vists to the facility. We use this facility twice a year; firstly with all our Year 9 students and secondly with our Year 13 Biology students. In both cases we have consistently found that the Orana Park facility provides visible evidence supporting content covered in the classroom. Students find the experience both educational and enjoyable, experiencing aspects of the natural world, both native and exotic. We truely value Orana Park and the Zoo School as valuable educational asset in Christchurch, enabling schools to students about the natural world beyond videos and text books.

2994 - Archie MacFarlane (Department of Conservation)

On behalf of the Department of Conservation's Kākāriki Karaka / Orange-fronted Parakeet Recovery Programme, I am writing to formally express our strong endorsement for Orana Wildlife Park's request for increased annual funding from the Christchurch City Council. Orana Wildlife Park serves as a crucial partner in our efforts to conserve the critically endangered Kākāriki Karaka. This parakeet is a Canterbury local, and its stronghold is in two upland valleys in North Canterbury. After being declared extinct twice, it was rediscovered in the 1980s, and a recovery programme established in the 1990s. This programme is led by DOC, in partnership with Te Rūnanga o Ngāi Tahu, and with support from The Isaac Conservation & Wildlife Trust, Orana Wildlife Park, the University of Canterbury and others. Orana Wildlife Park's commitment to supporting the Kākāriki Karaka captive breeding program is exemplary, as they are one of only two essential breeding facilities for this species nationwide. Additionally, Orana Wildlife Park assumes a primary role in daily advocacy efforts aimed at promoting awareness and support for the Kākāriki Karaka programme. We wish to emphasize the significant ramifications any potential funding gaps at Orana Park could have on the success of the Kākāriki Karaka program. Many of Orana's buildings and infrastructure require continuous maintenance to mitigate infrastructure failures. Orana Park have recently and generously built additional aviary space for the Kākāriki Karaka breeding program. Enough to house up to six breeding pairs. A lack of funding for maintenance could disrupt operations and compromise the living conditions necessary for successful breeding of the Kākāriki Karaka. Furthermore, the loss of specialized staff due to insufficient funding presents another significant challenge. Retaining appropriately qualified and experienced staff is essential to maintain Orana's MPI zoo registration and ensure the continuity of the Kākāriki Karaka breeding program. Kākāriki Karaka are an exceptionally difficult species to manage and require specialist care. Adequate funding for competitive salaries is imperative to retain these invaluable personnel who play a vital role in the success of the breeding program. Moreover, funding gaps may impede Orana's capacity to engage in effective advocacy for the Kākāriki Karaka program. Given the critical importance of public awareness and support for species conservation, maintaining robust advocacy efforts is paramount to the program's long-term success. In light of the foregoing, we strongly urge the Christchurch City Council to allocate the requested funding to Orana Wildlife Park in the Draft Long-Term Plan. By doing so, the Council would demonstrate a commitment to both the continued viability of Orana Wildlife Park and the conservation of the critically endangered Kākāriki Karaka / Orange Fronted Parakeet.

3006 - Sarah Harris

Support Orana Park. Such an iconic part of Christchurch but they need councils financial help.

3007 - Rachel Kershaw

Please consider funding to help maintain Orana Park and keep it going. Its a wonderful asset to the community and South Island as a whole. My family and I have enjoyed regular visits and travel from Timaru to enjoy it. Whilst visiting Christchurch we often stay for the night in a hotel/motel etc and also shop, eat and explore what else Christchurch has to offer

3009 - Anna Miller

I am here in support of Oranas Wildlife park recieving funding.It is an intergral park of Otautahi that we should be contributing towards to maintain the health and wellbeing of the thousands of species with may being indangered.Lifes are potentially in danger if we dont act fast.

Website_Header_LTP_Page.jpg Orana is a registered charity. We desperately need increased annual funding support from the Christchurch City Council of \$1.5M each year, equating to 68 cents a month per rate-payer, to ensure the on-going financial sustainability of Orana.

3013 - Imogen Clark

We should be supporting Orana park. Furthermore this would also be deterrmintual for tourism

3017 - Heather Venis

Support Orana Park, Willowbank and others that are struggling. I would prefer rates \$\$ to pay for this where the whole community and tourists for these rather than the odd few that would use the pointless cycleway.

3018 - Kristal Jenkins

Yes, things like Orana Wildlife park and conservation in New Zealand need yo be looked after as well. Orana does a lot for New Zealands Conservation and they do a brilliant job of keeping endangered New Zealand species from becoming extinct.

If we lost Orana Wildlife park then that is a huge lost for Christchurch and New Zealands conservation. The people that work at Orana put a lot of effort and care into looking after endangered species and helping with animals programmes to help animals from becoming extinct. I believe they deserve more more to care for the park and these wonderful endangered species.

Putting more focus on bike lanes and Art centres instead of a conversation park like Orana park is ridiculous. Orana wildlife park does some amazing things for endangered animal species and is very invovled in New Zealand conservation. I believe they need more funds to keep doing the wonderful work they do

Orana Wildlife Park needs more money. They need to care for their animals and to keep doind there conservation work so they can keep endangered species from becoming extinct. Especially native to NZ

You need to think about climate change and NZ conversation more. Places like Orana Park doing an amazing job and if you don't help them that would be a huge lose to NZs conversation and wildlife work

3019 - Andrew Oh

I am aware of the financial difficulties faced by Orana Wildlife Park. As an ex-trustee, I am aware of the funding requirements for what I believe is an asset for the Canterbury Region. There is no doubt that Orana is a great benefit to our community but also makes an important contribution to conservation. Assets such as Orana are always financially backed by local councils or government. There is a reason for that, the cost to operate will always significantly exceed visitor income because the only available ratchets are entry pricing and external support. The pricing needs to be at a level to allow our community to visit - this limits the ability to raise prices. The only solution is funding from Council. While I appreciate there are always good causes, this one in particular has shown its worth to our region. I submit that the Council should include Orana in the LTP and allocate funding to ensure their conservation work continues. The joy for the public is an added bonus.

3020 - Zoe Baker

Please consider including Orana park into the long term funding plan. It's an amazing conservation Zoo that attracts visitors to our region. The Annual Pass mean that I can afford to take my children to the see the amazing wildlife.

3023 - Carolyn Brown

we already have world class assets that are in desperate need of funding from the Council to continue. In particular Orana park. Both the the potential to be world class attractions but have not been included in the long term plan for improved/maintained funding.

Need to >>> increase the funding to Orana park & Willowbank. Auckland and Wellington Zoo receive appropriate funding from their Councils but ours have to scrape by on the smell of an oily rag.

>>>

[Grants & Funding > Arts Centre Funding]

3024 - Sandra Fleet

Please, please, please.... support Orana Park. On moving to Canterbury 25 years ago we quickly discovered Orana Park. For us, it is signifies a multitude of things: - a place to go when life gets hard - a place that provides a smile on the dial - exercise as you wander around the park - support of nature and the life balance that this world depends upon - supporting a team dedicated to the conservation of species, many of them NZ natives - educating our tamariki We go to the park at least a couple of times a year, and there is always something different to see, whether it be Cheetah up a tree; Emu chicks being inquisitive; cheeky Kea that want a piece of your camera gear or backpack!; young Kereru being fed; Whio bathing and splashing; Frogs clinging to the glass with their big pads - yet to see the Archey's; Tuatara juveniles; baby Giraffe; and of course the Gorilla's.... I could go on :-). Each visit provides us with relaxation and joy - and given the smiles on the faces of the many children who visit, them too. We quickly became annual members, and we don't care if we don't get out there during that

year as for us it is about donating to the protection of species for the betterment of New Zealand, and the world. CCC, please provide support to this wonderful attraction.

3025 - Erlyn Fletcher

I love to see Orana Wildlife Park 30 years from now. I like my future grandchildren to see these lovely animals just like how my children enjoys to see them. Our all time favourite is cheetah and feeding the giraffe.

3027 - Sam Gray

Please support the funding for orana park. This park brings so much attraction to Christchurch and it is also much enjoyed by locals all year round for school visits and family passes through the year. There is so much history here and much value for education. Please save our local animal park!

3032 - Gail Mackle

Please support Orana Wildlife Park. This amazing, unique open range zoo needs your help. I have the privilege of working at Orana and the wonderful comments we get from locals and tourists who visit make me super proud to be part of this team. To loose Orana and all the conservation programmes it is a part of would truly be devastating. It is an educational super fun day out for families, a great place for school, retirement homes and special needs groups to visit we are truly blessed to have this facility so close by, please put us back into your long term district plan and support Orana

3033 - Linda Morgan

I'd hope to see some support to orana park please

3034 - Ameer Hurrell

The impoentance of providing funding to Orana Park. To preserve and aid in the survival of all the endangered species that they look after. It is a huge tourism attraction in Christchurch, and deserves to be supported ! Kids absolutly love visitng here!

3035 - Claire Coveney

Finally I totally support the need to keep Orana Park open and the staff and animals receiving the finances they need. I dont like zoos but the animals need the right environment and professional care.

3040 - Claire Wichman

[Grants & Funding>Arts Centre Funding]

Put money towards the arts centre and orana park. They should both be looked after and available to all now and in the futur

3041 - Jenny Harkerss

Even though I am not currently resident in Christchurch, I am born and bred in this city. Orana Park has been part of my life for a long time. I visit, I take guests there and I recommend it to others. I think it would be a great shame if the park were to close or decrease in size due to lack of funding. It is a great asset to ChCh and I think it should be funded more fully by the Council

3048 - Jesd Elliott

Funding for Orana park - is there any?

3049 - Eve Cozzi

Kia ora, I am submitting feedback regarding Orana Wildlife Park. I am an experienced zoo professional and have worked with Orana Wildlife Park for a number of years. I have seen Orana's commitment to species conservation, animal welfare and education that benefits our wider NZ community, in addition to the wellbeing benefits and volunteer opportunities that are also positive for the community. As a zoo and aquarium community, we need Orana to remain part of our zoo network and to continue with all the great work they do. Please consider increased funding support for Orana. Many thanks.

3050 - stuart wallace

I am concerned that there is insufficient funding planned for Orana Park in order to secure its future as an excellent zoological park, which will be a valuable long term attraction for Christchurch. We do not have many important civic attractions in Christchurch and I believe that Orana Park is one of the most vital, however since COVID it has looked run-down due to a lack of funding. By contrast, Wellington zoo looks well funded and thriving.

3054 - Mickayla Strode-Penny

GIVE ORANA MORE MONEY SO THEY CAN LOOK AFTER THE ANIMALS PLEASE

3056 - Carolyn Elcock

Orana Park is a great resource for all ages and needs to be recognized as such by council and provide funding. I don't know of any other zoo that does not receive funds from the local council

3057 - Carol Beaumont

Please help to keep Orana Park open, it's a treasure to our beautiful city and offers our tamariki such major educational benefits along with tourism opportunities. Would be a huge shame to see it close down we can't let that happen.

3058 - Robin Clements

Orana Park must be supported...not an option to do otherwise

3062 - Michelle Smiddy

Keep Orana Park Open

3063 - Nikki Evans

I would love to see Orana Park access and facilities supported and valued in the plan. This is such an amazing resource for Christchurch city and should be supported as much as possible.

3069 - Dave Bradshaw

Orana Wildlife Park needs to have more financial support from the councils...it is a vital educational tool that Canterbury's children benefit immensely from. The conservation work that is carried out is incredibly important and I can't understand, as a ratepayer, how the councils can expect not to cover more than a couple of the 52 weeks per year running costs, when the facility contributes so much to the region. The support that the other regional wildlife parks get from their councils reinforces how important they are. The councils need to have a good hard look at their priorities.

3070 - Penelope Smith

Please provide massive funding to Orana Park. Its not just about the animals, but the calibre of staff required to ensure success. Christchurch needs diversity in its attractions and there is nothing else like Orana in the South Island. Its education to all about conservation is priceless. Open air interactions like Orana provides is something worth fighting for and protecting.

3071 - James Gormack

[Grants & Funding>Arts Centre Funding]; [Libraries>Libraries (Capital)]

I really don't think it makes any sense to rebuild City South library. It's obviously safe enough as it is now. Spend that money on the Arts Centre or Orana Park!

3082 - Tony Hoy-fordham

Please fund Orana Wildlife Park. It is a very special place for me and my family. I got married there, and I have always been impressed with the quality of care they provide the animals. I know there are many demands on our 'rates' money, but Orana is fundamentally different from anywhere else in NZ, and is part of the effort to save endangered species worldwide. It's bigger than just a Christchurch attraction. Thank you for your consideration.

3084 - Kate Costello

Support Orana Park! It's an important place for community, conservation and visitors to Christchurch.

3092 - Kitty Moran

[Grants & Funding - Arts Centre Funding]

I'd love to see more funding given to the Arts Centre and to Orana Wildlife Park. The Arts Centre is amazingly popular and to let it go to nothing removes one of our main tourist attractions (while the Canterbury Museum undergoes it's redevelopment). As well as being a fantastic way to keep involved, it's essential to keeping our community a "cultural powerhouse" (as per our community outcomes). Additionally, my nearly 5 year old boy LOVES going to "the big park with the big stone buildings" and just walking around the Arts Centre. It keeps our little family active, engaged with the community, and forms a part of his education too. Similarly, Orana Wildlife Park is absolutely essential to our family for environmental education, having fun, connecting with friends, and (again) staying active. While there could be some improvements made in terms of accessibility, it's a big draw card for many locals and tourists alike. It's immensely beneficial for my son to be able to see these animals in real life and not just through a tv screen. He can compare the sizes of things so much better now that he has seen how tall a giraffe is. He understands how beautiful and fierce wild animals can be. And ultimately, he has a greater understanding and appreciation for why we have inside cats (to protect our native fauna). How could he have gained all of this knowledge in the 2 years we've been visiting without Orana being at our fingertips? In comparison, we don't appreciate our rates going towards the Christ Church Cathedral rebuild. We have long questioned why we as a family should have to contribute to this, when the Anglican church should (ultimately) be responsible for the funding of the rebuild. I would love to see the building restored to it's former glory, but not at my expense.

3101 - Andrew Poulsen

Please increase the funding for Orana park. It is such a special and unique place in Canterbury. We cannot risk it becoming financially unviable. Thanks

3108 - Florence Barrer-Clark

I am only submitting to suggest that CCC fund Orana Park long term through rates, as per their request. Orana park is essential, not only as a Christchurch attraction, but as a way to connect Kiwis and visitors with species they would otherwise have no connection to. Fostering that connection can

increase engagement with conservation and climate efforts around the world. Additionally, as New Zealand's only open-range zoo, Orana park sets a standard that is seldom reached internationally - to refuse an \$8/y per ratepayer increase in order to fund Orana park is to either dispute the value of people's connection with the animals, or to disparage a rare attempt to create this connection through actual best practice.

3114 - Chris Matheson

In my heart I believe the CCC long term plan should take into account our Orana Wildlife centre. There should be something in the plan to assist the park in its day to day running costs.

3118 - Russel Traher

Orana Wildlife Park makes an important contribution to tourism, education and conservation of wildlife. I think it is important the council supports these critical efforts.

3119 - Patricia Paul

Look at helping Orana Wildlife park as this is a major attraction in CHCH and a good way for children to experience wildlife from other countries

3120 - Patricia Wilkinson

To whom it may concern, Orana Park needs our help. Admission prices alone cannot keep pace with inflation and the continual rising costs of operation. Until 2018, visitor income covered 90% of annual operating costs; visitor income now covers only 65% of annual operating costs. Orana will be in severe financial difficulty in less than two years without increased Council operational funding support. What does Orana Park mean to me? It was one of the first jobs I ever applied for more than 40 years ago and it was always a dream job for me to work with animals and endangered species. Orana Park has always had a special place in my heart. For more than 48 years, Orana Wildlife Trust has operated Orana Wildlife Park, an internationally recognised zoo. Orana Park contributes internationally, nationally and regionally to nature conservation and hosts up to 200,000 visitors each year. Education and inspiration about conservation and environmental issues, especially children, who are the future are a big part of what Orana Park do. Where else in Canterbury or that fact New Zealand, can you get so close to some of the worlds most endangered species? This is genuinely an amazing asset on our door step and its heart breaking to think we may loose it. Kind Regards Patricia Wilkinson

3127 - Dianne Downward

Support Orana Wildlife park to update enclosures.

3128 - Chris Smith

Keep Orana Park open, they need council funding.

3130 - Alistair Robertson

Support Orana Park and the Arts Centre! We're so lucky to have them and would be unforgivable if we lost them!

3133 - Martin Maunsell

I would like to see increased support for orana wildlife park. I work as a volunteer at the park once a fortnight and have done for 7 years. I have seen first hand what a positive impact the park has on families of all backgrounds who come to visit. Volunteering at orana helped me overcome my fear of public speaking and has enhanced my ability to communicate with people from different backgrounds and of different ages. I think orana is a Christchurch treasure to be looked after.

3134 - Kim Lister

[Libraries > Libraries (Capital)], [Planning & Strategic Transport, Urban Design, & Urban Regeneration > City Planning]

Parks and zoos like Orana park deserve Funding as they get kids outside as does the libraries.

Please keep Orana Park and fund it. Awful to think it's maybe falling behind. Many public would like to help. Maybe look at private sponsorship of animal enclosures. Etc.

3137 - Viv Regan

Keeping Orana wildlife park funded . Amazing what they do and not just for New Zealand conservation

3139 - Luke Hausler

Orana wildlife park is an incredible place doing amazing work for the conservation of species and should be given more support

3140 - Madison Pannett

Please support Orana Park long term. It is nationally significant and important for the welfare of the animals to continue.

3143 - Kate Blackberry

Fund orana park. It's good for education, exercise, animals. It's small chance compared to a stadium or cathedral.

3146 - Emmett Bensemenn

Orana is crucial to Christchurch. Get behind it

3149 - Kaitlyn Manu

I understand that Orana Park currently is not funded by the council, however I support the call for council funding to be included in the 2024 - 2034 plan. Orana Park is a fantastic place and tourist attraction. As a former zoo keeper, I believe it's done a fantastic job at utilising the space and resources available to it with the limited funds they've had, however there are so many improvements that could be made with some investment to not only help the animals, but make it an ever better tourist attraction for the city. My mum and I travelled down to Christchurch specifically for 2 close encounters for animals at Orana Park, spending a full weekend of time and money in the city. It would be a great investment for the council to help fund the park and keep it running for years to come.

3153 - Amanda Green

Secure council funding for Orana Wildlife Park

3154 - Sophia Lee

Please support Orana Wildlife Park. It is one of the core memories of most children in the region, and would be devastating for education/conservation efforts and tourism in Christchurch if shut down.

3156 - Laressa Frost

Please increase the funding to Willowbank & Orana park.

3157 - Rosie Hopkins

You need to fund orana park. Orana park has been a huge part of christchurch,since when my parents were born! It is one of the most exciting attractions in the south island, and people probably come to christchurch JUST to go to orana park. I know i do!

3159 - Rachel Hope

Please support Orana park!! It means so much to us and our kids ❤️

3165 - Adrienne Baxter

[Transport > Roads]

Orana park is worth the money as our children need animals that are not native to become globally aware and responsible. As a grandparent and teacher, i see the value for the kids in these types of parks and can't imagine Christchurch without it. The animals are well cared for and the environments respectful. It does a lot towards conservation for at risk species as well. We don't have enough entertainment activities in Christchurch so don't throw away the ones we do have.

3166 - Arwen Sommer

The other site is Orana Park. They do fantastic conservation and education work and it's a pre-established asset that on requires expenditure to maintain, but would be hugely costly to re create if it shut down

3167 - Paula Hunter

I would like to see Orana Park funded as it is a fantastic asset to Christchurch and I have visited regularly since I was a child. It offers such a unique experience getting to feed lions and see giraffes and gorillas on our doorstep and promoting wonderful conservation programs.

3168 - Julia Reeves

Please support Orana Park with the additional \$1.5 million they need to ensure their future.

3173 - Kate Horn

Fund Orana Park, it is one of the few attractions Christchurch actually has. And is the source of great community, most people have been to Orana Park who live in Christchurch it is something we have in common

3181 - Allison Senior

ORANA PARK needs your help for funding to keep this amazing Christchurch icon running. Orana is very educational for all that visit, has a wonderful breeding programme for endangered animals, so please help keep Orana Park a part of Christchurch. Thank you 💎💎

3186 - Jan Alekna

Orana wildlife park desperately needs financial help to continue the wonderful conservation work it does. It would be heartbreaking to see ChCh lose this fabulous facility, a major draw card to both locals and tourists. The work they do with our native animal and bird life is vital and necessary to retain many of our native species. For a mere 68cents, per month, per ratepayer, this amazing park

can continue.

3190 - Simon Bamfield

Orana Wildlife Park is just an incredible facility. This park pulls more than its weight to support tourism in the region. It's dedication to wildlife especially the species endangered abroad has been brought to the attention of New Zealanders young and old because of Orana. My family and especially myself have the deepest connection to Orana and I hope that we will continue to return there years in the future to experience what can't be found anywhere else in New Zealand. Thanks Orana for the life long memories

3192 - Janene Burnett

[Strategic Direction>Have we got the balance right?]; [Transport>Cycleways (Capital)]; [Transport>Public Transport Infrastructure (Capital)]; [Grants & Funding>Arts Centre Funding]; [Spending>Our Proposed Spending]

Almost, I would like to see more funding for Orana Wildlife park, the Arts Centre, and green forms of transport i.e. bike lane/routes and public transport.

>>>

[Transport>Cycleways (Capital)]; [Transport>Public Transport Infrastructure (Capital)]; [Grants & Funding>Arts Centre Funding]; [Spending>Our Proposed Spending]

I agree with most of the spending however I want to see more spending on housing, our arts centre, Orana Park and bike lanes/public transport.

3195 - Redacted Redacted

[Other/Special Interest Topics > Cathedral], [Spending > Te Kaha]

Money should be spent helping our local organisations (Orana Park, the Cathedral rebuild)

>>>

Put money into what we have here and help those who need the funding e.g. Orana Park and Ferrymead Heritage park.

>>>

Please consider Orana park and what it meant to you or someone you know in their life time. I do not want to have to take my child up north just to go to the zoo. We have an amazing opportunity here

please help them out. Give them more than the 1.5 million they need every year, help them restore the place please, their work is critical to help save the animals.

3199 - Shar Carlini

I would like Orana Wildlife Park to receive ratepayer funding. It does excellent conservation and research work and provides important visitor experience that connects people with wildlife. That connection is what will save wildlife. Orana deserves support. Thank you.

3204 - Rebekah Bedyn

Would be good to ensure financial support is also given to places like Orana Wildlife park

>>>

We are in climate and biodiversity crises. start acting on it.

3208 - Bryany Joslen

Save Orana Park!!!!

3213 - Alex Lockett

[Grants & Funding>Arts Centre Funding]

Remain funding for Orana Park and the Arts Centre, both of these are strong attractions for our cities tourists, and bring vibrancy to Christchurch that locals deserve to experience. It would be devastating to lose either of these.

3215 - Nicola Pester-Clarke

Orana Wildlife Park needs ongoing funding.

3217 - Abdirahman Abdi

I struggle to see a cultural powerhouse of a city if Orana Park >>> aren't included in this plan.

3221 - Kenneth Dsouza

I support additional funding for the Orana Wildlife Park from Council

3224 - Damian Mora

No, keep Orana Park fully funded

3225 - Kelly Chambers

Please financially support Orana. The same way as Akld support Akld zoo!

3227 - Evy Morrow

Help with Orana Park. Orana contributes internationally, nationally and regionally to nature conservation. It has been one of my favourite memories as a child and it is a great place to visit and learn about animals and how to protect them and our environment. I would prefer funding for orana was seen as a priority as it could bring more tourists to chch if updated and more operational.

3228 - Daniel Gilmour

I would like funding in the LTP to go towards Orana Wildlife Park. Orana Wildlife Park is great place to learn about conservation efforts of New Zealand and exotic wildlife. The funding is crucial to the future financial sustainability of the park. Orana will always hold a special place in my heart, when I was unemployed I was given the opportunity to volunteer there. Orana gave me a sense of purpose and belonging and returned my confidence so that I could be gainfully employed once more. Orana has helped many people gain skills and with funding it can continue to contribute in helping people in all walks of life.

3229 - Robyn Sampson

Orana park brings tourists and profits in spend to chch. So council funding to assist with the upkeep of the park should be given to Orana Park.

3236 - Amanda Sanders

Orana park is a key provider to Christchurch, Canterbury and wider NZ. It is an important educational facility that also does critical work for some of our most endangered taonga species such as kakariki karaka and Maud Island frogs. Inadequate funding will severely impact not just people but ecosystems and NZ biodiversity as well.

3243 - Michael Petherick

Orana Park needs funding. It is a great asset to the city just like the Gondola, Tram, Willowbank

>>>

A bus to and from Orana Park via the airport would help with visitor numbers. It is an asset to the city

>>>

Please fund Orana Park

3246 - Anna Morris

Help keep Orana Park afloat

>>>

More funding for Orana Park

3247 - Simarpreet Kaur

Orana is such a great place for our children and they have always loved going there!

3251 - Jessica McPherson

Save Orana Park!

>>>

Save Orana Park!

>>>

[Rates>Other]

Rates can go up as long as you save Orana Park!

3252 - Andrew Eoin McPherson

I would like you to save Orana Park.

>>>

Please save Orana Park.

3255 - David Davidson

Love Orana, great for families and visitors.

3258 - Ros Wylie

I really believe that the council should be providing funds to Orana Wildlife Park. This facility is part of Christchurch's heritage. Talk to anyone in my age group (50's) and they'll tell you how they remember as a child being driven by their parents in their family car, right through the park's pride of lions. Some of my most fond childhood memories feature family visits to Orana Park, usually involving extended family and somebody's birthday. I have carried on this tradition with my own family, and I hope that this is something that my children will be able to do with their children in the future. I always purchase an annual pass for my family. Not all families are able to bring their children to Orana park for various reasons, but school all around the South Island recognise the value in connecting our next generation with the wonders of nature. Schools are prepared to go to the effort of organising transport and parent helpers to enable children to come and learn about the importance of our natural world, and the importance of taking care of our amazing planet. Many international visitors prioritise making a visit to Orana Park, It is NZ's only open-range zoo in NZ and gives people an insight into how animals should be cared for and protected. It is in stark contrast to the majority of zoo's in the world, where the animals are just there for the viewing pleasure of people visiting. At Orana, the welfare of the animals is the very top priority of the Park, and the animals are allowed to exist in a way that is as close as possible as they would have while in the wild. Almost all of the animals at the park are threatened or endangered to some extent. Many are classified as being critically endangered and are important to the global breeding programmes that they belong to. The conservation work that is carried out by the park is so vital to the species that are represented there, both nationally and internationally. Many native birds (kiwi, patiki, blue duck, kakariki) are part of 'breed for release' programmes that the park is dedicated to. The park advocates for many other threatened and endangered species, native and exotic and continually educates the public on the important role that 'every day people' have in protecting these species. If you don't know what role you could be playing to protect many of the earth's endangered species, just pay a visit to Orana Park. Orana Park also offers several opportunities for people with special needs to contribute to the community, connect with nature and feel the benefits of making a positive contribution to a workplace. There is the Transition To Work programme, where young adults with special needs spend several hours a week working with zoo staff to contribute to the positive experience for animals in the park and the public that visit. They are given the opportunity to interact with the public during the animal feed times, by handing out leafy branches to the public for the giraffe feed, or by making 'enrichment' objects that are then given to the animals to either play with or to feed on. These times are hugely valuable to these young adults, where they are given the opportunity to feel pride in their achievements. Orana Park is not just simply a zoo. It is a most special place where species that are at risk of extinction are nurtured, where education to the public is provided so that people can realise that their actions do have an impact on our world, and how they can make a positive impact on our shared planet. It's a place where young adults with special needs can feel like they make a positive contribution to our

society and our planet. Where the next generation of children can gain an understanding of they ways (both positive and negative) that their actions impact our world that we all share. And it is a place for families to bond and for childhood memories to be cherished for a lifetime. Please support Orana Wildlife Park in your draft long term plan.

3261 - Helena Campbell

Please help support Orana using some funding to help operations. It is such an asset and in line with many of the works best sanctuaries, huge draw card for visitors. Loose things like this and the city becomes a concrete dominated city with less attractions and appeal. This city is already becoming a crime and safety hazard, going to a petrol station where gangs hang out is not a normal but is occurring more often. Having spaces like this keeps some normality and innocence to the city

3264 - Tess Norton

Orana park is a valuble part of Christchurch City and it should continue to be supported and recieve the funding that it needs to operate. It is an essential part in the breed program as well so should be valued for its worth

3265 - Farina Hradetzky

Please consider Orana Wildlife Park for increased future funding. We are a young Christchurch family - recently visited the park for the first time with extended family from the North Island. We all thoroughly enjoyed the park and felt that it is a much underrated asset to our city and wider community. Orana holds a special place in many hearts and the potential to be a mayor tourist and travel destination. It is also an education and conservation facility that must be preserved for future generations. Additional funding will allow for much needed maintenance and modernizing of facilities and support the amazing animals that call Orana home as well as the wonderful staff looking after them. We would love to see this park thrive again! Thank you

3268 - Savannah Da Silva

[Grants and Funding > Arts Centre Funding]

[Grants and Funding > Other Community Grants and Funding]

Please continue to find charitable and community organisations, especially ones catering to children and youth like Orana park and the Arts centre

3269 - Ashley O'Brien

Support funding of Orana park to financial sustain the facility which will in turn become a huge attraction and investment to Christchurch. One of the coolest places in Christchurch that is becoming

run down when it has the opportunity to be a huge success with many many visitors and tourist attraction

3270 - Teariki Gibbs

I am 64 years and still LOVE to go to Orana wildlife park zoo and now I take my grandchildren. The zoo means everything to the people of all ages who are living in the christchurch region, its the best place to come in touch with nature and learn about the real habitat of animals, my clients and family gets the chance to learn new things about the animal kingdom, its a place where the whole biodiversity can be seen like the flora, fauna, its the most amazing to see so many endangered species and animals and how Orana park has provided a safe place and quality of life for the animals to live. Orana zoo brings humans closer to these living beings, the zoo teaches the people of all ages about compassion and empathy and brings public learning about the conservation of the wildlife and their inhabitats is vital if the extinction of the wildlife to be avoided. The zoo keepers are so wonderful, dedicated, passionate and attention to details, they provide education to people of all ages WHY ZOOS are more important today than ever before.

3272 - Brittany Peacock

Orana is a great place for kids and is a wonderful place to bring kids

3273 - Christine Gundersen

It would be good to see the upkeep of Orana Park. As this is a fantastic learning opportunity, recreation for some and also good for people's mental health to provide a place where people interested in animals can go appreciate them. It will be so sad for children not to have this experience anywhere in the South Island.

3274 - Karen Eade

Not only is Orana park an amazing tourist destination for the city but also enables out children to experience animals in as near a natural habitat as possible . Please fund

3275 - Luke Stevenson

Just wanted to drop a quick note about Oran Wildlife Park—it's my happy place. Every time I'm there, surrounded by nature and all those amazing animals, I feel totally at ease. It's like my little escape from reality.

3278 - Sarah Garlick

More funding needs to be given to Orana Wildlife Park. It is an important Canterbury tourism destination, but from my personal point of view, i find young people in particular develop an affinity for animals and conservation when they see the animal in the flesh in front of them. It meant so much more to me to see the intelligence of the Orangutan and Gorillas and the impact of deforestation on these species when they were just on the other side of a perspex screen.

3280 - Megan Cassim

Save Orana wildlife park, this is an attraction that caters to locals AND tourists rather than just tourists. My kids would be devastated not to be able to go see the animals

3281 - Michaela Kiri-Flett

Please help fund Orana by a small rare increase from Christchurch residents. These amazing people volunteer their time too ensure the wellbeing and safety of these animals. One of the few christchurch attractions for kids and tourists, please help it to flourish

3282 - Angela Rouse

Please consider orana park in your budget. I have been going ever since I was a child, travelling from timaru with my family, and now I bring my children up and they love it. I couldn't imagine Christchurch without orana

3284 - Janina Smitheram

Save orana Park!!!

3285 - Deborah Brown

Save Orana Park

3286 - Jaz Hector

Give more to Orana Park

3290 - Angharad Hurley

It is imperative that Orana Park is supported with council funding. Orana is a cultural and educational highlight that enhances Christchurch greatly. People of every age enjoy it and with museum out of commission for a few years there aren't many attractions left that appeal to all, and in such a diverse way. PLEASE support Orana, it would be devastating to see it close.

3293 - Grant Miles

The full support for Orana Park a wonderful asset to the city that provides for locals and national and international visitors. An asset that needs support to grow and further establish. A facility that has taken the knocks with Covid restrictions and needs our full support to continue and further enhance their facilities

3294 - Kayla Herriott

Fund the zoo

>>>

Please fun orana park

3302 - Kelly Pluck

Orana Wildlife Park. We know the facts.. OWP has been an integral part of Christchurch for so long. Hearing that they need more funding and that CCC is hesitant to assist fully is a real disappointment. Parks like OWP will end up closing and then noone wins. CCC needs MORE activites to attract international and local visitors. I was shocked to learn that they are so largely self funded. WHY the govt and CCC dont inject more into the Zoo i dont know. But it seems absolutely necessary for CCC to introduce and support more funds AS required to the zoo. Even more I say. Yes, theres lots of areas in CCC that need money,sure.. but dont neglect a national treasure and let it fail and eventually close due to funds.

3303 - Tapanga McGregor

Funding support for Orana Wildlife Park.

3305 - Angelita Schwalger

However it is lacking the need for the public to have enjoyable experiences that caters for all groups, genders, abilities and diversity. Somewhere where people can go to have fun and enjoyment as a family and or with friends/groups etc that is inclusive for ALL to have access too. That is why it is vital to Canterbury that Orana Park remains open and receives the necessary funding to keep operating.

Orana Park should come under the Parks and Heritage to protect this Baluabke asset to Christchurch , it has multiple purposes and also shows we are looking forward to the future and protecting animals native and international in the programmes that they run and breeding of animal's in very real fear of extinction, how can we. Not do our part environmentally and not support the dedicated and committed people in such necessary and crucial work they do, this is serious and needs to be funded, it has multiple purposes and is protecting the future of some of the most vulnerable animsls.

>>>

Save Orana Park, do the right thing!! Keep something good and positive for people to enjoy and create great memories off and for environmental and animal welfare benefits too. Extinction is very real to our precious animals and Orana Park is helping prevent this, it all just makes common sense to help them out! Something positive for our city for a change!!

3306 - Bridget Judd

Please don't cut the funding to Orana Wildlife Park. This zoo is a taonga to Christchurch, I have been to many overseas zoos and none compare to ours, it has so much room for animals and is such a great educational resource. I am a teacher and a parent, our tamariki deserve this special place to learn and develop love and respect for the special animals. It's one of our few special Christchurch treasures that survived the quakes, don't lead to its destruction now!

3312 - David van Schreven

Support the funding for Orana Park.

3314 - Esther Scott

Please provide more funding to Orana wildlife park. I would prefer any future cathedral spending is directed to Orana park and NOT to the cathedral.

3321 - Fry Amy

Please do what you can for Orana. An important part of Christchurch history, doing amazing work for conservation and also a wonderful place for tamariki to learn. It would be a dramatic loss.

3323 - Jackie Atkins

Orana wildlife park has already been a memory for many children's lives and should be in the future. In these times we live in many people would never have the opportunity to travel to see these beautiful animals anywhere else. Would be a shame if this park after so long became another economic victim.

3324 - Elaine Bensted (Zoos SA)

support for Orana Wildlife Park is essential

>>>

Ensuring appropriate support for Orana so they can continue their critical conservation work

3326 - Sivanand Sivaram

Would like to see some funding go to Orana

3328 - Sharon Coulbeck

I request the council to consider providing financial assistance to Orana Wildlife Park. Their conservation efforts are crucial, particularly amidst the global climate crisis affecting both people and animals. For many, visiting the park may be their only opportunity to witness these animals firsthand.

3336 - Margaret Lovell-Smith

Two local facilities (the Arts Centre and Orana Park) which rely on Council grants have recently highlighted the need for ongoing funding. Whichever category provides funds to these organisations ('recreation and sport' ? community and citizens?) needs to receive increased funding to continue these grants.

3341 - Maria Bartlett

[Other/Special Interest Topic > Creating a Climate Fund

Concerned at the prospect of losing Orana Park as a city asset and would like to see investment there to prevent closure

3344 - Yumeka Hildreth

Please include the Orana Wildlife Park in your long term plans. Losing this attraction and vital conservation project will have a devastating impact on the animals at the park and the community of Ōtautahi. As a local, I have fond memories of visiting the park as a child with my family from both overseas and Aotearoa. We also want to keep attracting international visitors to the Canterbury region!

3347 - Joanne Thomas

I am the Programme Coordinator for the New Zealand Certificate in Zookeeping which is based at Unitec Auckland. As part of the programme students have work experience placement for the year at a zoo within New Zealand and one of the zoo's that is part of the programme is Orana Wildlife Park. The wildlife park and their staff have an integral role in the training and education of future Zookeepers and their role in the ongoing work of conservation, including native wildlife to Aotearoa. The relationship and collaboration of Orana Park with Unitec is always of a stellar level, and we would like to see this relationship continue and strengthen with how important their role is in the mentoring and education of future conservationists. Orana Park is an educational resource not just for the programme, but for local, national and global visitors to Christchurch as they provide the educational and visitor experience resources of animal husbandry, animal welfare, conservation and biodiversity of local and global wildlife.

3350 - Davina McNickel

Some key places are not being sufficiently funded. This includes Orana Park, and the Arts Centre.

>>>

I would like to see increased funding for Orana Park which is a charitable trust and in financial difficulty. Orana Park is a place of importance to many Christchurch people, many of us remembering it right back to when we could drive cars into the lion enclosure. My family have been regular visitors to the park over the years and have noticed the decline in maintenance due to financial constraints, and the impact that has to how outside visitors see the park. The cost of running such a unique and important conservation park is enormous, and without council funding the park will struggle to maintain its financial viability and may have to close. This would be a significant loss to the city, not only because we would lose a fantastic attraction, but the conservation benefits of the park would also be lost. Some of the animals being kept at Orana Park are animals that most of us would never see in the wild, or are otherwise threatened in the wild. Having an opportunity to see these animals in real life, to see them being fed, see their size and hear and smell them is irreplaceable. We urgently need to increase funding for this world class facility to ensure that visitors will continue to visit, and will be impressed by the quality of the park, not disappointed and saddened at the current poor state the parks facilities are in. Without council funding we may lose this, and my children's children will only hear the stories of the magical place that was Orana Park, where we got to hand feed a giraffe, or scratch the hide of a rhinoceros and learn from the wonderful and dedicated staff who care for these animals. We have a chance to ensure that it can continue, with a small amount of council funding. I ask that the council increase funding to Orana Park to support it's ongoing financial viability and place of importance to many Christchurch people.

3352 - Debbie Walls

Please continue to support Orana Park. This is an amazing open air park to have in our District. I have been coming to the park since it opened and would be devastated to see it close if enough funding isn't able to be obtained. The learning opportunities for this generation and future generations is vital to raising awareness of animal welfare, environmental issues and successful breeding programmes to ensure continued survival of some animal soecies. Thank you

3358 - Susanne Schade

Orana Wildlife Park and it's funding should be included in the LTP as it is of such a value for the City and visitors

3360 - Robert Seebeck

Support Orana Park and ensure it remains our prestige wildlife facility and educational tool for Canterbury and the wider NZ community.

3362 - Cherie Mansell

Orana Wildlife park is a vital resource for our community and in fact the country. Its work in animal breeding, conservation and education is world renowned. It could well be that in the future the only opportunity to see animals such as giraffes, lions, tigers and even some NZ animals under threat of extinction will be in a wildlife park like Orana. I visited Orana Wildlife Park this past week with my grandchildren and an International visitor. It was sad to see the state of the park's cosmetic structures, but the animals were all healthy and well cared for. I surmise covid hit the park very hard financially and the recovery has been hard. However it is the cosmetic structures that help propel the park into world class status. If Orana Wildlife Park is to attract International visitors, and their money into the Christchurch economy, it needs to be upgraded to its previous level. More financial assistance is required! Support this valuable resource with the financial assistance it requires to stay in operation.

3365 - Lucie Lewington

Please look at helping out Orana park financially. This is an icon of Christchurch and we need to support them so everyone can keep enjoying it. Wellington and Auckland council helps out their zoos so please can we do the same. These animals and facilities are very important for the education of of tamariki.

3383 - Tania Aspey

I personally love orana park hubby got us year pass at xmas which was perfect ! Love seeing the giffares and other animals ❤️ Orana is a big park filled of adventure and definitely get a workout ..but so worth it ! Please help would be a shame to not help . Keep up the great work team at orana

3385 - Kela Miller

Please save orana wildlife park as it is a very important part of Christchurch and people travel from everywhere to visit it. We have traveled there every year for the last 5 years. It is also very important to help educate everyone about how important these animals are to our planet and how endangered they are.

3387 - Sarndra Lees

Please support Orana Wildlife Park. They do much important work with the animals and a long term asset to Christchurch that shouldn't have to constantly be in financial strife.

3388 - Marjorie Riley

I would like the council to give funding to Orana Park on a regular basis. I have been to the park with my grand daughter and thoroughly enjoyed it. We even went on the Lion encounter which was very special. Even though I live in Auckland I do travel to see family and always go to the park. The staff and volunteers do a fantastic job. It is a great attraction for tourists to Christchurch. The Auckland Zoo receives funding as part of our rates. Why cannot some arrangement like that be implemented in Christchurch.

3393 - Sandy Beardsmore

Please put funding into orana park as this needs funding to survive Christchurch needs orana park

>>>

Saving orana park . This is essential for our kids and future generations for the animals Christchurch economy

3397 - Patrick Delahunty

Yes, continue support and funding of Orana Park is vital, rather than continue to support the Cathedral rebuild which should be by its own wealthy stakeholders, Orana Park is a jewel to this city and should be preserved for future generations

3400 - Rachael Delahunty

Please fund Orana Park, its vital to the community, minimal impact on rate payers,

3409 - Angela Webster

Support orana park.

3413 - Janey Archbold

More for orana park less for religious and politics

>>>

Fund orana park

>>>

Help out orana park more

3418 - Judith Kirk

You have not got the balance right if you do not support Orana Park with the funding they are asking for. Places like Orana Park give our city depth, variety and educational insight and value about the worlds wildlife and its needs. It is important that our city does not only focus on sport.

>>>

Orana Park should be included as one of our important facilities not only for its educational and enjoyment values but also to make us aware of conservation issues that are important in the conservation of our natural world.

>>>

We partially fund activities such as Orana Park so that families can afford to visit them, see above

>>>

Put some Council Funds into Orana Park

3422 - Elizabeth Rutherford

I also feel that CCC should also invest in conservation at the fringes of the city and also amenities like Orana Park should be invested in for the conservation work they do.

>>>

Yes I do! Invest in amenities which matter to the community, get people outdoors and connect them with animals e.g Orana Park

>>>

Yes, support Orana Wildlife Park, not just for the great conservation work it does but for the amazing education programmes they run. These programs have connected, inspired, 'wow,d' and awoken ,tens of thousands of students to the wonders of the natural world. Remember these students are the policy makers and voters of the future and it would truly be a shame if this facility was lost.

3424 - Taylor Johnskn

Orana Wildlife Park needs to be financially included in the long term plan as is an essential park of Christchurch and its tourism. Not only that the conservation work of the park including native species is absolutely necessary for future generations. Lack of financial support would have negative consequences regarding such matters.

3425 - Hugh Dacre

Mostly but your savings seem to have excluded other important services and facilities. Two that come to mind immediately are >>> Orana Park which is an important facility which needs ongoing support to remain viable. If we provide inducements for external business ventures such as sports etc we should certainly look after our own, especially those which are directly benefiting the community, often with a lot of voluntary input.

3428 - Alan Chow

Please keep funding Orana Park in line with the increased costs. They provide excellent education to our community. They help with conservation and keep New Zealand native species from extinction.

3431 - Phoebe Maguirr

Support Orana wildlife park. The work they do the support the native animals in NZ through conservation, education, breed and release is vital. The park brings in tourists to Christchurch and surrounding areas boosting the economy. Having a means of public transport out to McLeans Island attractions would benefit so many people and the attraction visitor numbers. Without Orana Wildlife Park many people will be out of jobs, the animals will have no where to go and children will have one less place to be entertained.

3432 - Susan Barker

Extra support for Orana Park

3433 - Kelly Shadbolt

Yes we should be contributing money to help Orana Wild Life Park continue as it's a big asset to chch city & they get no support. They do amazing work with the animals, my kids love visiting the park its always a whole day activity for the family so I believe we should be supporting them as a chch tax payer.

3437 - Karen Carr

Please support Orana Park, this is a wonderful attraction for Christchurch and needs to be considered in the Draft Long Term Plan. On a recent visit to Orana with my daughter and grandchildren we had the most wonderful day, the children were so interested in the animals and learning about them. The fact that they could get so close to some of them and even touch them was so exciting for them. It would be so sad if this was unable to continue because they didn't have any funding to keep it up and running. Some of my favourite memories of Orana Park go back to when I was younger and it is wonderful that I can now take my grandchildren to share the same experiences The importance of our conservation and educational work with the animals is something that I am proud to have been supporting over the years with numerous visits to the park and will continue to do so for many years to come. The role Orana has in attracting visitors to our region is of great importance and offers so much, it would be a shame to see such a wonderful attraction fall by the wayside due to lack of funding. I support Orana and wish to see it continue for many years into the future, offering an

ongoing educational facility that also cares for endangered species and provides the up close and personal touch that many people would never get the chance to experience in a lifetime. I am going to purchase and Annual Pass now that my grandchildren are of an age where they can appreciate the benefits of visiting Orana and I am sure that many families will do the same. Please support the funding of Orana Park for the sake of the animals and the future of childrens education.

3442 - Scott Brown

As a tax payer I support funds to go towards assisting Orana Wildlife Park keeping their doors open. I have spent many hours down at the park as a worker, volunteer, and my younger siblings love the park. I really think our money needs to be invested into the park rather than the likes of the cathedral.

3452 - Sabine Handel

Put money in family friendly places, The Arts Centre, Orana Park, footbalk greens.

>>>

Places like The Arts Centre, Orana Park, football greens and libraries make this city a goid family friendly place to live!

>>>

Keep The Arts Centre, Orana Park and football greens as well as current services for libraries in your funding! They are important features for families in Christchurch. Check the money draining projects and think before making decisions with the rate payers money!

3455 - Craig Steele

Orana Wild life park despitrally needs help. I work on the maintance team as a Qualified builder. unfortunitly most buildings need major repairs or remodelling(ie the toilet blocks). These projects cant be done often because of l;ack of funding avaiable. Sometimes we need to wait months or years for money to become avaiable. Most permanent and proper repairs are only to critical infristructure to keep the park running(ie water and power), and projects to keep the public and animals safe from each other. One huge issue is the park vehicles - these need to be up dated so they are safe and require less money spent on upkeep. The animal keeping teams need more staff and are struggling to keep the staff we have - Often because staff are finding better postions at other zoos around New Zealand.

3457 - Lyn French

Council must financially support Orana Park with an amount equal to inflation, not a meagre pittance to appease councillors. This very unique venture must be saved, Christchurch you have a jewel in your crown in Orana Park

3459 - Anna Patchett

Orana park is an important asset for Christchurch, it is loved by families , children and animal lovers. Funding to secure it's future is key!

3461 - Claire McBeth

I'd also like to see money go to Orana park

>>>

I'd really like Orana park to get some assistance. It's a huge part of our city and deserves some help.

3467 - Kodi Dunn

Orana Park is extremely important for my work as a carer. It's an extremely valuable place for education purposes, with a lovely open space to walk, amazing volunteers, and an extremely diverse range of animals & conservation projects. Community activities is so important in facilitating the wellbeing of the disabled community, and has been a valuable place to go for daily activities. Orana Wildlife Park is always on my list of potential things to do for the day, as it is unparalleled in activities to do that are appropriate for my client. Increased funding to Orana Wildlife Park is extremely important for me as it would allow my client and I to continue having valuable experiences at the Park, every other weekend. It's always lovely to see how many people come to Orana Wildlife Park to experience our wonderful local zoo.

3470 - Sophie Brears

I would love to see the council support Orana Wildlife Park - we are so fortunate in Christchurch to have such an awesome facility and I would hate to see this lost. I take my two children (aged 4 and 8) there regularly and they love it. I also work for a homebased ece company, Homegrown Kids, and many of our homebased educators take their enrolled children there on outings. These outings to Orana provide so many wonderful learning opportunities for these children aged under 5, including but not limited to - building confidence in new situations and within groups of people, learning about different types of animals and nature, as well as different areas of the world, listening and following instructions, building on their interests of animals, enjoying experiences with friends, listening to knowledge and stories from others, taking turns and being kind, gentle and respectful to animals. This is a very valuable resource that we have in Christchurch for children, families, education, and animal enthusiasts.

3472 - Erica Alexander

Orana park

3475 - Nathan Webster

Orana wild life park should be funded by the council

3477 - Philippa Lane

Orana Park is important to me because I can go there to teach my great grandchildren the importance of helping animals to survive as humans infiltrate their habitats and food sources. The planned transfers between zoos that preserve species by mixing gene pools are particularly important. What is special about Orana is that it is the only open plan zoo in the country

3478 - Rachel Morgan

Orana parks supports

3479 - Rhys Glenjarman

The Arts Centre, Orana Wildlife Park and the rebuilding of the Christchurch Cathedral are core tourist attractions. Not allocating funding to such major attractions will severely limit tourist interaction with the city. Having spoken to many cruise ship tourists in the last 7 months, they are already struggling to find entertainment in Christchurch area. Many say they would like to actually spend their money they have withdrawn from cash machines but find nothing to do here. Without continuous funding to the Arts Centre, Orana Park and the rebuilding of the cathedral will diminish tourism and potentially have genuinely catastrophic economic impacts for Christchurch businesses. The loss of many of the cities character buildings had a significant negative impact on the mental wellbeing of Chch residents. The neo-gothic architecture of Chch is genuinely rare internationally and is part of the soul of the city. Allowing these iconic buildings to be abandoned is akin to iconoclasm. The loss of significant buildings to earthquakes has been shown to have a similar effect on residents as actual iconoclastic loss in peer reviewed research.

3480 - Martin Robertson

Funding should be included for >>> Orana Park as per previous budgets

3485 - Dr Sally Price

But funds need to be included for supporting important visitor attractions such as Orana Park (Peter Yearbury, Save our Zoo, Letters to the Editor, The Press, April 19 2024)

3486 - Kelly Chapman

I would also like to see the Council supporting Orana Park. This is a valuable asset to Christchurch and much loved by generations for children. It is difficult to imagine not having this facility in Christchurch or what would happen if it was to close. The Council provides a range of facilities across

Chch for recreation and learning opportunities. A contribution to this charitable organisation would be consistent with this approach and in line with the support that other zoos around New Zealand are receiving from their local councils.

3487 - Sally de Graaf

Please consider funding for Orana Park. Their value to conservation and to what they offer in education is irreplaceable.

3489 - Jeanette Cherry

Hi, I would really like Orana wildlife park to be added to the Draft Long Term Plan. My very first job, when I was 17 was at Orana park. I created such a close bond with the animals, just like a lot of people have. The animals are an extended family and the park has and will always have a piece of my heart. They also have a fantastic breeding program, to help endangered species and the park is also a great tourist attraction...with lion truck feeds, I think is the only place in New Zealand that does that. I remember my first trip to Orana park in the 80s and it was fantastic for education. I hope many more children can continue to learn, enjoy and love the animals in the future to come. I feel very strongly about this and hope Orana Wildlife Park gets the help they need. Please seriously consider this

💎💎💎💎💎 Thank you

3494 - Pip Lodge

Give Orana park the 1.5mil annually they are seeking. This is such a worthy thing to spend money on and adds do much value to the lives of many rather than so much of the other wasteful spending over the last 10yrs.

3502 - Rach Wilson

Give more money to Orana park, it's a great cause and an Awsome tourist attraction

3503 - Johan Bester

Assist Orana please!

>>>

Assist Orana

>>>

Assist Orana

>>>

Orana Wildlife zoo

>>>

Orana needs your help!

>>>

Include Orana Wildlife into it, many people spend alot of time there

[3506 - Lisa Gooding](#)

I would like to see Orana park supported by council funding

[3508 - Lisa Collett](#)

Would like to support Orana Wildlife Park. Would be happy with the 68cents a month increase. A worthy cause.

[3511 - Luba Shushin](#)

Please support Orana park

[3513 - John Schischka](#)

The Council should include funding for Orana Park in the long term plan. From an educational perspective Orana Park is an invaluable resource for the young people of Christchurch. On an ongoing basis Orana Park has worked with the students in Ao Tawhiti Unlimited Discovery (the school where I work). For example they have provided work experience for senior motivated students who are interested in pursuing future careers in animal care.

[3514 - Alex Mitchell](#)

Save Orana Park

[3515 - Melissa Nahkies](#)

Save Orana Wildlife Park

[3516 - Nicholas Meyer](#)

Please please PLEASE keep supporting Orana park!!!!!!!!!!!!!!

3517 - Roi Te Punga

I'd love more funding for Orana Christchurch. It's always been a pleasure visiting. I'd hate to see the animals suffer without proper enclosures and nutrition, therefore would love for more funding going to them.

3522 - Bella Davey

Please keep supporting Orana Park, it is so essential to Christchurch. I visited as a kid when on holiday from Nelson and it was so memorable that when I moved to Christchurch the first thing I did was visit Orana Park again. Physically seeing animals you would not normally be able to see in New Zealand is such an amazing experience and the comments the staff made when feeding the animals about some of the animals on the verge of extinction was very eye-opening and I feel it helps bring this to awareness for people to see the animals and to be educated about them.

3526 - Keith Bond

Fund Orana Park what they are asking.

>>>

[Strategic Direction>Have we got the balance right?]

Yes but you need to fund Orana Park better.

3530 - Christine Labiton

Please save Orana. It is an asset to our city.

3531 - Chrissy Aguirei

The staff do an amazing job at looking after each animal, with love & care. Be a real shame if we have to see it close.

3536 - Jaz Kornilov

Please fund Orana Park. We love it so much.

3537 - Danil Kornilov

Please help with funding to Orana Park. I really enjoyed there.

3538 - Leonardo Cockburn

[Recreation, Sports & Events > Community Arts], [Grants & Funding > Arts Centre Funding],
[Other/Special Interest Topics > Public Transport]

No, fund the arts, especially the Arts Centre, fund orana wildlife park, make bus fares cheaper again

3539 - Louwren Moolman

Fund orana park zoo. They need it and it's more important to look after the animals than to rebuild the cathedral.

3540 - Philip Robinson

Orana Wildlife Park deserves more funding. This is a unique and important part of our city not only as educational but also a tourism experience. It needs to be kept fully operational in its current form.

3543 - Jeanette Scott

I think its most essential to keep Orana Wildlife Park going they do an awesome job & need all the help they can get

3546 - Marcello Correia

It is crucial that the Christchurch local government ensure the on-going future financial sustainability of Orana Wildlife Park as they are a major part of tourism for Christchurch and conservation on projects around New Zealand. Orana contributes internationally, nationally and regionally to nature conservation, they significantly contribute to six key DOC recovery programs for NZ taonga species along with participating in 20 conservation breeding programs for exotic endangered species. Orana Wildlife Park is a large part in the reason I have chosen to zookeeping as a future career path, volunteering and studying there has introduced me to the zookeeping profession and ignited my passion to become a zookeeper. I implore the Christchurch Council to aid in the financial future of Orana Wildlife Park so they might inspire future generations of zookeepers, the continued welfare of their Animals, acknowledge their contributions to conservation, retain their amazing staff and ensure the continued joy and amazement the park brings to thousands of visitors each year

3548 - Dwayne McCormick

Please support Orana Park it is an asset and attraction to city rate payers and those outside the region.

3549 - Amber-Rose Proud

Please give more funding to Orana Wildlife Park. It is so valuable for tourism in Christchurch, conservation, education and fun outings for school groups and families. We are christchurch locals and visit multiple times a year - always such a great day. Please please provide more funding to help

grow and maintain the park for generations to come.

3553 - Ben Cordy

Orana park has been a intreguel part of christchurch from the time it was opened. I remeber it from when younger and then all the times since every few months and always take visitors there to sorta show it off

3557 - Laura McCoubrey

Please provide more funding for Orana Park!

3559 - Alana Harper

Please continue to support OranaPark. It is a great place to have in chch and they need the funding to be able to continue to operate.

3561 - Liz Hoffman

Please provide support to Orana Wildlife park. My family and I love visiting the park. Orana Wildlife park plays a vital role in educating their visitors on wildlife. Furthermore their conservation efforts with other zoos are essential for Wildlife preservation.

3564 - Allan Grant

Pretty much, BUT: Aside from council owned gardens and parks, consideration needs to be given to providing funding to Orana Park, which is a hugely significant asset both to Christchurch and to the international endangered species preservation movement. It is reported that the park has made a submission to the LTP which would cost each ratepayer \$8.11 per annum or monthly,68 cents. I fully support this. The demise of Orana Park would be a tragic loss to Christchurch and the movement specified. It cannot be allowed to happen.

3567 - Rachel Briggs

Plesse fund attractions such as the arts centre and orana park. They support our community, provide an attraction for our visitors and are unique to christchurch. It would be devastating for our community to lose these and whst they currently offer.

3568 - Brendan Kerr

Orana Wildlife Park needs a significcant increase in funding to stay viable. Failure to do so would mean the loss of a significant landmark.

3570 - Emmy Guthrie

Orana park and parks & exploring new fun activities for children so they don't get bored like these 12 year old ram raiders

3573 - Joyce Yager

I strongly suggest funding for >>> Orana Wildlife Park.

>>>

In addition, please consider annual funding of Orana Wildlife Park. Zoos benefit everyone in the community, but Orana is underfunded. When compared to Auckland and Wellington zoos it is clear: council funding greatly increases the ability of zoos to provide great experiences. As the major zoo on the South Island and the only place many children will ever have a chance to see large mammals such as rhinos and lions this is a very important part of the city. However, I suggest council funding come with oversight: if council funding is used, leadership change or at least new board members should be part of the funding. Board members should include people who have knowledge in the area (perhaps animal staff at Orana Park) and community members to ensure Orana Park improves.

3578 - Shirene Mosaed

Keep Orana Park funds on track :)

3579 - Frances Henley

Please support Orana Park. It is a great attraction for locals and tourists. It is educational for people of all ages. The animals need us and we need them.

3583 - Maria Stack

CCC needs to support Orana Park and the animals they care for. This site is an integral part of our city and has been for years, much more important than any swimming pool or stadium. They give people the opportunity to experience wonderful animals in their space and CCC should be doing anything they can to ensure they stay open

3584 - Marama Gilbert

Good day. As a subject matter expert, I would like to propose that the council consider the ongoing allocation of funds to support the operational expenses of Orana Wildlife Park. This financial assistance will enable the park to maintain its commitment to educating the public about the healthcare and well-being of the animals under its care, while also promoting the conservation of individual species. Thank you.

3586 - Rachel Geddis

Im happy to pay 48 cents per month to keep orana park open.

3591 - Margaret Ireland

Provide future funding to orana wildlife park

3597 - Scott Mansfield

Orana Wildlife park is an important part of Christchurch. The attraction helps bring tourists to New Zealand. Due to thsir recent plight I believe they should have some funding.

3612 - Stephanie Noble

I would like to see orana park joint funded by the city council

>>>

Would like to see funding for Orana

3641 - Gabriella Wina

I want to express my support for the continuous financial support towards Orana wildlife park, and increased operational funding. The zoo is a happy place for families, children and tourists, and is one of Christchurch's most iconic places. It is not easy to fund the entire operations with all the animals they have, and funds from visitors are simply not enough. Orana will be in severe financial difficulty in less than two years without increased Council operational funding support. COVID was a silver lining as central government funding bought time, but increased Council assistance is crucial for the future financial sustainability of Orana Wildlife Park. The Trust's budget is managed on a 'critical expenditure only' basis, which does not allow for crucial maintenance funding. Operating a world class zoological facility is expensive. The same high costs apply regardless of lack of income, given our responsibility to care for our animals 24/7, 365 days a year. Admission prices cannot keep pace with inflation and the continual rising costs of operation. It is not practical to dramatically increase admission prices as we need to remain affordable and competitive. Until 2018, visitor income covered 90% of annual operating costs; visitor income now covers only 65% of annual operating costs.

3666 - Clarrie Pearce

The likes of Orana Park deserve a substantive amount of funding

3667 - Sophie Wigley

We love orana park and would be devastated if it closed down

3675 - Riki Verhagen

Id like to extend my support for Orana Wildlife Park and the funding the park seeks. I have really good memories of going there as a child. I think that it is important for kids to have exposure to the animals.

3687 - Rebekah Savage

We need to save Orana Wildlife Park!

>>>

We need to do all we can to save Orana Wildlife Park as it is a vital and necessary part of Christchurch to both attract tourists to Christchurch and provide a great place for all to visit

>>>

I think we should also help to keep orana wildlife park open as it is an investment in a unique and wonderful place for young and old people

>>>

I think we need to invest in orana wildlife park. I think by bringing people to christchurch to visit such places the long term good would exceed the cost of investing in the park

>>>

I rent so unsure how this would affect me but if it was only 68 cents a month extra to keep orana open I would happily pay it

>>>

[Grants & Funding > Events Ecosystem Funding]

I think orana park is more important in the long term than some bids.

>>>

I definitely think orana wild life park should be a charity we invest in.

>>>

Needs to include orana wildlife park

>>>

Could also include Orana Wildlife Park under recreation also as it is a place for the whole family to enjoy

>>>

I think this needs to include specifically Orana Wildlife Park.

3691 - Deb Hawke

Our family is a supporter of Orana Park and think you should provide the funds they are asking for and include them in the Long Term Plan. It is an important asset to the city and needs further support. Orana brings visitors here, educates people about conservation, is an important conservation centre and is a fantastic place especially for families, creating special memories for our family and many others.

3700 - Ian Cumberpatch

We need to make sure that Orana Wildlife Park is properly supported by the CCC as this is a vital and important part of our City and its future. Not only does it provide recreation and education to our citizens and visitors, it provides a community hub for the growth of our children and society where they can meet and share the beauty of nature in an open environment - something that is unique in NZ

As a 73 year old Cantabrian I am pleased to call Christchurch my home. Throughout my profession as a Registered Architect I have been fortunate to have worked with many people, both as clients, consultants, colleagues, friends etc and have benefited greatly in all areas of my life because of my interactions with these people. The privilege of being able to help people by improving their daily lives and the places and spaces within which they live work and play has been central to my reason for being. I have engaged at various levels with community groups as I suspect most people do as their families and careers grow and by doing so and the better for this. I wish to make my personal plea for the CCC to seriously consider and grant the funding request from Orana Wildlife Park (The Orana Wildlife Trust Inc) I have been involved with Orana Wildlife Park for over 25 years and have provided my professional services to them on a limited voluntary basis over that time. I have been a OWT Board member since 2016. Over this period of time I have been loyally supported by my wife in the giving of my time and professional skills to the Park and have done so on the basis that I believe in the importance of Orana Wildlife Park to social and community growth of Christchurch and its people. The recreational, educational and open space experience of the Park must be nurtured and retained for future generations. It is easy to get wound up in the hooplah of the growing planet and the IT challenges and development we all get bound into. It is not always easy to stop, take breath and say why ?? Having returned yesterday from 40 days overseas in Europe, London and Singapore I am more convinced than ever that NZ needs to be its own people and culture, that learns from the experience of others, and develops to meet our needs and our wishes. I note wishes not wants. Since travelling

overseas from 1987 recent travels have shown me the good and bad of development of revisited cities. NZ is a special place and Christchurch is very special part of it. We need to nurture what we have and grow the community assets that we all value, (and possibly take for granted,) so that the values we have and want for our children and theirs are retained for the future. The world has and will probably always have social inequity, we see this daily in our TV lives and in the reality of life. Our wider social and community assets need support and protection from all levels and fronts. I am pleased to be part of the Orana Wildlife Park family and along with my wife am committed to its future. The park is run by a very committed Team that is led by a very Dedicated and committed CEO. I implore you to carefully consider and grant the funding application made by Orana Wildlife Trust to CCC LTP. This will be for the benefit of all and the future of Christchurch.

3703 - Greg Hay

Orana Park - I support investing in this, as it's something my kids love and I also enjoy. I feel there are many other residents who feel the same way.

3716 - Phillipa O'Loughlin

Please continue to help Orana Park. That is one entity that struggles and is apparently costing \$100k per week to run. The animals need continued funding if nothing else. It is a big attraction for the city.

3718 - Greer Scorgie

Orana park is an incredibly valued attraction of Christchurch, it would be such a shame to lose this amazing zoo which offers so much to families and organisations. The school trips my children have to Orana park has only furthered their learning in so many ways, when they are home we go so many times a year! It's such an amazing experience for all. Whenever friends come to Christchurch with kids that is the main attraction and they are absolutely wowed by it! It's an unforgettable experience for them all! The opportunities many adults have to volunteer there is incredible, they are able to train and live out their passion for animals and the environment. We have brought an annual pass for years. For myself I have been going as a young girl and to pass on that to my children is so special! It is such a highlight of Christchurch.

3722 - Rachel Thwaites

[Other/Special Interest Topics > Cathedral]

I want the choice to donate my section of rates to Orana Park instead of restoring the Cathedral

3727 - Carl Fox

[Grants & Funding > Arts Centre Funding]

Two examples of diverting expenditure from poor expenditure to investment would be to ensure the future of the Christchurch Arts Centre and Orana Park. These are two attractions that can and do attract tourists and also provide a community benefit to local residents.

3742 - Liz Prescott

I believe Orana Wildlife Parks deserves the support of the Council and that funding for the park should be increased to 1.5 million dollars. The park makes valuable contributions to conservation and tourism at an international level. I have many happy memories of visiting the park as a child and with my own children. Now as an employee of the park I see firsthand the wonderful work the dedicated team do everyday in caring for the wildlife and visitors (local and international). Staff regularly go the extra mile for the disabled and seriously ill visitors and it is very special to see the joy this brings families who are dealing with difficult circumstances. It would be a huge loss to our community if Orana was unable to continue to operate.

3761 - Fiona Henderson

It is also disappointing to see loss of funding for Pet Free Banks Peninsula, Arts Centre and Orana Park.

>>>

Please return funding for the Arts Centre, Pest Free Banks Peninsula and Orana Park. In particular the arts centre and Orana Park are icons in Chch and their loss would be such a shame.

3771 - Paul Bacon

[Transport > Cycleways (Capital)]

No, dump cycleways, support the animals at Orana park they don't ride bikes

3772 - Sue McFarlane

Support for increased funding for Orana Park - having visited Orana Park this last week, for the first time in years, I was so impressed and in awe of the great conservation efforts undertaken for endangered species, the welcoming and informative staff and all they do to educating visitors, providing a truly memorable experience. I will certainly visit again soon and will highly recommend Orana Park to visitors, as a unique opportunity to see some amazing, endangered animals, gain an understanding of the animals and the threats they are facing globally, how people can

help and support their various programmes. Having visited Turanga Zoo, Sydney last year, I far preferred my time at Orana Park, where the animals' environments are so much more open and natural. I understand Orana Park is asking CCC for an additional \$1.5m to keep the park sustainable – that they will be in severe financial difficulty in two years if they do not receive increased support. I fully support their request. I understand the park welcomes over 200,000 visitors annually - I do believe that there is potential for further national and international visitors – perhaps with more promotion.

3787 - Deb Donnell

[Spending > Our Proposed Spending], [Grants & Funding > Arts Centre], [Parks > Heritage (Capital)], [Borrowing & Debt Management]

Householders are under pressure and facing significant financial challenges. Consequently they are cutting back spending as much as possible to the bare basics, in order to survive. The Council should be doing the same - so that any proposed spending covers maintaining the core infrastructure, insuring key assets (including grants to assist the city's heritage and other assets, such as The Arts Centre, Orana Park, etc.), and debt servicing and reduction. Nothing more.

3791 - Sandra Beltman

[Other/Special Interest Topics > Vertical Capital], [Strategic Direction > Have we got the balance right?], [Parks > Biodiversity & Ecological Restoration]

I feel that there has been overinvestment in sports facilities and big ticket new building projects generally, when more needs to be done for managing the base health of our environment, and existing flora and fauna. Including Orana Park, a place that many of us identify with from childhood and as parents, and an amazing achievement for a city the size of Chch, it is one of places of pride.

3813 - Marg Morrison

We can't let Orana Park and the Arts Centre go the way of the A and P Show.

3817 - Melissa Macfarlane

However, I would like to see the operating costs of a wider scope of what I believe are community facilities being supported including the Art's Centre and Orana Park - important for both residents and tourists to our city. I value access to these two facilities and would like to see these sustained through continued and increased operational support.

>>>

I am also concerned to see that Orana Park is also reported heading towards insolvency. Considering the significant operational support provided to Wellington Zoo by the Wellington Council I believe the CCC needs to rethink its

operating support here and some of this could come from a minimal reduction in capital spend. As Christchurch's Zoo - Orana Park has a key role in community engagement and education, conservation and attracting visitors to our region.

>>>

[Transport > Transport (Operations)], [Grants & Funding > Arts Centre Funding]

I support 0.26% less spending on transport to support the operational expense of the Art's Centre and Orana Park.

>>>

I am also concerned to see that Orana Park is also reported heading towards insolvency. Considering the significant operational support provided to Wellington Zoo by the Wellington Council I believe the CCC needs to rethink its operating support here and some of this could come from a minimal reduction in capital spend. As Christchurch's Zoo - Orana Park has a key role in community engagement and education, conservation and attracting visitors to our region. I could do with 0.26% less spending on transport to support the Art's Centre and Orana Park.

3838 - Stacy Perrett

Continuous funding for Orana Wildlife Park, this serves everyone in the wider community and has a huge positive impact for conservation and education, if predicatable investment could be made the park would have the pote tial to become a bigger atteaction beinging in more visitors which in turn bring more money to the city. If it's going to cost each rate payer an extra .68c to gelp them grt the funding required itself a no brainer.

3843 - Karen Smollett

I think Orana park and Willowbank wildlife are amazing assets to Canterbury and beyond. I know Orana park desperately needs more money to feed animals and general upkeep. We visited just this week and it was incredibly busy. Please look after this amazing place.

3854 - Michael Laurensen

I support Orana Park

3864 - Tim Mcanulty

I would like to have additional funding for orana wildlife park. As a father this provides an important educational experience for future generations. Additionally my wife volunteered there when she first moved to nz and found it a rewarding and great way to adapt to the kiwiculture

3877 - Hilary Quayle

Orana Park should get the funding it needs to operate

>>>

Give Orana Park as much money as they need to keep going. Wonderful place!

3878 - Willem Tolhoek

- Orana will be in severe financial difficulty in less than two years without increased Council operational funding support.
- COVID was a silver lining as central government funding bought time, but increased Council assistance is crucial for the future financial sustainability of Orana Wildlife Park.
- The Trust's budget is managed on a 'critical expenditure only' basis, which does not allow for crucial maintenance funding.
- Operating a world class zoological facility is expensive. The same high costs apply regardless of lack of income, given our responsibility to care for our animals 24/7, 365 days a year.
- Admission prices cannot keep pace with inflation and the continual rising costs of operation. It is not practical to dramatically increase admission prices as we need to remain affordable and competitive. Until 2018, visitor income covered 90% of annual operating costs; visitor income now covers only 65% of annual operating costs. Risks of not securing a minimum of \$1.5M in operational funding per annum
- Financial sustainability – The future viability of Orana Wildlife Park remains at risk.
- Deferred maintenance – Many of our old buildings and infrastructure require major maintenance to ensure the risks of visitor dissatisfaction (i.e. Orana can appear rather 'rustic') and failures of infrastructure are mitigated.
- Specialised staff – Poaching of our technically skilled team remains a serious issue. There is a limited pool of experienced staff in New Zealand. Having appropriately qualified and experienced staff is an absolute requirement to maintain our MPI zoo registration. Paying fair salaries is essential to retain our awesome people.

3880 - Kevin Evans

Not a rate payer in Christchurch, but recognize that Orana Wildlife Park is a National Asset to New Zealand and plays a very important part in Wildlife conservation and the reality is that the other 3 big zoo's in NZ exist because of council assisted funding. That bigger picture that Orana plays is of direct benefit to your city and the surrounding businesses as large zoo's will always be an attraction and an educational opportunity to see wildlife you may never otherwise see in your lifetime. Please support Orana's proposal.

3892 - Megan Bissett

More funding for Orana park

3895 - Margaret Trotter

Our >>> wildlife parks, and related places are the soul of this city. People need to be able to access these facilities and they need to be affordable.

Why have you removed funding from Orana Park. An amazing resource in our city for our future children. So many families have visited this facility over the years. This is a facility for all ages, ethnic groups. A small request for ongoing funding to a world renowned facility which gives some many memories to families. Support Orana Wildlife Park by submitting on Christchurch City Council's draft long term plan Orana is a registered charity. We desperately need increased annual funding support from the Christchurch City Council of \$1.5M each year, equating to 68 cents each month per rate-payer, to ensure the on-going financial sustainability of Orana Wildlife Park. Please be part of the Park's positive future by making a submission on the Draft Long Term Plan (their 10-year budget) today in support of Orana. Council have a tough job, your feedback will help us both. It's easy to make a submission by 21 April Anyone can submit on the Draft Long Term Plan including those living outside of Christchurch city. The submission should be in your own words and can be any length. Your submission must include your full name and email or postal address. Submissions close on 21 April. Use this form to make a submission Enter your name and email in Section 1. Skip to Section 8 where under 'Anything Else' you can add your comments about Orana. Of course, we encourage you to comment on Sections 2-7 if you have other things to say. When done, please click Submit in Section 10 by 21 April. It provides educational opportunities to our children. It attracts others to our region. Our city needs this kind of facility as Auckland and Wellington have places for their children to go to. Our children have had earthquakes, fires, shootings, and suffer from huge anxiety issues. They need this facility to support their mental health and well being. My family have been visiting Orana Park for decades with my own children and grandchildren. The opportunity to see real life animals away from digital devices is becoming a privilege for children and should be a right in a city environment. In your community outcomes you state a collaborative city (Our residents can actively participate in community and city life, have a strong sense of belonging and identity,) this is what Orana Park brings to our city. You need to commit to your own beliefs. How many children have the opportunity to see animals in the wild but at Orana park in a green environment they learn about different ecosystem and the joy of seeing animals they will never have the opportunity to see in real life. They need \$1.5M each year from the council to make the park sustainable. A small amount for each child in the city. The Trust's budget is managed on a 'critical expenditure only' basis, which does not allow for crucial maintenance funding. Operating a world class zoological facility is expensive. The same high costs apply regardless of lack of income, given our responsibility to care for our animals 24/7, 365 days a year. Admission prices cannot keep pace with inflation and the continual rising costs of operation. It is not practical to dramatically increase admission prices as we need to remain affordable and competitive. Until 2018, visitor income covered 90% of annual operating costs; visitor income now covers only 65% of annual operating costs. Risks of not securing a minimum of \$1.5M in operational funding per annum Financial sustainability – the future viability of Orana Wildlife Park remains at risk. Deferred maintenance – many of their old buildings and infrastructure require major maintenance to ensure the risks of visitor dissatisfaction (i.e. Orana can appear rather 'rustic') and failures of infrastructure are mitigated. There is a limited pool of experienced staff in New Zealand. Having appropriately qualified and experienced staff is an absolute requirement to maintain their MPI zoo registration. Paying fair salaries is essential to retain their awesome people. If you value a thriving, prosperous city-this is not just money but people and generations of children in the future. You can not afford to not fund this facility.

3898 - Richard Smith

WE NEED TO KEEP UP AND INCREASE FUNDING TO ORANA PARK >>> - THEY PROVIDE IMPORTANT SOCIAL FUNCTION, CONSERVATION, LEARNING AND ENJOYMENT OPPORTUNITIES FOR MANY

3901 - Amanda South

Please support the Arts Centre and Orana Park

3912 - Victoria Agnew

I feel it is imperative that the council direct funding toward Orana Park. As a mother of a young child who we have taken to the park regularly for the last 5 years we would be absolutely devastated if this amazing facility that has been part of Christchurch for so long, educating our children, attracting tourists, providing jobs and of course providing a safe and secure home for the animals were to close for the sake of 70 cents per rate payer per month.

3960 - Nicola Prattley

Please save Orana Wildlife park. Once it closes, it and the wonderful animals there, will be gone for ever. I'm disabled and unable to use many of the services my rates pay for but, because of that I value the services I can use even more. If Orana Park closes because of temporary financial constraints it will be a tragedy on so many levels not least because of the breeding programmes.

3972 - Archana Sewak

If the Orana Park needs funding then that should part of the councils plan to allocate money to Orana Park as it is one of the great Christchurch attractions for all family members to enjoy

3973 - Max Hastings-Bell

I would greatly appreciate increased support for Orana Wildlife Park. Beyond being one of Christchurch's most iconic family destinations, it is a crucial part of conservation efforts for both native and exotic animal species, which is intrinsically good in my view. I have always loved visiting and I would hate for myself and future generations to not have access to it.

4016 - Joanne Zervos

- Consider funding towards Orana Park & Santa Parade,
as these are family friendly & run by volunteers.

4023 - Bethan Sommer

Give more funding to Orana Park.

4025 - Robin Wynne-Williams

Parks in other suburbs; Orana Park is of huge educational, conservation and tourist significance, and needs to have a regular annual funding arrangement to enable it to maintain this educational, conservation and tourism aspect.

4028 - Cassidy Barbet

Priorities the investments we have in new zealand like zoo or farm parks

>>>

Save our zoos

4029 - Kelly Meyer

Orana Park is an absolute must to be supported.

Christchurch is absolutely lacking in things to do for people of any age, families and tourists! We now have no museum there's only so many times you can go on the tram and gondola (which is nothing exciting... It's boring at the top) the small animal places are great but the don't have the big animals to see and learn about. We already have to go to Wellington or Auckland for a decent museum for a few years to take away a place like Orana Park would absolutely ruin Christchurch even more... Then we'll be left with small animals, the tram and gondola and the crap broken cathedral that should just be knocked down!! We're a CITY not a small town! Don't let this city go any further down the gurgler.
Thanks

4031 - Ferne Griffiths

SUPPORT THE ZOO!!!

>>>

SAVE THE ZOO!

>>>

SAVE THE ZOO

>>>

SAVE THE ZOO

>>>

SAVE THE ZOO

>>>

SAVE THE ZOO

>>>

shite if you're not saving the zoo

4032 - Paul Dietsche

Funding and support for Orana Wildlife

4037 - Jo Kidd

Keep funding for Orana Park. Great for conservation and international visitors. Develops skills thru its volunteer program

4039 - Tammy Hay

Give more to Orana park.

570 - Greg Partridge

Orana Park: Similarly, this too should be receiving greater financial support from the Council. Not only is Orana Park a tourist attraction to visitors and the Christchurch community, it is doing much needed conservation work, ensuring the long-term sustainability of endangered wild life, so aligns with the CCC's declaration of an Ecological Disaster, along with the Councils statement that you want to protect and regenerate the environment, especially biodiversity.

>>>

Similarly, Orana Park should receive increased financial support from the Council for its conservation efforts and ecological contributions.

>>>

Similarly, Orana Park should receive increased financial support from the Council for its conservation efforts and ecological contributions.

783 - Lynn Anderson (Orana Wildlife Trust)

What we need

It costs over \$100,000 each week to care for Orana's precious animals. A minimum of **\$1.5M per annum** of operational funding support (i.e. \$8.11 each year or 68 cents each month per rate-payer) is crucial to ensure the on-going future financial sustainability of Orana Wildlife Park. We acknowledge the situation facing Council, so propose LTP funding of:

- \$500,000 for the 2024-25 year;
- \$1M in 2025-26;
- \$1.5M for the 2026-27 year;
- \$1.5M inflation adjusted from 2027-2034 onwards.

Risks of not securing a minimum of \$1.5M in operational funding per annum

- **Financial sustainability** – The future viability of Orana Wildlife Park remains at risk.
- **Deferred maintenance** – Many of our old buildings and infrastructure require major maintenance to ensure the risks of visitor dissatisfaction and failures of infrastructure are mitigated. The current budget does not allow for this, so even with additional funding support, the Park will continue to separately fundraise to complete this crucial work. This impacts our ability to raise funds for new projects that in turn drive visitation.
- **Specialised staff** – Poaching of our technically skilled team remains a serious issue, as there is a limited pool of experienced staff within New Zealand. Having appropriately qualified and experienced staff is an absolute requirement to maintain our MPI zoo registration. Paying fair salaries is essential to retain our awesome people.

Orana desperately needs increased funding support. We urge the Council to include the Park as a budget line item in the LTP, considering Orana is a strategically, socially and economically important and environmentally significant asset for Canterbury.

[FULL ATTACHMENT AVAILABLE]

807 - Carissa Trotter

Please fund orana park its an amazing asset to this city and the world. Lets encourage care for animlas and the planet and give back to chch by making orana even more amazing to us as cabtabrians and as leadersnin aninla conservation

808 - Deb Blakeley

Please support Orana park it's future is important for the youth the way the world is going alot of the animals will no longer be here , it's important to save them Thank you

838 - Liz Bishop

I would like the Council to increase financial support for Orana on an ongoing basis, to enable this fantastic facility to continue operating and providing great experiences for their visitors, and delivering their mission objectives. Christchurch is lucky to have this great facility on their doorstep.

86 - Rhondda Bergman

It is crucial for Christchurch that Orana Park manages to keep its funding from the Council. The park is unique in New Zealand and there are few animal parks in the world that can show animals in something akin to their own environment. Orana Park was hit hard over Covid and the period following the earthquakes but has managed to survive all of this. Please do not put the park in the position that it might struggle to stay afloat because funding has not been allocated in the draft plan. The park is a treasure for residents and tourists alike!

868 - Lucas Moreno

[Strategic Direction > Community Outcomes & Strategic Priorities]

On the same token, you have a “A thriving prosperous city” but don't want to provide funding for the only zoo in Chch (Orana)? This is not acceptable in my view, and both should be funded. The Zoo is a fantastic place to relax and go with family in a really big open and safe environment. its value to the city is significant.

875 - Lauren Rowlands

Orana park needs more funding and support. The animals deserve better some of them look pretty miserable or unwell. Our tamariki and new generations deserve to enjoy these beautiful creatures in environments where they can thrive and maintain healthy lifestyles.

876 - Tanya Scott

We need Orana!!

879 - Diana He

Please support Orana Park. It is my son and I's favourite spot from he was 18 months old. We love the how the animals and how they has been taken extra care there, given enough space to enjoy their life. As well as the friendly staff, even the food is nice and cheap then the most of cafe. Please keep support the park, I am sure we are not the only people wants to see it keep running.

882 - Darci Trist

I am in support of Christchurch City Council to allocate funding to Orana Wildlife Park. They are an incredible asset to Christchurch, for residents and neighbouring residents and tourists. I understand they have a funding shortfall, and it only makes sense that the Council fund them, as they are an incredible asset to Christchurch residents. The conservation work they do alone for native birds is invaluable, having great success with whio, pateke, kiwi and kakariki bird breeding. Who would be able to pick this up if Orana were to close due to lack of funding? I am sure that other city councils fund their zoos. I have been an annual member at Orana for the past 10 years or so and would be entirely gutted if they closed due to lack of funding.

891 - David Gale

Orana wildlife park needs our help and I support additional funding of 1.5 - 2 million \$ / year from CCC budgeted by rates increase as required.

905 - Redacted Redacted

Did you know that it costs over \$100,000 each week to care for the precious animals? Orana is a registered charity. They desperately need increased annual funding support from the Christchurch City Council of \$1.5M each year, equating to 68 cents each month per rate-payer, to ensure the on-going financial sustainability of Orana Wildlife Park. As a rate payer who sees very little for the thousands I pay, I would be stoked if my money was going to help out this organisation. We use their zoo school for our teaching programme at the senior level and it provides invaluable resources and hands on learning for the students, all of which benefit greatly from the experience. To have to have this programme cut due to funding would be a huge loss for all education providers across the canterbury region.

923 - Leanne Keen

Yes. Leave orana park alone and up the funding. That is one place that needs the governments backing for life.. Those animals need to be safe and cared for, for the next few generations

924 - Shayne Kyles

Orana Wildlife Park has been a stable attraction in Christchurch for 50 odd years. They need as much help as possible as a trust. We do not have a lot in Christchurch, and Orana Park needs ro stay. Please look at them as a Long term plan

925 - Leanne Savelkoel

I am submitting this to support Orana Park in getting increased funding. I believe Orana Park is an important part of the Christchurch area and they need continued support from the Council. Orana Park attracts tourism as well as local visitors and they also play an important role in international conservation. Perhaps you could also ask neighbouring Councils to make a contribution each year as Orana Park is not just available for those that live in the Christchurch area.

926 - Fran Boyd

Please help fund Orana Park. It is an amazing place for people of all ages to go and see and learn about animals we wouldn't otherwise be able to see. It is a vital tool to learn about animals and how to protect our native species and environment.

927 - Shelley Phillips

It's a park is an amazing tourist asset to Christchurch. .68c per month per rate payer is not an excessive amount to ask.

930 - Olivia Hardaker

Orana park is a super important asset to Christchurch and Aotearoa. They do not get enough funding, and I personally know how many people and animals benefit from the park. Please increase the financial support for this amazing organisation

933 - Kirsty Farrell

I think you should be helping organizations such as Orana park. They are one if not the only wildlife park/zoo that has never been given the support they so desperately deserve from the city council over the years as Hamilton, Wellington and Auckland do. I would rather my hard earned taxes go towards them rather than be wasted on the likes of the Cathedral. It's about time you guys give Orana the city council support so they can keep doing good in this city.

936 - Whitney Blair

How about putting Orana Park on the books like all other councils in NZ who help with zoos. Putting money to the cathedral is not right and should go to the environment and conservation

>>>

Again you should be putting money into Orana Park for environmental and conservation work. Like all the other councils in NZ, Auckland, Hamilton and Wellington we should be putting money into funding them and helping or making them government run. It's disgusting how your letting them fend for themselves while protecting our native species

>>>

Orana Park, help them out

937 - Irene Laird

No - please fund Orana wildlife park to ensure our beautiful animals are cared for in the long term

939 - Alana Bashall

Orana park needs the help of the council so it stays around for generations to come and maintain the beautiful animals that live there.

940 - Rachael Evens

Please support Orana. Orana Wildlife Park needs our support, it is an amazing community minded attraction. It's provides an escape, it educates and contributes to our local biodiversity. It is a Christchurch icon

941 - Hannah Sheath

More funding to Orana Park

943 - Coulton Finch

Orana park would like more funding The future viability of Orana Wildlife Park remains at risk Many of the old buildings and infrastructure require major maintenance to ensure the risks of visitor dissatisfaction (i.e. Orana can appear rather 'rustic') and failures of infrastructure are mitigated. Poaching of Orana park technically skilled team remains a serious issue. There is a limited pool of experienced staff in New Zealand. Having appropriately qualified and experienced staff is an absolute requirement to maintain our MPI zoo registration I remember as a child sitting in the back of my Dads van with 7 other family members driving thought the lion enclosure in the middle of summer so hot and yet so scary as we drove past huge cats , every time I go to Orana Park those feelings of being 6 or 7 come back each time, I am transported back in time the only sadness is looking for dad but then remembering he is no longer with us

944 - Josh Overend

It would be amazing to include Orana Wildlife Park into this plan.

>>>

Orana Park needs to be included in the plan. It costs \$100,000.00 a week to feed all the animals at the facility and requires essential staff to keep the park running. There is so much history in that zoo and many memories that people have created and associate with Christchurch. It would be incredible to

see funding be put towards Orana Wildlife Park to help support the facility, its staff, animals, and develop it into a place that can further help endangered wildlife, engage with the public and have people care about its animals. With a bit of love, Orana could be an even bigger icon and draw people in from all over the country and world

945 - James Peck

I would like to see Orana Park supported. Other major NZ city zoos receive significant council support so they can continue their important conservation work. Christchurch should be making a contribution to the zoo to allow it to continue to operate and help prevent extinction of important animal species.

946 - Linda Kelly

Need more funding for Orana park

947 - Amy Thompson

Funding for Orana Wildlife Park - Please consider including Orana Wildlife Park in the Long Term Plan so they can keep doing the wonderful conservation work they do, and allowing kids and adults alike to see animals they would otherwise never get a chance to see. I have very fond memories of visiting Orana Wildlife Park frequently in High School, and completed my Year 13 Photography Portfolio featuring some of their stunning animals. I now have my own family, and they all enjoy visiting the park, and they each have their own favourite animal. We would all be devastated if the wildlife park had to shut down, or get rid of animals, due to a lack of financial security.

948 - Amelia Hillson

Orana Wildlife Park and facilities like it are crucial for the future of flora and fauna. Across the world wildlife and their habitats are dwindling by the day. Orana provides a safe space for its residents as well as an undeniably important role in conservation and advocacy for both exotic species and New Zealand natives alike. Future generations should be able to visit a place like Orana Wildlife Park to learn about the plights of animals in the wild and how we can help them. Zoo School operated by Orana provides a variety of education opportunities for school aged children. Additionally, daily keeper talks engage guests with animals residing in the park and their wild counterparts. Sometimes you need to see an animal to gain a connection and drive to protect their wild counterparts and natural habitats. Orana is a super family friendly destination with something for everyone. As New Zealand's only open range zoo there's a unique draw card for visitors to Christchurch. Having such a facility open benefits local tourism numbers too. Biodiversity and conservation of native flora and fauna are important to Orana Wildlife Park. They're apart of many breed for release programmes directly helping native wildlife numbers. The Jobs 4 Nature programme has been an important addition in recent years for planting and pest control across the park. Providing a safe environment for native wildlife and ensure the continuation and protection of Orana as a habitat for roaming wildlife. Christchurch deserves a place like Orana Wildlife Park. Somewhere to make memories, to

foster passions and intrigue. A place for school age children to learn and gain respect for our planet and all its inhabitants.

949 - Sam Macfarlane

Orana park need more help in my opinion

950 - Asko Kafedzic

I would like you to consider further funding for Orana Park wildlife Since as long as i can remember Orana park has become somewhat of a sanctuary for me, you will no doubt agree with me that Christchurch has suffered a lot in the last decade, the earthquakes, the march 19th attacks, among other things I losr friends in the March 19th attacks, coning from a Muslim background, i lost my job in rhe earthquakes and it deeply effected my mental health Upon purchasing an annual pass to Orana park, i find myself going at least twice a week, sometimes just for the peace Orana park is a wonderful place that relies 100% on visitors to care for their animals Further funding would help Orana park further survive and ensure its longevity as a happy place for people One of my fondesr memories of Orana park is the previous cheetah encounter, now its the rhino encounter, i love chatting to the keepers about global efforts to ensure the northern white rhinos survival through surrogate southern rhinos My psrtners nieces and nephew's also love Orana park and for that reason we purchased an annual pass With Covid pandemic many times our travel plans were disrupted, further effecting my partners mental health As Orana park is a local attraction, we find its convenience easy ans with annual passes affordability is not a problem in this otherwise cost of living crisis We will always support Orana Park, they are a worthwhile cause and it would be amazing if the council would further fund them I would be more than happy for my rates to go towards Orana Park

952 - Michelle Kerr

Yes, Orana Park needs your help. It costs hundreds of thousands of dollars just to feed all the animals, let alone anything else that needs to be done there. Its a fantastic tourist destination for people that visit our city.

953 - Sinéad Wise

Orana Park needs to be kept in the long term plan with the money to feed the animals

>>>

Orana Park is definitely an asset and should be one of the priorities in being included in the long term plan

954 - Kirsty Hubbard

Orana park. Funding needs more so it can be a much better attraction for everyone that visits from far and wide.

956 - Cru Kopua

Increased funding and support for Orana Park would be greatly appreciated and valuable to Christchurch families & residents.

957 - Jo Sloan

Orana Park, I suppose funding to be continued, increased to Orana Park. Orana park is a valuable assist to Ōtautahi in education, conservation and as a place we always take out of town visitors. Orana park is something we always got annual passes for our children for Whanau time and our extended Whanau to visit. It allowed our children an understanding of animals from around the world and our place within it. I believe Orana Park is a valuable assist and should continue to have council support.

958 - Sarah Leslie

Can you please give as much to Orana park as possible please! They are an important organization.

959 - Sara Morgan

1. Increase funding to Orana Park to ensure the facility can cover the cost of maintaining the animals. This is a good attraction for chch residents of any age, but also assist in the vistor numbers with alot of those on holiday visiting Orana Park also. As a rate payer this works out to be less than .70cents per month as my contribution which i happily support.

960 - Natalie Pasco

Orana Wildlife Park needs increased annual funding support from the Christchurch City Council of \$1.5M each year, equating to 68 cents each month per rate-payer, to ensure the on-going financial sustainability of Orana Wildlife Park. I am from Auckland but visited this wonderful park. You only have to look at the Google reviews to see what an asset it is to the region.

961 - Roslyn Mullenger

Please fund Orana Park, it is the only one of it's kind in South Island and gives a lot of enjoyment to many and needs support.

962 - Lexi Smith

Orana Park is an important part of Christchurch. Bringing in international visitors and of course a destination for all local residents. The important work they do for animals and education on animals is second to no other organisation and would be a great loss in many ways if they do not continue to receive funding.

963 - Bronwyn Moth

It would be great if you could also continue to support Orana Park and maintain this as a place to support conservation and for the public to see and experience animals

>>>

[Transport > Cycleways (Capital)]

Support for cycling and orana park

965 - Annette Wright

I would love council to consider increasing its annual funding support of Orana Park. I have an annual membership which enables me to take my little grandson to Orana for an outing on a regular basis, and he is learning so much when we talk about the animals we see. He is two years old, and it gives the perfect opportunity to discuss eg. the noises the animals make, identify and learn the names of the various animals, where they come from, what food they eat, collective nouns for animals, masculine and feminine gender names of animal and so very much more. Seeing the animals in real life rather than just in a book is a wonderful experience for him, and no doubt countless other small children. Please council consider increased annual funding support for Orana Park in your Draft Long Term Plan 2024-2034.

971 - Jennifer Goldsack

Orana Wildlife Park is an asset and needs to be retained and maintained and supported. It costs less to ratepayers than Auckland Zoo or Wellington Zoo and provides a unique type of interaction with animals which is part of our eco future. I always recommend visitors to visit Orana Park.

973 - Mark James Dunn

Save Orana Wildlife Park please. I grew up in Christchurch from 1970 onwards. I was totally in awe when Orana opened for its progressive 'open environment' approach as opposed to Zoos keeping animals in small cages. After seeing Zoos around the world, I was filled with pride at what Chch had accomplished. I later moved to Wellington but often return and as my children grew we all loved our visits to Orana Park. It was wonderful and educational for our kids and shaped their love of animals and showed them the right way to preserve our endangered species of large wild animals whilst providing them freedom and space to run in open air. If I still lived in Chch I would happily support my

rates going to this world class sanctuary.

974 - Toni Harrison

My family and I are passionate about the Orana Wildlife Park. This is a wonderful asset and treasure, providing so much enjoyment, outdoor experience, family time and education to all walks of life. It brings tourists to the area also, provides jobs for amazing, dedicated staff and is always a delight to visit. The animals are well cared for in sensitive, caring settings and during Covid, I and many others donated to them to keep the Park going, despite no visitors. I urge the council to maintain (as a minimum) the \$1.5m they need - knowing that this is also only bare bones for them and they rely on visitors and other patron's generosity. Many thanks for your consideration, Toni

975 - Paula Walsh

I feel the Council need to help fund Orana Wildlife Park as it is important for children and adults to observe the animals in as natural an environment as possible, so often money is spent on cultural events and Māori culture without the thought that the creatures and animals on this planet are vitally important. Without animals the world would be awful and they need to part of our lives.

977 - Bridget Stokes

[Strategic Direction > Have we got the balance right?]

We have 4 properties and obviously pay 4 rates. What is important to us is that yes you start to fix the very old and damaged water infrastructure- culverts but balance that with keeping our treasures in a city that is loosing so much spark. Such as our historic buildings, art galleries but for us with children Orana Park - we visit this amazing place that Christchurch is very proud of - the amazing breeding programmes for endangered animals and a place where our children can experience seeing them - many who won't get see such animals in the wild ever.

Orana Park, I believe we have lost so much in city but our one gem for the children Orana Park still stands, still amazes and is doing amazing work internationally for endangered animals, the Council needs to do its best to protect this for our future generations- human and animal alike. Less and less people can travel and the opportunity this brings to connect people to wild animals is priceless. Yes fix our stormwaters but also make sure you keep supporting and helping our places we love - that need our support - Council support to continue.

979 - Jenny Hill

Please look into further funding for Orana Wildlife Park. The importance of for our conservation and/or education work, attracting overseas visitors, mental health and looking after the endangered species weve been entrusted with. Please.

980 - Danielle Belcher

We need to keep finding Orana Wildlife Park. It is an essential part of Christchurch and one we should be proud of! I love visiting and supporting it and am happy to know that rate payers and the CCC support it too.

983 - Pauline Brennan

Orzna Park needs increased funding. It is an amazing tourist attraction to the area and a wonderful educational asset. We love Orana Park!

985 - Nancy Gibb

We need to maintain the attractions of the city - not just our parks and gardens - a given - but facilities such as Orana Wildlife Park without which the city would lose much of its unique charm and attraction particularly for short-time visitors.

>>>

Re Orana Wildlife Park. it is one of main attractions for our personal visitors, a must-see particularly if their time in Christchurch and/or NZ is limited. In addition, Orana does important conservation and education work. it would be a tragedy not only for the city but for the region if this world-class zoological facility were to close.

992 - Patricia MacDonald

Orana Park should receive funds from the Christchurch City Council as it is a valuable asset for Christchurch as a tourist attraction, a learning place for everyone in understanding wild life and Christchurch's contribution to wild life conservation which is a world wide endeavour.

995 - Kath Van Ansem

I would like to add Orana wildlife to your list of important support business. Me and my family come at least 2 times at year to visit this wonderful wildlife park as we love to hang out with the animals. The gorillas are a favourite stop and feeding the giraffes makes my 2 daughters so happy. We always take my husband parents as we visit them in Rangiora and they love to come with the grandkids too.it is such a special park to have in Christchurch!

997 - Jo Wihongi

Orana Park, please help fund this special place to enable it to stay open

Oppose

2166 - Wendy Everingham

I don't think the council should >>> support Orana Park.

2611 - Papataitua Harrington

Can this all be afforded and if not, what alternative options are there for ensuring the likes of Orana Park and the Arts Centre can open their doors.

>>>

Orana Park might be different. Do we need a zoo like this? If you think we do, then it seems like it needs experts to operate it. I don't think we need it-it is expensive and doesn't encourage locals to visit.

2849 - Patrick Dunford

>>> Orana Park, >>> and other community organisations asking for million dollar handouts should not get any major grants especially over multiple years. If we all have to cut our cloth to suit these recessionary times, they should as well. [Grants & Funding > Arts Centre Funding] [Other/Special Interest Topics > Cathedral]

3453 - Zeta Pringle

I would not like to see the council be the charity for Orana park. It is a user pays system and I am opposed to funds to a private entity. Why not then support my business or any business. The council is not a bank rather the funds received are the only ones available to use other than loans. These need to be paid back a burden for the next generation is not healthy way to operate

>>>

I would not like to see rate payers pay for Orana Park as it is a private business. Community groups are vital for a healthy active city hence they need supply as sponsorship from struggling local busy is not an option nowadays.

4021 - Cornelis F De Jager

I would be happy to see a reduction in some "nice to have" services i.e. cut the 250K given to Orana park and let it die a quiet death through mismanagement.

>>>

I don't want to see more money being wasted on the likes of the Cathedral, Orana Park, Art Centre etc if they can't survive on their own, then they can go.

4035 - Simon Ashby

3 waters spending is bullshit as is Orana park

Other

2227 - Megan Officer-Christmas

Transportation bus out to orana wildlife park would help . Why should people and visitors have to walk that distance when you can easily gain access to the other park which can be boring.

2238 - Sarah Dean

Would be great for you to support Orana Park. However, suggest Council provides KPI targets to the Park. That way win/win.

2253 - Maverick Evens

I wouldn't like to see orana park get the very small amount they are asking for

Not Stated

1371 - Erica Lofthouse

Everyone does a great job at the zoo

1756 - Kieran Sweetman

[Grants & Funding - Arts Centre Funding], [Other/Special Interest Topics - Cathedral]

Please, please please prserve and sustain our cherished attractions. Top of list is Orana Park. Then the Arts Centre. Then the Cathedral. Don't let these go.

1915 - Holly Mitchell

Please continue to fund Orana Wildlife park! They are so important for Christchurch and for wildlife conservation.

2220 - Danielle Harper

I look forward to visiting Orana Wild Life park in Christ Church each year

3502 - Rach Wilson

I think the cost at Orana park is already expensive, maybe charge the locals less and tourists more

861 - John Cumberpatch

Summary of Grants

Annual Plan 2023/24	Grants Summary	Long Term Plan 2024 - 2034									
		2024/25 \$000's	2025/26 \$000's	2026/27 \$000's	2027/28 \$000's	2028/29 \$000's	2029/30 \$000's	2030/31 \$000's	2031/32 \$000's	2032/33 \$000's	2033/34 \$000's

928 - Emaleigh Brunie

We got to protect our wildlife and nature here in christchurch too

>>>

Protect our animals and wildlife parks

Other Community Grants & Funding

General Comments

99 submissions were received on other community grants and funding proposed in the draft plan.

33 comments were in support of the proposed funding, and 14 were in opposition.

46 provided alternative proposals, where submitters highlighted causes or projects they would like to see receive more funding. Eight general comments were received.

Officer Response

The points covered by submitters in this category have been covered in staff responses to other categories.

Support

1027 - Bruce Shalders`

Ferrymead Heritage Park is worthy of Council support, having been built and maintained essentially by volunteers.

1126 - David Maciulaitis

The Ferrymead Heritage Park is an integral part of our cities heritage, with around 16 volunteer Societies and Charitable organisations calling it their home. These organisations provide living heritage, like no other experience in Christchurch, and it is vital that the Ferrymead Heritage Park & Ferrymead Trust have the financial backing, and resources to be able to continue to offer these interactions, and attractions for the people of Christchurch and New Zealand.

>>>

Now more than ever community groups, Societies, and charitable organisations are struggling in these tight economic times. The levels of Community Grants that CCC has offered historically have been a life-line to many, and helped them get through the Pandemic, and adapt to changing income

streams. It is vital that CCC maintains as a minimum their Community Grants funding, personally I would like to see it increased and broadened to cover more of these Charitable activities.

>>>

Please consider long term additional funding of the Ferrymead Heritage Park & Ferrymead Trust to enable their kindred volunteer organisations that call Ferrymead home, stability in the knowledge that the CCC acknowledge and support these heritage organisations activities. The Ferrymead Heritage Park is a place that we need to protect for generations, as it enables these voluntary groups a place to educate, maintain, restore and tell the stories of our early heritage by way of a living, moving, and dynamic Heritage Park.

1129 - John Clemens

[Parks > Biodiversity & Ecological Restoration]

As I have written earlier (in the "Have we got the balance right?" section), I believe the Regional Parks and community groups that depend, or are heavily reliant, on Council support through such mechanisms as the Environmental Partnerships Fund (EPF) need to be recognised as requiring greater priority for funding. This because the biodiversity on which Regional Parks and associated private land dedicated for nature conservation is under increasing threat through the spread of invasive introduced animals and plant, a situation that only going to get worse through environmental change and extremes associated with climate change. Staff and volunteers do a great job but I think they will need more funding now and in coming years.

>>>

Keep supporting community-led groups and programmes like those of TKK, Pest Free Banks Peninsula, the control of feral ungulate removal on Banks Peninsula, Summit Road Society, Avon Otakaro network, Ihutai Trust, Ōpāwaho / Heathcote River Network, in short hard-working (largely) volunteer groups that help Council attain its all four of its Community Outcome, not only that of being a Green, Livable City.

1352 - Lin Klenner

Keep funding the Sustainability Fund in particular for educational purposes/

1442 - Elisha Blogg

With the rising cost of living we are facing, I would like to see some more funding towards community initiatives. I believe giving communities a sense of worth to ensure we are looking after our most

vulnerable and building from the ground up where council support is not always seen is very important.

1575 - Hollie Hollander (Pest Free Banks Peninsula)

- In support of Council's continued provision of the Christchurch Biodiversity Fund to support protection of high value indigenous biodiversity on private land. However, we know that demand for this fund is high with many private landowners highly motivated to protect and enhance biodiversity and we request that this fund is increased to reflect this demand.

1829 - Stephanie Barbier

Yes, I think it's important to keep funding community projects and events, it's something people don't realise the importance of until it's gone. These events bring excitement and hope, they provide connection and showcase local businesses and support services. Having events run by the community they're based in is an important aspect when it comes to Christchurch gaining connection and working together better.

1844 - Shelley Washington (Rod Donald Banks Peninsula Trust)

The Rod Donald Banks Peninsula Trust appreciates and strongly supports the following budget allocations remaining at these levels or above:

- Operational and capital funding for the Rod Donald Banks Peninsula Trust (\$100K and \$1.35M respectively)
- Biodiversity funding (\$439K increasing to \$552K)
- EnviroSchools (\$75K)

The Rod Donald Banks Peninsula Trust also supports:

- Council support and collaboration with the initiatives of the Rod Donald Banks Peninsula Trust.

>>>

- Retaining rather than removal of the Environmental Partnerships Fund (EPF)
- Continued funding of the programmes delivered via the Regional and Community Parks teams that support our vision.

2242 - Martha Baxendell (New Brighton Project)

We also support the continued funding of the Sustainability Fund, as it seems to have dropped off the plan entirely after this year. Both of these funds have huge impacts in our amazing network of community gardens, especially addressing climate change/climate resilience objectives and the cost of living crisis, but working to create a strong and united Ōtautahi Christchurch, as we head into an uncertain future.'

>>>

We support the allocation of Christchurch Regeneration Acceleration Facility (CRAF) funding for the renewal of Marine Parade (Hawke to Bowhill). This work will address safety concerns at a corner where the pedestrian experience is poor and contribute to New Brighton's regeneration. >>> We support the continuation of Sustainability fund past 2025, This supports work by the New Brighton Community Gardens and many other local groups. This can also be used to Funding to support community-led resilience projects.

2602 - Dorothy Jordan

You mention that in your surveys the public want the status quo to continue which includes CAB continuing to provide the services that they do at present. This should be a priority. Without their services it would have a major impact on communities. CAB relies mainly on volunteers so with Council funding they are getting a very good deal! As one of these volunteers, I know the vast range of queries that are posed on a daily basis, and just how much trust there is from the community that we can provide knowledgeable answers to these queries. There is a high level of satisfaction from clients who use CAB.

>>>

While I live in the Selwyn electorate, I use a lot of CCC facilities, and as a CAB volunteer, I work in the CCC communities.

2669 - Lin Klenner (Better for Brighton Group)

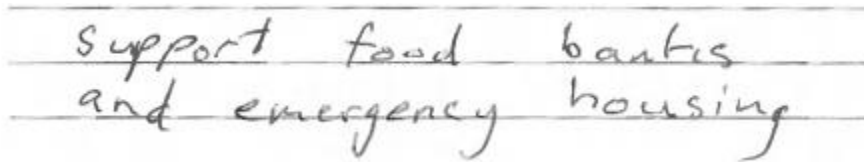

- We believe the Better for Brighton Group to be a good mechanism to uphold the vision for the area and help guide decisions to ensure the best outcomes are realised. We appreciate CCC staff support for this.
- We support ongoing funding, as offered in previous years, for Life in Vacant Spaces to enable them to continue delivering their services across the city and in New Brighton.

2808 - Kate Whyte

[Full attachment available]

Organisations such as Banks Peninsula Conservation Trust (BPCT) and the Pest Free Banks Peninsula (PFBP) collaboration help deliver on all these goals of “A green liveable city”, and at very low cost to the Council. CCC funding for these community led programmes is a no brainer as any funds from Council are amplified many times by the ability of BPCT and PFBP to leverage off these funds to secure funding from other organisations. These organisations have enormous buy in from the community and encourage and enable community to be involved. This in turn helps contribute to community wellbeing through providing social, recreational and educational opportunities.

2813 - John Antill

Support food banks
and emergency housing

2947 - Katia De Lu

- Continue funding Jobs for Nature past 2025.

2949 - Graeme John Marriott

You should be prioritising >>> Ferrymead

3055 - Josephine Drysdall

The Council must increase funding for its sustainability fund, which is set to expire in 2025. Support for schools, social enterprises, and small businesses interested in sustainability is greatly needed.

3268 - Savannah Da Silva

[Grants and Funding > Arts Centre Funding]

[Grants and Funding > Orana Park Funding]

Please continue to find charitable and community organisations, especially ones catering to children and youth like Orana park and the Arts centre

3338 - Alison Cowie

Very concerned you may be looking at reducing funding for community volunteer groups such as CAB. I volunteer in the City office which is based in New Brighton and note that we have many questions from Christchurch citizens who have been referred to us by the Chch City council or other government organisations. This must be a pretty cost effective solution for the council to support.

>>>

Again my comments about the need to maintain funding for voluntary organisations such as CAB ,of which I have direct , is my hope.

3577 - Marie Byrne

On the whole yes. I support the continuation of grant funding as the positive offset of the value of volunteer contributions provided through community grants adds to maintaining economic sustainability in the city. If there is some way of increasing funding levels to reflect cost of living increases it would assist in supporting community organisations that have these cost increases as well. I support programmes that encourage waste minimisation efforts to detract fly-tipping, which is a significant issue in my Phillipstown suburb. This could include communication and marketing to landlords (especially social housing providers) and incentives for community-based clean ups and/or sustainable rubbish item disposal. I congratulate Council on the pothole repair programme as I have witnessed the quick response time. I encourage the investigation and implementation of other initiatives that would provide quick wins.

3601 - Bridget Allen

[Strategic Direction>Have we got the balance right?]

I think it is good to fund community groups that are working in Christchurch, as well new adventures.

3660 - Alice Shanks

I support the Council working towards a green liveable city, climate resilience, protecting and regenerating the environment (especially indigenous biodiversity), water bodies, and tree canopy, across the urban areas and rural Banks Peninsula. I support the retention of the Environmental Partnerships Fund (EPF) to help community-led organisations to deliver conservation outcomes for the benefit of current and future generations of Christchurch City residents. I support funding to increase indigenous biodiversity health and recreational opportunities.

3669 - Rachel Howells

Acknowledgement with thanks for the biodiversity-focused funding that has been contributed by CCC to date for the collaborative Te Kakahu Kahukura (TKK), Pest Free Banks Peninsula (PFBP) and feral

goat eradication programmes facilitated on behalf of many partner organisations by the Banks Peninsula Conservation Trust (BPCT).

Specific requests for additions to the LTP

- Requests the reinstatement of the Environmental Partnerships Fund (or a similar grant vehicle) to continue funding at the same level as the LTP 2021/23, or increase and be linked to annual inflation, for the following:
- The continuation of an annual contribution of \$50k to support the Pest Free Banks Peninsula elimination programme.
- The continuation of an annual contribution of \$40k to support feral ungulate removal on Banks Peninsula.
- The continuation of an annual contribution from the Environmental Partnerships Fund of \$30k towards BPCT operational costs so they can continue to facilitate these strategically important collaborative programmes.
- The continuation of an annual contribution of \$30k to support the Te Kakahu Kahukura programme

In support of Council's continued provision of the Christchurch Biodiversity Fund to support protection of high value indigenous biodiversity on private land. However, we know that demand for this fund is high with many private landowners highly motivated to protect and enhance biodiversity and we request that this fund is also increased to reflect this demand and is linked to annual inflation.

Concerned the proposed removal of the Environmental Partnerships Fund (EPF) will have a significant negative impact on the ability of community-led organisations to deliver conservation outcomes for the benefit of current and future generations of Christchurch City residents.

Concerned that Council's grant via the EPF to Pest Free Banks Peninsula elimination and feral ungulate programmes have been discontinued. When removing funding we have to consider the effect on the ground: re-incursion of animal pests will occur and the investment of CCC – not to mention the incredibly hard work of so many in our communities - will have been for nought. This negative impact will also be felt for years on land owned by the Council.

Concerned that the removal of an EPF grant supporting the Banks Peninsula Conservation Trust's operational costs means their organisational focus has to shift towards securing new funding to "keep the lights on". This puts pressure on the BPCT's ability to provide the leadership support and facilitation for collaborative community-led programmes like TKK and Pest Free Banks Peninsula.

Concerned that the 21 partner Port Hills-focused Te Kakahu Kahukura (TKK) programme will lose funding at a time when it is most needed. Post another Port Hills fire the important role of this community-driven programme in supporting landowners has never been more clear. If appropriately resourced this community-led programme can support: ecological recovery from fire damage; proactively plan for fire risk mitigation of existing and future indigenous biodiversity across the Port Hills; and establish an ecologically robust Port Hills forest that is a biodiversity hub for Christchurch City, with significant climate resilience benefits.

3695 - Pamela Pye

[Grants & Funding > Arts Centre]

Grant funding priorities - current amounts must be maintained to support Arts Centre Trust, pest free Banks Peninsula and Rod Donald Trust

3738 - Finn Jackson

I support the retention of the following funds, which enable community groups to undertake essential work in biodiversity management across the Christchurch district: - Strengthening Communities Fund
- Biodiversity Fund

3786 - Mark Nixon

[Parks > Biodiversity & Ecological Restoration]

I am in support of the Council's continued provision of the Christchurch Biodiversity Fund to support protection of high value indigenous biodiversity on private land. Moreover I would support the fund to be increased to support the work that private landowners and charitable trusts do to protect and enhance the biodiversity in the region.

3809 - Johnathon Ridden

[Parks > Ōtākaro Avon River Corridor Regeneration]

On the natural environment front, there are several great community groups and trusts enhancing the city on the smell of a oily rag. These groups need as much support, alongside increased investment in the natural environment. The signs for investment in this area are good (e.g. Avon-Otakaro corridor), but it needs to be sustained overtime and grow also.

3898 - Richard Smith

WE NEED TO KEEP UP AND INCREASE FUNDING TO >>> FERRYMEAD - THEY PROVIDE IMPORTANT SOCIAL FUNCTION, CONSERVATION, LEARNING AND ENJOYMENT OPPORTUNITIES FOR MANY

6900 - Geraldine Jellyman

The heart of the city is important i.e. the people and connections. Important to maintain funds for groups that work to build connections of people - avoid loneliness.

707 - Chris Mardon (Ecobulb Limited)

The purpose of our submission is to recommend the continuation (and preferably increased funding) for the Christchurch City Council's Sustainability Fund. We believe the Sustainability Fund has delivered significant value for Christchurch residents. We at Ecobulb Limited have been the proud recipients of funding in the last three Sustainability Fund rounds. This funding also allowed us to unlock significantly greater funding from Central Government and Orion New Zealand to scale up the Sustainability Fund funding we received. As a result we engaged local energy assessors who undertook 978 home energy assessments in Christchurch homes who were predominantly in energy hardship. These home energy assessments helped make these homes more energy efficient, helped them find the lowest cost electricity retail plan and supplied them with 14,342 free Ecobulb LEDs and energy saving shower heads. As a result these 978 Christchurch homes are therefore saving an estimated \$782,000 per year on their power bills. We therefore re-iterate our recommendation for the continuation (and preferably increased funding) of the Council's Sustainability Fund. I would be delighted to meet with the Council to discuss this further.

>>>

Nothing more to tell - apart from re-iterating our recommendation for the continuation (and preferably increased funding) of the Council's Sustainability Fund.

719 - Shane McInroe

keep funding our NGOS so important to our community's

738 - Tara Heeran-Harris

Funding for Orana Wildlife Park should go ahead as in the draft plan. All other national zoos are council funded and Orana is desperate for operational and maintenance funding. Orana has some amazing native conservation work happening behind the scenes and with council funding could be an even greater biodiversity hot spot in Canterbury.

8 - Justin Yudistira

-Maintain the community partnership fund and biodiversity fund. -

931 - Anthony Wright (Canterbury Museum Trust Board)

We are grateful for the ongoing support of Christchurch City Council to the Canterbury Museum Trust Board and the provision of Statutory Grants to the Museum and have comments relating to:

- the percentage increase proposed for the Statutory Grant for the financial year 2024/25
- the amounts proposed for the Capital Grants for the Canterbury Museum Redevelopment project
- the amounts proposed for the Capital Programme for the Robert McDougall Gallery

These points are submitted on as follows:

Support – Statutory Grant Allocation and Levy increase for 2024/25

The Museum supports notification of the inclusion of the 5.4% increase in the Statutory Grant from last year, being a total of \$9,068,337.

Support – Heritage Targeted Rate: Capital Grant for Canterbury Museum Redevelopment amounts

The Museum supports notification of the inclusion of the Capital Grant amount of \$27.1m forecast (which is scheduled over three years from 2024/25).

Support – Capital Programme for Robert McDougall Gallery

The Museum supports the inclusion of Capital Funding for:

- 45164 Robert McDougall Gallery Strengthening of \$6,658,000 (which is scheduled over two years from 2024/25); and
- 65641 Robert McDougall Gallery – Base Isolation of \$7,867,000 (which is scheduled over two years from 2024/25).

Summary

In summary the Museum submits:

THAT the Canterbury Museum supports the current draft LTP funding to support both Operations and the Redevelopment Project.

Oppose

1302 - Melanie Forsyth

[Libraries > Libraries (Capital)]

We need to reduce the 7% currently proposed on Community Support and consolidate libraries.

1683 - Anne Forne

I am concerned that the proposed removal of the Environmental Partnerships Fund (EPF) will have a negative impact of significance on the ability of community-led organisations to deliver conservation outcomes for the benefit of current and future generations of Christchurch City residents. Continuation is needed of the biodiversity-focused funding that has been contributed by CCC to date for the collaborative Te Kakahu Kahukura, Pest Free Banks Peninsula and feral goat eradication programmes facilitated, on behalf of many partner organisations, by the Banks Peninsula Conservation Trust.

2084 - Sarah Donaldson

No more funding for things like street parties. They're small costs that have no fiscal benefit.

2106 - Courtney Reid (Pūharakekenui Styx Living Laboratory Trust)

The Trust is concerned in regards to the slash to supporting communities despite p29 of the Parks & Foreshore Activity Plan recommending partnerships and community engagement as a means to reduce costs to operate and maintain parks. Both levels of services cannot be met (IE a LoS to increase volunteer participation etc and then decide not to fund these sorts of partnerships). This funding is pivotal to continue support their growth/empowerment of our communities that has been developed over that last few years and to stop this means a significant decrease in their ability to be in partnership and look after their parks/restoration efforts. As the draft LTP currently states, from July 2024 onward there will be no Community Partnership Fund (previously \$350k) and no Environmental/Climate Change Partnership Fund (also previously \$350K per year. Specifically, The Styx Living Laboratory Trust currently fund the Field centre lease, \$20k p/a) from the former fund, which would impact the Trust in not being able to lease the building if the funding was discontinued. For wider context, funding streams that typically came from philanthropic organisations are decreasing also, meaning that there is increased reliance on Council funding for these vital overheads. It is so important to fund community groups like ourselves, as this inevitably results in lower costs to Council/ratepayers where there is community ownership of projects – and those community groups are also then better able to source other external funds too – as we have.

2919 - Hayley Guglietta (Avon Ōtākaro Network INC)

We do not support the removal of the \$380,000K Innovation and Sustainability fund; it is a small amount of money in the big scheme of things (less than the cost of a gate); often it is the only fund that environmental groups can apply to; the removal of this fund will put even more pressure on the strengthening communities fund; this fund is allocated twice a year allowing groups to extend projects or fill funding gaps in projects without having to wait 12 months; we believe the criteria of the fund could be rewritten to be more aligned with the CCC Climate Resilience Strategy, Ōtākaro Avon Stormwater Management Plan and Biodiversity Strategies Action items.

>>>

We do not support the removal of the \$350,000K Parks Partnership Fund, in the big scheme of things the amount in this fund is small but the return to the city is immense from the projects delivered in recent times. i.e Ōtākaro Orchard, and Petrie Park are two that we are aware of and the funding boost and collaboration with the Parks Partnership have been critical to the success of these projects.

3023 - Carolyn Brown

Do not invest so much in the business sustainability fund.

337 - Debbie Jones

I've also been advised we fund street parties for some neighbourhoods. How is that a good use of Council funds. In a time when people are struggling to put food on the table then dont increase the rates to fund those kinds of activities

>>>

As mentioned understanding where the spend is on community events. I dont believe council should be funding street parties. Council funding should go to the things that are accessible to everyone and benefit the community as a whole

3501 - Malcolm Long (Ōpāwaho Heathcote River Network)

<p>Pest Free Banks Peninsula</p>	<p>Oppose \$50,000 reduction in funding This is an excellent operation which is only just beginning to demonstrate its leadership and long-term effectiveness. A cut in funding at this time would send all the wrong messages. Re-incursion of animal pests is certain to occur and the investment by CCC and community volunteers will have been wasted. This will also have a negative impact on Council-owned land. Short-term thinking that leads to such proposed funding reductions is further evidence of weak strategic leadership in biodiversity by CCC management.</p> <p>We request that current funding levels are retained and, if possible, increased.</p>
<p>Te Kakahu Kahukura</p>	<p>Oppose \$30,000 reduction in funding This group, a group member of OHRN, is leading a vital restoration of the south side of the Port Hills. It is important that the city, through this funding, demonstrates support for this long-term restoration effort particularly following the Port Hills fires.</p> <p>We request that current funding levels are retained and, if possible, increased.</p>
<p>Environmental/Climate Change Partnership Fund</p>	<p>Oppose abolition of this fund Again, this is the wrong time to be removing funding for voluntary community groups active in the environmental sphere. These groups carry a disproportionately large responsibility for restoration of damaged environments, protection of biodiversity and pest/predator management. Abolition of this fund is further evidence of inadequate leadership in the biodiversity responsibility of Council.</p> <p>We request that current funding levels are retained</p>

3603 - Murray James (Food Resilience Network Incorporated)

Urban Forest Plan and Parks

We do not support the removal of the \$350,000K Parks Partnership Fund, in the big scheme of things the amount in this fund is small but the return to the city is immense from the projects delivered in recent times. The Ōtākaro Orchard food forest itself along with the planned Petrie Park project are two that we are aware of and are intimately involved in.

3738 - Finn Jackson

I am strongly opposed to the proposed abolition of the Innovation/Sustainability Fund and Environmental/Climate Change Partnership Fund. This is a slap in the face for the groups who rely on these funds and work hard to improve our local environment.

3746 - Quinn Ledgerwood-Gee

The city council's sustainability fund ends in the financial year of 2025. This fund is designed to help schools, social enterprises and small businesses focus their efforts on sustainability. We need to get this reinstated with increased funding in future years.

3799 - Morgane Honore (Richmond Community Garden Trust)

We do not support the removal of the \$350,000K Parks Partnership Fund, in the big scheme of things the amount in this fund is small but the return to the city is immense from the projects delivered in recent times. i.e. Ōtākaro Orchard, Petrie Park are two in our area.

3869 - Cam Parsonson

[Strategic Direction > Additional savings and efficiencies]

cut social service grants by \$2m

>>>

Reduce Voluntary Organisation grants by \$1.5m pa

843 - Ngaire Donelda Bacon

Council should not be handing over rate payers' money for the private development of heritage buildings.
Major event bid funding

Other

1103 - Murray Sanders

[Grants & Funding > Arts Centre Funding]

Support for the Arts Centre and Ferrymead Heritage Park should be maintained

116 - Jarrod Coburn

I think you should consider more investment in preserving the heritage of the city. You spend a lot on the museum (even though it's closed for a while) but places like Ferrymead Heritage Park are also worthy, and get hardly any public money.

1224 - Amanda OBrien

Community groups need more funding

156 - Julieanne Giles

Ferrymead heritage park is a valuable resource in this city we need to fund a bus to it and help them develop the area

1583 - James Pomeroy

More funding / assistance available for community groups, NFPs, food banks, arts & culture. Sport probably has enough.

1658 - Justin Fletcher (Predator Free Waimairi Beach)

[Parks > Biodiversity & Ecological Restoration]

Enhancing biodiversity and adapting to climate change will require sufficient expertise, labour and operational funding. If, for example, it is left to your excellent park rangers to undertake the necessary activities (such as predator control and planting) then they will need to be appropriately supported by plenty of energetic hands to do the doing and have access to wise minds (e.g. ecologists) to offer expert guidance. It is great to see that there is a Biodiversity Strategy and I hope that there is also a supporting team that oversees its implementation. Given that CHCH residents entrust CCC to look after many of our ecologically important areas it should follow that CCC should find a way to adequately undertake this work and that this is supported by ratepayers. It may be that some of this work is best carried out by non-council staff in which case funding for initiatives such as the Community Partnership Fund will need to be improved. Alternatively, a model that may prove itself successful is the targeted funding that has supported the Banks Peninsula Conservation Trust and Riccarton Bush with these areas becoming rare biodiversity success stories within our territorial authority.

1760 - Angus Bromley

More funding for Ferrymead Heritage Park

201 - AJ Wade

Defunding the Arts including the Arts Centre, the Court Theatre etc is not acceptable. Funding the Cathedral and the Stadium over the arts is not acceptable. Increase the funding to Canterbury Museum.

>>>

Fund Canterbury Museum.

2110 - Jennifer McMaster

[Spending>Te Kaha]

Do you have any comments on our capital spend or capital programme.
SCRAP TE KAHA, Use the money for community initiatives like food banks, libraries, RAD Bikes, greening the city, river clean-ups, ~~and~~ repair cafes and community gardens. - to name a few. Ōtautahi does not need a costly, resource hungry stadium, we need community support, a walkable/bikeable city, and CLIMATE JUSTICE.

2201 - Eddie Hayes

Community organisations need more funding.

>>>

Prioritise the community funding programmes.

2385 - Ezra Mussa

[Other/Special Interest Topics > Creating a Climate Fund]

The city council's sustainability fund ends in the financial year of 2025. This fund is designed to help schools, social enterprises and small businesses focus their efforts on sustainability. We need to get this reinstated with increased funding in future years.

>>>

[Parks > Biodiversity & Ecological Restoration]

BIODIVERSITY Sports fields have \$100 million worth of funding in the LTP. Biodiversity only has \$2 million. We are in the middle of a biodiversity crisis, so this negligence from council is a serious problem; CCC must immediately provide more biodiversity funding. The Biodiversity Fund (used to support biodiversity work on private land) must be increased from the proposed amount, \$400k. The council team of 2 waterways ecologists has been reduced to 1 which means there is even less capacity to ensure council projects are resulting in good outcomes for waterway health. This must be rectified.

>>>

The Community Partnership Fund need further support. Set to disappear in July 2024, it is currently \$200k supporting community initiatives such as the Styx Mill Trust and Summit Road Society. We need this reinstated and the funding increased.

2389 - Aurora Garner-Randolph

[Other/Special Interest Topics > Creating a Climate Fund]

The city council's sustainability fund ends in the financial year of 2025. This fund is designed to help schools, social enterprises and small businesses focus their efforts on sustainability. We need to get this reinstated with increased funding in 2025.

2503 - Lin Klenner (New Brighton Community Gardens)

We would really appreciate if you could keep the Sustainability Fund in the budget

>>>

Let's talk about the sustainability fund, perhaps we need to change it to a **Regenerative fund** because truth be told things are not looking good. **All our school programs throughout the year depend on this fund** and the number one thing we do is inspire them and their parents to do better, reconnect them to the ground they walk on and inspire them to become change-makers in every aspect of their life. It starts with a nibble on a fresh carrot...

We need you to continue your support for charities like ours. By working together, making sure sufficient Funding is put aside for the Strengthening Community Fund and Funds like the Sustainability Fund are left in the budget, so we can continue inspiring the next generation to do better than us.

You and your votes are part of this, and together we can build a community that is a little more healthy, caring, and supportive, and where everyone has the opportunity to thrive and learn how to regenerate our environment.

[Full attachment available]

2533 - Steven Muir

[Strategic Direction>Community Outcomes & Strategic Priorities]

funding for community groups is a high priority for me. local community groups provide amazing personal support and build social trust which is essential for the cities wellbeing

2544 - John Bannock (Governors Bay Community Association)

please continue to financially support local communities to engage and create social events.

>>>

We request that Council continues to allocate funding for local community events to help us run community get togethers such as the Governors Bay Fete.

2627 - Sarah Butterfield

I'm concerned with the drastic lack of funding for community groups, especially the loss of the Sustainability and Innovation Fund.

>>>

Funding community groups which are doing great work with regeneration projects.

2658 - Finn Jackson (Summit Road Society)

We also support the proposed retention of the Biodiversity Fund, although we request that this be increased in line with inflation each year. The Biodiversity Fund is one of the few funding options available for weed control on land of high biodiversity value. Weeds are one of the biggest threats to native biodiversity. Weeds do not attract the same level of attention or funding for control as predators but they are a dire threat. They spread easily and outcompete and smother native species. They can completely overwhelm our special plant communities and displace the birds, invertebrates and lizards they host. We desperately need a coordinated, collaborative funded programme to contain, and where possible, eliminate weed species that pose a threat to our native biodiversity. Weeds of concern include spur valerian, Himalayan honeysuckle, old man's beard, banana passionfruit, flowering currant, elderberry, Darwin's barberry, boxthorn, hawthorn, buckthorn and nassella tussock among others. We know it is cheaper and easier to tackle weeds when they are low in number than wait for the problem to escalate.

[Full attachment available]

2819 - Beth Rouse (Avebury House Community Trust)

Whilst ratepayer money for overseas events such as Sail GP may generate benefits at the city level, these events do not necessarily inspire or connect communities. A small fraction of such events money could create significant community-level outcomes, supporting homegrown events that appeal to and involve the local residents. In Richmond, we and our partner organisations have created a series of annual events that are viable only due to the good will of hundreds of volunteers. We are able to make a little go a long way, but we find that we are handicapped by the conditions of the Council's \$5000 grant for large scale events not being adaptable to smaller ones. Easy-to-access grants of between \$500 and \$2000 that can be used for collateral such as pop-up gazebos and advertising would be of great benefit. The Heritage Fest grants of \$300 work in this way and have proven to provide support. Such funding can be the difference between the event simply breaking even or generating some profit to direct back into local projects. For example, the Spring Fair/Heritage Festival event funding of \$300, allowed us to put more of the proceeds towards maintaining and improving our heritage outreach.

2832 - Riley Neupauer (University of Canterbury Green Party)

This pattern of abatement can also be observed in the Community Partnership Fund, which is to be completely axed in the coming months. The UC Greens are requesting that more financial support is allocated for these indispensable programs, a stance that is shared by several councillors, including the upstanding Celeste Donovan.

2899 - Victoria Nebbeling

I also support the continued funding of the Sustainability Fund, as it seems to have dropped off the plan entirely after this year. Both of these funds have huge impacts in our communities, especially addressing climate change/climate resilience objectives and the cost of living crisis, but working to create a strong and united Ōtautahi Christchurch, as we head into an uncertain future.

>>>

Invest in community led initiatives by keeping the Sustainability Fund

2901 - Hamish Fairbairn (Conservation Volunteers New Zealand [CVNZ])

We support the objectives and continuation of the Christchurch Biodiversity Fund but request that the amount is increased to reflect demand more clearly.

[Full attachment available]

2947 - Katia De Lu

- Reinstate the Community Partnership Fund. - Increase the Biodiversity Fund. - Integrate biodiversity into the Environmental/Climate Change Partnership Fund. - Continue the Sustainability Fund past 2025.

3127 - Dianne Downward

[Spending > Te Kaha]

The new Migrant centre is a great place for groups to hold meetings and festivals. No additional funding should be given outside of supporting this facility for the groups involved there. Some community groups, like the Richmond community garden is wonderful because it gets a much greater share of funds than other groups. They need to manage on there own now and other groups should get a hand up.

324 - Richard Wesley

We need more money spent on supporting the arts, such as community museums like Ferrymead, and the Arts Centre.

>>>

We need funding for the Arts Centre and Ferrymead Museum. These are community assets that the council needs to support.

3364 - Alison Murray

There are some very important Community Funding that should be maintained or increased because they are recommended by Council Call Centre Staff and are free to everybody regardless of age, ethnicity, gender, and financial situation. Citizens Advice Bureau is independent and therefore rely on funding to run the service for our community.

>>>

If the Council is going to achieve their proposed goals of inclusivity they will ensure that they support the people who work to make sure everyone is heard, helped, and supported. Citizens Advice Bureau Christchurch Area during the twelve months April 1, 2023- March 31, 2024 provided 10,380 services that were not clinic, 4,975 clients attended clinics, and spent 2,480 hours in depth conversations helping people. Many of these calls have been referred from Central and Local Government. Digital exclusion has caused hundreds or people to be left out of life. Age, ethnicity, finances, and education all cause people to not be able to access the services that we all need. CAB helps these people free of charge.

3372 - Jenny Bond (Te Tuna Tāone)

Yes and no. I appreciate the difficulty in achieving balance in these economic terms however, removal of contestable funding for non-governmental projects such as Te Tuna Tāone, via the Christchurch EnviroHub Trust means these projects will likely die. All agencies are cutting or reducing their funding streams meaning community led projects that in turn generate much volunteer and in-kind contributions will no longer continue.

>>>

As mentioned earlier budgets need to be re-looked at to move money back into Grants such as the Innovation and Sustainability Fund. This fund gives effect to the green liveable city you claim to be on page 15 by leading a city wide response to climate change and protecting our waterbodies. CCC staff cannot and do not do this work alone. There is much the community achieves through the CCC Grants programme.

>>>

Again, is no room within these budgets for community led organisations to deliver on some of these outcomes. As mentioned earlier community driven projects often bring with them much volunteer and in-kind time that the council cannot always achieve because they are council.

[coders note. in response to "parks, heritage or the coastal environment?"]

3380 - Victoria Lukiyanyuk

[Other/Special Interest Topics > Creating a Climate Fund]

There needs to be additional funding for non-profit community services and additional thought into the effect of climate on water and transport

>>>

Organizations such as Citizens Advice Bureau are painstakingly under-funded despite contributing so much to the community.

>>>

Not enough for non-profit community programmes.

[coders note. response too 'Operational Spending > Comments']

3592 - Lucy Altaner

You could also invest more into foodbank and other organisations that support people.

3623 - Jessica Adams

It is ridiculous to be spending money on holding functions to present certificates to residents who have managed to keep their gardens looking pretty. It would be better to reduce the cost of the large green waste bins so residents who are doing the Councils work of collecting leaves from berm trees

and mowing the Councils berms don't have to use up all the green bin space for doing Council work.

3731 - Heather McHarg

These organisations largely operate on funding sourced through grants from various agencies including Christchurch City Council. This funding is often difficult to access. If Christchurch City Council intends to put "people of the centre of the city and district by prioritising wellbeing...: then it needs to financially support those community organisations run by volunteers who actually do this.

>>>

As a long-time member of a Christchurch branch of a national organisation (Citizens Advice Bureau), I am aware of the huge support this service, largely operated by volunteers, provides to people in the Christchurch community, across all cultures, genders, ages, socio-economic groups. Clients contacting Citizens Advice Bureau seek information and advice on a range of issues including accommodation & tenancy, consumer, employment, health, relationship, community services. Often clients have sought this information from other agencies (eg, Police, WINZ, Immigration NZ, Christchurch City Council) who have referred them to CAB for assistance. Often clients do not have expertise and necessary hardware tools to search for information online. Often clients have issues that they have very little idea how to start solving. Advice and information provided by Citizens Advice Bureau can make a significant difference to these clients and enabling them to make positive next steps. Funds provided to Citizens Advice Bureau, and other non-profit agencies that provide community help and support, are essential in enabling these organisations to continue. It is important that the long term plan acknowledges this in its budget and keeps funding for this area as planned.

3753 - Helen Shaw (Lyttelton Reserves Committee)

We would like to see the Park Ranger's budgets remain the same or increase, in order to support the Reserve Committees' work. Specifically, CCC should be ensuring that money is available to support trusts, community groups, and partnerships focusing on biodiversity and holistic catchment management. These include Whaka Ora Healthy Harbours, and WOPP pest projects, along with others. Reducing funding for initiatives such as this will have a negative effect on all four of CCC's outcomes, in particular the collaboration with community, the cultural powerhouse and the green, livable city outcomes.

3759 - Ben Connolly

Concerns about jobs for nature funding ending – this ends this year. Concern about funding ending this year.

3761 - Fiona Henderson

It is also disappointing to see loss of funding for Pet Free Banks Peninsula, Arts Centre and Orana Park.

>>>

Please return funding for the Arts Centre, Pest Free Banks Peninsula and Orana Park.

3773 - Elizabeth Benson

I would like to see that there is continued funding that supports Biodiversity in the City and Banks Peninsula.

3779 - Layling Stanbury

Also, put more funding into grassroots community organizations please, it's cheaper in the long term as well as making people happier.

3798 - M-Webb User

[Spending > Our Proposed Spending]

Operational spending is about right but for the peninsula we can make it go further by using local contractors. Our reserves committee does a lot for the community and volunteer work but they could get more assistance and finances as an example.

3800 - Rachel Barker

Keep CCC Partnership Fund to work together with community groups. I live at the lower end of the Opawaho Heathcote River and support CCC & communities working together planting. More emphasis is needed and more support for maintenance of plantings, getting a Pest Plant Plan underway, and working together with ECan, mana whenua & communities to start hammering the weeds!

>>>

Support Climate Resilience Fund- essential Support more funding for Urban Forest Plan Would like to see at least the current, and ideally more support for Community and Park Rangers. Propose that CCC dedicates a river ranger each for Opawaho, Otakaro and Styx Purakanui Strongly oppose the reduction of 60356 - Programme - SW Port Hills and Lyttelton Harbour Erosion & Sediment by \$7,328,868 Oppose Pest Free Banks Peninsula losing \$50K Oppose Te Kakadu Kahukura losing \$50K. Both have solid structures with excellent results. Strongly oppose loss of Environmental Partnership Fund. Community groups are getting into their stride and proving themselves many times over. Why cut this fund to support successful groups that make a big difference to environmental outcomes?

3802 - Matthew Baird

Please maintain/increase the following funding: - Continue Jobs for Nature past 2025 - Continue the Community Partnership Fund - Increase the Biodiversity Fund - Integrate biodiversity work into the Environment/Climate Change Partnership Fund. - Continue the Sustainability Fund. - Increase the Waterways Restoration Budget so that we meet the targets. Some of this could be funded through a new Climate Change levy.

3905 - Surinder Tandon (Christchurch Multicultural Council Inc.)

[Strategic Direction > Other Policy Matters]

1. Christchurch Multicultural Council, along with our members, CALD agencies, Refugee Council and Hagley College, played a key role in campaigning for a Christchurch Multicultural Hub, which is now called Christchurch Multicultural Recreation and Community Centre (MRCC). We are grateful to CCC for funding to set up MRCC at the former Hagley Netball Centre. We appreciate the proposed allocation of \$1,257,000 for 2024-34 period for the development of MRCC facilities. We would like adequate resourcing of funds for the refurbishment and operation of MRCC for the wider community. 2. We would like to see continued implementation of Christchurch Multicultural Strategy goals. It is a fundamental document guiding the CCC and us to promote and celebrate the cultural diversity. 3. Christchurch Multicultural Council requests CCC not to disestablish its "Multicultural Committee". The latter has been found to be an effective medium: * for the implementation of Christchurch Multicultural Strategy; * for two-way communication with Christchurch Multicultural Council and other CALD agencies, NGOs, Government departments, ethnic community groups etc. for: - updates, community issues and needs, funding, events/workshops/conferences etc. 4. Increase funding to community groups for their activities which help to implement the goals of the Christchurch Multicultural Strategy. 5. CCC Strengthening Communities Together Strategy refers to Multicultural Strategy in its Pillar 1 Objectives 1.3 and 1.6 but should not replace the latter. The latter is a standalone document with goals and outcomes listed in detail. 6. CCC Multicultural Committee should continue to exist and fulfill its roles and services as before. Refer to Objective 1.3 of Strengthening Communities Together Strategy.

3941 - Georgina Stanley (Smith Street Community Farm Trust)

[Planning & Strategic Transport, Urban Design, & Urban Regeneration > City Planning]

Finding ways to develop funding schedules that support community organizations to be more resilient to change. Change happens not just from funding cuts but because of the unforeseen needs of communities. The increased density in our neighborhood as well as the cost-of-living increase means we now support a neighborhood three times the density we had three years ago. Supporting communities' organizations that are seeing rapid increases in neighborhood density to enable us to welcome new residents and support their need to put down roots and connect to their neighbors.

>>>

Opening up funding to communities that are experiencing rapid intensification. The change in residential density has impacts on both new residents and existing residents, supporting community organizations to grow with their communities.

3968 - Joseph Fullerton (UC Climate Action Club)

The Community Partnership Fund need further support. Set to disappear in July 2024, it is currently \$200k supporting community initiatives such as the Styx Mill Trust and Summit Road Society. We need this reinstated and the funding increased.

3987 - Suky Thompson (Garden of Tane Reserve Management Committee)

Submission Summary

The Garden of Tane Reserve Management Committee:

1. Thanks Christchurch City Council for the capital funding of the Garden of Tane development program to date.

- a. Projects to implement the Reserve Management Plan adopted in 2010 and improve the Garden of Tane have been developed and lead by the Reserve Management Committee with support from CCC Project Manager [REDACTED]
- b. We express our thanks to [REDACTED] for his work and support of the Committee
- c. These improvements have changed perceptions of the Garden of Tane from a gloomy, neglected and run-down asset into the premier reserve for Akaroa.
- d. They have enabled events such as the high profile and successful Lumiere d' Akaroa to be developed.
- e. They have enabled all infrastructure in the Garden of Tane (tracks, signs, seats, drainage) to be renewed, and the installation of a new nature playground including Maori carving and Te Reo and a large carving of Tane acknowledging the cultural heritage of Ngāi Tahu.

2. We request a budget is allocated to the Garden of Tane in the draft Long Term Plan 2024-2034 capital program.

- a. We understand from [REDACTED] that this is in the previous Long Term Plan \$100k had been allocated to the Garden of Tane in 2030-31
- b. We had asked for this to be brought forward and spread over 10 years at a rate of \$10k per year, to enable continued capital renewals in the Garden of Tane. We understand that [REDACTED] has put this forward as part of the internal process and support this.
- c. We have developed a Three Year Plan at the request of our Community Board to show how these funds would be used to further implement our Reserve Management Plan. This is largely through new planting of trees in areas where older canopy trees have fallen or are in very poor condition. We attach a copy of this plan to our submission.
- d. We submit that the funding allocated for July 2030-31 would be better used if it was brought forward and smoothed out over the intervening years.
 - It would be difficult for the committee to manage \$100k worth of projects in one year
 - Capital infrastructure improved since 2012 is likely to need renewals prior to July 2030
 - We suggest that these funds would be used much more effectively they were allocated at the level of \$10,000 per annum from July 2024 – 34
 - This will enable the committee to prioritise renewals and minor projects and continue improving the reserve at a level it can manage

3. We urgently request that Maintenance Service Levels are clarified and increased:

- a. We appreciate improved communication and response to problems since the locally based Community Parks team was established at Duvauchelle
- b. We have worked closely with the partnership staff member and with the team manager [REDACTED] to determine the maintenance service levels required and how we can assist as volunteers.
- c. We have nearly completed a project carried out in conjunction with City Care and [REDACTED] [REDACTED] to list all the assets of the Garden of Tane into the CCC asset management system.

4003 - Kristine Jolliy

[Grants & Funding > Events Ecosystem Funding]

Sail G.P has already so much \$ to hold their events. Russell Coutts makes so much profit from his events why should we financially support him?? Support small music events (Those that would struggle otherwise).

526 - Stephen French

I agree with most of the changes but would regret any reduction in support of charitable policies.

618 - Natalie Dixon

I'd like to see funding go towards streamlining some community managed facilities.

762 - Julie Nelmes

please include more community funding

Not Stated

1258 - John Chrisstoffels

Libraries > Libraries (Operations)

You mention libraries as a priority. The learning and diversity of expression is also a product of the Screen incentive fund involving writers, musicians, actors and a large section of the community.

1533 - Mark George

We still need to support community and those who help connect people. Isolation leads to societal problems that are avoided by helping people connect through the services council provides

2476 - Reuben Scott (Simeon Park Community Group)

More money for community groups and community led projects is always a priority.

2856 - Rachel Puentener

[Grants & Funding - Arts Centre Funding]

Mostly, except for not including the Climate Resilience Fund and the Arts Centre in the current funding proposals.

3222 - Mark Rayner

There are some events in Chch that seem to happen regularly and are Council Funded. Why is there such a mystery surrounding the Children's Christmas Parade.

>>>

If the council has an arm's length approach to the Chch children's Christmas parade could a cost exercise be carried out to see what it would cost if the council owned, housed and managed the attraction. With the cancellation of the A&P Show the week before the parade this year there will be some huge costs that need to be addressed. Please move the funding item into your annual budget. The volunteers do a great job and the location now at Curlets road means no more city road closures. The team should be given an allocation of funds that allows budgets to be set and works to. At the moment it is like a lottery that the council should be addressing seriously.

3411 - Marian Krogh (Protect Our Winters NZ)

Focus on outdoor related events

350 - Chris Hoopmann

[Grants & Funding > Arts Centre Funding]

There must be continued funding for cultural heritage which draws many tourists and locals out to enjoy the city. In particular, funding for the Arts Centre and Museum must be maintained (or better yet - increased!). If these assets are not properly funded or managed now, the costs will only become greater in the future. One of the community outcomes states "Our diverse communities are supported to understand and protect their heritage, pursue their arts, cultural and sporting interests, and contribute to making our city a creative, cultural and events powerhouse.". Any reduction of funding for key heritage such as the Arts Centre or the Museum is not compatible with the stated outcome.

840 - Kim Morton (Ōtautahi Creative Spaces)

Toi Ōtautahi: Continue to work with the partners of Toi Ōtautahi (Creative New Zealand, Ngāi Tahu, Rātā Foundation, Ara and University of Canterbury) to ensure there is an adequate operating budget for Toi Ōtautahi and that the strategy continues to be fully activated. We want to see Toi Auaha's potential fully activated too as a centre for arts organisations and artists in Ōtautahi. We really value the support we receive from the Council's arts advisors in implementing the strategy, which have led to amazing opportunities for our artists such as the display of their work in the city's light boxes and a ten-week artist in residence with ceramic artist Emma Turner.

Requests for Additional Grants & Funding

General Comments

115 submissions were received addressing requests for additional grants and funding.

1 comment supported, and 1 comment opposed.

114 comments made requests or suggestions for additional grants and funding, and 1 comment provided general feedback.

Officer Response

Submitters generally supported the retention of existing levels and categories of funding.

There were a number of submissions on the retention of the Environmental Partnership Fund and the Biodiversity fund, these have been covered in the "Other Funding" category.

Submissions covered the funding of events have been covered in the "events ecosystem" category.

The Airforce Museum of NZ has requested a capital grant of \$5m in 2028/29 as a Council contribution to a \$20m project to extend the facility to exhibit significant aircraft including the Orion and Hercules.

- The Airforce Museum of NZ. A one-off capital grant of \$5m is an additional cost to rates of 0.052%. Council could refer this application to the Funding Team for analysis and assessment, with Council decision making undertaken in the 2025/26 annual plan process.

One submission supports Council providing a one-off grant of \$300k to support maintaining the Old Lyttleton Tug.

- Old Lyttleton Tug. Staff recommend that Council refer the submitter to the Strengthening Communities Fund or the Capital Endowment Fund, prima facie this appears not to be a high priority.

The Santa Parade has requested permanent funding of \$125k p.a. toward organisational expenditure that ultimately supports a Christmas event, this equals 50% of the organisation's annual nett cost.

- Santa Parade Event. An annual grant of \$125k is an additional cost to rates of \$0.018%. The Parade currently receives approximately \$70-80k p.a. pa from a combination of the Strengthening Communities Fund and the Events & Festivals Fund. Staff recommend continuing the annual consideration of funding until the new event has bedded down, at which time staff will feel more comfortable recommending a multi-year funding agreement. Additionally, a significant portion of the requested funding is for financial assistance in running a building and storage facility and not directly related to the event outcome. Staff believe there may be more effective ways Council can assist the Santa Parade with this function, than a grant.

Ko Mahi Ko Ora has requested a grant of \$300k p.a. over three years to maintain and develop a number of organic waste management and sustainability initiatives.

- Ko Mahi Ko Ora. A grant of \$300k p.a. for three years is an additional cost to Council of 0.043% p.a. Staff recommend that Council refer the submitter to the Strengthening Communities Fund or the Capital Endowment Fund for analysis and assessment reporting back to Council with a recommendation.

A number of submitters supported the retention of the Screen Canterbury NZ Production Grant, a \$1.5m grant (over three years) to attract film production to Canterbury. This was provided through ChristchurchNZ out of Council's bulk funding for economic development.

- Screen Canterbury NZ Production Grant. ChristchurchNZ have proposed to stop the Grant in the course of re-prioritising its outputs in light of the resources available to them. Submitters should be referred to ChristchurchNZ who administer the Grant and therefore have the option to consider submitters feedback before finalising their decision.

The Governors Bay Jetty Trust have requested that Council provide a “top-up” grant of \$153k to reflect a desired 50% Council contribution to the Jetty project. They have also requested that Council forgive all interest on the community loan valued at approximately \$83,198 (on the current loan structure.)

- Governors Bay Jetty Trust. Staff will look for \$153k within the capital programme, in the draft LTP, set aside for parks and foreshore renewals and replacements. If this can be found there will be no additional cost to rates. It will reflect the 50:50 community partnership between Council and the Jetty Trust. Should Council support the payment of \$153k this will significantly lower the interest payable on the community loan as the \$153k will reduce the loan balance and interest charged.

The Youth Hub are in the process of making an application to the Capital Endowment Fund for \$2m as Council's contribution towards the development of phase two of the Youth Hub.

- The Youth Hub. Council staff have identified a portion of the Capital Endowment Fund in 2023/24, 2024/25 & 2025/26 to allow Council to support the Youth Hub at a level of up to \$2m, should Council choose to do so. This is over and above all other potential recommended uses of the Capital Endowment Fund in the draft 2024/34 LTP. There will be no additional cost to rates. Staff will present the application to the Capital Endowment Fund from the Youth Hub in the normal manner when ready.

Ferrymead Park have signalled that they will be making an application for increased funding of \$600k p.a. (total) for five years from 2025/26 in the 2025/26 Annual Plan process.

- Ferrymead Park. Council can consider any application for funding from Ferrymead Park in the 2025/26 Annual Plan in the normal manner.

Support

[Orana Park]

Keep the places like gondola tram orana Park willowbank going for a locals and tourist, ensure places are disability friendly

Oppose

1563 - Victoria Dabbs

To Whom It May Concern,

As representatives of the developing screen ecosystem here in the Canterbury region, we at Te Puna Matarau | Canterbury Screen Industry Association have united to bring the council's urgent attention to the removal of the Screen Production Grant from the proposed LTP and request its reinstatement.

In 2019, the Christchurch City Council led the country by becoming the first region to implement an incentive to attract film production to Waitaha Canterbury. The Screen CanterburyNZ Production Grant (SCNZPG) received a total of 1.5 million from city council over a period of three years, offering up to 200k for film and television productions who met eligibility criteria. For example, production teams were required to hire a percentage of local crew, and needed to have a certain level of finance in place. This initiative led to more than 50 inquiries, resulting in over 35 applications. Out of this, 11 productions were chosen with 9 productions completed and 2 more set to film in the next year.

The grant was a test case that proved an overwhelming economic success, attracting NZD \$12.5 million in production costs that stayed in the region. It generated economic revenue for our local crew - both above the line and below the line - as well as chain supply service providers including accommodation, catering, traffic management, vehicle and gear hire, and security services. It has developed the region's reputation as a service provider as well as our capacity to service future productions by providing this employment along with training and upskilling opportunities.

Despite these successes, the Screen CanterburyNZ Production Grant has now been removed from the budget of ChristchurchNZ in response to a request from council to cut back on costs. While we understand the need to meet the bottom line, **we also ask that the council weigh the economic, social, and cultural returns provided by the Screen CanterburyNZ Production Grant and reinstate the grant in full at \$1.5 million dollars. We also request that the grant is protected from leadership changes within either ChristchurchNZ or the Christchurch City Council by ensuring that the money is utilised strictly as intended through council and grant directives.**

Christchurch is not yet developed enough to compete with the infrastructure and crew depth offered by Auckland and Wellington. **Producers have repeatedly indicated that they will not consider filming their projects in our region without an incentive as it is not economically attractive or viable.** Other regions have taken our lead and are making strides in their screen production support services, which means we need to continue as an innovation leader in the sector, or we will be left behind. The progress we've made and the progress other regions have made is good for Aotearoa New Zealand as a whole, making our nation a far more attractive film destination, overall.

Te Puna Matarau and local guild members have played a very active role in consulting with the Screen CanterburyNZ manager to ensure the grant is fit for purpose. We believe the next

iteration of the grant could provide even greater outcomes by making a few simple changes such as requiring a higher percentage of local crew to be hired, opening up the grant to include post-production activities, and potentially allocating a form of advanced development funding to support Canterbury-based filmmakers with projects ready to move forward into production, post-production, or distribution. We also think it's necessary to include a more robust reporting structure, including an auditing process.

In 2023, Te Puna Matarau worked with Screen CanterburyNZ to create another first - the creation of the Waitaha Screen Story Incubator. This regional initiative supported the targeted development of 5 projects including film, TV, and one game - all of which are to be produced in Canterbury within the next 5 years. The program was developed alongside Script to Screen¹ with funding from the Screen CanterburyNZ Production Grant, NZ On Air, and the NZ Film Commission.

New Zealand Trade and Enterprise named Christchurch as the city with the most potential to service films with budgets over NZD \$100 million, citing council support as well as interest from private investors in developing studio space.² In 2022, the University of Canterbury committed \$95 million to developing its Digital Screen Campus.³ Production activity is essential to provide ongoing training and experience for these and other screen production students at Te Pūkenga|Ara, Yoobee, and the SIT Christchurch Campus. Without it, graduates will need to seek employment elsewhere, taking their capital and tax dollars with them.

We are asking you to reinstate the Screen CanterburyNZ Production Grant based on the overwhelming evidence of its success. It has returned a great deal to our city, our region, and to every single business and individual that has benefited economically.

Thank you for your careful attention to and deliberation on this matter.

Te Puna Matarau | Canterbury Screen Industry Association

Other

1095 - Paul Bingham

The request is simple: bring back the Environmental Partnerships Fund (or something like it) to keep the financial support steady as it was in the 2021/23 plan. Allocate \$30k to keep the Te Kakahu Kahukura programme thriving, \$50k a year to push forward the Pest Free Banks Peninsula elimination efforts, another \$40k annually for getting rid of feral ungulates on Banks Peninsula, and lastly, \$30k each year to cover operational costs for the Banks Peninsula Conservation Trust so they can keep coordinating these crucial collaborative projects.

1220 - Jake Slaney

Continued funding of the Screen Canterbury Production Grant is a financial no brainer. There is 12.5 to 1 investment return. If raising rates means continuing to fund a successful program, then by all means spend that revenue wisely.

>>>

Do not remove the Screen Canterbury Screen Production Grant.

>>>

Maintain and continue the Screen Canterbury Production Grant.

1258 - John Christoffels

I am happy to pay a little extra on my rates in order to retain the Screen Incentive Fund

>>>

Please do not remove the Screen Incentive Grant as a saving measure for the LTP without considering the financial and cultural implications as laid out. I feel that we need to ensure grants that make the city money, like the Screen CanterburyNZ Production Grant, continue. This grant has provided an incredible \$12.5 million return on a \$1.5 million investment, providing jobs and spend in our region

>>>

The Screen Incentive Fund has the power to create and attract significant, internationally renowned projects that enhance and consolidate the reputation and mana of the garden city. If we want to be a cultural powerhouse city, we need to focus on the arts which includes screen production activities. I feel that the Screen CanterburyNZ Production Grant allowed filmmakers, TV creators, and game developers to get the support they need to create projects that will be created and produced in our city and region. I feel this grant must be added back into the budget.

>>>

No. The Screen Canterbury Screen Incentive Fund ought to be retained in the LTP. I don't feel that we can become a cultural powerhouse by allocating only 1% to the arts. We've worked hard to develop screen production in Ōtautahi and that is now in serious jeopardy. The Screen CanterburyNZ Production Grant had an initial investment of \$1.5 million dollars and has generated a return of \$12.5 million dollars - that's \$12.50 for every dollar spent. This money stayed in the region through crew salaries, transportation, accommodation, hospitality and other businesses. It has been incredibly successful. It isn't in the Long Term Plan and as an investment that generated a return, I feel it needs to be included.

>>>

I feel that the Screen CanterburyNZ Production Grant is critical to the continued development of the screen ecosystem in our city and our region. It is necessary and urgent that it is put back into the budget and protected from future interference as it has proved very successful. Without it, there will be very little or no production activity here. Early market research that went into supporting the grant showed that producers would not come to Ōtautahi Christchurch without an incentive. We are still developing our infrastructure and our crew depth and as such, are not able to provide the same service and support as studios in Auckland and Wellington. Without the grant, we will be unable to attract the level of production we've had over the last two years and will be left behind.

Cultural, arts and creative industries need nurturing and support. The foothold of retaining the growth in the local screen industry is greatly enhanced by the Incentive Fund and would be an economic and cultural tragedy if lost. Do you want to see talent people leave Christchurch due to this loss?

1283 - Jason Reekers (Christchurch Children's Christmas Parade Trust)

Please include the Christmas parade as line item funding. The parade is currently on annual consideration funding. This is to the detriment of the parade and gives no security to our Trustees, large building on council land (QEII) and the assets contained within.

[Full attachment available]

1298 - Jason Reekers

Please help fund our city's Christmas parade with annual line item funding. This historic event deserves support after 76 years of service to the city.

1477 - Janey Hughes

[Strategic Direction>Have we got the balance right?]

No, the previous investment in the Film Industry opened up new opportunities for local residents and ratepayers. Provided experiences that have been woefully missing. Keep the industry vibrant in Canterbury by continuing to support financially in your Long Term Plan. No. I don't feel that we can become a cultural powerhouse by allocating 1% to the arts. We've worked hard to develop screen production in Ōtautahi and that is now in serious jeopardy. The Screen CanterburyNZ Production Grant had an initial investment of \$1.5 million dollars and has generated a return of \$12.5 million dollars - that's \$12.50 for every dollar spent. 1517 - Felix Harrison

Supporting local community projects that promote sustainability our diverse cultures and the arts

1560 - Bailey Peryman (Kō Mahi Ko Ora (c/- Nōku Te Ao Charitable Trust))

13. Council has clear policy relating to food resilience, sustainability and climate resilience.

14. The benefits of this policy framework have mostly focused on small, city-based initiatives. Equitable levels of funding and resourcing should be available for Te Pātaka o Rākaihautū communities compared with Christchurch City.

15. Through the Sustainability Fund, CCC has supported recent trials conducted by 20:20 Compost to develop community-led solutions for the beneficial reuse of organics that achieve food resilience outcomes. Small grant funding has been accessed from Te Pūtahitanga o Te Waipounamu (Koanga Kai) and Lotteries Community Grants.

16. Te Pā o Rākaihautū and Nōku Te Ao have been co-design partners to 20:20 Compost trials from its inception. Seed the Change | He Kākano Hāpai are also key supporters of the project providing administrative, insurance and strategic support.

17. Kō Mahi Ko Ora is the entity continuing to expand on the success of the 20:20 Compost trials under the governance of Nōku Te Ao.

18. The parent organisations Nōku Te Ao and Te Pā o Rākaihautū are expressly educational entities. The integration of students into kaitiaki training and action learning in the lease area is essential to Kō Mahi Ko Ora's model. This is opening a door to intergenerational kaitiakitanga in this area for decades, if not centuries to come.

19. The work of Kō Mahi Ko Ora is actively contributing towards the Pā Wānanga vision shared above, and this is already familiar within parts of Council, but many staff may not be aware of how interconnected the various entities and projects are.

20. Kō Mahi Ko Ora have managed the Nōku Te Ao lease on 30 hectares within the Red Zone for nearly four years now and are in the process of working with CCC Parks staff to renew the terms associated with this arrangement.

21. Significant milestones have been reached with the project in the Red Zone and on Te Pā's temporary site in Linwood. There is potential for impact on a larger scale but are limited by the support available through community grants.

22. In addition to the food resilience and sustainability outcomes to date, Kō Mahi Ko Ora has built further site-specific experience regarding contaminated land, soil and water in the Red Zone. This is because the techniques for building healthy soil for food production in urban areas are also effective at remediating compaction and contamination in soils.

23. There are wider issues to do with soil compaction and contamination that impact on stormwater management and water quality concerns for waterways and significant water bodies in the Ōtākaro-Avon and Ōpāwaho-Heathcote / Te Ihutai catchment. Cultural and community health and wellbeing is directly impacted by these issues.

24. The project would like to operate on a higher level and has demonstrated its sustainability to date. More detailed information is already in the hands of Council staff in the activity areas of Resource Recovery, Parks, Sustainability and Property.

25. There is an opportunity to leverage Council's existing spend, assets and resources to level up the impact of our community-led programmes by making a more strategic, longer-term commitment.

26. Kō Mahi Ko Ora sees short, medium and long-term benefits in doing this for Council and the community, particularly given the prohibitive and rising costs associated with remediating contaminated land.

27. In the short term, Kō Mahi Ko Ora has proven methods for diverting organics from landfill that achieve land remediation as well as educational and cultural outcomes. This can continue to work in complementary ways with the proposed new Organics Processing Plant but requires a more sustained commitment to partnership from Council.

a. Kō Mahi Ko Ora's work can still complement the proposed new Organics Processing Plant, but would like to work in partnership with CCC to extend our model to other parts of the region, including Te Pātaka o Rākaihautū - therefore reducing the burden on the existing and proposed new OPP, and the need for expensive infrastructure in other smaller towns in the region.

b. Kō Mahi Ko Ora team members were contributing authors to a successful MfE Waste Minimisation Fund application to deliver small to medium scale organics infrastructure pilots nationwide - this is worth \$1M and starts in July 2024. Financial support from CCC through the LTP would help to secure a pilot in the Waitaha region.

28. In the mid-term, there is an opportunity to scale these techniques to support the statutory requirements for consenting regeneration projects in the Ōtākaro Avon River Corridor. There are applications in multiple other contexts where land and water contamination is a problem related to urban regeneration.

29. In the long-term, given the immediacy of sea-level rise impacts, managed retreat and the resulting land remediation work to address these hazards – investing in methods proven at small-scale now will provide lead-in time required to meet the large-scale challenges associated with climate change and population growth in the region.

30. There are global implications for this work – particularly given the unique opportunity to leverage proof of outcomes from the significant investment in urban regeneration made in this city since the 2010-2011 Canterbury Earthquakes.

31. Urban regeneration is a global challenge attracting significant investment, and community-led solutions are often at the leading edge of innovation that seldom gets the chance to integrate, scale and collaborate well within the investment cycles of Local and Central Government.

32. The resources Kō Mahi Ko Ora needs to level up are a commitment to partnership from CCC and financial support that will enable:

a. Pure funding for developing and scaling the project – e.g. contract for services – rather than contestable funding that constrains and dilutes the impact.

b. Implementation of an additional level of sampling and analysis of soils, supporting four years of results and evidence from methods that do not require large earthworks, excavation and removal of large volumes of soil from site.

c. Regular engagement with CCC and local authorities at a higher level of information exchange, partnership and collaboration than grant funding arrangements.

d. Ko Mahi Ko Ora needs the security of 3 years of funding at \$300,000 per annum through a bespoke relationship agreement for the above to be achieved.

e. Beyond this, Kō Mahi Ko Ora sees the need for bespoke funding to diminish then no longer be required as a result of efficiency gains and increased effectiveness in the delivery of community outcomes.

[Coder Note: Full attachment available]

1573 - Oliver Denman

We've worked hard to develop screen production in Ōtautahi and that is now in serious jeopardy. The Screen CanterburyNZ Production Grant had an initial investment of \$1.5 million dollars and has generated a return of \$12.5 million dollars - that's \$12.50 for every dollar spent. This money stayed in the region through crew salaries, transportation, accommodation, hospitality and other businesses. It has been incredibly successful. It isn't in the Long Term Plan and as an investment that generated a return, I feel it needs to be included.

>>>

I feel that we need to ensure grants that make the city money, like the Screen CanterburyNZ Production Grant, continue. This grant has provided an incredible \$12.5 million return on a \$1.5 million investment, providing jobs and spend in our region.

>>>

If we want to be a cultural powerhouse city, we need to focus on the arts which includes screen production activities. I feel that the Screen CanterburyNZ Production Grant allowed filmmakers, TV creators, and game developers to get the support they need to create projects that will be created and produced in our city and region. I feel this grant must be added back into the budget.

>>>

I feel that the Screen CanterburyNZ Production Grant is critical to the continued development of the screen ecosystem in our city and our region. It is necessary and urgent that it is put back into the budget and protected from future interference as it has proved very successful. Without it, there will be very little or no production activity here. Early market research that went into supporting the grant showed that producers would not come to Ōtautahi Christchurch without an incentive. We are still developing our infrastructure and our crew depth and as such, are not able to provide the same service and support as studios in Auckland and Wellington. Without the grant, we will be unable to attract the level of production we've had over the last two years and will be left behind.

1621 - Andrew Gunn

Thanks for considering this submission. I'm going to be sticking to a single issue which I'm particularly familiar with - namely the reinstatement of the Screen CanterburyNZ Production Grant in the Long Term Plan. In terms of the overall balance I would say that unless you're committed to a bare-basics drains-and-potholes model, cutting this sort of (relatively low) spend is unnecessary. Here is a grant that has seen a many-times-over return on investment. It makes sense to keep it.

>>>

We want Christchurch to be both a vibrant centre for culture and the arts, and to prosper economically. The screen industry lies at the intersection of these aspirations. A strong, thriving screen industry will be good for the city and the region, for arts and the economy. The Screen CanterburyNZ Production Grant has already given filmmakers, TV creators, and game developers the support they need to create projects that will be created and produced here. It's been a great start - let's keep it up.

>>>

I'm attaching a letter from Te Puna Matarau | Canterbury Screen Industry Association - of which I am on the executive - which sets out a more detailed case for the retention of the Screen CanterburyNZ Production Grant. The grant is not simply a 'nice-to-have' - it has already more than returned its original cost and it provides vital support to the growing local screen industry. It makes good sense to keep it.

I'm concerned that the Screen Production Grant is not in the latest LTP. This is vital to our local film and creative industries.

>>>

The Art Centre and Screen Canterbury are underfunded. I don't see a meaningful investment in the arts in your future plans.

>>>

Bring back the Screen Production grant and support our film industry.

>>>

Keep the Screen Production Grant alive!

1843 - Jessi Morgan (Predator Free New Zealand Trust)

The Predator Free New Zealand Trust would like to acknowledge support that the Christchurch City Council has given to the Pest Free Banks Peninsula project and other community led conservation projects in Christchurch. We are seeing a groundswell of support for predator free activities from Christchurch residents and we encourage the council to support these initiatives.

Predator Free 2050 is an aspirational goal to remove introduced predators from Aotearoa New Zealand to enable our native biodiversity to thrive. But it has benefits much wider than biodiversity including in primary production, community resilience, wellbeing, connection to nature and more.

The Pest Free Banks Peninsula project is one of a small number of large landscape projects around the country making significant contributions to the national goal in terms of technical learning and community engagement.

We encourage the city council to support community conservation initiatives in Christchurch and Banks Peninsula not only to help support native biodiversity but to ensure residents are able to reap the wider benefits too.

Specific responses to directions signalled in the Draft LTP 2024/2034

PFNZ supports the Council working towards a green liveable city and advocates that all goals relating to climate resilience, protecting and regenerating the environment (especially indigenous biodiversity), water bodies, and tree canopy, apply to all of Banks Peninsula (including the Port Hills) as well as urban Christchurch.

PFNZ support the strategy documents that underpin the Draft LTP especially where nature-based solutions and enhancing indigenous biodiversity have been given preference including: Otautahi Climate Resilience Strategy; Otautahi Urban Forests plan; Te Pātaka o Rakaihautu/Banks Peninsula Destination Management; Banks Peninsula Community Board Plan 2023-25; and Whaka- Ora/Healthy Harbour Plan.

PFNZ supports the Council's continued provision of the Christchurch Biodiversity Fund to support protection of high value indigenous biodiversity on private land. However, we know that demand for this fund is high with many private landowners

highly motivated to protect and enhance biodiversity and we would advocate for this fund to be increased to reflect this demand. There is very little support available for protecting indigenous biodiversity on private land so it is an area that Christchurch City Council can have a significant impact.

PFNZ is concerned that the proposed removal of the Environmental Partnerships Fund (EPF) will have a significant negative impact on the ability of community-led organisations to deliver conservation outcomes for the benefit of current and future generations of Christchurch City residents. We know that supporting and enabling these community led organisations is hugely important for residents to connect to their biodiversity. Funding for these groups is scarce and removing the contribution from CCC may see many of these groups cease to exist. We would strongly advocate for the ongoing operation of this fund.

We are concerned that the 21 partner Port Hills-focused Te Kakahu Kahukura (TKK) programme will lose funding at a time when it is most needed. Following another Port Hills fire the important role of this community-driven programme in supporting landowners has never been more clear. If appropriately resourced this community-led programme can support: ecological recovery from fire damage; proactively plan for fire risk mitigation of existing and future indigenous biodiversity across the Port Hills; and establish an ecologically robust Port Hills forest that is a biodiversity hub for Christchurch City, with significant climate resilience benefits.

We are concerned that Council's grant via the EPF to Pest Free Banks Peninsula elimination and feral ungulate programmes have been discontinued. This will have a significant impact on the ground. Reincursion of animal pests will occur and the investment of CCC – not to mention the incredibly hard work of so many in our communities - will be undone.

We are also concerned that the removal of an EPF grant supporting the Banks Peninsula Conservation Trust's operational costs means their organisational focus has to shift towards securing new funding to "keep the lights on". This puts pressure on the BPCT's ability to provide the strategic leadership, support and facilitation for collaborative community-led programmes like TKK and Pest Free Banks Peninsula. Nationally it has shown that these "connector" organisations are hugely valuable and ensure effort and funding is coordinated and strategic, they minimise duplication and ensure the groups are connected and aligned.

The Rod Donald Banks Peninsula Trust seeks in addition:

- Retaining, rather than removal, of grant support for Banks Peninsula Conservation Trust's operational costs, so they can focus on their leadership and facilitation of collaborative community-led programmes rather than searching for funding to "keep the lights on". An annual contribution of \$30K.
- Retaining, rather than removal, of funding for Pest Free Banks Peninsula so that re-incursion of animal pests (such as goats) does not occur. An annual contribution of \$50K for the programme and \$40K for feral ungulate removal.
- Funding for Banks Peninsula Geopark so that the stories of what makes Banks Peninsula so special can be shared
- Funding for Orton Bradley Park
- Funding for Te Kākahu Kahukura (TKK) programme – an annual contribution of \$30K. After the third Port Hills fire the role of this community-driven programme in supporting landowners has never been more vital. If appropriately resourced, this community-led programme can support: ecological; proactively plan for fire risk mitigation of existing and future indigenous biodiversity across the Port Hills; and establish an ecologically robust Port Hills forest that is a biodiversity hub for Christchurch City, with significant climate resilience benefits.
- Funding and a stronger commitment to reducing carbon/climate change emissions, including grant funding to support EV charging facilities on Banks Peninsula

We've worked hard to develop screen production in Ōtautahi and that is now in serious jeopardy. The Screen CanterburyNZ Production Grant had an initial investment of \$1.5 million dollars and has generated a return of \$12.5 million dollars - that's \$12.50 for every dollar spent. This money stayed in the region through crew salaries, transportation, accommodation, hospitality and other businesses. It has been incredibly successful. It isn't in the Long Term Plan and as an investment that generated a return, I feel it needs to be included.

>>>

I feel that we need to ensure grants that make the city money, like the Screen CanterburyNZ Production Grant, continue. This grant has provided an incredible \$12.5 million return on a \$1.5 million investment, providing jobs and spend in our region.

2109 - Te Aomihia Te Huia

22 - Grace Colcord

Personally, we need more funds for Arts and creativity, especially for diverse communities of Maori, Pacific and Queer peoples. Creativity is thinking outside of the box, and as minorities who lives are usually there, creativity becomes our livelihoods. These initiatives give value to the huge communities, that ultimately make for a safer, healthier society we can all be part of.

2269 - Lyn Leslie (Te Pātaka o Rākaihautū Banks Peninsula Community Board)

The Board supports 15 Reserve Committees within Te Pātaka o Rākaihautū Banks Peninsula. The Board is concerned that there appears to be nil funding for these committees (Regional Parks) past FY25/26. The Board seeks reassurance that the Board's Reserve Committees will be funded and supported beyond FY25/26 with a dedicated line budget. Part of the support for the Board's Reserve Committees would include the completion of Te Pātaka o Rākaihautū Banks Peninsula Reserves Management Plan. This has been a work in progress for quite a bit of time. It would be excellent for the Board to see the Plan completed so as to enable the Board's Reserve Committees to have access and use.

2337 - Kevin Parthonnaud

- Requests the reinstatement of the Environmental Partnerships Fund (or a similar grant vehicle) to continue funding at the same level as the LTP 2021/23, or increase and be linked to annual inflation, for the following:
- The continuation of an annual contribution of \$50k to support the Pest Free Banks Peninsula elimination programme.
- The continuation of an annual contribution of \$40k to support feral ungulate removal on Banks Peninsula.
- The continuation of an annual contribution from the Environmental Partnerships Fund of \$30k towards BPCT operational costs so they can continue to facilitate these strategically important collaborative programmes.
- The continuation of an annual contribution of \$30k to support the Te Kakahu Kahukura programme.

2409 - Dame Sue Bagshaw (Youth Hub Trust)

Thank you for the opportunity to submit on the Christchurch City Council Draft Long Term Plan 2024-2034.

As we outlined in our Annual Plan submission, the Youth Hub Trust is currently constructing New Zealand's first purpose-built Youth Hub with supported housing facilities at 109 Salisbury Street in central Christchurch. The Hub will deliver everything Christchurch's young people need to improve and maintain their mental health, from supported housing and health and support services to recreation and creativity.

We appreciate the tough economic environment the Council, like all of us, is facing and the need to keep rates as low as possible.

However, it is untenable that the Council does not make a capital contribution to this project. This project is not a 'nice-to-have', it is a 'must-have' if we are to turn around the deteriorating rates of youth mental health and wellbeing in our city.

We note that Youth Hub Christchurch directly aligns with your guiding vision where there are opportunities for everyone and where we do things in different ways.

It also aligns with your strategic priorities around being an inclusive and equitable city prioritising wellbeing, and actively balancing the needs of today's residents with the needs of future generations – with the aim of leaving no-one behind.

Likewise, it directly aligns with your community outcomes, including:

- *A collaborative confident city* – the Youth Hub will see more than a dozen youth service providers working together and sharing costs and will provide young people with a safe space and a sense of belonging.
- *A cultural powerhouse city* – the Youth Hub will be a place where young people can come and have fun, pursue arts, cultural and recreational interests – and while they're there get the help and support they need.
- *A thriving prosperous city* – the Youth Hub is a place where everyone, no matter their start in life, can grow their potential.

As part of the Long Term Plan, we would like the Council to make a capital contribution of \$2 million from the Capital Endowment Fund towards construction of the remaining stages of the Youth Hub.

This contribution would go towards the design and construction of a second wing of youth housing, and communal spaces for education and training, creativity, music, performance and events.

These facilities are essential for completing the Trust's vision of a holistic, one-stop model for positive youth development and fill a much-needed gap in Christchurch around having youth focussed facilities available.

We commend the Council for some of the excellent facilities now available for families of young children such as the Margaret Mahy playground, but we ask what is there specifically for youth? We also note most of the Gap Filler activation spaces which catered to youth, are now being re-developed.

We also highlight the urgent need for safe, youth-only supported housing facilities in Christchurch as an alternative to young people, especially those with small children, languishing in motels.

By providing this funding in the 2024/25 financial year, the design of stage two can be commenced prior to stage one completion in July 2024, allowing construction to be continuous. Continuing the construction will allow the Trust to minimise costs relating to demobilising and then remobilising the construction site. It also provides continuity to the contractors working on the site and will provide a greater chance of the Youth Hub being completed within the timeframe of its current resource consent.

We believe Youth Hub Christchurch will be a much-valued facility for Christchurch's rangatahi. We would welcome the Council becoming a key project funder, alongside our other key funders: Crown Infrastructure Partners, Anglican Care, the Wayne Francis Charitable Trust, the Rātā Foundation and the NZ Lottery Grants Board.

We have a real opportunity with Youth Hub Christchurch to do things differently, create a caring community and invest in our city's future. We hope you agree.

Thank you again for the opportunity to submit on the Draft Long Term Plan. We request a verbal submission and offer an invitation to show staff and councillors around the site at their convenience.

I have included background information about the project in the appendix of our submission.

[FULL ATTACHMENT AVAILABLE]

2410 - Lydia Thomas

I would like to express my support for the following organizations, which require future funding as they bring immense importance to our city: Watch This Space: Their support and education around street art are extremely special and unique to our city. Life in Vacant Spaces and Gap Filler: These grassroots organisations support a large number of community organisations and groups, helping to

create an accessible city.

2453 - Bruce Gordon

As an organisation providing a major entertainment event we would like to be considered for long term funding.

2465 - Nicky Snoyink (Forest and Bird)

Forest & Bird seek that funding for the work that was achieved as a result of the Jobs for Nature funding is, at the very least, maintained so this much needed work can continue.

2476 - Reuben Scott (Simeon Park Community Group)

We would like the Simeon Street connector to be added to the LTP to be funded by council (since the government won't).

2490 - Jessica Todd

No. I don't feel that we can become a cultural powerhouse by allocating 1% to the arts and to have the Screen CanterburyNZ production grant be a part of the future LTP. We've worked hard to develop screen production in Ōtautahi and that is now in serious jeopardy. The Screen CanterburyNZ Production Grant had an initial investment of \$1.5 million dollars and has generated a return of \$12.5 million dollars - that's \$12.50 for every dollar spent. This money stayed in the region through crew salaries, transportation, accommodation, hospitality and other businesses. It has been incredibly successful. It isn't in the Long Term Plan and as an investment that generated a return, I feel it needs to be included. The last 6 months have already seen a significant drop of film work in the region since the original grant has been fully spent and I have had to relocate back up to Auckland in order to keep working. I don't want to live here, I want to live and work in Ōtautahi.

>>>

I feel that we need to ensure grants that make the city money, like the Screen CanterburyNZ Production Grant, continue. This grant has provided an incredible \$12.5 million return on a \$1.5 million investment, providing jobs and spend in our region.

>>>

If we want to be a cultural powerhouse city, we need to focus on the arts which includes screen production activities. I feel that the Screen CanterburyNZ Production Grant allowed filmmakers, TV creators, and game developers to get the support they need to create projects that will be created and produced in our city and region. I feel that the Screen CanterburyNZ Production Grant is critical to the continued development of the screen ecosystem in our city and our region. It is necessary and urgent that it is put back into the budget and protected from future interference as it has proved very successful. Without it, there will be very little or no production activity here. Early market research that went into supporting the grant showed that producers would not come to Ōtautahi Christchurch without an incentive. We are still developing our infrastructure and our crew depth and as such, are not able to provide the same service and support as studios in Auckland and Wellington. Without the grant, we will be unable to attract the level of production we've had over the last two years and will be left behind.

[Full attachment available]

2525 - Adrienne Kimberly Georgine

[Strategic Direction>Have we got the balance right?]

No. I don't think you have. You have stated that you want Christchurch to be a "Cultural Powerhouse" but have literally nothing that I can see in the budget for the arts or artists. If so, which category is it under? 1% in Art galleries and museums? Cultural powerhouses don't create themselves, nor do they come from artists working for free but come from artists who choose to live and practice in their city. No investment certainly means that we will not be a cultural powerhouse. We've worked hard to develop screen production in Ōtautahi and that is now in serious jeopardy. The Screen CanterburyNZ Production Grant had an initial investment of \$1.5 million dollars and has generated a return of \$12.5 million dollars - that's \$12.50 for every dollar spent. This money STAYED IN THE REGION through crew salaries, transportation, accommodation, hospitality and other business. It has been incredibly successful.

>>>

I feel that the Screen CanterburyNZ Production Grant is critical to the continued development of the screen ecosystem in our city and our region. 2539 - Celia Stewart (Christchurch School of Music | Te Kura Puoro)

Christchurch School of Music | Te Kura Puoro

The largest arts organisation in Ōtautahi Christchurch you've hardly heard of!

The Christchurch City Council wishes to make sure that our city is:

- A collaborative confident city
- A green liveable city
- A cultural powerhouse city
- A thriving prosperous city

The [Christchurch School of Music | Te Kura Puoro](#) (CSM) is nearly 70 years old, and teaches music to over 1000 learners who, although largely of school age, do range from 2 years old to 92 years old. This music teaching is free to low decile school pupils, and free or discounted for scholarship-winning students and those with Community Cards. We believe it is unique in Aotearoa New Zealand with no other such community music organisation providing as much learning to as diverse a group of students in any other city or regional centre.

It is a little-known jewel in the crown of the City and, **with the support of the City**, will be a key pillar to support our aim to be a **cultural powerhouse** city.

This submission to the Christchurch City Council's Long Term Plan requests that the City Council provides support to make sure that this powerhouse music organisation thrives and continues to contribute to the City for a further 70 years.

"We support opportunities to create and to experience the arts across a range of places and spaces so that a diversity of art forms and cultures are visible, ideas can be tested and shared, and the city and region is activated."

– CCC objective under its aim to be a cultural powerhouse city.

Supporting the Performing Arts

The CSM is a not-for-profit registered charity, which runs on a very thin margin and raises money to achieve its goals. Among many things, it is working on raising funds to build a building to meet core educational and community needs, and also to run day to day operations. The City Council kindly considering providing land for the CSM but is unable to support the organisation with capital investment for a sorely needed permanent home for the School. However, the City Council does have the option of supporting the CSM's **operational costs** with **in-kind** support. This would make a significant difference for to the CSM.

This amazing organisation has nurtured and developed many thousands of its music students over its 70 years, remains unique in the country, and can take a stronger role in achieving cultural powerhouse status, and supporting inward migration of talented individuals and families.

What support is the CSM seeking from the City?

The CSM currently has about fifty performances a year for families, members and the public. These are currently run in an extremely varied and variable set of locations outside of the City centre.

The City Council could make a significant contribution to ensuring that the CSM is able to support the activation of the Central City by providing performance venues free of charge.

This would not impact the capital investment programme for the City Council but would go a long way to ensuring the CSM remains viable, a jewel in the arts crown of the city and meeting the objectives of the City Council.

The City Council could also support the CSM and the City through promotional activities which benefit both and raise the profile of the City's cultural credentials and experiences both domestically and abroad.

The Christchurch School of Music Youth Orchestra, also known as the Christchurch Youth Orchestra (CYO), is a remarkable ensemble comprising talented young musicians aged twenty-five and under. It has toured in Australia and throughout New Zealand delighting audiences wherever it goes and winning awards. Although the youth orchestras in Auckland and Dunedin receive direct targeted annual financial support from their territorial authorities, the Christchurch Youth Orchestra does not. In-kind support for this orchestra in particular would build the reputation and reality of being a powerhouse cultural City.

Talk to the CSM

We would welcome a discussion about how the City Council might support the CSM with in-kind support.

Governors Bay Jetty Restoration Trust's submissions to LTP

Our submission is as follows:

1. The Trust requests that Council pay the final \$153,977.50 towards the project to represent the balance of Council's half share in the finalised total project cost. If the Council agrees to 2 and 3 below (so that no further interest accrues), this amount be equally spread over the remaining years of the loan term (to 30 June 2027).
2. The Trust requests that Council reimburse the trust a further \$22,750, being the interest costs on the community loan incurred to 31 January 2024. If Council agrees to this and 3 below, this can also be spread across the next three years.
3. The Trust requests that the Council agree to reduce the interest rate on the community loan to zero from 1 February 2024 until term expiry (2027).

To summarise points 1 – 3 above, the Trust requests that Council reduces the community loan interest rate to zero from 1 February 2024 and contributes the following amounts towards reducing the balance of the Trust's loan from the Council over the next three years:

- a. 2024/2025: \$58,909
- b. 2025/2026: \$58,909
- c. 2026/2027: \$58,909

The jetty having been completed, these payments are final amounts and including them in the LTP aligns with Council's strategies to partner with the voluntary sector. The financial contributions of these amounts reflect a 50/50 sharing of the final total project cost.

The jetty story is a success story and will provide inspiration to other communities and groups in Christchurch to collaborate and engage. Te Haumako; Te Whitingia Strengthening Communities Together Strategy 2022 provides a commitment by Council to partner with and work alongside the voluntary sector. The jetty story is first hand evidence of this commitment being met. Our partnership was formed, the Trust took on the project management, a massive amount fundraising was done by Trust (and continues to be done), the jetty was rebuilt, and this submission to the LTP is now the epilogue to the story. The Trust has never had employees and all the work it does is on an unpaid volunteer basis.

[Full attachment available]

2544 - John Bannock (Governors Bay Community Association)

Please consider closing off and finalising the loan made to the Governors Bay Jetty Restoration Trust, this asset is now used by many residents of urban Christchurch on a daily basis.

>>>

[Parks > Parks Paths & Walkways]

The GBCA also asks that the loan to the Governors Bay Jetty Restoration Trust for the restoration of the jetty is fully resolved by Council. The jetty is now an important asset for Christchurch residents and visitors who regularly visit the jetty, including enabling kayaking for children and walking the Governors Bay foreshore track. The foreshore track needs greater maintenance to improve access for the wide range of people who currently use it from across the city.

2610 - Keith Harris (Akaroa District Promotions (ADP))

Purpose This submission is from Akaroa District Promotions (ADP), which has been active in marketing and developing tourism in Akaroa and the Bays for over 30 years. This ADP submission seeks funding from Council's Long Term Plan for a three year commitment to funding. During that time, we believe the Council should seek to implement a targeted rate to facilitate regenerative tourism in Akaroa and the Bays (including Little River). Funding mechanisms such as this have been shown to work well in places such as Arrowtown https://s3-ap-southeast-2.amazonaws.com/ehq-production-australia/ebfad83d77cc409f2d2f7ddd85e0490191602e41/original/1650577192/334007a46b66e710fc2f194797771601_APBA_Annual_Plan_22-23_FA_Lowres_spreads.pdf?1650577192 and Fielding District Promotions

>>>

What are we requesting? We call on funding within the Long-Term Plan to support the aspirational vision of Banks Peninsula as a Regenerative Destination. This will not succeed without direct local input. Akaroa is the Jewel in that Crown, therefore in our case we seek \$100,000 a year for Akaroa District Promotions to employ staff to propel the concepts of the DMP forward. We see considerable synergies with the DMP. Staff would develop destination product offerings, experiences, itineraries, narratives, particularly Māori and early colonial, and events for the family oriented and academic traveller to Peninsula communities.

2615 - Virginia Wright

No. I think it's a mistake to remove the \$1.5 million dollar Screen Canterbury/NZ Production Grant from the long term plan. As one who has benefited from it I can attest to its positive benefit on both sides: when submitting to the NZFC for the feature documentary with the working title 'fiftyone', now called 'project fiftyone' was a deciding factor in our favour in the competitive round in which we were allocated funding to make the film. It's a Christchurch story of healing and humanitarian work in the wake of the Mosque attacks in 2019 that brings some light back into that tragic day. Without the grant it would not have been made. We returned the dividend to the region as required and we added a significant premium of cultural capital. We are proud to be part of the generated return of \$12.5 million dollars on the initial investment of \$1.5 million dollars. This money stayed in the region through crew salaries, transportation, accommodation, hospitality and other businesses. Given that as an investment it generated the desired return and more I would like to see it returned to the Long Term Plan. (As an aside I've heard a lot of talk about The Cleaner, a high-end drama series also shot in Christchurch that would not have come to our region at all if not for the grant. It puts our post-earthquake Christchurch on the map in a way that nothing else can, domestically and internationally, which also brings cultural capital as well as tourism gains.)

>>>

I reiterate my comments about keeping the Screen Canterbury/NZ Grant. It pays for itself and more in the return to our regional economy. That return not being in a straightforward hard Cash deposit in the bank makes it more difficult to grasp how successful it is in economic terms but the more than \$5 for every \$1 dollar invested argues strongly that it should be retained.

>>>

Given that the return on the \$1.5 million investment has thus far been \$12.5 million through jobs for people in the screen industry who live and work in Christchurch and Canterbury, as well as in general spending through outside crew and cast staying in the region, then keeping the initial investment in order to keep that money flowing into the council coffers makes sense. Removing the grant is effectively removing \$11 million of the money available to the council to meet its costs. (\$12.5 m minus the initial investment of \$1.5m).

>>>

As a member of the local screen production industry who grew up in Auckland and who at different times in my career have had to commute to Auckland to work I reiterate what I have stated previously. I think it's a mistake to remove the \$1.5 million dollar Screen Canterbury/NZ Production Grant from the long term plan. As one who has benefited from it I can attest to its positive benefit on both sides: when submitting to the NZFC for the feature documentary with the working title 'fiftyone', now called 'project fiftyone' was a deciding factor in our favour in the competitive round in which we were allocated funding to make the film. It's a Christchurch story of healing and humanitarian work in the

wake of the Mosque attacks in 2019 that brings some light back into that tragic day. Without the grant it would not have been made. We returned the dividend to the region as required and we added a significant premium of cultural capital. We are proud to be part of the generated return of \$12.5 million dollars on the initial investment of \$1.5 million dollars. This money stayed in the region through crew salaries, transportation, accommodation, hospitality and other businesses. Given that as an investment it generated the desired return and more I would like to see it returned to the Long Term Plan. (As an aside I've heard a lot of talk about The Cleaner, a high-end drama series also shot in Christchurch that would not have come to our region at all if not for the grant. It puts our post-earthquake Christchurch on the map in a way that nothing else can, domestically and internationally, which also brings cultural capital as well as tourism gains.)

2631 - Anna Canton (Annakey Productions Ltd)

I believe that the Screen Canterbury Screen Incentive Fund ought to be retained in the LTP. I don't feel that we can become a cultural powerhouse by allocating 1% to the arts. We've worked hard to develop screen production in Ōtautahi and that is now in serious jeopardy. The Screen CanterburyNZ Production Grant had an initial investment of \$1.5 million dollars and has generated a return of \$12.5 million dollars - that's \$12.50 for every dollar spent. This money stayed in the region through crew salaries, transportation, accommodation, hospitality and other businesses. It has been incredibly successful. It isn't in the Long Term Plan and as an investment that generated a return, I feel it needs to be included.

>>>

Please do not remove the Screen Incentive Grant as a saving measure for the LTP without considering the financial and cultural implications as laid out. I feel that we need to ensure grants that make the city money, like the Screen CanterburyNZ Production Grant, continue. This grant has provided an incredible \$12.5 million return on a \$1.5 million investment, providing jobs and spend in our region.

>>>

The Screen Incentive Fund has the power to create and attract significant, internationally renowned projects that enhance and consolidate the reputation and mana of the garden city. If we want to be a cultural powerhouse city, we need to focus on the arts which includes screen production activities. I feel that the Screen CanterburyNZ Production Grant allowed filmmakers, TV creators, and game developers to get the support they need to create projects that will be created and produced in our city and region. I feel this grant must be added back into the budget.

>>>

I feel that the Screen CanterburyNZ Production Grant is critical to the continued development of the screen ecosystem in our city and our region. It is necessary and urgent that it is put back into the budget and protected from future interference as it has proved very successful. Without it, there will

be very little or no production activity here. Early market research that went into supporting the grant showed that producers would not come to Ōtautahi Christchurch without an incentive. We are still developing our infrastructure and our crew depth and as such, are not able to provide the same service and support as studios in Auckland and Wellington. Without the grant, we will be unable to attract the level of production we've had over the last two years and will be left behind.

>>>

As representatives of the developing screen ecosystem here in the Canterbury region, we at Te Puna Matarau | Canterbury Screen Industry Association have united to bring the council's urgent attention to the removal of the Screen Production Grant from the proposed LTP and request its reinstatement. In 2019, the Christchurch City Council led the country by becoming the first region to implement an incentive to attract film production to Waitaha Canterbury. The Screen CanterburyNZ Production Grant (SCNZPG) received a total of 1.5 million from city council over a period of three years, offering up to 200k for film and television productions who met eligibility criteria. For example, production teams were required to hire a percentage of local crew, and needed to have a certain level of finance in place. This initiative led to more than 50 inquiries, resulting in over 35 applications. Out of this, 11 productions were chosen with 9 productions completed and 2 more set to film in the next year. The grant was a test case that proved an overwhelming economic success, attracting NZD \$12.5 million in production costs that stayed in the region. It generated economic revenue for our local crew - both above the line and below the line - as well as chain supply service providers including accommodation, catering, traffic management, vehicle and gear hire, and security services. It has developed the region's reputation as a service provider as well as our capacity to service future productions by providing this employment along with training and upskilling opportunities.

>>>

Christchurch is not yet developed enough to compete with the infrastructure and crew depth offered by Auckland and Wellington. Producers have repeatedly indicated that they will not consider filming their projects in our region without an incentive as it is not economically attractive or viable. Other regions have taken our lead and are making strides in their screen production support services, which means we need to continue as an innovation leader in the sector, or we will be left behind. The progress we've made and the progress other regions have made is good for Aotearoa New Zealand as a whole, making our nation a far more attractive film destination, overall. Te Puna Matarau and local guild members have played a very active role in consulting with the Screen CanterburyNZ manager to ensure the grant is fit for purpose. We believe the next iteration of the grant could provide even greater outcomes by making a few simple changes such as requiring a higher percentage of local crew to be hired, opening up the grant to include post-production activities, and potentially allocating a form of advanced development funding to support Canterbury-based filmmakers with projects ready to move forward into production, post-production, or distribution. We also think it's necessary to include a more robust reporting structure, including an auditing process. In 2023, Te Puna Matarau worked with Screen CanterburyNZ to create another first - the creation of the Waitaha Screen Story Incubator. This regional initiative supported the targeted development of 5 projects including film, TV, and one game - all of which are to be produced in Canterbury within the next 5 years. The program was developed alongside Script to Screen 1 with funding from the Screen CanterburyNZ Production Grant, NZ On Air, and the NZ Film Commission. New Zealand Trade and Enterprise named Christchurch as the city with the most potential to service films with budgets over NZD \$100 million, citing council support as well as interest from private investors in developing studio space. 2 In 2022, the University of Canterbury committed \$95 million to developing its Digital Screen Campus. 3 Production activity is essential to provide ongoing training and experience for these and other screen production students at Te Pūkenga|Ara, Yoobee, and the SIT Christchurch Campus. Without it, graduates will need to seek employment elsewhere, taking their capital and tax dollars with them. We are asking you to reinstate the Screen CanterburyNZ Production Grant based on the overwhelming evidence of its success. It has returned a great deal to our city, our region, and to every single business and individual that has benefited economically.

>>>

Despite these successes, the Screen CanterburyNZ Production Grant has now been removed from the budget of ChristchurchNZ in response to a request from council to cut back on costs. While we understand the need to meet the bottom line, we also ask that the council weigh the economic, social, and cultural returns provided by the Screen CanterburyNZ Production Grant and reinstate the grant in full at \$1.5 million dollars. We also request that the grant is protected from leadership changes within either ChristchurchNZ or the Christchurch City Council by ensuring that the money is utilised strictly as intended through council and grant directives.

2637 - Hannah Herchenbach

There has been an oversight regarding the absence of the Screen Production Grant. I am here to request that the \$1.5 million dollar grant be reinstated as a ring-fenced line item in the Christchurch NZ budget.

>>>

The overarching point of my submission is to advocate for and protect the Screen Production Grant as a ring-fenced line item in the budget of ChristchurchNZ that will not be part of its remit to reduce its budget and expenditure in the coming years.

>>>

One of the proposed community outcomes for the council and the city is to become a cultural powerhouse. This requires investment in not only developing its storytellers within the region but also attracting international productions of a high caliber in order to train these storytellers and elevate their skills. Thus, it is imperative to not only retain the Screen Production Grant as a ring-fenced line item within the budget allocated to ChristchurchNZ but also expand its expenditure over time to keep pace with inflation. However, given the troubling economic climate, I am reasonably requesting only that the initial \$1.5 million allocation be retained.

>>>

As an historian who has completed a PhD on the economic history of Christchurch and Dunedin since the 19th century (in the context of the cultural output of the South Island between 1978 and 2018), the following paragraphs contain my reasoning and plea for the \$1.5 million Screen Production Grant to be re-instated into the LTP and become a ring-fenced line item within the ChristchurchNZ budget: The screen sector is a dominant international industry, with the production of film and television generating over NZD 410 billion worldwide. Over NZD 1 billion was spent on production expenditure in New Zealand 2017. However, the screen industry has also followed New Zealand's predominant economic growth trend of the last 100 years and become predominantly concentrated in Auckland and Wellington. In 2019, the Christchurch City Council led the country by becoming the first region to implement an incentive to attract film production to Canterbury. The Screen Production Grant (SPG) ring-fenced 1.5 million of ChristchurchNZ's budget for the subsequent three years, offering 100k and 200k rebates for film and television productions based in Canterbury. The grant was a test case that proved an overwhelming economic success, attracting NZD 12.5 million in production costs to the region. It generated economic revenue for the service and hospitality industries in the form of accommodation, car hires, restaurants, and traffic management as well as developed the region's capacity to service future productions by employing, training and upskilling local crew and Cantabrians. The council's investment in the screen sector generated regional confidence that led to plans and development snowballing in the region for further private investment. New Zealand Trade and Enterprise named Christchurch as the city with the most potential to service films with budgets over NZD 100 million, citing council support as well as interest from private investors in developing studio space. Plans were submitted to council in 2021 to build studios in Templeton that would compete with the sound stages in Auckland and Wellington and secure 2000 jobs. In 2022, the University of Canterbury committed \$95 million to developing its Digital Screen Campus. In

2023, the collective authors of this letter established a new regional industry body, Te Puna Matarau | The Canterbury Screen Industry Association, which provided a regional development program for filmmakers through collaborating with Script to Screen. Despite all this success, the SPG now has been removed from the budget of ChristchurchNZ in response to a request from council to save costs. While we understand the need to meet the bottom line, we also ask that the council weigh the economic returns provided by the SPG in the context of the returns provided by other council-funded events such as Sail GP and the other business units under ChristchurchNZ's remit including aerospace, food and fiber. Our request is simple and clear: we ask the council to reinstate the NZD 1.5 million Screen Production Grant as a ring-fenced line item in the budget allocated to ChristchurchNZ. Given the success of the SPG, it would have been reasonable to increase its allocation in a more buoyant economic climate. However, given the current economic climate, we and thus request only that it be maintained so that the sector can survive and continue on its current growth trajectory. The film sector in Christchurch and Canterbury is not yet developed enough to compete with Auckland and Wellington without a regional incentive to encourage productions to train its workforce and tolerate its growing pains. Producers have voiced frustration regarding not being able to effortlessly organise a four-month hire of a fleet of cars, a block of accommodation, or studio space as a base camp. Christchurch has the capacity to meet these needs, but the workforce needs more time and productions to come to the region to streamline these processes. The more production happens, the more confidence will be built in our ability to execute at a national and international level. This is urgent. The Christchurch City Council needs to remain proactive in the development of its screen sector to maintain Christchurch's place as an emerging leader in the national industry. Removing the SPG will destroy the early momentum and the escalated growth that the Christchurch screen sector has experienced since 2019. Much of the planned investment to develop the local screen industry is contingent on attracting future productions to the region, and our market research showed that no producers were willing to come to Canterbury without a financial incentive due to the current lack of infrastructure and crew depth. We are in need of studios and sound stages as well as necessary screen production gear, which currently needs to be brought in from other cities. Attracting productions to the region would provide essential and ongoing training and experience for the graduates of the multiple film, TV, and digital content creation schools such as Te Pūkenga|Ara, Yoobee, and the SIT Chch Campus. Without productions in Christchurch, graduates will need to seek employment elsewhere, taking their capital and taxpayer potential with them. Other regions have noticed Christchurch's success and will introduce their own incentives. We understand that the council needs to be cautious with its investments. There are limitations to the research and analysis conducted on the economic output of the first round of the Screen Production Grant. Thus, we recommend that the council require future production reports be audited to provide further security and confidence regarding the economic benefits to the region. In the meanwhile, the re-establishment of the SPG would be a conservative but crucial token of faith that will make a profound difference to the growth trajectory of local screen sector and Christchurch at large over the next three years. Thank you for your careful attention to and deliberation on this matter. Signed, Hannah Herchenbach

Can funding be allotted to Community Groups supporting locals in need. Food banks, local Mental Health support group, Shelter for families/ children.

2641 - Melissa Jarman

Please support the Christmas Parade as it brings so much joy and is one of the cheaper options at Christmas time for families especially with the shuttle bus!

2644 - Ondrej Najman

No. I don't feel that we can become a cultural powerhouse by allocating 1% to the arts. We've worked hard to develop screen production in Ōtautahi and that is now in serious jeopardy. The Screen CanterburyNZ Production Grant had an initial investment of \$1.5 million dollars and has generated a return of \$12.5 million dollars - that's \$12.50 for every dollar spent. This money stayed in the region through crew salaries (including mine), transportation, accommodation, hospitality and other businesses. It has been incredibly successful. It isn't in the Long Term Plan and as an investment that generated a return, I feel it needs to be included. It also gives unprecedented opportunities to Ōtautahi local citizens to up skill themselves in a very competitive and extremely demanding industry, chances otherwise unavailable outside metropolises of AKL and WLG.

>>>

I feel that we need to ensure GRANTS THAT MAKE the city MONEY, like the Screen CanterburyNZ Production Grant, continue. This grant has provided an incredible \$12.5 million return on a \$1.5 million investment, providing jobs and spend in our region.

>>>

If we want to be a cultural powerhouse city, we need to focus on the arts which includes screen production activities. I feel that the Screen CanterburyNZ Production Grant allowed filmmakers, TV creators, and game developers to get the support they need to create projects that will be created and produced in our city and region. I feel this grant must be added back into the budget.

>>>

I feel that the Screen CanterburyNZ Production Grant is critical to the continued development of the screen ecosystem in our city and our region. It is necessary and urgent that it is put back into the budget and protected from future interference as it has proved very successful. Without it, there will be very little or no production activity here. Early market research that went into supporting the grant showed that producers would not come to Ōtautahi Christchurch without an incentive. We are still developing our infrastructure and our crew depth and as such, are not able to provide the same service and support as studios in Auckland and Wellington. Without the grant, we will be unable to attract the level of production we've had over the last two years and will be left behind.

2678 - Fiona McKenzie

Again, the Screen Canterbury NZ Production Grant has provided a phenomenal return and can only build as our reputation for being screen-friendly and capable does. Despite the story-line, how good was it to see our city on screen in 'The Cleaner'?! Fantastic - KEEP IT PLEASE

>>>

And please keep the screen production grant that brought our local film makers to the fore and attracted attention and projects to our city. This is creatively, culturally and fiscally rewarding and must be retained.

>>>

We know from the market research done to support the Screen Canterbury Grant that outside Producers had little incentive to come here, place stories here, generate work here and find the skill base they needed. The Screen Grant has been a huge success and shouldn't be messed with. It bringing such reward, notably with ups killing locals, but also seeing local projects get more attention and showing off our locations and local actors, musicians and technicians. Please ensure it's not a whimsy item that can be left off until it's clear the industry doesn't need it. For now it's clear the industry DOES need it, but importantly values it. AND it pays back \$12.50 for every \$1 it cost. Fantastic growth area.

2687 - Aleisha Thorne

Unfortunately not. Allocating only 1% to the arts sector doesn't seem balanced at all. Many people have worked hard to develop screen production in Ōtautahi and that is now in serious jeopardy. In 2019, I was so pleased to hear that the Christchurch City Council had created The Screen CanterburyNZ Production Grant. This incentive came with many positives, including that the initial investment of \$1.5 million dollars generated a return of \$12.5 million dollars, with this money circulating back into the region through crew salaries, transportation, accommodation, hospitality and other businesses. It also offered an opportunity for upskilling our local crew and supporting our newly graduated film & TV students. Considering the success of this incentive and return generated, it hasn't been included in the Long Term Plan. I feel that it needs to be included immediately.

>>>

To Whom It May Concern, As representatives of the developing screen ecosystem here in the Canterbury region, we at Te Puna Matarau | Canterbury Screen Industry Association have united to

bring the council's urgent attention to the removal of the Screen Production Grant from the proposed LTP and request its reinstatement.

In 2019, the Christchurch City Council led the country by becoming the first region to implement an incentive to attract film production to Waitaha Canterbury. The Screen CanterburyNZ Production Grant (SCNZPG) received a total of 1.5 million from city council over a period of three years, offering up to 200k for film and television productions who met eligibility criteria. For example, production teams were required to hire a percentage of local crew, and needed to have a certain level of finance in place. This initiative led to more than 50 inquiries, resulting in over 35 applications. Out of this, 11 productions were chosen with 9 productions completed and 2 more set to film in the next year.

The grant was a test case that proved an overwhelming economic success, attracting NZD \$12.5 million in production costs that stayed in the region. It generated economic revenue for our local crew - both above the line and below the line - as well as chain supply service providers including accommodation, catering, traffic management, vehicle and gear hire, and security services. It has developed the region's reputation as a service provider as well as our capacity to service future productions by providing this employment along with training and upskilling opportunities.

Despite these successes, the Screen CanterburyNZ Production Grant has now been removed from the budget of ChristchurchNZ in response to a request from council to cut back on costs. While we understand the need to meet the bottom line, we also ask that the council weigh the economic, social, and cultural returns provided by the Screen CanterburyNZ Production Grant and reinstate the grant in full at \$1.5 million dollars. We also request that the grant is protected from leadership changes within either ChristchurchNZ or the Christchurch City Council by ensuring that the money is utilised strictly as intended through council and grant directives.

Christchurch is not yet developed enough to compete with the infrastructure and crew depth offered by Auckland and Wellington. Producers have repeatedly indicated that they will not consider filming their projects in our region without an incentive as it is not economically attractive or viable. Other regions have taken our lead and are making strides in their screen production support services, which means we need to continue as an innovation leader in the sector, or we will be left behind. The progress we've made and the progress other regions have made is good for Aotearoa New Zealand as a whole, making our nation a far more attractive film destination, overall.

Te Puna Matarau and local guild members have played a very active role in consulting with the Screen CanterburyNZ manager to ensure the grant is fit for purpose. We believe the next iteration of the grant could provide even greater outcomes by making a few simple changes such as requiring a higher percentage of local crew to be hired, opening up the grant to include post-production activities, and potentially allocating a form of advanced development funding to support Canterbury-based filmmakers with projects ready to move forward into production, post-production, or distribution. We also think it's necessary to include a more robust reporting structure, including an auditing process.

In 2023, Te Puna Matarau worked with Screen CanterburyNZ to create another first - the creation of the Waitaha Screen Story Incubator. This regional initiative supported the targeted development of 5 projects including film, TV, and one game - all of which are to be produced in Canterbury within the

next 5 years. The program was developed alongside Script to Screen 1 with funding from the Screen CanterburyNZ Production Grant, NZ On Air, and the NZ Film Commission.

New Zealand Trade and Enterprise named Christchurch as the city with the most potential to service films with budgets over NZD \$100 million, citing council support as well as interest from private investors in developing studio space. 2 In 2022, the University of Canterbury committed \$95 million to developing its Digital Screen Campus. 3 Production activity is essential to provide ongoing training and experience for these and other screen production students at Te Pūkenga|Ara, Yoobee, and the SIT Christchurch Campus. Without it, graduates will need to seek employment elsewhere, taking their capital and tax dollars with them.

We are asking you to reinstate the Screen CanterburyNZ Production Grant based on the overwhelming evidence of its success. It has returned a great deal to our city, our region, and to every single business and individual that has benefited economically.

Thank you for your careful attention to and deliberation on this matter.

2697 - Laura Molles

I strongly urge the council to reinstate the Environmental Partnerships Fund. Loss of this program will have an enormous negative impact on several programs and organisations that have spent years carrying out challenging and important work. These include Te Kakahu Kahukura, Pest Free Banks Peninsula, the Banks Peninsula Conservation Trust, and the very successful feral goat eradication program. All of these programs provide incredible value for money, and involve activities that require long-term support in order to defend the gains they've made, as well as making further progress. Cutting funding to these programs is a particularly significant blow at a time when the Department of Conservation is facing deep cutbacks and Jobs for Nature funding is about to run out. Now is the time to provide increased support to these programs, rather than cutting it.

2707 - Raymond Lum

No. I don't feel that we can become a cultural powerhouse by allocating 1% to the arts. We've worked hard to develop screen production in Ōtautahi and that is now in serious jeopardy. The Screen CanterburyNZ Production Grant had an initial investment of \$1.5 million dollars and has generated a return of \$12.5 million dollars - that's \$12.50 for every dollar spent. This money stayed in the region through crew salaries, transportation, accommodation, hospitality and other businesses. It has been incredibly successful. It isn't in the Long Term Plan and as an investment that generated a return, I feel it needs to be included.

>>>

In order to become a cultural hub, it is essential to prioritize the arts, particularly screen production activities. The Screen CanterburyNZ Production Grant has provided crucial support to filmmakers, TV

creators, and game developers, enabling them to produce projects within our city and region. Reinstating this grant in the budget is imperative for the growth of our cultural sector.

>>>

It is crucial to prioritize grants that generate revenue for the city, such as the Screen CanterburyNZ Production Grant, to ensure their continuity. This particular grant has yielded an impressive return of \$12.5 million from a \$1.5 million investment, resulting in job creation and economic activity within our region.

>>>

The Screen CanterburyNZ Production Grant plays a critical role in the growth of our city and region's screen industry. It is imperative that we reinstate and safeguard this grant from future disruptions, as it has proven to be highly successful. Without it, our production activity will significantly decrease or even cease altogether. Extensive market research has shown that producers require incentives to choose Ōtautahi Christchurch as their filming location. As we continue to develop our infrastructure and crew capabilities, we are unable to offer the same level of service and support as Auckland and Wellington studios. Losing the grant will hinder our ability to attract productions and result in falling behind in this industry.

2776 - David Ferguson (Orton Bradley Park Trust)

Funding Request

In order to maintain the current level of service of a key community facility, the Orton Bradley Park Board requests the following:

A) An annual grant of \$85,000 under the Biodiversity Fund to maintain the biodiversity gains achieved over the past 3 years.

What has changed to justify this increase?

- Insurance costs have risen from \$14,000 in 2012 to \$24,000 in 2018, to \$33,000 in 2024 (**additional \$19,000 from when funding level set**)
- Rates paid to CCC/Ecan continue to increase. From \$18,500 in 2012 to the current \$32,062 per year (**additional \$13,562 from when funding level set**)
- General operational and compliance costs have increased markedly due to legislation changes to Health and Safety and outdoor education/adventure provision.
- General manual labour projects are no longer undertaken by Correction Department work groups due to Health and Safety compliance and department staffing issues. This has resulted in the Park Board having to pay wages for this work.
- Our very important volunteer workforce is aging and is no longer able to achieve what they once were; again putting increased pressure on park staff.
- Increased bio-diversity planting and protection (83ha of QE II reserve plus another 40ha of amenity planting and stock excluded areas) has increased staff requirements for weed and pest management. Over the past three years we have planted 20,000 native plants, fenced 3km of stream tributaries and caught over 2500 possums, 950 rats, 300 mustelids plus other pest animals.
- Visitor numbers have increased, putting increasing pressure on infrastructure and services. 2018 Council data indicate that on average 1950 vehicles enter the park each month – At an average of three people per vehicle this would indicate in excess of 70,000 people a year are visiting the park, up from the 30,000 that data indicated in 2005 (plus approx. 5000 attending the Park's annual Spring Fair).
- Since 2012 the average compound CPI increase of 2.5% per annum means that general goods and services are 34% more expensive now than they were in 2012. The CCC has made no adjustments to the grant to reflect this change.

B) Capital Projects grant of \$25,000 per annum

- Sewerage and water infrastructure is in desperate need of repair in order to avoid serious health risk issues that may impact the Park's ability to operate.
- Maintenance of roading, signage and large tree removal has been deferred given lack of funds, and a programme is needed to regain infrastructure standards expected of the Council's own public parks.

27

Thank you for your consideration and we look forward to speaking to this presentation at the public hearings. We wish to speak at the same time as Te Ahu Pātiki Charitable Trust.

2784 - Jenny Smith (Te Whare Roimata Trust)

In light of the major changes occurring in the Central City, but more particularly the Inner City East neighbourhood, we believe there is a need for local and central government investment in supporting and facilitating this transition at a community level. The potential for conflict is very real as the old gives way to the new. New dwellers in rental housing are not, for a variety of reasons, heavily invested in their community and many are time poor. The expectation that a mixed community will initiate the development of a strong sense of community is unrealistic given the level of diversity and the tensions occurring between old and new dwellers. Therefore, there is a need to look at providing resources to fund community development workers to work alongside residents to help facilitate neighbourhood-led initiatives.

>>>

We would also strongly advocate for increased funding to the community.

2843 - Peter Rough (Lyttelton Historical Museum Society Inc)

I would appreciate it if Council recognised the proposed Te Ūaka Lyttelton Museum in the Long Term Plan and considered contributing funds for its construction and consider ongoing support, which could include financial assistance for operating costs of the facility

2857 - Jo Blair

Fund more operational for the arts - events budgets, the Christchurch Art Gallery.

2862 - Gill Weavers

I feel that we really need to ensure grants that make the city money, like the Screen CanterburyNZ Production Grant, continue. This grant has provided an incredible \$12.5 million return on a \$1.5 million investment, providing jobs and spend in our region. It is invaluable to the creative community and reaches so much further.

>>>

If we want to be a cultural powerhouse city, we need to focus on the arts which includes screen production activities. I feel that the Screen CanterburyNZ Production Grant allowed filmmakers, TV creators, and game developers to get the support they need to create projects that will be created and produced in our city and region. I feel this grant must be added back into the budget.

>>>

I feel that the Screen CanterburyNZ Production Grant is absolutely critical to the continued development of the screen ecosystem in our city and our region. It is necessary and urgent that it is put back into the budget and protected from future interference as it has proved very successful. Without it, there will be very little or no production activity here. Here is a letter I can't attach on the next page. To Whom It May Concern, As representatives of the developing screen ecosystem here in the Canterbury region, we at Te Puna Matarau | Canterbury Screen Industry Association have united to bring the council's urgent attention to the removal of the Screen Production Grant from the proposed LTP and request its reinstatement. In 2019, the Christchurch City Council led the country by becoming the first region to implement an incentive to attract film production to Waitaha Canterbury. The Screen CanterburyNZ Production Grant (SCNZPG) received a total of 1.5 million from city council over a period of three years, offering up to 200k for film and television productions who met eligibility criteria. For example, production teams were required to hire a percentage of local crew, and needed to have a certain level of finance in place. This initiative led to more than 50 inquiries, resulting in over 35 applications. Out of this, 11 productions were chosen with 9 productions completed and 2 more set to film in the next year. The grant was a test case that proved an overwhelming economic success, attracting NZD \$12.5 million in production costs that stayed in the region. It generated economic revenue for our local crew - both above the line and below the line - as well as chain supply service providers including accommodation, catering, traffic management, vehicle and gear hire, and security services. It has developed the region's reputation as a service provider as well as our capacity to

service future productions by providing this employment along with training and upskilling opportunities. Despite these successes, the Screen CanterburyNZ Production Grant has now been removed from the budget of ChristchurchNZ in response to a request from council to cut back on costs. While we understand the need to meet the bottom line, we also ask that the council weigh the economic, social, and cultural returns provided by the Screen CanterburyNZ Production Grant and reinstate the grant in full at \$1.5 million dollars. We also request that the grant is protected from leadership changes within either ChristchurchNZ or the Christchurch City Council by ensuring that the money is utilised strictly as intended through council and grant directives. Christchurch is not yet developed enough to compete with the infrastructure and crew depth offered by Auckland and Wellington. Producers have repeatedly indicated that they will not consider filming their projects in our region without an incentive as it is not economically attractive or viable. Other regions have taken our lead and are making strides in their screen production support services, which means we need to continue as an innovation leader in the sector, or we will be left behind. The progress we've made and the progress other regions have made is good for Aotearoa New Zealand as a whole, making our nation a far more attractive film destination, overall. Te Puna Matarau and local guild members have played a very active role in consulting with the Screen CanterburyNZ manager to ensure the grant is fit for purpose. We believe the next iteration of the grant could provide even greater outcomes by making a few simple changes such as requiring a higher percentage of local crew to be hired, opening up the grant to include post-production activities, and potentially allocating a form of advanced development funding to support Canterbury-based filmmakers with projects ready to move forward into production, post-production, or distribution. We also think it's necessary to include a more robust reporting structure, including an auditing process. In 2023, Te Puna Matarau worked with Screen CanterburyNZ to create another first - the creation of the Waitaha Screen Story Incubator. This regional initiative supported the targeted development of 5 projects including film, TV, and one game - all of which are to be produced in Canterbury within the next 5 years. The program was developed alongside Script to Screen 1 with funding from the Screen CanterburyNZ Production Grant, NZ On Air, and the NZ Film Commission. New Zealand Trade and Enterprise named Christchurch as the city with the most potential to service films with budgets over NZD \$100 million, citing council support as well as interest from private investors in developing studio space. ² In 2022, the University of Canterbury committed \$95 million to developing its Digital Screen Campus. ³ Production activity is essential to provide ongoing training and experience for these and other screen production students at Te Pūkenga|Ara, Yoobee, and the SIT Christchurch Campus. Without it, graduates will need to seek employment elsewhere, taking their capital and tax dollars with them. We are asking you to reinstate the Screen CanterburyNZ Production Grant based on the overwhelming evidence of its success. It has returned a great deal to our city, our region, and to every single business and individual that has benefited economically. Thank you for your careful attention to and deliberation on this matter. Te Puna Matarau | Canterbury Screen Industry Association 21 April 2024 ¹ <https://www.wiftnz.org.nz/news/news-archive/2023/mar/waitaha-canterbury-screen-story-incubator/> ² <https://www.stuff.co.nz/entertainment/film/125922503/move-over-wellywood-its-time-for--christywood> ³ <https://www.stuff.co.nz/entertainment/film/127547791/we-can-shoot-any-world-we-want-new-95m-film-studio-planned-for-christchurch> <https://www.canterbury.ac.nz/news-and-events/news/christchurch-talent-shines-through-film-production-revolution> Early market research that went into supporting the grant showed that producers would not come to Ōtautahi Christchurch without an incentive. We are still developing our infrastructure and our crew depth and as such, are not able to provide the same service and support as studios in Auckland and Wellington. Without the

grant, we will be unable to attract the level of production we've had over the last two years and will be left behind.

2866 - Samantha Cook

1) As a screen worker, specifically working in video game development and attached to the Christchurch Game Developers Association and Te Puna Matarau, I would like to raise the removal of the Screen Production Grant. Please see the attached letter for details, but as this Grant brings in a good swath of business and spending to the region, it would be financially short-sighted for the region to cut it. As the University of Canterbury and the Council have doubled down on Screen education and business, it would be unfortunate to cut this program when Christchurch is at the cusp of an exciting new era for the screen industries - film, video game development, animation & VFX will all be positively impacted by the continued existence of the Screen Grant. 2) The Arts Centre is a central Christchurch institution, one I have admired since my first few weeks living in the city. I have brought family there, taken graduation photos there's, shopped, eaten, learned - it's an irreplaceable hub for arts, commerce, and community. Defunding it, only for it to likely revert to Council ownership and a rates increase anyway, would be short-sighted and frustrating. Please reconsider the funding in your long term plan.

[Full attachment available]

2868 - Jonty Coulson

I would also like to see increased funding for queer-focused events year round, not just during pride month. I am consistently struck by the positive cultural and environmental impacts of Zealandia in Wellington.

2873 - Kaitlyn White (Hoon Hay Community Association)

We have reviewed the information available about other projects proposed to be funded in our area (and the wider Spreydon ward) as part of the draft Long Term Plan. We note our support for projects across the ward to improve parks and recreational facilities, such as Hoon Hay Sports Pavilion and Toilets. We ask the Council to maintain this funding. In previous years, we have been approached about relatively minor work in our local areas to make them great spaces for our community to enjoy. This includes more seats, more rubbish bins and the like. We cannot overstate how important community facilities, recreational facilities and parks are to our neighbourhood. We also agree with the funding suggestions for various transport, water supply and other infrastructure projects in our area.

[Full attachment available]

2880 - Emma Martini

but we must also support our creative and innovative industry to grow and prosper. Christchurch has talented film, tv, gaming crew and cast and we have incredible locations to share with the rest of NZ and the world so we would like to see this industry supported.

>>

Lets get this investment on screen and seen in NZ and globally by also supporting the Screen Canterbury Grant to produce content in our city.

>>

Screen Canterbury Grant - this needs to be reviewed to maintain and grow our creative industry.

>>>

Please review and keep the Screen Canterbury Grant

2888 - Alistair Price

No grants to charities (Until we can afford it.).

2894 - Lesley Burkes-Harding

I am a costume designer of some 40 years professional experience in our NZ film industry. https://www.imdb.com/name/nm0121933/?ref_=fn_al_nm_1 I've lived in Ōtautahi for the last 10 years, and have been very excited to see the real difference that The Screen CanterburyNZ Production Grant has made to available work for me in the area I live in. I've worked on two of the recent films made in Christchurch which has been amazing. Both for me and the ability for me to pass my considerable film experience onto newcomers in Otautahi, new crew need real training. We need to build crews and infrastructure - this definitely started - now the film industry is in serious jeopardy here without that small investment of the initial \$1.5 million dollars that has generated a return of \$12.5 million dollars continuing. Not rocket science! The money stayed in the region through crew salaries, transportation, accommodation, hospitality and other businesses. It has been incredibly successful. It isn't in the Long Term Plan and as an investment that absolutely generated a return, I feel it needs to be included in order to continue the work it began - re-build the film infrastructure in Otautahi!

>>>

I feel that we need to ensure grants that make the city money, like the Screen CanterburyNZ Production Grant, continue. This grant has provided an incredible \$12.5 million return on a \$1.5 million investment, providing jobs and spend in our region.

2901 - Hamish Fairbairn (Conservation Volunteers New Zealand [CVNZ])

Requests

WOPP outcomes clearly deliver on Council's weed and animal pest control priorities as documented in the strategies noted above. As such, and on the basis of this submission, CVNZ requests from Council a commitment to a long-term funding contribution to WOPP of \$50,000 annually.

CVNZ also requests Council to include CVNZ in planning and funding opportunities within the OARC, to allow CVNZ to develop a longer-term programme to facilitate local community engagement and ownership more effectively. We're seeking \$90,000 annually as a contribution to this programme.

We appreciate the opportunity to make a submission to the Draft Long-Term Plan on behalf of CVNZ Christchurch. Specifically, we wish to comment on the actions aimed to make Christchurch 'A Green Liveable City' and the role of community in achieving this.

CVNZ is a charitable organisation with the kaupapa of connecting individuals and communities to nature to make lasting changes; both in the environment and individual lives. As a 'community lead, agency supported' organisation, we are most appreciative of the support provided over the past 6.5 years by CCC to help us deliver on our objectives.

We have a strong and effective working relationship with Council which we have developed over many years of collaboration and partnership in delivering significant conservation and community outcomes. We are exceptionally grateful for the technical advice and feedback we receive from Council staff. CVNZ shares the same commitment to a Green and Liveable City and is investing its own resources into this vision for our city.

CVNZ strongly understands and values the importance of collaboration and we partner with a variety of community conservation groups across the region including- Pest Free Banks Peninsula, Banks Peninsula Conservation Trust, Climate Action Campus, Summit Road Society, Predator Free Port Hills, Estuary Trust, Avon Ōtākaro Network, Living Springs, Orton Bradley, Arthur's Pass Wildlife Trust, Ōtukaikino Trust, Pūharakekenui- Styx Living Laboratory Trust, Trees for Canterbury, Wai-Ora Trust, Tūhaitara Coastal Park, Brooker Reserve, Silverstream.

Other key partners include- Ministry of Primary Industries, Ministry of Social Development, Department of Conservation, Environment Canterbury, Rātā Foundation, Rotary, Pamū Landcare. Corporate partners including City Care, Pernod Riccard, Lane Neave, Switched On, 2 Degrees, IAG and Advanced Landscapes

The **WOPP** programme was initiated by CVNZ in response to the growing community-driven predator and pest control activities across the region, recognising that Whakaraupō was a missing but critical link in the work of Pest Free Banks Peninsula [PFBP] and Predator Free Port Hills. [The current informal collaboration with Whaka-Ora Healthy Harbour itself will soon be formalised with a Memorandum of Understanding between Whaka-Ora and CVNZ].

The key objectives of WOPP include:

- *Reducing plant and animal pest numbers to a level where they no longer pose a significant threat to native species and to increase the overall resilience of the endemic ecosystems.*

- *Create an engaged and empowered community that actively supports the WOPP objectives and makes a positive contribution to conservation.*

Our long-term commitment to the **Ōtākaro Avon River Corridor [OARC]** is evident in the current work underway to establish a community-focused native plant nursery at the Climate Action Campus located at the previous Avonside Girls' High School site. Initially, the nursery will grow 20,000 plants to support ecological restoration in the River Corridor, Port Hills and on neighbouring properties. We envisage the nursery becoming an integral to restoration across the region.

Over the past three years we have planted and maintained 55,000 native trees with an assortment of community groups in four locations including Dallington Landing, Dallington Tce, Amelia Rogers and Cedarwood Reserve. This year, we will plant 11,000 trees at Waikākāriki/ Goodman Reserve.

>>>

- We are concerned about the proposed removal of the Environmental Partnerships Fund (EPF) will have a negative impact of significance on the ability of community-led organisations to deliver conservation outcomes for the benefit of current and future generations of Christchurch City residents.
- Pleased to see the below targeted in the Council's 'Better Off' funding package
 - 'Support local carbon offsetting opportunities through the regeneration of indigenous forests on Banks Peninsula.
 - Increase restoration and planting and pest control programmes.

We strongly encourage Council to consider long-term funding of key community organisations that are engaged in delivering priority conservation outcomes such as plant and animal pest control. The benefits of providing long-term funding [e.g minimum of three years] to groups include:

- *More effective use of resources, including reducing the time spent on pursuing funding on an annual basis*
- *More effective planning -allowing for 'guaranteed' delivery over a longer period and allowing for a more clearly defined long-term strategic approach to large-scale projects, including enhanced collaboration between funder and delivery organisation.*
- *Providing on-going protection of the gains made in pest plant and animal control.*
- *Enhanced opportunities for leveraging guaranteed future funding into bigger partnerships and collaborations*
- *Ensuring the retention of community 'ownership' and goodwill; 'stop-start' funding frequently results in the loss of the goodwill generated within local communities, who see their work as*

'wasted'. This is especially applicable to predator control activities where re-invasion is a genuine risk.

- *More effective monitoring and reviewing of project outputs over a longer period of time*

Conservation Volunteers New Zealand looks forward to continuing our mahi with Christchurch City Council and our many project partners in protecting and restoring our unique biodiversity.

Support A&P Show

2914 - Ally Callinicos

Christchurch has the bones to be incredibly strong contender of being the best city in Aotearoa, but there is room for improvement. Art and culture is what draws people to and keeps people in a city. As it stands, Christchurch has culture - it is a safe, open-minded city full of easy-going people. You can see these traits scattered around the city via the beautiful street art. No matter how big or small, the street art in our city breathes life into the air that we breathe. It is in the little moments, I find that this art brings joy to my life. Such as the other morning when I was walking from work to the gym and as I woke up, I could feel and see the liveliness of Christchurch when I came across pieces of street art. The art makes you feel something. It makes you believe in the rebuild that is happening around us and the strengthening of community through the acceptance of things against the 'norm' that the art can or may present. It is for these very reasons that I truly wish to see significant funding dedicated to Watch This Space's Street Art Strategy.

Community Waterways Partnership

Our urban waterways are in serious distress, the Community Waterways Partnership was formed to collectively address this issue, but without leadership, funding and resourcing it will not return the benefits to the city in restoring our waterways health which is intrinsically connected to the health and wellbeing of the people.

2920 - Sam Witters (University of Canterbury)

Kia ora koutou, This submission is specifically relating to the Screen Canterbury Production Grant; we have attached a short letter summarising the importance of this grant to the University of Canterbury, Ōtautahi and region as a whole. We welcome the opportunity to speak to this subject in more detail at one of the hearings next month.

>>>

SCREEN CANTERBURY PRODUCTION GRANT

We are writing on behalf of Kōawa Creative Technologies Precinct (formerly Digital Screen) located at the Dovedale Campus of the University of Canterbury (UC) in Ōtautahi Christchurch. Kōawa is a significant investment by UC in preparing students for employment in screen production, AI based production tools, and creative technology sectors. It is where students from all over NZ will come to complete the Bachelor of Digital Screen degree in Animation, Game Arts and Development, Cinema Arts, Screen Writing, Sound Production, and Indigenous Narrative. At the time of writing this, the programme is in its second year and has attracted record numbers of students for 2024, with 317 fully enrolled students this year (192 in the first year, 125 in the second).

We have also attracted internationally acclaimed producers, directors, production and technology leaders, and other industry professionals to Kōawa who all back the vision that we need to train specifically for a digitally led export economy that will see the growth of a \$25 billion creative technology and screen sector for NZ alone. The international animation and digital production market is set to reach \$400 billion by the end of 2024. The demand for workforce has grown by 30% with animation jobs in the game development industry growing by 35% from 2018 to 2023. There is massive crossover potential for the workforce between conventional production and games. This can all flourish in Ōtautahi if the Council, the local economic development agency, local business, and UC are in lockstep on a strategic plan that supports not just the growth of the screen and creative technologies industry, but one that will accelerate the economic strength of the region. The importance of placing the Screen Canterbury Production Grant at the heart of this plan cannot be overestimated.

Over the past three years, the \$1.5 million investment administered by Screen Canterbury has:

- Attracted 9 productions to base themselves and film in the region.
- Those productions have returned over \$14 million back to the region in spend.
- Of those 9 productions, on average 50% of the crew hired were locally based.
- Brought over 200 days of production in one year, which is unheard of outside of Auckland and Wellington.

From an economic case, few investments under \$2 million return this level of multiplier back into the economy – accommodation on nights, food and beverage purchases, car rental and flight bookings, construction and service contractors, hardware retail suppliers and of course, jobs.

If the Council wants to continue to reap these rewards for the region, and for Ōtautahi to be known to the world as an outstanding location of excellence for game, tv and film, and technology convergence, a strong film sector in Ōtautahi is as important as the University's investment in training. It will attract the technical and creative talent that will straddle the industries; it is already attracting returning New Zealanders and industry professionals at the top of their professions. As one of the biggest employers and contributors to Ōtautahi's GDP, we would hope the Council will take the UC context into consideration before axing the very incentive that brings talent, expertise and productions to the South Island and would help build a more consistent level of crew and work opportunities for future graduates.

We understand it is not the grant alone that will establish all the above, but it will do a significant amount of the heavy lifting for us for not a lot of money, and it is one that will make a serious return on our combined investments.

2979 - Zac Beckett-Knight (Late Knight Productions Limited)

Our main concern is that we do not see specific mention of the Regional Attraction Incentive for the Film Industry as administered by Screen Canterbury. Without this mentioned directly in the LTP, we have concerns that it will not be re-implemented by Christchurch NZ, therefore undermining the fantastic work it did over the last 3 years for the region financially, growth in the film sector and visibility nationally and international of Canterbury as a film destination.

>>>

We feel there should be a greater emphasis on funding for economic development that yields a direct and demonstrable financial return for the region. The Film Attraction Incentive that has been running the last 3 years has done a fantastic job of that, returning \$12.5 million to the region with a \$1.5 million investment. The ground work this incentive has laid in terms of capacity for the region cannot be understated. National and International projects are looking to come to the region. To not extend the Incentive for another 3 years would greatly undo the work and investment that happened over the last 3 years. Incentives in the film industry are common place. The benefits of projects coming to the region always outweigh the investment 10 fold. If the council considers making bids to attract events to the city, surely the same approach can be applied to film productions.

2990 - Darryl Jan Atkinson

Visitor funding is also important ie Canterbury iSite. They need continuous funding as the visitor market spending permeates through out the region and across multiple industries.

2995 - Ronnie Davey (Citizens Advice Bureau Christchurch Area)

No. We believe there should be a stronger focus on Funding Community non-profit organisations such as CAB. We have experienced a huge decline in CCC funding over the last 15 years (60K in 2009 to 15K this year) and yet we continue to receive referrals from government organisations and City Council. If the council expects that by 2034 there will be an additional 32,000 people living in Christchurch and expecting to see the population age, CAB and other non-profits community support organisations need to be able to access local government support. If the long term plan removes/reduces these funding portals, the knock on effect will have a detrimental impact on already marginalised communities.

>>>

CAB data shows that not only is our service needed but we also provide an excellent return on funding. A recent 'Impact Lab Report' <https://www.cab.org.nz/assets/Documents/About-us/20222110-CAB-GoodMeasure-Report-DIGITAL.pdf> commissioned by CAB, linked to 1,073 relationship-related inquiries over two years, demonstrated that

for each dollar of funding CAB receives returns \$13.20 of measurable good to New Zealand, a massive social return. However, CAB must remain independent and isn't allowed to get commercial sponsorship. Local governmental support and funding is essential for CAB to keep supporting the community. The long term plan must robustly fund the portals for non-profits to be able to provide for the communities.

>>>

We aim to continue to be in locations where the most vulnerable in communities can access our services to access the support needed to be resilient in the current climate, however local funding is needed long term. Recent data shows a strong need for our service. Between April 1, 2023 and March 31, 2024 over 15,000 people in Christchurch and Selwyn district accessed our service, a 30 % increase on last year. We have also seen an increase in complexity of the issues our clients present with. The average time our interviewers spend with a client is currently 18 minutes. However, a total of 2,480 hours was spent helping clients with in-depth interviews. In that time frame the top categories of client issues have related to Conditions of Work, Relationships and Rental Housing. Our clinics continue to be well utilised, particularly our legal clinics. Access to legal services is in high demand within the community with almost 5,000 clients attending those clinics over the last year. The use of our specialist clinics, particularly immigration, has increased.

>>>

[Strategic Direction > Community Outcomes and Strategic Priorities, Grants and Funding > Strengthening Communities Fund, Grants and Funding > Requests for Additional grants and funding]

There is an ongoing need for migrant support. Increasing equity, wellbeing, empowerment, community resilience is needed for at risk, often marginalised and culturally and linguistically diverse (CALD) communities. CAB provides language support services so that clients can get the information they need in their native tongue. During the last 12 months over 1000 clients from CALD communities accessed our service, with top enquiries relating to legal and government services. When Work Connect and Skills Connect ended their programme for new migrants, CABCHA began a monthly CV writing workshop and translated more pamphlets into other languages to help fill that gap. In addition, the MBIE funding cuts for migrant programmes have not been supplemented locally to support new migrants.

Ensuring the Strengthening Communities Funding remains and is well funded is imperative to support this growing population. The Citizens Advice Bureau service is dynamic, innovative and responsive to community need. CAB has been in Christchurch for 54 years and has been ongoingly innovative to address needs. Our service organisation is one of the few that: provides the opportunity for individuals to share their concern on ANY issue; provides well researched information; invites discussion about the various options, and encourages clients to choose options to suit. We have built relationships with specialists for our free clinic services. These weekly or twice weekly clinics include: General Law, Immigration Legal, Employment Law, ACC, JP and Tech Support clinics. Our monthly CV workshop is aimed at migrants and clients re-entering the workforce. All of these well attended clinics have been set up in response to community needs. CAB has special access to other specialists as well to help clients who are facing particularly challenging situations. For example, our volunteers have direct access to local WINZ managers for each CABCHA office and a special number we use to access Immigration NZ allowing CAB to side-step long queues.

Ensuring that the funding portals are available in the long term will mean that CAB can continue to help the community understand their rights and explain any recent changes in government policies/services. Citizens Advice Bureau connects with other bodies and organisations to create new opportunities and enhance effectiveness. CAB NZ Bi-cultural organisation is imbedded in the Kaupapa of our organisation <https://www.cab.org.nz/what-we-do/our-kaupapa/>. We have been engaging with the community for over 54 years and have support and encouragement for our work from National organisations such as MBIE, MSD, Department of Internal Affairs, Inland Revenue and Immigration NZ. Locally we have a long list of organisations that support our services. Our services have been well utilised and we have been vital in giving support to clients in times of need, especially through periods of community

stress such as Covid, the Christchurch Earthquakes and other natural disasters. To ensure we can continue to provide these services, the long-term plan must include funding for organisations like CAB.

2996 - Stephanie Damm-Logan (Guardian Films)

Currently the Screen CanterburyNZ Production Grant is not part of Christchurch City Council's Long Term Plan. We are advocating to support the inclusion of the Grant in the Long Term Plan. The significant return on investment and the positive impact on our local economy and community cannot be overlooked. The success of the grant is evidenced by the numerous feature films, documentaries, and television productions that have contributed to our region's cultural and economic growth. For the \$1.5 million investment from CCC, the grant returned \$12 - 14 million in screen production spend in the region. The region went from one production every few years to several productions filming in over two years. This is a huge financial and psychological boost for our film and tv industry here in Canterbury. We have talented people in this region and our time is wasted flying up to Auckland to do roles that could be done here and better. When I moved back to Christchurch after spending my 20's away I was entrusted to produce show in Canterbury, by TV3 2nd Chance Charlie which was privately funded. I was able to hire a team of 10+ people for several months and make a brilliant TV show that showcased what we could put out of Canterbury. However private funding like that hardly ever comes around. We need your support to keep this industry afloat and inspire and encourage this rich space for film and TV making.

2999 - Reuben Woods (Watch This Space & The Flare Street Art Festival)

[Recreation, Sports & Events > Community Arts, Strategic Direction > Community Outcomes and Strategic Priorities, Planning & Strategic Transport, Urban Design, & Urban Regeneration > Urban Design]

We believe that with specific investment towards a strategic street art programme, the city will grow its global creative profile, provide meaningful pathways for young people here in Ōtautahi to thrive and contribute, while also engaging diverse communities. Street art reflects a collaborative and confident city by utilising our surrounding environment to tell our stories in lively and engaging ways - creating a sense of belonging and making spaces memorable and welcoming. Street art has already proven its ability to position Ōtautahi as a cultural powerhouse city - where freely accessible creative expressions empower our communities to reflect on what makes us unique and in doing so has attracted attention from around the globe, placing us at the forefront of urban creativity. Street art thrives when creating partnerships between private, public and community-centred participants. Recognising the potential for innovative and wide-ranging initiatives and outcomes by harnessing different networks, street art's benefits help a wide cross-section of our community and reflect a thriving city. Street art is dynamic and allows for constant participation, refreshing and re-imagining the urban landscape in surprising and powerful ways. This ensures generations are continually able to contribute and ensure the cityscape reflects the contemporary experience in a way that is distinct from other types of public art. Street art is incredibly accessible and aims for inclusivity and connection, ensuring the voices and expressions of our people are clearly evident in our shared landscapes, providing well-being through visibility and participation. Ōtautahi has established itself as the leading destination for street art and urban creativity, drawing the eyes of both Aotearoa and the world to its walls and streets. This submission will deliver on the vision, community outcomes and strategic priorities of the Long Term Plan - providing opportunities for future generations through embedding urban creativity and creating dynamic pathways for development and growth that will cement our status as a cultural powerhouse destination. The submission prioritises accessibility, participation and community development through street art, reaching wide audiences and providing continuous and thoughtful activation and programming.

>>>

[Spending > Our Proposed Spending, Recreation, Sports & Events > Community Arts]

We believe a fairer and more diverse distribution of investment in arts and culture spending will ensure a greater impact and reach of our city's incredible creative spirit. By investing in street art and a strategic programme, we can develop a unique approach to urban creativity that will support a wide range of participants and audiences for future generations. This impact will contribute to the city's reputation as a thriving and prosperous destination, attracting attention and visitors, while reflecting our citizens and communities in vibrant and engaging ways. From large-scale events to community-centred initiatives, the street art programme will provide wide-reaching opportunities. This would be a nation-wide first and ensure Ōtautahi leads the way for urban creativity and its positive outcomes.

3002 - Rachel D'Arcy

We must prioritise grants that yield positive returns for the city, such as the Screen CanterburyNZ Production Grant. This initiative has delivered an impressive \$12.5 million in revenue from a \$1.5 million investment, stimulating employment and economic activity within our region. Similarly, funding for The Arts Centre should be safeguarded and maintained to ensure its continued contribution to our city's cultural and economic vitality.

>>>

[Grants & Funding - Arts Centre Funding]

Dear Council Members, I am writing to express my deep concerns regarding the proposed removal of funding for the Screen CanterburyNZ Production Grant and The Arts Centre. As a member of the community deeply invested in the cultural and creative landscape of our city, I believe these decisions are short-sighted and fail to acknowledge the vital role that arts and culture play in shaping our identity, fostering community cohesion, and driving economic growth. The Screen CanterburyNZ Production Grant has proven to be a pivotal tool in attracting film and television productions to our region, generating significant economic returns and providing employment opportunities for local talent. Its removal from the proposed Long Term Plan (LTP) undermines the progress we have made in positioning Christchurch as a competitive destination for screen production. Without this incentive, we risk losing momentum and falling behind other regions that continue to invest in their screen industries. Similarly, any potential reduction in funding for The Arts Centre overlooks its profound significance as a cultural institution and a driver of regeneration in our city. The Arts Centre is more than just a collection of historic buildings; it is a vibrant hub of creativity, innovation, and community engagement. Since my childhood, I've frequented the weekend market and been enthralled by the captivating productions that the original Court Theatre put on. Lumiere Cinemas stands out as the city's premier independent arts cinema, a venue I visit weekly. The Arts Centre has enriched the lives of countless individuals and contributed to the cultural fabric of Christchurch for generations. By neglecting to support The Arts Centre, we fail to recognise its pivotal role in preserving our cultural heritage, stimulating local economies, and providing access to the arts for all members of our community. The proposed budget cuts threaten to undermine the progress we have made in revitalising our city and risk eroding the social and economic benefits that the arts bring to our community. In conclusion, I urge the council to reconsider its decision to remove funding for the

Screen CanterburyNZ Production Grant and to ensure adequate support for The Arts Centre in the upcoming budget deliberations. Investing in arts and culture is not just an expenditure; it is an investment in the well-being and prosperity of our community. Let us not sacrifice the long-term benefits of a vibrant and thriving cultural sector for short-term budgetary gains. Thank you for your attention to this matter. Sincerely, Rachel D'Arcy

>>>

[Grants & Funding - Arts Centre Funding]

To position ourselves as a cultural hub, prioritising the arts, including screen production, is paramount. The Screen CanterburyNZ Production Grant has been instrumental in empowering filmmakers, TV producers, and game developers, facilitating the creation of projects rooted in our city and region. Reinstating this grant in the budget is essential to sustain and amplify our creative endeavours. Moreover, supporting institutions like The Arts Centre is equally vital, as they serve as pillars of cultural enrichment and community engagement, further solidifying our city's status as a cultural powerhouse.

3038 - Slavko Martinov

[Strategic Direction>Have we got the balance right?]

No. How can we become a cultural powerhouse by only allocating 1% to the arts? Our fight to develop screen production in Ōtautahi now looks to be in serious jeopardy even though it was been a resounding success: the Screen CanterburyNZ Production Grant had an initial investment of \$1.5 million dollars and has generated a return of \$12.5 million dollars - that's \$12.50 for every dollar spent! This money stayed in the region through crew salaries, transportation, accommodation, hospitality and other businesses. It has been incredibly successful. It isn't in the Long Term Plan and as an investment that generated a return, it confounds me that its measurable success isn't included. I strongly feel it needs to be.

>>>

Given that the Screen CanterburyNZ Production Grant provided an incredible \$12.5 million return on a \$1.5 million investment, providing jobs and spend in our region, we must ensure we continue to not only keep giving returns on that city money but also to keep building on it so we can return even more in the future.

>>>

[Strategic Direction>Community Outcomes & Strategic Priorities]

If we want to be a cultural powerhouse city, we need to focus on the arts which includes screen production activities. I feel that the Screen CanterburyNZ Production Grant allowed filmmakers, TV creators, and game developers to get the support they need to create projects that will be created and produced in our city and region. I feel this grant must be added back into the budget so it can continue to build on its proven success.

>>>

I devoted myself to staying in my home city for my film career. After winning an A list festival with my first film, the offers to move to New York and LA were swift. Following my second film, Pecking Order (all made in this city), I continued to refuse to “move to Auckland to be taken seriously” and fought for what we have today: co-productions, pitches, investment, productions and meetings both domestically and internationally that never question my work or productions being anywhere else but here. That is directly attributable to the Screen CanterburyNZ Production Grant. Having been on the first panel and another panel last year, I can attest from that perspective that the competition for that grant is fierce and highly competitive. World class. As are the results. Given the Grant is also critical to the continued development of the screen ecosystem in our city and our region, it is unthinkable to not keep it in the budget. Without it, there will be very little or no production activity here. The international series I’m currently negotiating with US producers (thanks to Screen Canterbury grants) and feature documentary I am in production on – all created here – will suddenly be questioned. It is that simple. I will have to return to considering leaving the city to work and have my creations produced in Wellington, Auckland or Australia. If the Grant didn’t return such economic benefits, that would be fine. But that it has the returns detailed in these submissions? The decision to keep it becomes a straightforward one that benefits the city and every dollar invested in the Grant.

3066 - Tony Simpson

The arts in Christchurch should continue to be supported and the film industry is a major contributing part of Christchurch both economically and culturally. We've worked hard to develop screen production in Ōtautahi and that is now in serious jeopardy. The Screen CanterburyNZ Production Grant had an initial investment of \$1.5 million dollars and has generated a return of \$12.5 million dollars - that's \$12.50 for every dollar spent. This money stayed in the region through crew salaries,

transportation, accommodation, hospitality and other businesses. It has been incredibly successful. It isn't in the Long Term Plan and as an investment that generated a return, I feel it needs to be included.

>>>

The Screen CanterburyNZ Production Grant should continue and be allocated out of the \$408 million or 6% of other as outlined on page 27 of the LTP. The economic benefit is reinforced by the GDP return of 12.50 for each dollar invested. This return does not need huge infrastructure and planning investment as it has a non disruptive footprint socially and environmentally.

>>>

If we want to be a cultural powerhouse city, we need to focus on the arts which includes screen production activities. I feel that the Screen CanterburyNZ Production Grant allowed filmmakers, TV creators, and game developers to get the support they need to create projects that will be created and produced in our city and region. I feel this grant must be added back into the budget.

>>>

I feel that we need to ensure grants that make the city money, like the Screen CanterburyNZ Production Grant, continue. This grant has provided an incredible \$12.5 million return on a \$1.5 million investment, providing jobs and spend in our region.

>>>

I feel that the Screen CanterburyNZ Production Grant is critical to the continued development of the screen industry in our city and our region. It is necessary and urgent that it is put back into the budget and protected from future interference as it has proved very successful. Without it, there will be very little or no production activity here. Producers would not come to Ōtautahi Christchurch without Screen CanterburyNZ Incentive. We have shown that we can attract and service productions to Christchurch and this has been acknowledged by the industry with many other productions wanting to film in Christchurch. Without the grant, we will be unable to attract the level of productions we've had over the last two years, 11 in total, and will miss out on the economic opportunities that films bring to a region.

3068 - Vanessa Wells

We've worked hard to develop screen production, theatre and other arts (eg physical and experimental) in Ōtautahi and that is now in serious jeopardy. The main focus of my submission is the way I earn the bulk of my income however, and it is in reference to The Screen CanterburyNZ Production Grant which had an initial investment of \$1.5 million dollars and has generated a return of \$12.5 million dollars - that's \$12.50 for every dollar spent. This money stayed in the region through crew salaries, transportation, accommodation, hospitality and other businesses. It has been

incredibly successful. It isn't in the Long Term Plan and as an investment that generated a return, and I feel it needs to be included.

>>>

I feel that we need to ensure grants that make the city money, like the Screen CanterburyNZ Production Grant, continue. This grant has provided an incredible \$12.5 million return on a \$1.5 million investment, providing jobs and spend in our region.

>>>

If we want to be a cultural powerhouse city, we need to focus on the arts which includes screen production activities. I feel that the Screen CanterburyNZ Production Grant allowed filmmakers, TV creators, and game developers to get the support they need to create projects that will be created and produced in our city and region. I feel this grant must be added back into the budget, and itemised so it is not absorbed into other costs. I also believe that we need to encourage growth for the businesses that are here and this Grant also helps that. As a small business owner, I am working hard to bring success to this city - and want our Council to do all it can to assist. The Council also benefits when business succeeds in this region.

>>>

I feel that the Screen CanterburyNZ Production Grant is critical to the continued development of the screen ecosystem in our city and our region. It is necessary and urgent that it is put back into the budget, itemised and protected from future interference as it has proved very successful. Without it, there will be very little or no production activity here. This has been proven from past experience and extensive discussion with producers. Early market research that went into supporting the grant showed that producers would not come to Ōtautahi Christchurch without an incentive. We are still developing our infrastructure and our crew depth and as such, are not able to provide the same service and support as studios in Auckland and Wellington. Without the grant, we will be unable to attract the level of production we've had over the last two years and will be left behind. The Arts is an essential part of the Christchurch NZ brand - part of who we are and who we want to be in this city. With strong mandated fiscal support from our Council we will stand out from the rest of the country and be known nationally and internationally as THE place to be. I want to live and work and run my business in a region like this. Thank you.

3072 - Mark Soster

[Strategic Direction>Have we got the balance right?]

No. I don't feel that we can become a cultural powerhouse by allocating 1% to the arts. We've worked hard to develop screen production in Ōtautahi and that is now in serious jeopardy. The Screen CanterburyNZ Production Grant had an initial investment of \$1.5 million dollars and has generated a

3296 - Sharon Gail Powney

The council does need to ensure that the Citizens Advice Bureau (CAB) is fully funded. They do an amazing job and help so many people. Their volunteers provided advice to more than 10,000 people and also nearly 5,000 more were helped from their clinics for employment and JPs. It is a phenomenal group of people who do this. The least the council can do is pay for a member of staff and their rent, so they can continue their work. The council's drop in their funding over the past few years is ridiculous.

3315 - Jill Hargreaves

Citizens Advice Bureau services an increasingly desperate need to Christchurch Public. It requires significant funding. On a daily basis we answer enquiries that should have been answered by CCC paid staff.

>>>

Citizens Advice Bureau provide a much needed service and requires funding as mentioned above.

>>>

Community Funding for Citizens Advice Bureau needs to be significantly increased. Over 10,000 clients were helped in the last year, not including those who took advantage of our legal, tech, immigration, tenancy and employment clinics. We provide a service that often should be provided by CCC, police, district and family courts, and other governmental agencies. If access to these free services are cut to this section of the Christchurch population, desperation will increase, leading to more crime and desperate acts.

3329 - Mel Hillier

I would personally love to see watch this space street art strategy funded. The Artists involved in the submission have the vision we need for Christchurch to reflect its identity in the world. We need to support both local and travelling Artists to be able to express themselves with their God given talent on canvases around our City, allowing them to be inclusive of the many gifts of the people of the City, both local and travelling. Their presence with their designs both beautifies and blesses otherwise barren walls. Our Artists are at the heart of bringing beautiful life to the City! We have an opportunity to support them with their proposal and we should seriously consider not missing this opportunity. I have traveled around the world and many of the memories I cherish, photograph and share are those that Artists have had the bravery to create on walls. I would love to see more of the walls I pass on a daily basis with the life I know they can give.

3353 - Janna Gresham

Where is the funding for >>> The A&P show?

3390 - Penny Westwood

I don't believe that we can become a cultural powerhouse by allocating 1% to the arts. It would be ignorant to not acknowledge the benefits The Screen CanterburyNZ Production Grant has had on our region, local industry crew as well as suppliers and vendors. We've worked hard to develop screen production in Ōtautahi and that is now in serious jeopardy; along with the livelihoods of those who have already or wish to return to return home to or relocate to Christchurch for screen production work. The Screen CanterburyNZ Production Grant had an initial investment of \$1.5 million dollars and has generated a return of \$12.5 million dollars - that's \$12.50 for every dollar spent. This money stayed in the region through crew salaries, transportation, accommodation, hospitality and other businesses. It has been incredibly successful. It isn't in the Long Term Plan and as an investment that generated a return, I feel it must be included.

>>>

We must ensure grants that create revenue for the city, local citizens and local companies, like the Screen CanterburyNZ Production Grant, continue. This grant has provided an incredible \$12.5 million return on a \$1.5 million investment, providing jobs, further upskilling, value and spend in our region.

>>>

If we want to be a cultural powerhouse and financially thriving city, we must focus on supporting and facilitating screen production activities. The Screen CanterburyNZ Production Grant allowed filmmakers and TV creators to get the support they need to create projects that will be created and produced in our city and region generating work and revenue for citizens and local companies. This grant must be added back into the budget.

>>>

The Screen CanterburyNZ Production Grant is critical to the continued development of the screen industry and all the contractors working in this industry in our city, our region and those work want to shift back home to our region with the promise of sustainable workloads. It is necessary and urgent that it is put back into the budget and protected from future interference as it has proved very successful. Without it, there will be very little or no production activity here, leaving many without work, many to leave Christchurch to find this work in other cities, and local companies without the significant revenue generated from this type of work in our region. Early market research that went into supporting the grant showed that producers and filmmakers would not come to Ōtautahi Christchurch without an incentive. We are still developing our infrastructure and our crew depth and as such, are not able to provide the same service and support as studios in Auckland and Wellington. Without the grant, we will be unable to attract the level of production we've had over the last two years and will be left behind. I myself have had to leave Christchurch to seek work in Auckland in 2024. My partner and my family are at home in Christchurch, while I have to work away from home to continue the work I am of great value to. I don't want to be in Auckland. I want to work at home in Christchurch. I know MANY other citizens who feel the same way too. Speaking to many Aucklanders, they also want out of Auckland. If there was a sustainable industry in Christchurch, I know it would attract many hard-working citizens to our region adding great value and generating revenue for our region. Having worked on over half of the productions that operated in our region across 2022 - 2023, I have a really context of the value this work bring to our citizens, our work force, our culture, local companies and the image Christchurch has on a national and international scale. The grant has proved so valuable for so many reasons. The return along speaks for itself. It MUST be included in CCCs LTP. Please review the attached letters I have collected from local companies who speak to this.

3448 - Nadia Maxwell (Overactive Imagination)

Overactive Imagination is a film and television production company based in The Arts Centre. As a resident of the arts centre and an Ōtautahi producer I have two key concerns around the Draft Long Term Plan. 1) Three years ago, I wrote in support of funding for the Arts Centre and find it staggering to once again be presenting a case, in an earthquake ravaged city, for why the council should support the largest collection of Category One Heritage Buildings in New Zealand. We have lost so much. The Arts Centre means so much to so many people. It is a common space, free to all. Internationally, no other collection of heritage buildings of this size operates without either local or central government funding. No doubt there are massive pressures on local government around the country at the moment, but when the chips are down – facing a recession and everyone still scrambling off the back of Covid and lockdowns – is when we need the arts the most. With offices alongside the Arts Centre management, I see how dedicated this team is, how hard they work, week in week out to bring a curated, vibrant, compelling arts programme to the city. I was there when substantial staff reductions were made, I know they are working on the smell of an oily rag and that the reason they pull this off so capably is because they love the arts and believe in its purpose. Do you?... Personally, as a creative in the city, it is an inspiring place to work, surrounded by other creatives amidst beautiful gothic revival architecture. My office is above where Rutherford split the atom, I wonder what he'd think of the lack of value placed on the buildings that housed one of our most famous New Zealanders. The Arts Centre is unique, it cannot survive without your support. Please ensure it is protected for the people of

Christchurch. 2) As the leading feature film production company in the city, I also strongly urge you to reinstate the Screen Production Grant which has been a game-changer for bringing more film and television production to Ōtautahi Christchurch. Over the last three years, the Screen CanterburyNZ Production Grant received a total of 1.5 million from city council which attracted nine productions with a spend of \$12.5 million in production costs that stayed in the region. As well as supporting the local industry this grant has had positive flow on effect onto other industries including accommodation, catering, traffic management, vehicle and security services. I applaud you for offering the incentive but please do not think that the job is done. Those nine productions came because of the incentive. To continue to build on its success, upskilling our local industry and firmly putting Christchurch on the map as a viable film centre, it must continue. The lion share of crew and infrastructure facilities are in Auckland and Wellington, without the incentive we will not see productions continue to come. The costs are prohibitive and without the depth of existing crew and infrastructure we cannot complete. We need the incentive. I am happy to meet with anyone and talk through in more detail if helpful.

3450 - Jenny Howard

I urged the Councilors to include funding to the Citizens Advice Bureau (CAB) Christchurch in this plan. I am a volunteer who has been working at CAB for almost 4 years now. CAB is a valued service here in Christchurch (and the surrounds), which a wide variety of people from a wide spectrum of backgrounds use repeatedly. We are valued by the Christchurch community for the free and easy accessibility and our highly trained volunteers. CAB volunteers take the time to help guide and advise on a huge range of issues and topics. I personally have helped guide and advise; Small Business Owners, Builders and Developers, Managers at large Businesses, Employees of all types of workplaces, Landlords and Tenants/Flatmates/Boarders, Members of the Police, Members of NGO's, Support workers in Health Agencies including Mental Health and their patients/families. I have helped Elderly who are not 'tech savvy', I have helped Principals of High Schools, I have helped Prisoners while they were in our Christchurch Prisons, and I have help a number of our homeless people. I have helped members of our community who have been referred to CAB from; National Government departments, MBIE, Ministry of Justice, Corrections, NZTA, MSD, Immigration NZ. Other clients who have been referred to us from; the CCC, Churches and other religious organisations, Community leaders, Schools, and I have helped others who have been referred to us by their neighbours/friends or families. These lists are not exhaustive. And I am just 1 CAB volunteer. There are over 120 volunteers who help support our Christchurch community within this organisation. We at CAB, also support other CAB clients from around the country, from Northland to Bluff. I haven't taken a call from Stewart Island, yet. I have even had the pleasure of helping a few tourists, one calling from a car park just outside a National park. I urge you to consider including CAB, an essential community service, and other similar organisations in your funding model moving forward. We give value to Christchurch, and we need to keep our lights on. Thank you.

3463 - Fidelma Corkery

No. I don't feel that we can become a cultural powerhouse by allocating 1% to the arts. We've worked hard to develop screen production in Ōtautahi and that is now in serious jeopardy. The Screen CanterburyNZ Production Grant had an initial investment of \$1.5 million dollars and has generated a return of \$12.5 million dollars - that's \$12.50 for every dollar spent. This money stayed in the region through crew salaries, transportation, accommodation, hospitality and other businesses. It has been

incredibly successful. It isn't in the Long Term Plan and as an investment that generated a return, I feel it needs to be included.

I feel this grant must be added back into the budget.

3500 - James Wallis

Please continue to support other important community events such as the Santa Parade and A&P show. We need accessible events in the community to bring everyone together to celebrate in affordable ways for everyone. Events like this allow us all to meet, celebrate our children and communities and all remember our history and why we love this city.

3713 - Lesley Burkes-Harding (Akaroa Heritage Festival Society Ltd)

Akaroa Heritage Festival Society exists to produce the free to attend, family focused Akaroa French Festival every two years for the greater cultural, historic, ecological and economic benefits of the communities of Banks Peninsula. Plus, the sheer enjoyment for the communities of the wider Christchurch regions and actually, New Zealand. 8 - 10000 visitors descend upon our small rural village of Akaroa for three days at least - the financial benefits to our business community are immense at the end of the slow winter months. Local people are contracted to work at The Festival, our local schools and the Fire Brigade have great opportunities to fund raise for their groups by helping us out at the Festival - with food prep and security for instance. Our not-for-profit groups are well supported in our Heritage Marquee and Market Place. We enjoy great community engagement and cooperation from proud Akarovians - our businesses, Te Runanga Onuku, Te Runanga Ngai Tahu, our local Lions group, Akaroa Area School and many others, plus the families of many early settlers all step up to contribute and support. How on earth does our small, volunteer committee achieve this? We have no problems with local engagement - however, our budget for 2025 is approx. \$340000. May we state here that we are extremely supportive of the CCC Events and Festivals fund, and thank the Council for its availability and the supportive guidance of the E & F team throughout our festival prep. The fund is fantastic support for our festival and a major contribution to our funding programme - tēnā koutou. However, we desperately need more financial help to maintain this festival at its current levels of excellence - both in content and professional levels of delivery. French Festival is a great

drawcard for the Christchurch Destination kaupapa, they have been kind enough to include us in their marketing material for the last two festivals. We would also suggest that perhaps it is time for French Festival to be included in the LTP, for us to become a line item would be our dream as I'm sure it is for many people. This would significantly reduce the stresses of fundraising for the entire Festival on our small group, as well as giving us a valuable safety net and the confidence to work toward another stellar event. It must be remembered that we are a small, volunteer, rural group professionally and consistently delivering a significant, cultural and mostly free Family Festival. We consistently punch way above our weight, but it has to be said that funding from our traditional methods is going to be extremely difficult at our current levels of excellence. Please consider our request, we are happy to discuss further. tēnā koutou katoa.

[Full attachment available]

3717 - Sam Hampton (Te Pātaka o Rākaihautū Banks Peninsula Geopark Trust)

We believe Geopark on Banks Peninsula can provide a mechanism that promotes and enhances the values of Banks Peninsula, and in doing so offers a platform that those on the peninsula can diversify within, i.e., ecotourism, connection of products, produce and markets. It is also a destination on our doorstep that is not adequately recognised nor leveraged off. A Geopark offers a sustainable and innovative approach to recognising the assets of the Peninsula, provide local economic opportunities and growth, and directly engages the residents of Christchurch.

>>>

The Geopark can be a key partnership tool within and with the City Council that can be used to achieve that community outcomes and strategic priorities. The Geopark concept is new within Aotearoa New Zealand and a Geopark within the second largest city provides new and novel way that we can promote, connect, learn, play, recognise what for many is our backyard.

>>>

The word resilience is touted a lot. Through such as earthquakes, weather events, Covid, fires, and in the aftermath of such events, we have shown as individuals, as communities, as a nation, that we are resilient. But structural weaknesses are starting to show in the failures of, the instances of damage to, and the multiple patched repairs to, virtually all parts of the country's infrastructure. In a place where critical infrastructure, our lifelines, are needed for our day to day activities (let alone, quite literally in some cases, our survival), how do we look not just to maintain, but to strengthen, develop, and enhance our infrastructure. Our city, towns, villages, settlements, exist and are shaped as a direct consequence of our landscape. For first arrivals (Māori), successive settler waves (Pākehā), and more recent "new" New Zealanders, the land of, and neighbouring to, Banks Peninsula has been a critical component. What originally attracted and continues to attract people to the Peninsula varies. For some it is its prolific wildlife and abundant natural resources, others its protection, yet others for its scenery or as a retreat from the humdrum, or for a lifestyle, an income, a home. Yes, its generous abundance: Te Pātaka o Rākaihautū the te Reo Māori name for this place, means the "great food store house of Rākaihautū", and Te Kete-ika-a-Rākaihautū refers to Te Waihora / Lake Ellesmere as "the fish basket of Rākaihautū" – each of these names give the message of places thriving with life. We (whether through our ancestors or for more recent arrivals, in person) have all journeyed here, be it by double hulled waka centuries ago, rigged ships, steamer, or airliner. Since arriving, we have all inherited, adopted, created our own attachments to the land. When arriving, an assessment is made of resources. What do I need to survive? What do I need to protect my whanau / family? In the past, the answers may have meant how do you yourself modify the

landscape around you to create a sustainable and resilient life for you and your family. Today these same questions still exist, yet with modern transport and communication networks, including the internet, how we view what is needed to survive, our critical lifelines, has drastically changed. Early connections and passageways around and throughout the Peninsula were by ocean and waterways, and by paths and tracks cut within the densely forested landscape. For manawhenua, resources came from the surroundings, seasonal harvesting, trade, and innovation. The Peninsula has archaeological evidence of kūmara gardens, the furthest south of such in Aotearoa. Kāinga (village sites) and Pā (fortified positions) were located around where resources were located and where protection was provided by natural settings. Pākehā arrival on the Peninsula saw the beginnings of significant change. Forest was felled for timber and cleared for grass for pasture, triggering vast habitat lost. It also saw the arrival of new species (i.e., birds, grass, sheep, cattle, other animals, exotic hedgerow plants and trees). Today, these changes still are evident within our landscape: cattle and sheep graze green pastures, following similar practices and traditions as early settlers. Other 'new' arrivals are the focus of attempts at achieving ecological restoration, like the eradication and control of introduced predators, invasive weeds, or colonisers (gorse). How we move ourselves and our goods, both around, and into and out of the Peninsula, has created the communities we have today. Early on, many bays remained isolated from their surrounds, with the only access via ocean going vessel, or long packhorse or bullock wagon trails. These early routes, not highly resilient, were regularly affected by wind, snow, rain, and swell. Wharves and jetties were built for this seaward trade: some retained and restored, others slowly being 'eaten' eroded or buried by natural forces. The advent of formed roadways changed the dynamics of these once isolated communities. Roads allowed resilient connections, reliable and regular transport of wares, and greater access to markets. Throughout the 1880s rail tracks were laid, and the Christchurch to Little River railway provided yet another connection thereby shortening the time to Akaroa, promoting trade and tourism. Reimagined in the 1990s, that rail infrastructure now provides the ecotourism of the Rail Trail. Unlike the rail and sea trade networks of the past, our roading network is critical for many, if not all, of our industries today. Weather events, slips, floods, lack of maintenance and degradation, all impact these critical lifelines and therefore our lives. So how can we look to enhance, not just maintain, this critical infrastructure? Our communities, workplaces, industries, are connected globally via the internet. For many, probably a majority, this is now a vital thread. The expansion of the cellular and internet networks has enabled innovative ways of connecting place to trade, i.e., product history and origins, and has opened new markets, enhancing recognition of Peninsula products and the Peninsula as a destination. Outages to these networks impact business. Like roading, this has become part of our critical infrastructure. For a resilient Peninsula we need resilient networks. For greater investment in these networks, value needs to be shown. Embracing and publicly celebrating our place as a truly unique landscape with fascinating layers of biodiversity, culture, history, community, and conservation, and promoting all of this through a vehicle such as the Geopark, is a way to highlight and leverage, and show value in, investment in all our Peninsula networks. The Geopark provides the opportunity for establishing Te Pātaka o Rākaihautū Banks Peninsula as a destination, to guide manuhiri (visitors) in exploring and connecting to our places throughout the entirety of the Peninsula and, by that, showing the worth / wealth in and of our assets whether natural, intangible, cultural, historical, artistic, products and produce. The Geopark looks to partner, highlight, promote and engage the people of, and the visitors to, Te Pātaka o Rākaihautū / Banks Peninsula. The Geopark is not a park, and it looks beyond our rocks and landscape. A Geopark is an overarching theme whereby we can link together all the aspects and the assets of the Peninsula, providing a way to learn about and engage with our environment, culture, histories, communities, and conservation. The Geopark spotlights the whole of the Peninsula, not just our current developed, built-up, destinations. And so, with multi-destinations we can effectively spread the load (i.e., visitation and visitor spend), enhance understanding and recognition of place, and show the value of and in all of our parts and pieces of the Peninsula, for the future investment required to create a resilient Peninsula.

[Full attachment available]

3731 - Heather McHarg

Even better would be to increase it to allow community agencies to operate even more effectively.

3738 - Finn Jackson

Due to the work they do in promoting ecological restoration and predator control across the Christchurch district, I support community funding being allocated to the following organisations: - Pest Free Banks Peninsula - Te Kakahu Kahukura - The Summit Road Society, and - The Banks Peninsula Rod Donald Trust.

3740 - Nicky Sharples

Support and funding from council is essential for local community groups. Eg Citizens Advice Bureau which requires ongoing support funding. See attachment

>>>

Continued funding will allow CABCHA to...

1. Continue to provide free, impartial and verifiable information to support the wellbeing of all sectors of the community. We continuously evaluate services to ensure that the needs of the more vulnerable members of the community are being met (e.g. low-income families, elderly, Pacific Peoples, migrants, and people with disabilities) and we are keen to move our City branch into new premises located in East Christchurch, where we can work more closely with other community trusts and organisations.
2. Continue to address digital exclusion issues by increasing access to information and support services to those without the ability to connect online. CABCHA helps redress the inequity of the digital divide in Christchurch by providing access to online forms, keeping paper-based information and forms, providing volunteers and clinics for those who need help with letter writing or filling out forms, and actively assisting clients to navigate the online environment to meet their needs. We are committed to providing information, specialist clinics and increased accessibility to all our services face-to-face. We provide activities, assistance, and programmes that promote hauora by increasing community connectedness and participation in addressing unmet needs.

[Grants & Funding > Strengthening Communities Fund]

We need more support for community organisations through an increase to the Strengthening Communities fund, and reinstatement of the Sustainability fund

>>>

We need to continue investing into the future, esp in regards to >>> supporting communities via the Strengthening Communities and Sustainability fund.

>>>

I support continued funding (for funding to be reinstated) for the Sustainability Fund.

>>>

I would like additional funding to cover the roles currently paid for out of the Jobs for Nature Funding. More funding for the Biodiversity Fund to support work on private land. Need to reinstate the Sustainability fund (which ends FY25) Need to reinstate the Community Partnerships Fund. Was \$350K p/a, and it ends at the end of June this year

3855 - Bree Loverich

If incentives for street art and screen industry are not sustained, there is a real risk that this vibrant activity will diminish or cease altogether and create a lack vibrancy. These sectors thrive on support that extends beyond mere appreciation, requiring financial backing and policy incentives to flourish. Without such support, productions may relocate to more favorable environments, leading to a loss in both cultural influence and economic benefits. Incentivizing these industries is essential not only to maintain the current level of activity but to encourage growth and innovation, ensuring that the cultural and economic contributions they make continue to enrich our society.

>>>

There needs to be an investment in economic development via the screen production grant and tourism via the street art strategy.

>>>

Major events in the city should certainly include support for the street art festival, given its role as a significant driver of visitation and its widespread support among residents. The festival not only boosts local tourism by attracting visitors from various regions but also enhances community engagement and pride, enriching the cultural fabric of the city. Supporting such a festival underscores a commitment to nurturing artistic expression and cultural diversity, which, in turn, can have positive economic impacts through increased spending in local businesses and heightened national and international visibility of the city as a vibrant cultural hub.

3874 - Simon Gray (The White Room)

As well as increasing funding for the arts and culture sector, which provides many creative opportunities and activities across the city.

3913 - Mark Darbyshire

The Performing Arts Precinct is not currently equitable and accessible to the entire performing arts community. It is home to the "theatre elite" of the Court Theatre and the Isaac Theatre Royal. Council needs to find ways to use the remaining land to make the precinct accessible to other performing communities in Ōtautahi (especially, small/independent artists and theatre companies) and to improve the range of different-sized events it can accommodate. Submissions have previously been made on building an amphitheatre to operate for a few years until a suitable permanent use can be found. Another option could be for council to put enough money into Andromeda Arts Trust to build a modest theatre in the precinct, or to build a venue that is accessible to community theatre companies that used to have their own theatres pre-quake but are now stuck performing in schools.

3951 - Steph Walker (Christchurch Arts Audience Development Trust)

[Rates > Other]

Christchurch Arts Audience Development Trust are pleased to see arts, culture, creativity and ngā toi Māori funding streams have a modest increase in the LTP. If we reflect on the key community priorities and outcomes we can see a clear role for our sector yet we do not see any clear increases in resourcing beyond a modest funding increase. Over the next four years, some major creative infrastructure will open to the public and become available for use in the arts, creative and cultural sector; including dance and movement studios at Parakiore, the new theatre soon to be home to TheCourt, and Te Kaha, a venue for the big events, including concerts and festivals. We are concerned that our (largely) under-resourced organisations will not be able to afford to utilise these spaces to drive community engagement in arts culture and heritage without more substantial resources being available - whether that be through more funding for organisations, or substantially subsidised rates available at venues around Ōtautahi.

3955 - Elise Harris

I believe the Screen Canterbury production grant is of great value to our city also. As a semi-recent film-making graduate, I'd previously believed that I'd have to reluctantly move to Wellington or Auckland to further my career. Over the last few years, however, I've seen our local film industry grow thanks to the grant, and have much hope that it can continue to grow and I can further my career by staying here in Christchurch. It would be a shame to see that progress lost and for myself and many others to have to leave the city in search of opportunities further afield.

3974 - Amanda Jenkins

I feel that we need to ensure grants that make the city money, like the Screen CanterburyNZ Production Grant, continue. This grant has provided an incredible \$12.5 million return on a \$1.5 million investment, providing jobs and spending in our region. It is growing an ecosystem that is connected to the larger community of businesses and encouraging people to move back to the city and live.

>>>

I feel that the Screen CanterburyNZ Production Grant is critical to the continued development of the screen ecosystem in our city and our region. It is necessary and urgent that it is put back into the budget and protected from future interference as it has proved very successful. Without it, there will be very little or no production activity here. Early market research that went into supporting the grant showed that producers would not come to Ōtautahi Christchurch without an incentive. We are still developing our infrastructure and our crew depth and as such, are not able to provide the same service and support as studios in Auckland and Wellington. Without the grant, we will be unable to attract the level of production we've had over the last two years and will be left behind, nationally.

[See attached letter]

>>>

However, as representatives of the developing screen ecosystem, we at Te Puna Matarau | Canterbury Screen Industry Association have united with other screen stakeholders in our region to bring the Council's urgent attention to the removal of the Screen CanterburyNZ Production Grant from the Draft Long Term Plan 2024-2034 (LTP). We request the following:

- 1. Reinstatement of the Screen CanterburyNZ Production Grant as an independent line item**
- 2. Protection of the grant from leadership changes within either ChristchurchNZ or the Christchurch City Council by ensuring that the money is utilised strictly as intended through council and grant directives**

Without it, all of our collective good work will be undone.

We are asking you to reinstate the Screen CanterburyNZ Production Grant based on the overwhelming evidence of its success. It has returned a great deal to our city, our region, and to every single business and individual that has benefited economically.

[FULL ATTACHMENT AVAILABLE]

>>>

No. I don't feel that we can become a cultural powerhouse by allocating 1% to the arts. We've worked hard to develop screen production ✓ Draft Long-Term Plan 2024-2034 from Jenkins, Amanda in Ōtautahi and that is now in serious jeopardy. The Screen CanterburyNZ Production Grant had an initial investment of \$1.5 million dollars and has generated a return of \$12.5 million dollars - that's \$12.50 for every dollar spent. This money stayed in the region through crew salaries, transportation,

accommodation, hospitality and other businesses. It has been incredibly successful. It isn't in the Long Term Plan and as an investment that generated a return, I feel it needs to be included.

>>>

If we want to be a cultural powerhouse city, we need to focus on the arts which includes screen production activities. I feel that the Screen CanterburyNZ Production Grant allowed filmmakers, TV creators, and game developers to get the support they need to create projects that will be created and produced in our city and region. I feel this grant must be added back into the budget. This WILL bring more people back to the city to live, we will have more depth, capacity and capability to grow this industry so that the chain supply grows and our assets grow to attract larger business from international partners and money into the city.

4016 - Joanne Zervos

- Consider funding towards Orana Park & Santa Parade, as these are family friendly & run by volunteers.

4018 - Winston Howison

I am a business owner in Akaroa. My submission relates to community events support and tourism development funding for my region.

>>>

Application to the Christchurch City Council (CCC) Long Term Plan (LTP) for multi-year funding to establish an economic development organisation for Akaroa and the Bays. [FULL ATTACHMENT AVAILABLE]

4025 - Robin Wynne-Williams

- To follow up on the Canterbury University geography dept summer research project that I had investigated (and was going to cost about \$20,000), to study the possibility of alternative ski fields apart from Mount Hutt, eg a possible ski trail over the Alps to the West coast, with the view of ChCh hosting a future Winter Olympics. A ski track over the Alps would help foster winter ski events in the West coast. And if not enough snow, then make it!!
- The Southern Cancer centre; that requires funding to be established especially as ChCh/Canterbury has the highest incidence of Bowel cancer in NZ.

- Assist the CHCH Otago medical school and the Royal college of gps to educate the gp registrars in ChCh, and assist me with my work with ADHD/aspergerly folk with my research into ADHD/aspergerly association with associated neuro immunological disorders, and assist me to help to hundreds of kids and adults in the South Island but especially in ChCh/Canterbury/West coast with ADHD/Aspergerly issues to find a medical centre to assist with the ongoing care, research, and with funding to establish objective diagnostic tests, eg blood, urine, FMRI and the Invermay dog sniffing tests. Without this assistance, the economic loss for these people and the community is billions.
- Assisting the Lincoln university and the Ag research dept to continue new and ongoing Primary Industry research to assist with increasing the economy, reducing climate change issues and increasing career opportunities by working with eg the ex Wrightsons agri studies as an alternative to Primary Ito as the latter only accept students who are employed in primary industries, thus excluding students and life style farmers who want to gain knowledge
- *Initiate support for the redevelopment of use of local primary industries, and create employment; the use of local wool/possum fur for weaving etc, and other industries, eg seaweed to create plaster board for building. ChCh (and NZ) has to become more self sufficient by better utilising primary industry products and reuse of used products, and eliminate waste.
- ***2025 will be the ChCh 175th anniversary, and not a mention has been made re a function, eg a week long series of events!!

462 - Brett Marshall (Air Force Museum of New Zealand)

1. Introduction

- 1.1 The Air Force Museum of New Zealand is a top Christchurch visitor attraction, attracting more than 180,000 visitors each year and hosting hundreds of community events.
- 1.2 Opened in 1987, the museum occupies 37 hectares of land on the site of the former RNZAF Base Wigram, and it is the birthplace of military aviation in New Zealand.
- 1.3 One of three national service museums, it is the home of the RNZAF's historical collection including 33 aircraft and has more than 1 million objects in its collections.
- 1.4 The museum is run by a not-for-profit organisation, The RNZAF Museum Trust, with support from the New Zealand Defence Force.
- 1.5 The museum is a national war memorial, and entry is free.
- 1.6 The museum is a Tripadvisor Travelers' Choice Winner – which places it in the top 10% of attractions worldwide. It is regularly placed at #2 attraction on Tripadvisor's list of Christchurch attractions, based on user feedback.

2. The museum's contribution to Christchurch city and Canterbury

- 2.1 The museum has been a long-term commercial partner through its relationship with Venues Ōtautahi (VŌ), previously known as VBase.
- 2.2 The museum, in conjunction with VŌ, has hosted more than 1,150 significant city events since 2013.
- 2.3 As one of the only large venues available after the 2011 earthquakes, the museum provided an essential hub for events and also a safe storage site for heritage collections from around Christchurch and the wider region. More than 30 heritage organisations used the site for free secure storage following the quakes, and the museum is still providing free space to Canterbury Museum, Lyttelton Museum and the Antarctic Heritage Trust.
- 2.4 The museum makes its spaces available to dozens of community groups free of charge – including the Muslim community, Dementia Canterbury, the NZ Blood Service and Vietnam war veterans. We regard ourselves as part of the fabric of the wider community, and we are proud of what we do.
- 2.5 The museum is also a significant ratepayer, contributing close to \$400,000 a year in rates.

3: The project

3.1 When significant RNZAF aircraft types are retired, type examples are gifted to the museum trust for conservation and display.

3.2 The RNZAF has recently retired two of the most significant aircraft of the modern era, the Lockheed P-3 Orion and the C-130H Hercules. The museum trust has been gifted one example of each aircraft, and Orion NZ4203 has been partially dismantled and is already in storage. The Hercules is due to arrive early in 2025.

3.3 The C-130H Hercules is a key part of Christchurch's history as an Antarctic gateway city. Hercules have been flying from Christchurch to Antarctica since the 1965.

3.4 The aircraft are also an important part of Christchurch's earthquake story – flying the first relief flights and search and rescue teams into the city after the quake struck.

3.5 Both are significantly large aircraft and cannot be housed within the museum's current exhibition hall. The C-130 is the largest, with a 12m high tail and a 40m wingspan so a new, bespoke space is needed to house both.

3.6 The museum is planning a \$20 million 2000m² extension on current land to exhibit the aircraft in.

4 Benefits to Christchurch

- 4.1 The city will benefit through increased visitor numbers at the museum and commercially through increased flexibility in the spaces used by our commercial partner VÖ.
- 4.2 Christchurch City would be recognised as a cornerstone supporter – and this commitment would give us a good basis to approach other sources of funds.
- 4.3 Housing the new aircraft would cement the museum’s position as a premier heritage attraction. They will add a considerable amount of wow factor to our museum, as well as ensuring an important part of our heritage is conserved for future generations.
- 4.4 As part of our ongoing partnership, Christchurch City contributed to the museum’s 2013 expansion, which provided VÖ with a significant new space as well as a new commercial kitchen to support large events.
- 4.5 There is huge interest in the aircraft – delivery of the P-3K2 to our museum attracted national media attention. We would expect the addition of the aircraft to the collection to give our visit numbers a significant boost.
- 4.6 Discussions are currently underway with the Department of Prime Minister and Cabinet as consideration is being given to naming the new exhibition hall in honour of Queen Elizabeth II. Of note the King is the current patron of our museum.

5 Level of support

- 5.1 We ask that the council consider a one-off commitment of \$5 million towards the \$20 million project. This is a one-off request of the council – there would be no ongoing operational expenditure requirements.
- 5.2 The council’s support would allow the museum to approach other funding providers in the private sector with confidence that there is backing in place. The museum’s previous expansion was supported by a number of other funders which gives us confidence that the support can be found.
- 5.3 We would expect the project to be under way in 2027 and would be looking for the funding in the 2028-2029 financial year.
- 5.4 We ask that provision of this funding be included in Christchurch’s new long-term plan.

474 - Barry Hamilton (The Society of Rural History Inc)

Subject: Submissions for long term plan

To Whom it May Concern

I am a member of The Society of Rural History Inc at Ferrymead Heritage Park and

1

474

see the Park to be of significant importance to Canterbury and outlying districts. Our visitors from both New Zealand and abroad are totally astounded at the quantity and quality of our items on display. Combined with all the other Societies at The Park, I consider we have an important, World Class collection worth sharing.

Barry Hamilton
President
The Society of Rural History Inc

579 - Rosemary Neave

[Parks > Biodiversity & Ecological Restoration]

We need more funding to support biodiversity enhancements as a priority, especially in partnership with community and hapu groups.

>>>

3. More funding to support biodiversity enhancements as a priority, especially in partnership with community and hapu groups.

612 - Annette Mauger

The old Lyttelton Tug is struggling to survive and the Council should be providing them with the \$300K needed to upgrade and a yearly grant awarded to maintain this treasure. I realise heritage is

not as high on the councils priority list as the more sporty events, but this important.

667 - Frans Jeldrick Oorthuys

As said, more to heritage such as Ferrymead Historic Park, specifically to the Fire Service Historical Society. They desperately need additional space under cover for display of vehicles now in storage.

800 - David Miller (Pest Free Banks Peninsula Project Management Group)

3. Our requests

We request that Council reconsiders the removal of the Environmental Partnership Fund and reinstates funding for the Pest Free Banks Peninsula elimination programme (at the current contribution of \$50k per annum) and PFBP feral ungulate programme (at the current contribution of \$40k per annum). Following the success and proven methodology of the feral goat eradication programme (removing 4,000+ feral goats from the peninsula), we have the skills, tools and momentum to do similar for feral pigs.

We also advise and request that CCC maintains enough budget for biosecurity work to ensure biodiversity values and gains on Council owned land are supported by ensuring capital and operational budgets are adequate for the task. We have found that the 'halo effect' of pest

control across boundaries creates encouragement to neighbouring landowners to collaborate and get involved.

4. In conclusion

CCC funding has been crucial for the development and implementation of programmes that have achieved national significance for their innovation, their community inspiration and their efficacy. Working through the Banks Peninsula Conservation Trust, CCC's support to Pest Free Banks Peninsula has enabled a nationally recognised programme eliminating feral goats from the Peninsula (to be followed by a similar project to remove feral pigs). Pest Free BP has shown the power of a good idea in skilled hands and in a motivated community, resulting in world-leading impacts in possum, hedgehog, mustelid and feral cat control and elimination.

Finally, a feature of the Pest Free project has been the warm and beneficial collaboration between groups of inspired colleagues across agencies and communities, not least with our colleagues in the CCC Parks Team. They and others in CCC have our admiration and gratitude!

We request that at a time when we are winning, Council continues its support in both practical and financial continued commitment. Thank you for reading our submission. We wish to speak to our submission.

[FULL ATTACHMENT AVAILABLE]

824 - Penny Carnaby (Banks Peninsula Conservation Trust (BPCT))

Requests for additions to the LTP 2024/2034

The Trust requests the reinstatement of the Environmental Partnerships Fund (or a similar grant vehicle) to continue funding at the same level as the LTP 2021/23 for the following:

- The continuation of an annual contribution from the EPF of \$30k towards BPCT operational costs (we note with thanks the allocation that remains in the CCC Parks budget).
- The continuation of an annual contribution of \$30k to support the Te Kakahu Kahukura programme.
- The continuation of an annual contribution of \$50k to support the Pest Free Banks Peninsula elimination programme.
- The continuation of an annual contribution of \$40k to support feral ungulate removal on Banks Peninsula.

[Full Attachment Available]

886 - Lee Robinson (Canterbury Cricket Trust)

[Grants & Funding > Events Ecosystem Funding]

Canterbury Cricket Trust

Submission Christchurch City Council – Long Term Plan – Funding for Events in Christchurch

1. Events are extremely important to the City, they are fundamental to our image, our sport and recreation, our culture and our people.
 2. As importantly, they are an economic benefit to the City and they must be pursued and promoted and vigorously support our cities exposure for tourism and our cities businesses.
 3. Our exposure on the international stage is vital to the City's wellbeing, its' tourist industry and those in business that take risk in relying on the tourist and retail dollar.
 4. We are concerned, however, that cricket and other partners who provide the services and support for these events are required, at the moment, to fund or, at least, underwrite these events. It is unacceptable, unsustainable and untenable for those responsible for promoting sport, thereby providing recreation and wellbeing for our young participants, to be left to fund or underwrite events that the City should, and has, until this long-term plan, been responsible for.
 5. By way of example, Cricket has had to underwrite \$80,000 to try and seek the scheduling of a proposed English Cricket test in Christchurch in November / December 2024. As we have reiterated this is simply not sustainable.
 6. Quite apart from the fact that that it is not the sports and various organisations objectives, these third parties are not for profits and often charitable; such commercial funding arguably does not come within the objects, often charitable, of these organisations.
 7. Cricket needs funds for the growth and development of its game. This is at the community level for school children and participants and clubs. It should not be funding or underwriting facilities and events and, in other words, subsidising the City to do its job, like other councils around the country are currently doing.
 8. It is strongly urged that the City funds events from its own resources. Sports in particular must have its own money for its kids, its youth, its participants to enable growth of the sport and promote health and culture.
 9. There are multiple examples of the City pursuing expenditure where its priorities are concerning. These need to be critiqued and reconsidered in many respects.
 10. In the meantime, we would urge and encourage the Council to adopt its alternative option for funding bids for major events. This would comply with its previously stated policies that are set out below. The City should fund these events rather than compromise its future vitality and promotion. A 0.42% increase in rates should not deter the city from complying with its previously stated obligations.
 11. Why would the City not invest in events, when its return on investment will provide \$650M over the next ten years. This for a modest increase in the rate levy.
 12. We would remind the Council of its previous intentions when a decision to build a multi-use arena was made.
 - Strong communities;
-

- Celebration of identity through arts, culture, heritage and sport;
 - Livable city;
 - Vibrant and thriving central city;
 - Prosperous economy
 - Modern and robust city infrastructure and community facilities.
13. The latest proposal where there are no funds in the budget for events seems to fly in the face of these outcomes. The city resolved to strengthen its appeal as a vibrant city in the following manner:
- The livability of Christchurch and its reputation in a 21st Century “things to do” city;
 - Ability to compete with other cities and attract major events and concerts;
 - Keeping expenditure in the city;
 - The return of private sector investment confidence in the city;
 - The attraction and retention of young people to the city who are currently choosing to work and study elsewhere; and
 - Return of city and retail pride

We have done the hard work to provide and plan for these facilities. Now let's use them. Businesses have invested in the CBD in anticipation of having events now and not having to wait another three years in terms of the Councils considered options.

918 - Gina Dellabarca (Show Me Shorts Film Festival Trust)

We would like to see Christchurch City Council re-invest in the screen industry by retaining Screen CanterburyNZ. Over the last few years, this organisation has served the region by attracting film and television productions to shoot in the area, bringing with them jobs, training and money spent on accommodation, equipment and entertainment. Money invested into fostering the local screen industry is returned with income as well as cultural enrichment for the people of Canterbury.

>>>

Retaining and investing in Screen CanterburyNZ is vital to the continued development of the screen industry in Christchurch. Without it there will be a huge drop in both local and international films and television productions being shot in the region.

Not Stated

2335 - Gerard Smyth

ChCh City Council is to be congratulated for its investment in the Arts. Not always across New Zealand. However the screen sector has long been a depleted corner of the arts in the South Island. Well over 90% of their visual story telling funding is spent in Auckland. Those of us in Canterbury seldom see ourselves represented in stories about us, by us and for us. Screen Canterbury in the last three years has spectacularly started to reverse this trend. In no small part this has been due to CCC funding.

6 comments supported, and 12 comments opposed.

59 comments suggested what could be done differently, and 14 comments provided general feedback regarding other grants & funding.

Support

1301 - Caitlyn Robertson

[Grants & Funding > Orana Park Funding]

I believe there should be more funds going towards parks like Orana Wildlife park & Willowbank as they are home to many Taonga species and precious animals to many who reside in Christchurch/New Zealand.

>>>

Places like Orana Wildlife Park and Willowbank are key recreation and educational facilities and for some people are the only opportunity they will ever get to seeing such species in their life. With consistent decline of species and environments due to change of land use and agricultural growth, global warming and many other factors, we need to prioritise places like these. Christchurch is so lucky to have these accredited wildlife parks and actually can make a difference to population numbers if the support and money is contributed to them. Coming from someone who has lived in Christchurch most of their life and studied in Dunedin, I have gone to animal parks as much as I could, when living in Dunedin I was so sad I couldn't go and look at these magnificent creatures. Please consider contributing some of the money to these places not only for continued care of these animals but for the health and well-being of the citizens of Canterbury :).

2087 - Emma Norrish (Waipapa Papanui-Innes-Central Community Board)

[Parks > Other]

The Board is grateful for being able to effectively support our community through the continued funding of community grants and community development which facilitate a large number of groups and projects, to help address the issues that have required these initiatives. Community Funding and Partnerships: An example of the importance of maintaining the funding to partner with our community is the work being undertaken on the revitalisation of Petrie Park. The local community group, in conversation with residents, is doing amazing mahi to activate this space and the Board continues to support them to fulfil the vision for the park. We would strongly indicate that the support this community receives through board funding, and the time and expertise of the Parks Unit which is critically important, should not be compromised by any aspect of the LTP. The project is an exemplar of what community can do, and how it can be made better, just by maintaining responsible, socially conscious levels of spending.

2824 - Hannah Mason

[Recreation, Sports & Events > Events], [Parks > Heritage (Capital)], [Libraries > Libraries (Capital)]

Not particularly. Efficiency is always good and I would be pleased to see the council become more efficient with ratepayer money, but I would be sad to see cuts to the services and the great work that the council and its employees do, and especially sad to see cuts to cultural events, grants, heritage, libraries, etc.

3412 - Alicia Harbison-Price

[Recreation, Sports & Events > Events], [Community Facilities > Community Facilities (Operational)]

The Council will need to ensure it has the frontline staff and expertise required to build meaningful relationships with/working with citizens.

- For "Customer satisfaction with the delivery of community support, resilience, development, and recreation initiatives (4.1.27.1)1" has dropped below the 80% target.
- "Customer satisfaction with the quality of Council event support (2.8.6.2)" has dropped 7%.

3619 - David Fuffy (Richmond Residents' and Business Association)

We are strongly supporting the efforts of the Shirley Intermediate School Board sub-committee tasked with restoring the swimming pool complex with the target of providing a community resource for the school community and other community organisations with a targeted opening date of late 2024. We applaud and welcome the \$60,000 grant from Council through their Better Off programme and seek to magnify this significantly through community effort and in kind support. It should be noted that this is a significant project that requires ongoing support which will deliver huge benefits for the wider community. This is another example of a prudent opportunity to deliver enhanced value in excess of that currently budgeted and targeted within the LTP while achieving maximum effect for the community.

This project requires multi-agency support: Council, four local schools, and many other community agencies (eg. Laura Ferguson Trust, Avon Hub, Shirley Village Project, etc) and could prove to be a successful model of community collaboration providing a great outcome.

3868 - Don Gould

CCC also need to take a harder look at projects and turn away more requests that come from groups that should be funded from government or are basically doing the work of central government because central government aren't delivering good outcomes in our communities.

Again, in my view CCC spends too much time working in ponds that are the domain of others and needs to stick to its core roles. The LGA is a very broad act and can be manipulated to give reason to do just about anything in the interests of public good.

CCC needs to better focus on civic roles that are actually the role of local government and keep out of areas that are the role of central government.

Oppose

201 - AJ Wade

Stop funding superfluous items - private community BBQs

2658 - Finn Jackson (Summit Road Society)

While retention of the Strengthening Communities and Biodiversity Funds is a positive aspect of this LTP, we have strong concerns about some of the other actions proposed, including the abolition of the Sustainability Fund, the Environmental/Climate Change Partnership Fund, and cuts to funding for Pest Free Banks Peninsula.

The Sustainability Fund is an important part of enabling the community to assist the Council in reaching its climate change targets of reducing emissions of long-lived gases by 50% by 2030, and to net zero by 2045. Removing this funding would be inconsistent with the Ōtautahi Christchurch Climate Resilience Strategy and the Council's 2019 declaration of a Climate And Ecological Emergency. The 2030 deadline is rapidly approaching, and the window for effective, timely action is closing. We request that the fund be retained, and increased by \$20,000 to \$400,000 per year.

The Summit Road Society is a recipient of the Environmental/Climate Change Partnership Fund. At present, the Summit Road Society receives \$39,000 per year from this Fund. We are surprised and extremely disappointed to have learnt that this fund is proposed to be abolished. The Summit Road Society is a non-profit group, run mainly by volunteers and funded through bequests and charitable grants. The removal of this funding would have a significant negative impact on our work to restore the natural environment of the Port Hills, which is already facing funding pressures including the expiration of Jobs for Nature funding for our Avoca Valley restoration project. We request that the fund be retained, and further request that due to the work the Summit Road Society does on the Port Hills our annual grant is increased to at least \$50,000 per year, paid for either through the Environmental/Climate Change Partnership Fund or the balance available for allocation from the Capital Endowment Fund. Our volunteers undertake over 15,000 hours of volunteer work a year. This includes 8000 hours on public reserves on the Port Hills including CCC reserves. At a Living Wage rate, this is equivalent to \$417,000 in labour. Supporting volunteers to undertake ecological restoration and pest, predator and weed control is an excellent use of Council resources. It is short sighted of the Council to cut funding to environmental organisations. We are facing a dual crisis of climate change and biodiversity loss. There are costs of action but the costs of inaction are even greater.

Finally, Pest Free Banks Peninsula is a flagship project aiming to rid Banks Peninsula of introduced pests by 2050. The Predator Free Port Hills project supports this vision, aiming to create a buffer zone of effective control of predators along the Port Hills. Additionally, we run trapping lines in all our reserves. We strongly oppose the proposed cuts to funding for Pest Free Banks Peninsula. Removing funding now would jeopardise the work that has already been done, and throw doubt on the future success of the project. We request that funding for Pest Free Banks Peninsula be retained, and if possible increased.

In Conclusion

Thank you for the opportunity to make this submission. We recognise that the Council is operating under financial pressures. However, we do not believe that cuts to funding for the important work that community groups in particular do to restore our already degraded and neglected environment is an appropriate way to reduce these pressures.

[Full attachment available]

2799 - Dot Lovell-Smith

Stop subsidising private businesses and elite sports organisations to run events that are Really Great for only a very small percentage of the Christchurch business population. I don't believe funds raised from the public should be used to subsidise private enterprise.

3127 - Dianne Downward

\$1M No support of A&P show as they need to work out their finances and management on their own.

3353 - Janna Gresham

It seems you are cutting funding to key community facilities which then by default will break up the heart of Christchurch. Shame on you.

3815 - Dianne French

No subsidies for non-essential issues such as community gardens and pointless projects.

3898 - Richard Smith

STOP CLIMATE RESILIENCE FUND PROVISION

3902 - James Ridpath

Its unfair to keep bringing up community grants as something that could possibly to be cut when its such a tiny amount of the budget and brings a huge amount of support to a wide variety of people.

3969 - H Bloomer-Law

Loss of the sustainability fund is scary, again, there is a national government which is not supporting green jobs, so funding for community organisations to continue conservation mahi is critical.

3998 - Ben Alder (Christchurch Envirohub)

The disestablishment of the Sustainability Fund and Climate Adaptation Fund for community projects seems short-sighted. Public involvement and activation in terms of solutions to climate change are an integral part to overcoming climate related challenges.

540 - Ross Allen

I consider that the bid funding proposed is too high. The new rebuilt city is highly attractive to both leisure and business visitors and related industries. And much of the promotions work can be done by the new and improved venues.

>>>

[Grants and Funding>ChristchurchNZ Funding]

ChristchurchNZ funding from the Council was increased 30% in 2022. This level of funding should be frozen for ten years, while the effectiveness and value for money is reviewed.

662 - Cameron Taylor

Quit giving money away as "grants"

Other

1352 - Lin Klenner

Life in Vacant Spaces funding/more funding for weed and predator control,

1362 - Pablo Rodriguez

Fund sexual harm prevention

1416 - David Laughlin

The city has a number of excellent community oriented facilities, and all of which are facing the same fundamental problem, of increasing operational costs, but no longer being matched by the revenue streams, which in many cases served well in the past. Operational funding support will be needed by a number, or they will just disappear, and the city will be the poorer for it.

1522 - David Alexander

The plan reads like these are going to be solely funded from rates. I think that the community groups that are asking for funds should be involved with fund raising. I think that if a group is asking for few million dollars, they should be able to russle up a few thousand signatures.

1575 - Hollie Hollander (Pest Free Banks Peninsula)

- Concerned about the proposed removal of the Environmental Partnerships Fund (EPF) will have a negative impact of significance on the ability of community-led organisations to deliver conservation outcomes for the benefit of current and future generations of Christchurch City residents.
- Concerned that the 21 partner Port Hills-focused Te Kakahu Kahukura (TKK) programme will lose funding at a time when it is most needed. Post another Port Hills fire the important role of this community-driven programme in supporting landowners has never been clearer. If appropriately resourced this community-led programme can support: ecological recovery from fire damage; proactively plan for fire risk mitigation of existing and future indigenous biodiversity across the Port Hills; and establish an ecologically robust Port Hills forest that is a biodiversity hub for Christchurch City, with significant climate resilience benefits.
- Concerned that Council's grant via the EPF to Pest Free Banks Peninsula elimination and feral ungulate programmes have been discontinued. When removing funding we have to consider the effect on the ground: re-incursion of animal pests will occur and the investment of CCC (not to mention the incredibly hard work of so many in our communities) will have

been for nought. This negative impact will also be felt for years on land owned by the Council.

- Concerned that the removal of an EPF grant supporting the Banks Peninsula Conservation Trust's operational costs means their organisational focus has to shift towards securing new funding to "keep the lights on". This puts pressure on the BPCT's ability to provide the leadership support and facilitation for collaborative community-led programmes like TKK and Pest Free Banks Peninsula.

>>>

Specific requests for additions to the LTP

Requests the reinstatement of the Environmental Partnerships Fund (or a similar grant vehicle) to continue funding at the same level as the LTP 2021/23 for the following:

- The continuation of an annual contribution of \$30k to support the Te Kakahu Kahukura programme.
- The continuation of an annual contribution of \$50k to support the Pest Free Banks Peninsula elimination programme.
- The continuation of an annual contribution of \$40k to support feral ungulate removal on Banks Peninsula.
- The continuation of an annual contribution from the Environmental Partnerships Fund of \$30k towards BPCT operational costs so they can continue to facilitate these strategically important collaborative programmes.

1690 - Richard Suggate

Maintain or increase the biodiversity grants scheme. [Parks > Biodiversity & Ecological Restoration]

1837 - Rosalie Griffith

Do not increase bid funding - Some of those that we fund, should pay us for the privilege of coming here eg rugby!!

1880 - Elaine von Rhenen

[Grants & Funding - Orana Park]

Yes, it would be good if you could consider funding for places like Orana Wildlife Park and the A&P Show. Such facilities help build the community and bring tourists to town who in turn spend money at local businesses which boost the economy.

1950 - Shanae Kirk

The sustainability fund ends in the financial year of 2025. In future years, this should be reinstated for long-term mitigation of climate change.

1960 - James Beck (The River Ōpāwaho)

[Parks > Parks Spending (General)]

Creating pathways for community organisations - like The River Ōpāwaho - to partner with the council to achieve its goals is an essential aspect of achieving these outcomes. Making sure that there is funding available and processes established to be able to partner with community organisations is essential. Especially for the Urban Forrest plan and the Food Resilience Policy.

2000 - Victoria Nebbeling (Canterbury Community Gardens Association)

There is more need for support in community projects via funding and climate change/community resilience objectives.

2079 - William Muir

- reduce grants.

2087 - Emma Norrish (Waipapa Papanui-Innes-Central Community Board)

The Board would also like to know that maintaining community funding is essentially embodied in the Council's outcomes and priorities in light of how fundamental an empowered and resourced community sector is to the Council being able to sustainably achieve anything.

2124 - Mary Chase

Keep funding for distribution by community boards for projects in their ward.

2407 - Dave Evans

[Strategic Direction>Financial Strategy]; [Strategic Direction>Have we got the balance right?]

3. The council continues to complain that they have no money, must raise rates far above the % of inflation, and continues to give grants to organizations that are incapable of balancing their own budget. More horrible business decisions.

2475 - William Porter

Needs more attractions like aquarium and to get more funding to Willowbank and orana

>>>

Aquarium, orana, Willowbank and parks/ attractions are a must

2500 - Carsten Knott

Could be more for Sustainability and Environment support

>>>

Missing Sustainability and Environment support

2502 - Keri Glassenbury

No, you haven't enough in there for communities. Community groups who are right at the grass roots helping people when it is needed before they hit crisis point.

>>>

You have very little money put aside for communitys. This is vital - people are important and in no where does the 10 year plan seem to be acknowledging this

>>>

Remember it is about the people. Health facilities are already at crisis. Community organisations are a major part of helping those before they hit crisis.

2514 - Jeannie Murtagh

Charities should continue to be supported unless they are making huge profits annually.

2550 - Jacinta O'Reilly

I feel this aspect needs more attention. Over recent years there have been instances where community organisations and projects have suddenly lost funding. While it's understandable the organisations are indignant and also that there are limits on the critique it's appropriate to share, it seems that at least sometimes this came as a surprise to the organisation. This is certainly wrong. I think 3 years funding should be seen as a benchmark of approval and after that defunding should be a managed process. I don't think defunding should not happen-organisations change and some

are or become ineffective. We should have high standards. But a mediation/revitalisation/redevelopment process would be a better investment than removing one organisation and hoping another will spring up. We need some neutrality and objectivity in the process. Our charitable sector could be expected to be more self-critical and have expectations that provision is up-to-date, reflexive and responsive. A charitable organisations panel of members and beneficiaries could contribute a lot. Formal and informal benchmarks could encourage and even ensure development. The divide between providers and beneficiaries should be reduced. It's quite hard for small organisations to maintain representative and well-trained boards. Too many boards are unable to share struggles in case funding is impacted. Some are limping along with a membership that teeters on the minimum allowed by their documents. But the diversity of interests means new input can be oblivious to small but important issues. While community development staff do great work there is also an inevitable inequity around deprived communities and the sector itself could provide more support.

2589 - Timothy Seay (Save the McDougall Campaign)

[Art Galleries & Museums > Art Gallery (Operations)]

For the city in future to be able to efficiently display and utilise its cultural assets to best advantage it will be necessary to bring them under a single owner. To do this the Christchurch City Council would have to ask the Government to support the introduction to Parliament of a new Act repealing the Canterbury Museum Trust Board Act, 1993, and replacing it with a new Act passing ownership of Canterbury Museum to the Christchurch City Council. This would require the approval of the three current regional councils which is unlikely to be a problem as they would no longer be required to financially support the Museum. The Government would be likely to approve such a request as they are fully aware of the financial position faced by all councils at the moment and wish to assist them where they can. This would return the Museum to being owned directly by local Government based in Christchurch as it was originally when it was established in 1867 and owned by the Canterbury Provincial Council. Just prior to the Provincial Council ending in 1876 management was passed to Canterbury College and in 1947 to the present Canterbury Museum Trust Board which is made up of representatives from all four Councils, Canterbury University, Canterbury Pilgrims and Early Settlers, Royal Society of New Zealand, Friends of the Museum and Ngai Tahu. While the four councils share the Museum's operating costs in proportion to their populations only the Christchurch City Council provides the Museum with any capital funding. And the five other organisations do not collectively represent the citizens of Christchurch. It must be in the best interests of the city's ratepayers for the Museum to come under the ownership of the Christchurch City Council. They pay for 86% of the Museum's entire annual operating budget and have been the largest contributor to the present redevelopment project with \$ 78M (compared with the Government's \$ 35M) and could yet end up having to meet at least another \$ 100 M towards the redevelopment allowing for the present shortfall of \$ 45 in the estimated cost and inevitable cost overruns. Given this it must be in the best interests of its ratepayers to bring the assets of Canterbury Museum onto its balance sheet. The land and buildings of the Museum are presently valued at \$72 M based on a 2020 valuation, and with possibly \$ 250M being spent on them during the redevelopment project, it would probably be possible to bring them onto the Council's balance sheet at around \$ 350M. It would certainly bolster its balance sheet. One has to wonder why the Council continues to spend so much money on the Museum without actually owning it. How can it possibly be in the best interests of the city's ratepayers to continue to spend this amount on such a large asset that they do not own? With the Council likely to have to meet

most of the remaining cost of the project this is surely the time to bring this asset onto their balance sheet so it can make the most of the city's wonderful future cultural assets. Over the 157 years since Canterbury Museum's inception, the majority of the items that form its collections, which the Museum believes are worth around \$1B, have been either gifted or bequeathed primarily for the benefit of the citizens of Christchurch and wider Canterbury community. Why then should such a large proportion of the cultural property of the region continue to remain under the custodianship of an independent trust when it should more rightly be under the ownership and governance of Christchurch City Council?

2690 - Robbie Dobbie

and we're making permanent efficiencies in our pay
Cut the Sustainability Budget.

2769 - Dr Crystal Lenky (Lyttelton Port Company)

11. LPC is the major sponsor of the Banks Peninsula Community Trust (BPCT). We are concerned that the removal of an Environmental Partnerships Fund grant supporting the BPCT may impact on their operational costs. This puts pressure on the BPCT's ability to provide the leadership support and facilitation for collaborative community-led programmes such as the hugely successful partnership with LPC around the Port Saddle and Gollans Bay covenant that continues to provide significant community benefits as the area's biodiversity is enhanced through ecological restoration.

[Full attachment available]

2771 - Suzanne Antill

The vulnerable should be supported with food banks and emergency housing.

2772 - Janice Antill

* Food banks & Soup kitchens are more important for social cohesion and Christchurch residents wellbeing

>>>

look after the poorest and most vulnerable. (soup kitchens / community gardens / foodbanks)

2799 - Dot Lovell-Smith

Council grants could go to community groups to plant carbon sinks in local parks and shade trees around sports fields and schools.

2850 - Neil Cooper (Greater New Brighton Community Leadership Group)

We believe the Better for Brighton Group to be a good mechanism to uphold the vision for the area and help guide decisions to ensure the best outcomes are realised. We appreciate CCC staff support for this.

2888 - Alistair Price

Stop all grants until you have the CCC house in order. May hurt but we all are hurting.

2962 - Jay Parkin

Help more with wildlife

>>>

More funding for good things

2971 - Nikita Todd

Invest in the Christchurch museum

>>>

Support Christchurch museum rebuild

3088 - Heather Brown

Fund public/private partnerships.

3092 - Kitty Moran

I ticked "Don't know" because I'd love to see more funding for Art Galleries / Museums, and Housing.

3325 - Adele Geradts

Community advocacy and support networks are vital in helping those struggling, and there will be more people in need with the current financial and housing crisis still an issue in Christchurch affordable housing.

>>>

We need strong community groups that can provide advocacy for residents.

338 - Jennifer Riley

that it is imperative that we fund >>> contributions to the city mission

3484 - Prue Stringer

Funding needs to be prioritised for community projects.

3485 - Dr Sally Price

But don't cut community grants funding. These are a lifeline to everyday people for projects that otherwise wouldn't get done.

3501 - Malcolm Long (Ōpāwaho Heathcote River Network)

Enviroschools funding	Support We suggest that this funding should increase each year based on inflation.
------------------------------	---

3601 - Bridget Allen

[Grants & Funding>Strengthening Communities Fund]

I do not support the removal of the biodiversity fund, and more need to be given to Strengthen communities fund.

3615 - Janine Clarke

Adopt bottom up budgeting Work with communities to develop community / public funding (as opposed to private / public funds) to enable community lead projects to go ahead. e.g. Diamond Harbour Medical Centre. Some may argue that this should be publicly funded but the local community feels the need for the health centre to remain local so has worked to fundraise for this. The council could work with a lot of communities on projects that may not necessarily be seen as a council priority but maybe viewed as such at a local level.

3621 - Morgane Honore

Advocate for continued support of community groups engaged in vital work such as community development, local events, and food security initiatives. These initiatives foster connected communities, address systemic issues, and enhance the safety and vibrancy of public spaces. Extended Funding Cycles: Established community groups often face challenges with short-term funding cycles. Implementing a longer, three-year funding cycle for proven groups would streamline administrative processes and enable groups to focus more on their core activities rather than grant applications.

3646 - Thomas Blakie

More funds should go to supporting community organisations and working in partnership with other organisations to deliver programmes and services.

3720 - Eddie Newman

I likewise think that the Court Theatre sounded also receive funding.

3722 - Rachel Thwaites

Temporarily reduce community spend in some areas

3753 - Helen Shaw (Lyttelton Reserves Committee)

We think council should be working more with trusts and community groups in order to get better 'bang for buck'; particularly in the biodiversity and conservation areas. Investing in and supporting volunteer organisations can result in outcomes being achieved faster, and with more community buy-in.

3799 - Morgane Honore (Richmond Community Garden Trust)

What we mean by continued support is;

- More than a 12 month funding cycle for established groups, often the funding applications are completed by volunteers or paid personnel who are already stretched to capacity. Groups with a proven track record would benefit from a higher trust less paperwork model with a 3 year cycle. The Council would see many benefits from this type of model, more productivity from the groups they fund and less administration by CCC staff who can then get on with doing more important work.

>>>

The Sustainability Fund has played a crucial role in launching our social enterprises, enabling us to initiate impactful projects that resonate deeply with our community and environment. One such initiative is our composting project, which gathers food waste from local restaurants and schools, diverting over 25 tonnes of food waste and various materials from ending up in landfills. Additionally, this funding has facilitated the creation of local employment opportunities, empowering individuals within our community.

It has empowered us to expand our reach through the Urban Trapping Project, initially providing traps along the Ōtākoro Corridor in Richmond and extending our efforts to encompass the city centre and even as far as South Brighton. This project has not only mitigated environmental concerns but also fostered a sense of stewardship among residents.

Thanks to the Sustainability Fund, we've been able to set up drop-off stations in collaboration with other community centres across the city. These stations capture plastics that cannot be accommodated by our city's recycling system. Through this collaborative endeavour, we ensure that these materials are repurposed effectively, playing a vital role in fostering a more sustainable and circular economy within our community.

The biodiversity fund is critical at a time when we are facing a biodiversity crisis, we have found this fund difficult to apply for as the criteria requires it to be on private land. For example we would like to apply for our Urban trapping project but the criteria requires the work to be undertaken on private land with permission sorted, in our case it will be several hundred private properties where permission will only be granted after we have identified and signed on each property but we need funding to support a part time facilitator to run this project. We would like the criteria loosened so that more urban groups can apply.

3821 - Peter Guy

Make sure there are funds and training to help move beggars along into work.

3826 - Kate Cleverly

[Strategic Direction > Have we got the balance right?]

Kind of. Without investment, we cannot improve our city and quality of living through increased services. However, Council does need to invest at a grassroots level to empower local communities to develop local initiatives for their own neighbourhoods and community. It is not just about citywide events and facilities, local facilities and investment in community groups lead to community led development, a sense of wellbeing greater capacity for caring, volunteering and support.

3860 - Kate Cleverly (Halswell Community Hub)

There should be a greater priority on funding for community development and local community facilities which connects in with the councils community outcome of a liveable city. people should be able to walk or connect with a facility and community groups and activities within their local community, without having to travel too far

>>>

As the Halswell community grows there is an increasing need to have activities, services and programs in place to support new residents and to help them feel connected as quickly as possible regardless of culture, age or other demographic. The area has a lot of young families moving into it and with that there is call for activities etc for young people and young mums. Likewise there are numerous retirement villages being built in and around the area and there is a need for activities to help older people feel like they belong to the wider community. Surveys show that young people in our community attend high schools spread right across Christchurch. This makes it difficult to foster a sense of belonging to their local community. In addition to the issues caused by a rapidly growing community and a lack of infrastructure, local organisations have highlighted a growing risk of social isolation due to the effects of the COVID pandemic. This has been evident through the number of people seeking connection or support at the Halswell Community Hub. The shared goal of our community is to create a connected, resilient community. A vibrant community with a sense of connection between residents and their community which fosters engagement, participation, a sense of belonging and pride in where they live regardless of age, race or culture. Different organisations obviously achieve this in different ways but at the Community Hub we have seen the difference that meaningful connections can make in a persons life. These connections do not come about at large community wide events, although there is definitely a place for these. Meaningful connections come about over a shared cup of coffee with a small group of people who then invite a new resident to join them at another activity such as the garden club, football club, community garden or scouts. These connections are the basis for a community. Without them, you simply have a group of people living in the same area. It is therefore vital to put people first and invest in local communities. When we have those deep connections at a neighbourhood level, people have greater capacity for caring,volunteering and support which then enables those larger aspects of the councils long term plan such as events, transport, social capital, safety and community engagement in decision making. It is therefore vital that the council invests in local community development through funding for community organisations and facilities and in local infrastructure such as roads, footpaths and bus links. As Halswell grows, the temptation is to develop large community facilities or hubs, but in actual fact what we need is smaller neighbourhood level facilities where young and old can share a casual cup of coffee, chat and connect over shared interests without having to travel far or cross major roads or worry about their children doing so. Newer subdivisions and developments such as Longhurst, Aidanfield and Country Palms are developing their own flavour within the wider community and are looking to develop a neighbourhood identity separate to that of Halswell. This is the councils goal of a collaborative confident city in action but it requires funding and investment in local infrastructure and particularly in the organisations working in the community led development space.

3879 - Douglas Horrell

Invest in community centres and hubs, and community gardens to ensure that communities build resilience to be able to cope with future challenges caused by climate change.

>>>

Please invest in community centres and hubs, and community gardens to ensure that communities build resilience.

3894 - Greg Siddells

I volunteer for the Citizens Advice Bureau operating out of the Hornby Community Centre and applaud the decision of the Council to pass on the property to the Hornby Community Care Trust. As a volunteer we get a number of referrals from the Council and from members of the public inquiring about council and neighborhood matters, e.g trees, noise, neighbors, etc. This service has significant value to the residence of Christchurch and I have noted the declining financial support to the Citizens Advice Bureau which will potentially make this service less viable and effective. I would strongly support increasing the financial support to the Citizens Advice Bureau.

3895 - Margaret Trotter

Sport and recreation needs to be balanced with other facilities such as heritage parks-Ferrymead, Orana Park, Willowbank as not all people play sport. The traditional sports are not necessarily the only option these days.

3942 - Soongseok Yoon

No. I just hope the funding and grants should be used for the good future.

4009 - Michelle Whitaker (Flourish Kia Puāwai)

[Strategic Direction > Additional Savings & Efficiencies]

Explore other ways that don't include cutting grants

4025 - Robin Wynne-Williams

and boosting funding for major events.

>>>

Why has the ChCh annual A & P show been cancelled for 2024? This is a major financial, social, educational and Primary industry promotion event, and the CCC should provide a loan to allow this even to take place.

4033 - Juliana Venning

Stop promoting events which are NOT healthy for children's and community development. Spend elsewhere.

433 - Derek Phelps

better funding and resources to community groups such as Residents Assn's who do a lot of unpaid work on behalf of the Council

558 - Brigid Buckenham

Support the CSO orchestra financially

581 - Paul Amtman

Keep reviewing grants.

657 - Murray Peacock

The Council should never give money to repair earthquake damaged buildings , it should have been by way of loans and or an equity partnership repayable when the building is sold

Not Stated

1224 - Amanda OBrien

[Libraries > Libraires (Operations)], [Recreation, Sports and Events > Rec & Sports (Operations)]

Community services especially for the Elderly are extremely important, we are a aging population there are so many isolated people in chch

1662 - Lucian Nightingale

I think you should invest in things which set Christchurch apart from other cities. For example, Christchurch has the best equipped and established fencing club in New Zealand, if not Oceania (its called "The Fencing Institute" and is based in Addington). That's not to say you should specifically fund that project, but that there are lots of community organisations and groups around Christchurch which are best-in-class and make a real difference for people who live here. These are the types of organisations which put Christchurch over the top compared to Auckland and Wellington.

2087 - Emma Norrish (Waipapa Papanui-Innes-Central Community Board)

Community Development: The Board also recognises the many ways, not always apparent, in which community funding, development and resilience are integral to retaining a safe and thriving city that is prepared for dealing with possible adversity. The Council, by far, does not do all the 'heavy lifting' in the city to make it a great place to live; much of that work is community-led, though greatly in need of the Council maintaining its funding support for the groups and organisations on the ground who do the mahi. As previously mentioned, this work is not always apparent but is an essential and fundamental social glue that's key to supporting our wellbeing as citizens – an important part of our social cohesion being reliant on the collective efforts of these volunteers and organisations.

2235 - Cara Paterson (Creative New Zealand)

We acknowledge Council is facing several key challenges in drafting its LTP, and needs to balance prudent fiscal management alongside investment in critical infrastructure and the needs of a growing community.

Christchurch City Council is a major, and crucial, investor and partner in arts and culture. Many arts organisations receive core investment from Council, often in partnership with central government and private funders.

Christchurch's arts and culture services are reliant on local government contributions, as this support is not guaranteed from other sources. Creative New Zealand's own ability to support the sector is under strain, and we have materially less funding to invest from 2024/25 (around 30 percent) than for the previous five years.

We know it's a challenging time for New Zealanders and many sectors across the country. The creative sector is no exception. It was one of the hardest hit by COVID-19 and is adversely affected by the current, difficult economic environment. Arts organisations, which rely on a mix of central and local government funding, along with community/private funding and earned revenue, operate on thin margins and are vulnerable to shocks. With revenue streams under pressure, organisational arts infrastructure remains vulnerable.

As with other infrastructure such as transport and water, arts and culture requires secure, stable investment from core funders, including Council, to survive and service the region. The impact of unstable or paused investment could lead to loss of vital arts and culture infrastructure – costing more in the long run as it is harder to rebuild, rather than maintain.

Shared investment and ongoing collaboration between central and local government is vital for a resilient and supported arts and cultural sector in Christchurch; one which delivers value to all

communities. Funding support for arts, culture, creativity and ngā toi Māori by Christchurch City Council in its LTP is a crucial part of maintaining this collective approach

We welcome your ongoing support and look forward to working together over the next decade and beyond.

2476 - Reuben Scott (Simeon Park Community Group)

More funding around urban forest regeneration. Question around why the pest free Banks Peninsula has stopped being funded - we would like to see this continued.

2787 - Jean Drage

A clear identification of core services will enable a more simplified decision-making process when council is lobbied for funding new projects. It also enables Council to dispose of surplus properties.

2998 - Jane Higgins (Christchurch Methodist Mission)

In particular, the Plan does not specify how the Communities and Citizens spending will be apportioned. While there is mention of community events, we would like to see much more attention given to funding for community organisations, especially those working in the city's high deprivation communities. Many of these organisations are small and survive from grant to grant, but they are working with some of the city's most vulnerable people. Support for their mahi is precisely what is needed for the city to become more inclusive and equitable.

300 - La Wanda Cowan

Maintain Ferrymead heritage park please

320 - Ian Knewstubb (Lyttelton Times Ltd)

It is to be hoped heritage funding for listed buildings is to continue.

340 - David Wilkinson

[Strategic Direction > Additional Savings & Efficiencies]

community grants - are these a good way to spend money/priority?

3552 - Alice Neylon

[Planning & Strategic Transport, Urban Design, & Urban Regeneration > City Planning, Urban Regeneration]

I dont want to see what happened in Auckland with Taylor Swift happen in Christchurch. I also dont want what happened with Darude to ever happen again. Please make the city attractive to international music acts.

3621 - Morgane Honore

it's crucial to address the funding support for community groups. These organizations play a vital role in enhancing the social fabric and resilience of our community. However, inadequate funding support can hamper their ability to carry out essential services and initiatives. Therefore, it's imperative that we prioritize allocating sufficient resources to support community groups, ensuring they have the necessary funding to continue their valuable work. By investing in these groups, we empower them to address local needs, foster social cohesion, and contribute to the overall well-being of our city.

3770 - Jane Higgins

It's not clear how the \$542m on Citizens and Communities is to be apportioned. I encourage Council to prioritise grass roots community groups working in community development for this money. As economic times get increasingly difficult these are the groups that are a real lifeline for many in our city, particularly those in low income neighbourhoods. They work on a shoestring, and manage to achieve a great deal to improve the wellbeing of many whose voice would otherwise go unheard and whose needs are often unacknowledged.

3862 - Katharine Metherell

We need to ensure there is sufficient funding for the operation of attractions which will boost the tourism and domestic revenue within Christchurch. Such as on museums, galleries and educational and conservation facilities like Orana park and historic buildings.

Three Waters

Three Waters (Operations)

General Comments

138 submissions were received addressing Three Waters (operations).

49 comments were in support, and 22 comments opposed.

48 comments suggested what could be done differently, and 21 provided general feedback. Many comments supported investment in three waters, while others questioned investment with reference to the change in approach from the Central Government.

Officer Response

Submitters raised a number of issues with regards to 3 Waters Operations:

- There were some misunderstandings around why Council is involved in 3 Waters and the proposed change in levels of service for water leakage rates.
- Drinking water quality and excess water charges were also raised, along with questions on the size of the 3 waters programme and the amount of investment required. Some saying it was not enough and some saying it was too much, and a small number suggesting a budget review.
- A number of submitters commented on Healthy Waterway programmes, needing to support climate change, sustainability and biodiversity initiatives. There is strong support for waterway protection and reduction of contaminants and continuing with flood protection works.
- There were a number of specific requests to coordinate works better, dredging of rivers and improving the security of water supply to Lyttleton.

Three Waters in the Council Long Term Plan are activities delivered by Council (Water Supply, Wastewater and Stormwater) on a day to day basis, are driven by regulatory and consent requirements and are part of Council's core business. This is different to the Three Waters Reform, which is a Central Government initiative to reorganise how Three Waters is delivered across New Zealand. The direction this is taking has altered following the change in Government.

Decreasing the water losses to 20% by 2030 and then 15% by 2034 is an increase in the level of service. Less water being lost between extraction from wells and delivery to customers translates to the network being in better condition with reduced leakage through broken or damaged pipes. Levels of Service are reviewed and reported to Council regularly and amended in an LTP as requested. These have been built up over a number of years and in most instances reflect on the current state of the asset.

Christchurch's source water continues to be of exceptional quality. We are hopeful that most of our 126 bores will be able to demonstrate that they meet the 'Class 1' definition in the new Drinking Water Quality Assurance Rules (similar to the 'secure' category that we met under the previous regime). 'Class 1' will give protozoa compliance for these sources. In the past we were able to demonstrate bacterial compliance through monitoring to show the absence of bacterial (E.Coli). The Drinking Water Quality Assurance Rules now require a treatment barrier such as Chlorination or UV is installed to be able to meet bacterial compliance requirements. In addition, the Water Services Act requires 'residual disinfection' within the distribution, and this is only possible if chlorination is installed. The 'temporary' chlorination units installed in 2018 are not able to meet the required rules and need to be replaced with permanent chlorination units. Fluoridation: Council has not yet been required to add

fluoride into the water supply. It would be a requirement made by the Director General of Health as it is a public health matter rather than being about safe water. Because Christchurch currently has 44 treatment plants across the city adding fluoride would be a particularly complex and costly addition if required.

The Council does not own the water it supplies. Council charges on the basis of the infrastructure providing the water to properties. The Council uses several different targeted rates to recover the costs of providing water supply – or at least the portion of costs not covered by other sources of revenue.

The planned costs of water supply to be recovered through rates. Most of that cost is recovered through the water supply targeted rate (WSTR). The WSTR is recovered from every property that is connected to, or close to, the Council's water supply network. Importantly, it is based on capital value – not on metered quantities. Higher value properties pay a greater share of overall costs. A much smaller amount of revenue is recovered through the excess water supply commercial targeted rate and through the excess water supply residential targeted rate, both of which are based on metered quantities. The excess water charge is based on metered water use in excess of an allowance. The primary rationale for the introduction of excess water charge is that high water users should contribute more to the cost of the water service. The excess water charge will help reduce the extreme demand on the water supply network at certain times, particularly over summer. If this is done, it means the Council doesn't have to spend as much money upgrading and building new infrastructure to cope with the extreme demand.

The three waters programme is sized to achieve regulatory and consent compliance, replacement of aging (leaking) assets and allow for population growth in the city. Replacement of the oldest and failing assets is still behind the optimal schedule. Council is making a significant investment in renewing and maintaining its 3 Waters infrastructure, ensuring that climate change, flood protection, sustainability and biodiversity initiatives are part of the planning process.

The Council is working hard to improve waterbody health across the district. We have developed a Healthy Waterbodies Action plan that outlines objectives, goals, and measurable actions to improve waterbody health. Some of these objectives include improving surface water quality, providing sufficient instream habitat for native species and having diverse and extensive riparian margins. Council projects around waterways are required to have a freshwater ecologist involved to ensure effects on the waterway are minimal, this involves guiding physical works as well as planting appropriate riparian species. Council also has a detailed fish passage barrier prioritisation and remediation programme that focuses on fixing high priority barriers and opening up upstream habitats for native species. It is important to note that improving waterbody health takes a whole community approach from reducing contaminant inputs into waterways to large stormwater treatment projects.

All of the above points are covered under existing levels of service and budgets in the draft LTP.

Support

1157 - Justin Rogers

Don't slow down on water renewals.

1192 - Shannay Henning

I agree with water and waste

1203 - David Moore

[Spending > Te Kaha], [Other/Special Interest Topics > Cathedral]

It is a shame that Te Kaha and the Cathedral were invested in when water infrastructure needs the attention, but these are proportionally quite small to the rest of CCC's spending.

1229 - Cassandra Albert

[Parks > Parks Maintenance], [Strategic Direction > Climate Change]

Access to green spaces and food forests enhances mental health and community resilience. Solutions involve increased park funding and food forest programs. Water protection and climate resilience are essential, considering past experiences with wildfires. Measures include rigorous waterway protection and climate-resilient infrastructure.

>>>

[Rates > Other], [Transport > Transport (Operations)], [Other/Special Interest Topics > Creating a Climate Fund]

This question is puzzling. I believe that merely raising the rates to the specified percentages isn't sufficient. Instead, I suggest increasing them even further to adequately meet the demands for climate resilience. In the current Long Term Plan, the Council's water engineers indicate a lack of funding for climate adaptation measures. Meanwhile, transportation engineers emphasize rising costs for car-centric road projects. Additionally, most climate-related initiatives are being postponed for several years, leaving Christchurch vulnerable to potential floods akin to those experienced in Auckland.

1541 - Maurice Adler

Three waters. Yes, that is needed to keep the running.

1546 - Robert Fleming

Obviously 3 waters work is paramount.

1844 - Shelley Washington (Rod Donald Banks Peninsula Trust)

- Ensuring safe drinking water, stormwater and flood protection, and improving wastewater discharges

2044 - Rachel Murdoch

[Transport > Transport (operations)], [Transport > Public Transport Infrastructure (Capital)],
[Transport > Cycleways (Capital)]

Kia ora, I am proud to call Otautahi home. I fully support the prioritisation of investment in transport and waters infrastructure.

2237 - Pepita Griffiths

Wastewater, drinking water + stormwater systems
are vital spends.

2308 - Sarah Elicker

Water networks are crucial absolutely.

2388 - Guy Tapley

I believe the overall balance is about right.

2511 - Charlaine Palmer

[Transport > Roads (Capital), Transport > Footpaths & Streetscapes]

Comments: Prioritise maintenance of roads, footpaths
three water services,

2615 - Virginia Wright

Core services such as >>> staying on top of our water infrastructure are vital and need protection, >>> and keep our water clean, stay on top of all three water entities

2639 - Callum Ward (Waihoru Spreydon Cashmere Heathcote Community Board)

Specifically, the Board also supports changing the water supply leakage goals to under 20% by 2030, and under 15% by 2034.

2655 - Michele Mccaw

Yes 3 waters

268 - Kathryn McNeil

[Transport > Public Transport (infrastructure), Transport > Cycleways (capital) Strategic Direction > Climate Change]

Investment in transport infrastructure should focus on completing the cycleways network and improving public transport. The same goes for water services - these are essential and the money must be spent. It will all be for nothing, however, if the response to the threats of climate change are inadequate.

2692 - Liz Fletcher

~~... have to get the balance right.~~

Pro roads and water

2733 - Georgia Macaulay

Yes for the water, it is needed.

>>>

Water is good, proven in recent years this needs a major update.

2734 - Sharon McDonald

Parks and waterways yes.

2750 - Helen Johnstone

Drinking water, wastewater and stormwater are essential services, many of which need to be repaired still as a result of the earthquakes.

2869 - Josiah O'Neill

I also think investment in maintaining and improving water infrastructure

>>>

[Transport > Public Transport Infrastructure (Capital)], [Transport > Cycleways (Capital)], [Strategic Direction > Climate Change]

I would like to reiterate my for future investment, in particular to areas of public transport and bike infrastructure. 3 Water, climate change, and the Community.

2887 - Linda Keall

Three waters is vital to get right, and keeping our drinking water clean and safe is imperative. I personally would really like to see the Council step up and fluoridate the water, it is beyond argument proven scientifically to be safe and a great cheap effective thing to do to improve the health of especially the city's children.

2890 - Finn McIntyre (University of Canterbury Sustainable Design Society (UC SUSd))

SUSd supports the focussed spending on improving the cities three waters infrastructure as this is of critical importance for the transition towards a sustainable future.

3001 - Clive Howard-Williams

[Strategic Direction > Have we got the balance right?]

The balance overall appears right with three waters having a major influence

3090 - Trudi Bishop

[Transport - Transport (Operations)]

It is important to invest in key infrastructure such as our water networks and transport,

3314 - Esther Scott

Please focus on >>> water,

3325 - Adele Geradts

3 waters are important and need to be maintained at the current or higher levels.

>>>

We need >>> good three waters

3485 - Dr Sally Price

I agree with the council focusing on continuing reducing the number of water leaks (leak rate) over the next 10 years from 25% to 20% and then 15% as per Our draft Long Term Plan 2024 -2034 Consultation Document, page 30). When we have had water leaks outside the property they have been attended to promptly.

3601 - Bridget Allen

[Transport>Transport (Operations)]; [Resource Recovery>Resource Recovery (Operations)]

Putting money into transport and 3 waters is important and money going into solid waste and resource recovery

3634 - Peter Cooper

3 waters needs continuing expenditure, it's too important not too.

3673 - Theo van Woerkom

[Transport > Transport (Operations)] , [Parks > Parks Spending (General)]

Three waters, transport (esp. cycleways) and parks - yes

3741 - Kevin Spaul

Keep doing what you are doing with three waters

3764 - Jack Gibbons

I support all spending on 3 waters infrastructure.

3800 - Rachel Barker

In summary, I support operational priorities of: Water & waste operations

>>>

Yes to the \$2.7b on three waters

3820 - Rowan Sprague

[Spending > Capital Programme (General)], [Spending > Te Kaha]

In general I think we are [Coder note: prioritising the right things], except for Te Kaha - the stadium is costing too much. I would prefer if less money was spent on Te Kaha for a lower-spec stadium and more money was spent on upgrades and modernisation of 3 waters.

3896 - Coral Denize

Yes to spending money on upgrading and maintaining our 3 waters assets and systems, it is long overdue and shameful compared to Selwyn DC

3961 - Paul Robertson

Yes re water

3992 - Sue Piesse

Continue to spend more as necessary for the city's pipes to be upgraded.

3993 - Hans Jorgen Andersen

- \$2.7 billion on three waters (drinking water, wastewater and stormwater) (31.5%) *AGREE*

>>>

WATER IS TO SPENT IN FULL.

4027 - Rona Buttimore

Supported 3 waters

4033 - Juliana Venning

[Transport > Transport (Operations), Transport > Roads (Capital), Spending > Te Kaha]

Te Kaha is not a priority. Nor is transport. Water and usable roads are.

[Spending > Te Kaha, Parks > Biodiversity & Ecological restoration]

Drop out Te Kaha put that towards Clean water, conservation and drainage.

450 - Allison Husband

Maintaining a functional and clean three-water infrastructure is essential.

597 - Ashleigh Dickson

Yes it's important to prioritise clean water and wastewater and stormwater services. Residents expect councils (and government) to keep them safe and be free to be safe in their home. Funding spent for

them to be safe is ultimately the most important money spent.

615 - Michael JasonSmith

[Transport > Roads (Capital)], [Spending > Te Kaha], [Strategic Direction > Have we got the balance right?]

I think the proposed Draft Long Term Plan achieves a poor balance between the investment in roads and investment in other transport options. The water network need upgrading, and the Draft Long Term Plan rightly puts emphasis on updating and maintaining the drinking, storm water, and waste water systems. The Draft Long Term Plan seems balanced in other areas. However, the spending on Te Kaha seems disproportionate compared to the benefit.

694 - Lucia Rivas

Keeping vital infrastructure running like water is essential.

727 - Donal McEvoy

I agree with the work to three waters,

747 - Euan Gutteridge

Water infrastructure is essential.

816 - Murray Dickinson

Agree with the 3 waters investment. You only need to look at Wellington CC to see this issues if we don't invest.

Oppose

1030 - Andrea Gosney

Three waters-scrap it

1167 - Anja Luecht

[Spending > Te Kaha]

No! Scrap three waters and Te Kaha.

1812 - Cathy McMillan

We don't want chlorinated water.

1977 - Nicholas Lealand

We should not cut back on the level of services already provided. I strongly disagree with the proposal to change the level of service for drinking water losses to 20% by 2030 and 15% by 2034.

2183 - Hali Stauffer

However, it's essential to maintain the current level of services without any cutbacks. I strongly oppose the proposed reduction in the level of service for drinking water losses to 20% by 2030 and 15% by 2034.

2625 - Danielle Leenders

Three waters appears to be a waste of money. We have functionally systems, they will require maintenance, but the amount proposed for 3 waters is significantly more than other items.

2712 - Imogen Maxwell

Three waters is no more so I don't understand why that is still there? I preferred the previous governments policy on water infrastructure.

2953 - Quentin Kelly

No-one wants three waters. Nice redefinition there by the way. Even making rate payers pay for water use is crazy. They pay you rates to make sure the pipes delivering such utilities to a house are good. They pay rates for pipes for waste water. The council now wants to charge for using water? The council has to deliver water properly first.

2972 - Ewan Baron

Three waters capital works is a substantial cost outlay and warrants an independent organisation to investigate, implement and monitor new efficiency and technology methods. I personally think there is currently a lot of inefficiency in the three waters area.

3096 - Hamish Mitchell

[Transport Operations]

Quite simply there needs to be substantial cut in wastage that goes on in this city. Roothing repairs for example are done at a ridiculously slow rate not only does it slow down productivity within the city but the fixed over heads escalate significantly. Take the Memorial Avenue water mains replacement for example

312 - Shane Binder

The water supply targets and KPIs seem very low - >50% customer satisfaction in quality water? <41 unplanned interruptions per 1000 properties? We should be expecting more of the Three Waters unit.

3169 - Barbara Brown

[Rates > Residential Rates], [Transport > Roads (Capital)], [Parks > Spending], [Parks > Heritage (Capital)], [Parks > Foreshore], [Art Galleries & Museums > Art Galleries (Capital)], [Other/Special Interest Topics > Social Housing], [Art Galleries & Museums > Museums (Capital)], [Grants & Funding > Art Centre Funding], [Other/Special Interest Topics > Cathedral]

The 67% of Capital spend going on Transport and Three Waters and the 47% on these areas in the Operational spend dwarfs every other category as shown on pages 26 and 27 in the Consultation Document. And yet areas with smaller proposed allocations of funding bear the brunt of cost cutting. I appreciate that roading and Three Waters are expensive but I think we should do some trimming there and not try to reduce or cut services in other areas to keep rates reasonable.

>>>

[Transport > Transport (Operations)]

We need to look for savings in the Transport and Three Waters areas, rather than cut services.

>>>

[Transport > Roads (Operational)], [Parks > Spending], [Parks > Heritage (Capital)], [Parks > Foreshore], [Art Galleries & Museums > Art Galleries (Capital)], [Other/Special Interest Topics > Social Housing], [Art Galleries & Museums > Museums (Capital)], [Grants & Funding > Art Centre Funding]

As in my introductory statement, I think that we need to review operational spend on Transport and Three Waters, and prioritise Parks, Heritage and Coastal Environment; Art Galleries and Museums; Libraries and Housing. I think we should have a larger social housing portfolio.

3239 - Lynette McGrath

[Rates > Residential Rates]

Unsustainable. You bill people for water charges and those on shared metres pay nothing. Find some other income.

>>>

Please treat rate payers fairly regarding excess water use.

3497 - Cerys Fletcher

I am also very concerned by the proposed level of service, "percentage of total wastewater gravity network pipework length at condition grade 5 (very poor) (11.0.1.18)." Our water assets must be improved, rather than manage their slow decline - a 26% of our wastewater network in very poor condition by 2034 is not acceptable. The impacts would be disastrous, and make pointless so many of our environmental efforts should wastewater overflow and leakage resulting from this end up in our rivers.

3690 - Jono de Wit (Greater Ōtautahi)

The Activities and Services Statement of Service Provision document on page 50 states that under the draft LTP the percentage of total wastewater gravity network pipework length at condition grade 5 (very poor) will increase from $\leq 17\%$ in 2024/2025 to up to $\leq 26\%$ by 2034. This is significantly higher than the historical performance for 2020-2023 of between 8%-12%. We consider this dangerous underinvestment of critical infrastructure and risks scenes like we have seen in Wellington with sewage spilling down streets and also into our rivers and beaches. It also risks not providing enough capacity to support the higher density housing that will be enabled through PC14. We strongly urge the funding for wastewater to be substantially increased from the proposed \$964 million such that the target percentages of the network at condition grade 5 (very poor) is below the historical performance average of 10%.

3697 - Jennie Brittenden

[Three Waters > Taumata Arowai Requirements]

The water straight out of the tap is undrinkable.

4035 - Simon Ashby

3 waters spending is bullshit as is Orana park

441 - Bianca Jamieson

Get rid of three Waters that's a bloody waste of money.

860 - Gaynor Stanley

[Transport>Transport (operational)]

[Three Water>Three Waters (Operations)]

[Strategic Direction>Additional savings and efficiencies]

As above, would like to see less spend on water and transport to fund arts centre, which offers far wider public amenity than Te Kaha is ever likely to incidentally.

905 - Redacted Redacted

[Parks - Spending (General)]

I think that too much is being spent on water and not enough on parks etc

923 - Leanne Keen

Get rid of 3 waters and have each individual town sort there own out

989 - Dave Renison

3 waters has been scrapped. What on earth are you talking about. More money wasted.

Other

1068 - Redacted Redacted

Didnt 3 waters get cancelled?? why do you refer to it still? Considering the poison you put in the water which any sane person wouldn't drink, why spend all that money. I want clean non poison water for that kind of money.

>>>

water infrastructure that delivers poison.

1273 - Anthony Moore (The Elms Hotel Ltd, T/A Hotel Elms Christchurch)

It is hard to comment as there is only a summary of planned operational expenditure so without a breakdown there is nothing to comment on. I will say that the 3 Waters debacle has cost way too much money and needs to be reduced as much as possible.

>>>

Again the 3 Waters needs to be closely looked at to ensure we are getting value for money

1668 - Simon Mitchell

[Transport > Footpaths & Streetscapes (Capital)], [Transport > Roads (Capital)]

I do believe investment in roading / sidewalks, water and wastewater can be significantly reduced through better planning and coordination between these areas. Currently there is a significant amount of money wasted where the same streets are being ripped up and resurfaced on multiple occasions within short succession through efforts to improve each of these services individually - rather than improving all at once, and saving on time, cost and overall disruption.

>>>

[Transport > Roads (Capital)]

I also believe roading and three waters can be reduced through better planning and coordination.

>>>

As mentioned previously - better planning and coordination across roading and three waters to reduce rework and disruption.

1750 - Edel Lougheed-Deane

[Transport - Public Transport Infrastructure (Capital)], [Transport - Roads (Capital)]

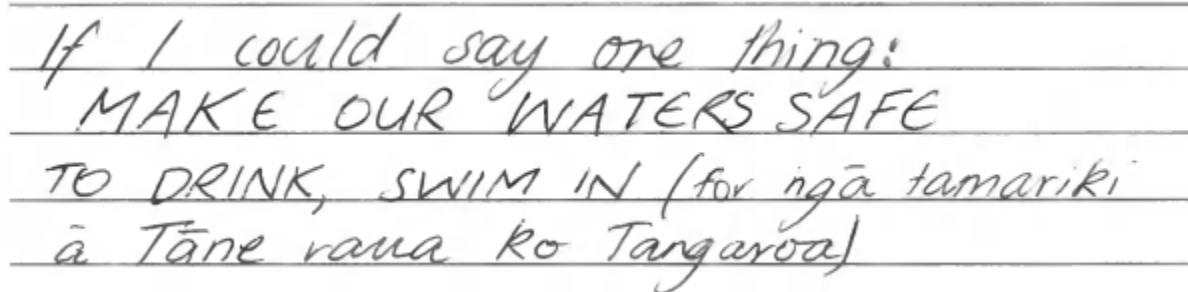

Investing in roads and transport infrastructure, as well as protecting and upgrading water networks, are critical for the sustainable development and prosperity of the city. These projects not only enhance the quality of life for residents but also contribute to economic growth and resilience. Borrowing for such projects with long-term value can be prudent, especially when considering the

intergenerational benefits they provide. Ensuring that debt repayments are spread fairly across generations is essential for equitable distribution of the costs associated with infrastructure investments. However, it's crucial to monitor the debt levels carefully to avoid overburdening future generations with excessive liabilities.

1752 - Carolyn Boulton

It appears as though the council is addressing major issues of concern to Christchurch ratepayers. However, the council needs to clarify how spending related to water/water infrastructure will be managed in light of the cancellation of three waters.

2109 - Te Aomihia Te Huia

If I could say one thing:
MAKE OUR WATERS SAFE
TO DRINK, SWIM IN (for ngā tamariki
ā Tāne rana ko Tangaroa)

2251 - Mobim Mathew

I thought 3 waters have been scrapped. That's a useless circus and can be opposed

2254 - Caitlin Raudsepp

I suspect there is little interest in upgrading water networks now that the solution to everything is more chlorination.

2269 - Lyn Leslie (Te Pātaka o Rākaihautū Banks Peninsula Community Board)

The Board continues to believe savings can be made on repairs & maintenance and capital programme works within Te Pātaka o Rākaihautū Banks Peninsula by using peninsula-based contractors. As a consequence the savings can be found as well as increased responsivity times for immediate issues.

2284 - Anna Western-Bell

[Parks>Parks Maintenance]; [Transport>Transport (operations)]; [Transport>Roads (Capital)]

Don't agree with projects that beautify already existing parks etc. surely potholes, roading, street lights, waste service etc should come first with beautifying as a last on the list.

2311 - Paul McMahon (Waitai Coastal-Burwood-Linwood Community Board)

[Transport > Transport (Operations)], [Three Waters > Three Waters (Operations)], [Parks > Parks Maintenance]

The Board supports maintaining levels of service at the same levels as present in general. However, we would like to see the level of service increased in and around suburban villages such as Woolston, New Brighton, and Queenspark. For example, rubbish removal, weeding, infrastructure maintenance (pothole repairs), back-flow valve maintenance, beach access boardwalks/tracks/infrastructure being 'lifted'.

2355 - Iain Sanders

[Strategic Direction > Additional Savings & Efficiencies]

We can do much more with less by leveraging natural resources available such as underground springs and aquifers and share resources.

>>>

[Transport > Transport (Operations)]

Water and transport. Improve the quality of your data and optimize your decision-making processes so they leverage that data reliably with the facts and not political opinions and speculation.

2357 - Cori Sanders

[Libraries > Libraries (Operations)], [Transport > Roads (Capital)], [Transport > Cycleways (Capital)], [Other/Special Interest Topics > Public Transport]

Next, I think that it would be good to prioritise spending on things that the MAJORITY of rates payers use like libraries and roads and waterways. Why are we spending so much on cycleways when there

are so few who cycle through the town? Why don't we focus on getting the roads fixed once and for all so we don't have to deal with roadworks that never end? Why don't we get public transportation that works for all instead of buses that are spaced out an hour between trips and bypass the city centre?

2358 - Carolyn Moffat

[Strategic Direction > Have we got the balance right?], [Transport > Roads (Capital)], [Transport > Transport (Operations)], [Spending > Capital Programme (General)], [Spending > Te Kaha],

No. We need to invest in roads, transport and water network. We need to invest in the basic infrastructure that keeps the city running. This includes repairs which still need to be completed after the earthquakes. I consider these to be essential items. However some things are simply extras, and we need to consider whether things need to be done immediately, for example a \$13 million update to the roads around the new stadium, or the upgrades to Gloucester St. These are nice to have items and we can't afford them at the moment.

2418 - Hannah Harrison

[Transport > Transport (Operations)], [Transport > Cycleways (Capital)],

Our water system needs a ground up reimagining - it's failing as it is, let's upgrade to something worth having

2624 - Colin Ong

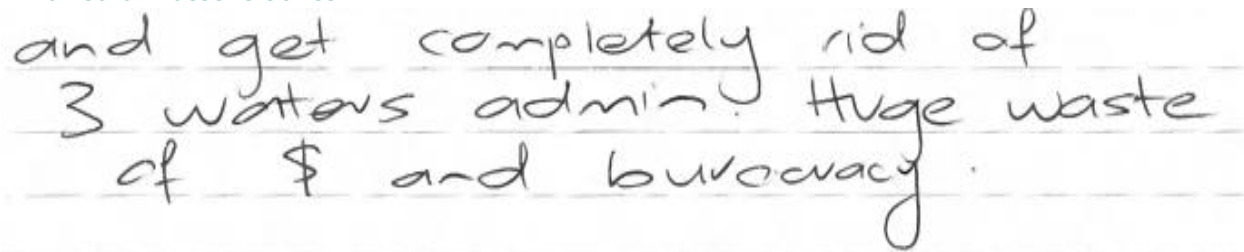

I thought Three Waters was being scrapped? Also, pay careful attention to what has happened in Wellington re: water pipe infrastructure. I am also concerned that some of the above may overlap with what ECan may be proposing.

2769 - Dr Crystal Lenky (Lyttelton Port Company)

9. LPC is aware that security of water in Lyttelton is important for both the community and LPC's needs. Therefore, we support projects that are proposed to increase water supply security and resilience through the upgrading and renewals of the water supply system; projects 60007 and 888 are critical to this. In the previous LTP LPC encouraged CCC to consider bringing project 60007 forward and are concerned that no funding has been allocated under the proposed LTP. LPC depends on the supply of fresh water for drinking, washing (containers, hoppers, straddles), dust control, and vessel supply. We are presently aware of times when supply is reduced or at risk e.g. during the 2020/21 summer period. Post another Port Hills fire we suggest this work should be undertaken where possible to provide a secure and safe supply.

[Full attachment available]

2770 - Sarah Lassche-Jones

and get completely rid of
3 waters admin! Huge waste
of \$ and bureaucracy.

2799 - Dot Lovell-Smith

I think the work to manage storm water should be the responsibility of CCC and ECAN. They should combine and work in co operation to make the local area resilient and safe from climate change disasters.

2864 - Darin Cusack

No, the plan still misses the importance of fixing existing below ground infrastructure as a resident we continue to experience the poor quality of underground services.

2902 - Prawindra Mukhia

We need the impact assessment information (social, environmental and economic (whole of life costs)) to understand the value of the projects.

2957 - Lisa Keen

(Strategic Direction > Climate Change, Parks > Parks Maintenance]

Definitely need to care better for our environment and waterways!!

3006 - Sarah Harris

No to three waters,

31 - Gary Durey

3 waters has been repealed and you have failed to update this "Plan" to reflect that and the cost of adding chlorine in water that does not need it. Again just excessive spending. 3 waters department must now be disbanded and returned to normal.

3336 - Margaret Lovell-Smith

I agree with the importance given to the 'three waters'. I do think more priority should be given to mending the leaks. Often when I'm out walking I see water pouring down the gutter, and these problems sometimes continue for weeks. Surely this is an obvious way to conserve water.

3354 - Andrea Langan

Government has changed 3 waters update your information.

3363 - Brodie Marra-Stevenson

[Transport > Roads (Capital)]

Do the water stuff at the same time as you do other road infrastructure. Stop ripping the same roads up over and over

3371 - Malcolm Frost

"\$2.7 billion on three waters (drinking water, wastewater and stormwater)". This is an extraordinarily large amount of money with, one would have thought, a high risk of additional budgetary blow-outs. It does lead to the concern of how much 'contingency' is in the system - & what happens if costs run well ahead of projections?

3396 - Lucy King

Try not to say three waters. It is a bad memory. Well done keeping water local. Be vigilant if central tries to dictate. Ratepayers are who to listen to and renters here. Not overseas powers.

344 - Aaron Herriott

Also chlorine is disgusting, ill pay you to take it out

3598 - Kyle Sutherland

[Transport > Roads (Capital)]

More investment needs to be made into long term infrastructure such as Three Waters, less on roading.

>>>

Increase capital funding for Three Waters, which has been long neglected and is the critical function of Council.

3616 - Mark Webster

You mention Three waters - this is disturbing.

3682 - Paolo Rotondo

While we all understand that the Three Waters approach was not understood well and has now been eliminated as an option, all councils will have to raise rates to deal with water infrastructure among other infrastructure projects

3696 - Jim Porteous

If you're spending that much on water can we please get rid of the chlorine: we used to have the best water in the world....

3721 - Benn Dickie

[Spending > Capital Programme (General)]

Additionally I think that this capital program does not adequately some of your human capital potential that could be engaged to support programs and investments. An example of this is the water leak proposal - utilising public reporting (i.e. Snap Send Solve) through encouraging and promoting water reporting would likely affect assessments identifying leaks.

3733 - Helen Reason

[Spending > Capital Programme (General)], [Transport > Transport (Operations)]

I agree that these are priorities but as shown the percentages to be spent on water and transport take the largest chunk of the spend and how can this be reduced?

3738 - Finn Jackson

[Strategic Direction > Performance Framework]

In addition, I support: - Percentage of real water loss from Council's water supply reticulated network (DIA 2) (12.0.6) $\leq 20\%$ by 2030 and $\leq 15\%$ by 2034 - Median time (in hours) from notification to resolution of overflows resulting from network faults (DIA 3b) (11.0.1.6) ≤ 12 .

I am concerned by the proposed level of service "Percentage of total wastewater gravity network pipework length at condition grade 5 (very poor) (11.0.1.18)." This will allow our wastewater network to reduce in quality over the next ten years, from 17% in very poor condition in 2024/25 to up to 26% by 2034. I would prefer to see this amended to reduce this number to 10% by 2034 instead. We need to improve our water assets, not manage their decline.

3759 - Ben Connolly

I'd like more spent on our >>> renewals of water infrastructure

3775 - Kate Latimer

Ensure current 3 water systems is workable.

3778 - Tricia Urch

Shame that the 3 Waters scheme was cancelled

383 - Louise Woolley

The water in CHCH used to be some of the best in the world, take the chlorine out ! We were promised it would only be in our water for 9 months after the earthquakes

3897 - J E Thomas

But I would like more information on the spend on three waters.

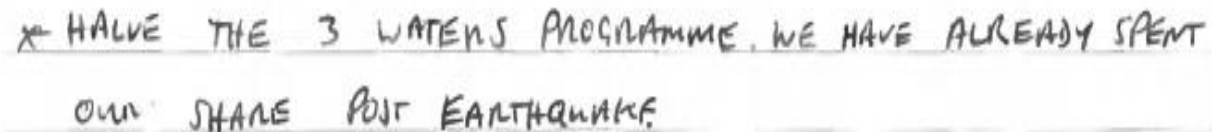

3910 - Joshua Jones

More money on water and transport would be better.

>>>

More water money

3996 - David Lough

X HALVE THE 3 WATERS PROGRAMME. WE HAVE ALREADY SPENT OUR SHARE POST EARTHQUAKE.

4033 - Juliana Venning

[Parks > Parks Maintenance)

An example of getting it rong is failing to maintain both clean waterways and Parks as clean and safe amenities. In the latter case contracting out rubbish collection/bin clearance results in no service in weekends when typically there's the greatest numbers of persons utilising Parks for recreation, sports games, dog walking, family time. Residents are left cleaning up glass, drug utensils, condoms, waste and getting 'freedom campers' (long term nuisance on Edward Avenue with old vans)to move on and to take their rubbish, seems not feasible from CCC point of view. Cease using glyphosate in all areas for the good of bees, birds, children, dogs, people. Also stop allowing astroturf to be used to replace natural landscaping as it is toxic and a danger to children and animals. We have only around 13% tree cover, Wellington has about five times that, we need to stop consenting builds that do not replace destroyed established trees with concrete and astro turf wastelands.

467 - Anna Scheirlinck

[Three Waters>Stormwater & Land Drainage; Three Waters>Waterways Quality & Compliance]

Focusing on three waters is critical but it needs some serious compliance enforcement as there are businesses and individuals who are taking far more than their share without repercussion. Our city's water is becoming toxic and our stormwater is a flood risk. Put some money into enforcement as well as the infrastructure.

492 - Lyndon Telfer

[Strategic Direction > Climate Change]

A good start would be clearing trees, silt and debris from waterways and drains so when it rains we don't get flooding or ponding that damages the road and property. I would say about 20% of sumps on my journey to work are blocked despite me reporting them as needing attention

[Coder note: in relation to climate change]

812 - Matthew Fagan

We should be investing more into the maintenance of existing infrastructure, mainly the water infrastructure.

>>>

[Strategic Direction > Performance Framework], [Rates > Residential Rates]

Not according to the planned LOS changes regarding the proportion of residents satisfied with council responsiveness to water supply problems, and the drop in % of sealed road network that is resurfaced every year. Dropping the metrics because the council has continued to underfund maintenance does not mean you are doing an acceptable job. I understand road resurfacing is expensive, and the investments in public transit and cycling infrastructure will hopefully reduce wear and tear on the roads, but the lack of investment in our failing water infrastructure is criminal. Rates need to increase now to cover the actual cost of maintaining our water infrastructure.

>>>

[Grants & Funding > Events Ecosystem Funding]

There is no way this should be prioritised over the maintenance of failing water infrastructure. I am happy to have this budget increased slightly, as long as the maintenance and replacement budget for our VITAL water infrastructure is increased.

Not Stated

1358 - Rob Noster

Thank goodness you can take away 3 waters it doesn't exit.

1533 - Mark George

Investing in water infrastructure is a good decision.

>>>

We are privileged to have high quality water services when so many others in our nation and internationally do not. Please maintain these things so we don't spoil our neighborhood by polluting it

1646 - Dale McGregor

"Three Waters" is dead and buried. The National Government coalition canned this so why is there \$2.7 billion being spent on a dead subject.

2140 - Brendan Fraser

Our drinking water is getting worse by the year. We now need to filter it or buy bottled or we have digestive issues.

2396 - Sam Jenkins

I think it is short sighted and frankly borderline ridiculous that the council decided to not take central government help to fund something that by this document will make up almost 1/3 of the total ongoing costs.

>>>

Three waters is something that centralised government should have taken on, especially since we saw them effectively pay the cost through the rebuild anyway.

2538 - Libby Ornsby

Perhaps this was ill managed post EQ, there are still an insane number of leaks, it must cost a fortune to continually patch, far more then replace in the first place

2577 - Wendy and Verity Busby (Braingains Tutors)

[Rates > Residential Rates]

The resources of rate-payers are limited - please seriously take us into consideration before pushing ahead with unnecessary projects and focus on the really essential needs of the city - healthy water supply, road maintenance, sewers, stormwater drains, waste management etc.

2629 - Sarah Smith

Money on the 3 waters should only be where it is essential maintenance.

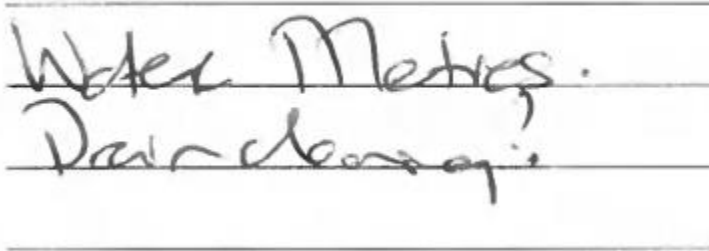

2630 - Tamara Smith

[Transport > Transport (Operations)]

It is undoubtedly important to look after and invest in transport and water infrastructure for the future.

2801 - Kym Bontem

[Strategic Direction > Additional Savings & Efficiencies]

Water Meters.
Rainwater harvesting

3575 - Anna Hansson

For our waters, don't let us become Wellington please.

3716 - Phillipa O'Loughlin

Three Waters is too high, and it could be canned by the Government. Understandably we need water services though.

3768 - Tracey Klatt

Really important to have good water pipes so that we don't turn into another Wellington!

3825 - Justin Barton

[Three Waters > Taumata Arowai Requirements]

Three waters name is strange (given the history) and is strangely high (going to 42% in 10yrs) given that the quality of the water is poor (chlorinated) and we have to filter it. The public unchlorinated taps were closed. Compared to not long ago when it was described as the cleanest city drinking water in the world. (Note. I opposed the 3 Waters government initiative due to rejecting centralized regulation overreach of what should be local managed asset, and opposing addition of known systemic toxins such as fluoride to the water supply.)

4000 - Kari Barr

Dredging Avon River - from Bower bridge right through to Kibblewhite St Reserve as this was impacted by the liquefaction - river rose by in some places 1 meters

4007 - Luka Whitaker

Little less maybe? [Coder note: comment written on the proposed capital programme spend on three waters]

4012 - Fiona Garrett

Prioritize 3 waters

4014 - Stephen Hill

[Spending > Capital Programme (General)], [Parks > Parks Maintenance], [Transport > Transport Operations], [Transport > Cycleways (Capital)]

Water, stormwater, sewer, non-native birds polluting estuary, clearing rivers + waterways are more important to me than speedhumps and cycle lanes. Too much money spend on bright flashy things.

4020 - Brian Turner

[Strategic Direction > Have we got the balance right?], [Transport > Transport (Operations)]

Not unless the underlying bottom line is mitigating the emerging climate crisis.

Council declared this to be a priority and investment in roads, transport infrastructure and sustainable water supply has to be directed at achieving a mitigation of the climate crisis we are facing.

4022 - Ann Margaritis

[Parks > Other]

More spending on providing open areas to let water soak into the ground - especially off the Port Hills.

459 - Aaron Watson

[Spending>Capital Programme (General); Transport>Roads (Capital)]

There are other bigger problems to solve like potholes and water pipes

Waste Water (Capital)

General Comments

92 submissions were received addressing waste water (capital).

29 comments supported, and 21 comments opposed.

26 comments suggested what could be done differently, and 16 comments provided general feedback addressing waste water (capital).

Officer Response

The majority of the submitters on the Wastewater Capital programme were in support of the programme and also supported an increase in investment across the district, with reasons being public health and the effect on the environment (reduction of overflows). There was a request to expand the network to some of the smaller settlements and make sure we have strategic plans in place for when the Ocean outfalls consents end.

There were a few requests to continue looking at innovations and technology for the future sustainability and resilience of the Wastewater system. There were also further comments around getting on with the repair to the Wastewater Treatment Plant at Bromley. Some submitters were concerned over the size of the capital programme as they thought that post earthquake many of the repairs had been done.

Akaroa Reclaimed Water Treatment and Reuse Scheme

There is strong support from the Onuku Runanga for the proposed scheme,

Introduction

1. Ōnuku Rūnanga represents the hapū of Ngāi Tārewa and Ngāti Irakehu, who are the tangata whenua of the takiwā which covers the Akaroa Harbour, surrounding coastal environment and hills as defined by the Ngāi Tahu Claims Settlement Act 1998.
2. Ōnuku Rūnanga have the responsibility to act as kaitiaki over these lands and are active in the environmental management of their takiwā. For Ōnuku Rūnanga, kaitiakitanga is an inherent responsibility that comes from whakapapa and is the act of safeguarding the mauri of the environment and ensuring the area is passed down to future generations in a state that is as good or better than its current state.

Background

3. On the 10th of December 2020, Christchurch City Council passed a resolution to support the Inner Bays Irrigation to Land Option for the proposed replacement Akaroa Wastewater project. This resolution ended a decades-long struggle between the Council and Ōnuku Rūnanga over the discharge of human waste into Akaroa Harbour.
4. This decision also meant that the Council would be able to commence the planning and design phase of the project, which will, in time, lead to the decommissioning of the existing Akaroa wastewater treatment plant off Takapūneke – a site of great cultural significance to mana whenua.
5. The Inner Bays option – now called the Akaroa Reclaimed Water Treatment and Reuse scheme will provide many benefits to the communities of Akaroa Harbour:
 - Improved water quality of the harbour for swimming, fishing, and recreation.
 - Improved indigenous biodiversity.
 - Future access to treated wastewater for irrigation/re-use purposes.
 - Improved climate change resilience.

Submission

6. Ōnuku Rūnanga supports the proposed budget of \$94mil for the Akaroa Reclaimed Water Treatment and Reuse scheme.
7. As noted above, Ōnuku Rūnanga believes that this outcome will have far-reaching benefits, especially with the increasing threats our communities are facing with climate change and the specific risk of increased draught and water shortages.

There is also strong opposition to the scheme and the submitters want Council to abandon/review the project.

Issues raised were:

1. The current proposal for Akaroa is not fit for purpose. The BECA report shows the Council plan is not suitable and will have capacity issues in periods of peak flow.

2. The project is not sustainable and should be halted
3. Don't think the proposed system is going to achieve what is required.
4. There must be more financially viable options
5. Significant improvements needed first in Akaroa's piped infrastructure to lower I&I rates to reduce the impact of peak flows
6. Do better treatment with an ocean outfall rather than discharge to land.
7. The scheme will result in an increase in raw and treated sewage being discharged to the harbour and foreshore
8. The proposed scheme will need constant monitoring and management.
9. It is an expensive scheme and there will be significant operational costs going forward.
10. Put the resource consent application on hold.
11. Concerns over the safety of the scheme
12. Please explore more options
13. The scheme cannot be expanded in the future to cope with population growth
14. Work with the community to reduce/minimise the stormwater inflow (I&I) into the wastewater system
15. Risk of land instability resulting from the land irrigation and positioning of storage tanks..
16. Move the proposed overflow outfall further down the harbour away from Children's Bay
17. Discharge the highly treated wastewater back into the aquifers via bores
18. All of the land to be irrigated is now in Robinsons Bay
19. Irrigation volumes have been underestimated.
20. Akaroa wastewater may bypass the treatment process in times of high flows
21. Need an assessment of environmental effects stating how it will deal with overflows
22. What is Plan B if the land becomes unsuitable for irrigation (saturated)
23. The proposed scheme is far worse than the existing scheme.
24. The proposed planting is Kanuka and this is not what the community were expecting as it is highly flammable.
25. More land will need to be purchased.

Wastewater programme

The three waters programme is sized to achieve regulatory and consent compliance, replacement of aging (leaking) assets and allow for population growth in the city. Replacement of the oldest and failing assets is also a priority. As part of the planning activity to achieve the above compliances, climate change impacts, biodiversity initiatives, innovation opportunities are all factored in at the early planning phase. Levels of funding are reviewed at each annual plan/Long Term Plan and requested accordingly.

Expansion of the network

There is currently no plan to extend the wastewater network to any further settlements

CWTP

Council are working with the insurer on the claim resolution for the fire damaged trickling filters and are very aware of the impacts the delay is having on the community.

To help this process, investigation and design work to restore the trickling filters is underway and progressing well.

Staff continue to do all they can to reduce the odour as quickly as possible and are making changes to processes at the plant on a weekly basis. The website is being updated weekly with information about this.

Also, planning is already happening for the future of the plant in terms of renewals and capacity, and significant funding is in place in the draft LTP to carry out this work.

Akaroa Reclaimed Water Treatment and Reuse Scheme

- 1. The current proposal for Akaroa is not fit for purpose. The BECA report shows the Council plan is not suitable and will have capacity issues in periods of peak flow.** The report does not say the scheme is not fit for purpose and simply advises the project team on pump station hydraulic sizing and irrigation storage needed for various scenarios. The two most important outcomes for the project are that our planned network upgrades would reduce wet weather raw sewage overflows to Children Bay from five times a year (on average) to approximately once every 2 to 5 years. The other outcome is that our planned irrigation storage would reach its capacity approximately once in five years (our range is 3.5 to 8 years between events). This is a significant improvement on the current situation.
- 2. The project should be halted.** Council's existing consent expires in 2030 therefore doing nothing is not an option.
- 3. Don't think the proposed system is going to achieve what is required.** Significant engineering effort has been put into developing a robust, modern and fit-for-purpose treatment and irrigation scheme to replace the existing Akaroa wastewater treatment plant and outfall which are approaching the end of their operational life. We are highly confident the planned plant will achieve the level of treatment proposed in our resource consent application.
- 4. There must be more financially viable options.** A wide range of options have been investigated to replace the existing treatment plant. A new plant is required and this is the lowest cost, consentable option.
- 5. Significant improvements needed first in Akaroa's piped infrastructure to lower I&I rates to reduce the impact of peak flows.** Staff agree that it is a good idea to further reduce Akaroa's wastewater I&I. To date we have expended \$4M undertaking repairs to the network in 16 distinct areas of Akaroa. We have seen a drop in dry weather I&I from broken pipes on the Council side of the network. There will be continued work to reduce I&I. This will involve further investigations on both the public and private infrastructure.
- 6. Do better treatment with an ocean outfall rather than discharge to land.** An ocean outfall was considered in early options assessments but was discounted as very unlikely to receive resource consent and being extremely expensive.
- 7. The scheme will result in an increase in raw and treated sewage being discharged to the harbour and foreshore.** The project will make a significant improvement to the number of overflows from the Akaroa network due to wet weather. The project plans to double the pumping capacity of the existing wastewater network and is expected to reduce overflows from, approximately five times a year to once in five years. The project will also remove the continuous discharge of treated wastewater to Akaroa Harbour. Currently up to 220 million litres per year. The project also plans to ensure any releases of treated water to the harbour have first passed through a wetland to try and bring back some Māori. (Such events would be,

roughly once in 5 years). Staff see this as significant improvement for the harbour and disagree that it will result in thousands of litres of raw water entering the harbour.

8. **The proposed scheme will need constant monitoring and management.** All schemes require careful and constant monitoring and management.
9. **It is an expensive scheme and there will be significant operational costs going forward.** We agree the scheme is very expensive and have seen NZ infrastructure inflation of over 40% in the last 5 years which is challenging to all infrastructure works. In terms of operational efficiencies staff are looking at options to present to Council for a decision on combining facilities (Akaroa and Duvauchelle).
10. **Put the resource consent application on hold.** Given the timeframes on the existing outfall consent Council must establish and commission a new wastewater scheme by 2029. We cannot place our consent application on hold.
11. **Concerns over the safety of the scheme.** We have engaged technical experts on this matter and they are confident of the design.
12. **Please explore more options.** There was extensive options analysis done as part of the 2020 consultation.
13. **The scheme cannot be expanded in the future to cope with population growth.** The current scheme is sized to cater for projected population growth in Akaroa until 2054. If growth exceeds projections, there are a range of opportunities to cater for this.
14. **Work with the community to reduce/minimise the stormwater inflow (I&I) into the wastewater system.** Staff agree that it is a good idea to further reduce Akaroa's wastewater I&I. To date we have expended \$4M undertaking repairs to the network in 16 distinct areas of Akaroa. We have seen a drop in dry weather I&I from broken pipes on the Council side of the network. There will be continued work to reduce I&I. This will involve further investigations on both the public and private infrastructure.
15. **Risk of land instability resulting from the land irrigation and positioning of storage tanks.** We have engaged technical experts on this matter and they are confident of the design.
16. **Move the proposed overflow outfall further down the harbour away from Children's Bay.** The option of a harbour discharge was also considered in the 2020 consultation and discounted as it was highly unlikely to obtain resource consent and would be counter to Council's commitments to work in partnership with mana whenua.
17. **Discharge the highly treated wastewater back into the aquifers via bores.** The option of discharging via bores into the ground has been previously considered and we even tried two trial bores. Unfortunately, the option was not technically viable with high risks of the working "coming up" in unexpected places.
18. **All of the land to be irrigated is now in Robinsons Bay.** This is incorrect. There will still be drip irrigation installed at Hammond Point and the Golf Course tree block if the schemes are combined.
19. **Irrigation volumes have been underestimated.** The current scheme is sized to cater for projected population growth in Akaroa until 2054, as well as I&I remaining unchanged and projected climate change impacts (as per NIWA advice). If flows exceeds projections, there are a range of opportunities to cater for this.
20. **Akaroa wastewater may bypass the treatment process in times of high flows.** This is incorrect. The project will make a significant improvement to the number of raw sewage overflows from the Akaroa network due to wet weather. The project plans to double the pumping capacity of the existing wastewater network and is expected to reduce overflows

from, approximately five times a year to once in five years. We disagree with the statement that the new scheme is undersized. All flows received by the treatment plant will be treated to the same high standard, with no treatment plant bypass.

21. **Need an assessment of environmental effects stating how it will deal with overflows.** Yes. This work is currently being undertaken by a consultant and will inform final design.
22. **What is Plan B if the land becomes unsuitable for irrigation (saturated).** There are a number of options, including additional storage and irrigating more land (which is already in Council ownership).
23. **The proposed scheme is far worse than the existing scheme.** The scheme is significantly better than the existing scheme, from a legislative, cultural and environmental perspective.
24. **The proposed planting is Kanuka and this is not what the community were expecting as it is highly flammable.** Kanukas being a poor choice for the Robinsons Bay Valley. Our plan is to plant over 140,000 plants across the Robinsons Bay and Hammond Point sites. This will be predominantly Kanuka but will include a range of other species, especially ngaio and karamu all sourced from the local area. Kanuka is the most prevalent species in the valley and our expert advice is that it is an excellent choice for a pioneer species to start reforestation efforts.
25. **More land will need to be purchased.** This is not our plan. The existing scheme has sufficient land (plus a buffer)

Support

116 - Jarrod Coburn

[Resource Recovery > Resource Recovery (Capital)]

Good to see investment in three waters and solid waste.

1327 - Chris O'Brien

Make sure our sewage systems are operating properly and plan for the future in these areas.

1619 - David Hera

Clean Water and Climate Resilience: Addressing water protection and climate adaptation is crucial. My background and recommendations include: Personal Insight: Having witnessed devastating wildfires exacerbated by climate change in my hometown, I am acutely aware of the need for preparedness. Solutions: Implement robust stormwater management and waterway protection measures. Significantly increase investment in climate-resilient infrastructure.

1752 - Carolyn Boulton

[Resource Recovery - Resource Recovery (Operations)]

I strongly support improved wastewater treatment and recycling.

1825 - John Davies

Water & waste need to be maintained, so I'm ok with that spend

1882 - Anna-Marie Browne

[Transport>Public Transport Infrastructure (Capital)]; [Transport>Cycleways (Capital)]; [Three Waters>Stormwater & Land Drainage (Capital)]; [Transport>Roads (Capital)]; [Spending>Capital Programme (General)]

Do you have any comments on our capital spend or capital programme?

The council should also put more funding into the capital funding new. More capital funding should go to climate, and flood protection, our water pipes and creating bus lanes and bike lane. I don't believe its necessary to create more roads,

2013 - Rata Harper

Spending for transport and wastewater management makes more sense, as it benefits everyone living here rather than just those who can afford to go to the stadium when it opens.

2087 - Emma Norrish (Waipapa Papanui-Innes-Central Community Board)

The Board is particularly supportive of the considerable proposed investment in the Three Waters, emphasising that we must continue to upgrade our infrastructure as there would be unacceptable consequences of failing to do so. We

need to do this for current residents and visitors, as well as for those in generations to come. This prioritisation is further justified by drinking water, and stormwater and drainage, coming through prominently in the early engagement on 'what matters most' for the Papanui-Innes-Central wards – drinking water coming just above climate change as the top priority for the Board area as a whole.

2300 - Katinka Visser

Waste water needs to become a priority.
So, NO this LTP is not balanced especially
for those that live on the East side of
Christchurch

>>>

Comments: Waste water needs to be considered
Extra funds MUST be put aside for
any unexpected running costs.

>>>

Comments:
All funds MUST be directed to
the waste water first. This must be
priority number one.

>>>

Any additional savings need to be directed to wastewater.
It is not OK for residents on the East to live with the effects of poor planning of the waste water treatment plant.

>>>

Waste water treatment MUST be a priority

>>>

Please sort wastewater treatment in the East side of Christchurch we are suffering from the effects of the odour. This is not good for our wellbeing - cut the red tape & sort it please.

2797 - Dave Kelly (Beckenham Neighbourhood Association)

[Three Waters > Water Supply (capital)]

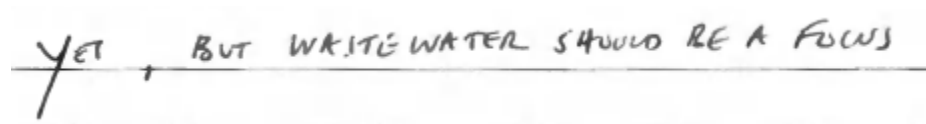

The LTP proposes to spend about \$100M a year in the first few years on water supply, and \$150M a year on wastewater (both rising in later years). The recent water main renewal through Beckenham was an example of fixing underground infrastructure before it breaks. Recent problems in Wellington City show what happens if this is deferred. The BNA supports the proposed water and wastewater programme in the LTP as a prudent and well-planned programme of renewal.

[Full attachment available]

2806 - Tony Fraser

3 waters areas okay & replacement/upgrade of existing assets

2820 - Brendan Ross

YET, BUT WASTE WATER SHOULD BE A FOCUS

[coder note. response to 'have we got the balance right?']

2822 - Angela Leatherby

The waste water treatment plan redevelopment is a priority for the people of Bromley.

2831 - Sebastian Denize

[Transport > Road (Capital)], [Strategic Priorities > Climate], [Three Waters > Waste Water (Capital)]

We should also focus on improving our vital infrastructure, like our water and waste network. Sadly this is in woefully poor condition, due to both the earthquakes and the lack of investment prior. Its terrible that we are spending so much money on a stadium and not first prioritising our water and waste networks.

286 - Pauline Reid

Any money spent on water, infrastructure, and coastal erosion is money well spent.

2897 - Debbie Tikao (Ōnuku Rūnanga)

Please see the attached document which outlines the support of Ōnuku Rūnanga for the budgeted \$94mil for the Akaroa reclaimed water treatment and reuse project.

>>>

[Parks - Foreshore]

[Full attachment available]

3166 - Arwen Sommer

[Spending > Capital Programme (General)], [Three Waters > Water Supply (Capital)], [Transport > Public transport Infrastructure (Capital)], [Resource Recovery > Resource Recovery (Capital)]

Drinking, Storm, and Waste water, sustainable public transport, and Waste and Recycling services all need significant attention and innovation if they are going to be future proofed. The city council need to get the basics right and do them well before embarking on big projects.

>>>

[Other/Special Interest Topics > Creating a Climate Change Fund]

The waste water network needs significant work. There are large number of places around the city that constantly smell like raw sewage and have for a long time. I can't image what it would be like to live there.

3174 - Gary Morrison

[Other/Special Interest Topics > Public Transport], [Strategic Direction > Climate Change]

Water infrastructure is essential.

3291 - Jess Kikstra

[Parks >Parks Spending (General)]

[Recreation, Sports & Events > Rec & Sport (operations)]

[Libraries > Capital]

[Other/Special Interest Topics >Creating a Climate Fund]

Capital program: Yes, particularly supportive of spending on cycling and active transport. I would also support behavior change programmes and consideration of incentives to encourage more people to bike. Supportive of improvements to waste treatment, parks and foreshore, recreation, libraries, and adapting to climate change.

3341 - Maria Bartlett

[Transport > Roads (Capital)], [Spending > Te Kaha]

I'm pleased to see the emphasis on drinking water, wastewater and stormwater,

3501 - Malcolm Long (Ōpāwaho Heathcote River Network)

Wastewater

19. Reducing the likelihood of wastewater overflows into the Ōpāwaho Heathcote River is of paramount importance to the health of the river.
20. We **strongly support** the following projects in particular:
 - 20.1. 42154 – WW Selwyn Pump Station (PS0152), Pressure Main and Sewer Upgrades
 - 20.2. 71278 – WW Land for Somerfield Pump Station

3507 - Gary Barber

[Transport>Roads (Capital)]; [Transport>Transport (Operations)]; [Three Waters>Water Supply (Capital)]; [Three Waters>Stormwater & Land Drainage (Capital)]; [Strategic Direction>Have we got the balance right?]

Infrastructure investment appears visually skewed to unnecessary road & transport changes but support water infrastructure upgrades.

3748 - Greta Bond (Age Concern Canterbury)

[Three Waters > Water Supply (Capital)], [Three Waters > Stormwater & land Drainage (Capital)]

We recognise the importance of the large spend on 3 waters infrastructure.

3809 - Johnathon Ridden

[Three Waters > Water Supply (Capital)], [Three Waters > Storm Water & Land Drainage (Capital)]

Water infrastructure is important, so support this as a primary capital expenditure option.

396 - Daniel Jackson

Thank you for prioritising three waters continuation. Our water management systems need some love.

4000 - Kari Barr

[Three Waters > Stormwater & Land Draining (Capital)]

More for wastewater and stormwater

4027 - Rona Buttimore

Safe drinking water and water treatment is paramount to good health.

416 - Mike Cleaver (Canterbury)

I agree we need to invest in our water systems as it is clear they are struggling.

785 - Ariana Tikao

[Three Waters> Water Supply (Capital); Strategic Direction> Climate Change]

I support the resourcing towards healthy clean water, and environmentally safe practices around wastewater management, and adequate resourcing being allocated for safeguarding future generations against the negative affects of Climate Change, and cutting down carbon emissions where we can.

Oppose

1996 - Iain Nicholls

Overly ambitious, particularly with regard to water infrastructure

>>>

Too much emphasis on three waters.

2171 - Mark Smith

Disagree with what is being done with the Akaroa waste water as do not think it is going to achieve what it is being said it will

>>>

Do not think the proposed system is going to achieve what is required

2200 - Janna Robinson

I think considerable money is being spent on unsuitable projects around wastewater.

>>>

There needs to be a focus on funding that provides a return on investment to city. My concern with some of these waste water projects is they are not fit for purpose and the Council needs to look at the bigger picture. Some of these alternatives are worse than the current situation. for example, the waste water project for Akaroa, the independent BECA report has shown that the current plan is not fit for purpose. If so much money is going into these projects, where is the long term plan and strategy? To me it seems like a waste of money and is not suitable for a changing climate and updated modelling. This plan will not benefit the people of Akaroa long term.

>>>

I think funding should be cut to some of these other projects that are not a sustainable option eg akaroa waste water

>>>

wastewater programme is prioritised that is sustainable and fit for purpose. The current proposal for Akaroa is not. I agree that wastewater needs to be addressed over there but the BECA report shows the Council plan is not suitable.

2360 - Graham and Linda Harris

We write with regards to this project proposed to relocate the wastewater treatment plant to the top of Old Coach Rd and to irrigate treated wastewater to land in the inner harbour. We (Graham and Linda Harris - residents at)are vehemently opposed to this plan, and urge Council to withdraw its current consent application until further matters are addressed as noted in the report listed below. The Beca report is now tabled with Council, and has clearly pointed out major flaws in this proposed plan in both capital and operational cost, together with fundamental design flaws. The report spells out the issues very clearly and unambiguously and we request that we be given a further opportunity to oppose this plan by making in person representations at any further public consultations.

2374 - Kevin and Deborah Burrowes

As a resident of Banks Peninsula (Duvauchelle) my wife and I strongly support the objection submitted by Lee & Marian Robinson and wish to have this objection recorded. 1. REMEMBER; the whole purpose of the proposal was to shift the treatment plant from its current location at Takapuneke and remove treated wastewater from the harbour both of which are culturally repugnant to the Iwi. 2. However, the new undersizing of the new system means wastewater (both raw and treated) will still enter the harbour, and if it proceeds as planned have real impacts on both public health and the environment of the Akaroa township itself. 3. Simply increasing the capacity of the system is not a straightforward matter. It will require raw sewage buffer storage at the boat store area – right beside all our recreational facilities, probably the acquisition of more land for treated wastewater storage at the irrigation fields. This will all add to the costs and makes no sense. 4. Operating costs for this complex new system have not been broken out in the LTP or made public, but will be substantially more than the current gravity fed system with its simple harbour outfall, as wastewater will be pumped for kilometres and the irrigation fields and storage systems will need constant monitoring and management. 5. Currently at least 70% of water passing through the wastewater system during wet weather conditions is still infiltration, and this is after the Council has completed its pipe improvement work in 2021 and 2022. It now has no plans or budget for further reduction work. This infiltration is the cause of all the capacity issues with the proposed system. 6. Failing to reduce the infiltration contradicts the recommendation made by Councillors in 2020 when they agreed to proceed with the Inner Harbour system that infiltration levels be brought down to 20%. No reason has been given as to why Council is not working to further reduce the infiltration, and very few Councillors will be aware of this. Fixing the pipe network will make Akaroa much more resilient in future, and stop untreated sewage leaching from these pipes onto our beaches affecting water quality in summer -quite apart from actual overflows in wet weather. If there are indeed valid reasons why the badly leaking pipe network cannot be fixed, then the Council must come up with a better plan for foreseeable overflows than dumping raw and treated sewage into the Grehan Stream and Childrens Bay. The Council is strapped for cash and planning huge rate rises. This is not the time to plough on with a project that is so clearly off the rails and facing even more cost escalation.

2398 - Fiona Turner

Akaroa Reclaimed Water Treatment & Reuse Scheme – LTP 24-34 line item 596 My home is situated in Robinsons Bay, with the wastewater site on the boundary of two sides of my property. I have major concerns about the current proposal due to the escalating costs of the project, the environmental risks it creates and the fact it does not resolve the cultural issues it was attempting to overcome. I ask the Council to withdraw its current resource consent application and reconsider its options. The cost is currently \$107M and expected to rise in light of the information. The whole scheme is vastly oversized as it has to treat so much stormwater and ground water. The broken pipe

network in Akaroa must be fully repaired to enable a much smaller scheme to be designed. Designing a scheme that overflows raw sewerage into Grehan Valley Stream and treated wastewater into Childrens Bay is not acceptable and certainly not a good investment of Council funds. Despite all of the planning to date no backup 'Plan B' has been factored in if this scheme fails. After eight years of planning I have still not been provided with any reassurances about this safety of this scheme right on my boundary. Latest reports provided by the Council now reveal increased irrigation levels above the recommended rates, which will increase the risk of land instability and increase the nutrient load of the freshwater stream at the bottom of the site. Extra irrigation sites have now been identified on high up plateaus that have steep drop offs and are slip prone, and the need has now been identified for even more giant storage tanks close to my home than previously thought. The Council have not contacted me about the required work right on my boundary, nor the necessary fencing work. The new scheme is making the issue worse that what they are replacing, and there appear to be many potential failure points in the proposal that have not been suitably mitigated. I have seen the huge emotional toll this project has taken on my community, and both the personal time and expense that has gone trying to ensure resilient solutions are put in place. With the new proposal far less resilient to climate change than the existing scheme I ask the Council to withdraw its current consent application and explore new options.

2399 - Bernard Rennell

I would like to strongly urge the Council to withdraw its consent application or put it on hold and direct the funding into fixing the leaking pipe network in Akaroa before proceeding further. Fixing the pipe network will make Akaroa much more resilient in future, and stop untreated sewage leaching from these pipes onto our beaches affecting water quality in summer -quite apart from actual overflows in wet weather. If there are indeed valid reasons why the badly leaking pipe network cannot be fixed, then the Council must come up with a better plan for foreseeable overflows than dumping raw and treated sewage into the Grehan Stream and Childrens Bay. The Council is strapped for cash and planning huge rate rises. This is not the time to plough on with a project that is so clearly off the rails and facing even more cost escalation.

2499 - Amanda Ray

You have proposed to spend roughly 93 million dollars on the wastewater in Akaroa, which has a population roughly the size of 600 people. This is unacceptable. You are literally pushing poo uphill at the cost of \$93 million dollars. There must be more financially viable options available. Sounds like you are subsidising rich bach owners.

>>>

The wastewater upgrade for Akaroa should completely be reviewed!

2561 - Paul de Latour

Submission in regards to the Christchurch City Council's application for the proposed land-based wastewater project that has now before ECAN for consent On the 8th April the Council received an independent report from BECA who have vindicated Friends of Banks Peninsula concerns about the proposed system and alerted them to additional issues. On 17 April 2024 the Friends of Banks

Peninsula made a presentation on the BECA report to Cr Sam McDonald with Mayor Phil Mauer in attendance. My submission to the Council is that they withdraw the consent application or put it on hold and direct the funding into fixing the leaking pipe network in Akaroa before proceeding further. Fixing the pipe network will make Akaroa much more resilient in future, and stop untreated sewage leaching from these pipes onto our beaches affecting water quality in summer quite apart from actual overflows in wet weather.

2612 - John Curry

Introduction Recent news about the proposed sewage treatment and disposal system for Akaroa should motivate the Christchurch City Council to re-evaluate the scheme and consider a more practical and cost-effective solution. I specifically refer to the following issues: 1. The blowout in the cost of the proposed scheme, currently over \$100 million. 2. The inability of the proposed scheme to cope with peak flows. 3. The lack of capacity in the proposed scheme to be expanded to cope with population increase. 4. The risk of serious erosion and slips in Robinsons Bay where the wastewater would be disposed, causing this key part of the disposal system to fail. The most practical, cost-effective and long-term solution for the disposal of Akaroa's treated wastewater is via a harbour outfall. This option if properly designed and implemented overcomes the problems identified above. The currently-proposed scheme was adopted because of the cultural objections of Ngai Tahu. According to Maori custom, human waste should be filtered through the land before entering water courses and the sea. The purpose of my submission is to discuss the cultural objection of Ngai Tahu to the Harbour Outfall option. I do not have any Maori heritage, but I am a local resident and descendant of early Banks Peninsula settlers. Scientific basis of Maori cultural practice First of all, I am of the opinion that the Maori cultural custom of human waste being filtered through land before entering waterways has a sound scientific basis in minimising/eliminating the risk of polluting waterways, and food taken from them. The buried human waste that would decompose over time was an effective waste treatment system based on the technology available at the time, and the relatively small population sizes. Following European settlement, human waste/sewage from the township of Akaroa has been disposed into Akaroa harbour, oftentimes with minimal treatment in the earlier years, and suboptimal treatment up to the present. And it has negatively impacted the quality of seawater in the harbour. For example, at times it has not been safe to eat shellfish taken from the harbour due to pollution. Understandably this would concern local Maori because of their cultural belief about human waste disposal, and on observing the environmental and health impacts on their traditional food gathering practices. It is also understandable that Ngai Tahu would also want to see the present sewage/wastewater treatment plant located at Takapuneke be relocated because of the site's cultural and historical significance to local Maori. The proposed wastewater scheme allows for this, regardless of how the wastewater is disposed of. The proposed replacement of the outdated wastewater treatment station at Takapuneke with a new wastewater treatment station located above Akaroa represents a major improvement. Solid waste materials from the town's sewage will be separated out before the remaining wastewater will be pumped up to the new treatment station. There it will be treated to a very high standard such that it will be suitable for non-potable reuse via a purple pipe system within Akaroa township. The wastewater would also be treated to a level of purity that would make it suitable for release into Akaroa Harbour via an outfall pipe. From a practical point of view, this is the most pragmatic option. Benefits include: ☒ It is the lowest cost option, ☒ The treated water released into the harbour is non-polluting so there will be no negative effects on the physical environment ☒ it allows for reusing the treated water within Akaroa township via a purple pipe system

It ensures the recycled water is available for the township during the typically dry summer months. It doesn't require large storage pond(s) – water can be released into the harbour or used for recycling as per the need. It helps future-proof the water supply of Akaroa township anticipating population growth and the potential effects of climate change. However, there remains the cultural objection of Ngai Tahu to treated wastewater being discharged into the harbour, regardless of the level of water purification. As acknowledged above, there is a practical, public health basis to the traditional Maori practice of filtering human waste through the soil before it enters waterways. The proposed treatment of Akaroa's sewage incorporating human waste will fulfil the spirit and intent of the Maori cultural practice by ensuring that no polluted water enters the local waterways. Waste solids will be separated out and processed in Christchurch, the waste water will be filtered to a high level, and also subjected to UV light to kill pathogens, and the treated water will be non-polluting. The end result is the same although achieved by different means. Adapting of cultural practices Cultural practices adapt over time according to changing circumstances. Today we live in a bicultural society much changed from pre-European Aotearoa/New Zealand. It is not possible, or even desirable, for cultural practices in any society to remain unchanged and adhered to regardless of changing circumstances. An extreme example of this would be the practice of slavery which was acceptable in many cultures including both European and Maori up until the mid-nineteenth century. Changes in thinking about human rights over time led to slavery becoming culturally unacceptable in most societies that once practised it. I am not aware of anyone seriously advocating the reintroduction of slavery because it was the cultural practice of earlier generations. We should not over-ride long-established cultural practices whenever convenient, but instead examine them in light of the intent and beliefs behind them. In some cases we can discard them out-of-hand when they are based on ignorance and superstition (e.g. the burning of 'witches' in pre-Enlightenment Christian Europe). In other cases we can see that there is logic and validity to a cultural practice, such as the burial of human waste as a public sanitation measure. The challenge is adhering to the cultural intent behind these practices in a way that reflects improvements in science and technology and societal thinking. In a bi-cultural society, this can be particularly challenging as evidenced by differing views about the disposal of treated wastewater from Akaroa township. Another consideration is that in a bi-cultural or multi-cultural society, some level of pragmatic accommodation that takes into account competing beliefs and priorities is more likely to result in a successful and widely-accepted outcome. I am of the opinion that for Ngai Tahu the proposed harbour outfall represents a significant improvement on the current treatment of wastewater regardless of the other proposed options. The site of the treatment plant will be moved from Takapuneke, the spirit and intent of Maori cultural practice regarding human waste disposal will be met through modern sewage treatment technology, and there will be a vast improvement in the quality of the treated wastewater released into the harbour. Human versus animal waste From a scientific perspective, human waste is not particularly different from other forms of animal waste including cattle, sheep, dogs, cats, and also fish. Water pollution from any and all sources needs to be monitored, controlled and minimised so that waterways such as Akaroa Harbour are safe and relatively unpolluted. One form of water pollution in Akaroa Harbour is salmon farming. In various places around the world, such as in Tasmania's Macquarie Harbour, intensive salmon farming has been found to be a major cause of environmental pollution. I am not suggesting that salmon should not be farmed in Akaroa Harbour, but the environmental impacts of salmon farming need to be monitored and controlled. It is likely that the current level of biological pollution from farmed salmon in Akaroa Harbour would far exceed the amount of pollution caused by a harbour outfall of highly treated wastewater. Conclusion The cultural concerns of Ngai Tahu need to be taken into account when developing a system for the disposal of human waste. The fundamental desire and

intent to avoid polluting waterways is shared by all concerned. This can be achieved by building a sewage treatment plant that effectively treats human waste so that the resulting wastewater has a high level of purity and is non-polluting. That wastewater can then be disposed of through a harbour outfall. It thereby addresses environmental concerns. The intent of the Maori practice is fulfilled but not in the same way as in pre-European settlement. The currently proposed scheme to dispose of the wastewater at Robinsons Bay may meet Ngai Tahu cultural concerns but it fails in all other respects. The scheme is proving to be prohibitively expensive, is limited in its capacity to cope with existing or future volumes, and may cause severe environmental impacts in Robinsons Bay leading to system failure. It is high risk and needs to be abandoned in favour of a harbour outfall alternative.

2689 - Chris and Annette Moore

This submission relates only to LTP2024-34 line item 596 WW Akaroa Reclaimed Water Treatment and Reuse Scheme

We oppose the the massive funding increase for the WW Akaroa Reclaimed Water Treatment & Reuse Scheme item 596.

We were shocked to read in The Akaroa Mail that Council is now planning to spend well in excess of \$100 million on this project. The project covers less than 1000 connections which must make it the most expensive wastewater project ever undertaken in New Zealand. **A project that has no guarantee of success. A project that will have overflows of raw and treated sewerage going into Akaroa Harbour near Childrens Bay.**

We are aware that Council are struggling to find the funds to carry out major capital works and normal operational expenses so here is the opportunity to put a hold on this project and look at what should and could be done to re-evaluate, resize, revamp and recost the total project. Council staff should also take this opportunity to relook at other options that have become available during the last 4 years.

While this is being undertaken, Council should allocate funds to fix the aging and leaking pipe network in Akaroa to reduce the level of stormwater infiltration to under 20% as per the Council Resolution back in 2020. This work was started but seems to have been put on hold. When this work is completed, it will result in a much smaller system being required at significantly less cost than what is currently being proposed.

We urge Council to put a hold on this project as a matter of urgency.

2710 - Bruce McLean

No, not in respect to the Akaroa Wastewater capital plans. I believe the \$94m plan is a high risk, expensive option that has a number of potentially fatal design and operational flaws.

>>>

The proposal to spend \$100,000 per Akaroa property on a wastewater scheme is an example of extremely wasteful expenditure that can be avoided.

>>>

The proposed Akaroa Wastewater scheme will impose significant operational costs on the CCC for the life of the assets.

>>>

My comments are restricted to the proposed Akaroa Wastewater scheme. It is not a sound design, is probably not consentable because it has not assessed environmental effects properly, has no designed redundancy therefore is not resilient, it will be horrifically expensive to build and operate and does not deal with the current problem of leaking pipes and beach pollution.

>>>

As noted above the Akaroa Wastewater proposed capital spend needs revisiting. Costs have increased 300% since the 2016 LTP. I expect the costs to continue to increase because there are so many issues that have not been dealt with properly. Design inflows are incorrect and as a result the pump, storage and irrigation capacity of the system is undersized. This means the system will overflow into the harbour on regular occasions possibly every three years.

>>>

The proposed Akaroa Wastewater proposal is exposed to Climate Change risk. High sustained rainfall events will likely require the system to cease operations. The storage capacity will then be exceeded and the sewage will have to be dumped in the harbour. The current system as designed does not adequately deal with this risk. Throughout its history Akaroa has been exposed regularly to high rainfall events. Climate Change increases this exposure.

2775 - Lee Robinson (Robinsons Bay Ratepayers Association)

We do not support funding for the following projects:
596 WW Akaroa Reclaimed Water Treatment & Reuse Scheme
2214 WW Duvauchelle Treatment and Disposal Renewal

The Robinsons Bay Ratepayers and Residents Association works for the benefit of the community of Robinsons Bay. Robinsons Bay is a quiet rural place, with one of the highest quality freshwater environments on the Peninsula. It is renowned for its whitebait and flounder fishing and is popular with swimmers and boaties, The disposal of wastewater in Robinsons Bay has been a cause of great concern to many residents since it was first proposed by the Council in 2016.

Finding suitable land for the year-round irrigation of wastewater has proved extremely difficult due to the steep and slip-prone nature of the Peninsula terrain and the risks this creates. Over the 9 years that the Council has been investigating land disposal for wastewater, the safety parameters underpinning the system design have been steadily reduced as it tries to fit the scheme onto available land. The current Consent Application for the ATWIS system lodged with ECAN has substantive differences from the Inner Bays Irrigation Scheme consulted on in 2020 and previous consultation exercises. It includes the following relaxations to safety parameters, all of which increase the risks to the environment of Robinsons Bay:

- Steeper land is earmarked for irrigation than originally considered safe. Land used for irrigation now includes areas with slopes greater than 19° and downslopes greater than 19° when the original selection criteria had been slopes of no greater than 15°
- Land above 200m is included in the irrigable areas, whereas previously no land above 200m was considered.
- The total land area to be irrigated has reduced from 40ha to 35.7ha.
- The irrigation rate (including during winter) has been increased by 12% above that previously considered to be within the Long Term Acceptance Rate for land stability.
- Land that has a history of saturation during winter and that was previously excluded is now included and has not been geotechnically assessed.
- The treated wastewater is to be stored in huge agricultural tanks in an area that will be subject to 50,000m³ of earthworks to create flat platforms.
- Irrigation is to take place close to the tank platforms, both above and below.

-
- This is despite the Geotechnical report¹ attached to the application warning that soils on the property:
 - *“are extremely susceptible to changes in moisture content, with minimal increases sufficient to significantly reduce shear strength properties,”* and,
 - *“There are many forms of slope instability exhibited by loess deposits, however in Banks Peninsula these are primarily tunnel gullying and mass movement which often occur following periods of high rainfall or other increases in soil moisture,”* and,
 - *“care should be taken not to place the tanks close to the edges of gullies or to the top of the southern forested slope to avoid loading the heads of potentially unstable slopes”*
 - All of the land to be irrigated is now in Robinsons Bay, meaning all the risks are concentrated into our community

In the past few days we have learnt that the application is based upon underestimated wastewater flow volumes, and therefore either much more storage will be needed, or the system is likely to overflow in wet winters, with such overflows potentially lasting for days or weeks. We also understand that the wastewater volumes and storage modelling do not include any margin for withholding irrigation if the land is saturated, and have not taken into account the 2023 July heavy rainfall event.

We have also learnt that Council is now considering using Robinsons Bay for the storage and irrigation of treated wastewater from the Duvauchelle scheme as well as Akaroa wastewater, because the treated wastewater is not sufficiently safe to irrigate on the Duvauchelle golf course. Furthermore, the Akaroa wastewater may bypass some treatment processes at times when flows exceed the capacity of the treatment plant and its raw sewage buffer. These bypass flows would then come through to Robinsons Bay for irrigation.

Over the past few years since the Council began searching for a solution on how to dispose of wastewater on the Peninsula’s steep, slip-prone land, the impacts of the changing climate have been felt around the world, across New Zealand and on Banks Peninsula. In December 2021 a huge storm caused many massive slips on both open farmland and in heavily forested Hinewai Reserve. In July 2022 and July 2023 intense and prolonged rainfall was experienced. In Hawkes Bay huge water tanks cascaded down hills as slopes gave way in the unprecedented rain.

All of these matters taken together present an absolutely unacceptable level of risk to the community of Robinsons Bay, both in the short term if it were to experience slips or the collapse of the tank platform, and in the long term if there is persistent nutrient run-off to the stream and health risks to the community. The Council has not:

- produced an Assessment of Environmental Effects stating how it will deal with the overflows resulting from inadequate storage, and whether management methods include discharge in Robinsons Bay.
- included any form of Plan B on how the system would continue to operate if any of the land earmarked for irrigation proves unsuitable or experiences slips.
- provided a plan on how it will staff and manage the irrigation fields and storage.

The anticipated cost of the Akaroa Wastewater System in the LTP is now \$93.5 million on top of the \$13.9 million already spent. The Duvauchelle System is budgeted in the LTP at \$18 million. These are hugely expensive projects for the small communities they serve, and will cost even more now that the wastewater volumes are larger.

Both schemes are clearly deeply flawed – the one having grossly underestimated volumes and the other unable to irrigate the golf course (previously promoted as a community benefit).

We submit that after 9 years it is time for the Council to draw a line under its attempts to find a land-based solution, and return to the less expensive and more resilient harbour outfall solution it proposed in 2015, potentially with a longer pipe. Despite best efforts, it has not proved feasible, affordable or safe to develop year-round land-based irrigation for wastewater in the Akaroa Harbour area. No further funds should be spent on these projects in their current form, and the Council should instead focus its funds on repairing the sewer networks to reduce storm water infiltration, providing the highest standard of modern treatment, and enabling re-use at times when there are water shortages in these communities. Taken together these measures would provide the greatest resilience for the future and represent a prudent investment of funds.

[Full attachment available]

2814 - Humphry Rolleston

I wish to record my objection to the new Akaroa sewerage system as a near neighbour and as a rate payer. I understand an independent report has been carried out by the respected engineering firm

Beca and that they have found that the design and capacity of the plant being suggested is not at best practise and that raw sewage could spill into the local environment and harbour under certain conditions. I would appreciate a technical response from the Council to the Beca report and for this to be made public. In the meantime I do not agree to any more capital being spent on the project.

2950 - Chris Muirhead

No! I strongly disagree with the Draft LTP for the Akaroa waste water disposal. The plan is too expensive and will result in thousands of litres of raw and treated sewage entering the sea and foreshore along Akaroa's seafront area during high rainfall events

2997 - Simon Trotter

The captial project for the Akaroa Wastewater scheme should be put on hold. There are too many untested assumptions. The financial cost, and likely on-going operating costs have not been pinned down. The impacts to public health and the environment are far from fit for purpose.

>>>

Submission on the LTP – Akaroa Wastewater project. To push pause on the scheme planned for the treatment of wastewater for less than 1000 properties in Akaroa. Council to withdraw it's consent application with ECan. This project has numerous red flags that have been raised to Council that the scheme is too small to cope with all of Akaroa wastewater. This is due to the leaking pipe network that has not been fixed, during heavy and extreme rain events will result in raw and treated sewage overflows into the tidal flats of Childrens Bay and harbour. Rain events are more frequent due to the changing climate. This has public health and environmental impacts. As stated in the independent Beca Report , 15 April 2024, outlines the wastewater modelling for the scheme has been under estimated and will increase the number of sewerage overflows. This report also outlines the risk of land instability resulting from the land irrigation aspect of the wastewater treatment scheme. We urge Council to fix the leaking pipe network to better understand the requirements for an appropriate wastewater treatment plant. There are many assumptions made with this complex project and if it proceeds further with untested assumptions this will escalate financial costs to the ratepayers. This is far from a fit for purpose wastewater treatment scheme for public health and environmental impacts.

>>>

Push hold on the Akaroa wastewater project this is budgeted at \$93m. Direct funds to fix the leaking pipes in Akaroa to reduce infiltration to 20%.

>>>

Relook at the Akaroa Wastewater treatment plant scheme, it's not fit for purpose, resilient or climate change consideration.

3402 - Sue Church

I request the Council withdraws its resource consent application as updated reporting provided by CCC now clearly reveals that the new and vastly expensive proposal will make the current issue of wastewater overflows into the harbour far worse than the existing wastewater scheme. The proposed scheme will leave Akaroa with a broken pipe network, create a risk of overwatering of the slip prone slopes in Robinsons Bay, and leave the whole scheme far less resilient to climate change than what is currently in place.

My concerns and comments about the project include the following:

Cost

The cost is currently \$107M (\$94m in LTP budget and \$13m already spent) equating to more than \$100,000 per connection. This is the Councils fourth largest capital expenditure project in the LTP budget. The cost is likely to rise even more in light of the new information requiring additional work to be undertaken to render the scheme viable.

Sewerage overflows into harbour

The new proposal relies on raw sewerage overflows being released into Grehan Stream in the middle of the townships recreational area and emergency treated wastewater overflows into Childrens Bay when capacity is exceeded during wet weather events, with each overflow occurrence having the potential to be ongoing over a prolonged period of time. This is not stated in the Councils resource consent application, but has been exposed in a recent Council commissioned report from BECA. These discharges will be into a shallow Bay in the township instead of retaining the existing harbour outfall for emergencies to provide a safe mechanism for emergency overflows.

Broken pipe network resulting in oversizing of scheme

The broken wastewater pipe network must be fully repaired to enable a much smaller scheme to be designed. It makes no sense to build a wastewater treatment plant to process mainly stormwater. Instead of following the Council resolution from 2020 directing staff to reduce the I&I from 60% to 20%, they have worked on reducing it by 20%. The huge difference in figures then equates to massive amounts of stormwater inundating the wastewater system – the result of which requires a huge wastewater scheme to be built that is mainly treating stormwater. The poor state of the pipe network will get worse over time increasing the I&I and storage requirements even more. Raw sewage will continue to seep out of the network into the environment all around the town. Councils current evidence of I&I reduction to date is incorrect. No guarantee of I&I reduction means no accurate figures to calculate appropriate storage capacity, or site capacity of irrigation fields.

Issues on the Robinsons Bay site

- ☒ Storage requirements have been vastly undersized as revealed in the latest BECA report.
- ☒ Irrigation rates have increased from those previously adopted as appropriate. New irrigation sites have been selected on high up slopes with steep drop off, with inadequate geotechnical assessments having been undertaken.
- ☒ Nothing has been put in place to protect the archaeological site.
- ☒ Council plan to plant 40,000 kānuka but this is not the biodiversity forest the community expected. Kānuka is one of the most highly flammable native trees and is susceptible to myrtle rust.

There are many potential failure points in the proposal that have not been suitably mitigated and I believe the project in its current form should be halted. It will not achieve the cultural objective of removing wastewater from the harbour, and opens up many risks to both the environment and community.

Better ways need to be sought to deal with wastewater issues. If the Bromley wastewater plant ever had to become a land based scheme the cost would have the potential to bankrupt the city.

3665 - Sue Church (Friends of Banks Peninsula)

This submission relates only to LTP 2024-34 line item 596 WW Akaroa Reclaimed Water Treatment & Reuse Scheme.

The Friends of Banks Peninsula opposes the funding for the WW Akaroa Reclaimed Water Treatment & Reuse Scheme item 596.

The total budget projected for this project is \$93,524,000. We understand that \$13.9 million has already been spent. This makes a total project cost of \$107 million. The number of property connections that this project serves is fewer than 1000. The cost per property is therefore over \$100,000.

- This is one of the most expensive projects in the LTP for the smallest number of beneficiaries.
- The system as currently proposed will not achieve its objective of eliminating discharge of wastewater to Akaroa Harbour and will create additional risks to public health and adverse environmental effects in Akaroa and in Robinsons Bay
- It will make Akaroa less resilient to climate change.
- The plan to irrigate to native trees on steep, slip prone land, and with no capacity headroom, is high risk, and there is no fallback plan if any aspect of the project goes wrong or fails to perform as expected.
- Costs have escalated rapidly, and will continue to rise as design inadequacies are identified.
- The desired benefits of the scheme must be balanced with the costs and risks.

The Council lodged its resource consent application for this scheme with ECAN in June 2023. The application number is CRC235038.

On 8 April 2024 the Council received a report that it had commissioned from Beca Ltd re-evaluating the wastewater flow modelling underpinning the system sizing. We attach a copy of our response to this report and a presentation made to Cr Sam MacDonald and Cr Tyrone Field on Wednesday 17th April.

In summary, the Beca report has determined the following matters;

1. That the scheme applied for has been designed based on incorrect assumptions about the total wastewater flows. It is too small to cope with all of Akaroa's wastewater at times when the leaking pipe network is subject to high levels of stormwater infiltration.
2. This undersizing means the new system will overflow both raw and treated sewage into Akaroa during times of heavy rain or prolonged wet weather.
3. These overflows are anticipated to occur with a frequency greater than 1 in 5 years for raw wastewater and greater than 1 in 3 years for treated wastewater, based upon previous weather patterns over many years and excluding emergency overflows due to extreme unforeseeable events.

Based on other information we have obtained including the Council's response to ECAN's Request for Further Information, LGOIMA requests, the metered wastewater flow data and our local knowledge of the area we identify the following:

4. The raw and treated overflows will occur at the Terminal Pump Station to be located in the current Boat Store area beside the Akaroa Freedom Camping area.

5. Both raw and treated sewage will overflow into the tidal mouth of the Grehan Stream which runs between the Boat storage area and the Skatepark and from there to the shallow mudflats of Childrens Bay.
6. The area is susceptible to flooding. The sewage overflows are most likely during times of heavy rain and if they occur on an incoming tide or during storm surges, may mix with flood waters, inundating the Recreation Ground and associated recreational areas.
7. The volumes of these overflows could amount to 1000's of cubic meters, and in the case of the treated wastewater overflows could last for months when the irrigation field is too wet to take up the water.
8. The proposed system will not achieve the cultural objectives of eliminating wastewater from Akaroa Harbour and if it proceeds as planned will have impact on both public health and the environment of the Akaroa township itself.
9. The Council now needs to seek the views the community about what is an acceptable level of overflow risk, if any.
10. Simply increasing the capacity of the system is not a straightforward matter. It will require either a much larger pump or raw sewage buffer storage at the Terminal Pump Station and many more storage tanks in Robinsons Bay – likely to trigger the need for additional land acquisition. This will all add to the already extremely high costs.
11. There are additional risks with the irrigation fields, where steep land prone to slips and winter saturation has been earmarked for year-round irrigation, and without sufficient geotechnical analysis.
12. The Council has identified to Friends of Banks Peninsula that at least 70% of water passing through the wastewater system during wet weather conditions is still infiltration. This is after the Council has completed its pipe improvement work in 2021 and 2022. It now has no plans or budget for further reduction work. This infiltration is the cause of all the capacity issues with the proposed system.
13. Failing to reduce the infiltration contradicts the recommendation made in 2020 by Councillors, when they resolved to proceed with the Inner Harbour system, that infiltration levels be brought down to 20%. It also fails to meet the conditions of consent CRC204086 extending the current harbour outfall until May 2030. No reason has been given as to why Council is not working to further reduce the infiltration.
14. Operating costs for this complex new system have not been broken out in the LTP or made public, but will be substantially more than the current gravity fed system with its simple harbour outfall. Wastewater will be pumped for kilometres to an elevation of 300m, and the irrigation fields and storage systems will need constant monitoring and management.

We therefore request that:

15. The Council withdraws its consent application CRC235038 and removes all funding for the WW Akaroa Reclaimed Water Treatment & Reuse Scheme item 596.
16. Funding is instead allocated to fixing or replacing the leaking pipe network in Akaroa to reduce the level of infiltration to less than 20% in accordance with Council's 2020 recommendation. Less than 20% must be clearly defined as meaning less than 20% in extreme wet weather events or daily, not annual average or monthly averages that mask the susceptibility of the network to infiltration and overflows. Improving the pipe network to this level will help the Council achieve its climate resilience goals by substantially reducing the risk of network overflows during the more frequent extreme storms anticipated due to climate change. It is also likely to improve water quality at the town's beaches by preventing untreated sewage leaching into groundwater.

17. After the pipe network has been fixed and the infiltration levels established through measurement, including during prolonged wet winter weather, a new treatment plant and treated wastewater disposal system are designed based on measured flow data.
18. Should the Council find valid reasons why the badly leaking pipe network cannot be improved to this level, then this needs to be clearly communicated to the public. The Council would then need to develop and consult on a plan setting out the Average Recurrence Interval for each type of overflow and providing an acceptable solution for managing such foreseeable overflows.

The Council is planning substantial rate rises, new fees and cuts to services. We submit that this is the time for prudence with its largest projects, and that it is not appropriate to proceed with the extremely expensive Akaroa Reclaimed Water Treatment & Reuse Scheme which will not achieve its stated objective, carries an increased risk of sewage overflows, compromises climate resilience, and already faces further cost escalation. A fundamental principle in the construction of any new infrastructure should be that it is more resilient, not less, to the climate change future we face.

3738 - Finn Jackson

The proposed approach to wastewater infrastructure is reactive rather than proactive, and will hold the growth of our city back. Plugging leaks after they occur rather than replacing old pipes beforehand will result in additional costs, disruption to residents and reputational damage to the Council. It will slow the development of urgently needed new housing.

>>>

*[Three Waters > Water Supply (Capital)], [Three Waters > Stormwater & Land Drainage (Capital)],
[Transport > Other]*

As previously mentioned, I would like to see spending prioritised on sustainable transport options and water infrastructure. The proposed LTP does not do this.

3872 - Richard Smith

Regarding the CCC consent applying to move the Akaroa wastewater treatment plant to the to of Old Coach Road and to irrigate treated wastewater to land in the Inner Akaroa Harbour, I request that the Council withdraw its consent application or put it on hold and direct the funding into fixing the leaking pipe network in Akaroa before proceeding further. Fixing the pipe network will make Akaroa much more resilient in future, and stop untreated sewage leaching from these pipes onto our beaches affecting water quality in summer - quite apart from actual overflows in wet weather. I request to be heard on this point please at any hearing.

My submission refers to the projects

596 WW Akaroa Reclaimed Water Treatment & Reuse Scheme

2214 WW Duvauchelle Treatment and Disposal Renewal

I do not support the funding allocated in the Long Term Plan draft to either of these projects, both of which aim to irrigate treated wastewater to land rather than dispose of it to Akaroa Harbour.

The Council has spent many years and large sums trying to find a solution to the disposing of the wastewater from the Akaroa and Duvauchelle communities to land. Despite this, workable solutions have yet to be found. The capital costs of the flawed solutions currently proposed are already astronomical, with \$93.5 million allocated to the Akaroa scheme and \$18 million for Duvauchelle

It has now been disclosed in an update report from Beca Ltd that the Akaroa scheme set out in the Consent application has been based on incorrect flow data and is undersized. The scheme components already consented in 2015 are also undersized as data from a faulty flow meter was used in their design. Additional land has already had to be purchased near the proposed new treatment plant site, to house a raw wastewater buffer storage tank for times when the plant cannot cope. Now it appears the proposed tank is too small, as Beca report that the Council is considering treatment *bypass* at times of heavy flows.

The Duvauchelle scheme was promoted to the public as a re-use scheme where highly treated wastewater would be used to irrigate the golf course. However, the Council has recently informed the Community Board that the risks associated with irrigating the wastewater onto the golf course would result in operating conditions too difficult and expensive to manage, and further that it now seeks to decommission the Duvauchelle treatment plant and instead pump the raw wastewater to Akaroa and store the treated wastewater at Robinsons Bay. It is therefore unlikely that either of these schemes could proceed without further land acquisition, adding to the capital cost and taking years.

Other submissions will have covered the risks, environmental effects, risks to public health and lack of climate resilience inherent in the flawed Akaroa (and by implication if it is combined, Duvauchelle) scheme.

I submit that in addition to these issues the Council needs to give careful scrutiny to the **operating** costs of the complex new wastewater systems proposed as they are likely to be much higher than the current operating costs and therefore have a direct impact on annual rates.

The current systems are simple – largely gravity fed, with treated wastewater flowing out to the harbour. The proposed systems for which capital (albeit insufficient) has been allocated in the LTP would be much more expensive to operate, but these additional operating costs have not been set out in the LTP, have not been disclosed to the public, and do not appear to have been examined by Councillors trying to keep rate increases in check. The additional expenses would come from the costs of pumping huge quantities of water up steep hills, and from the expert staff that would be needed to manage the irrigation. To avoid risks such as ponding, run-off and nutrient pollution of streams, staff will need to keep a close eye on the irrigation over large areas of ground on a daily basis, shifting it around from block to block to ensure no area gets overwatered, and to match to weather and ground conditions. At the same time huge lengths of pipes and drippers underneath a

dense canopy of kanuka will need to be checked and maintained to ensure drippers have not become blocked. Pest and weed control will need to be regularly carried out on the land.

It has become apparent over the past few years that the Three Waters branch operating the current Akaroa water and wastewater systems is under-resourced and struggling to manage the relatively simple systems in place now. Hence major issues have occurred, which have in turn triggered yet more unforeseen expense. Failing to test flow meters to ensure they are working, even at a time when a new wastewater system has been being designed, has meant that since 2015 the Council has put forward five different wastewater schemes for Akaroa all of which have been undersized, and masked the extent of infiltration into the wastewater network. It has only recently been discovered that the drinking water plant has been operating outside of its design parameters for years, contributing to excessive amounts of retentate to the wastewater stream – a problem to which a solution has not been found. The most recent report from Beca Ltd includes the shocking information that 78% of the water flowing into the Aylmers reservoir was overflowing out again, and this at a time when potable water is being trucked to Duvauchelle at vast cost because its new water supply has failed.

How, therefore, does the Council anticipate that it could possibly afford to resource and operate the much more complex land-based wastewater irrigation schemes, even presuming workable solutions can be found through much further capital expense?

I submit that the Council has now investigated alternatives to harbour disposal to the fullest extent possible, and as it has not been able to find workable or affordable solutions to either, it should now revert to its 2015 position that land based disposal is not possible on the steep, slip prone Peninsula terrain and apply for a continued discharge to the harbour instead. The **capital and operating costs** of land irrigation are absolutely beyond what the Council can afford and continuing to pursue the land based disposal of wastewater places an unacceptable burden on ratepayers. The LTP funding for items 596 and 2214 should be withdrawn, and work to further land irrigation cease. Implementing simpler and cheaper harbour outfall solutions would enable the Council to repurpose funds into dealing with the pressing issues of repairing the sewage network to prevent leaching to beaches and waterways, to ensuring the treatment is of the highest possible standard and to find ways to genuinely re-use wastewater where it is most needed – alleviating summer water shortages and water restrictions.

Other

1232 - Heather Young

[Transport > Roads (Capital)]

If the Council attended to the coastal areas in the eastern zones earlier and did wastewater and water road repairs properly the first time you wouldn't have had to spend so much in the long term (my road has been dug up and patched up 10 times and I have logged 2 wastewater and sewage tickets with CCC and not had a reply to either)

2012 - Nick Boyd

No one on banks peninsula or other areas within Christchurch should be using septic tanks nowadays

2097 - Marie Haley

However, the state of Akaroa wastewater and storm water pipes is causing huge issues for the health and swim-ability of the harbour. I would like to take my child swimming in the Akaroa harbour without the fear of becoming sick and harming. It is vital that rural Banks Peninsula children have the opportunity to learn to swim safely in the ocean, which we are surrounded by, and be safe in water.

[Recreation, Sports & Events > Rec & Sport (Operations)]

There are NO accessible swimming lessons for preschoolers, other than 2 weeks in the summer holidays run by the excellent Swimming Club. I would like to see CCC take this issue seriously and prioritise the safety of rural children, with water safety, learn to swim and access to safe swimming places in the Akaroa harbour, to do this we need access to swimming lessons like city children have, and also to fix the wastewater and stormwater pipes in the township of Akaroa as a priority prior to moving the water treatment plant and discharge to Robinsons Bay. This must be a priority for the mauri of the harbour and the wellbeing of precious lives.

>>>

Akaroa stormwater and wastewater pipes need to be prioritised over the wastewater treatment upgrade. By moving the Akaroa treatment plan and discharge it will NOT fix the problem of inflow into the system from old and broken pipes. I want to swim in the harbour again and I want my child to swim in the harbour again, I want the mauri of Akaroa harbour to be improved.

>>>

Akaroa wastewater pipes need to be fixed.

>>>

Akaroa wastewater pipes need to be fixed.

2121 - Cassie Welch (National Public Health Service (NPHS) Te Waipounamu)

16. NPHS Te Waipounamu also recommends CCC prioritise wastewater infrastructure renewal and maintenance in Whakaraupō Lyttelton Harbour, Koukourarata Port Levy and Whakaroa Akaroa communities. As you will be aware, wastewater infrastructure around these areas is at risk from sea level rise and soil erosion, potentially leading to wastewater contamination of freshwater and marine-water sites. Equally, in and around the Lyttelton Bays/Whakaraupō and Akaroa/Whakaroa, recent faecal source tracking of microbiological specimens from the water detected human markers¹¹. Wastewater contamination can result in significant health risks to the population that engage in recreational water activities. It can also cause damage to the environment, affecting mahinga kai and the cultural health and wellbeing of manawhenua.

[Coder Note: Full attachment available]

2256 - Peter Scott (Environment Canterbury)

We ask Council to consider providing wastewater reticulation to additional settlements to reduce current water quality impacts from on-site wastewater systems. We recommend consideration of reticulated wastewater services to the Little River and Birdlings Flat communities and extending the sewer line from Diamond Harbour to cover the Purau community.

2261 - Tony Hampton (Health New Zealand Te Whatu Ora – Waitaha | Canterbury)

<p>Wastewater collection, treatment, and disposal: Council operates wastewater services in a responsive manner Ref. Page 88</p>	<p>We note CCC is proposing a service level target change for the median time taken to resolve wastewater overflows resulting from network faults from ≤ 24 hours to ≤ 12 hours – acknowledging overflow as a serious public health issue.</p> <p>Health NZ has previously commented on the importance of wastewater collection, treatment and disposal and the health impacts of wastewater overflows. Health NZ’s public health team may wish to support this change in service level and request CCC engagement.</p>
--	---

2281 - Wendy Bradley

I would like to make a submission against the Akaroa wastewater system, which is ill conceived, ill planned and preposterously expensive.

I attended the meeting a few years ago in the Gaiety Hall in Akaroa where I heard some very intelligent, competent speakers. None of them were in the council.

The council had obviously decided what they were going to do and it was just a legal requirement to hold the meeting.

I was frankly appalled and disenchanted with the whole process. It is difficult to fathom how you have wasted so much of our money already.

I would like to be given the opportunity to speak at the meeting.

I look forward to your response.

2297 - Andrew Walker

Comments: Good to see 3 waters and especially wastewater at the top. More focus on this please. It still stinks semi-regularly, it's running over capacity, where the old setup was at 60%. If necessary stop building new housing until it's done. Much more load can not be good for it, or us.

2558 - Mike Norris (Akaroa Civic Trust)

Capital programme – investment in Three Waters, Akaroa Wastewater An environmentally safe and sustainable wastewater system is important for the well-being of Akaroa and its waterways and coastal areas. The Council consulted the community about treated wastewater options for Akaroa in 2020. The Council resolved to proceed with the Inner Bays Irrigation Scheme and a resource consent application has now been lodged. Information presented to the public in 2020 stated that this option would achieve the goal of avoiding the discharge of treated wastewater to the Harbour and that discharge via a wetland to Childrens Bay in the event of a period of extreme wet weather would be expected only once every five years on average. Latest information now suggests that large volumes of treated wastewater would ‘overflow’ as frequently as 11-21 times over 50 years. The Council’s application as lodged does not anticipate any overflows and does not provide any description of where they would be directed or how they would be managed. In addition overflows of untreated sewerage more than once every five years are now anticipated and increased storage for raw sewage will be needed. The Trust’s view is that the Council does not have a mandate from the community regarding a tolerable level of wastewater overflows, if any, and consultation regarding this is required. The budget for the new wastewater scheme is now \$94 million, with an additional \$13 million already spent. Council now needs to demonstrate that this very substantial expenditure will achieve the aim

of keeping wastewater out of the harbour and that its proposed system is sustainable and resilient to the effects of increasingly severe weather events. The reason for the very high volume of wastewater in Akaroa and the resulting storage and irrigation capacity issues is the high level of infiltration of groundwater and stormwater into the town's sewer pipe network, due to the deteriorating condition of the pipes. These leaking pipes are also implicated in the poor and often unsafe water quality at Akaroa's beaches. In 2020 the community overwhelmingly asked that these pipes be repaired to the fullest extent possible and the Council resolution (CNCL/2020/00176) recommended that Infiltration was reduced to less than 20%. This recommendation has not been followed through. It is now clear that a viable and resilient land disposal system is only possible if infiltration is substantially reduced.

The Akaroa Civic Trust requests that part of the budget for the Akaroa Wastewater project is redirected to a comprehensive repair or replacement of the sewer network and that the Council's resource consent application is put on hold until this has been achieved to the fullest extent possible. This will then enable a wastewater treatment system that is cost-effective, environmentally sustainable and resilient well into the future.

2705 - Ian Le Page

With \$20,000,000 spent to date on the Akaroa waste water scheme to date with nothing to show, other than a flawed report from consultants as to discharge volumes, when Council did not listen to submissions show how little expertise staff and Council have as to expenditure.

2761 - Annette and Michael Hamblett

A smaller level suggestion. How about encouraging new builds, and others, to put in composting toilets where possible. We flush our toilets with potable water, yet moving away from this or reducing it doesn't seem to get attention.

2782 - Pam Richardson

Re Proposed Akaroa Waste Water System and I&I

The discussions and debate have become difficult, complicated, and confusing.

I would suggest the general community is not sure what to believe and where to find good information as to a reasonable way forward. There seem to have been so many reports of underestimating the infiltration and amount of storage required etc.

The proposed new sewer collection system and the present system continue to be a challenge to all parties with no easy solution.

We need a clear way forward.

The priority - direct the funding to improve the inflow of storm water entering the sewer collection through direct /indirect connections to the treatment plant causing an inefficient system. What needs to be designed to prevent this or is this what is going to happen.

I am aware that there has been work undertaken to improve the situation but there is still an issue with considerable infiltration. This needs all members of the community, all properties and the community working to resolve the issues - it is a community issue. I would recommend that 'a specialist' group work with the Akaroa Community, with every household to find the inflows entering the system.

Further work needs to identify where the other infiltration is coming from and finding a solution. I am not aware of any information being directly sent to households or anyone talking about visits they have had to improve the situation. Face to face meetings should occur and any work being required needs to be followed up.

An urgent solution is required and maybe a 'rethink on the sewer system being proposed'. We need to see a resolution; a suitable outcome is well overdue.

2810 - Kari Hunter

[Planning & Strategic Transport, Urban Design, & Urban Regeneration > Coastal Hazards Adaptation & Adaptation Planning]

Begin investigating possibilities for new systems for the future City's human waste.

People in a city need sanitation as one of the most fundamental needs. Our current waste-water system will become vulnerable to sea-level rise and storm surges. Begin with:

- Research to find a range of possibilities that may be suitable for our geography.
- Include among the possibilities household and community-scale composting (Amongst other sources, check out the Humanure Handbook, Joseph Jenkins)
- Develop and trial pilots

We need to have a new system in place before the old one gets swamped. This is one of the biggest challenges ahead for the city. It will take time to investigate options, choose wisely, and implement a new system. We don't know exactly how soon that will happen. We need you to begin now. The sea-level rise predictions that the Council has been guided by are several years old, and optimistic even then. Since then, new information suggests that it could go faster. (For instance, recent studies suggest that climate may be more sensitive to increases in GHG than previously estimated.) I have been hearing from climate scientists, including one's who have contributed to IPCC reports, that the range of reasonably possible global sea-level rise by 2100 could go up as high as 2–3 m. I think our wastewater system will be at risk before it gets that high. If you buy insurance for a house or car, you understand the value of preparing for less likely but worse possibilities, even when you hope for the best.

2886 - David Fleming

Akaroa Waste Water Proposal I ask for the Council to withdraw its consent application or put it on hold and direct the funding into fixing the leaking pipe network in Akaroa before proceeding further. It is vital that the pipe network is fixed as it is not acceptable to have raw sewage leaching onto beaches.

2941 - Peter Thelning

The Akaroa wastewater new treatment and land based disposal system is a future costly disaster,I say this as a local retired certified drainlayer with over 40 years experience in the area. The only viable option is better treatment with ocean outfall.

>>>

when a works programme blows out to 100s of millions like the Akaroa wastewater system,it is time the council show leadership and cancel it.

2989 - Lee Robinson

[Spending > Our Capital Programme (General), Grants and Funding > Events Ecosystems Funding, Grants and Funding > Arts Centre funding]

No, there is too much capital expenditure of a wasteful nature (e.g Akaroa wastewater as one example) and not enough focus on funding that has an investment return to our city, - Events, Arts Centre as but two examples.

>>>

See above. The Akaroa wastewater system has been on the table for 10 years, various groups have been advocating for a review of the proposal and saying it is not only unaffordable but does not achieve its purpose, only for this to fall on deaf ears with Council staff. Now 10 years later BECA have provided an independent report that vindicates the community's concern. The proposal should be put on hold and completely reviewed with a focus on alternatives which would be far more effective and less costly.

2992 - Marian Robinson

Please focus on our concerns around the wastewater spending for Akaroa.

>>>

Yes, refer to comments regarding Akaroa wastewater project

>>>

The Akaroa wastewater project as an example; a complete re-think of this project needs to happen.

3005 - Grant deVine

regarding the Akaroa Wastewater system. I have read all the documentation presented to date and find that when a Consulting Engineering Company like BECA find many many faults with the application and design there needs to be a lot more consultation. On top of that the submissions from Friends of Banks Peninsula make a lot of distressing points with the failures of the same Application. To my mind Council (and ECAN), have, once again, shown their total arrogance and neglect of the Rates payers intelligence and caring of the environment.

3180 - Craig Church

Akaroa Reclaimed Water Treatment & Reuse Scheme - LTP 2024-34 line item 596 I ask CCC to halt the planned wastewater scheme in Akaroa until better options are provided to the community. The massive budget blow out and poorly designed scheme that will still release sewerage into the harbour is not sensible. Fix the broken pipe network first, and then design a scheme to process the actual wastewater, not huge amounts of storm water. Planned irrigation rates to land in Robinsons Bay have increased in quantity despite geotechnical reports waring against overwatering. The increase in extreme weather events has not been factored into figures despite there being so much more knowledge about the effects of climate change and the need for resilience with large infrastructure projects. CCC did not publically notify this consent application when they could have, instead handing that decision over to ECAN. It seems to be a deliberate attempt to keep the community from inputting into this process when local residents have inputted many sensible ideas into the proposal over the last eight years. Local knowledge is invaluable, and there are now no CCC staff from the original team working on this project. Many different consultants are being used who seem to have no idea of the history behind it all. The number of major mistakes in the resource consent application shows that staff have no depth of understand surrounding the intricacies of the scheme. I request that CCC withdraw their resource consent application as the \$100,000 needed for each connection is certainly not good value for the ratepayer dollar considering the many issues that have not been addressed.

3248 - Dave Edwards

[Three Waters>Stormwater & Land Drainage (Capital)]; [Resource Recovery>Resource Revocery (Capital)]

Grey water systems and tanks for stormwater. Use for garden and perhaps firefighting

3250 - Hannah Murdoch

Keep my toilet flushing, although try reduce the emissions coming from the process.

3371 - Malcolm Frost

I incline to the view that council is taking some significant risks with both 'nice to have' facilities & some of the more core infrastructure. E.g., it will be interesting to see if the Akaroa Wastewater scheme can be delivered remotely within budget. The history of some of these projects from around New Zealand suggests that costs tend to 'blow-out' - especially in challenging topography. So this leads to the question - is the Council perhaps trying to do too much via ratepayer leverage?

>>>

As indicated previously, I believe caution does need to be exercised over such things as wastewater projects because of the risk of unexpected technical challenges & associated cost blow-outs. With this type of work I believe a 'relatively pessimistic' approach to budget needs to be taken which infers substantial 'contingency funding'.

3626 - Connie Christensen

Sort wastewater management

3732 - Harry Stronach (Akaroa Ratepayers & Residents Assn Inc)

Akaroa Wastewater Project

In the LTP documents the line item on Page 203 is stated as “Akaroa Reclaimed Water Treatment and Reuse Scheme”, with a tag of \$94m for future expenditure. Of course pretensions about reclaiming and reusing were dropped from the project long ago. We suggest that this item should be more correctly labelled as “Akaroa Wastewater Wasted”.

Given the expenditure to date, the total project cost is actually heading more towards \$110m. This is a staggering amount of money, representing around \$100k per connected property. It is ridiculous, and it is not what the people of Akaroa want.

We could spend a lot of time talking about this subject, but other parties have done detailed analysis and you already have their submissions, and you can even read about this debacle in the newspaper.

As we see it there are currently two choices:

1. Admit now that this project is fundamentally flawed, and heading for a disastrous outcome. Insufficient capacity, poorly thought-out technical details, inevitable harbour discharges, and cost blow-outs.
2. Spend more money over the next few years, and then admit in a few years' time that the project is a flop, and that it will never get to a satisfactory conclusion.

The expenditure to date of millions of dollars has simply proven that there is no cost effective solution

to the idea of land disposal of treated wastewater. Meanwhile, summer water shortages in Akaroa continue, and these will obviously get worse as global warming bites harder and the population increases.

But there is an obvious answer. Treat the wastewater to a standard where it can in the future be injected back into the aquifers to the east of the town. Have an alternative harbour discharge point down-harbour that can release treated wastewater on the outgoing tide, the dilution rates due to tidal flushing in the harbour are enormous.

This is the only sensible long-term solution to the current debacle. It will receive firm support from a very large majority of the ratepayers and residents in our area.

3747 - Nick Meeten

[Strategic Direction > Additional savings and efficiencies]

Assess the business case for selling 'heating/cooling as a service' by recycling heating/cooling energy from wastewater.

>>>

3-Waters infrastructure investment should also incorporate energy planning (wastewater flows are a massive thermal energy source at the new Metro Sports facility is demonstrating. There is potential to replicate this concept in other parts of Christchurch too).

3913 - Mark Darbyshire

No. Increasing investment in water infrastructure is too far out in the draft LTP. Given the government's repeal of the Water Services Entities Act, it is essential that a significant ramping up in investment by council begins during the current electoral cycle. Our water infrastructure is a ticking time bomb that can't be pushed onto future generations. If significant increases in investment are only budgeted for future electoral cycles, the risk is that they won't happen. Too much investment in public and active transport has been deferred or cancelled.

Not Stated

1067 - Iarene Jelley

Water is a most important asset, more valuable than gold, and on follows waste and storm waters.

179 - Bridgette Smith

Prioritise water infrastructure

1827 - John Rice

Why is 3 waters costing so much? Surely Labours 3 Waters plan was better than rate payers having to bear this enormous cost?

>>>

Spread the 3 waters expenditure out over a longer period.

2057 - Alicia Moggre

Water infrastructure spending >>> needs to be prioritised above almost all else. I don't have the expertise to judge if this is what the above numbers relate to.

2060 - Liv van Workum

Managing our storm water drains and waste systems is essential to the health and longevity of this city, as is drinking water which I remember a time when we were known for having the best. It's been disappointing to hear of the nitrogen levels showing up in recent tests. Climate change is upon us and we must prepare.

2143 - Vicky Anderson

Please ensure infrastructure is paramount - waste water and sewage proper treatment to prevent pollution doesn't enter the ocean; >>> sewage infrastructure.

282 - Michael Heenan

[Three Waters > Water Supply], [Transport > Roads]

I think the capital costs of upgrading and repairing roads & pipes etc is understated. The ongoing work from rebuilding pipes networks also damages road & some areas where this has been done the roads are left in a shocking state.

312 - Shane Binder

It is unfortunate that such a high percentage of capital spending has to go to Three Waters but I understand where the need has come from and the requirement to address now instead of continued deferral (or waiting for a realistic solution from Government).

315 - Sophia Pegg

We need to have absolute assurance in our water and sewage systems. The community in Bromley still wait to live in a place without smell.

334 - Clare Marshall

There is also supposed to be a long-term solution for the wastewater currently being pumped out to the ocean. Is this in your plan?

344 - Aaron Herriott

Bit confused as to why so much more is needed for three waters when we supposedly have upgraded all the pipes?

3471 - Murray Irvine

Water drinking and waste should always be first.

3621 - Morgane Honore

Wastewater Management: Upgrading and expanding wastewater treatment plants and sewerage networks are essential for safeguarding public health and the environment. Investing in wastewater infrastructure projects can help mitigate pollution, reduce the risk of sewage overflows, and ensure compliance with regulatory standards.

375 - Alex McNeill

These are all very important. Three Waters is immediately critical and requires lots of investment for future

3862 - Katharine Metherell

City is badly in need of water and waste network upgrades.

452 - Mark Penrice

[Spending>Te Kaha; Transport>Footpaths & Streetscapes (Capital)]

You should be cancelling white elephants like the stadium & spending on basics like footpaths and sewage treatment.

Water Supply (Capital)

General Comments

125 submissions were received addressing water supply (capital).

35 comments supported, and 9 comments opposed.

48 comments suggested what could be done differently, and 36 comments provided general feedback on water supply (capital).

Officer Response

Submitters raised a number of issues with regards to Water Supply:

- In particular, many were opposed to Chlorination, Fluoridation and Nitrates in our drinking water.
- There were some misunderstandings around why Council is involved in 3 Waters and the proposed change in levels of service for water leakage rates.
- A number also questioned whether the size and investment in the 3 Waters capital programme was sufficient.
- There were a couple of specific questions around what is planned for the Banks Peninsula water supply schemes, and also asking where further detail could be found on the renewals programme.

Chlorination:

Christchurch's source water continues to be of exceptional quality. We are hopeful that most of our 126 bores will be able to demonstrate that they meet the 'Class 1' definition in the new Drinking Water Quality Assurance Rules (similar to the 'secure' category that we met under the previous regime). 'Class 1' will give protozoa compliance for these sources. In the past we were able to demonstrate bacterial compliance through monitoring to show the absence of bacterial (E.Coli). The Drinking Water Quality Assurance Rules now require a treatment barrier such as Chlorination or UV is installed to be able to meet bacterial compliance requirements. In addition, the Water Services Act requires 'residual disinfection' within the distribution, and this is only possible if chlorination is installed. The 'temporary' chlorination units installed in 2018 are not able to meet the required rules and need to be replaced with permanent chlorination units.

Fluoridation:

Council has not yet been required to add fluoride into the water supply. It would be a requirement made by the Director General of Health as it is a public health matter rather than being about safe water. Because Christchurch currently has 44 treatment plants across the city adding fluoride would be a particularly complex and costly addition if required.

Nitrates:

Nitrate levels are monitored from approximately 40 bores across the city each month. Levels remain well below 0.5% of the Maximum Allowable Value in the Drinking Water Standards for NZ 2022 and show no indication of increasing.

Three Waters in the Council Long Term Plan are activities delivered by Council (Water Supply, Wastewater and Stormwater) on a day to day basis, are driven by regulatory and consent requirements and are part of Council's core business. This is different to the Three Waters Reform, which is a Central Government initiative to reorganise how Three Waters is delivered across New Zealand. The direction this is taking has altered following the change in Government.

Levels of service – drinking water losses:

Decreasing the water losses to 20% by 2030 and then 15% by 2034 is an increase in the level of service. Less water being lost between extraction from wells and delivery to customers translates to the network being in better condition with reduced leakage through broken or damaged pipes.

The three waters programme is sized to achieve regulatory and consent compliance, replacement of aging (leaking) assets and allow for population growth in the city. Replacement of the oldest and failing assets is also a priority.

The Wainui water scheme is programmed to be upgraded by December 2025. Also underway is a study being carried out on water supply for smaller settlements across Banks Peninsula.

All of the above points are covered under existing levels of service and budgets in the draft LTP.

Support

116 - Jarrod Coburn

[Resource Recovery > Resource Recovery (Capital)]

Good to see investment in three waters and solid waste.

1163 - Nichola Tyson

Addressing drinking water is a priority for me, it's a matter of health

1491 - Lindsay Richards (Westmorland Residents Association)

[Three Waters > Water Supply (Capital)]

[Three Waters>Waterways Quality & Compliance (Operations)]

Please make our water drinkable and our rivers and lakes swimmable.

1499 - Ben Davidson

[Three Waters > Water Supply (Capital)]

[Three Waters > Stormwater & Land drainage (Capital)]

[Strategic Direction> Have we got the balance right?]

I agree that investing in infrastructure for water security and reducing the impacts of flooding etc should be a priority.

179 - Bridgette Smith

Prioritise water infrastructure

2024 - Janet Reeves

[Three Waters>Taumata Arowai Requirements]

I wish to support the funding allocated for improvements to the Birdlings Flat water supply. Our community is very keen to see the chlorine removed from our water supply and understand that these improvements are needed first. Plus we wish to continue to have a secure and safe water supply for our expanding community. I wish to support the funding for Banks Peninsula Communal Fire Water Storage particularly in Birdlings Flat. Fire is a real danger and concern to Birdlings Flat residents. We have been promised communal water tanks for several years now. Following a submission to the Annual Plan last year funding was included in the budget for Birdlings Flat and we were told that the Birdlings flat work would be carried out first.

2087 - Emma Norrish (Waipapa Papanui-Innes-Central Community Board)

The Board is particularly supportive of the considerable proposed investment in the Three Waters, emphasising that we must continue to upgrade our infrastructure as there would be unacceptable consequences of failing to do so. We need to do this for current residents and visitors, as well as for those in generations to come. This prioritisation is further justified by drinking water, and stormwater and drainage, coming through prominently in the early engagement on 'what matters most' for the Papanui-Innes-Central wards – drinking water coming just above climate change as the top priority for the Board area as a whole.

2121 - Cassie Welch (National Public Health Service (NPHS) Te Waipounamu)

13. NPHS Te Waipounamu supports CCC's proposed investment into drinking water, stormwater, and wastewater infrastructure. NPHS Te Waipounamu notes the importance of maintaining and renewing critical water infrastructure for the protection of community and environmental health and wellbeing.

[Coder Note: Full attachment available]

2264 - Sarah Scollard

[Grants & Funding > Orana Park], [Recreation, Sports & Events > Community Arts], [Parks > Playgrounds & Play Equipment]

We need to spend less on 'The Arts' and more on maintaining the good things we already have such as Orana Park, outdoor play areas and water quality.

2797 - Dave Kelly (Beckenham Neighbourhood Association)

[Three Waters > Waste water (capital)]

The LTP proposes to spend about \$100M a year in the first few years on water supply, and \$150M a year on wastewater (both rising in later years). The recent water main renewal through Beckenham was an example of fixing underground infrastructure before it breaks. Recent problems in Wellington City show what happens if this is deferred. The BNA supports the proposed water and wastewater programme in the LTP as a prudent and well-planned programme of renewal.

[Full attachment available]

2799 - Dot Lovell-Smith

I fully support the programme to give the city clean accessible drinking water

2831 - Sebastian Denize

[Transport > Road (Capital)], [Strategic Priorities > Climate], [Three Waters > Water Supply (Capital)]

We should also focus on improving our vital infrastructure, like our water and waste network. Sadly this is in woefully poor condition, due to both the earthquakes and the lack of investment prior. Its terrible that we are spending so much money on a stadium and not first prioritising our water and waste networks.

286 - Pauline Reid

Any money spent on water, infrastructure, and coastal erosion is money well spent.

2861 - Laila Jansone

[Grants and Funding > Strengthening Communities Fund, Transport > Roads (capital)]

support Strengthening communities funding and capital expense in water and road infrastructure.

3012 - George Laxton

Investing in water infrastructure is very important unsexy job that does not inspire people to vote but is critically important and I hope that as a council you realise this. I am very happy to see there is lots of money been put towards this, but as a lay person I don't know if this is going to be enough to catch up/keep up with the water pipe renewals, I would like our city to be getting better and if this is a plan to get to a point where leaks are in the single digits or even below 5% then awesome, otherwise more is needed to be invested, this is critical infrastructure.

Investing in/encouraging rain gardens/rain barrels for residents would be a good investment.

Also need to continue to keep the excess water charge, we are on a shared property, but we still are conscious of our water usage and we have a rain barrel which we use on our garden to keep water usage down.

3017 - Heather Venis

Value our water>>> [Parks > Parks Maintenance]

3018 - Kristal Jenkins

Important to have safe drinking water that minimizes cancers and sickness to humans

3035 - Claire Coveney

Our water is our taonga.

Water, (considering drought, flooding, sewerage. Healthy rivers, wetlands, estuaries) . Latter may be ECans brief.

3055 - Josephine Drysdall

Our water networks are an urgent priority; however, they are in a state exacerbated by the earthquakes but by no means caused by them. In the east, I can seldom go for a walk without encountering a new leak. The root cause is that our water network has been undermaintained and has reached the limits of what poor decision-making can get away with.

312 - Shane Binder

It is unfortunate that such a high percentage of capital spending has to go to Three Waters but I understand where the need has come from and the requirement to address now instead of continued deferral (or waiting for a realistic solution from Government).

3142 - Ruth Jardine

Our water is the best in the world.

3144 - Elizabeth Hofman

Happy to see that water management is being heavily invested in.

3166 - Arwen Sommer

[Spending > Capital Programme (General)], [Three Waters > Waste Water (Capital)], [Transport > Public transport Infrastructure (Capital)], [Resource Recovery > Resource Recovery (Capital)]

Drinking, Storm, and Waste water, sustainable public transport, and Waste and Recycling services all need significant attention and innovation if they are going to be future proofed. The city council need to get the basics right and do them well before embarking on big projects.

3341 - Maria Bartlett

[Transport > Roads (Capital)], [Spending > Te Kaha]

I'm pleased to see the emphasis on drinking water, wastewater and stormwater,

3381 - Karen Amyes

[Resource Recovery > Resource Recovery (Capital)], [Three Waters > Stormwater & Land Drainage (Capital)], [Transport > Roads (Capital)]

Essential services such as water, rubbish, remediating flooding and roading should be prioritised.

3507 - Gary Barber

[Transport>Roads (Capital)]; [Transport>Transport (Operations)]; [Three Waters>Waste Water (Capital)]; [Three Waters>Stormwater & Land Drainage (Capital)]; [Strategic Direction>Have we got the balance right?]

Infrastructure investment appears visually skewed to unnecessary road & transport changes but support water infrastructure upgrades.

3748 - Greta Bond (Age Concern Canterbury)

[Three Waters > Waste Water (Capital)], [Three Waters > Stormwater & land Drainage (Capital)]

We recognise the importance of the large spend on 3 waters infrastructure.

3809 - Johnathon Ridden

[Three Waters > Waste Water (Capital)], [Three Waters > Storm Water & Land Drainage (Capital)]

Water infrastructure is important, so support this as a primary capital expenditure option.

396 - Daniel Jackson

Thank you for prioritising three waters continuation. Our water management systems need some love.

416 - Mike Cleaver (Canterbury)

I agree we need to invest in our water systems as it is clear they are struggling.

423 - Linda MacIntyre

Please action these projects now, especially secure our safe drinking water and waterways.

505 - Laura Jones

Ageing infrastructure needs investment - clean water is a basic necessity

597 - Ashleigh Dickson

Clean drinking water is a basic human right. No access to clean water puts people on the poverty scale. Therefore three waters is the most important item to fund.

761 - Carol Groves

[Parks > Parks Maintenance]

Would love some access to fresh water here in Wainui and of course we would love someone to care for our tennis courts as they seem to be out of sight, out of mind. The tennis court is a CCC owned area.

785 - Ariana Tikao

[Three Waters>Waste Water (Capital); Strategic Direction> Climate Change]

I support the resourcing towards healthy clean water, and environmentally safe practices around wastewater management, and adequate resourcing being allocated for safeguarding future generations against the negative affects of Climate Change, and cutting down carbon emissions where we can.

Oppose

1191 - Ava Johnson

We shouldn't cut back on services already provided, so :I strongly disagree with the proposal to change the level of service for drinking water losses to 20% by 2030 and 15% by 2034

1474 - Céira Dernhagen

[Strategic Direction>Performance Framework]

We should not cut back on the level of services already provided. I strongly disagree with the proposal to change the level of service for drinking water losses to 20% by 2030 and 15% by 2034

1996 - Iain Nicholls

Overly ambitious, particularly with regard to water infrastructure

>>>

Too much emphasis on three waters.

2572 - Sarah Vili

>>> These figures are massively over inflated, 3 waters? What a joke, we already pay for water
[Transport > Public Transport Infrastructure (Capital)] [Parks > Playgrounds & Play Equipment]

3307 - Richard Griffiths

Our rivers and aquifers must be protected from farm runoff at farmers expense immediately. Adding chemicals to our water is unacceptable

3614 - Lin Roberts

Water is a valuable and critical resource and we have been underfunding research and management for several decades now. Given that the leakage rate from our water pipes is now apparently 27%, it is apparent that our underinvestment in maintenance and replacement is now coming back to bite us. Under the current plan, the proposal is to spend less (\$217m) on water supply in the next three years than was planned for the same years in the last Long Term Plan (\$221m) - and yet construction costs have increased by 27% during that time. Delaying this repair work is bad economics and wasting resources – costs will just increase the longer the work is postponed.

403 - Paul Davis

Certainly in the case have direct knowledge of - establishing a Port Levy water supply - the council is prioritising something that there is absolutely no demand in the community for.

>>>

It seems like a lot of money is being wasted on unnecessary water projects. Certainly in the case have direct knowledge of - establishing a Port Levy water supply - the council is prioritising something that there is absolutely no demand in the community for.

>>>

As I have said, the only issue which I have direct knowledge of indicates that a great deal of money is being spent whether the community wants it or not. Very discouraging.

601 - David Ralph

[Transport>Roads]

[Transport>Footpaths & Streetscape]

Better roads, pavements, water facilities and infrastructure so we can remove chlorine from water (as tastes rubbish, used to be one of best in world).

692 - Tony Ward

Too much is spent on drinking water.

Other

1129 - John Clemens

Under three waters, Council needs to make sure that costs associated with the fluoridation of drinking water are factored into account because the evidence is abundantly clear that fluoridation is good for the development and retention of healthy teeth, making it a Council responsibility to look after its public.

1229 - Cassandra Albert

Maintaining our current level of services is crucial. I respectfully oppose the suggestion to alter the drinking water loss targets to 20% by 2030 and 15% by 2034.

1312 - Andrea Bromley

What happened to all the money spend on upgrading our water and once upgraded, we were promised it would be restored back to its pre chlorine quality? Then big government did a u turn without reason and you added more?

1413 - Tania Brewer

Our water is an important resource we use to have the tastiest water in the country and now its one of the worst. We must protect our water.

1512 - Denis McMurtrie

Water next to the sun is our most important resource and its most important job like water in the body is to transport "stuff" and like the body drink waste and storm must be kept separate. Clear clean unpolluted water for domestic use is the most important. and a priority and certainly a council priority. Itwas always worth a skite about our clear clean Christchurch water under our feet! no costly transport as in other cities, a great advantage. We must keep it that way at all cost.t

1515 - Andrew Douglas-Clifford

We should put more effort into ensuring a safe and reliable water supply, and reducing leaks. This is a core council service and this needs to be prioritised.

1618 - Zachary Imhoof

[Fees and Charges > Car Parking (Parks)]

We should not cut back on the level of services already provided. I strongly disagree with the proposal to change the level of service for drinking water losses to 20% by 2030 and 15% by 2034.

1619 - David Hera

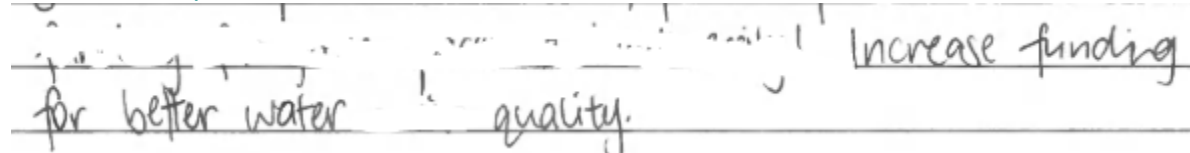

[Fees and Charges > Carp Parking (Parks)]

I strongly oppose the proposal to alter the service level for drinking water losses to 20% by 2030 and 15% by 2034.

1695 - Jordan Wyatt

I'd like to see more long term investment in water >>>[Transport > Cycleways (Capital)] [Other/Special Interest Topics > CCHL Matters]

1876 - Mika Clapson

Increase funding
for better water quality.

1969 - Christine Dann

1 Droughts and fire

1.1 Drought years are already part of the normal climate cycle for the east coast of the South Island, as the part of the normal El Niño–Southern Oscillation (ENSO) pattern of cooler/wetter and hotter/dryer weather conditions. As a result of global heating, ‘abnormal’ droughts are becoming more frequent and severe. This has implications for the delivery of safe fresh water to Christchurch City residents, with some aquifers already compromised by excessive draw-down of water to irrigate export agriculture farms.¹

Recommendation 1.1 That the CCC takes all immediate necessary steps to safeguard the provision of fresh water from city-adjacent aquifers to ensure a continuous supply of safe drinking and bathing water for residents now and in the future.

[Coder Note: Full attachment available]

2105 - Tawhai Darnielle Te Karu

[Spending>Capital Programme (General)]

we need to invest in marae, there is no running water in Tuahiwi.

214 - John Hinchey

[Grants & Funding > Events Ecosystem Funding], [Resource Recovery > Resource Recovery (Operations)], [Strategic Direction > Climate Change]

Reduce bid funding. We have more important areas to spend our ratepayer dollars on. Better solid waste processing away from Bromley: reducing the waste in our water supply through constant leaks: encouraging business to convert to electric vehicles to drive down city air pollution: etc.

2261 - Tony Hampton (Health New Zealand Te Whatu Ora – Waitaha | Canterbury)

<p>Water Supply: Council operates water supplies in a reliable manner Ref. Page 81 + 82</p>	<p>Health NZ Waitaha Canterbury notes that CCC appears to be anticipating an increased number of unplanned interruptions to water supply and a reduction in resident satisfaction with Council responsiveness to water supply problems.</p> <p>This is referenced in the service target moving ≥65% satisfaction to ≥60% satisfaction, due to CCC's anticipation that a reduction in the capital programme for renew aging infrastructure means maintenance will become stretched with more frequent bursts due to "sweating" assets.</p> <p>While Health NZ Waitaha Canterbury acknowledges the current financial pressures, a constant and safe water supply is critical for the delivery of health services, particularly across our hospital sites.</p>	<p>Recommend: hospital and health facilities are prioritised and those assets supplying them are categorised as critical assets in terms of renewal of ageing water infrastructure and responsiveness to water supply issues.</p>
--	---	--

>>>

<p>Water Supply: Council Water Supplies are safe to drink Ref. Page 80</p>	<p>We note that Health NZ has previously commented on the importance of drinking water standards and up to date water safety plans. Health NZ's public health team may wish to comment here and request your engagement.</p>
---	--

2269 - Lyn Leslie (Te Pātaka o Rākaihautū Banks Peninsula Community Board)

The Board would like Council to consider bringing forward Project 57808 Duvauchelle water supply membrane filtration to stop the carting of water which is an extra expense to the Council. However, the Board is concerned regarding the coastal inundation effect on significant infrastructure, and would like to see a project document developed and implemented that has considered the impact of coastal inundation on any Council proposed projects. The Board would like Council to consider bringing forward Project 57808 Duvauchelle water supply membrane filtration to stop the carting of water which is an extra expense to the Council.

2308 - Sarah Elicker

Three Waters: It appears the proposal is to spend less (\$217m) on water supply in the next three years than we had planned for the same years in the last Long Term Plan (\$221m) - and yet construction costs have increased by 27% during that time. Most of this spending is pushed out to later years, meantime pipes continue to deteriorate. Back in 2018 we had a leakage rate of 18% and a Level of Service target of getting it under 15%, but now we've got leakage at 27% and a proposed target under 20% by 2030 and under 15% by 2034, the end of the ten year plan. It's not yet clear how we will achieve these targets with the current resourcing. Please spend more on three waters, support the leakage targets and spend it earlier in the 10 years to prevent further deterioration.

2322 - Dillon Drummond

Cleaner drinking water

2344 - Sarah Elicker (Te Huarahi Linwood Avenue School)

Safer and resilient water supplies is crucial to wellbeing of our children.

2507 - Bronte Barber

- Christchurch used to be known for the best water - now it's disgusting to get tap water anywhere. It's embarrassing at restaurants - with our money, you should invest in businesses having filters if you're not changing the quality. Especially at CCC own facilities (Libraries, Te Pae, Te Kaha).

2540 - Jocelyn and Caroline Pappill and Syddall

We are in agreement with prioritising spending on three waters. We would like to add that CCC needs to get ahead of leaks – don't patch a small bit only to find later another leak further down the same pipe. Seek to assess a greater length of piping and replace a whole lot in one go.

2570 - Marie Gray

I am concerned that the Council is proposing to spend less on drinking water supply than for the next three years, compared to the previous LTP despite the fact that construction costs have increased significantly. We are spending that money in later years – another case of pushing the can down the road. We need to increase the investment to:

- Reduce leakage from drinking water pipes to under 15%
>>> [Three Water > Stormwater & Land Drainage (Capital)]

2615 - Virginia Wright

I would like to see more priority given to reducing water leakage - it should be below 10% if at all, and as soon as possible.

2627 - Sarah Butterfield

Water quality is an absolute priority. Contamination of water sources is not acceptable.

2796 - Annelies Pekelharing

[Three Waters > Waterways quality & compliance (operations)]

Water from aquifers safe to drink without additives, and rivers should be safe for swimming.

2828 - Thomas Kulpe

What additional activities are planned to achieve the water consumption per capita targets? The annual performance report states that last year's 261l/person fell well short of the target: "The excess water charges did result in an overall demand reduction per resident, but this was not sufficient to meet target". The proposed LTP has a target of ≤ 220 decreasing to ≤ 180 over time and states: "Due to there being limits to what can be expected by customer habit changes due to excess water charging, the 10 year target remains at ≤ 200 as there is insufficient OPEX funding to expand upon the Smartwater network within this LTP." The actual figures for last 3 years was over 300l/person. What happens if the targets are not achieved (or achievable)?

2846 - Olwyn Ferguson

I agree on the drinking water as we used to have nice drinking but now it dose not tast nice at all, but as for the other amounts i am sure that you can curb the spend on your other projects.

2902 - Prawindra Mukhia

There is a statement in the same page, "We are therefore proposing only minor changes to our levels of service. We're proposing to change the level of service for drinking water losses to 20% by 2030 and 15% by 2034". My question are - What is the rationale behind this? What are the current losses? What is the \$ value of the loss? What are the costs associated to decrease the losses to 20% and 15%?

2913 - Amanda Ovenden

The basics of human life is water .in Canterbury we rely too much on the aqua fills that flow under Christchurch, money needs to be spent on more reservoirs and water purification and treatment stations with the increasing population, We need to get the fundamentals of infrastructure right before we move on to pet projects.

2934 - [Monica Richards](#)

We need to secure our supply of water including drinking water.

2957 - [Lisa Keen](#)

Safe drinking water NEEDS to be properly sorted out!!

2997 - [Simon Trotter](#)

More work on saving water rather waste water in the Akaroa area.

3011 - [Annette Marchant](#)

Water reticulation needs fixing before it becomes a serious problem.

3322 - [Christine Nicoll](#)

Drinking wster must be clean and tested often for all.

3690 - [Jono de Wit \(Greater Ōtautahi\)](#)

We request funding for stormwater and water supply be increased in the first three years of the LTP. These two areas both have reduced funding in the first three years which we consider is not sufficient investment in this incredibly important infrastructure.

3717 - [Sam Hampton \(Te Pātaka o Rākaihautū Banks Peninsula Geopark Trust\)](#)

Potable water is critical for both local residents and visitors and should be a priority.

3738 - [Finn Jackson](#)

[Three Waters > Waste Water (Capital)], [Three Waters > Stormwater & Land Drainage (Capital)], [Transport > Other]

As previously mentioned, I would like to see spending prioritised on sustainable transport options and water infrastructure. The proposed LTP does not do this.

3764 - [Jack Gibbons](#)

[Three Waters > Stormwater & Land Drainage (Capital)]

Stormwater improvements in particular often spend millions to protect hundreds of millions of dollars worth of property, this is one of the council's most valuable programs. The city simply cannot exist without it and there needs to be expansion. I would like to see funding for stormwater and water supply be increased in the first 3 years of the LTP. It will be cheaper to spread these costs out over time and upgrade progressively. Rather than hoping the industry can suddenly expand many times over in 10 or 20 years.

3881 - Anne Scott

Work with ECAN on preserving clean, health drinking water for future generations.

3883 - Colin Meurk

we really need to get untreated water safe again.

3913 - Mark Darbyshire

No. Increasing investment in water infrastructure is too far out in the draft LTP. Given the government's repeal of the Water Services Entities Act, it is essential that a significant ramping up in investment by council begins during the current electoral cycle. Our water infrastructure is a ticking time bomb that can't be pushed onto future generations. If significant increases in investment are only budgeted for future electoral cycles, the risk is that they won't happen. Too much investment in public and active transport has been deferred or cancelled.

3991 - Marilyn Copland

Water is of prime importance. It was disappointing
to see the free supplies of beautiful spring water at
Burnside Park removed.

4033 - Juliana Venning

Getting more action around environmental matters: clean, potable water, drainage infrastructure fixed and maintained, environmental factors considered, including no longer using glyphosate would

be a promising start.

500 - Jan Gregor

[Parks > Foreshore], [Parks > Public Convenience]

Not from my perspective of a Wainui Banks Peninsula ratepayer. There are several projects the Council has been considering for Wainui, but none are mentioned in the LTP. There was no mention in any of the detailed capital expenditure documents about the Wainui slipway and breakwater repairs, nor the necessary drinking water treatment improvements to make the supply compliant with the protozoa requirements of the rules (mentioned in the Akaroa Mail late last year), nor the new public toilet block on Stanbury Reserve. So where will the funds come from for these significant expenditure projects, or do we assume they are not going ahead in the next 10 years?

64 - Lindy Drury

Sort out Akaroa's water problems with more urgency

670 - Sue Orpwood

I hope one day we can again be chlorine free in our drinking water.

748 - A Robinson

[Transport > Roads (Capital)], [Parks > Public Convenience], [Parks > Foreshore], [Parks > Parks Maintenance]

o Wainui doesn't have many of the services/infrastructure of a city, but we do expect the same standard as the city in the essential services we have such as safe drinking-water, well-maintained and safe rural roads, well-maintained and safe public facilities (eg, public toilets, wharf, boat slipway and breakwater, tennis courts), used by visitors (many from metropolitan Christchurch) and ourselves. We could not find mention in any of the detailed capital expenditure documents about the Wainui slipway and breakwater repairs, nor the necessary drinking water treatment improvements to make the supply compliant with protozoa requirements, nor the new public toilet block on Stanbury Reserve.

761 - Carol Groves

[Transport > Roads], [Parks > Public Convenience], [Parks > Wharves & Jetties]

In Wainui we want safe drinking-water, well-maintained and safe rural roads, well-maintained and safe public facilities: public toilets, wharf, boat slipway and breakwater, tennis courts. Public toilets in Wainui are a health hazard and disgrace. The changing sheds are dangerous and need to be removed.

885 - Denise Kidd

[Resource Recovery - Resource Recovery (Capital)]

Purau has limited but adequate rubbish removal, there should be no reduction to this service in next 10 years. Purau is not on CCC water supply. CCC should make available and promote portable water supplies to supplement Purau residents household water supply

Not Stated

1067 - Iarene Jelley

Water is a most important asset, more valuable than gold, and on follows waste and storm waters.

1274 - Phillip Bewick

[Transport > Roads (Capital)]

Focus on the pipes and roads that have been neglected year after year by every councilor and major, passing the buck for decades.

128 - Elizabeth Ackermann

Save our water.

1292 - Gemma Phillips

water is very important

1451 - Jodie Langston

Clean , nice tasting drinking water is vital for health

16 - Andrew McKay

Core infrastructure should always be the priority.

1654 - Jane Ross

We no longer have decent water,

1930 - Kate Yeoman

Wastewater & water management
are crucial issues.

1998 - Grace Robinson

[Three Waters > Water Supply, Stormwater & Land Drainage], [Fees & Charges > Building Consents],
[Other/Special Interest Topics > Social Housing], [Transport > Cycleways]

In addition to advocating for increased operational and capital spending to enhance services, including safety audits for buildings, water chlorination, and community housing provision, I urge the Council to prioritize essential projects such as major cycle routes and stormwater management initiatives. These projects are vital for the well-being and safety of our community and must receive adequate funding and priority.

2057 - Alicia Moggre

Water infrastructure spending >>> needs to be prioritised above almost all else. I don't have the expertise to judge if this is what the above numbers relate to.

2060 - Liv van Workum

Managing our storm water drains and waste systems is essential to the health and longevity of this city, as is drinking water which I remember a time when we were known for having the best. It's been disappointing to hear of the nitrogen levels showing up in recent tests. Climate change is upon us and we must prepare.

2143 - Vicky Anderson

Please ensure infrastructure is paramount - water supply >>> infrastructure.

2269 - Lyn Leslie (Te Pātaka o Rākahautū Banks Peninsula Community Board)

The Board recognises the significant water supply infrastructure projects on Te Pātaka o Rākahautū Banks Peninsula that will support community well-being by our communities having access to reliable and safe drinking water.

2583 - Lois Moore

Safe drinking water is absolutely essential.

278 - Robin Curry

However within the water supply there was a mention of a reduction in capital programme to renew aging infrastructure. I can appreciate using AAIF and regular checks and hopes this reduces "sweating"-bust pipes etc.

2816 - Susan Eleanor Peake

[Transport > Roads (Capital)]

Roads + water systems in particular benefit all citizens as opposed to those who live in more flood prone areas.

282 - Michael Heenan

[Three Waters > Waste Water], [Transport > Roads]

I think the capital costs of upgrading and repairing roads & pipes etc is understated. The ongoing work from rebuilding pipes networks also damages road & some areas where this has been done the roads are left in a shocking state.

315 - Sophia Pegg

We need to have absolute assurance in our water and sewage systems. The community in Bromley still wait to live in a place without smell.

3204 - Rebekah Bedyn

Seems a lot for water that now has to have chlorine in it

3425 - Hugh Dacre

In the broad sense yes, but the detail is the problem. The most important issues are infrastructure, especially with three waters - we must "stop the leaks" with urgency. This is much more environmentally sound than any other project.

344 - Aaron Herriott

Bit confused as to why so much more is needed for three waters when we supposedly have upgraded all the pipes?

3471 - Murray Irvine

Water drinking and waste should always be first.

3528 - Mark Wilson

[Three Waters>Taumata Arowai Requirements]

We need to spend a significant percentage of the rates on the replacement of our drinking water infrastructure. Residents are tired of chlorine, and have not forgotten the councils promise of removing it, we all know the only way to remove it is replace the old pipe work.

3619 - David Fuffy (Richmond Residents' and Business Association)

We would like to be kept informed about the Water supply/Reticulation scheme regarding water supply to our area and the progress of the well work to bring them to a safe level for the public.

3621 - Morgane Honore

Drinking Water Infrastructure: Investing in upgrading and maintaining our drinking water infrastructure is crucial for ensuring safe and reliable access to clean water for residents. This includes projects aimed at improving water treatment facilities, repairing aging pipelines, and enhancing water distribution systems.

373 - Charlene Herring

My major points would be -- clean (and preferably non-chlorinated) drinking water is vital for everyone.

375 - Alex McNeill

Ōtautahi is such a great place to live. I've loved living here for the past 13 years, and I'm looking forward to the rest of my life here. The things that make it great are the things we need to protect by investing in them and not shying away from difficult decisions. E.g. ease of getting around without relying on a car - boost our bus and bike infrastructure. Easy to access green spaces - continue tree planting. Reliable drinking and storm water - invest in upgrading our systems so that they are resilient against climate change. Yes, this rates increase is expensive during this cost of living crisis. We need to be careful to support our less well-off ratepayers.

These are all very important. Three Waters is immediately critical and requires lots of investment for future

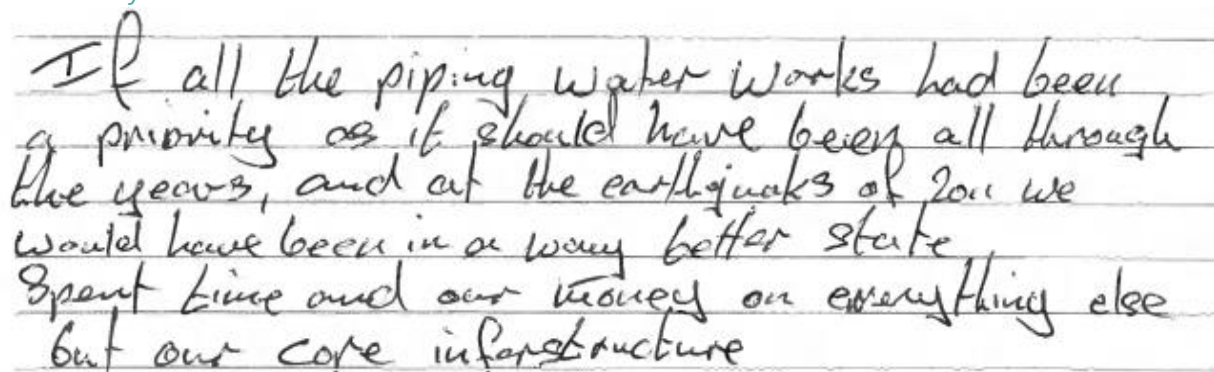

3852 - Chris Coey

We need to bring the water supply up to the central government's requirement to remove unnecessary addition of chlorine. So, prioritise the funding for that and if necessary, seek a review of the government's regulations on water supply.

3862 - Katharine Metherell

City is badly in need of water and waste network upgrades.

3979 - Kerry Neville

If all the piping water works had been a priority as it should have been all through the years, and at the earthquakes of 2011 we would have been in a way better state. Spent time and our money on everything else but our core infrastructure

4027 - Rona Buttimore

Safe drinking water and water treatment is paramount to good health.

418 - Molly Magid

I think it's extremely important that the city upgrade its water infrastructure, especially to prevent the kind of waterborne disease outbreak experienced by Queenstown early last year (given that Christchurch water supply also does not currently have a filter protecting from protozoan parasites.

662 - Cameron Taylor

Waters have been neglected for too long.

845 - Cris Fulton

I am very concerned that our once pristine water supply has been polluted with nitrates from big dairy and it is now necessary to chlorinate our drinking water.

861 - John Cumberpatch

Water Supply

We obviously need good water supply / management

Stormwater & Land Drainage (Capital)

General Comments

152 submissions were received addressing stormwater & land drainage (capital).

50 comments supported, and 9 comments opposed.

87 comments suggested what could be done differently, and 21 comments provided general feedback on stormwater and land drainage (capital).

Officer Response

There were a large number of submissions received that support an increase in investment for many Stormwater and Land Drainage initiatives. Specifically mentioned were;

- climate change impacts and adaptation
- naturalised systems
- removing barriers to fish passage
- biodiversity
- more wetlands (natural systems)
- flood protection and drainage
- erosion and sediment control (Port Hills and Banks Peninsula)
- OARC programme

- Improve recreational swimming quality in Akaroa and Lyttleton harbours

There was specific support to bring forward the proposed localised surface water flooding programme (e.g. Brenchley, Cygnet St outfall, Robinsons Bay, Diamond Harbour) and also to repair the stormwater network in Akaroa to reduce infiltration.

Some submitters indicated support for funding community groups and organisations in partnership with Council, e.g. ChCh Waterway Partnership, Whaka Ora.

Also support for funding of Stormwater Management Plans. Bring forward Heathcote floodplain management programme and stormwater pilot programmes.

There were some comments on maintenance, budgets and reviewing the spend. Also some specific requests like renewing the boxed drain in Leistrella Road and servicing the drain behind Tuckers Road and Sturrocks Road.

There was a call for investigating some initiatives like rain tanks to hold and store water and also look at rapid response crews for waterways maintenance like the current footpath crew.

There were also some points raised that will be discussed with Environment Canterbury

- Extraction of river gravels and flood risk
- Monitor logging operations and the effect on sediment discharge

The Council is working hard to improve waterbody health across the district. We have developed a Healthy Waterbodies Action plan that outlines objectives, goals, and measurable actions to improve waterbody health. Some of these objectives include improving surface water quality, providing sufficient instream habitat for native species and having diverse and extensive riparian margins.

Council projects around waterways are required to have a freshwater ecologist involved to ensure effects on the waterway are minimal, this involves guiding physical works as well as planting appropriate riparian species.

Council also has a detailed fish passage barrier prioritisation and remediation programme that focuses on fixing high priority barriers and opening up upstream habitats for native species. It is important to note that improving waterbody health takes a whole community approach from reducing contaminant inputs into waterways to large stormwater treatment projects. One of the ways that this is achieved is through funding partnerships with the communities.

The three waters programme is sized to achieve regulatory and consent compliance, replacement of ageing (leaking) assets and allow for population growth in the city. Replacement of the oldest and failing assets is also a priority. As part of the planning activity to achieve the above compliances, climate change impacts, biodiversity initiatives, flooding impacts and restoration opportunities are all factored in at an early stage. Levels of funding are reviewed at each annual plan/Long Term Plan and requested accordingly.

Specific requests have been passed on to the appropriate teams to review and programme in.

All of the above points are covered under existing levels of service and budgets in the draft LTP.

Support

116 - Jarrod Coburn

[Resource Recovery > Resource Recovery (Capital)]

Good to see investment in three waters and solid waste.

1619 - David Hera

Clean Water and Climate Resilience: Addressing water protection and climate adaptation is crucial. My background and recommendations include: Personal Insight: Having witnessed devastating wildfires exacerbated by climate change in my hometown, I am acutely aware of the need for preparedness. Solutions: Implement robust stormwater management and waterway protection measures. Significantly increase investment in climate-resilient infrastructure.

179 - Bridgette Smith

Prioritise water infrastructure

1838 - Charlotte Holland

• Glad to see the stormwater upgrades for the Avon corridor

1852 - Jessica Lamb

*more investment needed on natural flood mitigation like wetlands in high-risk flood areas.

>>>

Money needs to be spent on climate action & flood mitigation since these are going to cost the council & community a fortune when over the next few years we will be impacted by severe & unpredictable climate events.

>>>

Flood
mitigation' like increasing the amount of natural wetlands in Otoutchi need to be prioritised.

>>>

Capital spend should be prioritised on climate action & flood mitigation since this is the largest crisis our communities are going to face. Nature solutions need to be implemented - & this will also help increase mental health with more native natural areas in our cities, & help make us resilient to the climate crisis.

1882 - Anna-Marie Browne

[Transport>Public Transport Infrastructure (Capital)]; [Transport>Cycleways (Capital)]; [Recreation, Sports & Events>Community Arts]; [Strategic Direction>Have we got the balance right?]; [Grants & Funding>Arts Centre Funding]; [Other/Special Interest Topics>Public Transport]; [Transport>Transport (Operations)]

Has CCC got the balance between its services and rates right?

No, the CCC is not doing enough in services. I think there should be more funding for bus lanes, bike lanes, flood protection, the Arts Centre, cultural and entertainment ^{and} mental health initiatives. The CCC should also fund more electric buses ~~and~~

Rates establish free public WiFi in the bus interchange ^{and create more electric car charging stations.}
Should the council increase rates in order to maintain existing services?

Yes No

>>>

[Transport>Public Transport Infrastructure (Capital)]; [Transport>Cycleways (Capital)]; [Transport>Roads (Capital)]; [Three Waters>Water Supply]; [Spending>Capital Programme (General)]

Do you have any comments on our capital spend or capital programme?

The council should also put more funding into the capital funding new. More capital funding should go to climate, and flood protection, our water pipes and creating bus lanes and bike lane. I don't believe its necessary to create more roads.

1889 - Grace Rotherham

[Transport>Cycleways (Capital)]; [Transport>Public Transport Infrastructure (Capital)]

Spend more on public transport, footpaths bike lanes, flood and climate protection.

1923 - Matilda Moran

[Spending>Te Kaha]; [Transport>Cycleways (Capital)]; [Transport>Public Transport Infrastructure (Capital)]; [Parks>Biodiversity & Ecological Restoration]; [Libraries>Libraries (Operations)]

I think that prioritising things like the stadium are not as important as cycle ways, bus stops etc, flood protection, biodiversity protection, libraries, small business support and more and ~~things~~ these things need more funding and action.

1941 - Olive Harris

More into flood protection

1949 - Tessa Marshall

Climate and flood protection is critical

2038 - Colbie Van Dyk

[Transport>Public Transport Infrastructure (Capital)]; [Transport>Cycleways (Capital)]; [Recreation, Sports & Events>Community Arts]; [Strategic Direction>Have we got the balance right?]

No we need more art ^{funding} ~~funding~~ bus & bike lanes and flood protection.

2049 - Elsie Andrew

Spending>Our Proposed Spending]

The council needs to put more funding towards
climate and flood protection

>>>

Spending>Our Proposed Spending]

The council should prioritise climate and flood
protection

2087 - Emma Norrish (Waipapa Papanui-Innes-Central Community Board)

The Board is particularly supportive of the considerable proposed investment in the Three Waters, emphasising that we must continue to upgrade our infrastructure as there would be unacceptable consequences of failing to do so. We need to do this for current residents and visitors, as well as for those in generations to come. This prioritisation is further justified by drinking water, and stormwater and drainage, coming through prominently in the early engagement on 'what matters most' for the Papanui-Innes-Central wards – drinking water coming just above climate change as the top priority for the Board area as a whole.

2106 - Courtney Reid (Pūharakekenui Styx Living Laboratory Trust)

[Parks > Biodiversity & Ecological Restoration]

SLLT strongly supports the following: The commitment to ongoing capital investment into ecological enhancement and stormwater management in the Styx Catchment. Ongoing investment is necessary to retain and build ecological values, especially in the context of increasing development in the catchment.

2108 - Briar Rotherham

[Transport>Transport (Operations)]; [Recreation, Sports & Events>Community Arts]; [Strategic Direction>Have we got the balance right?]

Has CCC got the balance between its services and rates right:

No. We need more funding in transport, Flood Protection and arts funding.

2110 - Jennifer McMaster

More money needs to be put into climate protection and flood protection.

2570 - Marie Gray

>>> [Three Waters > Water Supply (Capital)] Support natural-based solutions for storm water such as wetlands, planting the rivers of the city and large-scale planting of the gullies of the Port Hills.

2769 - Dr Crystal Lenky (Lyttelton Port Company)

FEEDBACK ON THE LTP

6. During the Lyttelton Port Recovery Plan following the Canterbury earthquakes LPC became a partner of the Whaka-Ora Healthy Harbour along with Te Hapū o Ngāti Wheke, Te Rūnanga o Ngāi Tahu, CCC, and Environment Canterbury. The partners provide leadership and support for Whaka-Ora Healthy Harbour and are undertaking projects to help achieve the vision set out.
7. As a partner in the Whaka-Ora, LPC **supports** CCC's projects which will help to achieve the vision; particular projects we identify within the LTP include:
 - a. 60356: SW Port Hills & Lyttelton Harbour Erosion and Sediment: Sedimentation and erosion to waterways and the harbour is identified as a key focus area in the Whaka-Ora Plan and LPC is concerned that funding provisions made by CCC have been pushed back until 2027/2028. If opportunities exist to bring this project forward, LPC highly encourages this. LPC is dependent on the number and frequency of storms bringing in sediment and on the stability of the land that leads to erosion and sedimentation of the harbour. The amount of sediment highly effects the volume and duration of our annual maintenance dredge campaign. More sediment means longer and costlier campaigns.

[Full attachment available]

2797 - Dave Kelly (Beckenham Neighbourhood Association)

The LTP includes \$18M more for completing flood protection basins at the head of the OpawahoHeathcote river. The BNA supports that allocation for flood protection, as we are very pleased that work to date seems to have noticeably reduced how fast the river rises during heavy rain, and how high the water rises at the peak. The flood protection work seems very effective and should be completed.

[Full attachment available]

2832 - Riley Neupauer (University of Canterbury Green Party)

[Other/special interest topics > Creating a climate fund]

The Council says that it envisions Christchurch as a green and liveable city, but this is not attainable without further investment towards climate resilience and stormwater infrastructure, two essential areas which are already lagging behind in funding.

[Spending > Capital programme]

- CCC must continually fund the Stormwater Activity Plan's four pilot programs, as they are essential to climate adaptation and overall resident safety

>>>

[Three waters > Stormwater & Land Drainage (capital), Other/Special interest topics > Creating a climate fund, Strategic Direction > Climate change]

The stormwater system is not ready for the climate crisis, and things must change urgently to prevent Christchurch from having an Auckland Anniversary Flood. More money must be invested in stormwater systems immediately. As much money as possible must be invested, because the "criticality" approach in the current LTP is not good enough to build resilience. However, new pipes can't fix the problem — which is an under-equipped stormwater system. Pipes can only carry so much water, which means in a serious weather event they aren't going to be able to carry all of the water. Instead, CCC should start creating tree pits and rain gardens right now, and continue to fund this for the remaining 10 years in the plan. One significant strain on the stormwater system is how much of the city's surface is hard roads. Because roads, and especially roads for cars, have to be harder than nearly any other city surface (to take the weight of cars), car dependence in this city causes even more strain on the stormwater system. Therefore, to

reduce strain on the stormwater system, the amount of road surface should be reduced. This can be done by "greening" the city (such as by expanding grass verges), by using more permeable surfaces not suitable for cars (such as brick or semi-grassed paving, appropriate for pedestrians and cyclists), and by ensuring that no road is wider than it has to be.

2850 - Neil Cooper (Greater New Brighton Community Leadership Group)

CLG would support funding for these projects

Waitaki Street stormwater basin; work was delayed due to consenting issues, and is just getting underway now. This will help address regular flooding that occurs in the Pages Road section of the regeneration area. This basin will improve the quality of the water entering the Ōtākaro Avon River and begin preparing Christchurch to address the future threats from sea-level rise. This project will also increase the ecological values of the ŌARC and create valuable habitats for our coastal and wetland native flora and fauna.

Surface flooding programme – the current frequent and major flooding of many of the streets leading to New Brighton creates a poor image of New Brighton before anyone even arrives there. We would support the establishment of a new capital programme fund of \$20 million per year, starting in FY 27, for addressing and resolving regular surface flooding at sites identified against a priority matrix established by Council in FY 25 and FY 26.

2863 - Lynne O'Keefe

Continuing funding for the Christchurch waterways partnership. Rain harvesting should be mandatory for all new builds to reduce the pressure on the city's stormwater network. Find a suitable solution to flooding at Edgeware Village

2868 - Jonty Coulson

[Rates > Residential Rates], [Rates > City Vacant Differential], [Fees & Charges > Car Parking (Parks)], [Other Special Interest Topics > Creating a Climate Change Fund], [Three Waters > Storm Water & Land Drainage]

The increased funding through rates, climate conscious CVD plans and parking charges will be able to appropriately fund climate mitigation and resilience - including the stormwater activity plan, in which not enough funding has been provided for basic mitigation projects.

>>>

I also support the Surface Flooding reduction program,

>>>

The four pilot programs in the stormwater activity plan must all be funded in every year of the LTP, with project completion by 2025. These are; "Conduct Multi-Value Analysis on Stormwater Treatment Methods and Technologies for Consideration in Future Projects", "Installation of Stormwater Treatment Devices to Reduce Metal Contaminant Discharge and Monitoring of Effectiveness", "Undertake Analysis of Stormwater Outfall Blockage and Discharge Potential Risks with Respect to Climate Change Effects and Identify Mitigation Solutions", and "Identification of Properties At-Risk of Above Floor Flooding"

2869 - Josiah O'Neill

[Transport > Public Transport Infrastructure (Capital)], [Transport > Cycleways (Capital)]

I also think reducing emissions by investing in green infrastructure like improving storm water, adding bus and bike lanes are important.

3035 - Claire Coveney

Our storm water systems are struggling due to the huge loss of green spaces, housing intensification, more driveways and less properties with green areas that absorb rain when we have heavy rainfall. Why are people allowed to put fake grass on a berm, Real grass absorbs water. I don't think the housing intensification rules are taking responsibility for creating this problem.

Flood protection comes from less silting of rivers caused by subdivisions on hills. So I thank you for considering this as part of the Opawaho Heathcote Strategy and support those groups or individuals planting native species along this route. Housing developments need to move away from wetlands (massive carbon sinks and water storers and ecosystems). This is a holistic approach to stormwater and flood protection.

3055 - Josephine Drysdall

New stormwater systems, for instance, are crucial for our resilience.

It's important that we invest in water and waste projects that prepare us for the future and prepare our city to tackle climate change, such as "sponge city" floodwater management practices like reducing hard surfacing on roads, facilities, and car parks to create rain gardens and swales. In particular, I support the accelerated implementation of the Heathcote Floodplain Management Plan, which will help protect the residents of Heathcote from future floods like the Woolston floods. The four pilot programs in the Stormwater Activity Plan must also be funded in every year of the LTP.

3088 - Heather Brown

Keep renewing pipes and pole, cables etc. Future proof us for the weather effects of global warming. We trust you to get it right and to keep us safe.

312 - Shane Binder

It is unfortunate that such a high percentage of capital spending has to go to Three Waters but I understand where the need has come from and the requirement to address now instead of continued deferral (or waiting for a realistic solution from Government).

3187 - Debbie Hamilton

Invest in stormwater management especially by Peter Timms is appalling how this area still floods!

3341 - Maria Bartlett

[Transport > Roads (Capital)], [Spending > Te Kaha]

I'm pleased to see the emphasis on drinking water, wastewater and stormwater,

3379 - Mike Currie

[Planning & Strategic Transport, Urban Design, & Urban Regeneration > Creating a Climate Fund],
[Transport > Public Transport Infrastructure (Capital)]

We need to continue investing in active/public transport infrastructure, climate mitigation projects and climate adaptation projects such as new stormwater infrastructure, as not doing so now will impact future generations.

3381 - Karen Amyes

[Three Waters > Water Supply (Capital)], [Resource Recovery > Resource Recovery (Capital)],
[Transport > Roads (Capital)]

Essential services such as water, rubbish, remediating flooding and roading should be prioritised.

3414 - Chrissie Williams

Programme #	Programme Name	Budget	My comment
Stormwater Drainage			
<p>The sediment eroded from the Port Hills continues to be the most significant contaminant of the Ōpāwaho Heathcote River, Ihutai and Whakaraupō. The greatest proportion of sediment entering the Ōpāwaho originates in the Cashmere Valley, although all tributaries of the river, including stormwater drains, contribute unacceptable sediment levels after rainfall.</p> <p>Fixing the problem of sediment will be a multi-generational issue, but climate change means that we must begin addressing the issue no</p>			
43478	Port Hills Fire Recovery	Y1 \$15k	<p>The recent Port Hills fire has increased the importance of a recovery plan and increased the risk of sedimentation.</p> <p>I support this allocation for Fire Recovery, but I consider it needs to be significantly increased</p>
69218	SW Port Hills Revegetation and Sediment Control Stage 1	Y1-4 \$5,639k	Support
75712	Port Hills and Banks Peninsula Habitat Restoration	Y1-3 \$922k	<p>I support but consider funding needs to be increased and extended to Y4-10</p> <p>Wide-ranging planting and maintenance of native trees on appropriate sites on the Port Hills is the only significant means to reduce sediment at source. Given that the time lag between planting and effective reduction of erosion is measured in years, the sooner these areas are planted the better. This requires human resources and skills that are beyond the capability of community groups. Council must engage commercial operators for this work and ensure that funding is adequate.</p>
77200	Programme - SW Improving Urban Waterways	Y1-10 \$20,999k	I support projects to improve the Ōpāwaho Heathcote River including management of riparian and aquatic pest plants

3501 - Malcolm Long (Ōpāwaho Heathcote River Network)

13. We **congratulate** the Council on the near completion of the stormwater retention basin systems and dam in the headwaters of the Ōpāwaho Heathcote River. This system of basins, dam and waterway restoration are a major achievement not only as a flood avoidance mechanism for the lower river, but also as wetlands in their own right providing potential improvement in water quality, habitat for indigenous wildlife and plants, as well as large areas for recreation.
 - 13.1. We **strongly support** the capital allocation for 32243 - SW Eastman Sutherland and Hoon Hay Wetlands and 26599 - SW Cashmere Worsleys Flood Storage
 - 13.2. We **strongly support** the capital allocation for 77200 - Programme - SW Improving Urban Waterways and look forward to working with staff on projects to improve the Ōpāwaho Heathcote River through initiatives such as more management of pest plants in the Ōpāwaho Heathcote River.

>>>

15. Fish passage is an important aspect to restoration of the Ōpāwaho Heathcote River. Without fish and tuna/eels being able to navigate between the upper and lower reaches of the river, its tributaries and drain outfalls, the ecology of the river is irreparably damaged.
 - 15.1. We **support** the allocation for 66638 - SW Fish Passage Barrier Remediation. This is not a nice-to-have; if protection of indigenous biodiversity is to have real meaning, suitable fish passage throughout our river systems must be reinstated.

3507 - Gary Barber

[Transport>Roads (Capital)]; [Transport>Transport (Operations)]; [Three Waters>Waste Water (Capital)]; [Three Waters>Water Supply (Capital)]; [Strategic Direction>Have we got the balance right?]

Infrastructure investment appears visually skewed to unnecessary road & transport changes but support water infrastructure upgrades.

3629 - Marie Graham

The SouthShore Estuary Edge Funding to repair the damage caused by Cera removal of ground when clearing Redzone homes causing erosion is a priority agreed in 2019 unanimously by council. Finally a solution that will return community health and wellbeing.

3690 - Jono de Wit (Greater Ōtautahi)

We support 77201 Programme - Surface Flooding Reduction.

3724 - Terence Sissons

Regarding climate change I agree with the proposed flood control works along the Heathcote and Avon Rivers as the risk of flooding is real.

3736 - Matthew Moore

[Transport > Cycleways (Capital)]

Increase operational spending on major cycle routes, and the storm water activity plan

3738 - Finn Jackson

I strongly support the proposed spend on the following stormwater, flood protection, and wastewater projects: - 42154 – WW Selwyn Pump Station (PS0152), Pressure Main and Sewer Upgrades - 71278 – WW Land for Somerfield Pump Station - 32243 - SW Eastman Sutherland and Hoon Hay Wetlands - 26599 - SW Cashmere Worsleys Flood Storage - 77200 - Programme - SW Improving Urban Waterways - 69218 – SW Port Hills Revegetation and Sediment Control Stage 1 - 66638 - SW Fish Passage Barrier Remediation

>>>

[Three Waters > Waste Water (Capital)], [Three Waters > Water Supply (Capital)], [Transport > Other]

As previously mentioned, I would like to see spending prioritised on sustainable transport options and water infrastructure. The proposed LTP does not do this.

3746 - Quinn Ledgerwood-Gee

[Strategic Direction > Have we got the balance right?]

CCC Needs to massively increase its capital spending program ASAP. There are many individual projects which need increased funding to safeguard our future: >>> -Heathcote floodplain management implementation must be brought forward to 2025 in order to protect the residents of heathcote from further flooding. --Project 1 “Conduct Multi-Value Analysis on Stormwater Treatment Methods and Technologies for Consideration in Future Projects”, must be funded for project

completion in 2025, because the produced information is critical to climate adaptation. --Project 2, “Installation of Stormwater Treatment Devices to Reduce Metal Contaminant Discharge and Monitoring of Effectiveness”, must be funded for project completion in 2025, because Council is under a legal obligation to meet resource consents and should not be responsible for contaminating waterways. --Project 3, “Undertake Analysis of Stormwater Outfall Blockage and Discharge Potential Risks with Respect to Climate Change Effects and Identify Mitigation Solutions”, must be funded for project completion in 2025, because the stormwater system isn’t getting enough funding, so it’s important that the current system is used wisely. --Project 4, “Identification of Properties At-Risk of Above Floor Flooding”, must be funded for project completion in 2025, because CCC has a responsibility to all residents of the city, who only live in areas that CCC zoned for residence; it can’t now abdicate its responsibilities to those residents.

>>>

[Strategic Direction > Climate Change], [Planning & Strategic Transport, Urban Design, & Urban Regeneration > Coastal Hazards Adaptation & Adaptation Planning]

CCC says in the LTP “While climate change has not been caused by Council”. In future, CCC must be honest about its contributions to the climate crisis, and take mitigation seriously. CCC says in the LTP that sea level rise threatening homes is “mitigated” by “homeowners [being] anxious and uncertain”. This isn’t good enough; CCC has a responsibility to residents who live in houses that CCC zoned to get built. Therefore, CCC must start a managed retreat program in 2025, with compensation for renters. Because the climate crisis will massively increase the scale of flooding, the stormwater system must be bolstered with adequate green stormwater infrastructure across the whole city built to handle high intensity weather events. Because the climate crisis will massively increase the scale of rain events, concrete surfacing on roads will cause more strain on the stormwater system because of the non-permeable surface. Therefore, CCC should immediately commit to desurfacing many roads and replacing them with rain gardens or other green stormwater infrastructure.

3748 - Greta Bond (Age Concern Canterbury)

[Three Waters > Waste Water (Capital)], [Three Waters > Water Supply (Capital)]

We recognise the importance of the large spend on 3 waters infrastructure.

3809 - Johnathon Ridden

[Three Waters > Waste Water (Capital)], [Three Waters > Water Supply (Capital)],

Water infrastructure is important, so support this as a primary capital expenditure option.

3941 - Georgina Stanley (Smith Street Community Farm Trust)

We are also wanting to support the continued improvements to our water ways in particular the 22 Million allocated to the Opawaho water way and its tributaries- with particular focus on replacement of open waterways.

396 - Daniel Jackson

Thank you for prioritising three waters continuation. Our water management systems need some love.

4000 - Kari Barr

[Three Waters > Waste Water (Capital)]

More for wastewater and stormwater

416 - Mike Cleaver (Canterbury)

I agree we need to invest in our water systems as it is clear they are struggling.

646 - Adrienne Dempsey

Flood risk is an appropriate area to focus on.

Oppose

1996 - Iain Nicholls

Overly ambitious, particularly with regard to water infrastructure

>>>

Too much emphasis on three waters.

1998 - Grace Robinson

[Transport > Transport (Operations)]

Furthermore, the inadequacy of funding for road maintenance and basic climate mitigation projects, as highlighted in the Transport and Stormwater Activity Plans of the LTP, underscores the urgent need for higher rates.

2520 - Graeme Fraser (Diamond Harbour Community Association)

- I believe that spending on the following item should be brought forward and a specific amount set aside for Diamond Harbour stormwater/sediment control as we still contribute too much to the harbour: p195 ID:60356 Programme - SW Port Hills and Lyttelton Harbour Erosion & Sediment (Nothing being spent till 2028/29)

>>>

Given our unique terrain and soil conditions, we support measures to improve stormwater control and prevent sediment from entering the harbour

2639 - Callum Ward (Waihoru Spreydon Cashmere Heathcote Community Board)

Water • There has been a significant reduction in the amount of money for water programmes. The Board has concerns about the levels of service for land drainage in Hillsborough and along the Ōpāwaho Heathcote River catchment.

2838 - Graham Erikson

Reduce 3 water expenditure (particularly stormwater) somewhat in early years. Increase development contributions to ensure new sites contribute fully to increased demand on services. >>> [Revenue > Development Contributions]

2872 - Kim Money

Of the \$870 million, what is the coastal environment component? We are still waiting to see the stormwater Cygnet St ocean outfall extended, which keeps getting blocked by sand accretion! This would be a small repair in the grand scheme of things and would rectify the flooding issues this causes on Marine Pde in this area. Waiting on Coastal adaptation conversations to happen before fixing the problem is a very poor reason to do nothing. This needs to be fixed now. I am not aware of other repairs that are waiting for adaptation conversations before they will be remediated. Residents see this as just another issue being neglected by CCC for the coastal ward.

3307 - Richard Griffiths

The delays in providing adequate Flood protection on the eastern side of the estuary are criminal.

3745 - Victoria Rathgen

We received one rubbish bin in new Brighton after such a long battle, whilst Sumner and Fendalton gets everything....including 23m causeway whilst South Brighton gets 3m for flooding trackway.

3941 - Georgina Stanley (Smith Street Community Farm Trust)

29076 – SW Charlesworth Drain (LDRP 531) cuts funding to the Linwood canal/city outfall drain urban stream renewal. With the increase density we are seeing in the areas around this canal /open drain, there is no better time than now to continue with the naturalization of the outfall drain. Particularly from Ensors Road through to Hargood Street this is a heavily used active transport network as well as a deteriorating concrete canal. The improvement, naturalization would make for water quality, ecological habitat, and overall liveability for the neighborhood greatly outweighs the financial cost of this long over due restoration.

>>>

29076 – SW Charlesworth Drain (LDRP 531) Naturalization of the Linwood canal / city outfall drain to assist in the management of climate change.

Other

1191 - Ava Johnson

Clean Water and Climate Resilience: • Personal Experience: Witnessing the devastating impacts of wildfires in my hometown due to poor management and climate change-induced heatwaves. • Proposed Solutions: • Strengthening waterway protection through robust stormwater management and pollution reduction measures

>>>

In the Long Term Plan, the Council's water engineers have indicated a lack of funding for climate adaptation measures. Meanwhile, the cost of roads for cars continues to rise, and essential climate initiatives are consistently delayed. This delay poses a significant risk as Christchurch edges closer to experiencing floods similar to those seen in Auckland.

1352 - Lin Klenner

3 Waters, provide sufficient funding to progress stop bank work (including Spencerville) and for goodness, me address issues with open coast drainage (Cygnet Street , North Beach)

1362 - Pablo Rodriguez

[Parks > Parks Spending (General)]

Rain gardens, biodiversity and green spaces included in stormwater management plan

1431 - Carissa Ptacek

Stormwater projects are more key than ever, again is there way to subsidies/educate on better verge gardens to hold additional water or plantings that may help slow flows when in flood?

1462 - Sue Piercey

I am wondering if some properties, especially those on the hills, should have to put in slow release stormwater tanks retrospectively given that we are likely to have more severe rain events with climate change.

1474 - Céira Dernhagen

[Three Waters>Waterways Quality & Compliance]; [Planning & Strategic Transport, Urban Design, & Urban Regeneration>Coastal Hazards Adaptation & Adaptation Planning]; [Other/Special Interest Topics>Creating a Climate Fund]; [Strategic Direction>Have we got the balance right?]

Clean Water and Climate Resilience: Water protection and climate change adaptation are essential. I encourage: Why it's personal I am originally from a place that has experienced and is experiencing an increase in wildfires. A little over a decade ago almost my entire town was wiped out by a runaway wildfire due to poor management and climate change induced heatwaves. I want to make sure our home is ready for our changing climate. Solutions Rigorous protection of waterways through stormwater management, reduced pollution, and natural filtration systems. Increased investment in infrastructure designed to withstand the impacts of climate change (e.g., flooding and sea-level rise), including nature-based solutions. Accelerate Adaptation efforts - invest much more than the laughably small 1.8 million per year Climate Resilience Fund - Expand the program. Start the plan immediately and invest more than the current proposal. We have created enough climate debt for our Rangatahi. It's time to properly invest in their future.

1488 - Mel Brown

[Transport - Cycleways (Capital)]

I know some people bag the cycle ways and I think more consideration should be put in when developing subdivisions etc (make the developers pay). But I think they are great. Look at the variety of age groups that use them. We have older groups out getting exercise - moving their bodies. I do think we need one on lower Styx road. You could incorporate it with a stop bank to stop the river flooding over the road. A win win!

>>>

Sand dunes! Flooding spencer river.

1498 - Charlie Due

"Establishing a programme to resolve regular surface flooding – \$183 million (starting in 2027)"
Should be prioritised immediately.

>>>

However, more targeted flood mitigation works should be prioritised.

1532 - Kit Doudney (Avon-Heathcote Estuary Ihutai Trust)

We strongly urge the city council to accelerate work to improve the quality of stormwater draining directly into the Avon Heathcote Estuary/Ihutai. We note (from Page 30 of the Draft LTP document) that council spending will address stormwater works for the Ōtākaro Avon River and the Ōpāwaho Heathcote River. This will help resolve some water quality issues in the estuary. But there are several watercourses which drain surface water (runoff) direct to the estuary without the benefit of treatment. Contaminants damage the marine life of the estuary and severely limit the quality of mahinga kai and biodiversity. We understand council have started prioritising the work that needs to be done, but the Estuary Trust sees a need for urgent remediation if water quality in the estuary is to at least be maintained and in the longer term improved. A joint approach with Environment Canterbury may be needed; the regional council has special regulatory and protection roles and access to specialist services. One such watercourse is the Estuary Drain. This is a creek along the edge of the former city council landfill site at Bexley. It flows through a culvert under the State Highway on Anzac Drive (just north-west of the Bridge Street/Dyers Road roundabout). A recent study has shown it to be highly polluted. A long-term solution is required in order to stop contaminants entering the estuary. NOTE: There is also the issue of bank erosion exposing the waste from the old landfill, which could be causing leaching of contaminants and waste being eroded and transported into the estuary. There are other watercourses such as the Linwood Canal, the drains across the Linwood Paddocks and streams in McCormacks Bay and Moncks Bay which need similar attention.

1547 - Graham Allan

[Parks > Other]

if possible spend more on parks and drainage and possibly artificial grounds

1581 - Ann Kleiss

[Transport > Roads (Capital)] , [Spending > Capital Programme (General)]

Concentrate on main infrastructure eg roads, sewers, drainage

1618 - Zachary Imhoof

The stormwater system gets as much money as needed for pipes, for rain gardens, for city greening permaculture systems try to retain as much water as they can to feed the system where we try to drain it off as soon as possible. create green water storing and filtering beds and critical runoff points and keep that water for longer. it has many services it can provide if we use intelligent design.

1824 - Karen Banwell (Cass Bay Reserve Committee)

We strongly urge the Council to accelerate work to improve the quality of stormwater that drains from the hillsides onto the roads and then directly into the two Cass Bay Streams – one unnamed and the other the lower reaches of Steadfast Stream. The sediment loaded waters damage the stream and then the marine life severely limiting the quality of biodiversity within the streams and then the harbour.

1827 - John Rice

More efficiencies should be sought. For example there are signs up in the Sutherlands Basin saying work on track and bridges will be completed by 31 March 2024 but the work has still not been completed - Why? Also at the opening of the Basin to the public free lunches were provided to the participants. Though this was nice for those attending it was unnecessary expenditure.

1829 - Stephanie Barbier

Definitely need to see more money put into reducing flooding, last winter there were many instances where streets were flooded and I ended up with rubbish that had floated out of peoples bins coating my driveway, it makes me seriously consider moving away but my family have a wonderful community on our street so we would rather stay but not be flooded.

1838 - Charlotte Holland

• Please consider also accelerating the "establishment of a programme to resolve regular surface flooding" from 2027 to within the next 3yrs

1870 - Sharmilla Freeman

Further invest in
flood protection.

>>>

Put more money into climate
and flood protection

>>>

More \$ into climate &
flood protection

1876 - Mika Clapson

I want more flood protection & the knowledge
that my house in New Brighton will survive flooding!

>>>

Prioritise climate change and flood protection funding!

>>>

* Fund the stormwater system to increase flood protection

1950 - Shanae Kirk

With flooding occurring more often, more funding should be put towards the Heathcote Floodplain Management Implementation, to enable it to be brought forward. This will help to protect the community as climate change becomes more rapid.

>>>

In every year of the LTP, the four pilot programs within the Stormwater Activity Plan must be funded.

1952 - Xin Yi Wong

[Transport > Roads (Capital)]

I can see there is proposed spending on 'transport' including repair to roads and footpaths, and 'water' including stormwater management, but can't see in the proposed LTP if there is any proposed and clear overlap to create efficiencies both in spending and time (and therefore spending) to achieve climate resilience - namely through integrating sustainable drainage as a key part of our streets and urban fabric, e.g. rain gardens, swales, etc. For example, any improvements to roads or new roads must incorporate sustainable urban drainage systems including rain gardens, swales, etc. Many existing roads are far wider than they need to be, with extensive areas of asphalt, have green verges that don't serve much purpose and require ongoing maintenance for little benefit. Planting, trees and sustainable drainage must be retrofit as part of any road improvements to: a) improve stormwater/surface water management, b) create a more pleasant street environment which would positively effect people's wellbeing and potentially encourage people to walk and cycle more, c) reduce the heat island effect and help to cool our neighbourhoods, d) provide more biodiversity opportunity, and e) contribute to increasing the tree canopy. Thinking of value for money, sustainable urban drainage would be a positive way to achieve "a green, liveable city" and be a clear way of the Council showing how they are addressing climate change and improving the city's climate resilience.

>>>

However, refer to Q1 where I query whether or not the Council could find some efficiencies through the use of sustainable drainage systems within our streets (particularly where works are proposed to upgrade streets anyway).

1978 - Robyn Lavender

spend more on >>>
flood protection

2086 - Hao Ning Tan

do you have any comments on our capital spend or capital programme:
please invest in climate resilience and
flood protection

2087 - Emma Norrish (Waipapa Papanui-Innes-Central Community Board)

A key document that guides the Board's advocacy for its community is the Community Board Plan 2023-25, which it engaged with the community on at the start of this electoral term, taking full account of the feedback received, before adopting the Plan. In regard to the LTP, the Board agreed with the community that it would advocate for funding to be included/retained for specific projects as detailed within the submission points for the next question. The projects are: for surface flooding in the Board area to be mitigated

>>>

Flood Mitigation: The Board's prioritisation in its Board Plan of advocating for flood mitigation projects aimed at the surface flooding, which the community has highlighted to it, informs its support for the proposed surface flooding reduction programme. As noted in its Board Plan: "The community board is well aware of the community concern about localised surface flooding experienced in parts of the board area and across the city caused by the record-breaking rain events of July 2022, and indications that with climate change such events may become more frequent. At a community meeting the residents sought assurances from the community board that the drainage network is working and being maintained as effectively as possible to drain stormwater away rapidly during and after significant rain events.

>>>

In light of this, the Board said it would, and seeks here to: "• Advocate for the prioritisation and inclusion of required flood mitigation projects by identifying in the board submission what options for flood mitigation represent the best value for money, prioritising community safety and wellbeing while recognising that some street flooding in

significant rain events is part of a functional drainage network that avoids inappropriately creating property flooding downstream. • Advocate for a resource that helps communities understand what to do, what not to do, and support them more generally in flood events. • Advocate for mitigation options to be considered ahead of significant rain events especially around, but not limited to, Francis Avenue, Edgeware Village, Emmett Street, and Harris Crescent. • Advocate that all residential and commercial impacts are considered when flood mitigation projects are being considered, including in setting levels of service. • Advocate that the Council continues to investigate the use of permeable surfaces/rain gardens where applicable." The Board specifically requests that it be investigated whether flood mitigation levels of service are inappropriately excluding non-residential properties, having witnessed the impact on Edgeware Village and the community who use it from the 2022 significant rain events. Currently Council staff are limited in their response options when flood waters inundate or threaten commercial premises because there are no levels of service for such an event. This urgently requires addressing by council, in deciding the levels of service for commercial properties. The Board also signalled it would advocate that flood mitigation is considered in new developments to ensure existing networks are not overwhelmed and remain effective in significant rain events. The Board is encouraged in this respect to see some appearance of provision for new development in East Papanui (between Cranford and Grassmere streets), though remains concerned that it is yet to be evidenced that intensification across the Papanui-Innes-Central wards will not contribute to surface flooding issues.

Flood Response: While the Board supports finding spending efficiencies, it would not see any creation of risks of property flooding through this, or of being under-prepared for emergency responses to severe weather, as a more broadly efficient. The Board highlights the distress such events cause the community, and the vital importance of mitigating this distress and risk by maintaining what residents expect in terms of investing in flood response, such as the ability to deploy temporary pumps, road closures, civil defence emergency management personnel/resources, and other modes of preparedness developed through community resilience initiatives.

2097 - Marie Haley

However, the state of Akaroa wastewater and storm water pipes is causing huge issues for the health and swim-ability of the harbour. I would like to take my child swimming in the Akaroa harbour without the fear of becoming sick and harming. It is vital that rural Banks Peninsula children have the opportunity to learn to swim safely in the ocean, which we are surrounded by, and be safe in water.

[Recreation, Sports & Events > Rec & Sport (Operations)]

There are NO accessible swimming lessons for preschoolers, other than 2 weeks in the summer holidays run by the excellent Swimming Club. I would like to see CCC take this issue seriously and prioritise the safety of rural children, with water safety, learn to swim and access to safe swimming places in the Akaroa harbour, to do this we need access to swimming lessons like city children have, and also to fix the wastewater and stormwater pipes in the township of Akaroa as a priority prior to moving the water treatment plant and discharge to Robinsons Bay. This must be a priority for the mauri of the harbour and the wellbeing of precious lives.

>>>

Akaroa stormwater and wastewater pipes need to be prioritised over the wastewater treatment upgrade. By moving the Akaroa treatment plan and discharge it will NOT fix the problem of inflow into

the system from old and broken pipes. I want to swim in the harbour again and I want my child to swim in the harbour again, I want the mauri of Akaroa harbour to be improved.

2172 - Tobias McKellar

We need better stormwater systems to deal with more severe weather events.

2183 - Hali Stauffer

3. Clean Water and Climate Resilience: Protecting our waterways and preparing for climate change impacts are imperative. Drawing from personal experiences of wildfire devastation elsewhere, I emphasise the need for: - Rigorous stormwater management and pollution reduction efforts.

>>>

I'd like to highlight several critical areas that Council should prioritise: 8. Investment in stormwater management and climate resilience: Prioritising adequate funding for comprehensive stormwater infrastructure, including rain gardens and city greening initiatives, is critical for mitigating flood risks and adapting to the impacts of climate change.

2263 - Scott Babington

Just checking that sea level rise mitigations are included here - i imagine that they are?

2311 - Paul McMahon (Waitai Coastal-Burwood-Linwood Community Board)

In addition to the top five priorities, the Board wishes to highlight the following: • 74801 Waitaki Storm Basin (OARC) – strongly support. • Stormwater and Flood protection – in an earlier draft of the LTP, when the consenting issue with Environment Canterbury was unresolved, there was a \$40m reduction in stormwater and flood protection – the Board wishes to ensure there is no reduction in this, which was identified as the top priority in What Matters Most for our Board Area.

>>>

In addition to the top five priorities, the Board wishes to highlight the following: • 2415 Programme - SW Management Plan on Pūharakekenui - Styx Waterway Detention & Treatment Facilities – proceed as quickly as consenting allows. • The Board would like to see investigation of stop-banks for Spencerville through to Brooklands. • The Board would like to support funding for the Bexley Landfill

remediation being brought forward, if at all possible. • The Board would like Cygnet Street Pipeline as a separate line item.

2358 - Carolyn Moffat

[Strategic Direction > Additional Savings & Efficiencies], [Libraries > Libraires (Operations)]

Perhaps there are savings to be found -ie reduce operating hours of some libraries, or reduce the number of times per year the council crew come down streams, such as Old Mill Stream, to cut vegetation.

2385 - Ezra Mussa

Heathcote Floodplain Management Implementation must be brought forward to 2025 in order to protect the residents of Heathcote from further floods such as the Woolston floods. The four pilot programs in the Stormwater Activity Plan must be funded in every year of the LTP:

Project 1, "Conduct Multi-Value Analysis on Stormwater Treatment Methods and Technologies for Consideration in Future Projects", must be funded for project completion in 2025, because the produced information is critical to climate adaptation.

Project 2, "Installation of Stormwater Treatment Devices to Reduce Metal Contaminant Discharge and Monitoring of Effectiveness", must be funded for project completion in 2025, because Council is under a legal obligation to meet resource consents and should not be responsible for contaminating waterways.

Project 3, "Undertake Analysis of Stormwater Outfall Blockage and Discharge Potential Risks with Respect to Climate Change Effects and Identify Mitigation Solutions", must be funded for project completion in 2025, because the stormwater system isn't getting enough funding, so it's important that the current system is used wisely.

Project 4, "Identification of Properties At-Risk of Above Floor Flooding", must be funded for project completion in 2025, because CCC has a responsibility to all residents of the city, who only live in areas that CCC zoned for residence; it can't now abdicate its responsibilities to those residents.

>>>

[Transport > Transport (Operations)], [Other/Special Interest Topics > Creating a Climate Fund]

Because the climate crisis will massively increase the scale of flooding, the stormwater system must be bolstered with rain gardens across the whole city. Because the climate crisis will massively increase the scale of rain events, concrete surfacing on roads will cause more strain on the stormwater system because of the non-permeable surface. Therefore, CCC should immediately commit to resurfacing roads and replacing them with rain gardens.

2389 - Aurora Garner-Randolph

[Other/Special Interest Topics > Creating a Climate Fund]

There needs to be more funding for climate mitigation projects like stormwater drainage and land drainage.

>>>

Individual projects which need funding in in 2024 or 2025 include:

- Heathcote Floodplain Management Implementation must be brought forward to 2025 to protect the people of Heathcote from further floods such as the Woolston floods.

The four pilot programs in the Stormwater Activity Plan must be funded in every year of the LTP:

- Project 1, "Conduct Multi-Value Analysis on Stormwater Treatment Methods and Technologies for Consideration in Future Projects", must be funded for project completion in 2025, because the produced information is critical to climate adaptation.
- Project 2, "Installation of Stormwater Treatment Devices to Reduce Metal Contaminant Discharge and Monitoring of Effectiveness", must be funded for project completion in 2025, because Council is under a legal obligation to meet resource consents and should not be responsible for contaminating waterways.
- Project 3, "Undertake Analysis of Stormwater Outfall Blockage and Discharge Potential Risks with Respect to Climate Change Effects and Identify Mitigation Solutions", must be funded for project completion in 2025, because the stormwater system isn't getting enough funding, so it's important that the current system is used wisely.
- Project 4, "Identification of Properties At-Risk of Above Floor Flooding", must be funded for project completion in 2025, because CCC has a responsibility to all residents of the city, who only live in areas that CCC zoned for residence; it can't now abdicate its responsibilities to those residents.

>>>

Better stormwater management. flooding is a serious worry for residents.

>>>

[Other/Special Interest Topics > Creating a Climate Fund]

Because the climate crisis will massively increase the scale of flooding, the stormwater system must be bolstered with rain gardens across the whole city. Because the climate crisis will massively increase the scale of rain events, concrete surfacing on roads will cause more strain on the stormwater system because of the non-permeable surface. Therefore, CCC should immediately commit to desurfacing many roads and replacing them with rain gardens.

2522 - Rosa Hughes-Currie

[Spending>Te Kaha]; [Transport>Public Transport Infrastructure (Capital)]; [Strategic Direction>Have we got the balance right?]

Too much being spent on Te Kaha, not enough on flood protection and public transport.

2544 - John Bannock (Governors Bay Community Association)

There is a need for operational funding for wetland and hillside restoration to manage flooding and hillside erosion including reducing sediment loads into waterways and the harbours.

>>>

We strongly urge the Council to accelerate work to improve the quality of stormwater coming off the hillsides and onto the roads and then directly into local streams. Restoration of upper catchment will slow the flow of water, improve flora and fauna abundance and diversity, and will also contribute to the future resilience of the area by slowing water from the expected heavier rainfall. This will also help to make the roading system more able to deal with heavy rain.

2563 - Kim Money (North Beach Residents' Association)

NBRA is grateful for Christchurch City Council's interest to regenerate the Eastern side of Christchurch and appreciates the progress that has been made to date in New Brighton. We would like to see these efforts continued with momentum. This submission highlights the key local projects and funding in the LTP that NBRA supports and would like retained, but also proposes that some projects be brought forward, have more funding allocated to them, or be reinstated from previous AP/LTPs.

Cygnets Street Ocean Outfall Pipe Remediation:

There has been much correspondence with regards to the Cygnets St Ocean outfall pipe and the sand accretion that blocks the end of the ocean outfall pipe preventing stormwater from being released onto the beach and therefore causes flooding on Marine Pde and neighbouring properties in this area. There was \$260,000 in the 2022/23 AP budget, this was reduced to \$36,000 in 23/24 AP budget. A man hole was installed for an inspection point, however, no further work has been carried out. We support further funding to ensure that the outfall pipe is extended (as per the lengths of the other existing outfalls in this area), to help minimise the sand accretion around the opening of the outfall.

Our understanding is that this piece of work is not to be remediated or further looked into until the Coastal adaptation conversation has been had with residents. This could take some years. We would like to remind Councillors that delaying this simple remediation work is another neglected/delayed issue to add to the Coastal Wards growing list of issues that are affecting our residents. It is a maintenance issue and this outfall will be in operation for many years to come. Other areas of the city have similar issues and are being remediated. We request the same and that this issue is revisited and funding added back into the 24/25 LTP.

>>> [Planning & Strategic Transport, Urban Design, & Urban Regeneration > Coastal Hazards Adaptation & Adaptation Planning]

2652 - Katie Gallagher

fix the drainage in streets where residents are subjected to flooding every time there is a downpour eg Brenchley Ave. The rates in this suburb are sky high yet residents are expected to put up with flooded streets and properties.

2686 - Joe Conaghan

[Full attachment available - photos]

Request Our submission is regarding the condition of the box drain adjacent to our property on Leistrella Road, Hoon Hay. We are requesting for funding be allocated to either: 1. Replace the box drain with a culvert pipe; or, 2. If a culvert pipe cannot be installed, to repair/rebuild of the box drain. From correspondence with Council, we understand that this issue/request requires capital funding. Using the draft LTP bubble tool we are not sure if the 'Programme Stormwater Drainage Reactive Renewal' could be used for this which has a total budget of \$6,699,817. Details The existing box drain condition is rapidly deteriorating and is causing subsidence along the boundary of our property. This also impacts other neighbours and the issue has already been raised with the Council for further investigation. Whilst the box drain has not yet fallen in along our property, from the pictures provided you can see that our driveway, shed, garage and fence are all leaning into the box drain which is certainly causing us concern. We have owned this property for six years, and it is clear that this has been occurring for a longer period, and is visually happening quicker. The driveway is six years old and subsidence is clearly apparent. In addition, this is preventing us from replacing the fence and renovating our garage. We have had quotes for the fence repair refused as the contractor is not able to guarantee the work until the box drain has been repaired/replaced. We are also unsure how the fence would be replaced/built with the current box drain condition and we do not want to have to replace this twice. There is a subdivision adjacent to our property, and whilst they have not yet started building next to us, further along where they have already built, the box drain has been filled in and replaced with a culvert pipe which is also our preference.

2711 - Denise George

Disappointed that a new program to resolve regular surface flooding will not be brought in until 2027, with climate change effecting the changing weather patterns this needs to be a priority for 2024/25.

2734 - Sharon McDonald

If Council maintains its roads and stormwaters properly we should have no real problems and surely the Council has insurances to cover its buildings etc.

2769 - Dr Crystal Lenky (Lyttelton Port Company)

- b. 42008: Lyttelton Stormwater Improvements: Whilst we appreciate some of this will be conveyance and structurally focused, we encourage CCC to identify opportunities to add treatment within the network to provide improved water quality outcomes for the harbour as is envisaged in the Whaka-Ora Plan. Again it is concerning to see that funding provisions made by CCC have been reduced for the first two years of the LTP. Monitoring of CCC's network on LPC property has consistently shown high levels of contaminants discharging into the harbour from the Council system.

[Full attachment available]

278 - Robin Curry

The assumptions mad by council regarding the 1-5000 and 1-10000 year event need revisiting given the current information already available on climate change. The option of an additional \$20 million ,giving a rates increase of 0.14% should be actively considered.

2807 - David Close (Christchurch East Labour Electorate Committee)

[Borrowing & Debt Management > Rating for Renewals]

Council should reduce its capital programme for works that are not urgent. Every ratepayer knows that it is far cheaper to wait a while and pay cash than max out the credit card. We suggest that the Council trim capital expenditure asset out below:

- Flood Protection and Control (Vol 1, page 182U) likewise has a huge programme of new works in the Otakaro-avon Corridor, about \$110m. This work is no doubt necessary, but much of it is not urgent. In liaison with Parks, deferrals of \$50m could be made.

2817 - Emma Twaddell (St Albans Residents' Association)

The flooding budget needs to include a viable solution to issues around Edgeware Village. Storm water drains throughout St Albans, esp Dudley Creek Drain and the Mairehau Drain need to be repaired and made safe.

2823 - Aurora Garner-Randolph (School Strike For Climate Ōtautahi)

Stormwater programs, including but not only the ones in the Stormwater Activity Plan, must be funded in order to ensure that our futures won't be filled with floods. Another is the Heathcote River Floodplain Management program. Funding must be brought forward for this project

2832 - Riley Neupauer (University of Canterbury Green Party)

[Rates > other, Three Waters > Stormwater & Land Drainage, Planning & Strategic Transport, Urban Design & Urban regeneration > Coastal Hazards Adaptation & Adaptation planning, Strategic Direction > Climate Change]

It is somewhat understandable that the Council would consider trying to slow the rise of rates. However, this clearly must come at the cost of investment in crucial infrastructure and services, making it a tradeoff that is in no way justified. Ample funding is necessary to maintain the performance of our facilities, and Christchurch is already heavily strained as it continually struggles to meet development goals. This is not some unfounded speculation: the Council repeatedly acknowledges that this is the case. To quote directly from the Stormwater Activity Plan and Land Drainage Asset Management Plan: "Sea level rise will expose infrastructure in low lying coastal communities, causing damage. The existing sea outfalls will be unable to discharge storm flows increasing the chances of flooding. This can result in water backing up a long way inland so that flooding may also affect communities that are further from the coast. Recent studies have identified that we can already expect higher storm tides than previously thought. Investment in larger capital works such as combined catchment pump stations may be required, seawalls and stop banks constructed... To date, the business has progressed with minimal actions to respond to the declared Climate Change Emergency." This is an alarming trend across Christchurch. The Council has continued to dole out meagre amounts of funding to indispensable utility services like water management, which are buckling under the weight of their ongoing projects. Even our roadworks are struggling to stay up to standard. The Transport Asset Management Plan states that "without an appropriate increase in funding, the backlog or gap will increase, putting more pressure on our ability to meet agreed Levels of Service and continuing to impede our efforts to lift the community satisfaction survey results." How are these services expected to reach their objectives in a timely or efficient manner? The UC Greens urge Council to realign its stance on rates, taking a holistic perspective that more appropriately reflects the challenges our city is facing. Christchurch and its infrastructure cannot adequately progress to meet the needs of its citizens with the current pace of spending. Is the pretence of low rates worth maintaining when it so clearly will directly inhibit the well-being of our communities?

2848 - Glen Koorey

Opening up of covered streams and creating nice little green corridors along them has been wonderful in many parts of the city - more of this please! Any way to help promote greater use of rainwater and greywater (e.g. for gardening irrigation) by residents in their own properties?

2919 - Hayley Guglietta (Avon Ōtākaro Network INC)

Draft Ōtākaro Avon Stormwater Management Plan

We have also submitted to the Ōtākaro Avon Stormwater Management Plan and we have noted in this submission the lack of connection to the Long-Term Plan for both serious remediation infrastructure and funding and support to execute any community-led “at source” actions i.e rubbish rubbish-picking, riparian planting, education etc

The Ōtākaro Avon River corridor extends the entire length of our city, and is a source of pride and connection, it is unacceptable how we are not prioritising the improvement of its health.

292 - Ben Huang

It is necessary to pay attention to wastewater treatment and clearing of sewer pipes to reduce the occurrence of floods

2947 - Katia De Lu

2. Stormwater A lot of money is being put towards stormwater basins, but they are only one part of improving waterway health. Just a small percentage of that funding could have huge ecosystem benefits if invested in other aspects of waterway health, such as planting, naturalising stream banks, and instream habitat additions. The four pilot programmes in the Stormwater Activity Plan must be funded in every year of the LTP: - Project 1, “Conduct Multi-Value Analysis on Stormwater Treatment Methods and Technologies for Consideration in Future Projects”, must be funded for project completion in 2025, because the produced information is critical to climate adaptation. - Project 2, “Installation of Stormwater Treatment Devices to Reduce Metal Contaminant Discharge and Monitoring of Effectiveness”, must be funded for project completion in 2025, because Council is under a legal obligation to meet resource consents and should not be responsible for contaminating waterways. - Project 3, “Undertake Analysis of Stormwater Outfall Blockage and Discharge Potential Risks with Respect to Climate Change Effects and Identify Mitigation Solutions”, must be funded for project completion in 2025, because the stormwater system isn’t getting enough funding, so it’s important that the current system is used wisely. - Project 4, “Identification of Properties At-Risk of Above Floor Flooding”, must be funded for project completion in 2025, because CCC has a responsibility to all residents of the city, who only live in areas that CCC zoned for residence; it can’t now abdicate its responsibilities to those residents.

299 - Jane Nuttridge

And reducing flood risk! I'm all about reduced flood risk as I am affected by it, and was unable to use my land for 5 months of 2023 due to flood and wetness.

>>>

fix more of the flooding issues.

3000 - Simon Emmett (Thin Tanks NZ)

The infrastructure side of things is great. Our business of Thin Tanks NZ would like to work with you on water solutions. We have previously worked with Wellington Water as our product can be retrofitted almost anywhere and provides options for retention and detention of stormwater, not to mention water re-use

3003 - Sonya Hodder (Spreydon Neighbourhood Network)

We appreciate all the flood planning work that has been completed in our area. We still have concerns regarding flooding in Stourbridge Street which we will continue to monitor.

3011 - Annette Marchant

Flooding must be faced, not ignored.

3248 - Dave Edwards

[Three Waters>Waste Water (Capita)]; [Resource Recovery>Resource Recovery (Capital)]

Grey water systems and tanks for stormwater. Use for garden and perhaps firefighting

3307 - Richard Griffiths

All available funds should be directed at maintaining and improving storm water flood protection particularly for Eastern residents vulnerable to flooding from stormwater from greater Christchurch caused by developments inland.

3389 - Megan Roulston

7. Do not defer any funding to South Brighton & Southshore stormwater and flooding protection. Ensure funding is available and adequate stormwater & flood protection is built and provided now and into future

3402 - Sue Church

In July 2022 huge rainfall caused extensive flooding in Robinsons Bay Valley and the main deep drain that runs about 150m between our property boundary and the road overflowed flooding a section of our paddock and down the road. It overflowed as the drains capacity had reduced dramatically over the last few years as it filled up with debris over time and has not been maintained by the Council. A request to CCC to dig out the drains resulted in the following expensive and ineffective actions:

- ☒ A City Care engineer and Fulton Hogan engineer spent several hours in the Valley looking at the whole drainage system. They then declared there was not much money in the budget to deal with it.
- ☒ Sometime later eight staff arrived from Christchurch and spent 3 days weed-eating the entire Valley roadside and two more days clearing away grass and sticks. They informed me they were not contracted to dig out the drains, even though they could see that was what was required. Within a few weeks the grass had all grown back.
- ☒ Several weeks later a CCC worker was sent to GPS and record all of the drains in the Valley.
- ☒ July 2023 brought more heavy rain, flooding on road and into our paddock again scouring out under our fence line. More complaints led to nothing.

Still nothing is resolved and I do not expect the Council will be prepared to reimburse us for any damage to our fence where posts are being undermined by the flooding. It seems CCC are happy to use private properties such as ours and two neighbours further down the road to divert excess stormwater instead of at least trying to provide maintenance or upgrades to the existing drainage system. All the money that has been spent on this so far has not actually solved the problem. I suspect a small digger and truck to take away the soil is all that is required.

I request that the Council ensure there is adequate funding in the LTP budget for the upkeep in the drainage system on Banks Peninsula.

3411 - Marian Krogh (Protect Our Winters NZ)

Stormwater Considerable amount of money is being put towards the stormwater basins with the thought of improving water quality. Based on the current information, those basins are not providing adequate treatment. Stormwater quality is only one part of improving waterbody health, if we put a small % of that funding towards other aspects of waterway health (i.e. planting, naturalising stream banks, instream habitat additions) we could see some changes in ecosystem health.

3417 - Jack McConnell

[Strategic Direction > Climate Change]

We need more money into climate and flood protection

>>>

[Strategic Direction > Climate Change]

more towards climate / flood protection

3501 - Malcolm Long (Ōpāwaho Heathcote River Network)

14. Naturalisation of waterways has been shown by the Council's own research to save money over time through much lower life-of-asset maintenance costs. Large waterways such as the Linwood Canal would particularly suit such treatment and this has indeed been previously planned.

14.1. We **request** that 72589 - SW Linwood Canal Bank Renewals be used to progress the naturalisation of this waterway rather than repairing or replacing the current concrete walls with similar.

3535 - Anna Harper

Focus the funds on stormwater and improving infrastructure.

3582 - Cody Cooper

This needs doing ASAP, including further consideration of rapid low cost interventions for flood protection works, such as what I proposed (now completed) down The Runway where a drain was installed either side. The road no longer floods and cost would have been trivial due to the minimal work required. Residents are very happy with this solution.

3614 - Lin Roberts

1. Water ecosystems and infrastructure: First I wish to commend the council on the fantastic work done in south west Christchurch, particularly off Cashmere Road and at the corner of Sparks and Hendersons Roads, developing/restoring wetlands, water retention ponds etc. Not only do these wetlands significantly reduce flood levels downstream, they also support native biodiversity, and are very attractive and popular places for recreation – there are always many other people walking there when I go. However there is so much more still to be done to develop adaptive, multi-functional infrastructure and urban design that reinforces water sensitive behaviours and provides for intergenerational equity and resilience to climate change. I recently supervised a PhD thesis comparing Melbourne and Christchurch in their progress towards becoming water sensitive cities. While Christchurch made some significant progress in the 1990s with respect to how we handled storm water (especially adoption of the Six Values Framework), our progress in understanding and managing rainwater, groundwater, drinking water, stormwater and waste water as parts of an integrated interconnected system unfortunately now lags considerably behind Melbourne. The student, Rachel Teen, and I would be happy to share some of the research findings and recommendations with you.

3629 - Marie Graham

Equity in flood prevention is needed

3636 - Kay Robertson

I'm particularly concerned about storm events - like the Atmospheric Rivers we've seen in the North Island. Will our stop banks hold? Will our storm drains cope? Would we have landslides in the Port Hills with houses tumbling down on top of each other? Even without these disasters, the Opawa River is brown with sediment every time it rains. I hope we have people planning for this, because it will come and sooner than we think.

3660 - Alice Shanks

Since Christchurch is built on high ground deposited by a big braided river, surrounded by streams and swampy ground it is critical that drainage and stormwater is prioritised. Add in extreme rain events and higher sea levels (1 cm on average since 1920) and keeping the city dry is the main priority of Council. This means restricting building on the Port Hills to reduce the inevitable flow of loessial silt into the Ōpāwaho/Heathcote river and building detention basins when in low-lying swampy places (most of Sparks Road) are developed for housing.

3690 - Jono de Wit (Greater Ōtautahi)

We also suggest that a rapid response crew, similar to the footpath one, could be created in order to quickly respond to storm water issues during and after rain events. We request funding for stormwater and water supply be increased in the first three years of the LTP. These two areas both have reduced funding in the first three years which we consider is not sufficient investment in this incredibly important infrastructure.

* Stormwater * Considerable amount of money is being put towards the stormwater basins with the thought of improving water quality. Based on the current information, those basins are not providing adequate treatment. * Stormwater quality is only one part of improving waterbody health, if we put a small % of that funding towards other aspects of waterway health (i.e. planting, naturalising stream banks, instream habitat additions) we could see some changes in ecosystem health.

3723 - Don Babe

Also the Council needs to be congratulated on the success they have had over the past decade on flood protection by using flood water holding ponds. These double as great outdoor areas during times of better weather but could possibly be planted with more trees.

3747 - Nick Meeten

We write as a property owner, who bounds an existing box drain running along the rear boundary of our properties on Leistrella Road and Kaiwara Street in Hoon Hay. Our concern is that the box drain is at the end of its life and starting to deteriorate badly. There have been a couple of structural failures recently, resulting in localized collapses of the box drain wall and these have caused subsidence damage within properties 79 Kaiwara and 79a Kaiwara and required repairs by Council to both the box drain and to the subsidence within our properties. It is very apparent that there is general subsidence right along the length of this box drain, evidenced by sloping ground levels, cracking of grassed areas on multiple properties (not expansive soil ground cracking as it is consistent through wet and dry weather), tilting and changing fences, tilting structures and cracking of concrete in floor slabs and

driveway. The writer (XXXXXX, XX Kaiwara Street) has undertaken visual inspections within the box drain and it is clear that there will be more structural failures in the near future. Each time a failure happens, it is likely to cause more damage within our property, and the properties of our neighbors this is unacceptable to us. This box drain is also something of a safety hazard to the children who live in the area. The vertical fall from the top of one of the fences to the bottom of the box drain is about 3m, and as every parent knows, kids sometimes jump a fence to recover a ball or kite etc. even if they have been told not to. In this case our children can be seriously injured by a fall into the box drain. Instead of spending money maintaining, patching or rebuilding the existing box drain, and in the meantime retaining a safety hazard and damaging our properties in this time too, we request Council bring forward the piping and enclosing of this box drain. At the moment, the drain is easily accessible for construction.

[Attachment available showing map of affected properties and photos of issues referred to]

3758 - Mads Churchhouse

The Stormwater Activity Plan and Land Drainage Asset Management Plan of the LTP say that not enough funding has been provided for basic climate mitigation projects. Therefore, rates need to rise to accommodate these projects.

>>>

Heathcote Floodplain Management Implementation must be brought forward to 2025 in order to protect the residents of Heathcote from further floods such as the Woolston floods.

The four pilot programs in the Stormwater Activity Plan must be funded in every year of the LTP: Project 1, "Conduct Multi-Value Analysis on Stormwater Treatment Methods and Technologies for Consideration in Future Projects", must be funded for project completion in 2025, because the produced information is critical to climate adaptation. Project 2, "Installation of Stormwater Treatment Devices to Reduce Metal Contaminant Discharge and Monitoring of Effectiveness", must be funded for project completion in 2025, because Council is under a legal obligation to meet resource consents and should not be responsible for contaminating waterways. Project 3, "Undertake Analysis of Stormwater Outfall Blockage and Discharge Potential Risks with Respect to Climate Change Effects and Identify Mitigation Solutions", must be funded for project completion in 2025, because the stormwater system isn't getting enough funding, so it's important that the current system is used wisely. Project 4, "Identification of Properties At-Risk of Above Floor Flooding", must be funded for project completion in 2025, because CCC has a responsibility to all residents of the city, who only live in areas that CCC zoned for residence; it can't now abdicate its responsibilities to those residents.

>>>

The Stormwater Plan have stated within this very document that they are not being given enough money to meet their own climate change mitigation targets. Flooding and the need for stormwater infrastructure to combat it is only going to increase.

3759 - Ben Connolly

I'd like more spent on our >>> stormwater

>>>

We need to increase spending on delivering our stormwater and stop bank infrastructure, including for Spencerville.

3764 - Jack Gibbons

[Three Waters > Water Supply (Capital)]

Stormwater improvements in particular often spend millions to protect hundreds of millions of dollars worth of property, this is one of the council's most valuable programs. The city simply cannot exist without it and there needs to be expansion. I would like to see funding for stormwater and water supply be increased in the first 3 years of the LTP. It will be cheaper to spread these costs out over time and upgrade progressively. Rather than hoping the industry can suddenly expand many times over in 10 or 20 years.

3799 - Morgane Honore (Richmond Community Garden Trust)

We believe the Ōtākaro Stormwater Management Plan does not contain any provision in this LTP to support the work groups like ours are doing to stop contaminants at source.

3802 - Matthew Baird

Stormwater: A lot of money is being put towards stormwater basins, which are important. I ask that we allocate some of that funding to other aspects of waterway health: planting, naturalising stream banks, instream habitat additions. The four pilot programmes in the Stormwater Activity Plan must be funded in every year of the LTP: - Project 1, "Conduct Multi-Value Analysis on Stormwater Treatment Methods and Technologies for Consideration in Future Projects", must be funded for project completion in 2025, because the produced information is critical to climate adaptation. - Project 2, "Installation of Stormwater Treatment Devices to Reduce Metal Contaminant Discharge and Monitoring of Effectiveness", must be funded for project completion in 2025, because the CCC is under a legal obligation to meet resource consents and should not be responsible for contaminating waterways. - Project 3, "Undertake Analysis of Stormwater Outfall Blockage and Discharge Potential Risks with Respect to Climate Change Effects and Identify Mitigation Solutions", must be funded for project completion in 2025, because the stormwater system isn't getting enough funding, so it's important that the current system is used wisely. - Project 4, "Identification of Properties At-Risk of

Above Floor Flooding”, must be funded for project completion in 2025, because the CCC has a responsibility to all residents of the city, who only live in areas that the CCC zoned for residence; it can’t now abdicate its responsibilities to those residents.

>>>

Please bring forward the Heathcote Floodplain Management Implementation so that residents of Heathcote are protected from future damage from flooding. Another effective protection against flooding is to make our city "spongier". Overseas, cities that have pulled up paved areas and made more rain gardens have had great success in reducing stormwater pressure during high rainfall events. These are only going to get more common as the impacts of climate change increase. Sponge cities also benefit from more green space, which as mentioned earlier is good for the health of the people and biodiversity. The CCC should be rejecting consents on land that is going to be at risk of sea level rise and flooding.

3839 - Samantha Dryden

floodplain management implementation, and nature-based stormwater solutions should be prioritised more, meaning they should receive more financial investment and be brought forward in time.

>>>

These are all good things, but I think even more could be invested into >>> stormwater.

3898 - Richard Smith

Need to minimise the costs to be spent on stormwater treatment upgrades Need to focus on non-mechanical stormwater treatment - adding treatment devices will cause long-term operational costs - all private developments with infrastructure to vest in Council should be mandated as no mechanical devices - the developer should make the space available for natural treatment methods (lowest possible operational costs as a mandate).

3968 - Joseph Fullerton (UC Climate Action Club)

[Spending > Capital Programme (General)]

- Heathcote Floodplain Management Implementation must be brought forward to 2025 in order to protect the residents of Heathcote from further floods such as the Woolston floods.
- The four pilot programs in the Stormwater Activity Plan must be funded in every year of the LTP:
 - Project 1, “Conduct Multi-Value Analysis on Stormwater Treatment Methods and Technologies for Consideration in Future Projects”, must be funded for project completion in 2025, because the produced information is critical to climate adaptation.

- Project 2, “Installation of Stormwater Treatment Devices to Reduce Metal Contaminant Discharge and Monitoring of Effectiveness”, must be funded for project completion in 2025, because Council is under a legal obligation to meet resource consents and should not be responsible for contaminating waterways.
- Project 3, “Undertake Analysis of Stormwater Outfall Blockage and Discharge Potential Risks with Respect to Climate Change Effects and Identify Mitigation Solutions”, must be funded for project completion in 2025, because the stormwater system isn’t getting enough funding, so it’s important that the current system is used wisely.
- Project 4, “Identification of Properties At-Risk of Above Floor Flooding”, must be funded for project completion in 2025, because CCC has a responsibility to all residents of the city, who only live in areas that CCC zoned for residence; it can’t now abdicate its responsibilities to those residents.

3971 - Joseph Fullerton

[Strategic Direction > Have we got the balance right?]

No. This Long Term Plan is vastly insufficient in every regard. >>> Not enough money has been given to stormwater asset management and activity, which includes flood protection. All projects requesting funding under the Stormwater Activity Plan and Asset Management Plan must be funded for 2025 completion.

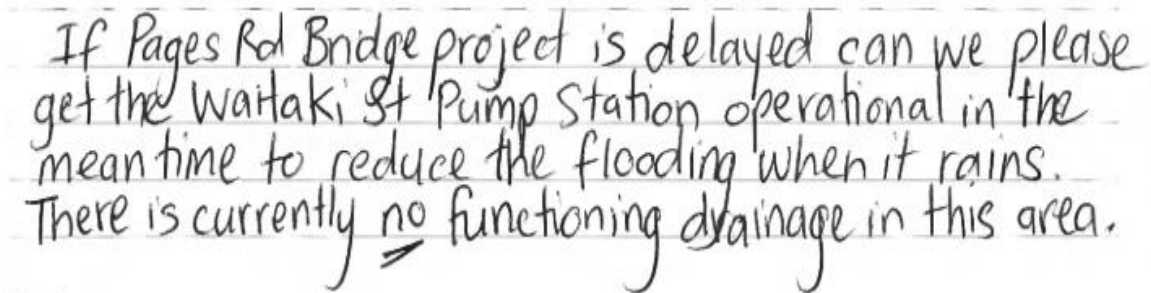

o Heathcote Floodplain Management Implementation must be brought forward to 2025 in order to protect the residents of Heathcote from further floods such as the Woolston floods. o The four pilot programs in the Stormwater Activity Plan must be funded in every year of the LTP: § Project 1, “Conduct Multi-Value Analysis on Stormwater Treatment Methods and Technologies for Consideration in Future Projects”, must be funded for project completion in 2025, because the produced information is critical to climate adaptation. § Project 2, “Installation of Stormwater Treatment Devices to Reduce Metal Contaminant Discharge and Monitoring of Effectiveness”, must be funded for project completion in 2025, because Council is under a legal obligation to meet resource consents and should not be responsible for contaminating waterways. § Project 3, “Undertake Analysis of Stormwater Outfall Blockage and Discharge Potential Risks with Respect to Climate Change Effects and Identify Mitigation Solutions”, must be funded for project completion in 2025, because the stormwater system isn’t getting enough funding, so it’s important that the current system is used wisely. § Project 4, Draft Long-Term Plan 2024-2034 from Fullerton, Joseph “Identification of Properties At-Risk of Above Floor Flooding”, must be funded for project completion in 2025, because CCC has a responsibility to all residents of the city, who only live in areas that CCC zoned for residence; it can’t now abdicate its responsibilities to those residents.

3998 - Ben Alder (Christchurch Envirohub)

[Transport > Roads (Capital)]

CEH is contracted to provide stormwater education, utilising the part CCC-funded Stormwater Superhero Trailer. Roading surfaces attract/hold contaminants that, with rain, contaminate the stormwater system and compromise fresh water quality. Increased car use will contribute to this problem, compromising further the council's fresh water quality targets.

4016 - Joanne Zervos

If Pages Rd Bridge project is delayed can we please get the Waitaki St Pump Station operational in the mean time to reduce the flooding when it rains. There is currently no functioning drainage in this area.

570 - Greg Partridge

Stormwater retention ponds: Regarding proposed stormwater retention ponds between Avonside Drive and Lychgate Close, alternative sites like the neighbouring large completely barren land at the southern end of Beverley Park and vacant land south of Lychgate Close on Stanmore Road (both of which are owned by the CCC) should be considered as the location on which the ponds will be constructed in order to avoid further tree loss and enhance environmental benefits.

>>>

Stormwater retention ponds: Regarding proposed stormwater retention ponds between Avonside Drive and Lychgate Close, alternative sites like the neighbouring large completely barren land at the southern end of Beverley Park and vacant land south of Lychgate Close on Stanmore Road (both of which are owned by the CCC) should be considered as the location on which the ponds will be constructed in order to avoid further tree loss and enhance environmental benefits.

>>>

Regarding proposed stormwater retention ponds which are proposed to be constructed on tree covered land situated between Avonside Drive and Lychgate Close, the Council should relocate them to large alternative barren sites, such as the neighbouring southern portion of Beverley Park and the vacant land south of Lychgate Close along Stanmore Road. both site are owned by the CCC should be considered if the Council genuinely want to avoid further tree canopy loss, the risk of future liability and financial risk costs associated with earthquake land damage, and to achieve enhanced environmental benefits.

>>>

Regarding proposed stormwater retention ponds, alternative sites like the bare southern portion of Beverley Park and vacant land further south of Lychgate Close along Stanmore Road, both of which are owned by the CCC, should be where the stormwater retention ponds are located to avoid further tree loss and enhance the associated environmental benefits

639 - Paul Clark

Need a fly over in logging areas that don't clean up after themselves then block waterways in large rain events proactive.

6902 - Jim Burton

[Full Attachment Available]

Introduction of Rain water tanks at each house with different sizes. This would take the pressure off the water-main treated system.

Sewage waste is divided from Storm water and the grey water? eg. Washing machines, Showers, Bath and Bath hand Basin.

Keeping in mind the need for having a Storage of water for fire protection, Water tanks high on Hills, plus swim pools and other Storage Sources of water. eg. small lakes et.

6904 - Jean McIntyre

SERVICE THE 'CULVERTS BEHIND PROPERTIES
BETWEEN TUKUDES + STURROCKS RD
— were overgrown + THIS
FLOODS IN HEAVY RAIN!

Capital programme

706 - Rachel Dawick

There's no focus here on the need to protect the waters from pollution by addressing the run off from the farming. In just over five years Lyttelton has gone from a family recreational place safe to swim in Corsair and Cass Bays to an unsafe swimming place denying a fundamental human right because of a failure to manage farm waste.

977 - Bridget Stokes

[Other/Special Interest Topics > Creating a Climate Fund]

Before any Climate adaptation work the Council should fix all old and problematic stormwater issues- 1944 storm waterways and culverts are not coping with normal rain (which is often fibbed off at 1 in 7 year rainfall event) this needs addressing by the Council first before climate change portfolios.

Not Stated

1067 - Iarene Jelley

Water is a most important asset, more valuable than gold, and on follows waste and storm waters.

1071 - Brian Donovan

More creative ways to deal with storm water.

1098 - Eric Pawson

[Strategic Direction > Climate Change]; [Other/Special Interest Topics > Staff Matters]

I'd like to see teams within CCC talking to each other. I've just come from a meeting about the stormwater management plan where the staffers said (openly) they knew nothing about what is planned for the OARC, where there is a huge level of expenditure intended that is pretty focused on stormwater management. My comments about climate change policy are partly prompted by the impression that this is an area of policy that falls between teams and no-one really prioritises it.

1164 - Andrea Davis

The idea of a sea level rise is that we absorb the water in what is known as a sponge city. I am a Landscape Architect and Chair on Sumner Community Residents Association. The investment in stop banks, and pumps that need power to operate leave us more vulnerable as found in large storm events, as the residents of New Orleans after Katrina when all the pumps failed and the sea walls trapped the water on the wrong side of the wall. The city needs to absorb and filter surface water with rain gardens and trees along each street in CHCH.

1216 - Glenn Maguire

[Strategic Direction > 2.8-Additional Savings & Efficiencies]

Allowing the extraction of more river gravel this has two benefits it reduces flood risk and allows extra income to the chch economy. Our aggregate is awesome and we should be exporting it.

1469 - Susan Grant

the use of retention basins are a really good option for flooding reduction particularly on th heathcote

as the levels drop much faster than in the past. they are also good for wading birdlife within city limits

1998 - Grace Robinson

[Three Waters > Water Supply, Stormwater & Land Drainage], [Fees & Charges > Building Consents], [Other/Special Interest Topics > Social Housing], [Transport > Cycleways]

In addition to advocating for increased operational and capital spending to enhance services, including safety audits for buildings, water chlorination, and community housing provision, I urge the Council to prioritize essential projects such as major cycle routes and stormwater management initiatives. These projects are vital for the well-being and safety of our community and must receive adequate funding and priority.

2057 - Alicia Moggre

Water infrastructure spending >>> needs to be prioritised above almost all else. I don't have the expertise to judge if this is what the above numbers relate to.

2060 - Liv van Workum

Managing our storm water drains and waste systems is essential to the health and longevity of this city, as is drinking water which I remember a time when we were known for having the best. It's been disappointing to hear of the nitrogen levels showing up in recent tests. Climate change is upon us and we must prepare.

3479 - Rhys Glenjarman

Storm water needs improvement in many areas and will decrease the issue of the unpleasant smell in many areas of the city. Thank you for improving the stormwater where possible.

3483 - Jo Bethell

I am a strong advocate for green infrastructure e.g rain gardens, maximising opportunities for stormwater mitigation through naturalised environments.

3528 - Mark Wilson

Some things CCC has the right operational spending balance right, other things not so. The maintenance on some of the storm water drains in the Innes Ward especially along Aylesford St is just plain shambolic. The repairs to quite honestly dangerous drains is poor, and the fact that they continue to be regarded as adequate and safe shows they are not being managed properly.

3619 - David Fuffy (Richmond Residents' and Business Association)

As the O.A.R.C assumes greater responsibility in the management and over plans in the area, the R.R.B.A. would like to continue to be consulted in regards to the Ōtākaro Avon floodplain management plan. Our suburb sits on the edge of the Ōtākaro Avon from Fitzgerald Ave to Banks Ave, and there are some amazing groups working hard to develop the RRZ area in our suburb. It would be good to have input to ensure we are not being unnecessarily cut off from our river resource without having a say in what we would like to see as a community.

>>>

The Ōtākaro Avon Stormwater management plan was recently consulted on. This plan does not link back to the LTP and is very loosely connected to the OARC Red Zone work. We do not see how this strategic management plan can be implemented if there is no provision for it in budgets. The plan

outlines the need for a joined up approach but the expectation is that the community will do this work entirely voluntarily and there is no connection between the Stormwater needs up stream and the work going on in the OARC. This is important to us as Dudley Creek traverses our suburb. We need to ensure there is sufficient investment in maintenance and support for the community group's input and for communication between water project teams and OARC projects teams. There is no evidence of the coordinated approach necessary for successful outcomes in this important work.

3621 - Morgane Honore

Stormwater Management: Enhancing stormwater management infrastructure is vital for mitigating the impacts of flooding and erosion, particularly in the face of increasingly severe weather events due to climate change. This includes projects focused on improving drainage systems, constructing flood protection measures, and implementing green infrastructure solutions.

375 - Alex McNeill

Ōtautahi is such a great place to live. I've loved living here for the past 13 years, and I'm looking forward to the rest of my life here. The things that make it great are the things we need to protect by investing in them and not shying away from difficult decisions. E.g. ease of getting around without relying on a car - boost our bus and bike infrastructure. Easy to access green spaces - continue tree planting. Reliable drinking and storm water - invest in upgrading our systems so that they are resilient against climate change. Yes, this rates increase is expensive during this cost of living crisis. We need to be careful to support our less well-off ratepayers.

These are all very important. Three Waters is immediately critical and requires lots of investment for future

3862 - Katharine Metherell

New housing developments are not forced to look at the holistic plan for connective networks for biodiversity to parks. I moved into Halswell 5 years ago and had regular visits from Keruru and could here frogs in the ponds. Now ditches are being piped and so surface diversity lost

4021 - Cornelis F De Jager

[Planning & Strategic Transport, Urban Design, & Urban Regeneration > Coastal Hazards Adaptation & Adaptation Planning], [Other/Special Interest Topics > Creating a Climate Fund]

Whether we consider "climate change" a risk or not, we should be future planning, especially in the areas of flood risk and coastal inundation.

4032 - Paul Dietsche

You're not prepared for the deluge to come

452 - Mark Penrice

[Other/Special Interest Topics>Creating a Climate Fund]

We also need to accept that we cannot stop the sea and will need to retreat (stopbanks will mean we turn the city into a bathtub we need to drain by pumping).

467 - Anna Scheirlinck

[Three Waters>Three Waters (Operations); Three Waters>Waterways Quality & Compliance]

Focusing on three waters is critical but it needs some serious compliance enforcement as there are businesses and individuals who are taking far more than their share without repercussion. Our city's water is becoming toxic and our stormwater is a flood risk. Put some money into enforcement as well as the infrastructure.

Waterways Quality & Compliance (Operations)

General Comments

53 submissions were received addressing waterways quality & compliance (operations).

13 comments supported, and 2 comments opposed.

28 comments suggested what could be done differently, and 12 comments provided general feedback addressing waterways quality & compliance (operations).

Officer Response

Submitters raised a number of issues with regards to 3 Waters Quality and Compliance:

Comments were in two main workstreams -

Healthy Waterbodies

A number of submitters commented on Healthy Waterbodies programmes, needing to support climate change, sustainability and biodiversity initiatives. There is strong support for waterway

protection, restoration and reduction of contaminants and continuing with flood protection works and calls for increased funding for the waterways.

- The Council is working hard to improve waterbody health across the district. We have developed a Healthy Waterbodies Action plan that outlines objectives, goals, and measurable actions to improve waterbody health. Some of these objectives include improving surface water quality, providing sufficient instream habitat for native species and having diverse and extensive riparian margins. Council projects around waterways are required to have a freshwater ecologist involved to ensure effects on the waterway are minimal, this involves guiding physical works as well as planting appropriate riparian species. Council also has a detailed fish passage barrier prioritisation and remediation programme that focuses on fixing high priority barriers and opening up upstream habitats for native species. It is important to note that improving waterbody health takes a whole community approach from reducing contaminant inputs into waterways to large stormwater treatment projects. One of the ways that this is achieved is through funding partnerships with the communities. Staffing of the part of the ecologist function has been reviewed and specialist ecologist consultants have been engaged for specific tasks.
- The three waters programme is sized to achieve regulatory and consent compliance, replacement of aging (leaking) assets and allow for population growth in the city. Replacement of the oldest and failing assets is also a priority. As part of the planning activity to achieve the above compliances, climate change impacts, biodiversity initiatives, flooding impacts and restoration opportunities are all factored in at an early stage. Levels of funding are reviewed at each annual plan/Long Term Plan and requested accordingly.

Drinking Water Quality

There were also many comments on drinking water quality, chlorination, fluoridation and nitrate levels and the need to get back to having drinking water free from chemicals. Alongside this were some comments on reducing the leakage rates in the water supply network.

- Christchurch's source water continues to be of exceptional quality. We are hopeful that most of our 126 bores will be able to demonstrate that they meet the 'Class 1' definition in the new Drinking Water Quality Assurance Rules (similar to the 'secure' category that we met under the previous regime). 'Class 1' will give protozoa compliance for these sources. In the past we were able to demonstrate bacterial compliance through monitoring to show the absence of bacterial (E.Coli). The Drinking Water Quality Assurance Rules now require a treatment barrier such as Chlorination or UV is installed to be able to meet bacterial compliance requirements. In addition, the Water Services Act requires 'residual disinfection' within the distribution, and this is only possible if chlorination is installed. The 'temporary' chlorination units installed in 2018 are not able to meet the required rules and need to be replaced with permanent chlorination units. Fluoridation: Council has not yet been required to add fluoride into the water supply. It would be a requirement made by the Director General of Health as it is a public health matter rather than being about safe water. Because Christchurch currently has 44 treatment plants across the city adding fluoride would be a particularly complex and costly addition if required.

- Fluoridation: Council has not yet been required to add fluoride into the water supply. It would be a requirement made by the Director General of Health as it is a public health matter rather than being about safe water. Because Christchurch currently has 44 treatment plants across the city adding fluoride would be a particularly complex and costly addition if required.
- Nitrate levels are monitored from approximately 40 bores across the city each month. Levels remain well below 0.5% of the Maximum Allowable Value in the Drinking Water Standards for NZ 2022 and show no indication of increasing.
- Levels of service and drinking water losses: Decreasing the water losses to 20% by 2030 and then 15% by 2034 is an increase in the level of service. Less water being lost between extraction from wells and delivery to customers translates to the network being in better condition with reduced leakage through broken or damaged pipes.
- All of the above points are covered under existing levels of service and budgets in the draft LTP except fluoridation (which we are not yet required to implement).

Support

1491 - Lindsay Richards (Westmorland Residents Association)

[Three Waters > Water Supply (Capital)]

[Three Waters>Waterways Quality & Compliance (Operations)]

Please make our water drinkable and our rivers and lakes swimmable.

1790 - Hayley K

Yes to improving the drinking water

2105 - Tawhai Darnielle Te Karu

• more funding to clean rivers and water ways.

2106 - Courtney Reid (Pūharakekenui Styx Living Laboratory Trust)

[Parks > Tree Canopy]

The continued commitment to develop healthy water bodies and increasing tree cover as part of building a healthy city, and the specific inclusion of these outcomes in the Reducing Emissions target. The implementation of the urban forest plan.

2110 - Jennifer McMaster

[Libraries>Libraries (Operations)]; [Grants & Funding>Arts Centre Funding]

More funding into clean waterways and greening
the city as well as libraries and ~~the~~ art centers.
poisonous

2538 - Libby Ornsby

[Parks>Parks Maintenance]; [Libraries>Libraries (Operations)]

Perhaps it's a use it or lose it situation. The libraries provide a wonderful service and space where people come together and learn. Parks are essential and waterways need maintaining, they are natural spaces we by default need to protect and maintain access for public safety

2595 - Nicola Hely

I am glad to see the restoration work happening on the stream that runs through it near the netball courts, but would like to see this happen along the entire waterway.

2923 - Amanda Peter

key really - >>> and protecting waterways

2996 - Stephanie Damm-Logan (Guardian Films)

[Spending > Our Proposed Spending]

Water quality should be far more prioritised, \$2.7 is not enough to manage this resource properly.

3483 - Jo Bethell

I am pleased to see the spending on improving our rivers, - in particular the riparian areas.

3743 - Ben Ellis

Improving our water quality would be fantastic as well.

3800 - Rachel Barker

In summary, I support operational priorities of: >>> rivers and streams

3881 - Anne Scott

[Parks > Biodiversity & Ecological Restoration]

How the city handles waterways combined with plantings and increased biodiversity has been great and needs to continue.

Oppose

3614 - Lin Roberts

As well as funding for drinking water pipe repair and maintenance, funding is also required to implement the Healthy Water Bodies Action plan which details holistic goals and targeted for waterway health outside of stormwater quality and to reach those targets in that plan. The very small waterways restoration budget is inadequate.

3637 - Sam Davidson

The reduction from two waterways ecologists to one is a decision that moves in the opposite direction of what is required for sustainable water management in Christchurch.

Other

1119 - Christine Rose (Māui and Hector's Dolphin Defenders NZ Inc)

Manage waste and rubbish to avoid marine pollution to keep Hector's safe

1474 - Céira Dernhagen

[Three Waters>Stormwater & Land Drainage]; [Planning & Strategic Transport, Urban Design, & Urban Regeneration>Coastal Hazards Adaptation & Adaptation Planning]; [Other/Special Interest Topics>Creating a Climate Fund]; [Strategic Direction>Have we got the balance right?]

Clean Water and Climate Resilience: Water protection and climate change adaptation are essential. I encourage: Why it's personal I am originally from a place that has experienced and is experiencing an increase in wildfires. A little over a decade ago almost my entire town was wiped out by a runaway wildfire due to poor management and climate change induced heatwaves. I want to make sure our home is ready for our changing climate. Solutions Rigorous protection of waterways through stormwater management, reduced pollution, and natural filtration systems. Increased investment in infrastructure designed to withstand the impacts of climate change (e.g., flooding and sea-level rise), including nature-based solutions. Accelerate Adaptation efforts - invest much more than the laughably small 1.8 million per year Climate Resilience Fund - Expand the program. Start the plan immediately and invest more than the current proposal. We have created enough climate debt for our Rangatahi. It's time to properly invest in their future.

1504 - Jonathan Kingston-Smith

Reduce chemical additives into our drinking water.

1512 - Denis McMurtrie

I also feel as part of water we need to enhance more streams with native vegetation where practicable to encourage native species especially Tuna.

1585 - Rachel Smith

Parks and waterways and caring for our natural spaces is important for biodiversity and health of the people

2678 - Fiona McKenzie

Please protect our waterways from industry and farming pollutants. Water is everything

>>>

Again, please do whatever it takes to protect our water. And charge the bloody polluters. Yes, even if they're farmers

2734 - Sharon McDonald

Making sure that the rivers are well managed with dredging and maintenance of its edges also the creeks and streams are also looked after properly by clearing the debris and weeds.

2796 - Annelies Pekelharing

[Three Waters > Water Supply (capital)]

Water from aquifers safe to drink without additives, and rivers should be safe for swimming.

2819 - Beth Rouse (Avebury House Community Trust)

[Strategic Direction > Our Treat Relationships]

Avebury House lives on the OARC. Our local heritage revolved around its early development and today we have come full circle as our area is again shaped by the river's restoration.

Funding for the green infrastructure and community- and iwi-led development that will drive that restoration is a priority for the city. Bringing back health to our waterways and natural regeneration were the top priority of respondents to the Regeneration Plan many years ago; we do not believe those priorities have changed. The Christchurch City Council should be enabling such projects, not withholding the necessary funding.

We strongly encourage Council to embrace co-governance and allow the city to benefit from the widest range of knowledge and expertise around waterways and ecosystem recovery.

As we enter more climate uncertainty, water and how we manage it will only become more critical. An excess user charge seems very reasonable, while ensuring it does not disproportionately disadvantage lower socio-economic residents.

2860 - Ruth Grey

Keep fluoride out of the water. No body dies without fluoridation. Education for dental hygiene, lifestyle choices and limiting sugar is the key. Don't force people who DO look after their to have fluoridated water. The research shows that it is no significant benefit for the teeth of growing children but potentially has other health implications. Most of the world DONT fluoridate their water so let's not. Fluoride is a significant toxin and I don't want or need it in my water. I absolutely despise chlorine in the water. The water tastes disgusting. For the entire existence of Chch we haven't had it and the fear of a contamination is just not a good enough argument. Let's just take that risk like we do everyday we walk out of our house, drive a car, ride a bike and fly in a plane. Continue fixing the infrastructure (as is being done) but get rid of the chlorine. The smell makes me feel ill and my skin reacts to it. It's not the only way to purify water so use an alternative or just go back to how it was before chlorination. I have been researching the levels of chlorine Chch uses and it's way too much anyway so just stop!! From what I understand, the levels exceed WHO levels. How could that even be allowed to happen?

2934 - Monica Richards

We need to stop the nitrate levels as these increase health and environmental costs. A few less cows and fertilisers will have holistic benefits

2947 - Katia De Lu

- Increase the waterways restoration budget to achieve the goals and targets in the Healthy Water Bodies Action Plan.

3372 - Jenny Bond (Te Tuna Tāone)

It would be useful and help people better understand your commitment to protecting our waterbodies by distinguishing waterbodies from stormwater and flooding. And simultaneously showing your allocation of budget between these three elements.

3411 - Marian Krogh (Protect Our Winters NZ)

Waterways restoration budget. We need funding to reach those targets. Need to advocate for funding. Healthy Water Bodies Action plan which details holistic goals and targeted for waterway health outside of stormwater quality. To implement that plan and reach those targets, more funding is required CCC has a very small waterways restoration budget, which is shown to be cut going forward. The amount of money we are asking for over a 10 yr period is the equivalent to 1 or 2 stormwater basins.

3501 - Malcolm Long (Ōpāwaho Heathcote River Network)

- 5.8. Further indication of a lack of biodiversity focus is the level of funding for the planting of indigenous species as a means of waterway restoration by the Three Waters team. This activity, which one might assume was an important aspect to the Three Waters operation, is significantly hampered by an entirely inadequate level of funding for planting on riverbanks.

>>>

- 5.11. We **request** an appropriate increase in operational funding, if required, to employ a minimum of six ecologists within Council including the immediate appointment of a further ecologist in the Three Waters team.
- 5.12. We **request** appropriate funding for pest plant management is allocated to Three Waters, in addition to any allowance made for this activity in specific projects.

[Full attachment available]

>>>

9. The Port Hills are a taonga for the city but the sediment eroded from these hills continues to be the most significant contaminant of the Ōpāwaho Heathcote River. The greatest proportion of sediment entering the river originates in the Cashmere Valley, although all tributaries of the river, including stormwater drains, contribute unacceptable sediment levels after rainfall. Fixing the

problem of sediment will be a multi-generational issue, but climate change means that we must begin addressing the issue now.

- 9.1. We are pleased to note that the Parks and Foreshore Activity Plan states that the Port Hills Plan will be developed over 2024. It is vital that this plan is not delayed. As a stakeholder, we look forward to early involvement in its creation.

- 9.2. Unfortunately, the recent Port Hills fire has increased the importance of a recovery plan and increased the risk of doing nothing to remediate the situation on the Port Hills.

- 9.2.1. We **support** the minor allocation to 43478 - Port Hills Fire Recovery on the understanding that further funding will be allocated once a recovery plan is established.

- 9.2.2. We support the following allocations:

- 9.2.2.1. 75712 - Port Hills and Banks Peninsula Habitat Restoration

- 9.2.2.2. 69218 - SW Port Hills Revegetation and Sediment Control Stage 1

- 9.3. Given the importance of reducing sediment erosion from the Port Hills, it is unfathomable to us that 60356 - Programme - SW Port Hills and Lyttelton Harbour Erosion & Sediment should have its allocation greatly reduced. The need and importance of preventing erosion is widely accepted. There is a current and on-going need to address the issue with every possible available dollar.

3601 - Bridget Allen

more education is needed around stormwater and reducing contaminants going in to our waste water. Our rivers need to be protected

3690 - Jono de Wit (Greater Ōtautahi)

* Waterways restoration budget. We need funding to reach those targets. Need to advocate for funding. * Healthy Water Bodies Action plan which details holistic goals and targeted for waterway health outside of stormwater quality. To implement that plan and reach those targets, more funding is required * CCC has a very small waterways restoration budget, which is shown to be cut going forward. The amount of money we are asking for over a 10 yr period is the equivalent to 1 or 2 stormwater basins.

3759 - Ben Connolly

Maintaining the budget for the waters unit's rolling natural waterways delivery package.

3779 - Layling Stanbury

for water networks: stop treating our streams like drains. Clean waterways should be our top priority.

3799 - Morgane Honore (Richmond Community Garden Trust)

Water

Our focus on mahinga kai requires that the health of our river and surrounding ecology as a priority, we wish to continue riparian planting in the Dudley Stream and Otakaro River, rubbish clean ups and regular water and biodiversity testing, we signed the waterways partnership agreement but we need resources and funding to help us with these programs.

3824 - Di Lucas

[Planning & Strategic Transport, Urban Design, & Urban Regeneration > City Planning], [Strategic Direction > Climate Change], [Parks > Biodiversity & Ecological Restoration]

Sustainable management is crucial.

Better protection of high value soils for food production is also needed.

Also both the climate crisis & the biodiversity crisis need to be better recognised, such as in management of council/public lands across the city including riparian areas.

3875 - Maureen McCloy

Also, restoration of our waterways >>> should be high priorities - I am concerned about the significant deterioration of our natural environment, that has occurred within my lifetime, and the state we are leaving it in for those who come after us.

3893 - Joe Pope

Fix water contamination by penalising big polluters

3949 - Fay Brorens

Council must take >>> water pollution >>> seriously.

>>>

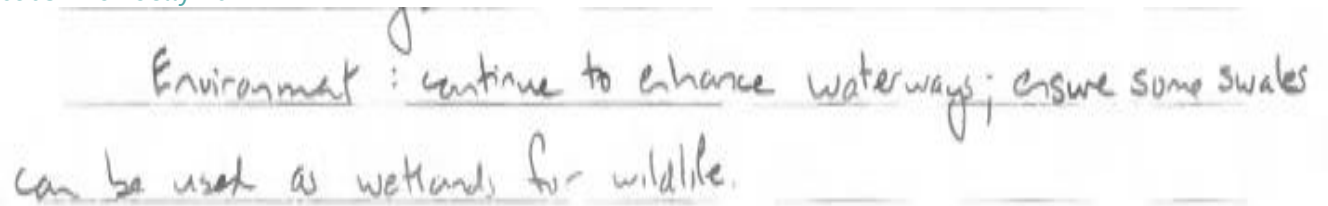

Pressure government and ecan to lower nitrogen fertilizer pollution in the water that leaves farms, it is not OK to risk the water the city relies on.

4000 - Kari Barr

[Parks > Biodiversity & Ecological Restoration]

More spent on Estuary water quality - pests such as Australian Black Swan and Canadian Geese have ruined the eco system and polluted not only the water, but our parks - Ascot, Bower park, Bexley. Children can not run or play in these areas due to the bird shit. We need to cull these now

6903 - Don Jellyman

Environment: continue to enhance waterways; ensure some swales can be used as wetlands for wildlife.

693 - Jamie Innes

Please do whatever you can to improve water quality in lyttelton harboyr. The ecosystem there is not healthy.

920 - Marie Porter

Please address and fix our city drinking water 27% leakage!

Not Stated

Wouldn't it be nice to get rid of the chlorine from our drinking water, that would save you a few \$

2475 - William Porter

Our streams are badly managed.

2837 - Deborah Harwood

CCC needs to do more about nitrates in the water if you are going to charge me for it.

>>>

I would like the CCC to start addressing nitrate levels in the city water supply. Cancer rates in New Zealanders are unacceptable.

>>>

Please address nitrate leach into drinking water.

>>>

Nitrate levels in NZ water are unacceptable.

3121 - Janet Foley

We would like to see CCC pursue the removal of chlorine from our drinking water as soon as possible.

3411 - Marian Krogh (Protect Our Winters NZ)

We have also gone from a team of 2 waterways ecologists to 1 which means there is even less capacity to ensure council projects are resulting in good outcomes for waterway health. This also means there is lack of oversight on private projects around waterways which require resource consent. This is due to capacity internally.

3535 - Anna Harper

Clean waterways are essential

3615 - Janine Clarke

If we look after our environment it will look after us. This includes: - preventing erosion by maintaining planting and development, rivers and streams - preventing flooding by maintaining streams and waterways This in turn will produce an environment that is attractive to live in

3690 - Jono de Wit (Greater Ōtautahi)

* We have also gone from a team of 2 waterways ecologists to 1 which means there is even less capacity to ensure council projects are resulting in good outcomes for waterway health. This also means there is lack of oversight on private projects around waterways which require resource consent. This is due to capacity internally.

3826 - Kate Cleverly

[Parks > Tree Canopy]

Regenerating the waterways and tree cover should be a priority.

422 - Nias Kitchin

I do believe that are waterway systems are a priority

467 - Anna Scheirlinck

[Three Waters>Three Waters (Operations); Three Waters>Stormwater & Land Drainage]

Focusing on three waters is critical but it needs some serious compliance enforcement as there are businesses and individuals who are taking far more than their share without repercussion. Our city's water is becoming toxic and our stormwater is a flood risk. Put some money into enforcement as well as the infrastructure.

865 - Kelvin Duncan

[Strategic Direction - Climate Change]

Support you efforts on drinking water etc. Sports and recreation is good for people, but if push comes to shove they may have to be cut. I am dubious about climate change. Mitigation of proven threats is necessary, but otherwise

Waste Water Treatment Plant (Insurance & Repairs)

General Comments

44 submissions were received addressing the waste water treatment plant (insurance & repairs).

7 comments supported, and 1 comment opposed.

18 comments suggested what could be done differently, and a further 18 provided general feedback addressing waste water treatment plant (insurance & repairs).

Officer Response

The main issue raised by the submitters is the delay in the insurance negotiations and the subsequent repair of the fire damaged facilities at the Wastewater Treatment Plant. The delays are causing a significant effect on the community from the ongoing odours.

Council is working with the insurer on the claim resolution for the fire damaged trickling filters and are very aware of the impacts the delay is having on the community.

To help this process, investigation and design work to restore the trickling filters is underway and progressing well.

Staff continue to do all they can to reduce the odour as quickly as possible and are making changes to processes at the plant on a weekly basis. The website is being updated weekly with information about this.

Also, planning is already happening for the future of the plant in terms of renewals and capacity, and significant funding is in place in the draft LTP to carry out this work.

All of the above points are covered under existing levels of service and budgets in the draft LTP.

Support

1874 - Liam Brown

Please fix the Bromley Sewage plant

2297 - Andrew Walker

Replace the trickling filters at the WTP instead
of using expensive and time wasting Bandgids.
The longer you muck about the more it costs
US!

3092 - Kitty Moran

Wastewater improvements are sorely needed, especially for Bromley residents. We're still living in stench!

3094 - Daniel Smith

The wastewater treatment plant should be repaired as soon as possible

3127 - Dianne Downward

Replacing and updating our sewage plant is important.

3869 - Cam Parsonson

Wastewater treatment plant insurance claim needs to be sorted and progressed asap.

>>>

Fix the wastewater treatment

489 - Barry Livermore

Fixing our sewage treatment plant should be an urgent focus. Not doing this is really just sticking it to the most vulnerable citizens.

Oppose

3010 - Jan Cook

Capital Programme. ID 596. WW Akaroa Reclaimed Water Treatment and Reuse Scheme. I oppose the budget for this scheme. While I understand the desired objective to end the discharge of wastewater to Akaroa Harbour, it is becoming increasingly apparent that the proposed scheme will not have the capacity to safely deal with the volume of wastewater, both treated and untreated, during prolonged wet weather. The reason for this is the high level of infiltration of stormwater and ground water into the sewer network. This coincides with an inability to safely dispose of the treated wastewater when land irrigation areas are already saturated. The proposed Scheme does not meet the Infrastructure Strategy, outlined on page 17 of the LTP Consultation Document relating to sustainability, affordability, and climate resilience. Poor data quality has not enabled good decision-making. The Scheme does not meet the objectives of the Integrated Water Strategy 2019 to eliminate, or minimise the effects of, wastewater overflows. At a time when 13.24% rate rise is being proposed is not prudent or responsible to spend \$93.5 million (on top of \$13.9m already spent) for this Scheme, unless there is absolute certainty that it can deliver the desired benefits. I request that the Akaroa Reclaimed Water Treatment and Reuse Scheme is put on hold. I request that funds are diverted to repair of the sewer pipe network to enable climate resilience and to avoid the current and future effects on water quality at Akaroa's beaches and surrounding areas.

Other

1385 - Bernice Kilkelly

Please please, get the bromley wastewater plant back up and running CORRECTLY. These temporary measures are not doing us any good. It shouldnt take this long. Our health in the east is important.

1644 - Abigail Sykes

The wastewater treatment plant needs to be fixed asap.

1690 - Richard Suggate

Expedite the removal of the smell from Bromley.

1963 - Lynda Goodrick

Waste water - must be a priority. What the heck is the management done/doing since the fire?! You need to get back to the basics of getting the plant running with the incredible knowledge that is never listened to at the plant - the team that keep the city operating 24/7 not the management who are never seen

2263 - Scott Babington

Just checking that an upgrade/fix is budgeted for the sewage treatment plant at Bromley - it still stinks. :(

2844 - Albert Nisbet

The air still smells in north east Christchurch, so fix the source of that.

2852 - Aaron Ghattas

The floc tanks at the sewages plant needs to rebuilt with urgency. This incident outlines CCC inability rebuild and restore.

2856 - Rachel Puentener

I strongly support all work to reduce the impacts of the current smell and odour in the Bromley area

2939 - John Thomsen

Plan to invest in new/better systems for the CHCH water treatment plants for the future.

2963 - Carolyn Roos

As technology gets better our troubles with smells will too

3078 - Adele Bishop

Sort out the terrible smell for people in the east.

334 - Clare Marshall

Why is our wastewater plant still unfixed and stinky? Please fix this as a priority.

>>>

fix the wastewater facility as a priority. The stench it produces makes Christchurch feel like a city in the developing world.

3420 - Jade Mulcahy

fix our waste water plant

3545 - Sarah Eve Tunstall

Fast track insurance issues with Bromley waste water plant.

3816 - Annette Bolton

The wastewater treatment plant needs upgrading and consideration in terms of climate resilience.

3895 - Margaret Trotter

The sewerage ponds and waste need to sort out the issues for the locals as this has been decades of excuses and lack of sympathy for people on the East.

581 - Paul Amtman

Fix the sewage treatment plant should be a priority. Green recycling should be away from people.

762 - Julie Nelmes

would like the waste water plant to be addressed as our community is suffering with the ongoing stench this needs to be a priority

>>>

fix problems on the Eastside near treatment plant enough is enough

>>>

Fix Bromley its a disgrace to residents treatment plant

>>>

seems all very one sided please fix what is currently broen water treatment plant before spending more money and ignoring the pleas of residents in this area

>>>

yew more transparency and consultation to come into our neighborhoods and fix the waste water treatment plant

Not Stated

1185 - Greg Ritchie

What is happening with a new replacement roof over the burnt sewer treatment ? this is taking way too long.

127 - Judith Clarkson

Fix up the Bromley plant, it is embarrassing it has taken so long. I am not affected, but feel for the community in that area.

128 - Elizabeth Ackermann

Please fix the horrible issue at the waste ponds properly please. That includes the smell. But those water machines on ponds seems to work

1629 - Whitney Campbell

Bromley in particular is being ignored with the constant stench of the waste water plant since the fire damaged the covers etc, the organic and aroma farm (not sure of the name) also contributes to the smell of rotting fish its discusting.

>>>

fix the waste water plant

2256 - Peter Scott (Environment Canterbury)

We also encourage you to continue to work to address ongoing issues with Council assets for wastewater treatment infrastructure and organics processing in the east of the city, and will continue to work with you as you work to improve compliance and meet community expectations regarding management of odour.

2296 - Vickie Walker

Comments: More focus on the wastewater system, spend there so the locals can have clean air to breathe.

>>>

Accelerate infrastructure especially WTP.

2311 - Paul McMahon (Waitai Coastal-Burwood-Linwood Community Board)

The Board supports the overall spread of proposed spending. Our top five priorities are: • Wastewater Treatment Plant (59076 etc), including any new funding required to eliminate or mitigate the impact on residents (including the Eastern Priority project).

2367 - Stephen Conti

Will this mean the bromley will stop smelling like a blocked toilet?

2529 - Bernard Newman

Putting right all the dramas on the East side of town with respect to waste management - reading of the extended suffering of residents on this side of the town has been heart breaking and is a clear sign the Council has not placed due care and regard here for citizens it has an obligation to - poor form indeed and it has not been attended to appropriately in Council communications

3231 - Colin Foster

Reinstate Bromley plant back to its full functionality.

3284 - Janina Smitheram

Bromley pooh ponds its still smells bad at times for those of us living in the area !!

3296 - Sharon Gail Powney

Please move the smell from bromley

3307 - Richard Griffiths

Hurry up and compensate the people of Bromley

3444 - Jo McGregor

Focus on the poo ponds - that sounds like its desperately in need of aid.

>>>

Focus on the poo ponds - that sounds like its desperately in need of aid.

3493 - Brendon Lee

Fix the solid waste treatment plant in Bromley.

3620 - Rosemary Turnbull

just get it fixed. How would any of us like to live in Bromley????

3745 - Victoria Rathgen

Bromley sewage ponds =if it was in Summer or Fendalton it would have been gone long time ago

570 - Greg Partridge

I pity the residents of Bromley who have had to suffer as a result of the Councils lack of action to address the stench which has emitted from the burnt out remains of the sewerage treatment plant for all this time. Those poor folk have been treated dreadfully and for the Council to say you're waiting for the insurance payout before you do anything is shameful.

Taumata Arowai Requirements

General Comments

133 submissions were received addressing Taumata Arowai Requirements.

10 comments supported, and 18 comments opposed.

88 comments suggested what could be done differently, and 19 comments provided general feedback on Taumata Arowai Requirements. A strong theme in the feedback was related to removing the chlorine from our water, with many wanting water quality to return to the level we had before chlorination was introduced.

Officer Response

The majority of submitters opposed chlorination of the drinking water, and many also oppose the introduction of fluoride (even though we have not yet been instructed to do so).

There were some comments around needing national standards for the supply of drinking water and a few others that support the health and safety benefits of treating our water. It was pointed out though that it would be preferred only as an interim measure while we get the infrastructure sorted, and Council should maintain it's long term goal of being chlorine free.

There were some specific questions such as when the Wainui water supply would be upgraded and support for the upgrade work at Birdlings Flat (especially fire water storage).

Christchurch's source water and water treatment:

Christchurch's source water continues to be of exceptional quality. We are hopeful that most of our 126 bores will be able to demonstrate that they meet the 'Class 1' definition in the new Drinking Water Quality Assurance Rules (similar to the 'secure' category that we met under the previous regime). 'Class 1' will give protozoa compliance for these sources. In the past we were able to demonstrate bacterial compliance through monitoring to show the absence of bacterial (E.Coli).

The Drinking Water Quality Assurance Rules now require a treatment barrier such as Chlorination or UV is installed to be able to meet bacterial compliance requirements. In addition, the Water Services Act requires 'residual disinfection' within the distribution, and this is only possible if chlorination is installed. The 'temporary' chlorination units installed in 2018 are not able to meet the required rules and need to be replaced with permanent chlorination units.

Chlorination:

Initially when chlorination was introduced in early 2018, the risk being addressed was of contamination of the source water as bores were situated in underground chambers that could be susceptible to infiltration by stormwater or shallow groundwater. The extensive programme of raising boreheads above ground mitigated this risk and in many parts of Christchurch chlorination then ceased. With the change in rules in November 2022 which required a disinfection residual within the distribution the reason for chlorinating shifted to protection of water in the distribution rather than protecting from the risk of contamination to source water in below ground chambers. Initially chlorination was at levels of 1-2mg/l Free Available Chlorine (FAC), now dosing at the treatment plants is less than half that original dose and this is sufficient to maintain the requirement of a level of not less than 0.2mg/l FAC. There remain several elements within the distribution where contamination is possible and residual chlorination protects against this.

Exemption from Chlorination:

Council did apply for an exemption from residual disinfection for the Brooklands Kainga supply in late 2022. This was unsuccessful and the response from Taumata Arowai did stress that a supply must meet all compliance requirements to be able to seek an exemption. Council are committed to working with Taumata Arowai to confirm the quality of our water supply.

Fluoridation:

Council has not yet been required to add fluoride into the water supply. It would be a requirement made by the Director General of Health as it is a public health matter rather than being about safe water. Because Christchurch currently has 44 treatment plants across the city adding fluoride would be a particularly complex and costly addition if required.

Nitrates:

Nitrate levels are monitored from approximately 40 bores across the city each month. Levels remain well below 0.5% of the Maximum Allowable Value in the Drinking Water Standards for NZ 2022 and show no indication of increasing.

Three Waters reforms:

Three Waters in the Council Long Term Plan are activities delivered by Council (Water Supply, Wastewater and Stormwater) on a day to day basis, are driven by regulatory and consent requirements and are part of Council's core business. This is different to the Three Waters Reform, which is a Central Government initiative to reorganise how Three Waters is delivered across New Zealand. The direction this is taking has altered following the change in Government.

Wainui water supply:

A project is underway to make it fully compliant (including protozoa barriers) by December 2025. The Birdlings Flat work is on programme already in the LTP.

All of the above points are covered under existing levels of service and budgets in the draft LTP, except for fluoridation, as no directive has been issued from the Ministry of Health yet.

Support

1282 - Kelvin Lynn

We should accept chlorination of our tap water until we have a safe reticulation system. While you are working on that can you address the obstacles to fluoridation.

1462 - Sue Piercey

[Three Waters>Other]

I am pleased to see the expenditure on three waters. Protozoal and bacterial compliance cannot come soon enough.

2121 - Cassie Welch (National Public Health Service (NPHS) Te Waipounamu)

14. NPHS Te Waipounamu strongly recommends that CCC continues upgrading Ōtautahi Christchurch's drinking water infrastructure to enable consistent chlorination of the city's drinking water supplies. Safe drinking water is critical to health and wellbeing of households; and consistently chlorinating the water supply will help protect communities from contamination throughout the entire network by providing residual disinfection.⁷ Reducing the risk of contaminated drinking water will protect communities from exposure to pathogens and reduce the overall disease incidence. Havelock North provides a recent example of the risks of contaminated drinking water supplies: 5500 residents became ill with campylobacteriosis in 2016, causing significant community suffering and contributing to three deaths in the community.⁸ The total economic cost of this outbreak was estimated to be \$21,029,288.⁹

15. NPHS Te Waipounamu also notes that upgrading CCC drinking water infrastructure and chlorination processes will also enable opportunity for future investment in fluoridation of CCC water supplies. Ōtautahi Christchurch is the largest city in New Zealand not to have fluoridated its water supply. Fluoridation is safe at usual water treatment dosages.

>>>

Fluoridation improves dental health for everyone and is the most effective way to reduce oral health inequities, especially for the most economically deprived. Data collected by Community Oral Health Services in 2022 show that 63 percent of year 8 children were caries free. This compares to 73 and 80 percent of year 8 children in Wellington and Auckland respectively, which have fluoridated water supplies.¹⁰ Caries free means that the children have no past or current experience of dental decay.

[Coder Note: Full attachment available]

2310 - Helen Broughton (Waipuna Halswell Hornby Riccarton Community Board)

- The Board supports the development of a road map for obtaining Chlorine exemptions for Christchurch water supplies?

2385 - Ezra Mussa

Examples of services which need more investment include: Water must be chlorinated and fluoridated for public health.

2389 - Aurora Garner-Randolph

Water needs to be chlorinated and fluoridated, for public health.

2844 - Albert Nisbet

Put fluoride in the water as it improve children's oral health.

2947 - Katia De Lu

1. Drinking water Please fluoridate our drinking water. Water fluoridation has huge benefits for dental health, particularly amongst our most vulnerable communities.

3645 - Sophie McKenzie

Examples are water being chlorinated and fluoridated for public health.

3802 - Matthew Baird

Water: Water should be fluoridated for public health.

Oppose

1508 - Mb Brennan

of course im a fan of keeping our drinking water fresh. I realise that your hands are tied by other authorities but i encourage you to take them on and enlist present govt support to enable you to do the great job you have been doing without unnecessary one size fits all bureaucracy .

1734 - Fergus O'Neill

Three waters reform has been stopped, so no need to spend more money on this.

1932 - Cynthia Carey

[Transport > Cycleways (Capital)], [Transport > Transport (Operations)], [Strategic Direction > Have we got the balance right?], [Other/Special Interest Topics > Staff Matters]

No, we do not need cycle lanes, we do not need speed bumps, we do not need it want chemicals in our water, we do not need nice to haves and you council need a clean out with no pay rises>>>

We do not need chlorine and fluoride in our water!>>>

get rid of chlorine and fluoride in our water which is not good for human consumption nor is it good on infrastructure, pipes cylinders etc.

1996 - Iain Nicholls

Continue to fight for chlorine free water that was promised to us by the council/mayor. The unnecessary addition of chlorine has been a tragedy and is a waste of money.

2006 - Aaron Mcloughlin

[Transport > Transport (Operations)], [Transport > Cycleways (Capital)], [Spending >Capital Programme (General)], [Spending > Te Kaha], [Libraries > Libraries (Capital)], [Resource Recovery > Resource Recovery (Capital)]

\$2.7 billion on three waters (drinking water, wastewater and stormwater) (31.5%) we do not need the chlorination nor the 'promised' fluoridation of our water

2105 - Tawhai Darnielle Te Karu

• Stop chlorinating our water.

2422 - Debora Mora

[Libraries > Libraries (Operations)], [Transport > Cycleways (Capital)], [Spending > Te Kaha], [Spending > Capital Programme (Spending)]

-Stop the \$2.1 Million dollars spend on chlorination per year, when you don't even have a risk assessment done for LONG TERM Ingestion of chlorination, NOR does Tamata Arowai (the National water regulator). (I have a letter from them substantiating this. Just continue to monitor our water as we are doing, and if required chlorinate then (short term chlorination).

2557 - Malcolm Warren

[Strategic Direction > Have we got the balance right?], [Resource Recovery > Operations]

Lianne Dalziels legacy is chlorine in our drinking water and years of stench from refuse and compost. This plans appears to improve on that BUT it is up to individual councillors and ccc staff to execute the plan through actions and decisions that are best for the majority of ratepayers and the long term wellbeing of the region.

3206 - John Gudgeon

\$2.7 billion on three waters (drinking water, wastewater and stormwater) (31.5%) We hate the chlorine in our water! My son gets skin rashes from it. Fluoride will be even worse! It is a neurotoxin and reduces the IQ of children by half a standard deviation (7.5 IQ points). This is serious. Do NOT comply with the mass poisoning of our people.

3229 - Robyn Sampson

Three waters shouldnt be top priority.

3396 - Lucy King

Chlorination shouldnt be ongoing. It is suiting the bottling plant. Fight central govt chlorination as you have applied to have chlorine only temporary eg when pipes are done. It ruins garden soils microflora and human gut microflora. Unsafe for all as unnecessary cw low risk of temp sickness. Filters are plastic and throw away. Another cost on families. We can boil water when needed but chlorine is horrible.

3626 - Connie Christensen

and get our drinking water system up to scratch to get rid of the horrible chlorine!

3705 - Glenis Youngman

\$2.7 billion is alot to be spent on three waters. We do not need chlorination and do not want fluoridation of our water.

3787 - Deb Donnell

* 2.7 billion on three waters (drinking water, wastewater and stormwater) (31.5%) We do not need the chlorination nor the 'promised' fluoridation of our water. Christchurch used to have the purest drinking water in the world, and now it is undrinkable, all because the city started complying with regulations from national and international organisations. *

3825 - Justin Barton

[Three Waters > Three Waters (Operations)]

Three waters name is strange (given the history) and is strangely high (going to 42% in 10yrs) given that the quality of the water is poor (chlorinated) and we have to filter it. The public unchlorinated taps were closed. Compared to not long ago when it was described as the cleanest city drinking water in the world. (Note. I opposed the 3 Waters government initiative due to rejecting centralized regulation overreach of what should be local managed asset, and opposing addition of known systemic toxins such as fluoride to the water supply.)

3844 - My-Linh Dang

\$15m on new chlorination equipment and controls??? This is outrageous. Stop chlorinating our water! We don't even use tap water anymore due to the chlorination causing incredible external skin rashes (imagine what it does to our insides if we drink it). The philosophy of chlorination is based on a flawed understanding of the science. It is

unacceptable to spend ANY money on chlorination of tap water. Re-open natural springs (e.g. the one in New Brighton).

3898 - Richard Smith

Need to lobby/push back on central govt re levels of drinking water security & chlorination

3994 - Sarah Boje

Too expensive, I don't want to pay for chlorine & flouride in my water. Tell the gov NO.

Other

1030 - Andrea Gosney

Stop wasting time and money over chlorinating our water. It's disgusting and basically not able to be drunk god know what it's doing to us.

1104 - Kate Bevin

Please remove chlorine from our drinking water! It's not good for our health.

1210 - Dianna Koorey

Get rid of the chlorine in our drinking water.

1259 - Paula Darrell

[Three Waters > Other)

we could save so much money by not wasting it on chlorine

1265 - Jill Banbury

[Transport > Other], [Strategic Direction > Have we got the balance right?], [Other/Special Interest Topics > Cathedral]

I would like to eventually see all chlorine removed from our water as it used to be - we have always been known for the purity of our water.

Drinking water - would like to see the cholorine removed eventually from the water. All looks fine if it is manageable.

132 - Jason King

Take the shitty flouride/chlorine out of the water--> NO ONE wanted that. How much is that costing us each year to make our water SO MUCH WORSE than the perfect, pure water Otautahi used to have?

>>>

take the flouride / chlorine / chemicals out of Otautahi's water. We used to have the best water in the whole country, but Christchurch City Council destroyed that. Everyone I talk to, resents the Council for that move. How much does that cost each year - to make our water much worse?

>>>

You really ruined Christchurch's beautiful pure water. Undo what you messed up & save costs in doing so.

1327 - Chris O'Brien

Stop chlorination. Why is the Council requiring this when the leakage is outward. Positive pressures in the reticulation keep contaminants out. Christchurch has the cleanest groundwater in NZ don't spoil it with chlorination. Why should one incident in the Hawkes Bay dictate that we chlorinate. Flurodation must NEVER be introduced here.

1329 - Lynda Whitlow

Yes, however why are we not upgrading, or if have upgraded, water supplies to get rid of the chlorine? This is a huge cost and a very unpopular thing. People are paying to install water filters to get rid of it, so why couldn't we install filters wherever possible in the public supply instead of chlorine? This is simplistic as I am not a water engineer, purely someone who is very badly affected by chlorine and suffers due to it. No swimming for me except in the Brighton Pools, which are great, thanks!

>>>

repeating myself :) get rid of the chlorine in the water, very expensive, people installing filters themselves, why not install better treatment instead of expensive chemicals?

1335 - Julie Turner

Get the chlorination out of our water

1395 - William Wallace

As for fluoride and chlorine in our drinking water, no thanks. Scrap that idea once and for all.

>>>

Drop the addition of fluoride and chlorine to our drinking water once and for all. Fluoride is a toxic by-product of several manufacturing processes and if not sold to gullible councils and others, would have to be safely disposed of at huge cost to the companies concerned.

16 - Andrew McKay

Get the chlorine out of our water.

1629 - Whitney Campbell

bring our fresh drinking tap water back as we were promised when the chlorine was added to it. the water not only tastes disgusting but it makes people sick! ruins our taps and hot water cylinder's making them deteriorate faster. parks as said earlier need better care

17 - Sandra Pilet

As far as I understand it you have already spent enough money on our water. Don't put chlorine or fluoride in the water. Cut down spending.. it's getting out of hand

1826 - Jacqui Hudson

Stop putting chlorine in the water, that would save some money.

1836 - James McGregor

Please no NOT add chloride to our water

1943 - Harriet Scott

I would love if you wouldn't waste money flouridating & adding chlorine to water supplies that aren't aged. Certain bore sites didn't need chlorine, so should've saved that money as well as residents tastebuds & skin!

1991 - Stevie Florent

Removal or reduction of chlorine from drinking water

1997 - Justine Wright

3 waters - get rid of it. we do not need chlorine or fluoride in our water. make our water the same as it was 20 years ago with no chemicals and refreshing to drink. i do not want Auckland yuk water here.

2024 - Janet Reeves

[Three Waters>Water Supply Capital]

I wish to support the funding allocated for improvements to the Birdlings Flat water supply. Our community is very keen to see the chlorine removed from our water supply and understand that these improvements are needed first. Plus we wish to continue to have a secure and safe water supply for our expanding community. I wish to support the funding for Banks Peninsula Communal Fire Water Storage particularly in Birdlings Flat. Fire is a real danger and concern to Birdlings Flat residents. We have been promised communal water tanks for several years now. Following a submission to the Annual Plan last year funding was included in the budget for Birdlings Flat and we were told that the Birdlings flat work would be carried out first.

2028 - Karyn Haugh

[Other/Special Interest Topics>Governance]

For a start your dishonesty is NOT providing any reassurance to anyone that you stick to what you say your going to do. You promised Chlorine would not stay in our drinking water, infact advising giving a time frame of when it wouldn't be in the water. You failed to deliver on that promise & our water is the most pure in the world. We have natural deep springs. So that alone creates a no confidence.

2225 - Geoff Tobeck

get chlorine out of drinking water

2261 - Tony Hampton (Health New Zealand Te Whatu Ora – Waitaha | Canterbury)

<p>Water Supply: Risks Ref. Page 79</p>	<p>We note the reference to chemical additions to the water being required (chlorination or fluoridation) as dictated by legislation and/or water quality and this being a risk – we assume in terms of negative public reaction to these requirements.</p> <p>Te Whatu Ora is referenced as potentially requiring fluoridation. It is not clear in the Long-Term Plan whether CCC has made any financial allowances for the cost of fluoridation over the next 10-year period. Health NZ's public health team may wish to comment and request CCC engagement.</p>
--	--

2355 - Iain Sanders

Serve the MAJORITY of the rate-paying population and ASK the rate-payers what they think about things that affect our health and our children's health like chlorine and fluoride in our water.

Question and challenge central government and advocate FOR the people of Christchurch when central government mandates rules that will not benefit the general populace (like the introduction of neurotoxins into our water).

2357 - Cori Sanders

- Re: \$2.7 billion on three waters (drinking water, wastewater and stormwater) (31.5%) Christchurch has always had beautiful clean fresh water that tasted wonderful. We do not need neurotoxins like Chlorine and Fluoride in our water. I researched this topic because I care about what I put in my body. It would be great if our council would do their own research into these neurotoxins and talk to central government and share the results of research like this that will severely affect our children's health: <https://iaomt.org/fluoride-neurotoxic-at-any-level-according-to-national-toxicology-program-report-fluoridation-policy-threatened/#:~:text=The%20NTP%20reported%2052%20of,fluoride%20exposure%20and%20children's%20IQ.%E2%80%9D>

Ashley Bloomfield's study that led to the decision to tamper with NZ's water was based on a study in Bangladesh and the courts have already ruled the order to fluoridate as unlawful: <https://www.rnz.co.nz/news/national/502390/sir-ashley-bloomfield-s-fluoridation-orders-unlawful-court-rules> If the council is here to SERVE its constituents, shouldn't the council ask US what we think about fluoridation and chlorination and base their decision on balanced research and factual evidence?

>>>

Remove chlorine from our water or severely reduce the amount that goes into our water and forget adding fluoride to our water. This will lead to Major cost savings and major health benefits across the board.

>>>

Serve the MAJORITY of the rate-paying population and ASK the rate-payers what they think about things that affect our health and our children's health like chlorine and fluoride in our water. Question and challenge central government and advocate FOR the people of Christchurch when central government mandates rules that will not benefit the general populace (like the introduction of neurotoxins into our water).

2391 - Mitchell Rogers

Get the potable water network to standard where it doesn't need chlorination

2422 - Debora Mora

[Recreation, Sports & Events > Rec and Sport (Operations)]

STOP the chlorination, and simply monitor, and chlorinate when and if required, that would reduce costs of \$2.1 per annum.

2429 - Neil Ricken

[Spending > Te Kaha], [Recreation, Sports & Events > Pools], [Planning & Strategic Transport, Urban Design, & Urban Regeneration > Strategic Transport]

Chlorination of water, along with any proposed fluoridation of the water supply is unnecessary.

2442 - Paula Bevilacqua

We do not need chlorination nor fluoridation in our water, instant saving.

>>>

No chlorination or fluoridation in our water

2498 - REDACTED REDACTED

Water, we definitely need to spend money on removing chlorine from our drinking water, as promised.

2521 - Stuart Jones

GET RID OF CHLORINE AND NO FLUORIDE!!

2536 - Jennifer McDonald

Chlorine in our water is too strong.
Our airing cupboard stinks where the hot water cylinder is. Can you reduce the strength?

2608 - Simon Henry

Get the chlorine out of the water. Don't even think about fluoridating the water.

>>>

Get the chlorine out of the water. Don't fluoridate

>>>

Get the chlorine out of the water. Don't fluoridate the water.

2629 - Sarah Smith

Remove chlorine and forget about the fluoride. These are damaging to our health.

2692 - Liz Fletcher

Against chlorinated water

2738 - Patricia (Patsy) Eastwood

The chlorination of our water is not something we need or want.

2742 - Caroline Dagger

It would be great to get the chlorine out of the water.

2746 - Helen Taylor

The water situation is disappointing. Chlorine has destroyed two hot water cylinders and it tastes awful. Support our environment and climate change. Then our water would be safe again.

2764 - Chris Ford (Disabled Persons Assembly (DPA))

Three Waters

DPA acknowledges the opportunities and challenges presented by the need to address the city's Three Waters infrastructure which represents \$2.66 billion (23%) of proposed operational spending and \$2.75 billion (42%) of proposed capital spending.

We recognise that the political debate over this issue (that has extended across both the previous government and into the new government's term) has complicated matters for councils all around Aotearoa, including in Christchurch.

The new Coalition Government's decision to establish 'Local Water Done Well' as its main policy in this space mean that local councils will carry more of the responsibility and cost of maintaining and upgrading ageing water infrastructure.

2765 - Debra August-Jordan

3. Stop chlorinating the water, it is toxic. A kneejerk reaction to what happened in Havelock North is unjustifiable to put chlorine in our water. \$873m over the next 10 years for something that could be allocated more appropriately.

2770 - Sarah Lassche-Jones

Remove chlorine from water

2789 - Veronika Mealings (Wainui Residents' Association)

The Wainui Residents Association (WRA), an incorporated society founded in 1974, represents the community of Wainui, which is a small rural coastal community located on the western side of the Akaroa Harbour, 30 minutes drive from the nearest township of Akaroa and 90 minutes from Christchurch. We own and operate the Wainui Community Centre on the site of the former Wainui School on Wainui Main Road.

>>> There was no explicit mention in any of the detailed project and capital expenditure documents about >>> drinking water treatment improvements to add a protozoa barrier as required by Taumata Arowai ([https://www.taumataarowai.govt.nz/assets/Council-Supplies\[1\]without-a-protozoa-barrier-updated-13-10-2023.pdf](https://www.taumataarowai.govt.nz/assets/Council-Supplies[1]without-a-protozoa-barrier-updated-13-10-2023.pdf)).

>>> Broadly, the issues set out above correspond to council's projects and programmes in the areas of Parks and Foreshore, Recreation and Sport, and Climate Change, and we request that funding for these projects is accommodated for in the council's 2024-34 LTP.

2799 - Dot Lovell-Smith

I think the CCC should lobby to Government for National Standards for clean water and waste water recycling and for support to provide this in every community in NZ.

2809 - Susan Thorpe

7) WATER

The majority of ratepayers say no to chlorination.

Chlorination is unnecessary for Canterbury water, and creates a health risk. We cannot afford it.

The majority of ratepayers say 'no' to fluoridation.

Fluoridation is proven to be a neuro-toxin with no safe levels by a major American study which has led to class litigation against authorities. It shows disastrous lowering of IQ points in children, and causal link with Alzheimers in adults.

** Stop chlorinating our world class artesian water. Paying govt fines cheaper than implementation.*

** Reject future fluoridation by government edict. Paying govt fines cheaper than implementation.*

[Full attachment available]

2817 - Emma Twaddell (St Albans Residents' Association)

Keep chlorine out of our water supply.

2833 - Robbie Peacocke

There doesn't appear to be any specific funding provision allocated for water supply fluoridation. I appreciate there are some questions around possible funding from central government given Christchurch has a complicated water supply network, but it appears the Ministry of Health's direction is that the city will eventually be required to fluoridate the water supply (<https://www.rnz.co.nz/news/national/472873/water-fluoridation-christchurch-council-tries-to-avoid-expensive-process>). The scientific and public health consensus is also quite clear that fluoridation is a safe and effective way to reduce tooth decay of the city's residents (<https://www.health.govt.nz/our-work/preventative-health-wellness/oral-health/community-water-fluoridation>).

2939 - John Thomsen

Fresh clean drinking water without chemicals should be prioritised. No bandaids.

2948 - Peter Borodin

Stop wasting money on chlorination.

2949 - Graeme John Marriott

I'm happy with what you are proposing. I look forward to the day when we don't have chlorine in the drinking water

3127 - Dianne Downward

We don't need chemicals in our drinking water, if it's ok to bottle it without chlorine and in the future fluoride, it's fine for us to drink. We will always have leaky pipes and as long as there is pressure in the pipes there is no threat of contamination. Tomata Arawai needs to be educated on this point and others. Getting new machines to put chlorine into our water is a waste.

3240 - Sarah Brunton

I would like to drink fresh, clean water without added chlorine. Please incorporate a CCC road map to obtain chlorine exemption.

3246 - Anna Morris

Ditch three waters.

3266 - Renee Mark (Italian Film Festival)

[Grants and Funding > Arts Centre Funding]

Absolutely not! 3 waters was an opportunity to find water infrastructure WITHOUT the heavy burden being placed on ratepayers and now we the people have to pay for this and we miss out on heritage and community buildings like the art centre.

>>>

All of those farmers that voted out 3 waters should be l'ade to cover the lions share of the water infrastructure.

3325 - Adele Geradts

Our three waters should be a priority. I would like to see our drinking water with less or no chlorine, but to do that, I understand we need to make the water across the city safe for everyone to drink. The long-term goal should be to get back to our artesian water.

3346 - Lynette Bay

Chlorination (a hazardous material/toxin) in our water is not needed. Chlorine is a health hazard. Nor do we need the promised fluoridation in our water, another highly toxic material.

>>>

Chlorination (a hazardous material/toxin) in our water is not needed. Chlorine is a health hazard. Nor do we need the promised fluoridation in our water, another highly toxic material. Freedom of choice as to what we drink - fresh water springs that people can collect water need to be kept open and not shut off and blocked off to the public. Many people have allergies to Chlorine for example. Clean drinking water free of chemicals needs to be available to us the tax payers

3361 - Ali Cameron

we do not need the chlorination nor the 'promised' fluoridation of our water

3420 - Jade Mulcahy

fix our water, take clohrine out

3429 - Somnath Bagchi (Avonhead Community Group Incorporated)

Christchurch's focus should be making its water safe to drink and use without requiring chlorination.

3444 - Jo McGregor

Keep fluoride and chlorine out of our water!

3458 - Frank Hill

I am most concerned about water and removing chlorine and protecting the "Pristine" water that this city used to enjoy should be a priority.

347 - Catherine Webber

Stop poisoning our drinking water with chlorine, it is costing billions unnecessarily, money that would be much better spent on preventative water testing. I object to increasing rates to pay for this poison that is costing me a fortune to filter out of my household water. Basically I am paying for a water supply that is useless to me in the state that it arrives at my property.

>>>

STOP spending on chlorine, put that money into sufficient amount of water testing to keep us safe. It can be done and has been before.

>>>

You could slice the costs of 3 waters by 80% if you STOP PAYING FOR POISON! Chlorine is a poison which is making peoples lives a living hell. We should not have to pay for poisoned drinking water.

>>>

STOP PAYING FOR CHLORINE! If central government want to be puppets for the UN and continue to poison our water make them pay for it at a national level not in our rates!

3479 - Rhys Glenjarman

Fluoridation of the water is unnecessary and not an appropriate way to dispose of such chemicals. Fluoride toothpaste should be enough and many dentists recommend spitting out toothpaste anyway, because of the unknown health issues. Fluoridation, mixed with the necessary chlorine to maintain water safety, and the increased nitrate levels may cause unforeseen interactions later down the line. I believe the council should stand firm on not fluoridating the water.

3535 - Anna Harper

the quality of Christchurch water pre adding Chlorine was excellent, returning it to this quality would be appreciated

>>>

Return the drinking water quality to pre Chlorine and do not add Fluoridation to the water. This is a proven Neuro - toxin and will result in decreased IQ.

>>>

Drinking water is appalling, needs to be de-chlorinated and do not Fluoridate the water - great savings there.

3650 - Leslie McAuley

\$2.7 billion on three waters, we do not need chlorination or the proposed fluoridation of our water.

3733 - Helen Reason

I understand that chlorination of water has been enforced by central government and the council has sought ways to be able to take chlorine out of the water. It's ludicrous that ratepayers are paying for chlorination and then private companies have a great market in selling filters to take the chlorine out of the water!

3763 - John Graham

There is no need to put any chemicals in our water, apparently Christchurch had beautiful clean drinking water for decades & now it's been polluted.

3767 - Donna Faucher

No chlorine in the water taste terrible

3794 - Somnath Bagchi

Christchurch water should be made safe to drink without requiring chlorination.

3797 - Kathakali Bagchi

I oppose >>> the fact that Christchurch water is getting chlorinated when it should be made safe to drink without chlorination.

3815 - Dianne French

We no longer need the chlorination of our water, and nobody wants our water to be fluoridated.

3831 - Rick Jones

Ditch the chlorine in the water supply and DO NOT even consider introducing the known toxin named fluoride at any cost.

3865 - Maxine Donovan

The 3 waters has changed anyhow with present Government, but totally want clean water - get rid of chlorine and nitrates.

3956 - Nicola McCormick

Definitely making our water safe to drink and free from chlorination should be a priority.

3960 - Nicola Prattley

Do we have any hope of lessening the amount of chlorine in our drinking water? I miss our wonderful water terribly.

3989 - Mary O'Connor

Please can you provide water sites without chlorine or fluoride added for residents to fill their own containers for drinking water to reduce one use plastic bottles?

3990 - Malcolm Smeaton

Yes No Don't know

Comments:

Keep pushing for Chlorine free potable water even if it is a staged process. We have our own water experts. Why should we let Wellington dictate our terms.

3991 - Marilyn Copland

I hope the Council intends

to adhere to its promise of removing chlorine from our water once the necessary repairs to infrastructure have been made.

4016 - Joanne Zervos

- Chlorine Free Drinking Water

4030 - Jenna Hayward

If we actually had water that was drinkable instead of all the chlorine. It affects people's skin specially exma. also people are allergic. Do council hold shares in bottled water cause i know alot more people have to buy it

601 - David Ralph

With such heavy investment in water infrastructure over the years and future...please remove chlorine from drinking water!

622 - Stephanie Cullen

I would like to see the council continue to aim to remove chlorine from the water.

672 - Edwin Du Plessis

Drinking Water, in particular, is one of the 3 waters which require a national policy and plan

692 - Tony Ward

Chlorination should be cancelled.

749 - Sandra Pearson

No chlorination of our water as we have natural aquifers in Canterbury region. But like to see fluoridation of our water for better dental care. Great to see overseas Chinese companies not extracting our waters and bottling our water for free and exporting the water for profits.

752 - Vivienne Hewson

I am strongly against adding fluoride to the water. I am sad we have to add chlorine now but accept this is a necessary evil but also adding fluoride would make our water a toxic cocktail of chemicals. In favour of keeping our water pure

763 - Nicola Fagan

[Parks > Heritage (Capital)]

stop chlorinating the drinking water and save the heritage buildings.

780 - Kirsten Templeton

Get rid of the chlorine in our water as promised!

781 - Jenene Parker

Why can't you just say NO to the bully government and take the chlorine out of our water. We've paid megabucks to get the well heads up to scratch

Not Stated

1012 - Andrea Mcgregor

We want our lovely water back. Tastes like s..t

1500 - Warwick Schaffer

Will all of this spending get rid of the chlorine?

1599 - Megan Brown

We used to have the freshest water which is now filled with chlorine and crap.

1927 - Donna Gillatt

Priorities are clean unmedicated and treated water.

2103 - P Stark

looking and how chlorine is also costing families more with deterioration and damage to pipes and hot water cylinders

2793 - [REDACTED]

Councils claim that an ecological emergency exists, yet it persists to toxify our water with harmful and dangerous chemicals, including chlorine and fluoride additives, using micro plastic toxic PVC pipework, removing sequestering trees

3167 - Paula Hunter

[Spending > Te Kaha]

We used to have lovely tasting water to drink but now is is loaded with chlorine and is undrinkable.

3234 - Rhys Pryde-Wall

As previously mentioned, the council has to pay for their opposition to 3 waters and this is the price. >>>

3283 - Elizabeth Clarke

The 3 water costs look very large and should be carefully managed with the idea of reducing implimentation costs.

3528 - Mark Wilson

[Three Waters>Water Supply]

We need to spend a significant percentage of the rates on the replacement of our drinking water infrastructure. Residents are tired of chlorine, and have not forgotten the councils promise of removing it, we all know the only way to remove it is replace the old pipe work.

3635 - Jane Lila McKenzie

Lianne Dalziel was adamant chlorine would be removed from Christchurch's pristine water in 2018, yet Still!! it is poisoning us. Chlorine and Fluoride are poisonous to humans Drinking Water Supply: pg 30 For the health and well-being of Christchurch citizens, our Water, our once Pristine pure water must be returned to its unpolluted state As Was Promised.! Chlorine and Floride. Neither of these products are conducive to good health. Floride was talked about because young children had poor teeth due to the sugary drinks consumed. people will continue drinking products that cause the problems. It only takes 2 to 4 parts of chlorine per million parts of pool water amount to purify a swimming pool, Why ?

Chlorine gas is a serious danger to the ozone layer. One Chlorine atom can destroy 100,000 ozone molecules, resulting in severe depletion of this crucial stratospheric layer and severe danger for our climate. How carefully is the chlorine being handled? Fluoride ions in drinking water can cause dental fluorosis, skeletal fluorosis, arthritis, bone damage, osteoporosis, muscular damage, fatigue, joint related problems, seizures and chronic issues! It can also lead to discolored teeth and weakening of the enamel. FLUORIDE DOES NOT IMPROVE THE WATER'S QUALITY OR SAFETY, and has been banned in Europe.

3697 - Jennie Brittenden

[Three Waters > Operations]

The water straight out of the tap is undrinkable.

3745 - Victoria Rathgen

Ask the Government for the money given to them already for water back

>>>

The Government received money from the council, please get it back! Equity for everyone, i equate it to a shared driveway with six houses down it and should the house at the end pay more or should it be divided into six equal parts ask eqc what worked? Its what people in the electorate elections voted for when they voted National in so this 31% is expected.

3769 - Dawn Smith

Drinking water needs to be sorted.

3850 - Stephanie Remington

Drinking water - the chlorination of our drinking water is a disgrace. Christchurch has had the best quality water since I can remember, because of one or two councils dropping the ball around the country, we are suffering.

3895 - Margaret Trotter

Drinking water-where is the city sitting with the 3 waters programme with the change of government policy?

3977 - Defyd Williams

Essential infrastructure.
You need to find money.
3 Waters alternative needs to be
outlined by Council.

662 - Cameron Taylor

Fluoride and chlorine are poisoning residents not making anything better.

687 - Anna Laurenson

Christchurch water has been ruined with chlorine. Used to be some of the freshest in the world :(

Other

General Comments

130 submissions were received addressing other Three Waters matters.

23 comments supported, and 6 comments opposed.

52 comments suggested what could be done differently, and a further 52 provided general feedback on Other Three Waters matters.

Officer Response

There was considerable support for continued investment in the 3 waters programme to protect and safeguard Christchurch's water supply. There was concern over the treatment of the water and potential nitrate levels, however safety and resilience of the water supply (and fixing the leaks) was a very strong theme.

There was a misunderstanding around Council's 3 Waters activities versus the Government reforms, with some submitters raising this. Also comments around the size of the 3 waters programme – but it was acknowledged there was a need here to protect the aging infrastructure.

In terms of waterbody health, there was a recurring theme among submitters to continue to work closely with Environment Canterbury on water quality in the rivers, streams and harbours. Continuing

to support this work through community groups and organisations was advocated for as well due to the great results being achieved.

There were a few comments around rainwater storage and re-use, coordinating our programmes better (especially with other infrastructure providers) and one request for the use of the Council's community water take for recreational use.

Christchurch's' source water continues to be of exceptional quality. We are hopeful that most of our 126 bores will be able to demonstrate that they meet the 'Class 1' definition in the new Drinking Water Quality Assurance Rules (similar to the 'secure' category that we met under the previous regime). 'Class 1' will give protozoa compliance for these sources. In the past we were able to demonstrate bacterial compliance through monitoring to show the absence of bacterial (E.Coli). The Drinking Water Quality Assurance Rules now require a treatment barrier such as Chlorination or UV is installed to be able to meet bacterial compliance requirements. In addition, the Water Services Act requires 'residual disinfection' within the distribution, and this is only possible if chlorination is installed. The 'temporary' chlorination units installed in 2018 are not able to meet the required rules and need to be replaced with permanent chlorination units. Fluoridation: Council has not yet been required to add fluoride into the water supply. It would be a requirement made by the Director General of Health as it is a public health matter rather than being about safe water. Because Christchurch currently has 44 treatment plants across the city adding fluoride would be a particularly complex and costly addition if required.

Nitrate levels are monitored from approximately 40 bores across the city each month. Levels remain well below 0.5% of the Maximum Allowable Value in the Drinking Water Standards for NZ 2022 and show no indication of increasing.

Levels of service – drinking water losses: Decreasing the water losses to 20% by 2030 and then 15% by 2034 is an increase in the level of service. Less water being lost between extraction from wells and delivery to customers translates to the network being in better condition with reduced leakage through broken or damaged pipes. Reviews are carried out of Levels of Service, budgets and contracts as part of the LTP process. There were a few comments on the water bottling activity, however this activity is overseen by and is the responsibility of Environment Canterbury

The three waters programme is sized to achieve regulatory and consent compliance, replacement of aging (leaking) assets and allow for population growth in the city. Replacement of the oldest and failing assets is still behind the optimal schedule, however further work is being done to better refine and target the renewals programme to address this. Staff continue to work on ensuring that the infrastructure is fit for purpose and resilient.

Three Waters in the Council Long Term Plan are activities delivered by Council (Water Supply, Wastewater and Stormwater) on a day to day basis, are driven by regulatory and consent requirements and are part of Council's core business. This is different to the Three Waters Reform, which is a Central Government initiative to reorganise how Three Waters is delivered across New Zealand. The direction this is taking has altered following the change in Government.

Waterways: The council is working hard to improve waterbody health across the district. We have developed a Healthy Waterbodies Action plan that outlines objectives, goals, and measurable actions to improve waterbody health. Some of these objectives include improving surface water quality, providing sufficient instream habitat for native species and having diverse and extensive riparian margins. Council projects around waterways are required to have a freshwater ecologist involved to ensure effects on the waterway are minimal, this involves guiding physical works as well as planting appropriate riparian species. Council also has a detailed fish passage barrier prioritisation and remediation programme that focuses on fixing high priority barriers and opening up upstream habitats for native species. It is important to note that improving waterbody health takes a whole community approach from reducing contaminant inputs into waterways to large stormwater treatment projects.

Council are working closely with Environment Canterbury and organisations such as Whakaraupo to investigate and improve water quality issues in the harbour. Council have upgraded several water systems that were leaking or broken to reduce discharges into the harbour.

All of the above points are covered under existing levels of service and budgets in the draft LTP

Support

1098 - Eric Pawson

see previous comment on three waters;

[Coder Note: Supports three waters and wants CCC to lobby Central Govt for more fair sharing of costs]

1100 - Alistair McKinnon

[Transport>Roads (Capital)]; [Transport>Cycleways (Capital)]; [Strategic Direction>Have we got the balance right?]

No, emphasis needs to be on core water / roading infrastructure first rather than adding new things such as cycle lanes etc. And this must be in a coordinated way

1176 - Jamin Thomas

I understand that investment in the three waters is a necessary requirement because in the absence of this, we are in a terrible position.

1350 - George Ambridge

[Planning & Strategic Transport, Urban Design, & Urban Regeneration > Strategic Transport]

I agree the majority of spending should be on safe, low-emission transport choices and upgrades to three waters infrastructure.

1370 - Jeremy Kaye

[Resource Recovery (Capital)], [Transport > Roads (Capital)]

It's good there's a focus on infrastructure such as water, waste and roding.

1462 - Sue Piercey

[Three Waters>Taumata Arowai Requirements]

I am pleased to see the expenditure on three waters. Protozoal and bacterial compliance cannot come soon enough.

1572 - Olive Easterbrook

[Libraries > Libraries (Capital)], [Parks > Parks Spending (General)]

We should definitely continue to fund libraries, parks and waterways.

1699 - Dominic McKeown

we need our 3 waters infrastructure fixed its pretty simple. >>>

[Transport > Public Transport Infrastructure (Capital)] [[Transport > Cycleways (Capital)] [Parks > Sports Grounds and Facilities]

1717 - Mark Doyle

[Transport > Other]

Also, a more efficient examination of the Transport and Water infrastructure would be good

1933 - Aidan Moody

[Grants & Funding > Arts Centre Funding]

Provided this includes continued funding of the arts and in particular the arts centre, and prioritising water. As a rate payer I find my rates give me very little value for money .

>>>

Water security, clean water and water infrastructure (minimising leaks/wastage) should be high priority

1951 - James Beck (Eco Church New Zealand)

[Parks > Parks Spending (General)], [Transport > Other]

The investment into parks, water and transport is incredibly important.

2121 - Cassie Welch (National Public Health Service (NPHS) Te Waipounamu)

What Matters Most?

Overall, have we got the balance right?

Three Waters

13. NPHS Te Waipounamu supports CCC's proposed investment into drinking water, stormwater, and wastewater infrastructure. NPHS Te Waipounamu notes the importance of maintaining and renewing critical water infrastructure for the protection of community and environmental health and wellbeing.

>>>

37. NPHS Te Waipounamu particularly supports the importance of the capital spending related to Christchurch water infrastructure. Ensuring that drinking water, stormwater, and wastewater assets are well-maintained and replaced if needed is critical to drinking water and recreational water quality and public health outcomes. There is a clear and strong relationship between water quality and population health outcomes.

[Coder Note: Full attachment available]

2263 - Scott Babington

Upgrading our water/sewage network is vital and top priority.

2289 - Leonie Jackson

Comments: Yes - three waters' spending is vital, to avoid major health issues eg. contaminated water

2456 - Rachel Skews

I also support priority spending on three waters

3240 - Sarah Brunton

[Transport>Roads (Capital)]; [Resource Recovery>Resource Recovery (Capital)]; [Strategic Direction>Have we got the balance right?]

I support council focusing on basic services e.g. water, roads, waste

3307 - Richard Griffiths

>>> Water infrastructure is more important than cultural spending parks and recreation. >>>

3368 - Roland van Bommel

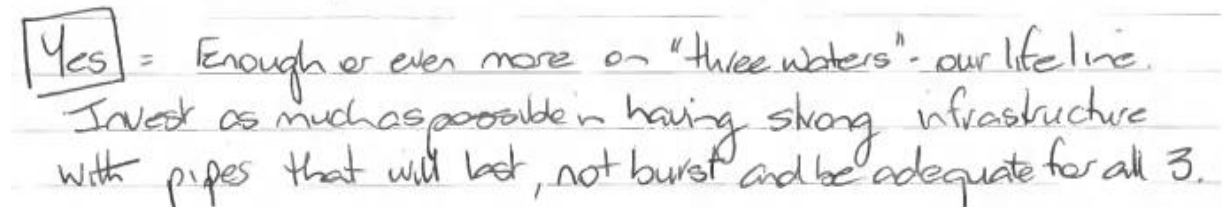

[Spending > Capital Programme (General)]

The original 3 waters plan made sense as it envisioned a closer cooperation between councils and a capital programme only makes sense if CCC cooperates with other councils in order to fund some of the capital projects It also makes it much more viable to attract outside infrastructure investment form domestic and overseas sources.

3490 - Peter Minten

We have to wait and see what Minister Simeon Brown will throw at the council about Local Water Done Well. Until then I agree with the current proposal made in the LTP.

3976 - Elizabeth Pugh

A handwritten note on lined paper. The word 'Yes' is written in a box. The text reads: 'Enough or even more on "three waters" - our life line. Invest as much as possible in having strong infrastructure with pipes that will last, not burst and be adequate for all 3.'

Yes = Enough or even more on "three waters" - our life line.
Invest as much as possible in having strong infrastructure
with pipes that will last, not burst and be adequate for all 3.

4000 - Kari Barr

Yes to water work infrastructure

550 - Colin Mansell

[Grants & Funding > Arts Centre], [Planning & Strategic Transport, Urban Design, & Urban Regeneration > Strategic Transport], [Strategic Direction > Have we got the balance right?]

Not all of it. Yes the water must be safeguarded and public transport improved but you need to protect people's well-being and mental health. So fewer cars, more outdoor activities and more protection for culture, in particular the Arts Centre. Christchurch must not be turned into yet another car dominated anonymous City like Auckland or Melbourne.

555 - Jemma Balmer

[Transport > Roads (Capital)]

Water and roads are so vitally important, we have to get that right for now and the future.

Oppose

1259 - Paula Darrell

[Three Waters > Taumata Arowai Requirements]

But we should not be doing 3 waters

1347 - Stephen Leon

My first comment addressed 3 Waters which perhaps you should go back to the drawing board with - I never understood why so many councils objected to it when it was, as far as I could see, the most cost-effective long term solution.

1628 - Matthew Brovelli

The spend on three waters is beyond reason.

1668 - Simon Mitchell

[Transport > Other]

Three waters and transport just seems astronomically high and should be thoroughly reviewed for ways to improve efficiencies in this area in particular.

1944 - Peter Salvesen

3 waters is done so there should not be ANY council money going in to this

469 - Amira Aman

No to three waters. Other items are important but budgeting is excessive.

Other

1098 - Eric Pawson

three waters is obviously essential: I hope CCC will continue to lobby government for fairer sharing of this cost. Simply abandoning Labour's three waters plan and returning the responsibility to localities

with no \$ support is inadequate and cowardly.

1452 - Maraed Riley

Maintaining current service standards is paramount. I vehemently oppose altering the drinking water loss targets to 20% by 2030 and 15% by 2034.

1471 - Dr Satinder Dhaliwal

4. The big section owners, say 500 sqm and more, should be directed to make it mandatory of rainwater. Storm water/un-treated water should be made available to them for watering the lawns.

5. The Avon River water be put to use, say for watering the lawns of the houses, which are situated in the vicinity for a charge.

1603 - Sandra Cunningham

[Spending > Te Kaha]

Is three waters still a thing?

1640 - Veronica Leigh-Ogden

Why are you spending billions on water when a majority of new zealanders are against 3 waters. Listen to what the people want.

1764 - Chris Conwest

Water likes to flow

1812 - Cathy McMillan

Remove permits for water to be taken from the water table for virtually free (such as Kaputone wool scouring plant in Belfast) so that the water table remains higher for the use of Christchurch residents.

192 - Caroline Oliver

Surely there must be some wastage that can be stopped - eg in Water services. We live alongside a pumping station in Kennedys Bush. A CCC worker seems to visit every day, and also a man with a leaf blower blows some debris here and there once a week - ? are all these visits necessary?

1927 - Donna Gillatt

I thought 3 waters was a thing of the past. Repeat and rinse, stop poisoning our water and selling or giving it overseas.

1977 - Nicholas Lealand

Clean Water and Climate Resilience: Water protection and climate change adaptation are essential. I encourage: Why it's personal I am originally from a place that has experienced and is experiencing an increase in wildfires. A little over a decade ago almost my entire town was wiped out by a runaway wildfire due to poor management and climate change induced heatwaves. I want to make sure our home is ready for our changing climate. Solutions Rigorous protection of waterways through stormwater management, reduced pollution, and natural filtration systems. Increased investment in infrastructure designed to withstand the impacts of climate change (e.g., flooding and sea-level rise), including nature-based solutions.

2009 - CW Young

[Parks>Parks Spending (General)]; [Libraries>Libraries (Capital)]

Three Waters, Parks/Heritage/Coastal Environment and Libraries need a haircut.

2143 - Vicky Anderson

[Transport > Other]

Please ensure all parties who need access to under-ground structures are communicated with. Apart from multiple inconveniences to locals, the waste involved in digging up then replacing pathways, then another team digging up and replacing pathways is extremely wasteful financially.

2269 - Lyn Leslie (Te Pātaka o Rākaihautū Banks Peninsula Community Board)

[Transport > Other]

The Board has heard from its communities that are dealing with flooding during coastal tides, and the increased extreme weather, as well as natural disasters that lead to damage of key Council infrastructure. The Board urges the Council to expedite its response to natural disasters to address these issues promptly. With the Council's current response timeline the Council will experience a backlog of repair work due to the increasing frequency and intensity of climate change-related events resulting in significantly higher costs for the Council. The Board received a briefing from Te Rūnanga o Koukourarata about tidal and weather flooding that is regularly occurring in Koukourarata Port Levy effecting roading, stormwater and utilities infrastructure as well as damage to private property. The Board have come to the conclusion that the Koukourarata Port Levy flooding requires coordination, strategic leadership and collaboration between stakeholders and would recommend having a community led working group with Council units, like what happened and is still happening to address Wairewa Little River flooding.

2525 - Adrienne Kimberly Georgine

[Strategic Direction>Have we got the balance right?]

Three Waters is another issue. That is a lot of money being poured into something that I'm still not clear now how it will be managed. Entity A will surely have the lion's share of shares... How does this impact the rest of us? I don't think anyone is clear on this. It's an absolutely exorbitant share of the CCC budget. Water management is absolutely critical but so is land management, housing, and other climate change initiatives. I think in principal it's great to ensure City Council's spend appropriately on clean drinking water, but surely there are other management structures that can be considered to ensure this happens.

>>>

Again, I am concerned about the amount allotted to Three Waters. The other items seem to be reasonable but I'm not entirely sure.

2538 - Libby Ornsby

Whilst water is vitally important, it would be nice to think the spending and upgrades have been managed efficiently.

2585 - Susan Macann

Less on three waters

2603 - Ron Brooks

stop the three waters thing

2690 - Robbie Dobbie

Absolutely to spend \$ on water though NOT chlorination or fluoride.

2693 - Tanya Markman

Note D

1. Drinking Water, waste water, and storm water

I agree with the upgrading of infrastructure to reduce water leakage from pipes. I wonder, however, at the costs incurred (past and future) developing and maintaining the chlorination of the water supply. There was vociferous opposition to its initial implementation and this discontent continues. Christchurch had one of (and still does) the purest municipal water supplies in the world. What suddenly changed overnight – in the eyes of decision makers - to ignore this fact? I would also suggest that, before council contemplate agreeing to fluorination of water supply they visit the most recent science – which not only debunks the idea that fluoridating a water supply helps strengthen teeth but also shows it as harmful.

2734 - Sharon McDonald

[Transport > Other]

Drinking water in this city should not be a problem neither should stormwater. When new subdivisions are built surely the infrastructure is put in properly and connected up correctly. Isn't that what your inspectors do?. I know we have some damage still to repair but surely after all this time most of it should have been fixed by now.

278 - Robin Curry

May need more on three waters once back under council control, with possible new regulations etc.

2802 - Yvonne Palmer

ONE OF THE BEST INVESTMENTS IS TO START PROVIDING HOMES AN INCENTIVE TO HAVE WATER STORAGE TANKS ON RESIDENTIAL PROPERTIES FOR GARDENING, WASHING CARS, HOUSES, DRIVEWAYS AND ANY HOME MAINTENANCE THAT IS BEING DONE.

Having just returned from the Gold Coast many homes have these tanks and the scheme is working verywell.

2868 - Jonty Coulson

Waste management practices must consider patterns of ingrained racism and classism in urban design. Waste management plants are often located near marginalized or low income communities, further harming already vulnerable communities.

2902 - Prawindra Mukhia

5. Climate action Disclosure Water services are likely to be one of the first and hardest hit by the impacts of climate change. Impacts include but are not limited to, challenges with water availability through increased incidence of drought, deterioration of drinking water quality (for example through increased incidence of algal blooms, and rapidly changing flow regimes, rising salinity of aquifers), more rapid deterioration of acids (for example through pipe cracking in drying soils, increased salinity surrounding pipes), increased incidence intensity and duration of rainfall inundating waste and stormwater networks. Currently, the water sector is a net greenhouse gas emitter. Energy and chemicals are consumed in the treatment and conveyance of water and there's considerable inbuilt carbon dioxide created in building new infrastructure. The wastewater treatment plant processes also release methane and nitrous oxide from their processes, both potent greenhouse gases. Managing climate risk must be given significant weighting and priority in the water service delivery plans. The information disclosure framework for both mitigation and adaptation action must be stronger. Council should provide information about: • Emissions and the transition to a low carbon circular economy. • Impacts, risk & resilience – aligned with the any regional spatial plans • Climate related financial disclosures (e.g. future offsetting costs)

>>>

Suggest an Investment Business Case to be developed for this purpose. This will better help public to make an informed decision. The investment should also be used to identify climate change risks, probability and impact. It should be made area specific, Proposed mitigation and adaptation plans are to be included. This document should be shared and consulted with the public.

2935 - Tina Christians

Fix >>> water pipes stop selling our fresh water to Chinese

2951 - Les McKay

It is council's responsibility for clean drinking water, waste water management and storm water. There has been a lack of investment on these for years and as a result we are now paying for it. We should NOT be giving away our ground water to overseas bottling companies and then charging ratepayers for any excess water use especially considering the amount of water wasted through leakage.

3000 - Simon Emett (Thin Tanks NZ)

Recommend people to install water tanks in their homes. Can be used for watering the garden, washing cars and eases pressure on the public stormwater system. www.thintanks.co.nz

3105 - Tracey MacArthur

Dump 3 Waters.

313 - Isabell Booth

There is rainwater that could be collected by every roof surface in the city that would instantly supply water for gardens, & take some of the pressure off storm water systems. The council could encourage the collection of rain from roofs by giving an appropriate rates rebate for installations of safe water collection systems on properties. We all need to take climate change seriously NOW & that includes CCC.

3165 - Adrienne Baxter

[Spending > Te Kaha]

Te Kaha, 3 waters

[coders note. question. 'Are there any areas where you feel we should be reviewing the services we provide to reduce our cost throughout the Draft LTP 2024 - 2034?']

332 - Flair Mckay

Spend less on Three Waters! Feed it to community groups. And look at the core of the problem - how are we looking after our water sources - ie changing farming practices nationwide so we are not polluting our ground water

3423 - James Upton

The three waters long game offers an opportunity to develop a council owned water and waste civil contracting business/subsidiary to manage and execute the renewal process. There is a lot of money to be saved with a specialised and targeted approach to this. Work out how to efficiently carry out Water and Transport projects to keep 'profits' within the Council's coffers. With the expectation of growth, Developmental Contributions need to reflect the true costs of additional loading on the capital programme items.

3431 - Phoebe Maguirr

Stop three waters.

3458 - Frank Hill

Stop supporting the Christchurch West Melton Zone Committee. – have completely failed to advocate for this City and its ratepayers. (as per my ECAN submission). No more collaboration or compromise on Water Quality in this city – Our views have been completely ignored (i.e. Plan Change 7)

3501 - Malcolm Long (Ōpāwaho Heathcote River Network)

7. The superpowers of the OHRN arise from the work of the community groups working in partnership with the Council in reserves within the river catchment. The funding of sufficient numbers of Community Partnership Rangers and their adequate resourcing is vital as this community initiative expands.

7.1. We **request** continuation of adequate funding for Community Partnership Rangers and for plants and other resources that these rangers need to fulfil their response and assistance to community requests. The more that community groups can assist the council in the maintenance of reserves, the better it is for the Council as well as the communities involved.

3582 - Cody Cooper

Still waiting for the renewal of plants at the entrance to Wigram at The Runway and Awatea Road years later.

3668 - Gavin Hardie

\$2.7 billion on three waters (drinking water, wastewater and stormwater) (31.5%) Reduce to rate of inflation >>> \$2.7 billion on three waters (drinking water, wastewater and stormwater) (31.5%)

3844 - My-Linh Dang

Spending on Three Waters is too high relative to other areas. Three Waters is not supported by the public, therefore, Council needs to reconsider spending on this category.

>>>

The amount of spending on Three Waters is excessive. Why is Council spending on Three Waters when the legislation has been repealed?

>>>

Cut all spending on Three Waters

3846 - Rebecca Finch

We need to lobby government to fund the three waters upgrades, or at least share in that cost.

3865 - Maxine Donovan

Said previously re water. If nitrate levels via Greenpeace online map is to be believed, nitrate is far too high in some areas and should be dealt with.

3902 - James Ridpath

Look at ways to cut costs on water and transport. Dont pick on the small numbers such as extra parking costs in parks & grants made to community services.

3949 - Fay Brorens

Water pollution & the cities aquifers

4025 - Robin Wynne-Williams

Work with the East Lake Trust to create an Olympic accredited event's lake by the Bottle Lake Forrest at the end of Styx river. ECANs has given a water allowance but the monthly water allowance required from the CCC has been held up for several years, by the CCC refusal to allocate water that would be required to be borrowed monthly and would be returned to the Styx river; with the potential financial loss to the CCC coffers of \$40M/per year and rising, not counting the educational, health, social, tourism, free PR and resuscitation of the CBD, and the potential installation of a Maori craft/educational centre.

492 - Lyndon Telfer

[Transport > Other], [Parks > Heritage (Capital)], [Parks > Foreshore]

I think you are prioritising on the right things, but please trim budgets back particularly the big ticket items like 3 waters, transport, heritage and coastal environment. Rate payers won't even notice a 10 percent cut to these budgets. It would have been nice if this form had spell checker built in!

618 - Natalie Dixon

That seems like a crazy amount for water.

623 - Linda Everett

I feel three waters is going to be dead in the water before long, so why spend so much on it.

665 - Rene Arthur

If water was a priority of ratepayers, how much of this is subsidised or controlled by Central Government?

667 - Frans Jeldrick Oorthuys

Do 3 waters really need that much money? Have another look where savings could be made.

687 - Anna Laurenson

Fine we need to upgrade water but that shouldn't be ongoing for the next decade?

712 - Liz van Montfort

This is a misleading question. Yes/no doesn't really apply. Three waters was probably an issue under the previous govt, but now that control has been returned to council then you can return to the way it was operated.

719 - Shane McInroe

I think we need to spend more money on our water project's we don't want to be like wellington

724 - Sophie Cooney

Why is three waters going ahead and costing SO MUCH when quite controversial?

Not Stated

1001 - Jessica Schulz

Three waters is a waste of money.

1002 - Riley Mahuika

Water - to be expected with a constant spam of townhouses popping up.

>>>

Water infrastructure is way over priced though.

1061 - Racheal O'Brien

Why are you spending money on 3 waters I thought that proposal was gone

1113 - Graeme Plank

The costs associated with 3 waters are eye watering, pun intended. I am puzzled as to why these costs are so large especially considering the vast amounts of money poured into water related projects of all types since the quakes.

1303 - Paul Johnston

You have already spent hundreds of millions on drinking water.

135 - Jac Call

Maintaining water use from council and delivery to the rate payer needs to be top priority and anyone wanting to sell our water needs to be charged

139 - Paul Tait

We need far better engineers and management in three waters and civil construction costs

1412 - Derren Macnicol

Why is water 31% of budget.was it maintained properly?

1473 - Adele Du Plessis

What is wrong with our water?

161 - Sam Apps

Is 3 waters actually worth it?

1623 - Oliver Mould

I feel ****very strongly**** that you and other Councils should have supported Labours Three Waters initiatives more vigorously and that this current Government will leave you/us footing the bill for Three Waters expenditure that would have been less of a burden had it come from non-rates sources over longer period.

>>>

See my earlier comments about your lack of support for the Three Waters plan that Labour had in place and which we will now feel the financial pain via the current governments focus on PPP's or straight-forward privatisation. We do NOT want to find ourselves in the same situation as the UK with many of the water companies siphoning off profits and now being unable to deliver core services.

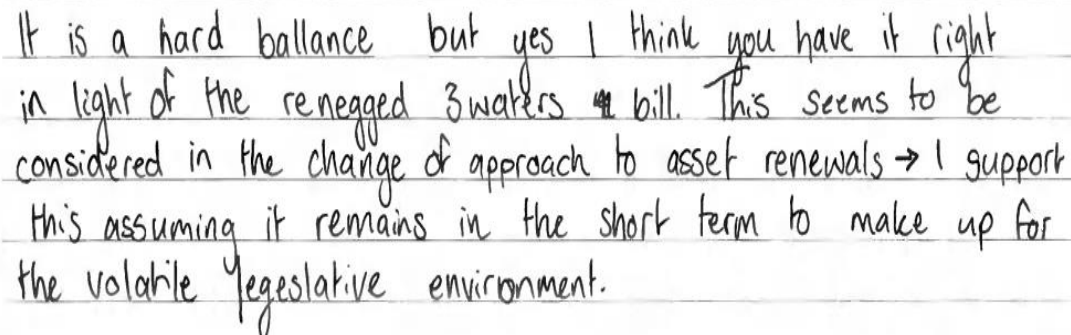

1711 - Eluishia Hart

We are being charged additional costs for water now! And you are upping waterway costs. This is unfair

1737 - Tim O'Sullivan

Please drop the terminology "Three waters" and separate the items out into "drinking, wastewater, storm-water" and flood protection. That is four waters. In any case, the terminology, "three waters" is too reminiscent of the last government's unpopular policy which has now been ditched. I accept that the council has to provide these services but these expenses should be parcelled out as line items in the budget.

1838 - Charlotte Holland

It is a hard ballance but yes I think you have it right in light of the reneged 3waters bill. This seems to be considered in the change of approach to asset renewals → I support this assuming it remains in the short term to make up for the volatile legislative environment.

184 - Rebecca Nicholls

Mostly. Water needs money spent on it!!! But so does the arts centre.

1864 - Kylie Williams

What surveys i didnt even know that you did a survey for the people. We dont need 3 waters i think what we are doing with warter is absolutely fine.

190 - Darian Troon

It has been devastating not being able to swim in Banks Peninsula due to pollution.

194 - John Lieswyn

It is a shame that the 3 Waters legislation was unwound, because now we will pay higher interest rates than under the previous plan.

1979 - Julie McCloy

I hope that all the investment in 3 waters that is now being scrapped is not being lost. This is a ridiculous amount of money and far too much of our operational spend, but I am not sure that we have an option given that it is mandated by central government.

2193 - Leanne Reid

Maybe look into making the Chinese water bottling plant pay for our natural resources we are just giving away for them to make a profit on. While we pay for ours. And now it's chlorinated.

2256 - Peter Scott (Environment Canterbury)

We support Christchurch City Council's continued investment in infrastructure for reticulated wastewater treatment and disposal systems and stormwater drainage systems across the City, and would urge you to continue to plan strategically for development and increasing population density. This will require investment in new infrastructure and the maintenance and upgrading of existing drinking water, wastewater and stormwater infrastructure to ensure compliance with national standards and resource consents, reduce the environmental impacts and respond to the impacts of climate events.

>>>

We acknowledge our shared involvement in co-governance arrangements for Te Waihora/Lake Ellesmere and Whakaraupō/Lyttleton Harbour. Through the Whakaora Te Waihora and Whaka-ora Healthy harbour work programmes, we are delivering on our shared objectives and we look forward to continuing to work collaboratively on these and other work programmes that will protect and enhance biodiversity and cultural values.

2363 - Andrea Wong

We need new pipes and resealing but not so much change!

2407 - Dave Evans

Water. Would be curious if any of the senior management of this department know anything technical about standards and delivery other than how to turn a tap on. There is a lot better work that could be done, especially as the lessons learned from since the earthquake and Havelock North are still relatively fresh.

>>>

[Transport>Roads (Capital)]

Over and over, I see the same work at the same place being done every few months. Where is the quality control? Where are the penalties for substandard work (roads and water leaks are the obvious). And why do these contractors keep getting business.

2462 - Mark Cox

Given the legacy of Scirt and the earthquake repairs the past 5 or so years of temp patch jobs on Three Waters networks have come home to roost, the amount of times I have seen jobs redone over and over again due to sub standard work is eye watering for a rates payer that works in the three waters sector.

>>>

Check flooding and water use, apart from that its a waste of money when we have millions of liters dipping out of pipes everyday.

no one wants to spend money on three waters but when it doesnt work you are in trouble.

2467 - John Ogier

So disappointing that the previous government's Three Waters programme was dropped.

2540 - Jocelyn and Caroline Papprell and Syddall

We also need to ensure that the basic and important services such as three waters are fit for purpose whilst also improved to ensure they are resilient in times of natural disaster and do not negatively impact on our environment i.e. less polluting outfalls into our rivers.

286 - Pauline Reid

I'm confused by the large amount being spent in relation to Three Waters? I thought this was scrapped by the government.

3077 - Mike Davidson

Be more transparent with the public - what does you proposed spend on 3 waters actually achieve. What % of the network is currently poor, average, good and what will it be in three years? The amount spent alone does not mean the network is improving.

3123 - Kate Markman

I'm glad water in general is being prioritised

3165 - Adrienne Baxter

[Transport > Other], [Resource > Resource Recovery (Capital)], [Spending > Te Kaha], [Libraries > Libraries (Capital)]

is 3 waters going to benefit our water supplies or just be a huge cost?

322 - Richie Connell

Isn't Three Waters dead? What happens now to this allocation, or is it just called something else?

3257 - Fiona Jones

Three waters is not being considered by central government now why is this in.

3305 - Angelita Schwalger

Water is precious fo all we can to look after it... obviously high priority

335 - Wayne Bates

There is now no such thing as 3 waters, not that there ever was, not passed through parliament.

3392 - Stephen Wood

All good here. in the early days of development in New Zealand communities were built where there was no differentiation between wastewater and stormwater. Treating these separately has improved their management markedly, e.g wastewater pants are not deluged by stormwater surges. One the other side of the equation, it's ironic that we process 100% of our reticulated water to drinkable standard, when only a tiny proportion is drunk. I've lived in rural settings were there are two water supplies, one to drinkable standard and one that is not (for uses like irrigation). in the future this approach could be used in cities - it would save water treatment costs but would require a duplication

of a reticulation network.

3493 - Brendon Lee

But we do need more spending on gov't funded infrastructures. 3 Waters was suppose to allow CCC to tap into larger funding but it became political. Other cities around the world don't operate on a 3 Waters model and they have no issues borrowing more funds (no gov't caps on borrowing).

3496 - Bindy Barclay

Water plans no longer "three waters" so somewhat out of date?

3599 - Hayley Guglietta

[Strategic Direction > Climate Change]

I have strong opinions on some of the strategic documents that have been produced i.e Climate Resilience Strategy, Stormwater Management Plan are two that feel like tick boxing exercises to meet some sort of legislative requirement. I am involved in a number of organisations that are leaned on to undertake the action items in these documents we do this on contestable funding which is not always guaranteed. We deliver a return to the city that is 500 times the funding that we receive I am not sure this is sustainable.

3615 - Janine Clarke

Water - there are obvious public health needs for this to be maintained to a high specification.

3743 - Ben Ellis

Publication of companies that exceed allowed water take would be nice. Fresh water management needs to be improved, as I understand the current take from aquifers is such that salt water infiltration is starting. Forward planning for this and the increased nitrogen levels across canterbury would be money well spent.

375 - Alex McNeill

Water is SO IMPORTANT!

3807 - Graeme Remington

\$2.7 billion on three waters, not sure?

416 - Mike Cleaver (Canterbury)

I am pleased with the efforts made around making water chargeable above a threshold. I think there may yet be some fine tuning needed around household sizes, but generally the limits are massive and seem to have had an impact on how much water waste is happening around the city. I wouldn't mind if the council provided some data on the outcomes now that it's been a while.

46 - Karin Lange

3 Waters, sounds dreadful to me as you disempower the once in charge locally... Centralised government often comes at a great cost.

529 - Don Reekie (Parkstone Musical Appreciation Group)

The items listed are essential services. Water management and infra-structure is urgent and essential. Although the previous Government did give Council some funds for water Council chose to be totally responsible and the current Government will penalise Council if they fail but do nothing further to assist from taxes or a national infrastructure plan.

533 - Judith Livingstone

Just because 3 waters wasn't explained properly and names badly we must repair the water infrastructure as quickly as possible,

540 - Ross Allen

[Parks> Parks Spending (General)], [Transport>Other]

Too much on parks, heritage, coastal. These projects should be spread out over a longer period as they are not nearly as urgent as three waters and transport.

793 - Erica Stokvis

The people do not want 3 waters!

795 - Gary Phillips

[Spending>Te Kaha]

Te Kaha should be user funded, and three waters has been axed/alterd

850 - Rhondda Poon

It's difficult to say. I've observed the 3 Waters debate and am overwhelmed at the enormity of the water issue in Aotearoa and the cost to us to develop the infrastructure necessary. This is out of the Council's control, but I fear that an essential part of Christchurch's culture is at risk of missing out on funding.

92 - Bill Luff

CCC opposition to Three Waters was short sighted given it is now implying it cannot fund this sector without large and ongoing rate increases. If you can't afford something you have to surrender some degree of control over it.

Transport

Transport (Operations)

General Comments

409 submissions were received addressing transport (operations).

29 comments supported, and 177 comments opposed.

206 comments suggested what could be done differently, and 76 comments provided general feedback addressing transport (operations). The most common theme was comments on our safe streets and neighbourhoods work programme, with positions largely divided between supporting the initiative, or feeling that it the programme is unnecessary and wasteful.

Officer Response
